Census figures show that this definition includes upward of 90 percent the businesses in the country. Yet, the definition cuts by a factor of 10 the average size standard normally used at SBA.

Several Federal agencies have showed a positive interest in exempting very small businesses from regulations that are explicitly intended to govern the conduct of large, Wall Street sized companies. These agencies are fast realizing that not all companies contribute in equal amounts to a given problem. The Environmental Protection Agency (EPA) is a prime example. Recently, the EPA issued regulations pursuant to the administration of the Toxic Substances Control Act. It desired to exempt very small chemical companies its proposed regulations. When it learned, however, that the SBA defined small in this industry as 500 employees or less, EPA rejected the definition and wrote its own.

The family enterprise, as defined in this act, would tend to be family-owned, and in the retail, wholesale, craft, or service business. These are exactly the types of businesses that the drafters of most Federal regulations are least likely to contemplate as the objects of their regulations and paperwork requirements.

The bill attempts only to create an understandable, and simple, definition of very small business; if accepted, the definition could be used to ease the Federal burden on these family enterprises as the opportunity arises. This definition would supplement, not replace, current SBA small business definitions.

A copy of the bill follows:

H.R. 10651

A bill to amend the Small Business Act to define certain small business concerns as family enterprises

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS AND PURPOSE

SECTION 1. (a) The Congress hereby finds that—

(1) certain very small businesses have special problems in dealing with regulatory and paperwork burdens imposed by the Federal Government and in effectively competing in the United States economy;

(2) such small businesses need from time to time special consideration from the Federal Government regarding these regulatory and paperwork burdens, and in solving other special problems;

(3) the first step in providing such special consideration is to define by size very small businesses which are in need of such consideration;

(b) The purpose of this Act is to define by size very small businesses which need special consideration from the Federal Government regarding regulatory, paperwork and other special problems.

(c) This Act shall be referred to as the "Family Enterprise Act."

SEC. 2. Section 3 of the Small Business Act (15 U.S.C. 632) is amended by inserting "(a)" after "Sec. 3." and by adding at the end thereof the following:

"(b)(1) For purposes of this Act, the term 'family enterprise' means any small business concern:

"(A)(i) of which the average of the annual gross receipts for the 3 year period ending with the current calendar year does not exceed $1,000,000, and

(ii) the number of full time employees of which does not exceed 50, or which does not exceed 75 due to seasonal fluctuation, for the current calendar year;

"(B) which does not have more than 10 shareholders;

(C) all shareholders of which are individuals, estates, trusts, or small business investment companies (as defined by section 103 (2) of the Small Business Investment Act of 1958);

(D) which does not have more than one class of stock;

(E) which meets such other requirements as the Administrator may by regulations prescribe.

"(2) For purposes of paragraph (A)(ii), seasonal fluctuations shall be defined as temporary increases in the number of employees of a business, due to cyclical business patterns and having a duration no greater than 3 months.

"(3) For purposes of paragraph (A)(ii), the term 'employee' shall have such meaning as the Administrator may prescribe.

SEC. 3. For purposes of paragraph (b)(1) above, the terms 'estates', 'trusts', and 'stock' shall have such meaning as the Administrator may prescribe.

Mr. Speaker, I urge my colleagues to give their consideration and support to this vital measure for small business.

DUTY-FREE IMPORTATION OF ALL HORSES

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. KEMP. Mr. Speaker. I am introducing today a bill to provide for the permanent duty-free importation of all horses. As you know, the duty on horses was suspended until June 30, 1980, by legislation passed in the 1st session of the 95th Congress.

Under the provisions of this bill, there would be no duty on horses imported for purposes other than immediate slaughter. As my colleagues are aware, the present tariff structure, now suspended, operates discriminatorily among different breeds. For example, certain horses may be imported duty-free for breeding purposes if they qualify as breeds recognized by the U.S. Department of Agriculture. Unfortunately the American quarter horse, which is a native of this country, is not recognized by the Department as a breed and importers of quarter horses must ordinarily pay a duty.

Moreover the difficulty faced by customs officers at the border in valuing horses is overwhelming. How can an untrained officer be expected to accurately value an animal when many in the industry disagree as to its value. The continuation of this requirement unnecessarily and unfairly burdens our officers and results in disparate treatment of importers. The difficulty of administering the duty outweighs its usefulness.

Another problem created by the tariff arises in connection with race horses imported. Since many such horses race in claiming races and are claimed the importers must pay not only the import bond but also a penalty if the horse is not returned to its country of origin within the requisite one year period.

I would like to point out that the revenue produced by this duty prior to its suspension was negligible and probably did not cover the cost of administering and collecting it. In addition, many of the countries from which most horses are imported into the United States do not impose a tariff on horses exported from this country.

Finally, doing away with this unnecessary tariff at this time prior to the termination of the present suspension will avoid the problems that occurred when the last suspension expired in June 1976. At that time the House had passed a bill that I introduced to continue the suspension, but the bill was amended by the Senate just prior to adjournment, and the bill died. While

the Customs Service refused to collect the tariffs after June 1976 knowing that Congress would pass another suspension bill, the administrative and practical problems American horsemen faced during that period were enormous. By acting now we can avoid these problems. While tariffs serve a useful purpose in many instances, the duty on horses imported into the United States has created untold problems for American horsemen and should be put to rest permanently.

WHY ARMS CONTROL HAS FAILED

Hon. John E. "Jack" Cunningham

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. CUNNINGHAM. Mr. Speaker, in recent months there have been charges raised that those opposing or questioning the forthcoming SALT II agreement were against strategic arms control—despite the fact that often the skeptics were merely raising very legitimate doubts about both Soviet compliance to signed arms treaties in the past, or simply wondering whether or not this Nation was acting correctly in making SALT carry the entire burden of arms control. One could argue that perhaps we have lost track of what arms control is all about and—in desperate pursuit of what may turn out to be a most unfortunate agreement—have gotten locked into a SALT negotiating process that may devastate those strategic arms control measures that have been created.

Is there any way out of this mess? More importantly, how in the world did we ever get here in the first place?

I realize that any debate on arms control in the U.S. Congress today is being conducted in a highly politicized environment. Indeed, this environment has become so polarized that those opposing SALT as drafted are being recklessly—I would even say viciously—accused of being far right political primitives or aging cold-warriors or super militant hawks. There are some who go so far as to say the "SALT skeptics" essentially want an uncontrolled arms race. These assertions are wrong—and they can only poison an extremely serious debate about this Nation's future strategic prospects.

With these considerations in mind, I would like to refer my colleagues to a very timely, well argued argument by Prof. Edward Luttwak of Johns Hopkins University that the United States has been conducting strategic arms control in the wrong manner. Dr. Luttwak's article in the January 1978 issue of Commentary is entitled "Why Arms Control Has Failed"—and several of his observations are devastating of recent U.S. conduct of SALT:

While arms control can only be effective in limiting specific deployments under specific arrangements, serving thereby as an alternative to force-building, the United States has consistently misused arms control in pursuit of the abstract goal of "strategic parity." When the concept was challenged, it was redefined by the White House as "essential equivalence," which is equally vague. Neither set of words has any meaning in the reality of weapons or forces. Neither set of words can define negotiating objectives.

While arms control can only be effectively pursued if negotiated limitations are defined with extreme precision, the United States has consistently tolerated ambiguities in its urgent pursuit of agreement for its own sake. As a result, a new and entirely artificial source of U.S.-Soviet tensions has been created. Changes in the Soviet strategic forces that would otherwise have passed almost unnoticed have excited suspicion and resentment when seen in high contrast against the poorly drafted texts of the 1972 Moscow accords. One side-benefit of each arms-control agreement should be to build confidence for the next, but the tension-creating ambiguities of SALT–I have utterly defeated this purpose.

While effective arms control requires that high standards of compliance be enforced, the United States has consistently allowed Soviet probing to develop without effective challenge. This permissive stance was a natural consequence of the attempt to use SALT as a general sedative in US-Soviet relations. The attempt has undoubtedly failed, SALT having become, on balance, a further source of friction. But in the process, arms control itself has been discredited, since negotiated agreements have been enforced far too loosely in deference to the atmospherics of detente.

Above all, the United States has misused arms control in the attempt to dampen the strategic competition in itself, as if the growth of strategic arsenals were the cause of Soviet-American rivalry rather than merely one of its symptoms, and incidentally a much less dangerous symptom than the growth of non-nuclear forces, whose warlike use is much more likely.

These are extremely serious—and very painful—accusations. They directly implicate the leadership of this country and—in great part—the "mainstream" of the American arms control community. Luttwak is arguing that we may—in our very miguided enthusiasm for certain ideological preferences in arms control—have compromised the very possibility of such arms control in the future, and that we may have already laid the groundwork for a grim strategic crisis in the near future:

. . . In American policy, arms control has usurped the function of strategy and has become an end in itself. The consequences are now manifest: the unilateral arms control pursued by the US since at least 1964, and the bilateral efforts that culminated in the 1972 Moscow agreements, have diminished rather than enhanced American security; they have not contained the growth of the arsenals of both superpowers; they have increased rather than diminished outlays on US strategic forces; and they have now begun to compromise strategic stability, since the increasing obsolescence of an old bomber force and the approaching vulnerability of American land-based missiles will soon leave the submarine-missile force exposed to undivided Soviet counterforce efforts. As a result of these unhappy trends, we may be approaching a new period of acute instability in which we will be forced to undertake very expensive build-up programs on a crash basis. . . .

In short, we have been guilty of sloppy thinking and inexcusable negligence in our arms control policymaking. I think it is safe to say that this administration shows no sign of reversing the process—in fact, its recent actions have accelerated these trends and it no longer shows any intellectual flexibility in this area. What is even worse is that there are no "devil's advocates" in the Carter inner circle—people with the courage to say, "Maybe we're wrong," or "Maybe SALT won't work."

I would like to insert this article into the RECORD; but before I do so I would like to draw attention to Dr. Luttwak's concluding paragraph:

American strategic policy has been dominated for more than a decade by the overwhelming desire to bring the Soviet-American competition to an end. Arms control could never serve such an unstrategic purpose, and its use to mask a renunciatory passivity in the face of the Soviet build-up has merely served to compromise a perfectly respectable tool of strategic policy.

Mr. Speaker, in the next few months this body may indeed be asking itself whether its actions in approving SALT II will serve "to mask a renunciatory passivity in the face of the Soviet buildup." If this body does precisely that in approving a disastrously written SALT agreement that rewards the Soviet Union for all-out arms racing during the period of SALT I, then we will have morally and spiritually compromised ourselves beyond redemption. I use these words in full awareness that they are freighted with Christian symbolisms—but this agreement will pose moral and spiritual choices to this body that have awesome dimensions, and I am justified in my use of such terms. Our very standards of government and our honesty in the administration of the public well-being will be at stake—and I urge the Senate to think very seriously about Professor Luttwak's critique of our arms control policymaking.

SUPPLEMENTARY FINANCING FACILITY

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. HARKIN. Mr. Speaker, in the next few days, Congress will be deciding whether to authorize $1.7 billion for a new supplementary financing facility to the International Monetary Fund. Experience has clearly shown that the decisions of the IMF have had profound effects on the political and social fabric of borrowing countries. For this reason, it is imperative that the operations of the IMF are thoroughly understood.

An article in the January 9 edition of Business Week is particularly instructive. Not only does it outline some of the problems encountered by a particular country in dealing with the IMF, but the article also asks some penetrating questions about the IMF's purpose and its role.

I urge all my colleagues to read "Portugal: A Hard Test for the IMF," which I have included below. As the bill to authorize this new IMF facility and the amendments to it are debated, it is virtually important that we remember the human rights and human needs consequences of IMF actions.

PORTUGAL: A HARD TEST FOR THE IMF

Portugal's current political crisis is echoed in a growing crisis of identity at the International Monetary Fund in Washington. Although neither the fund nor the U.S. gov-

ernment acknowledges it, the role of the IMF has become a principal issue in Portugese politics. It has also been an issue in Peru and will increasingly become one in Turkey for much the same reasons. The problem is that when IMF technocrats recommend strong medicine for local economic problems, the result can be political problems that are too tough for a government to handle. In Portugal's case, the IMF's medicine has polarized politics, pitting conservatives against radicals, businessmen against socialist economists, and north against south.

Bankers, academics, and IMF technocrats are starting to debate what the fund's role should be. Should it continue to be a pristine pure economic policeman, ready to take up short-term, balance-of-payments problems for member governments but relatively removed from politics and long-term economic development? Or, in the post-1974 world of huge oil-import debts, sloshing international liquidity, and world recession, should the IMF show more concern for employment and growth, and should its functions be tied in more closely with those of other international development agencies?

Larger carrot. The argument is just under the surface in the U.S. Congress, where testimony is being heard on the new Witteveen facility—the $10 billion fund that is designed to help the IMF offer a larger carrot to countries it is called on to discipline. The less developed countries—as well as some academic economists in the U.S. and some members of Congress—are pressing for the IMF to make loans for medium- and long-term development schemes.

Portugal's problems are typical of those that traditional IMF programs fail to ease. Since the fall of the Caetano dictatorship, the country has lived far beyond its means. Its annual payments deficit runs to $1 billion. It has passed out large wage increases. And the government has set up whole new state-owned industrial enterprises and agricultural co-ops that are piling up huge deficits.

Conservative economists and politicians in Portugal argue that the IMF's call for restricting the country's international borrowing simply means that credit will be cut back for the domestic private sector. Furthermore, they say that the IMF's technocrats ignore the realities of the international economy: Portugal is essentially an underdeveloped country. It could have an expansive economic program in, for example, construction, without the need for large foreign borrowing. But when the IMF made its recommendations earlier this year, it followed its tradition of calling for reduced foreign borrowing, deflation, and devaluation. The devaluation did nothing to boost Portugal's exports, limited to a few items—cork, wine, and textiles—for which demand is relatively inelastic.

Few takers. The only way for the IMF to help Portugal, the argument runs, is to take on a medium-term program for development. Short-term anti-inflation programs, even with standby foreign exchange credits, say the IMF's critics, produce recession without attacking the budget deficits or reforming the overloaded government owned sector.

The IMF's recommendations for Portugal—on which depend a $50 million loan from the fund and a $750 million credit from Western Europe, Japan, and the U.S.—have given the Portuguese a convenient scapegoat. Prime Minister Mario Soares made acceptance of his deal with the IMF a question of confidence in his government, and he lost to an alliance of the right wing and the Communists.

Having made their gesture, those forces may yet permit Soares to return to power, but his government will be weaker for its defeat. And for the U.S., which set a high priority on getting a strong non-Communist government in Portugal three years ago, the result is another thorny international political and economic problem.

THE NEED FOR MORE COMPLETE FOOD LABELING

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. WHALEN. Mr. Speaker, the December 15 issue of the Chicago Tribune carried an article entitled, "Ice Cream Tragedy Shows Labeling Need." It described my interest in more complete disclosure and labeling of the ingredients used in food products. The piece also conveyed my request for information from people who have had personal problems caused by inadequate food labeling.

As a result of that article, I have received dozens of letters which indicate the need for more complete disclosure of food ingredients. In order to demonstrate that need to my colleagues, I wish to insert excerpts from some of the letters that I have received.

For Mrs. David W. Fox of Hinsdale, Ill., incomplete ingredient labeling is a "very real and terrifying problem." As she is severely allergic to peanuts and to pinto and soya beans, she must carry an emergency kit in order to give herself an injection, and must then report to the nearest hospital emergency room, should she unknowingly ingest one of these ingredients or their byproducts.

Mrs. Warren E. Snyder of Chicago, Ill., wishes labels would indicate when mustard is added instead of saying "spice." Giant hives broke out in her throat, causing her to pass out, as a result of eating a product which she did not know contained mustard. Fortunately, the fire department and her doctor revived her.

Frances M. Sapone, a registered dietician in Chicago, knows all too well how difficult it is for patients to follow special diets, especially when all the ingredients in a food product cannot be readily identified.

Unfortunately, one cannot always rely on the food manufacturer to voluntarily supply ingredient information. Such was the case with Rose Marie Vita from Chicago, Ill. After her son had an allergic reaction to a commercial spaghetti sauce mix, she wrote to the manufacturer requesting a list of ingredients used in that product; they refused to honor her request.

Some people found themselves becoming allergic to a product that they had used for years, as a result of a change in ingredients. Dr. Irma Aleshire, 1924 graduate of Rush Medical College, could not understand why she was getting severe food-allergy symptoms from nearly all types of canned fruit, products which gave her no previous trouble. After several months of illness, she found the clue in a newspaper article—canners were now using corn syrup instead of sugar in the juice used to pack their fruit. Dr. Aleshare had been allergic to corn for most of her life. Yet the labels on the cans remained unchanged and continued to say "packed in heavy syrup," she reports.

Mrs. Patricia Caren of Wheaten, Ill., says although her family's allergies are not life threatening, they present medical problems and are uncomfortable. For her allergic family, it is "absolutely essential" that they know all the ingredients that a food product contains.

We all remember the tragic story of Michael Grybsank, who was so severely allergic to peanuts that he died after eating ice cream containing peanuts. Michael carefully checked the label before he ate, but it did not indicate the presence of peanuts among the other ingredients. There are many people with severe food allergies such as Michael Grybsank had. Must more of them die before complete ingredient labeling is required?

As my staff continues its investigation of the need for better food product labeling, I will keep my colleagues informed of our findings.

ETHICAL BACKSLIDING

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. MAZZOLI. Mr. Speaker, I am gravely concerned over reports that Congress is backsliding in its ethical reform efforts.

The House started out like a ball of fire last year, but our efforts fizzled out along the way. Yet, it is absolutely imperative that the House does everything possible to restore the confidence of the American people in the quality, the honesty, and the probity of its elected legislators.

I am a member of both the Select Committee on Ethics and the Judiciary Committee. These committees have completed their work and have reported Government-wide financial disclosure bills to the House Rules Committee. Now these important bills appear to be bogged down in the legislative process.

The House leadership on both sides of the aisle must give fullest support to Government-wide financial disclosure and must see to it that bills requiring such disclosure are soon reported from the Rules Committee to the full House for action.

In a related vein, rumors are rampant that a move will be made to weaken the House rules adopted in 1977 limiting outside income Members can earn, placing limits on gifts Members can receive, and abolishing Members' unofficial office accounts, among other similar moves. I hope these are only rumors and that House leadership will see to it that no changes are made in the 1977 rules.

If changes, however, are made and these rules are weakened, then the people could not be faulted if they hold to their present belief that Congress proposes reforms only in reaction to a scandal. And, when the scandal has abated,

the reforms are quietly shelved and it is business as usual.

I salute the Louisville Courier-Journal which, on December 30, 1977, carried a strong editorial on the need to guard against backsliding in the effort to enact the strongest possible ethical code for the House.

PRESIDENT CARTER'S BLUNT "NO" TO FARM STRIKERS' DEMANDS

HON. WILLIAM C. WAMPLER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. WAMPLER. Mr. Speaker, farmers from various parts of the United States, including the State of Georgia, have stopped by my office in recent weeks to discuss the proposals of the American agricultural movement. One cannot help but be sympathetic to the plight of these farmers who impressed me as sincere, hardworking individuals, who claim that they do not want a "Government handout" but want the marketplace to provide them a fair price for their products.

I have advised these farmers to find out whether President Carter would support any of their demands. After all, President Carter and Vice President MONDALE had promised farmers higher prices in the 1976 election.

The members of the American agricultural movement got a "blunt no" from President Carter yesterday in his news conference as reported in an article reprinted below from the Wall Street Journal for January 31, 1978:

FARMERS' DEMANDS REJECTED BY CARTER, TERMED TOO COSTLY

WASHINGTON.—President Carter bluntly rejected the demands of striking farmers for big increases in farm prices, saying it would be too harmful for the economy.

The strikers, a loosely organized group of farmers who charge that federal farm policy is inadequate, are demanding a return to 100 percent of "parity" because of poor economic conditions on U.S. farms due to low crop prices. "Parity" means the price level farmers would have to receive for their crops to give them the same purchasing power they had in the years just before World War I.

For weeks, the Carter administration has been saying that the strikers' demands weren't likely to be met. But the President stated the case more firmly than ever at his news conference yesterday when he said that "the request or demand for 100 percent parity isn't well founded," explaining, that it "would be too costly.'

The President said achieving price parity would cost the federal treasury $20 billion to $25 billion and "would also mean that the price of American farm products would be extraordinarily high and that they would be noncompetitive in international markets." Government analysts figure full parity would boost food prices 25 percent.

Mr. Carter also repeated earlier administration predictions that the recently enacted farm bill will improve farmers' incomes and eventually enhance their view of his administration. The bill is expected to yield farmers about $7 billion in direct payments in 1978.

GEORGE BAMBA DEAD—NOTED GUAM POLITICIAN

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. WON PAT. Mr. Speaker, it is with great sadness that I note the passing of a close friend and former colleague of mine, the Honorable George M. Bamba, of Guam, at the age of 49.

Mr. Bamba, better known to his legion of friends simply as "George" passed away on January 16, 1978 at the Medical Center of the Marianas. He had been hospitalized since January 12.

It is hard to put into proper perspective the countless contributions that George Bamba made to his fellow citizens of Guam during his relatively short, but extremely active public career. Perhaps it was best described by a fellow member of the Guam Legislature who recently said of George Bamba that he "was always protecting the small guy's rights."

Like another memorable legislator, Hubert Humphrey, George Bamba dedicated his public life to protecting the rights of his constituents, rich or poor, Democrat or Republican. His primary interest was their welfare and it was the unswerving dedication to being their spokesperson that made George Bamba one of Guam's top votegetters during the 16 years he served in the Guam Legislature.

I had frequent opportunity to work quite closely with George during those formative years on Guam. He was a friend I could count on for support when the going got rough and I knew that his counsel was both valuable and contained a unique insight into the often complex issues of the day. But perhaps most important was the knowledge that George Bamba would give his utmost to a cause he felt was in the best interests of the people of Guam. Later, when I became our island's Washington Representative, I was privileged to again maintain a close and effective working relationship with my former colleague as we and others worked hard to win increased political and economic benefits from Congress.

In 1974, George Bamba retired from public life to turn his attention to his own affairs and to spend more time with his wife, Cecilia, and his 10 children. While I missed his support as an island legislator, it is to his credit that his interest in helping the "small guy" did not end with his political career. Together with his most able wife, they worked ever hard on behalf of legislation then pending before Congress to provide Federal compensation for lands taken on Guam after World War II. It is partly to their staunch efforts that I was able to persuade Congress to pass their measure last year.

It is not often we are rewarded in this life with a true friend such as all of Guam possessed in George M. Bamba. His record of concern for the people is a living memorial for a great man. I mourn his passing as do his many friends, both in Guam and here in the States. To his family and associates, I offer my deepest sympathy. He is gone but certainly shall not be forgotten.

I insert the attached article by the Guam Pacific Daily News after my remarks. Thank you.

The article follows:

[From the Pacific Daily News, Jan. 16, 1978]

EX-SENATOR BAMBA DEAD AT 49

George M. Bamba, a former senator who served in the Legislature from 1962 to 1974, died yesterday at the Medical Center of the Marianas. He was 49.

The cause of death was not disclosed.

The former lawmaker from Agana Heights was one of 56 patients moved yesterday morning from Guam Memorial Hospital to the Medical Center of the Marianas but his attending physician, Dr. Frederick Atendido, said there was "no connection" between the transfer and Bamba's death.

Bamba was pronounced dead at 3 p.m.

Atendido said Bamba was hospitalized Jan. 12 and placed in intensive care. Bamba's condition, Atendido said, was "serious" and "death was not a surprise."

Funeral arrangements are pending.

Bamba, a Democrat, broke party ranks in 1974 to support Republican gubernatorial candidate Paul Calvo. When Calvo lost in the primary to Carlos Camacho, Bamba and his wife Cecilia formed the Write-In '74 Party to support Calvo.

The third-party effort forced a runoff between Camacho and Democratic challenger Ricky Bordallo which Bordallo won by a slim margin.

Bamba retired from politics in 1974 saying at the time, "It was time for new, younger talent" to serve in the Legislature. During his retirement, Bamba frequently criticized the policies of Gov. Ricky Bordallo.

A senator in the 4th through the 12th Guam Legislatures, Bamba chaired the Rules Committee in the 9th and 10th Legislatures, and was legislative secretary in the 11th and 12th.

Dem. Senator Carl T. C. Gutierrez, an Agana Heights colleague of Bamba's in the Legislature, said last night, "He went all the way through, he didn't stop at anything."

"Bamba was always protecting the small guy's rights," Gutierrez said.

An insurance underwriter by profession, Bamba attended George Washington High School and Father Duenas Memorial High School. He also attended St. Joseph's College in Mt. View, California, College of Guam, and La Salle Business College.

Bamba is survived by his wife, Cecilia, and 10 children.

TRIBUTE TO DWIGHT DAVID EISENHOWER

HON. DONALD J. MITCHELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 25, 1978

Mr. MITCHELL of New York. Mr. Speaker, there have been few men of peace who have been great leaders in wartime, and few successful soldiers who could fulfill the demands and aspirations of a nation at peace. Dwight D. Eisenhower was a man whose greatness was not restricted to one time or place or position, because, in the true sense of the word, he possessed a quality which

transcended all of these. I am honored to join in the commemoration of the 25th anniversary of his inauguration as our 34th President.

His impressive achievements need not be recounted in great detail here; they are already recorded alongside those of other men of his stature in the chronicles of history. What is important to remember on this occasion is the spirit and leadership he contributed to our country, and the love and admiration he received in return. In our preoccupation with "instant history" today, and with the debunking of Presidential legacies even before they are created, he stands out as one of the foremost occupants of the Oval Office to possess the gift of inspirational leadership.

The combination of that leadership and the crucial ability to administer programs and nurture his ideas to completion helped forge a stable base for postwar America. Our country resumed its interrupted momentum under his guiding philosophy of "Modern Republicanism," which stressed Government economy and decentralization of the Federal bureaucracy through more interaction with State and local government, as well as the private business sector.

While furthering increased local participation in the governanace of the people, he also fulfilled the purpose of the Federal level by pursuing programs which could be implemented well only on a national level. He was aware of the importance of balancing the Nation's budget, and continually upheld it as a responsibility of good government. Then, working within this self-imposed limit, President Eisenhower managed to increase minimum wage, construct schools and highways needed by the expanding population, establish a "soil bank" for farmers, distribute farm surpluses through the school lunch program, and take steps to relieve the pangs of postwar depression.

As President, Dwight Eisenhower realized that, without a measure of tranquillity abroad, the country would not be free to pursue the hard-won fruits of peace. He complemented the "dynamic conservatism" that refired domestic progress with continual efforts to cool international frictions. President Eisenhower was successful in reducing United States-U.S.S.R. tensions during his administration, furthered international disarmament and negotiated the Korean armistice while encouraging peaceful competition through the inauguration of the U.S. space program.

Today, the period of the 1950's is looked upon with nostalgia. I must admit to sharing some of that feeling, since it was a time when I had returned from the war to resume a normal life and a college education, like so many other of my fellow countrymen. Dwight Eisenhower was among us, having left the Army to assume the presidency of Columbia University, where I was studying. He had already tried to discourage supporters of a Presidential draft in 1948, but 4 years later the college president and former soldier acknowledged the call to become a statesman and the leader of the Republican Party. At that point really began the era that is being popularly resurrected today. If such a time of change and readjustment is remembered as oddly benign now, it is because the man who helped lead the Nation out of the confusion of war also led it into the harmony and order of peace.

DEBORAH HOSPITAL BUILDS INTERNATIONAL GOOD WILL

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. EILBERG. Mr. Speaker, I have a most heartwarming story to report to my colleagues, one which demonstrates how a group of dedicated American volunteers can make an invaluable contribution to international good will.

In the spring of 1977, a 10-year-old girl named Shakila Razak was slowly dying in Karachi, Pakistan. Three years earlier, she had suffered a severe case of rheumatic fever, and her heart and other body facilities were damaged beyond the repair capability of any local medical institution.

Shakila's plight was brought to the attention of the Deborah Heart and Lung Center, whose hospital is located in Browns Mills, N.J. Deborah's international headquarters is located in the city of Philadelphia, which I am privileged to represent in Congress, and through the years I have followed the institution's growth and good work with a great deal of admiration.

Shakila's aunt, a resident of Rego Park, N.Y., contacted Deborah's Rego Forest Chapter, and through the chapter the center agreed to perform the necessary operation for Shakila at no cost. Arrangements were made for the young girl to come to this country.

On December 8, Deborah's surgeons—who perform hundreds of delicate heart operations every year—replaced a damaged mitral valve in Shakila's heart. Because of the child's emaciated condition, the operation involved a great deal of risk, but through the skill of Deborah's surgeons and the care she received at the center, Shakila is now on her way to recovery and normal health.

The operation on Shakila attracted worldwide attention, and Shakila's story was widely reported in Pakistani newspapers. After the operation, Shakila and her father, Abdul Razak, and Deborah physicians were featured in a broadcast over the Voice of America.

According to Reuben E. Cohen, president of the Deborah Hospital Foundation, doctors report that Shakila is rapidly regaining her strength. She will return to Deborah periodically so that the doctors can monitor her recovery, this being standard procedure for all patients who have undergone open heart surgery.

As remarkable as Shakila's story is, hers is just one of the many at the 130-bed hospital. Deborah specializes in the care and treatment of patients of all ages with cardiovascular and pulmonary diseases, regardless of race, color, creed, or national origin. Funded in 1922 as a tuberculosis sanitorium, Deborah has never in its history billed a patient. Instead, it is funded by its 300 chapters and 40,000 volunteers centered mostly in Pennsylvania, New York, and New Jersey.

I am honored to offer for the RECORD this account of how Deborah Heart and Lung Center reached half way around the world to rescue a small girl named Shakila Razak, and I commend to my colleagues these news accounts on Shakila's story from the New York Times of November 30, 1977, and the Philadelphia Evening Bulletin of December 9, 1977:

10-YEAR-OLD PAKISTANI GIRL WAITS OPEN-HEART OPERATION IN JERSEY

(By Robert Hanley)

BROWNS MILLS, N.J., November 29.—Children's World is a long way from Karachi for Shakila Razak, an emaciated 10-year-old Pakistani girl awaiting open-heart surgery for a debilitating heart disorder.

Children's World, the name given the 30-bed pediatrics ward at the Deborah Heart and Lung Center here, is Shakila's final stop on a journey that has brought her halfway around the world for the operation her family hopes will correct a heart-valve deficiency.

A team of 22 cardiologists at Deborah, after six days of tests, announced today that the child would undergo surgery Dec. 8 to replace a damaged mitral valve that is allowing blood to leak from one chamber of the heart back into the previous chamber instead of being pumped out into the body. The mitral valve controls blood flow from the heart's atrium to its left ventricle. The disease was said to stem from rheumatic fever the child suffered three years ago.

As the team, headed by Dr. W. Jay Eldredge, Deborah's chief of pediatric cardiology, made the announcement, little Shakila was in the game room at Children's World, painting a plastic form in reds and greens. The toy-laden room, an airy blend of yellow and brown hues, has been Shakila's favorite refuge.

LANGUAGE IS NO BARRIER

"She likes to paint with brushes and watercolors," said Hugh Harper, the center's spokesman. "She and all the other kids have been playing together. She can't speak a word of their language, but they don't care. Kids adjust."

Shakila's presurgical treatment and operation, which might cost as much as $20,000 in other hospitals, will be free, in keeping with Deborah's 54-year-old policy of "never billing a patient," according to Mr. Harper.

The five-story, 135-bed brick center is a private, nonprofit, and nondenominational outgrowth of a two-cabin tuberculosis sanitarium that opened here in 1923 in a grove of pines and cedars about 200 yards from an entrance to Fort Dix. According to Mr. Harper, the center's annual operating costs, which range between $13 million and $15 million, are financed solely by Blue Cross medical insurance reimbursements, by occasional large contributions from relatives or friends of heart or lung patients, and by the proceeds from hundreds of fund-raising card and bingo games and candy and bake sales staged by Deborah's thousands of volunteer charity workers in 300 chapters scattered around New York, New Jersey and Pennsylvania.

Most of its annual patient load of 8,000 afflicted with heart or lung disease is drawn from that tristate region.

Mr. Harper said the treatment and surgery for Shakila is "what's being done here for hundreds every year."

But despite that common denominator of heart and lung disorders, Mr. Harper said that Shakila's trip of thousands of miles for treatment was a rare occurrence for this facility.

She is the only child of Abdul Razak, a wholesale distributor of soap who lives in Karachi. Her mother died seven years ago, four years before Shakila was striken with the rheumatic fever. Her physical condition has deteriorated steadily since. Her piercing, coal-black eyes seem sunken and frightened now. She weighs 44 pounds.

"We usually don't see this severe a case in a child," Mr. Harper said. "The condition of her heart is more that of an old person."

Shakila was brought here largely through the efforts of an aunt, Joan Aziz, of Rego Park, Queens, who was familiar with the Deborah Center chapter that serves Rego Park and Forest Hills. The chapter took Mrs. Aziz's appeal to Deborah's administrators, and they agreed to admit her. That approval came last spring.

EVERY DAY COUNTS

But, according to Mrs. Aziz, who is a nurse, the American Consulate in Karachi refused her repeated requests over a five-month period to grant the child a three-month visa permitting her into the United States. Mrs. Aziz called the refusals "very undemocratic" adding: "She needed every day of her life to get medical care."

Finally, on Nov. 1, the Immigration and Naturalization Service in New York granted a permanent resident visa to the child. And, on Nov. 15, she flew to New York free on a Pakistani airline with her father and an uncle. Shakila stayed at Mrs. Aziz's home until her admittance here on Nov. 21. She has been here since for tests, except for a four-day return to the Aziz home for the Thanksgiving holiday. Today she was released after the announcement on the surgery, and she is to return next Monday for pre-surgical preparations.

"We thought it was better for her to leave so she could get some of her own food and speak her own language for a few days," Mr. Harper said.

Mrs. Aziz said the language barriar and Shakila's dislike for American food made her "nervous" in the hospital. But she called her a "beautiful, benevolent child, with a ready smile" who is always eager to tidy up the Aziz household or buy gifts for her relatives in Karachi. With her feeble condition, it's amazing."

SHAKILA RECOVERING: HEART SURGERY SUCCESSFUL

(By Bill Jerome)

BROWNS MILLS.—Ten-year-old Shakila Razak is resting comfortably at Deborah Heart and Lung Center here following the replacement of her damaged heart valve by surgeons yesterday.

The Pakistani girl will remain in the hospital's intensive care unit until Saturday. A statement on the long-range success of the surgery is not expected before then, according to hospital spokesman Hugh Harper.

"She has jumped the first great hurdle," Harper said. "She is progressing as you would hope any patient would progress."

The story of the 44-pound youngster's trip halfway around the world to have her damaged mitral valve repaired is being told not only by the American press but by voice of America broadcasts overseas, Harper said.

Shakila's father, Abdul, kept a vigil at Deborah during the three-hour operation yesterday.

Hospital employes who understand the Urdu language spoken by the father translated his comment after the surgery as, "everything is quite right right."

The youngster is the only child of Razak, a wholesale distributor of soap products in Karachi. He and an uncle, Ghulam Nabi, accompanied her to the United States on Nov. 15. The child's mother died seven years ago.

Shakila's heart trouble, which began three years ago when she contracted rheumatic fever, developed into a defective mitral valve, Harper said.

The valve allowed blood to flow back into her heart instead of pumping it out into her body, Harper said. The mitral valve connects the upper and lower chambers of the left side of the heart.

During surgery by a six-member team of physicians, a valve made of animal tissue was installed in Shakila's heart. For a one-hour period, a heart-pump machine took over the function of her heart, Harper said.

"The first 48 hours after any heart operation are critical," Harper said. "The risk factor was higher than we would have liked it to be," he added, citing the girl's undernourished condition due to her heart ailment.

Pictures of the 4-foot-2 child, whose coal-black eyes suggest a Keane painting, stare out at millions of newspapers readers daily.

Harper stressed that despite the widespread public attention in Shakila's case, "what has been done for her is exactly what is done for anyone at Deborah."

The 54-year-old hospital, supported largely by volunteers in New York, New Jersey and Pennsylvania, is providing free care for Shakila. The center never bills its patients, Harper said.

LIFTING THE BURDEN OF CARRYOVER BASIS

HON. MARTHA KEYS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mrs. KEYS. Mr. Speaker, today I am introducing a bill to deal with a number of problems which have been brought to my attention as a result of the enactment of the carryover basis provisions of the Tax Reform Act of 1976. The 1976 act changed prior law under which property passing from a decedent generally received a basis equal to its fair market value on the date of the decedent's death for purposes of determining the gain or loss from the subsequent sale or exchange of the property by the decedent's estate, heir, or beneficiary.

The provisions, as adopted, rates serious administrative and compliance problems for executors, heirs, and beneficiaries, and the Internal Revenue Service. These problems cause especially difficult burdens for the modest-sized estates—including family farms. I believe that we can adopt a number of changes to resolve the legitimate complaints involving the administrative problems and complexities.

My bill eliminates small and moderate-sized estates from coverage under the carryover basis rules and the associated reporting requirements. My bill provides an outright exception for an estate consisting of $175,000 or less of carryover basis property. The $175,000 roughly approximates the exemption equivalent of the estate and gift tax unified credit when it is fully phased in by 1981. In these cases, the basis of assets would be stepped up as under prior law and no special reporting by the executor would be required. As a result of this change, it is estimated 98 percent of all estates would be exempt from carryover basis. In those remaining cases where the carryover basis rules do apply, the minimum basis adjustment would be increased from the $60,000 under present law to $175,000. Further, in order to simplify computations, this adjustment would be made before the adjustment provided for death taxes attributable to appreciation.

The bill would also simplify the basis adjustment for death taxes attributable to appreciation and make it more equitable First, the death tax adjustment would be made on the basis of the marginal estate tax rate rather than the average rate. This approach would provide substantially the same treatment for estates and heirs where assets had been retained until death as is the case for estates where assets are sold before death and the income tax liability incurred reduces the estate tax liability at the highest estate tax marginal rates. Second, the bill would consolidate the three separate death tax adjustments provided under present law into one single adjustment. Third, the death tax adjustment would be made with respect to all appreciated carryover basis property rather than excluding marital and charitable deduction property. This will alleviate some of the problems faced by an executor in trying to decide to whom property should be distributed because it will eliminate the death tax adjustment as a factor to be considered.

The death tax credit would be based solely on the Federal estate tax rates before the credit for State death taxes is taken into account. This would eliminate the need to make any additional calculations for State death taxes in excess of the credit allowable. In this instance, I believe the need for simplification outweighs the need for absolute precision in taking relatively insignificant amounts for State death taxes into account. The bill would also prescribe a pro rata rule for allocating appreciation to beneficiaries in determining the estate tax attributable to appreciation. This rule would provide certainty in making the calculation and thereby eliminate the suspended basis problems an executor would face in ascertaining to whom property actually passes and the resulting effect upon deductions, such as the marital deduction for purposes of determining the estate tax attributable to appreciation.

In addition, the death tax adjustment would be based on 110 percent of the estate tax attributable to appreciation determined on the basis of the estate tax return as filed. The extra amount allowed would be to cover any subsequent audit adjustments which do not significantly change the tax liability. In this way, recomputations would not be required every time there was a minor audit change. If audit adjustments increased the estate tax liability by more than 10 percent, recomputation of the basis adjustment for death taxes would be permitted.

The bill contains a number of changes to simplify the operation of the carryover basis fresh-start adjustment for appreciation accruing before 1977. The fresh-start adjustment would be permitted for purposes of determining loss as well as gain. However, the liberalized adjustment for values on December 31, 1976, could not be used to increase the heir's basis above the value used for estate tax purposes. Thus, the "split basis" for gain or loss under present law would be eliminated. In addition, a formula would be provided to determine a minimum basis for fresh-start purposes. It would apply to nonbusiness tangible personal property and to a personal residence. It is in these cases where it is most likely that a decedent would not have kept adequate basis records before 1977. In general, the formula assumes that the post-1976 appreciation accrues at approximately 6 percent a year. Further, the bill would provide that the formula would not reduce the fresh-start basis to less than 25 percent of the value of the property at the time of the decedent's death.

Finally, the bill changes the material participation requirements for purposes of the special estate tax valuation rules for farm or closely held business real property. Under present law, the decedent or a member of his family must have materially participated in the operation of the farm or business for 5 out of the 8 years preceding the decedent's death. In addition, there is a recapture of the estate tax savings if the qualified heir or member of his family does not materially participate in the farm or business operations. In either case, the activities of an agent are not taken into account. These qualification requirements were intended to distinguish a family-owned and operated business from an ordinary investment.

However, there are situations where the material participation requirements impose an unreasonable hardship. For example, no farmer or businessman could retire without risking loss of eligibility for the special use valuation provision if no member of the family could step in and run the farm or business. In addition, there are situations where the qualified heir may be incapable of running the farm or business and must use the services of an agent. My bill would deal with the retirement problems by providing that eligibility for special use valuation will not be lost because of the material participation requirement if the decedent or the surviving spouse had operated the farm or business for 20 years. The bill would also provide that the activities of an agent will be treated as material participation for an heir if the heir is a minor, a student, a disabled person, or a surviving spouse who has attained age 62.

STATISTICAL VEIL AND POVERTY

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. HAGEDORN. Mr. Speaker, I would like to call to the attention of my colleagues an excellent study on official poverty definitions delivered by Dr. Morton Paglin of Portland State University at the Hoover Institution Conference on Income Redistribution at Stanford University in the fall of 1977.

Dr. Paglin's thesis—that official poverty statistics are deceptive because of their failure to cost out in-kind welfare benefits—is one that he develops at some length. He concludes that—

An acknowledgment of the major impact which the in-kind transfers have in reducing poverty need not imply a preference for this approach over a cash transfer strategy. The in-kind programs are beset with inconsistent eligibility criteria, and have failed to coordinate program benefits; they have produced inequities, disincentives, and wasteful administration. But this should not obscure the essential fact that the transfers have been on a sufficiently massive scale to effect a major reduction in the poverty population. It would have been amazing if they had not done so. What is surprising is the lack of recognition of this accomplishment. Social scientists have generally accepted and have given wide currency to the official poverty estimates. It is time for the statistical veil to be lifted so that the poverty problem can be seen in its true dimensions.

From 1959 to 1975, Dr. Paglin notes that in-kind housing transfers to the poor increased by 750 percent in real dollar terms, food and nutrition transfers by 1,620 percent, and medical services by 1,350 percent. In constant (1974) dollars, the market value of transfers to the preprogram poor increased from a total of $985 million to nearly $13 billion.

While the official poverty rate has been reduced from 22.4 percent of the population in 1959 to 12.3 percent in 1975, Dr. Paglin observes that consideration of these in-kind transfer programs would have produced figures of 17.3 and 3 percent, respectively, representing an 83-percent drop in poverty during this period. He is careful to note that, while this downward trend has been proceeding at a relatively consistent rate throughout the entire 16-year period, the reductions in number of poor persons are attributable largely to increased earnings during the first half of the period, and to increased transfers in-kind during the second half. The implications of these varying modes of poverty reduction for the nonpoor population is outside the scope of Dr. Paglin's study.

Dr. Paglin also reminds that the official poverty statistics published by the Bureau of the Census, on the basis of which so many billions of dollars have been expended, do not consider other nonincome resources which may insure that many "poor" households in fact have adequate levels of consumption. These may include retired persons living on savings, households supported by tax-deductible family contributions, households with accounting income losses but positive cash flow, and new families whose members had zero independent income during the previous reference year while living with their respective families.

He is not unmindful of the fact that in-kind transfers necessarily represent limitations on consumption making them of less value than equivalent amounts of cash income, but concludes that the magnitude of these limitations are "much less than supposed." Not only does the largest share of these transfers normally go to households which are also receiving the largest amount of cash welfare transfers, but there are also considerable expenses associated with cash income that are nonexistent for those living on in-kind transfers including work-connected expenses, diminished leisure time, differing tax treatment, and freedom from inflation risk and irregularity of income.

I would highly commend Dr. Paglin's study to the attention of my colleagues, not as an attempt to minimize the existence of poverty in our country—no one including myself or Dr. Paglin would deny this—but simply to enable us to develop more realistic public policies through a more exact appreciation of the prevalence and severity of the problems. Apart from the "professional antipoverty establishment" in whose interest it always is to perpetuate the crisis, I cannot imagine that such an understanding is a bad thing.

"UP OR OUT" ADVANCEMENT SYSTEM AS IT AFFECTS CHAPLAINS

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. SCHULZE. Mr. Speaker, I have been contacted by Rev. Joseph Turner, a constituent of mine who is a victim of the "up or out" advancement system and who has raised several questions in regard to the system's application for Army chaplains. I am submitting for the record today a copy of Reverend Turner's letter to President Carter on this issue, which reads as follows:

CHAPLAINS PROMOTION
RESEARCH COMMITTEE,
Havertown, Pa., January 3, 1978.

President JIMMY CARTER,
Commander in Chief of all Military Chaplains, The White House, Washington, D.C.

DEAR MR. PRESIDENT: May I respectfully bring to your attention the following information as a bring-down on the problems of Army chaplains and former chaplains:

The Army has told Senator Schweiker of Pennsylvania and some other members of Congress that they fired (involuntarily released) 115 clergymen in recent years. (See copy of letter enclosed)

The churches of America in no way approved the firings, nor have they withdrawn their endorsement of the chaplains. The Army, however, continues to push the churches for younger clergymen, while firing the veteran clergymen who have ten to seventeen and one-half years as chaplains. Our committee has researched discrepancies and we, together with many congressmen and senators, have received information and confirmed documented data that the Army does:

1. Exempt military doctors after two pass-overs (mandatory discharge), but does not exempt clergymen with the same courtesy, notwithstanding a critical shortage of Catholic, Jewish and some minority Protestant faith chaplains;

2. Continue to perpetuate serious detrimental imbalances within the denomina-

tions in the up or out promotion system for chaplains. The fiscal year 1978 goal for Catholic priests is 420. There are now 255 Catholic chaplains on active duty. This is an absurd situation where the chaplains are being fired and young clergymen are no longer intrigued by military service. The Department of the Army completely overlooks the religious needs of our young servicemen by ignoring denominational quotas and being in abject violation of the Socratic doctrine of fairness.

3. Extend some older chaplains beyond their mandatory retirement age, thus discriminating against the middle years chaplains, who are passed over. This fact was conveyed by the Department of the Army to Congressman Schultze of Pennsylvania. (See enclosed letter.)

Over a period of time we and a number of congressmen and senators have requested information from the Department of the Army in accordance with the Freedom of Information Act. We have received confused and most times inaccurate information in governmentese language which we consider indecipherable and non-persuasive.

We would, therefore, appreciate the following information:

1. The selection criteria for chaplains promotion (besides a mere LOI to the Boards).

2. Justification for non-chaplains sitting in judgment on chaplains promotion boards. (The Navy does not do this.)

3. Reasons for involuntary separation, age, denomination and length of service of these 115 chaplains (plus more of recent date) fired as told Senator Schweiker.

4. The justification of extending passed-over military doctors; the legal document that exempts and retains them, when not exempting critically needed chaplains.

5. The justification for extending some chaplains beyond their mandatory retirement thus depriving chaplains with over 15 years of service their right for promotions. The authority and statute for this.

6. The procurement goals for each of the 114 denominations represented among the 1,465 authorized chaplain positions and the means to reach these goals. The Department of the Army has notified both the Catholic and Jewish endorsing agencies that their chaplains are critically short. At the same time, the Army fired Rabbi Oppenheimer and many others who were members of the understaffed denominations. This deprivation has seriously undermined the religion of some of our servicemen and their families by denying them their right to be ministered to by their priests, ministers and rabbis.

7. The names of all the denominations supplying chaplains to the Army which are critically understaffed and the names, ages and length of service of all their clergymen riffed and passed-over twice since 1972. Congressman Schultze was told by the Department of the Army that these records are "not maintained". Congressman Reuss was advised by the Department of the Army that these records fall under the Privacy Act. However, as President and as Commander-in-Chief, you are not subject to the Privacy Act.

This particular situation relating to chaplains is becoming a national disgrace as it appears in papers across the United States. Even the Jewish Welfare Board states, "It appears the Army is saying it can get along without ministers and rabbis, but it cannot get along without doctors." The Catholic Church has called this, "An apparent contradiction; i.e., to fire Catholic priests when the Army is critically short 166 of them." Another endorsing agency, the NEA, calls this a "stigma that will last."

For God's sake, and for the sake of the youth of this country, help us to serve so that when you next enter the portals of your own church, you may be confident that the members of our armed services are enjoying the same ability to obtain spiritual comfort and guidance.

Very truly yours,

JOSEPH J. TURNER,
Co-Chairman, Chaplains
Promotion Research Committee.

MEMORANDUM FOR CORRESPONDENTS,
AUGUST 2, 1977

Department of the Army has announced a policy change as a first step to alleviate the critical officer shortage in the medical corps. This change permits all fully qualified medical corps officers to continue to practice essential military medicine in their current grade while permitting the best qualified officers to be selected for promotion to the next higher grade within the grade authorizations limited by DOD and the budget.

Because of these grade limitations those fully qualified but not promoted medical officers who remain critical to the Army health care needs, would previously have been designated "not selected for promotion" and may have been separated because of the designation.

Under the new policy effective July 25, 1977, medical corps officers may be selected for retention in grade while in the primary zone for consideration for promotion. As a result, no fully qualified medical corps officer in a critical medical skill will be separated for "nonselection for promotion." Additionally, promotion boards will be told which professional medical skills are critical to the Army medical department in order to facilitate retention in grade recommendations. The three categories approved by the Secretary of the Army for the current medical corps LTC, AUS board are as follows:

a. Recommended for promotion. Those officers recommended as "best qualified" for promotion.

b. Recommended for retention. Those officers whose relative standing among their contemporaries does not warrant promotion at this time but whose present performance and indicated potential warrant possible future advancement.

c. Not recommended for promotion. Those officers whose current performance does not justify immediate advancement and whose indicated potential does not clearly sustain possibility of future advancement.

TRIBUTE TO MR. BENNETT D. TAYLOR, JR., OF YOUNGSTOWN, OHIO

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. CARNEY. Mr. Speaker, this evening, January 31, 1978, Mr. Bennett D. Taylor, Jr., will be honored by friends, associates, and young people at a testimonial dinner in Youngstown, Ohio. Mr. Taylor recently retired as a district executive of the Mahoning Valley Council of the Boy Scouts of America. He has contributed 37 years of his life to guiding youth. On January 1, 1978, he retired in order to become director of the Red Cross' blood program in the Mahoning County.

Mr. Taylor began his association with the Boy Scouts of America as a boy. As a Lone Scout in Bourbon County, Ky., he had no scoutmaster because he lived too far from any organized Boy Scout troop meetings. After serving as a lieutenant colonel in the Army during World War II, where he was awarded the Silver Star, Bronze Star, and Purple Heart, Mr. Taylor became a field executive for the Fort Hamilton, Cincinnati, Council of the Boy Scouts of America. In 1952, he was named assistant Scout executive in Springfield, Ohio, after having worked with Scouts at the old Mammouth Cave Council in Bowling Green, Ky. In 1959, Mr. Taylor became a Scout executive of the Columbiana, Ohio, Council.

Mr. Taylor joined the Mahoning Valley Council of the Boy Scouts of America in 1969. During his 8 years in the Mahoning Valley, Bennett Taylor has made an important and noteworthy contribution to the well-being of our community. He has counseled and worked with Scouts on a daily basis, affording many young people the opportunity to develop character, build self-confidence, and go on to become community leaders. His various activities have included development of camping programs, planning of national jamborees and Bicentennial events, and initiation of new Scouting units within the Mahoning Valley Council.

The activities and interests of Mr. Taylor reflect his commitment to high ideals and community involvement, and are deserving of recognition. He is a member of the Downtown Kiwanis, the Lisbon American Legion Post, the Reserve Officers Association, Amvets, and the Torch Club. In addition, he is an active member of the Canfield Presbyterian Church, where he is an ordained elder, Sunday school teacher, and usher.

Bennett Taylor's retirement from the Boy Scouts of America will not be the end of his civic involvement in the Mahoning Valley. As director of the American Red Cross' Mahoning County blood program, Mr. Taylor devotes his strong organizational talents, a proven ability to work with others, and his genuine sense of civic pride to the successful development of a blood program for our community. We are all confident that he will develop the full potential of this Red Cross program into a model health agency of which we can all be proud.

Mr. Speaker, on behalf of my constituents, I wish to express my sincere congratulations to Bennett D. Taylor, Jr., for his dedicated service to the Boy Scouts of America. I also wish to express my heartfelt appreciation to Mr. Taylor for the many contributions he has made to our community. We all wish him many more years of good health, happiness, and success in his future endeavors.

"SEEKING SOLUTIONS TO SCHOOL VIOLENCE AND VANDALISM," AN ARTICLE BY SENATOR BIRCH BAYH

HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. BRADEMAS. Mr. Speaker, Senator BIRCH BAYH, the distinguished senior Senator from my home State of Indiana, has written a startling account of

the extent of violence and vandalism in our Nation's schools. Senator BAYH, who chaired hearings on this disturbing problem, proposes several solutions, including efforts that communities can themselves undertake. His informative, constructive article appears in the January 1978 issue of the Phi Delta Kappan magazine. I ask unanimous consent to insert it into the RECORD, and I commend it to all Members.

SEEKING SOLUTIONS TO SCHOOL VIOLENCE AND VANDALISM

(By Senator BIRCH BAYH)

During the six years I served as chairman of the Senate Subcommittee To Investigate Juvenile Delinquency we conducted numerous hearings and received testimony from more than 500 witnesses on a variety of topics, including the extent and cause of drug abuse, runaway youths, school dropouts, the confinement of juveniles in detention facilities, and the most promising programs for reducing the alarming rate of juvenile delinquency. The legislation enacted to deal with these problems is the Juvenile Justice and Delinquency Prevention Act. This act is designed to prevent young people from entering our failing juvenile justice system and to assist communities in creating more sensible and economic approaches for youngsters already in the system. It makes possible for the first time a coordinated effort by federal, state, and local governments along with private groups to address the problems and causes of crime and delinquency among our youth.

In the course of our work on this legislation I became increasingly concerned with reports from educators and others over the rising level of violence and vandalism in the nation's public school system. Because many of the underlying problems of delinquency, as well as their prevention and control, are intimately connected with the nature and quality of the school experience, it became apparent that, to the extent that our schools were being subjected to an increasing trend of violence and vandalism, they would necessarily become a factor in the escalating rate of juvenile crime and delinquency. No effort to prevent delinquency could ignore the tremendous impact of such a development. Therefore the subcommittee began an in-depth investigation to determine both the extent of these problems and possible programs to improve the situation. We conducted a nationwide survey of 757 school systems enrolling approximately half of the public elementary and secondary students in the country. In addition, the subcommittee corresponded with numerous school security directors, requesting their assistance. While the primary purpose of this initial survey was to gauge the extent and trend of violence, vandalism, and related problems, it also produced a considerable number of recommendations concerning the prevention and deterrence of school crime. In April, 1975, the subcommittee released a preliminary report on the stage of our study that focused on the trends and extent of these problems. "Our Nation's Schools—A Report Card: 'A' In School Violence and Vandalism."

"Many authorities on education have written books on the importance of producing an effective learning environment in the schools by introducing more effective methods of teaching. None of them, however, seems to understand the shocking fact that the learning environment in thousands upon thousands of schools is filled with violence and danger. Violent crime has entered the schoolhouse, and the teachers and students are learning some bitter lessons."

James A. Harris, president of the National Education Association at the time of the subcommittee's first hearing on this topic, expressed the concern of his organization:

"Incidents of physical assault have increased dramatically; vandalism and destruction of property are even more awesome; and many schools are required to tax already strained resources to meet exorbitant costs of school insurance."

In addition to the membership of these two nationwide teacher organizations, many principals who bear the responsibility for the daily operation of our schools have viewed this trend with growing concern. Owen Kiernan, executive secretary of the National Association of Secondary School Principals, told the subcommittee:

"Ten years ago, in the secondary schools of this nation, violence and vandalism were remote problems. Occasionally we would have a so-called 'blackboard jungle school,' but this was quite unique. This is no longer the case."

The collective concerns of such prominent education organizations are, of course, a persuasive measure of the growing dimensions of the problem of crime in schools. But perhaps the words of students and teachers who occupy our classrooms every day constitute the most compelling testimony. A teacher from a large metropolitan high school related her experience to the subcommittee:

"The past few years have seen violence and vandalism become an almost daily occurrence on school grounds. Students and school personnel have become numbed to these acts; a subdued anger, frustration, and acquiescence seems to pervade the system."

Two students, one from a large city and one from a suburb, summed up their views of the situation in this way:

"Robert—If you saw these people you would be shocked.

"Kevin—You would be surprised. You would not believe that some of the things could happen. You see somebody walking down the hall with a cane. If you unscrew the top and pull it out, it is a type of dagger. You would not believe something like that could go on in school, but it does."

SCHOOL VIOLENCE HEARINGS

Following the release of the report, I introduced the Juvenile Delinquency in the Schools Act as an amendment to the Juvenile Justice and Delinquency Prevention Act. We also urged the Office of Juvenile Justice and Delinquency Prevention, under the authority provided by the school- and education-related sections of the Juvenile Justice Act, to explore ways in which the federal government might help reduce the growing problems of violence and vandalism. The subcommittee initiated a series of meetings and correspondence with more than 70 prominent educational, governmental, and private organizations that have a particular interest and expertise in the solution to these problems. We also held a series of public hearings with more than 30 witnesses, including teachers, administrators, students, parents, counselors, school security directors, superintendents, and several education research groups. In July, 1976, the chairman released two volumes developed by the subcommittee over the course of the investigation.

These two documents, "Nature, Extent, and Cost of School Violence and Vandalism" and "School Violence and Vandalism: Models and Strategies for Change," contain more than 1,600 pages of testimony and articles concerning the nature of violence and vandalism in our schools and the various programs that can be useful in reducing these problems.*

* This material is summarized in the subcommittee's final report: Challenge for the Third Century: Education in a Safe Environment—Final Report on the Nature and Prevention of School Violence and Vandalism, 1977, 102 pp. Order from the U.S. Government Printing Office, Washington, D.C. 20402. Price $1.25.

Only a decade ago violence and vandalism in schools were considered troublesome but hardly critical problems. Virtually every school in America had experienced an occasional fight or a broken window. Such occurrences had long been viewed as more or less a fixture of school life. Recently, however, the situation has changed What was once regarded as an unfortunate but tolerable fact of life for teachers and students has become a source of growing concern and even alarm for many members of the education community. Our investigation has found these concerns to be well founded; acts of violence and vandalism are indeed occurring with more frequency and intensity than in the past. In some schools, in fact, the problems have escalated to a degree that makes the already difficult tasks of education nearly impossible.

FRIGHTENING FACTOR IN EDUCATION

In a growing number of schools across the country, administrators, parents, teachers, and students are being confronted with a new and frightening factor in education. As the president of the American Federation of Teachers, Albert Shanker, told the subcommittee at its initial hearing:

It should be made clear, of course, that not every elementary and secondary school in the country is staggering under a crime wave of violence and vandalism. However, while many school systems are able to operate on a relatively satisfactory basis, there is abundant evidence that a significant and growing number of schools in urban, suburban, and rural areas are confronting serious levels of violence and vandalism.

NO SCHOOL IMMUNE

I should emphasize that this is not a problem found exclusively in large cities or in less affluent school districts. Schools voicing concern over the escalating rates of violence and vandalism along with the often attendant problems of weapons, drugs, and rampant absenteeism can be found in any city, suburb, or town, irrespective of geographic location or per-capita income. Simply put, while not every school suffers from serious violence and vandalism, no school can afford to adopt the smug attitude that "it can't happen here." Unfortunately, it can and has been happening in far too many schools.

The costs of vandalism prevention and repair can result in significant and sometimes staggering strains on education budgets. Los Angeles spent more than $7 million on these efforts in 1974–75, at a time when the school system was already facing a $40 million deficit. The Chicago school system suffered $3.5 million in property loss in 1974, to which can be added $3.2 million for school security programs and $3 million for guards necessitated by violence and vandalism. On a national level, the National Association of School Security Directors estimates that school vandalism diverts more than $590 million from annual education budgets. This sum exceeds the total amount spent on school textbooks in 1972.

Obviously, these are serious problems. But I believe that we can solve them through careful analysis of their nature and through construction of various solutions that are compatible with an educational atmosphere. We must, however, keep several points in mind.

Initially, we must recognize that the solution to crime in the schools does not lie solely within the schools. Numerous factors totally beyond the school's control have a significant impact. As was extensively explored throughout our hearings, problems involving home environment, severe unemployment among young people, and a lack of adequate recreational activities all have tremendous influence on youth, yet the school's ability to deal directly with them is obviously minimal.

We should also be aware that promises to resolve violence and vandalism in schools

defined only in terms of legislative enactments, whether on the federal, state, or local level, create false hopes, because of the nature of these problems, the diversity of their origins, and the intricacies of human behavior. I believe that the principal ingredient in successful efforts to reduce violence and vandalism is not more money or more laws but the active involvement of the education community in a range of thoughtful and balanced programs.

LOCAL PREVENTION PROGRAMS

In order to stimulate this process of involvement, the subcommittee prepared and issued a report, *Challenge for America's Third Century: Education in a Safe Environment*, which outlined the kinds of locally based programs we found that could help prevent and reduce school violence and vandalism. These approaches are *not* based on the premise that we should confront these problems by turning our schools into armed fortresses. Instead, they are educationally oriented strategies that can succeed in enriching the classroom environment and creating the kind of atmosphere in which education can best take place.

Among the integral steps in a positive approach to these problems are:

Community education and optional alternative education programs;

Codes of rights and responsibilities;

Curriculum reform;

Police/school/community liaison arrangements;

Inservice and preservice teacher preparation courses;

School security programs;

Counseling and guidance strategies;

Architectural and design techniques;

Student and parental involvement programs; and

Various alternatives to suspension.

While it is of course impossible within the limitations of this article to provide an in-depth explanation of each of these strategies, I would like to describe two of them briefly.

Our studies show that a significant number of incidents of violence and vandalism can be traced to young school-aged intruders who were not currently attending school because they are truant, suspended, or have dropped out completely. One way to reduce the intruder problem, in addition to programs to reduce truancy and dropouts, would be to insure that suspension policies are helping to provide proper discipline in school and are not detracting from it by needlessly creating potential school intruders.

In some schools violation of ordinary student rules against such behavior as smoking or tardiness is punished by suspension. Suspension should be reserved for more serious violations. While students who pose a serious danger to persons or property obviously should be quickly removed from schools, our studies show that many teachers and principals feel they should have other alternatives in disciplining youngsters for ordinary day-to-day offenses than putting them out on the streets. Among useful alternatives are "cool-off" rooms, behavior contracts, and additional counseling strategies. These can be used to keep order at the same time we keep kids in schools.

Our study of vandalism also indicates that much of this destructive activity occurs in the late afternoon, in the evening, or on weekends when the school buildings are empty. Community education programs that expand the active use of the school plant can help prevent vandalism and turn a "target of opportunity" into a more valued community resource.

ALL EDUCATORS MUST HELP

As mentioned above, I am convinced that the most important element in the prevention of school violence and vandalism is the active involvement of the entire education community in local efforts to accomplish this goal. Our report can be an important stimulus to this involvement along the lines of the positive programs discussed throughout our hearings and studies.

In closing, let me emphasize that I do not agree with apostles of gloom and despair who tell us that we are poised on the brink of a declining era in American education, marked only by the burnt-out hopes of an institution that tried to do too much. The spirit and sense of purpose and the willingness to strive and the desire to accomplish that were the hallmarks of the American educational effort over our first 200 years are alive and flourishing in schools across our country today. As we enter the third century we are obviously facing grave problems in American education, but we have in the past confronted such challenges and have succeeded in producing a public education system with a breadth and depth unmatched in the history of the world. Indeed, it seems that the very strengths of the system are forged through the experience of overcoming numerous obstacles. Today we face yet another challenge, but, while there may be reason for concern, there is no need for discouragement. Anyone who has worked closely with the education community cannot fail to be impressed with the vitality and confidence of the students, teachers, administrators, and parents confronting and successfuly overcoming the problems of violence and vandalism. With the cooperation and commitment of all elements of the education community, I am confident that we can succeed in exchanging the adversity and strife so harmful to education in our schools for the diversity and debate so necessary for learning.

CONGRESSIONAL SALUTE TO THE HONORABLE ROBERT R. WINDELER OF NEW JERSEY PASSAIC COUNTY AGRICULTURAL AGENT, LEADING CITIZEN, COMMUNITY LEADER, AND GREAT AMERICAN

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. ROE. Mr. Speaker, on Friday, February 3 the residents of my congressional district and State of New Jersey will join with the Passaic County Board of Agriculture in testimony to the lifetime of outstanding public service that our people have received from a leading citizen, community leader, and good friend, the Honorable Robert R. Windeler, who has announced his retirement as Passaic County agricultural agent.

As Agent Windeler retires from this distinguished office of public trust, I am pleased to participate with his many, many friends and associates in expressing our deep appreciation for all of his good works and share great pride in the success of his achievements with his wife, Dorothy; their son, Robert, and daughter, Diane.

Mr. Speaker, Bob Windeler has indeed earned the highest respect and esteem of all of us for his leadership and highest standards of excellence in seeking to improve the quality of life for all of our people. His personal commitment and endeavors in the agricultural field have endeared him to all of us.

Throughout his lifetime Agent Windeler has forged ahead with devotion and sincerity of purpose in his dedication to enhancing and preserving the integrity of our environment. He was born on a farm in Monmouth County, N.J., and has dedicated his lifetime to conserving and nurturing our land and natural resources for the benefit of mankind. He has been a resident of the great sovereign State of New Jersey since birth. He is a graduate of Rutgers, the State University, where he attained a bachelor of science degree in agriculture and a master of science degree in economics.

Mr. Speaker, Bob's career with the New Jersey Agricultural Extension Service commenced over four decades ago upon his graduation from college when he associated himself with the administrators and faculty of Rutgers University. For approximately 10 years he was a member of the Somerset County Agricultural Extension Service where he administered the youth education program. He has been senior agricultural agent in Passaic County since July 1, 1947.

In 1962 Bob Windeler achieved the singular honor of being the only county agricultural agent to have received a Ford Foundation fellowship for 1 year's study at the Rutgers Urban Studies Center in New Brunswick, N.J.

Mr. Speaker, Bob Windeler resides in the Great Notch section of Little Falls with his wife, Dorothy. His daughter, Diane, is a graduate of Bradley and Columbia Universities and is a researcher/consultant for S.M.W. Associates, Atlanta, Ga., since February 1977. From September 1972 to January 1977 Diane was a U.S. Army liaison officer assigned to the American Embassy in Bonn, Germany. His son, Robert, is a graduate of Duke University and Columbia University. He is presently employed as a staff writer with People magazine and is in charge of the Los Angeles office. As a free lance writer, he is the author of three biographies on Julie Andrews, Mary Pickford, and Shirley Temple.

Mr. Speaker, in civic affairs, Bob has extended the richness of his wisdom and expertise—always giving willingly and unselfishly of his time—in helping others. He has been a member of the Paterson and Wayne Rotary Clubs for over a quarter of a century. He has served on the Somerville and Little Falls Boards of Education. Bob also holds membership in the Little Falls No. 263 F. & A.M., the Salaam Temple, and the Lakeland Shrine Club. He also helped organize and served as chairman of the Little Falls Shade Tree Commission and is currently a member of the Little Falls Municipal Utilities Authority. He is a member of the Rutgers Chapter of the American Association of University Professors, the New Jersey Agricultural Society and the State and National Agricultural Agents Associations. He is also a member of the Montclair and Little Falls Historical Societies.

Mr. Speaker, Bob has served our people and our country with honor and distinction. He is an outstanding administrator, educator and good friend whose richness of wisdom and expertise in his daily pursuits have touched the lives of many, many people in my congressional district. I appreciate the opportunity to publicly

acclaim all of his good works and share the pride of his family in his accomplishments and lifetime of dedicated public service which have truly enriched our community, State, and Nation. We do indeed salute a great American—the Honorable Robert R. Windeler.

JUDICIAL ACCOUNTABILITY AND THE ROSENBERG CASE

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. CONYERS. Mr. Speaker, in 1951 Julius and Ethel Rosenberg were convicted of consipracy to commit espionage and were electrocuted 2 years later. As a result of a Freedom of Information Act lawsuit, the Rosenberg sons have obtained some 30,000 pages of FBI documents on the cases, which they released in June 1976. These documents raise serious questions about the conduct of the trial judge, the Honorable Irving R. Kaufman. They also cast doubt on the claims that the Rosenbergs received a fair trial.

The documents, if they prove to be accurate, reveal a pattern of ex parte contacts between Judge Kaufman, the FBI, and the prosecutors before the Rosenberg trial had ended; continuous interference with the case even after it left the judge's jurisdiction; and in subsequent years Judge Kaufman's efforts at stifling public criticism of his handling of the case.

Some may question the reopening of the case more than a quarter century later. Others may allege a spirit of vindictiveness toward Judge Kaufman. The documents on the Rosenberg case raise questions about judicial accountability, which in our sytsem of government are of utmost importance. The current interest in investigating the judge's conduct in the case is not to exhume relics of the past. Rather, it is to use the lessons of the past to safeguard the standards of the future. The history of the past several years shows quite clearly how important it is to hold official institutions and officers accountable for their conduct, whether it be the FBI, CIA, the judiciary, or the Presidency itself.

It is in this spirit that over 100 lawyers and law professors have recently urged the House and Senate Judiciary Committees to launch inquiries into the allegations of misconduct in Judge Kaufman's handling of the Rosenberg case. Similarly, the American Civil Liberties Union has supported the call for investigation.

Prof. Vern Countryman of Harvard Law School has written a cogent and moving account of the issues involved in the Rosenberg case, which appeared in the October 8, 1977 issue of the New Republic. Mr. Countryman is a former clerk to Justice William O. Douglas and a leading authority on the Justice's tenure ("The Douglas Opinions," 1977; "The Judicial Record of Justice William O. Douglas," 1971). He has taught law at Harvard since 1964. I commend his article to the attention of my colleagues and ask them to consider whether an inquiry may be the best means to both set the record straight on the Rosenberg case as well as to strengthen the principles of judicial accountability.

[From the New Republic, Oct. 8, 1977]

JUDGE KAUFMAN AND THE ROSENBERG CASE—OUT, DAMNED SPOT

(By Vern Countryman)

In 1951 Julius and Ethel Rosenberg and Morton Sobell were convicted of conspiracy to commit espionage. Judge Irving R. Kaufman presided over their trial in the federal district court in Manhattan. The Rosenbergs were electrocuted in 1953. In 1975 their sons sued the FBI and other federal agencies under the Freedom of Information Act, seeking all documents relating to the Rosenberg prosecution. So far, the FBI has turned over 30,000 pages of documents.

The FBI documents—internal memos and letters to the agency from outsiders—leave the fundamental issue of the Rosenbergs' guilt or innocence as murky as ever. But these files do contain some fascinating and shocking information about the conduct of Judge Kaufman, both during the trial and in the decades since. Ten years after the Rosenberg trial Irving Kaufman was promoted to the U.S. Circuit Court of Appeals. Kaufman has spent 26 years on the federal bench since the Rosenberg case, 16 of them on the Circuit Court of Appeals. He has a considerable reputation. You would have supposed he would be eager to put the sordid Rosenberg affair behind him. These documents suggest that, on the contrary, Kaufman is obsessed by the Rosenberg case. He appears to be constantly on the lookout for efforts to reopen the case—in the public media or in the courts—and seems eager to enlist the FBI in efforts to suppress any such challenges to his trial back in 1951.

During the trial itself (if these FBI documents can be relied upon), Kaufman seems to have been in regular contact with the Justice Department prosecution staff, who were in turn passing information to the FBI. In the middle of the trial, before the defense had put on any witnesses, a Justice Department official told an FBI agent he knew the judge would impose the death penalty if the Rosenbergs were convicted, "if he doesn't change his mind." After the jury returned its guilty verdict and two days before sentencing, assistant prosecutor Roy Cohn told an FBI agent that Judge Kaufman "personally favored" the death penalty for the Rosenbergs and would give a prison term to Sobell. Needless to say, this kind of *ex parte* (out-of-court) communication with the prosecution—discussing the sentence before the trial is over—is highly improper.

Kaufman appears to have been even more determined than the Eisenhower administration to achieve a death penalty. On the day before sentencing, Kaufman asked the prosecutor, Irving Saypol, to obtain the views of the Department of Justice on what the sentences should be. This is standard operating procedure. But when Saypol reported back that the views within the department were divided, Judge Kaufman asked him not to make any recommendation. Saypol obliged, and Kaufman thereupon sentenced the Rosenbergs to death and Sobell to a 30-year prison term. During sentencing Kaufman declared, "Because of the seriousness of this case, and the lack of precedence [sic], I have refrained from asking the government for a recommendation." This was untrue. He apparently did ask for a recommendation, then changed his mind when it appeared the recommendation would not be severe enough. He thus concealed the fact that the Justice Department was not prepared to recommend the death penalty.

In 1956, after the Rosenbergs had been executed, Sobell filed a motion for a new trial. Judge Kaufman told an assistant prosecutor that if the motion came before him he would deny it without a hearing. The motion was assigned to Judge Kaufman and he did deny it without a hearing. In doing so he complained that improper ex parte approaches had been made to him, but asserted that "safeguards and procedures" developed by the American judicial system had been "the sole guide posts for this Court." Presumably Kaufman was referring to the Canons of Judicial Ethics adopted by the American Bar Association. At the time of the Rosenberg trial, these canons provided that, "Ordinarily all communications of counsel to the judge intended or calculated to influence action should be made known to opposing counsel." Needless to say, Kaufman had not told the Rosenbergs' lawyers about these approaches.

Kaufman continued to interfere in the Rosenberg case after it had left his jurisdiction. In February 1953, while the Rosenbergs had a petition for certiorari pending in the Supreme Court, Judge Kaufman called the FBI and expressed concern that the Supreme Court would not dispose of the case before its spring adjournment. He urged that the Justice Department be encouraged to push the matter vigorously." Kaufman delivered the same message to an assistant prosecutor, who then strongly recommended to the Justice Department that it ask the Supreme Court to expedite consideration of the case. In May 1953, the Court denied the petition for certiorari.

On June 15, 1953, the Supreme Court denied the Rosenberg's application for stay of execution, then adjourned for the summer. On June 16, a new application for stay was filed with Justice Douglas. On June 17, Kaufman called the FBI to pass on some information he had learned from an assistant prosecutor: as of 7:30 pm on June 16, Justice Douglas had been disposed to grant the stay, but after dinner he was undecided. He also reported that the Attorney General and Chief Justice Vinson had met and decided that if Douglas granted a stay Vinson would reconvene the Court. Justice Douglas granted a stay of execution on June 17, a special term of Court was called on June 18, it vacated the stay on June 19, and the Rosenbergs were executed.

In September 1957, Kaufman told an FBI public relations man that he was "very much upset" by a question raised for the first time in Sobell's 1956 motion for a new trial. The question arose from a 1952 Supreme Court decision in the Grunewald case that it is unconstitutional for the prosecution in a criminal trial to cross-examine the defendant about having asserted the Fifth Amendment privilege against self-incrimination before the grand jury that indicted him or her. Since the government had been allowed to cross-examine Ethel Rosenberg on this point, Kaufman was afraid that the court might upset the case unless the Department vigorously defended it, which he urged it to do. In the event, the Supreme Court denied certiorari.

The Grunewald precedent continued to worry Judge Kaufman. In 1962 the district court denied another Sobell motion for a new trial, he appealed, and the appeal was argued before the Court of Appeals. Judge Kaufman had been elevated to that court, but did not sit on this appeal. Nevertheless, he took an interest in the appellate arguments, during which Judge (now Mr. Justice) Thurgood Marshall asked whether the Grunewald decision would not have required a reversal of Sobell's conviction if it had occurred after that decision, and the assistant prosecutor replied, "probably." This incited another phone call to the FBI. According to their memo of the call, Kaufman declared that, "The Grunewald decision is not good law and in his opinion certainly does not apply to this case"; that the assistant prosecutor's answer was "stupid"; that the Bureau might want to report this man to the Department of Justice and that he had "raised hell" with Marshall, whom he char-

acterized as "naive and inexperienced." The Court of Appeals affirmed the denial of Sobell's motion for a new trial.

If these FBI papers are accurate, they reveal a judge so obsessed with protecting the verdict, judgment, and sentence entered in the trial over which he presided that he was driven to conduct completely unacceptable from a judicial officer. Much of it would be unacceptable even from a prosecuting attorney.

Kaufman also has attempted to stifle criticism of the Rosenberg case outside the courts. In November 1957. Kaufman called FBI Director J. Edgar Hoover to say he had learned that Sobell's wife was going to talk to Jim Bishop, who was writing a book on the Rosenberg case. He suggested that an FBI official warn Bishop against talking with her. In 1969 Kaufman called Hoover to discuss a play about the Rosenberg case then being performed in Cleveland. Kaufman was "alarmed" that the New York Times had reviewed the play twice. Five days later Kaufman wrote to Hoover thanking him for "furnishing me the background information" on the play's author and sending Hoover a copy of a letter written to the New York Times by Simon Rifkind. Rifkind, a recurring minor player in Kaufman's own passion play, served on the federal district court with Judge Kaufman. He left the bench in 1950 to return to a lucrative law practice. He not infrequently appears before Judge Kaufman, as do others in his law firm of Paul, Weiss, Rifkind, Wharton & Garrison. In his letter to the Times Rifkind complained of the "generous allocation of space" to the play because "both reporters, as well as the play" presented the Rosenbergs as innocent. He said that in view of the number of courts and judges involved in the case, this was a slur on American justice.

On a 1974 visit to FBI headquarters, Kaufman expressed displeasure about two television programs dealing with the Rosenberg case, and advised the FBI that Simon Rifkind was writing an article for TV Guide giving the true facts about the case. The article duly appeared and reiterated the theme that no one whose case had been reviewed by so many courts and judges could have been wrongly convicted.

In May 1975, Judge Kaufman called the FBI to express his concern about an article in Esquire on the Rosenberg case, and about recent activities of the National Committee to Reopen the Rosenberg Case. He urged that "some counteraction should be taken."

Thus, if the FBI papers are accurate, a judge who had sworn to uphold the Constitution, including the first amendment, has been attempting to suppress the exercise of freedom of speech and the press.

But the FBI papers only raise questions; they do not provide answers. No FBI reports can be given that much credence, even when they were compiled with no particular incentive to falsify. The letters apparently written by Judge Kaufman and others to the FBI must be verified. So must the statements in the FBI memos which, as supporters of Judge Kaufamn point out, contain hearsay three and four times removed. By March 1976, the American Bar Association was sufficiently concerned about mounting criticism of the case and the judge to establish a special Subcommittee to Review and Evaluate the Rosenberg Case. Its functions were defined thusly: first, "to make certain that public respect for law and the judicial process is not subverted by unfounded charges"; and second, "whenever necessary, to counteract unwarranted criticism directed to . . . Judge Irving Kaufman." Simon Rifkind was named chairman of the subcommittee.

After the Rosenbergs' sons released the FBI papers in June 1976, more than 100 law professors joined me in a letter to the House and Senate Judiciary Committees, asking for an investigation of the issues raised by those documents.

A copy of this letter came into the hands of Simon Rifkind. In September 1976, he dispatched a five-page letter of remonstrance to me. He asserted that Roy Cohn had recently denied having discussed sentencing with Judge Kaufman. But otherwise Rifkind did not challenge the contents of the FBI documents. Rather, he reiterated his theme that the trial must have been fair since so many judges had reviewed it (although no judge has reviewed it since the FBI papers were released); he pointed with pride to Judge Kaufman's "shining reputation" since the Rosenberg case; and he asserted that it was "common practice" for judges to receive ex parte communications after verdict and before sentencing from "all sorts of people," citing a wildly inapposite 1949 case. In fact, every federal Court of Appeals that had ruled on the question at the time Judge Rifkind wrote to me had held improper an ex parte communication from the prosecutor to the judge after verdict or guilty plea and before sentencing. Judge Kaufman's own court ruled this way in 1973. Only last March the Supreme Court held that it was a violation of the due process clause to sentence a defendant on the basis of a probation officer's report without disclosing the contents of the report to the defendant.

As his final point, Rifkind said I was too willing "to leap to inferences from meager premises," because I was still "acting in the role of advocate" for Morton Sobell. (In 1966 I participated in an effort to get Sobell a new trial. Today Sobell has been released from prison and has no action pending). Rifkind on the other hand wrote to me in his "private capacity and not as Chairman of the ABA Committee concerned with the Rosenberg case."

At least I heard from Rifkind. I have never heard from the chairman of either of the Judiciary Committees. I have received individual responses from a few committee members manifesting varying degrees of interest. Unfortunately the most affirmative response came from one who shortly thereafter became ex-Senator John Tunney. In March of this year, Senator James Abourezk advised me that neither had any plans to act on the matter.

A colleague of mine who is a member of the prestigious Association of the Bar of the City of New York requested the Association to investigate Judge Kaufman. He was officially advised that the Association found no basis for investigation. Most of the federal appellate practice of the Association's members is in Judge Kaufman's court.

In March of this year the American Civil Liberties Union adopted a resolution urging the Judiciary Committees of the House and Senate to investigate the relationship of Judge Kaufman with the prosecution in the Rosenberg case. The *New York Times* weighed in with an editorial condemning the ACLU's action. The editorial followed familiar themes: The Rosenbergs' trial must have been fair since it was reviewed by so many judges and Judge Kaufman's conduct since that time has been "exemplary." The *Times* declared that the ACLU request "would never have been made were it not for the efforts of a group in the union that wishes to reopen the case"—neither a penetrating observation nor a devastating critique. One month later the *New York Post* published a heated editorial advocating swift penalties for state court judges guilty of the *ex parte* fixing of traffic tickets.

So there matters stand. The unreviewed conduct attributed to Judge Kaufman by the FBI papers probably will remain unreviewed. If all of the statements in these papers are true, few will be found to say that the judge's conduct was proper or that a fair trial was had. If they are false in whole or in part, Kaufman might be vindicated. Obviously the resolution of those issues is less important to those in power than allowing the judge to remain undisturbed in his declining years. Meanwhile other judges should feel free to emulate the behavior that Judge Kaufman's friend Simon Rifkind describes as "common practice."

WORLD POPULATION PROBLEMS

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, January 31, 1978

Mr. McCLOSKEY. Mr. Speaker, TONY BEILENSON and I were privileged to represent the U.S. Congress recently in a week of discussions on world population problems with parliamentarians from five nations.

In the course of those discussions, we were privileged to hear a member of the German Bundesrat, the Honorable Peter Petersen, deliver a memorable address we feel worthy of consideration by the House. Mr. Petersen's remarks were all the more impressive in that they were given almost in the shadow of the Berlin Wall.

It is sometimes easy for those of us in the United States to forget the rare privilege of freedom that devides us from those who live in Eastern Europe. One comes away from a few moments' contemplation of the barbed wire barriers and machine gun towers at the Brandenburg Gate, however, with a renewed respect for those who live in its shadow and yet speak with the clarity, purpose, and humanity which run through Mr. Petersen's comments:

REMARKS OF THE HONORABLE PETER PETERSEN

Let me say first, how grateful we Germans are, that you decided to hold this conference in Berlin. This is for my people in East and West not just the biggest city of our country—Berlin is as much alive as is our hope to live one day together again as one people as we have for 1,000 years. In Berlin you learn a truth that goes for Foreign Aid as well: It is not money alone—money is not even the most important part—if you want to keep a city alive—it is the identification with the problems and answers of a city and much more important still—it is the spirit of the people themselves. And in good times and bad the people of Berlin have been inspiration and encouragement to all Germans—indeed as Kennedy said not far from here—to the people all over the world.

We are spending more on Berlin than on our total Foreign Aid Program—and even though we have talked about and agreed to the aim of 0.7 percent we never came near it. We are in my country spending exactly ten times more for defense—DM 32 billion this year—than for Foreign Aid—and if you realize that this year 300 billion US Dollars were spent for arms and soldiers in the world and yet millions of fellow human beings were starving, you realize, how crazy this world has become. And yet in Berlin, more drastic than in any other place in the world—where Germans are shot and killed who try to go from one part of their own country to another—you recognize, that in order to stay free and keep peace and be able to

spend 3.4 billion for Foreign Aid we need 32 billion for arms and soldiers.

Yes—crazy—and we believe that the battle for Foreign Aid in our parliaments and in public also is a battle for sanity of mankind.

And there will be no real peace in the world as long as the per capita income in some parts is 60 US Dollars and in other countries 8,000 Dollars.

So for us—and not just us Germans—Foreign Aid is an attempt to work for peace—peace might not be everything, but without peace everything else is in vain.

We Germans came relatively late into our own in the field of Foreign Aid. After the destruction of the 2. World War we were recipients of aid—never in history has a victorious power—the US—been so generous to the defeated enemy, and that in spite of the worst moral breakdown that destroyed the soul of my country before the bombs and guns destroyed the cities. So in a sense, we do to others what the Americans have done to us.

And they did that, if I read this correctly, for two reasons—Americans cannot bear the thought of starving children and secondly the men in power know that a mass-starvation in the heart of Europe would certainly destroy any hope of ever having a free and peaceful Europe—and thirdly they helped us to help ourselves and enable us to help others who are starving now and whose cities might be destroyed not by bombs perhaps but by mass-emigration from the country into the big population centres.

And that is the second principle of our Foreign Aid—first was to strengthen peace—to help people to help themselves: 90% of the investments are done by the developing countries themselves. We don't feel that we are wise enough to tell others how they should live and how they should organize their life together. From that follows that we don't try to buy "good" political behavior by our Foreign Aid. We don't attach political strings to our aid. One of our ministers said that Communists are hungry too—which no doubt is true but there is a lively discussion in our parliament between government and opposition as to what to do with hungry Communists—a controversy I don't want to go into here.

Thirdly we feel that people are more important than things. You are here in the center of a German Foundation that has the very wide field of personal aid in the forefront of their thinking.

Fourth: We feel that other peoples can only help themselves if they and their products (industrial and agricultural) are given a fair chance on our markets. That politically is a very tall order as you all know—but to us—even if that entails difficult adjustments in our own industry—that is the only viable alternative to the bureaucratic concepts of the "Group of 77" which would make the poor nations poorer without solving the problems of anybody. This of course is a very complicated subject—I wish that the industrial countries would earlier have gotten together and gotten united in a strategy not against the 77 (they are 140 now, representing ⅔ of mankind) but with them for the good of us all. "We are rich because you are poor"—as the famous German poet Bert Brecht said here in Berlin—is just as wrong as "You are poor because we are rich".

My last point: For millions and millions of people their wealth are their children. For me that is so. It is often their only wealth and their only old age insurance. 150 years ago 10 children to a family was not uncommon. After Bismarck—again here in Berlin—almost to the day 100 years ago introduced the old age pension bill—the first such legislation in the world—the number of children in the families drastically dropped. I am sure there is something to be learned from that for our deliberations these days. We Germans hope to learn. We have just given 30 million DM to the UN-fund dealing with the problem of overpopulation but here, more than on almost any other subject we are painfully aware of the fact that he who has only money to give is a poor man indeed.

The occasion of Mr. Petersen's comments was the final day of a week long series of discussions amongst parliamentarians from five nations under the auspices of the United Nations Fund for Population activities and organized and led by our former colleague and Senator from Maryland, Joseph Tydings.

Following Mr. Petersen's remarks, the parliamentarians listed below joined in the unanimous declaration of common purpose which is appended hereto:

CANADA

Dr. Frank Philbrook, Liberal Party.

Dr. Bruce Halliday, Progressive Conservative Party.

Dr. Frank Maine, Liberal Party.

JAPAN

Mr. Takashi Sato, Liberal Democratic Party.

Mr. Kosaku Wada, Democratic Socialist Party.

Miss Takako Doi, Socialist Party.

FEDERAL REPUBLIC OF GERMANY

Mrs. Leni Fischer, Christian Democratic Union.

Mr. Johann Peter Josten, Christian Democratic Union.

Mr. Peter Petersen, Christian Democratic Union.

Mr. Willi Peiter, Social Democratic Party.

UNITED KINGDOM

Lord Oram, Labour Party.

Lord Vernon, Conservative Party.

Mr. George Cunningham, Labour Party.

Mr. Cyril Townsend, Conservative Party.

UNITED STATES

Mr. Paul McCloskey, Republican, California, House of Representatives.

Mr. Anthony Beilenson, Democrat, California, House of Representatives.

DECLARATION OF PURPOSE, WEST BERLIN, DECEMBER 10, 1977

As individuals who are members of national legislative bodies, we share a common interest in problems of economic and social development and a concern for the role of population factors in both types of development. We recognize that world population is still growing at 1.8 percent per year. The present United Nations figure of 4 billion is predicted to increase to 6.25 billion by the year 2000, which is only 23 years from now. The vast majority of this increase will occur in the less developed countries of Africa, Asia and Latin America. In the more developed countries it is significant that, as a result of improved living standards and female emancipation, populations have been largely stablized and, in some cases, are beginning to decline. Aside from mere numbers, this increase in the less developed countries jeopardizes a solution to many national and international population-related problems which our governments are attempting to remedy—as examples: food, both agricultural and fisheries, energy, employment, housing, planned urban growth and clean water supplies, and other environmental questions.

We believe there is increasing recognition of the need to address population and development problems at the local, national and international levels, through a variety of interrelated voluntary health, welfare, education, family planning, scoial and economic development programs, and with the active assistance of private organizations, governments and international agencies.

In order to promote humane solutions to the problems of population and development and to encourage the spirit of international interdependence, we propose the following measures.

(1) To initiate organized communications among legislators of all countries in order to foster greater understanding and support of population-related programs and development needs throughout the world.

(2) To establish informal working groups of parliamentarians, including leaders from developing and developed nations, who will meet and confer from time to time at the international level on population-related and development issues and needs. Each national group would work with other appropriate groupings of parliamentarians within its own country, in the field of development policy.

(3) To propose and adopt policies to assist each couple and individual in the world to have a free choice as to the number and spacing of their children, and to have the information, education and means to do so as agreed upon at the 1974 Bucharest World Population Conference, and, consistent with this principle, to assist each Government which requests assistance, to implement such population policy as that Government desires.

(4) To stimulate interest of national governmental bodies in increased support for bilateral and multilateral population assistance programs designed to assist developing countries in socio-economic development.

(5) To work for increased research by private, government and multilateral agencies in reproductive biology to develop and test improved methods of voluntary fertility regulation.

(6) To encourage cooperative programs between governments in population-related training, in medical and motivational research, and in technical and financial assistance in setting up basic rural health infrastructures.

(7) To organize, under the auspices of the UNFPA a working group of Parliamentarians from interested nations to plan and carry out the initiative begun in Berlin and specifically to include representatives from developing nations.

(8) To appeal to the UNFPA to disseminate information to Parliamentarians interested and concerned in population and development.

(9) To begin planning for an International Seminar or Conference of Parliamentarians Concerned with Problems of Population and Development, to be held in the Autumn of 1979, and to seek support for, and assistance for, such a Seminar or Conference from the Inter-Parliamentary Union, and other appropriate international and national agencies.

Through these measures we hope to contribute to the common goal of social and economic development to improve the well-being of all peoples throughout the world."

SENATE—*Wednesday, February 1, 1978*

(Legislative day of Monday, January 30, 1978)

The Senate met at 9:30 a.m. and was called to order by the President pro tempore (Mr. EASTLAND).

The PRESIDENT pro tempore. Our prayer today will be offered by Chaplain Colin P. Kelly III, Assistant Chaplain to the Cadet Corps, U.S. Military Academy, West Point, N.Y.

PRAYER

The Reverend Kelly offered the following prayer:

O God, our Heavenly Father, look with favor, we pray Thee, upon those here assembled and on all who call upon Thee. Endow us with wisdom, courage, and strength to know and to do Thy will. Inspire us through the indwelling presence of Thy spirit to rise above our petty differences and see our common tasks from Thy perspective.

We pray for the President of the United States and all in authority, that they might be ever mindful to put their trust in Thee as they fulfill their daily responsibilities of governing our great Nation.

We pray for all the people of our country, especially the men and women serving in the Armed Forces at home and abroad. We seek freedom and peace. Help us to accept that freedom comes with responsibility and peace comes at a price. Give us that due sense of Thy peace that all of our works might be done to Thy glory.

Purify our hearts, O God, and renew a right spirit within us. All of this we ask in the name of the great friend and master of men, Jesus Christ our Lord. Amen.

RECOGNITION OF LEADERSHIP

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Tuesday, January 31, 1978, be approved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the Executive Calendar.

The PRESIDENT pro tempore. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, I only advise the distinguished majority leader that notations on our Executive Calendar indicate that all of the nominations on pages 1 and 2, beginning with the Consumer Product Safety Commission and concluding with nominations placed on the Secretary's desk, have been cleared for confirmation.

We have no objection to their consideration and confirmation at this time.

Mr. ROBERT C. BYRD. Mr. President, I thank the minority leader.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDENT pro tempore. The nominations will be stated.

CONSUMER PRODUCT SAFETY COMMISSION

The legislative clerk read the nomination of R. David Pittle, of Maryland, to be a Commissioner of the Consumer Product Safety Commission.

The PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF COMMERCE

The legislative clerk read the nomination of Ernest Ambler, of Maryland, to be Director of the National Bureau of Standards.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF STATE

The legislative clerk read the nomination of Arthur T. Tienken, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Gabonese Republic.

The PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of William E. Schaufele, Jr., of Ohio, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Poland.

The PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Richard J. Bloomfield, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Portugal.

The PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Robert W. Buchheim, of the District of Columbia, during the tenure of his service as the U.S. Commissioner on the United States-Soviet Standing Consultative Commission, to be Ambassador.

The PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

The legislative clerk read the nomination of Thomas John Watson, Jr., of Connecticut, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

The PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK—COAST GUARD

The legislative clerk proceeded to read sundry nominations in the Coast Guard placed on the Secretary's desk.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

(All nominations confirmed today are printed at the end of the Senate proceedings.)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move en bloc to reconsider the votes by which the nominees are confirmed.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the votes by which the nominees were confirmed en bloc.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I have no further need for my time.

The PRESIDENT pro tempore. The Senator from Tennessee.

Mr. BAKER. Mr. President, I have no requirement for my time under the standing order and I yield it back.

The PRESIDENT pro tempore. Under the previous order, the Senator from Vermont (Mr. LEAHY) is recognized for not to exceed 15 minutes.

THE PANAMA CANAL TREATIES

Mr. LEAHY. Mr. President, the role of an elected representative in a democracy is not only that of a constituent servant. We are elected also to use our own best judgment, and it is my opinion that the elected official who abandons his judgment in favor of popular sentiment abdicates his responsibility to bring his own faculties to bear on the issues of the day.

If I believed I was sent to Washington by the people of Vermont simply to poll them and reflect the results in my own votes, I would be compelled to oppose the ratification of the Panama

Canal treaties. But I do not believe that. On the contrary, I believe each of us is bound to come to our own determination of what is in the best interest of the Nation and the people of our respective States.

With that in mind, I am here this morning to announce that after months of studying the canal treaties and discussing them with many of my constituents, after listening to the public debate on the issue and in light of what I observed during my recent trip to Panama, it is my judgment that the treaties, as modified by the Carter-Torrijos clarification of October 14, should be ratified and I will work toward that end.

As a Nation which categorically rejects colonialism, our only valid interest in the canal is that it continue to operate in the manner it has since it was completed in 1914. We must insure that the canal will remain open to the world shipping and secure from military threat. The question then becomes how best to accomplish that. The answer is ratification of the treaties.

Prior to my trip to Panama, I had been told by a number of different people how difficult it would be to defend the canal from either internal or external attack. The Joint Chiefs of Staff estimate that at least 100,000 U.S. troops would be required.

But as I flew over the canal, it became clear to me how grossly I had underestimated the vulnerability of the canal. I am not a military expert, but with all due respect to our Armed Forces, I doubt the canal could be adequately protected by 100,000 American soldiers.

Given that situation, one can more clearly understand the opinion of Defense Secretary Harold Brown when he told the Foreign Relations Committee:

> Ability to defend and control access to the canal is essential. But the issue is how that ability can best be assured—by a cooperative effort with a friendly Panama or by a garrison amid hostile surroundings.

If we learned nothing else from Vietnam, certainly we discovered the difficulty of fighting indigenous forces in their own jungle terrain.

By ratifying the treaties and truly making the Panama Canal Panamanian, we increase the stake the Panamanians have in keeping the canal open. Increased toll revenues will be a keystone of their national economy and colonial resentment can give way to nationalistic pride.

Those are a few of the pragmatic reasons for ratifying these treaties. But there are other reasons, reasons that I feel are ultimately far more important in terms of our country's relationship with the rest of the world, and surely in terms of its relationship with Latin America.

As has been pointed out before, there are elements in the history of the canal that we cannot and should not look upon with pride. We cannot be proud that we fostered the Panamanian revolution from Colombia in 1903 and then concluded the original canal treaty with a Frenchman who never returned to Panama. We cannot be proud that that original treaty was never signed by a Panamanian.

But we have every reason to be proud of the way in which we have operated the canal. That operation has always been marked by scrupulous neutrality, and we have never operated the canal as a money-making venture. Rather, we have maintained it as a nonprofit service to world shipping. And obviously, the canal stands as an incredible technological feat today, to say nothing of the era in which it was built. Indeed, in this regard it ranks with the building of the pyramids and the landing of a man on the moon.

Despite this record of operation, the canal remains a constant reminder of an earlier, less enlightened era in our foreign policy. The memory is not a happy one for our American neighbors to the south and has proven to be a barrier to better relations with those neighbors. The Organization of American States unanimously supports the new treaties. To reject them would invite worsened relations with Central and South America.

But there is even more at stake than our relations with the nations of the Western Hemisphere. The entire Third World would regard rejection of the treaties as a further indication of our lack of commitment to political and economic justice for the developing countries.

Much has been written and said about how ratification of the treaties would play into the hands of the Communists. I believe the effect would be quite the opposite, for I suspect the Communists would rejoice at the loss in world opinion we would suffer if the treaties are rejected.

I will have more to say on these matters during the Senate debate on ratification as I plan to take an active role in that debate. Also, I will be sending my constituents a letter in which I will outline the arguments both for and against the treaties and detail my reasons for supporting them. I am sure most of them will be convinced of the merit of this decision.

This is not the most momentous issue of foreign policy that we face as a nation. Certainly the upcoming SALT treaty is of substantially greater world importance. But the Panama Canal treaties represent one of the most controversial questions in the country today. It is our responsibility to study and act on this issue rationally in the same way we would a more obscure bit of business. If that is our approach, it seems to me an inescapable conclusion that the option of ratifying these treaties will better insure the future operation of the canal than any military option available to us, and it will enhance the standing of the United States in our own hemisphere and in the world at large.

The greater and more powerful a country is, the greater the responsibility that country has to be just. The United States is the greatest and most powerful nation in the world—it can afford this act of overdue justice.

Mr. President, I yield back the floor.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. LEAHY. I certainly will yield.

Mr. ROBERT C. BYRD. Mr. President, I commend the Senator on his statement, on the logic of his statement, and on his courage in taking a position that is an unpopular one in any State, I would judge at this time. But the Senator has demonstrated this type of courage before, and he has demonstrated this kind of vision and understanding, and I am not surprised that he has taken the unpopular position in this instance, believing that in the long run his position is in the best interests of the country.

I applaud him and I salute him.

Mr. LEAHY. Mr. President, I might say that the decision is certainly made easier by the enlightened leadership on this position shown by the distinguished majority leader and the distinguished minority leader.

I discussed this matter with the President of the United States yesterday, and I made it a point to commend to the President the leadership of the Senate. There are many who, because of their office, because of their national office, such as the one that our distinguished majority leader holds, have far more at stake politically in taking the positions they have taken. Certainly that is a leadership position that commends itself to all of us.

I thank the distinguished Senator from West Virginia for his very, very kind remarks.

Mr. ROBERT C. BYRD. I thank the Senator.

ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 10 o'clock, with statements therein limited to 2 minutes each.

(Routine morning business transacted and additional statements submitted will be printed later in today's RECORD.)

CONCLUSION OF ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Is there morning business? If not, morning business is closed.

RECESS UNTIL 10 A.M.

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate stand in recess until 10 a.m. today.

The motion was agreed to, and at 9:45 a.m., the Senate recessed until 10 a.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. DECONCINI).

SUPPLEMENTAL APPROPRIATIONS, 1978

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of Senate amendment No. 43 to H.R. 9375, the last amendment in disagreement, which the clerk will state.

The legislative clerk read as follows:

The House insists upon its disagreement to Senate amendment No. 43 to H.R. 9375, an act making supplemental appropriations for the fiscal year ending September 30, 1978, and for other purposes.

The PRESIDING OFFICER. Debate on this amendment and any debatable motion thereto shall be limited to 5 hours, to be equally controlled by the Senator from Mississippi (Mr. STENNIS) and the Senator from North Dakota (Mr. YOUNG), with a vote on the amendment to occur not later than 3 p.m., today.

Mr. CULVER. Mr. President, I ask unanimous consent that Charles Stevenson, of my staff, be accorded the privilege of the floor during consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a quorum call may be charged equally against both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. STENNIS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, I ask unanimous consent that, during the consideration of this matter, Miss Louise Hoppe, of the staff of the Committee on Armed Services, be accorded the privilege of the floor. She is needed in connection with the matters under consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, what is the pending order of business?

The PRESIDING OFFICER. The Senate amendment No. 43 in disagreement to H.R. 975 is pending.

Mr. STENNIS. Mr. President, I move that the Senate further insist on its amendment No. 43, request a further conference with the House thereon, and that the Chair be authorized to appoint conferees.

Mr. President, I think that puts the proper issue for the time being before the Senate. I shall not argue it now except to remind the Senate that this conference report itself, except for this one item, has already been disposed of by the Senate. That item concerns the B–1. I have not had a chance this morning to confer with the Senator from California, but previously, when we had this matter before us, I remember his interest in this matter.

Mr. HAYAKAWA. Yes, Mr. President.

Mr. STENNIS. I feel that he has a contrary position, still.

I just thought, Mr. President, that we could start out on this motion, and we could use the time that has been agreed to. I shall yield to him now, if he wishes to make a statement. I am glad to yield to him.

The PRESIDING OFFICER. The Senator from California.

Mr. HAYAKAWA. If it is an appropriate time now for me to make that statement, I would like to do so.

Mr. STENNIS. Yes. But if the Senator would let me respond, I think it is customary for the manager of the bill to have a chance to present the position of the conferees with reference to a matter and then that would throw the whole matter open to debate.

The Senator from North Dakota, of course, is the ranking minority member of our conferees and I hope he would have some remarks even though we are divided on this particular issue—one of the rare times in history that we have been.

Is that understood?

Mr. HAYAKAWA. Yes.

Mr. President, first, I ask unanimous consent that my staff member, Peggy Haverstara, be granted privilige of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. Mr. President, does the Senator from California understand that the Senator from Mississippi wanted to proceed briefly now?

Mr. HAYAKAWA. To make his statement first.

Mr. STENNIS. Yes. I thank the Senator very much.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. STENNIS. Mr. President, this is an appropriations conference report. The late Senator from Arkansas, as we all recall, was chairman of the Appropriations Committee last year and chairman also of the subcommittee for the Department of Defense. He had requested me to handle that bill on the floor of the Senate in its consideration and passage and at the conference, which I did.

So technically, I am here today not as chairman of that subcommittee, but standing in the shoes of the late beloved Senator and trying to finish up this bill.

I mention that because I am not here as chairman of the Armed Services Committee. I am here as a member of the Appropriations Committee and acting for the one who was chairman of the Defense Subcommittee.

Mr. President, there has been time allotted on this measure, plenty of time for presentation of each side.

To me, it is a very serious matter. I have always supported the B–1 bomber program. In fact, I signed an early report of the Preparedness Subcommittee years ago regarding the B–1 that I think was the first Preparedness Subcommittee report favorable to the concept, and have supported it on down the line.

But under the facts now, with reference to this measure, I very firmly conclude that the interest of the B–1 having a future, as well as the rest of our program, it would be unwise to go on now and spend the money. I point out that it would be very unwise to spend the old money in the 1977 budget for aircraft, Nos. 5 and 6, now when it would mean so little in the completion time of the B–1 program should it be moved forward to production.

It would mean not over 6 or 8 months difference in the time, and that would be at the early end of a time span extending over into the mid-1980's or beyond; certainly about 8 years or possibly 10 years from now.

There are a lot of facts and money figures in it, but I have tried to prepare a brief, terse, statement of the main points involved here, and I took it from a "Dear Colleague" letter of yesterday, January 31. I want to read that letter and speak from it for my opening remarks on this matter. The letter states that the Senate will take up the supplemental appropriations conference report today. The questions to be voted on relate to the B–1. All others have been decided.

This question originated in the Senate Appropriations Committee last October wherein I made the motion that this money for fiscal 1977 be deappropriated or rescinded.

The committee at that time voted 17 to 0 in favor of deappropriating this money.

Later, six additional members of that committee filed their vote with the record keeper, all for a deappropriation of the money. That was as recently, as I said, as last October.

The sum that we are talking about here is $462 million of what I shall call old money which has been appropriated, but is unspent, and under the law will have to be spent unless there is a deappropriation.

I emphasize that this money is for fiscal 1977. It is standing alone, standing there alone without antecedents nor an immediate future.

The Senate has already taken out of the bill by rollcall vote the money for production of the B–1 for fiscal year 1978. That is an important point now.

This matter was presented to the Senate on the facts after the President rendered a decision, and on a rollcall vote on July 18, 1977, 59 Senators voted to take out of the bill the money which had already been written up. Thirty-six Senators voted to the contrary.

There has been very little change, Mr. President, on the facts since that vote was taken. That is the 1978 money.

The 1979 budget recommendations are out now and there is no money recommended for B–1 production in fiscal year 1979.

So I judge that there will not be any voted for that purpose this year. It leaves us, in with the B–1 production program, that the money is not in under the vote of the Congress for 1978. There is not a request for it, at least for 1979.

So this old money for production should not be spent. The question is just as narrow as that.

I have been for the B–1 all the time. I was against the bill that Congress passed, calling on the President of the United States—whoever he might be in 1977—to make a judgment as to whether or not production would proceed. I was against that bill, but it became the will of Congress. Mr. Ford was President then. Mr. Carter was President when the time came, under the bill that Congress passed, that a decision was required.

Congress cannot just stop this thing by criticizing the Executive for his decision. We brought it out and made the Executive make a decision. There is divided thought on it, but there was good thought both ways. I was against the idea, but it happened, and the President had to make a judgment. The judgment was contrary to what mine would have been, I think, but I am not the President. Now we have to go from there.

I looked into it immediately, as chairman of the Armed Services Committee, when that judgment came out, and I decided that the thing to do was to proceed, not to lose the time, but to take steps to consider the alternatives proposed. I was impressed with the fact that the President then said that he was not killing the program; that the B-1 program was still open; that as an alternative in his mind—I have the quotations here, and I will read them later—he would continue to consider it.

We here, at the legislative level, considered the alternatives he proposed. It went before our Armed Services Committee. We had hearings and brought to this floor a bill that our valued subcommittee recommended. Their recommendation was to move forward in the direction of the alternatives, and we passed that bill.

I was also on the Appropriations Committee, and I supported it in the Appropriations Committee after we got it through conference. When I say "we," I am not referring just to myself. Others helped a great deal in the authorizing conference.

Then we came back and got it past this body. The new money for the other programs was supported here by almost everyone, but not all of the programs got through the Appropriations Committee. We did get it authorized to the extent that it could be considered under a reprograming process.

Back now to the main issue: When the Appropriations Committee met, I offered this amendment out of a sense of duty. I was not acting for anyone except myself. The President had not mentioned the matter of offering an amendment of that kind at that time. I thought the money should be deappropriated, and I have already given the unanimous vote in the Appropriations Committee—17 for that deletion, plus 6 who filed their votes later—and it went through this body without being challenged. There was no rollcall vote on it, because it was not challenged.

Now it has been voted on two or three times in the House of Representatives, and I speak of those votes with deference.

My point is that now we are back to the same proposition on almost identical facts. I want to emphasize that this is not the killing of the B–1 program.

I quote from a letter from the President of the United States, dated October 7, 1977—from President Jimmy Carter to Representative BOB CARR—in which the President said:

I welcome the opportunity to respond to you and to the other Members of Congress who wrote me on October 5.

That letter, of course, is available here for anyone to see. I will read the more pertinent sentences, and I will let it go at that for the time being. The President said:

The penetrating bomber continues to be a part of our strategic triad. While I hope it will not be necessary to produce new aircraft, it is conceivable, though not likely, that future development would necessitate such an option.

He goes on to say:

I believe we must insure against the possibility, however remote, that we might have to produce a new penetrating bomber. That is why I have decided to finish the B–1's development, including the fourth aircraft, which is the last one needed in the flight test program.

That is a key phrase.

Going back for a moment to the action of this body, we voted in the bill that had already become law and voted after the President's decision in June to put in all the research and development money that was requested for the B–1. That sum was challenged on the floor of the Senate, and by a vote of 71 to 27 the Senate voted to keep that money in the bill. It stayed in the bill, and the bill went to the President and was signed into law. That sum was $442 million.

Furthermore, for fiscal 1979, additional research and development money has been requested for the same purpose—$105 million, as I recall; and I judge that that amount will be agreed to.

So far as the research and development program is concerned, those first four bombers that were completed provide the vehicle for all the necessary continued research and development and testing, all that is neded, and a willing Congress is providing that money. Therefore, this money I am talking about is not needed to go on and build bombers Nos. 5 and 6 to the extent of this $462 million, plus an additional amount.

I think this is important. Not many Senators are present to hear these facts, but this is a new element. I got these figures from the Air Force. They want the B–1 bomber. They did not want it stopped. They say that in addition to this $462 million, $280 million more would be necessary if these two aircraft in question are to be tested rather than just put in storage. So if we build them and go through all the testing that is necessary, then at some time this extra money would have to be spent—$280 million.

So the logical thing to do, if they are going to build them, would be to continue with the testing, as I understand these things, and that would total $742 million. So, logically, that is the amount at issue here today—$742 million that for the time being is not needed, even if we are going to continue the production later of the B–1 and here is a key point. Building Nos. 5 and 6 would make 6 to 8 months difference in the completion date of this whole bevy of bombers, the whole program of B–1 production, and that difference in time would come at the end of the time spectrum, the mid-1980's or beyond.

These facts are taken from a letter from the Chief of Staff of the Air Force, General Jones. He is not a personal friend of mine, but he is an outstanding man. He is an awfully big man, big between the eyes as we say down in my country. He has rendered a significant service in the B–1 program and other ways as Chief of Staff. In his letter, a copy of which I enclosed to Senators along with my brief letter, he says the following, and I am going to conclude. This is Gen. David Jones now.

As a practical matter, since there are no B–1 procurement funds in the FY 78 appropriations or in the FY 79 budget, even an early reversal of the production decision would delay IOC until the mid to late 1980s.

That abbreviation means "Initial Operational Capability."

I believe that circumstances likely to trigger a sudden decision on production of the B–1 would spring from a world situation in which the increased capability would be required before the B–1 could become operational.

Therefore, in a nutshell, my reservations about building 5 and 6 at such a high cost are that the advantages for the long term are marginal and for the near term, irrelevant.

In sum, I do not believe that investing nearly three-quarters of a billion dollars to produce and test two more aircraft is the best use of the country's defense resources, particularly in the absence of a realistic expectation of production. I do not question that, like a terminal patient, the program could temporarily be kept artificially alive. But the slippage and uncertainty in the B–1 program which have resulted from program and funding decisions convince me that the time has come to call a halt to further investment beyond the 4-aircraft test program.

That is not the Senator from Mississippi speaking. That is Gen. David Jones, Chief of Staff of the Air Force, as I say a very outstanding officer. I asked him to come to my office, come by the office at least where we could talk this entire matter over and go into it and he would tell me exactly how he felt, and that is what happened. I said, "Would you put that in a letter that is all right to use in debate?" He said "yes." And that is it.

And I base this case largely upon that man's letter, and I cannot conceive of anyone who could be more devoted to a cause than he is, nor better informed and more qualified to speak on such a grave matter.

Mr. President, I ask unanimous consent that my "Dear Colleague" letter of January 31, 1978, and the letter to me from General Jones of January 27, 1978, be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
January 31, 1978.

DEAR COLLEAGUE: The Senate will take up the Supplemental Appropriations Conference Report on Wednesday. The question to be voted on relates to the B–1. This question originated in the Senate Appropriations Committee last October, which voted 17–0 in favor of de-appropriating (rescinding) the sum of $462 million heretofore appropriated, but still unspent, for the B–1 program in the fiscal year 1977.

This money relates to completing the building of the B–1 Bombers No. 5 and No. 6. This money does not relate to research and development for the B–1. The money for continued R & D on the B–1 program has already been appropriated for the 1978 budget, and the added sum of $105 million has been requested for the 1979 budget, which I shall certainly support.

This funding for research, development and testing will retain an option toward the possibility if future production of the B–1 is needed. To quote President Carter on this issue: "Because of the stakes involved, I believe we must insure against the possibility however remote, that we might have to produce a new penetrating bomber. That is why I decided to finish the B–1's development, including the 4th aircraft, which is the last one needed in the flight test program."

The situation is that there is no production money for the B–1 in the 1978 budget because it was not approved for production by the Congress in the 1978 budget. There is no production money requested in the 1979 budget for the B–1 production.

An important point to remember on this funding matter is that an additional $280 million would be needed to complete testing of these 5th and 6th aircraft if they are manufactured. These funds are not now included in any approved budget or the budget request.

I have always supported the B–1 from the beginning, but I will not support spending this $462 million because under the facts now existing I think to spend that sum now would be wasted. However, that point and the reasons therefor are far better covered by a letter that I recently received from General David C. Jones, Chief of Staff of the Air Force, who has been and still is a strong advocate of the B–1 in which he states as follows: "Therefore, in a nutshell, my reservations about building 5 and 6 at such a high cost are that the advantages for the long term are marginal and for the near term, irrelevant. In sum, I do not believe that investing nearly three-quarters of a billion dollars to produce and test two more aircraft is the best use of the country's defense resources, particularly in the absence of a realistic expectation of production. I do not question that, like a terminal patient, the program could temporarily be kept artificially alive. But the slippage and uncertainty in the B–1 program which have resulted from program and funding decisions convince me that the time has come to call a halt to further investment beyond the 4-aircraft test program. I am more concerned with our overall strategic posture than with any single weapon system. So long as the B–1 program remains shrouded in uncertainty, consuming funds without adding to capability and diverting attention from our broader strategic needs, I am convinced that it will be more difficult to focus our collective energies on the many critical issues pertaining to our strategic forces in the days ahead."

I am attaching General Jones' letter for your information and I hope that each Senator will take time to personally read it, as well as this letter. Thank you for your time.

Warmly and sincerely,

JOHN C. STENNIS,
Chairman.

WASHINGTON, D.C.,
January 27, 1978.

Hon. JOHN C. STENNIS,
Chairman, Armed Services Committee,
U.S. Senate.

DEAR MR. CHAIRMAN: With reference to your request for my views on the current status of the B–1 program and specifically my recommendation on the rescission of FY 77 B–1 funding, I have devoted a great deal of thought to these questions since the President's decision not to produce the B–1. A major factor in my deliberations has been the trends in the respective U.S. and U.S.S.R. strategic capabilities, so my response must be framed in the context of my concerns in that regard.

As you know, for the past several years, the Soviets have been embarked upon an extensive modernization of their strategic forces. All discussion on intentions and shares of the budget aside, the undeniable fact remains that the U.S.S.R. is rapidly increasing, in both absolute and relative terms, the destructive power of all components of its nuclear arsenal, MIRV'd and non-MIRV'd. In my judgment, the responsible approach is neither to ignore nor to overreact to this growth.

In the interests of preserving a stable superpower relationship, the U.S. policy, which the Air Force has strongly supported, has been to attempt to restrain the pace and direction of Soviet expansion. This policy must be pursued through an interconnected process of negotiations and programs: on the one hand, the on-going SALT negotiations, and on the other, an adequate modernization of our own forces to maintain equivalence. The jury is still out on the question of how successful the current approach will be, but in all candor, I am concerned by the continuing momentum of Soviet strategic programs.

Thus, while I continue to believe in the efficacy of negotiations, I also believe our security interests will be best served by continuing to modernize our strategic forces, including the manned bomber leg of the Triad. Moreover, because of the unique contribution which the manned penetrator makes to our overall strategic posture, I believe this country will need such a capability for as far into the future as I can see.

As you are well aware, the Air Force recommended procurement of the B–1 to fill this need and we were obviously disappointed by the President's decision to terminate production. However, the decision to continue with the research and development did keep open an option for future production.

In my view, this issue of open options is central to the question of whether to proceed with aircraft 5 and 6. I have given serious thought to the matter and have discussed it at some length with the senior commanders concerned. It is our collective judgment, as well as my personal view, that going ahead with 5 and 6 is not the best way to meet the growing threat. Since I know that many thoughtful members of Congress have reasoned to an opposite conclusion from a similar view of the strategic balance and that some who agree with my conclusion do so for different reasons, some elaboration of my rationale might be appropriate.

First, I grant that keeping the production team and work force intact for a period of time is not without certain advantages. In the next breath, however, I must question whether the possible gains are worth the certain cost.

For example, just to manufacture 5 and 6 would cost at least the full amount of the proposed rescission, $462M. But unless we were to simply build and store the aircraft (certainly not intended), the estimate would go up by another $280M for OT&E funds to fly and test them.

The R&D gains from this additional investment in 5 and 6 would be nominal compared to what would be available from continued effort with 1 through 4. Likewise, regarding the option for future production, building 5 and 6 would make only marginal difference for the date for Initial Operational Capability (IOC). Assuming a 4-aircraft baseline, it would take approximately seven years to reach IOC after funds were provided; with 5 and 6 we could advance this date only a few months.

As a practical matter, since there are no B–1 procurement funds in the FY 78 appropriations or in the FY 79 budget, even an early reversal of the production decision would delay IOC until the mid to late 1980's. I believe that circumstances likely to trigger a sudden decision on production of the B–1 would spring from a world situation in which the increased capability would be required before the B–1 could become operational.

Therefore, in a nutshell, my reservations about building 5 and 6 at such a high cost are that the advantages for the long term are marginal and for the near term, irrelevant.

In sum, I do not believe that investing nearly three-quarters of a billion dollars to produce and test two more aircraft is the best use of the country's defense resources, particularly in the absence of a realistic expectation of production. I do not question that, like a terminal patient, the program could temporarily be kept artificially alive. But the slippage and uncertainty in the B–1 program which have resulted from program and funding decisions convince me that the time has come to call a halt to further investment beyond the 4-aircraft test program.

I am more concerned with our overall strategic posture than with any single weapon system. So long as the B–1 program remains shrouded in uncertainty, consuming funds without adding to capability and diverting attention from our broader strategic needs, I am convinced that it will be more difficult to focus our collective energies on the many critical issues pertaining to our strategic forces in the days ahead.

Sincerely,

DAVID C. JONES,
General, USAF, Chief of Staff.

Mr. STENNIS. Mr. President, I yield the floor for the time being.

Mr. YOUNG addressed the Chair.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

Mr. CRANSTON. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. YOUNG. I yield.

Mr. CRANSTON. Mr. President, I ask unanimous consent that Suzan Pitts and Allyn Kreps, of my staff, be accorded the privilege of the floor throughout the consideration of this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. I thank the Senator from North Dakota.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. YOUNG. Mr. President, I yield myself such time as I may take.

Mr. President, I am real pleased that the Senator from Mississippi has succeeded our late beloved Senator from Arkansas, Mr. McClellan, as chairman of the Defense Appropriations Subcommittee.

The Senator from Mississippi is one of the best, if not the best, informed Members of the Senate on defense matters. He has a long experience in this area. This, coupled with his knowledge and good judgment makes him an ideal chairman and one I will enjoy working with.

Mr. President, there have been few times in the past when my position on weapons systems has been different from that of my friend from Mississippi. Even our differences now on the B–1 are rather minor. The vote today on whether we

continue the development of the B–1 bomber or discontinue it, I believe, is largely a money matter.

If we could purchase the B–1 bomber for $5 or $10 million a copy, probably as many as 75 Members of the Senate would be willing to buy 200 or more.

Mr. President, the price of this weapon is symbolic of our present and future defense costs and it raises a question of whether in the future our people will be willing to sacrifice on other programs and expenditures to the extent necessary to keep us from becoming a second-rate power to Russia.

It is a case where the Soviet Government under their system may have some advantages. Under their system they can spend all the money they want for any weapons system and apparently are continuing to do so. What I fear most concerning the future security of this Nation is —will we be able to maintain the necessary expenditures to remain as powerful as we are today?

I do not pretend to be any expert on military matters. There may be other alternatives to the B–1 which would provide adequate defense for the United States. From my own studies and knowledge, I cannot help but feel, however, that we should proceed with these two additional B–1 bombers, especially when we have already spent more than $4 billion on the B–1 program.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HAYAKAWA addressed the Chair.

Mr. YOUNG. Mr. President, how much time does the Senator desire?

Mr. HAYAKAWA. About, I should say, 15 minutes.

Mr. YOUNG. I yield 15 minutes to the Senator.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. CRANSTON. Mr. President, will the Senator from California yield for one moment?

Mr. HAYAKAWA. I yield.

Mr. CRANSTON. Mr. President, could I suggest the absence of a quorum just to have a chance to talk with my colleague for about 1 minute?

Mr. HAYAKAWA. Yes.

Mr. CRANSTON. I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. CRANSTON. Split evenly?

The PRESIDING OFFICER. Is there objection?

Mr. STENNIS. No, Mr. President. But I think we better not have a quorum call unless there is some special reascn.

Mr. CRANSTON. I just wish to talk with my colleague for 1 minute. That is all. I do not care how the time is charged. Charge it to the time of those who are in favor of the B–1.

Mr. STENNIS. I do not object to 1 minute. But I will not agree to a whole lot of time.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HAYAKAWA. Mr. President, as you know, the House agreed last month to the conference report on H.R. 9375, making supplemental appropriations for fiscal year 1978. The House insisted, however, on its disagreement to the Senate amendment No. 43, which would deappropriate fiscal year 1977 B–1 bomber funds for airplane Nos. 5 and 6. I wholeheartedly support the House in its position on this matter and I, therefore, move that the Senate recede from its amendment No. 43 to H.R. 9375.

When the President canceled the B–1 program, he also stated that the B–1 would remain as an option for the next few years. The issue of aircrafts 5 and 6 is not a decision on production of the B–1, but instead a decision whether or not to maintain an economically feasible production option well into 1980, for a relatively small increment of dollars (previously appropriated). We cannot have the option of the B–1 without building airplanes 5 and 6. The building of planes 5 and 6 will retain the production capability of the B–1 manufacturing team, sustain a balanced work force at hundreds of facilities throughout the United States, and provide us with a production option into the 1980's when we will know the outcome of the SALT II negotiations.

We must realize that termination of the B–1 program, through the elimination of these two planes, will preclude full-scale production, should it be required, for 5 years or more.

Besides keeping our options open, planes 5 and 6 would be of invaluable service for experimentation and testing on structural tests, weapons integration, performance under a wide range of flight conditions, development of cruise missile launch technology, and continuation of other B–1 high technology which could be used for other purposes. The President has stated his desire to complete the research and development program on the B–1. The information to be obtained from this program is very important to the development of many future U.S. military aircraft. Failure to construct 5 and 6 will mean the B–1 research and development cannot be completed.

Aircraft 1 through 4 are structurally inferior to aircraft 5 and 6. Aircraft 5 and 6 will be the first B–1's to use modern composite structural materials for their horizontal stabilizers, bomb bays, and other essential parts of the aircraft. The use of new, lightweight materials needs to be proven by flight testing on the B–1 before they can be incorporated into future military aircraft. One of the most important research and developmental tests remaining to be conducted on the B–1 will evaluate the aircraft's ability to withstand high intensity bursts of radio wave-like electromagnetic energy that are produced over vast areas by high altitude nuclear explosions. B–1 4 has never been protected against this effect. It is quite different electrically from aircraft 5 and 6.

In view of proposed SALT II limitations on cruise missile range and current test failures of the cruise missile, I think it would be foolhardy of us not to build planes 5 and 6, which would give us the option to go ahead with the production of an advanced penetrating bomber if we feel the need. At this point, let me say that I thoroughly support production of the cruise missile and feel that it is capable of being a very effective weapons system. It is, however, still in the development stage, and, as with all early stages of weapon development, it has problems that need to be ironed out.

In the meantime, I think we still have a need for a manned, penetrating bomber. And even in the future, I think it will be important to maintain a mixed force of manned bombers and cruise missiles.

Testimony before the House Appropriations Committee revealed that a 1,500-mile cruise missile limitation would prohibit the air-launched version from reaching the deep inland targets in the Soviet Union. Cruise missiles launched from aircraft 300 miles off the Soviet coast will not even reach the deep targets and we will never get as close as 300 miles. Future improvements in Soviet air defenses will further drastically reduce the target coverage. Therefore, it is clear that we are going to need a penetrating bomber to deliver the cruise missile to within its target range. The B–1 bomber, with its small radar signature, good electronic countermeasures, and high-speed dash capability, could penetrate such a barrier with a 10-percent or less attrition.

B–1 aircraft Nos. 5 and 6 can be completed for approximately $965 million vis-a-vis an estimated cost of $745 million if they are terminated. Completion of these two aircraft will sustain a balanced work force at hundreds of facilities throughout the United States and provide a meaningful option for production into the year 1980. I find it hard to believe that some Members of this distinguished body favor terminating planes five and six at the ungodly cost of $745 million when, for only $220 million more, the United States could have two complete B–1 bombers which are vital to the completion of research and development.

As my colleagues may recall, an article appeared in the New York Times last month which quoted John W. R. Taylor, editor of Jane's All The World's Aircraft, as saying that Soviet leaders "must be surprised beyond belief that the U.S. President has disposed of the B–1 without asking any Soviet concession in return. If our planet is subjected one day to the unimaginable horrors of a Third World War, 1977 might be recorded as the year in which the seeds of defeat for the Western powers were sown."

In addition to this, Mr. Taylor recently wrote a letter to House Armed Services Committee Chairman, MELVIN PRICE, re-

garding the House hearings on U.S. strategic posture. Mr. Taylor enclosed with his letter a statement for the committee giving his authoritative opinion on the B–1 and the alternatives being discussed. A copy of his letter and statement are on your desk, and I kindly ask that you take the time to read them.

In summary, $3.6 billion has been put into the B–1 bomber program. Can we not see fit for a relatively small amount more dollars to build planes five and six so that we have an option available to us if we should discover that a manned penetrating bomber is vital to the security of the United States? If this Congress errs, let it err on the side of safety.

Mr. President, I ask unanimous consent that Mr. Taylor's letter together with his statement be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Chairman MELVIN PRICE,
House Armed Services Committee, U.S. Congress, Washington, D.C.

DEAR SIR: I understand that the House is about to begin hearings on the strategic position of the United States—a subject which is of the very greatest importance to everyone desirous of maintaining world peace.

Clearly, no non-American has the right to interfere in such procedings. However, I thought it might be helpful for the members of your Committee to know how many people in Europe feel about the current debate concerning the future of the B–1 bomber programme.

I am, therefore, taking the liberty of enclosing a short statement of my views on the B–1, and alternatives. If you consider such a course admissible, I should be grateful if you would enter this statement as evidence for your discussions. Be assured that its sole purpose is the maintenance of peace throughout the world, and in no way is it intended as a criticism of decisions already taken by your Administration. As a Christian, with friends in almost every country in the world through my association with JANES' ALL THE WORLD'S AIRCRAFT, for more than 20 years, I wish only to see a true balance of power maintained between East and West. This must eventually lead to that stability, peace and friendship which we all desire so strongly, and which is worth any price to attain, to ensure the safe and happy future of our children and grandchildren.

Our thoughts and prayers will be with you as you debate these vital issues.

Yours sincerely,

JOHN W. R. TAYLOR.

JANE'S YEARBOOKS—B–1: THE ALTERNATIVES

President Carter's decision to cancel production of the B–1 bomber, and to put increased emphasis on cruise missiles, was hailed by some people as a decision in favour of the less costly of two equally effective weapon systems. This is a fallacy. In its long-range strategic form, the cruise missile must be launched from a carrier aircraft; the B–1 was intended to be that aircraft.

The SALT protocol negotiated subsequently by the U.S. and USSR restricts the range of the air-launched cruise missile to 2,500 km (1,350 nautical miles). This limitation enables the Soviet Union to predict the few areas from which it would be viable to launch the missile against specific targets inside its borders, and to concentrate its defences accordingly.

At the present time, the Soviet domestic air defence force is reckoned (by DoD) to have 2,540 piloted interceptor fighters, 12,000 surface-to-air missiles on 10,000 launchers, and 6,500 surveillance radars. The inteceptors include MiG–25s (Foxbat-As), the fastest combat airiraft deployed by any air force in the world. This defence system—battle tested in miniature in Vietnam and the Middle East—would not only have to be approached by the cruise missile launch aircraft, but would have to be penetrated by the missiles themselves. Yet published comments by U.S. officials suggest that, in their present forms, cruise missiles fly at subsonic speed, lack effective ECM, are incapable of taking evasive action, and are intended primarily for use against undefended targets. Where are such targets in the USSR? Are not the alternative attack methods inherent in the B–1 (e.g., with SRAMs and free-fall weapons) a valuable insurance against future shortcomings of the cruise missile in an operational environment?

Four possible vehicles for the air-launched cruise missile have been discussed:

1. An uprated B–52. The B–52 has been a superb aircraft but, as a design, is now more than 20 years old. Who drives a 20-year-old automobile as his work vehicle? The B–52 was designed to drop free-fall nuclear weapons from a great height. In no way can its well-used airframe be expected to go on flying through turbulence at very low altitude (the optimum launch height for a missile attack) for another 20 years.

2. The FB–111H. This projected 15-foot stretch of an existing FB–111A airframe would be refitted with two of the engines developed for the B–1. The suggested force of 65 FB–111Hs would cost at least $3.3 billion, for which SAC would gain not one additional airplane in its inventory. Nor could the FB–111H ever be a B–1. There is not even proof that it would work.

3. The B.747/DC–10 carrier. The simple answer to whether conversions of a commercial wide-body transport would prove viable is to ask any SAC crew if they would relish flying such an aircraft—with its huge radar signature—towards skies patrolled by Foxbats, in order to launch their missiles. This is the still-costly solution proffered by a computer, incapable of thinking like a man.

4. The B–1. Designed for the task, and capable of penetrating any known defence system. Much of the development cost has already been committed, with outstanding flight test results. There is little doubt of how much the Soviet Air Force would welcome such an airplane in place of its own formidable Tu–26 (Backfire) supersonic swing-wing bomber, of which there are already more than 100 in its growing force. Nor should the potential maritime role of the B–1 be overlooked in view of the great size and efficiency of Soviet sea power. The B–1 is large enough to carry every type of air-launched weapon now existing or likely to be developed into the 21st Century.

In conclusion, it should be borne in mind that when the Royal Air Force lost the TSR.2 bomber, of which a prototype was flown successfully in the mid-sixties, it lost all future claim to the strategic capability that had been the heart of its tradition since World War I. Soviet ICBM development threatens to eliminate 90% of the US Minuteman force in any first strike. It may not be long before the locations of every missile-launching submarine are permanently pinpointed. Unless the USAF has an airplane in the class of the B–1 (and it is unique in its class) America may lose the third and last component of its strategic Triad. Only the balance of power represented in the West by Triad has kept the world free from the unimaginable horrors of a nuclear war for more than thirty years. Before condemning the B–1 as too costly, it is essential to answer the question. "How much is it worth to stay alive?" Only then do we appreciate what might be the ultimate alternative to the B–1.

Mr. STENNIS. Mr. President, I yield such time to the Senator from West Virginia as he may desire, please, and may we have quiet in the Senate?

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. YOUNG. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. ROBERT C. BYRD. Of course.

Mr. YOUNG. Mr. President, I ask unanimous consent that Michael Shorr of Senator JAVITS' staff be granted the privileges of the floor during the consideration of the pending bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, the Senate's previous position on the B–1 bomber is a sound position and it should be maintained. There is no reason, no reason whatsoever, why the Senate should modify its position, and I support the chairman of the Appropriations Subcommittee, Mr. STENNIS, in disagreeing with the action taken by the House.

The funds in question are unexpended appropriations from fiscal year 1977. President Carter requested the rescission of these funds following his decision announced on June 30, 1977, that we should not proceed with production and deployment of the B–1.

I strongly supported the President's action on the B–1 and do not believe there is any justification for allowing further money to be spent for B–1 production. That is $3.70 for every minute since Jesus Christ was born. That ain't chicken feed; $3.70 for every minute since Jesus Christ was born has already been spent on the B–1, and now it is proposed with House approval, to spend another 46 cents for every minute since Jesus Christ was born—another 46 cents on the production of two aircraft which are not needed.

The $462 million involved in this recission would have been for production of the fifth and sixth B–1 aircraft. Three B–1 test aircraft are already flying and a fourth is close to completion. Four planes would certainly appear to be adequate for research and development purposes and to keep the technology alive and progressive.

We should not overlook the fact that the fiscal year 1978 appropriations bill, already approved, contains $442.5 million for B–1 research and development. We are maintaining the R. & D. But the funds involved in the rescission—the funds we are talking about here today—would be for production, and further expenditure for that purpose is simply not warranted. In no way can it be justified.

Mr. President, there are much wiser and more effective uses of the taxpayers' money. We have already spent more than $3.7 billion on the B–1.

We are talking about planes that would have cost more than $100 million apiece. And, in this case, we would be getting two planes for $462 million.

If we continue to allocate funds for the B–1, vast amounts will be diverted from other vital military needs as well

as from much-needed domestic programs.

In recent months Congress has taken action to expedite work on Cruise missiles. We have provided funds for Cruise missile carriers and for modernizing our B–52 fleet. The accelerated emphasis on the Cruise missile is reflected in President Carter's budget proposal for fiscal year 1979. The administration is requesting $416.1 million for the air-launched Cruise missile in fiscal year 1979. We would be continuing development and procurement of Cruise missiles for deployment on B–52's, plus exploring the possibility of using other aircraft as Cruise missile carriers. In addition, we would not be ending our research and testing on the B–1 under the administration's budget proposal, which requests $105.5 million for that purpose—which is 10.5 cents by the way, for every minute since Jesus Christ was born.

Considerable attention has been given to comments on the Cruise missile in the preface to a recent edition of Jane's All the World's Aircraft. Jane's, which is published in Britain, is recognized as an authoritative source of information, but not necessarily of analysis. In this case, I do not believe the editor's comments on the Cruise missile are justified.

It should be remembered that the Cruise missile was conceived as a global weapon long before the B–1 cancellation decision. Studies do not support claims that Cruise missiles would be incapable of penetrating the Soviet Union air defense system. Moreover, considerable latitude exists in Cruise missile design in order to improve survivability of the missile.

There is strong evidence that the cruise missile can be a highly effective element of our overall strategic capability. I strongly support the cruise missile. We have moved wisely in turning away from the B–1. Not only is it extremely costly, but there are serious questions about its potential effectiveness and possible vulnerability. We are proceeding with more credible and cost-effective systems, although continuing, as we should, the research and development on the B–1.

Mr. President, there is no need for further expenditure on B–1 production. I support the Senator from Mississippi, and I urge that the Senate support its manager and stand by its previous position.

I thank the Senator for yielding.

Mr. STENNIS. Mr. President, I thank the Senator from West Virginia very much for his wise counsel and his speech.

Mr. President, I would like to yield now to the Senator from Iowa (Mr. CULVER). I yield him 15 minutes, and more time if he needs it later.

The PRESIDING OFFICER (Mr. ABOUREZK). The Senator from Iowa is recognized.

Mr. CULVER. Mr. President, I must say at the outset that standing here today under these circumstances gives me a very unreal feeling. I feel a little bit like Alice in Wonderland, or that this is the Twilight Zone, or "please pinch me and bring me back to the real world."

Mr. President, it has been almost 2 years now since the Senate said to the President of the United States, "You decide what we should do about the B–1 bomber." That was in May 1976; and, in President Ford's fiscal year 1977 budget, funds were provided to begin production of aircraft Nos. 5, 6, and 7 for $1.16 billion.

Mr. President, there has been a great deal of controversy about the B–1 bomber as a weapons system. Why? Because in 1970, when I served in the House of Representatives, I looked at this program and I remember that that bomber was then, in 1970, estimated to cost about $40 million per plane.

What happened? From 1970 until the time the Senate made its decision in May of 1976, the estimated cost of that aircraft, per copy, continually increased.

Increased? It would curl your hair. It went from $40 million to an estimated $117 million per plane, and going up.

The proposal was to buy 244 of those "bargain basement" planes for about $30 billion. And, if you add the out-year operation, maintenance, and support, there is not enough room on the paper to estimate the billions and billions of dollars. Eighty billion dollars, $90 billion—you name it, and your guess is as good as anybody's.

Now, when the Senate looked at this plane, Senators said, "You know, it is a beautiful plane. It ought to be able to carry out its mission. It should be able to fly." Could you expect anything less at $117 million a copy, that it flies? That it can carry out its mission?

But the Senate, in May of 1976, said, "We don't think it is wise to buy it before we finish test flying it." Congress was being asked to make a production decision before research, development, and testing evaluation was completed.

Congress said, "Look, we have been down that road. We have gone that route." Did anybody ever hear of the C–5A?

And we said, "We are really not sure of much on this. We are scared to death of the cost. If it is essential to our national security interest"—and this is the key—"if it is essential to our national security interest, we should buy it. And money should not be a consideration."

If it is crucial to the survival and the national security interest of this Nation, I would be the first one here on the floor fighting for it.

I am for a strong defense. But I am not for wasting money. I am for a powerful nation, but I do not like to vote stupidly. I want those resources to be applied in a way that we get a bang for our buck, so that we are really combat ready.

Now, the Senate said, and the full Congress ultimately said, "Mr. President, whoever you will be"—we did not know who was going to win the election in November. All we knew was that it made no sense to buy a pig in a poke at that price without knowing what we were doing.

We said, "With those budgetary implications for the next President and for the next President and the next President and the next President"—we owed it to him as well as ourselves to say—"you take a look, and you can take a look in January of 1977. After you are sworn in to uphold the Constitution, and defend America, you look at all the facts. And by then, Mr. President, whoever you are, we will have completed testing, research, and development in the fall of 1976, about the time you are getting elected. We will have all that information available to us, and you can look at all those data. You can talk to your Secretary of Defense. You can review the international environment that exists at that time. You can look at SALT. You can make a review of our strategic posture, of our defense needs and your own budget. And we want you, Mr. President, to make this decision in appropriate consultation with all your top military advisers, including the Secretary of Defense,"—who, incidentally, turned out to be a former Secretary of the U.S. Air Force, from California, Harold Brown.

Now, the President, you remember, started to waffle a little about this B–1. There was talk about campaign promises and whether he was going to do this or do that. But the President, much to his credit, as a former naval officer, Annapolis graduate, engineer—engineer—cost-effective man—said to Harold Brown, "Harold, what do you think? We had better study this thing really hard. You were 22 years old when you got your Ph. D. as a nuclear physicist and you taught at Columbia University and you were a SALT adviser and you were head of CalTech, and you were former Air Force Secretary, and you are smart as the devil. You know the politics, you know the merits, you know the Russians, you know the Americans. What do you think?"

Well, Harold Brown thought, thought, thought. He started out being for the B–1.

I remember a few years ago, when I wrote some letters to people, Maxwell Taylor wrote back and said, "Don't build it. Waste of money."

Harold Brown wrote me and said, "I am not so sure. I am still inclined to go that way."

That was back in 1976.

But he studied it. He studied it very hard. He came in, he had all the test data, and he said, "You know, Mr. President, it is a tough call for me, but I am convinced. We have made so much progress on the research and development of cruise missile technology since I was the Air Force Secretary, I really think we have a cost-effective winner with the cruise missile. It only costs less than a million dollars apiece. It is very small, so you can barely see it on a radar crosshair; it flies like the devil; very accurate. You can just flood Soviet air defenses."

The real concern we have, of course, and the justification for even building the B–1, is the pace of Soviet air defense capability. Will they get a lookdown, shootdown radar in 10 years, which will permit them to stop the B–52 penetration? That is the question. That is the issue. Right now, they do not have that capability and we do not have any rea-

son to believe that they will get that capability for another 10 years at the earliest, the most conservative estimates.

What does that mean? That means that the B–52—modernized G's and H's, can carry out this mission competently. That is official Air Force testimony.

We hear all this bunk about how old and decrepit and aged they are. Well, then, one should ask that same Senator why he voted for $5 billion in the last few years to modernize them, why he did that, why he wasted money on it to put electronic countermeasures on them, to harden them up, to improve their firepower, accuracy, radar, computers and so forth. Why did he do it?

Listen, if you have at least a little confidence in official Air Force testimony: They say that the B–52's are structurally sound, structurally sound into the 1990's, and mission capable without question into the late 1980's. The only thing we question is, after the late 1980's, is whether the Soviet air defense is going to be such that they have a look-down, shootdown capability and can keep the B–52 out.

Harold Brown said, "You know, if they do develop that capability by the late 1980's, is it not possible that the B–1—which has a smaller silhouette than the B–52, which can fly a little lower—not much—a little faster—is it not very likely that when they develop that, they can also keep the B–1 out?"

He said, "Does it make sense to bet $30 billion on the B–1 bomber, on the hope that when the Soviets get this technology breakthrough on air defense, suddenly, they will have a system that will catch the B–52 and yet leave open a magic window that lets the B–1 in?"

No. Harold Brown is too smart to buy that one. That is a bad bet.

He suggested, let us go another way. Let us go with cruise missiles, put them on the B–52. Let us take a good look at the 747 as a stand-off bomber. Let us make some cost estimates as to which system is cheaper and best—both. Cheaper than the B–1 and far better, because it complicates Soviet air defense and gives us greater and higher degree of confidence that no matter what the Soviets do in their labs, we can more than cope, we can confidently defeat it, and we did it.

The President made a very courageous decision.

Do you know something? It was the first time in the history of this Nation, and it was on the occasion of the most costly and controversial weapons system in the country's history that a President of the United States stopped a major program on his initiative. The first time. And what did that mean?

It meant that we, once again, had these decisions on our national security being made—by whom? Being made by the democratically constituted authorities of our national political life.

These decisions were not going to be made by the arms manufacturers.

Do you remember Eisenhower? Do you remember his great speech of January 17?

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. STENNIS. I yield 5 more minutes to the Senator.

Mr. CULVER. Do you remember that speech, January 17, 1961, by Dwight Eisenhower, the day he left office?

He said, "Beware. Beware."

One of our greatest generals in the history of this Republic.

"Beware of the military-industrial complex. It is a threat to our democratic system."

He was not a babe in the woods about matters military.

What did he mean? Because for the first time in our national life we were going to be manufacturing weapons in peacetime because of the cold war, he argued, be careful that these interests do not get hold on and control your Government and take it away from your people and take it away from your elected representatives.

Now, why are we here? We are here today for one of two reasons. The first one has to do with those people that were in the minority when we voted numerous times on this before—one time the vote was 79 to 0 to take out money from the 1978 fiscal year budget.

Now we are dealing with fiscal year 1977, if we can believe it.

We are here for one of two reasons. Those in the minority want to refight the issue on the merits, having lost, and I do not think that is a useful way to spend our time on every issue.

Or secondly, they are here because of the tremendous economic pressure in their districts and in their States, because of jobs, money profits for the arms industry, and for all those subcontractors that are carefully put in every congressional district where there is a key vote.

Now, I know something about this pressure. Collins Radio Co. in my hometown is owned by Rockwell International. They employ 13,000 or 14,000 people and they had a significant contract on the B–1. I have been hearing for years from labor and management, and many of them do not like my position on the B–1.

But I believe that as long as I am elected to sit here, and I serve on the Senate Armed Services Committee and I consider this issue, I have to consider it as not just what may be good for them, but what is good for this country, and what makes a strong defense.

The arms industry will build anything. They should be told on a competitive bid basis what we need, and then they should build it, and we should buy only what we need and we should get what we pay for.

The national defense budget should not be a public works bill—jobs. I am concerned about jobs. I am concerned about people's human dignity and their self-respect and I want Government to help them in appropriate ways to have gainful employment opportunities—proper ways.

Right now, we are talking here about giving back, deappropriating as the chairman mentioned, $462 million.

We have to add $280 million to that for research and development testing, according to the Air Force, or those two planes are not any good to us.

So if we add that up we are talking about $742 million.

We are talking now about buying two more planes. The official Air Force testimony is that they cannot get anything of real importance out of the two additional ones, and we are talking about spending now not $117 million for one of these planes, but $720 million for a plane we do not need and we have not even decided to go to production.

If you do not think that is madness, show me a new definition.

The PRESIDING OFFICER. The Senator's additional 5 minutes have expired.

Mr. CULVER. Just one last minute.

Mr. STENNIS. I have some additional time for the Senator.

Mr. CULVER. Three minutes?

Mr. STENNIS. All right.

Mr. CULVER. I thank the Senator.

The Air Force says that if we go to these Nos. 5 and 6, we will employ about 11,000 more people. They have about 800 people now working on the B–1. Divide 11,000 into $1.16 billion, and you get about $100,000 a job.

That is not a sensible public works project. There are better alternatives to create jobs.

The $462 million now under consideration would provide over 100,000 CETA jobs, or 500,000 summer jobs for disadvantaged youth.

It is troubling to me that there should be so much interest in wasting these funds for the B–1 bomber when there are so many worthwhile domestic programs which do not even come close to the amount we hope to save by this deappropriation.

For example: Our meals on wheels program costs only $250 million per year. Our home winterization program for low-income elderly people gets $120 million per year.

Or consider the comparatively small sums which go for juvenile delinquency programs—about $100 million per year. The budget for runaway youth is $12 million per year. Child abuse programs get $19 million.

Our current bridge repair budget is only $180 million per year. More is needed.

Federal soil conservation efforts should take $432 million in fiscal year 1979.

Compare those figures with the enormous cost per B–1 job. The fact of the matter is that the defense budget is no place to go around stimulating jobs. Most of it is white collar. It is not in areas of chronic unemployment. It is not targeted and it is not cost efficient.

If there are ways we want to stimulate the economy, and create jobs, we can get into the environment and things that are labor intensive, education, health, and transportation.

The Air Force said just yesterday, that each of those B–1 jobs will come out about $4,150 a month, $50,000 a year for each job. Some of them are 3-year jobs.

Can you believe it? On that basis.

So finally, Mr. President, let me just say that I am continually amazed by

those people who come to this floor and talk about budget constraint, talk about cost effectiveness, and scrutiny in our domestic budget, talk about wasting money on social programs—not recognizing that our national security is best assured with a strong economy, and with the improving welfare of our people, and a strong national defense—and turn around and prepare now to spend $720 million for two each, for two additional planes. I cannot see how they with a straight face can say that they are for cost effective defense or are responsible about the budget—under all this enormous avalanche of official figures and judgments.

Mr. President, I think the evidence is overwhelming that our national security is going to be strengthened, not weakened, by not going ahead with the B–1. We have less costly, better alternatives to carry out the same mission; and certainly this Nation, given our current social and economic problems, can more wisely apply these precious resources in a way that more genuinely contributes to the national strength and security of us all.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. YOUNG. I yield to the Senator.

Mr. GARN. I will take about 15 minutes.

Mr. President, I finally agree on an issue with my distinguished colleague, Senator CULVER, that this question is getting a little old. That is the first thing we have agreed upon in this issue in 2 years, because he and I have been debating it not only here but on "Meet the Press" and other places. So we pretty much know what the other is going to say. Although we may be a little loud and a little strong in our opinions, it might be a surprise to some people that JOHN and I are very good friends personally, despite our differences of opinion. Nevertheless, we do have a very strong difference of opinion in this particular issue.

We have heard the usual rhetoric. Frankly, I cannot stand to go back and rebut each point over and over again. It has been done many times. All we have heard here today, basically, is the same old thing, that it is the issue of two airplanes. If it were that narrow an issue, I would not be for it. I do not happen to be from a State that has anything to do with the B–1—that I am aware of. It does not mean any jobs in my State. The Minuteman III did, and I confessed that on the floor when I talked about it. But I am not aware that the B–1 means 1 cent to my State. If it does, I would be surprised.

I am here talking about national defense. Airplanes Nos. 5 and 6 are rather unimportant so far as two more aircraft are concerned. Six B–1's are not an effective bomber force. I recognize that. So the issue is much larger and much broader—much broader than just those two airplanes. It is the whole strategic deterrence and defense of this country that is at stake. The B–1 decision by itself may not have been that serious, had we not had an administration that is gutting the strategic deterrent of this country, by dismantling the triad.

Last spring, the President came out with some very strong strategic arms limitation talks proposals, and I thought, "Hey, this is great. I didn't vote for this man, but he's going to be tough on defense. He had some military background. Maybe he learned something at the military academy." He told the Soviets at SALT talks, "This is what we are going to propose, and if you don't like it"—paraphrasing him—"we're going to have to increase the defense budget. We may have to make some other considerations."

I applauded that statement. Then, less than 2 months later, he unilaterally canceled the B–1. If for no other reason, would it not have made some logical sense before we gave up the B–1 to say to the Soviets in the SALT talks, "You give up your Backfire bomber"? I am not going to take the time to go into the capabilities of the Backfire bomber, but it is being produced at a rapid rate and it does have the capability of the B–1. It does have the capability of hitting 80 percent of the population of the United States, without refueling in the air. I know a little about air refueling, too. I was an air refueling pilot for 4 years. Let us not kid ourselves. The Backfire can land in Cuba. Castro would be glad to have them land there.

But no, we did not ask them. The President came out sounding tough, but backed off his proposals immediately. He did not consult the Arms Control Subcommittee on Armed Services for 5 months. Senator JACKSON and I and others were concerned about that.

He said that instead of having the B–1, we were going to give it up unilaterally and were going to replace it with the cruise missile. Again, we are comparing oranges and apples. You need the B–1 to carry the cruise missile. You need to get it there, far enough in, to penetrate, to do some damage.

But that was not bad enough. Then he backs off the SALT proposals to the extent where we have offered cruise missile range limitations that make the sea-launched missile and the ground-launched cruise missile militarily ineffective. We have given them away.

They are effective 350 nautical miles from a Soviet submarine, which can hit 50 percent of our country—the east coast, the west coast, the gulf coast—and we cannot hit anything in the Soviet Union. They do not have water around them, as we do.

We cannot share technology on ground-launched missiles with our NATO allies, so where are we going to launch the cruise missile from? We agreed to give it away in SALT.

So the issue here is not just two aircraft. It is keeping credibility. It is keeping that production line open, with some threat to the Soviets, until some of those other decisions are made. That is what I am fighting about. To me, from the State of Utah, two more aircraft do not mean a darn thing. From that narrow context, I agree with Senator CULVER that it is a waste of money for just two aircraft. But it is not a waste of money to keep that option open. It is not a waste of money to keep that production line open.

This President also canceled Minuteman III, so we have no ongoing missile program. We have delayed research and development, slipped another year on MX; so there are two legs of the Triad he is cutting off.

Let us talk about the third one, the Trident submarine missile. Let us talk about the difficulties and the delays there. Let us talk about the 1979 military budget, which is another sham and a hoax. It sounds pretty good, but the American people should start realizing that in terms of percentage of the gross national product, in terms of the total budget, we have a lower military budget the last couple of years than any year since 1950, the year before the Korean war started. Let us put a little inflation factor, caused by this irresponsible, spending Congress, into the cost of military programs.

What is happening primarily in this budget? Yes, it is up a little—a little less than 2 percent, in real terms, for 1979. Thank goodness he did not cut it more. But where is it primarily to be cut in budgetary systems?

I agree with the President on building up NATO. Even that is a little gimmicky. Where are we getting the troops to send over there? We are taking out of the training command in this country 10,000 in the Army, and we are shortening the training cycle, so they have to be trained in combat techniques in the forward areas. Nevertheless, I am glad we are increasing the readiness in Europe.

But what happened in the Air Force? There was a cut of about $1 billion in R. & D. We are eating our own seed corn.

That budget is not bad for this year or next year, but I am scared to death of the relative difference between the Soviet Union and the United States of America in the period of about 1981 to 1988. We had better start looking at military budgets down the road, instead of this year, and we had better start looking at the B–1 in terms of the total context of the Triad and strategic defense and not at the narrow issue of just two aircraft. That is what I am up here fighting about.

I cannot really disagree with my distinguished colleagues about a couple of airplanes. We do not really need a couple more to test, but it is critical that that production line should remain open. We need a President who will look beyond 1980, when he faces reelection.

There is another issue here that needs to be brought up, too, and that is this President's credibility—the difference between what he says and what he thinks.

Specifically, I am talking about the Impoundment Control Act, which Congress passed a long time before I came to the Senate, because Mr. Nixon would not spend money appropriated by Congress. Congress did not like that, and rightfully so, so they passed an Impoundment Control Act, so that Presidents would be compelled to spend money appropri-

ated by Congress, as a separate branch of Government, and to recover some of the power of Congress from the so-called imperial Presidency.

We had Richard Nixon on with David Frost saying a President could be above the law, and we had President Carter who the next day in the paper said that is ridiculous, absolutely ridiculous, no President is above the law. And I agree with him. No President should be above the law.

But we have an Impoundment Control Act. I do not even know what this debate is all about. I do not know even why we are still here today, I say to Senator CULVER, because a—

"Rescission bill" means a bill or joint resolution which only rescinds, in whole or in part, budget authority proposed to be rescinded in a special message transmitted by the President under section 1012, and upon which the Congress completes action before the end of the first period of 45 calendar days of continuous session of the Congress after the date on which the President's message is received by the Congress;

And at that point the funds must be obligated. On October 4, 1977, 45 days had transpired since President Carter said, "Rescind the money for planes five and six." Neither House of Congress had acted to rescind, but he has still not obligated those funds.

I have continually written to Elmer Staats of the General Accounting Office, and I have continually gotten wishy-washy answers. I ask unanimous consent to submit for the RECORD at this point the whole correspondence, mine to Staats and to Secretary of Defense Brown, to be printed as part of the RECORD with the wishy-washy answers.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Telegram]

Hon. ELMER STAATS,
Comptroller General of the United States, Government Accounting Office, Washington, D.C.

DEAR MR. STAATS: On July 19 the President submitted a special message to the Congress under the provisions of the Impoundment Control Act of 1974 requesting rescission of $463.4 million dollars for the B-1 bomber aircraft program and the Short Range Attack Missile (SRAMS). On Tuesday October 6 the forty-five day waiting period provided for in such Act expired.

As you know, under the terms of the Impoundment Control Act of 1974, the President is obligated by law to resume the expenditure of any funds withheld from obligation during such forty-five day period, unless the Congress, within such period, enacted legislation approving the rescission of the funds.

I request that you promptly monitor the Department of Defense to ensure that they are properly proceeding as required by the Impoundment Control Act. I further ask that you give me a full report on this matter by telephone on Tuesday, October 11, 1977.

Sincerely,

JAKE GARN,
U.S. Senator.

OCTOBER 6, 1977.

Hon. HAROLD BROWN,
Secretary of Defense, The Pentagon, Washington, D.C.

DEAR SECRETARY BROWN: Please be advised that today I requested the Comptroller General of the United States to immediately monitor the obligation of funds for the B-1 bomber and Short Range Attack Missiles (SRAMS).

As you know, under the terms of the Impoundment Control Act of 1974 the forty-five day waiting period authorized by such Act expired on October 6, 1977. Consequently, the President is now obligated by law to resume the expenditure of funds for this vital defense program.

Sincerely,

JAKE GARN,
U.S. Senator.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C. October 12, 1977.

In reply refer to: B-115398.

Hon. JAKE GARN,
U.S. Senate.

DEAR SENATOR GARN: This is in reply to your telegram of October 7, 1977, in which you asked that we monitor the executive branch's actions and inform you of major developments in the B-1 bomber program. We have been in contact with officials of the Department of Defense (DOD) and representatives of Rockwell International (Rockwell) one of the prime contractors for the B-1 program.

As you know, the Congress did not approve the President's proposal to rescind $462 million in budget authority that was determined to be excess to DOD's needs as a result of the decision to terminate the program. Consequently, this budget authority was required to be made available for obligation on October 5, 1977, by the Impoundment Control Act of 1974, title X of Public Law 93-344, July 12, 1974—the expiration of the 45-day period prescribed for the consideration of rescission proposals under the Act. We have confirmed that the $462 million rejected for rescission was made available by the Office of Management and Budget for obligation on October 5, 1977. We have also determined that the Secretary of Defense has taken steps to utilize this budget authority in the B-1 program. On October 4, 1977, the Secretary, DOD, requested the Department of the Air Force to submit a restructured B-1 program description that includes proceeding with the production of the fiscal year 1977 B-1 bombers. Pursuant to the Secretary's memorandum, the Department of the Air Force transmitted telegrams on October 4, 1977, to concerned departmental activities in order to obtain the material requested by the Secretary.

DISCUSSIONS WITH DOD

On October 6 and 11, 1977, members of this Office met with representatives of the U.S. Air Force in the Office of the Deputy Chief of Staff, Research and Development, Aircraft Division, who informed us that all of the budget authority that was appropriated for the B-1 program has been made available to the Air Force. This amount, $462 million that was proposed, but rejected for rescission and approximately an additional $698 million that was to be used for prior program expenditures and anticipated termination costs.

The DOD officials told us that, because of the earlier termination of the program, about $100 million would be lost as a result of terminating and then having to restart the B-1 program due to Congress' rejection of the rescission proposal. This sum is comprised of approximately $25 million in costs associated with personnel reductions and the later rehiring of such personnel and about $75 million for terminating future B-1 bomber production contracts.

We were told that the cost per aircraft will now probably increase due to having stopped the program. The exact amount of any increase, of course, will have to be the subject of negotiations between the Government and the prime contractors. In this regard, DOD told us that the Department cannot, at this time, afford to build the seventh B-1 aircraft and that termination costs for cancelling this aspect of the program will be roughly $25 million.

The departmental officials told us that if the decision was made to build all of the next three aircraft originally contracted for (numbers, five, six, and seven) that the total cost for the program would increase from about $1.16 billion to approximately $1.4 billion—an increase of $240 million.

Insofar as restarting the program is concerned, we were told that a delay can be expected in the delivery of aircrafts five and six. Aircraft five was originally scheduled for delivery in August of 1979. Even assuming contract activities can resume promptly, DOD does not expect the fifth B-1 bomber can be delivered before February 1980. And, aircraft six, originally scheduled for delivery in November 1979, is not expected to be delivered before July or August 1980.

Rockwell sent an unsolicited proposal to the Department of Defense on October 6, 1977, for the construction of bombers five and six. While the specifics of any future contract with the prime contractor are a matter of negotiation, DOD representatives told us that it is possible that some work may have to be done elsewhere if DOD and the prime contractor cannot reassemble the same team that was gathered for work under the original contracts.

We were also told that the U.S. Air Force Aeronautical Systems Division was planning on submitting to its higher command at Andrews Air Force Base, the Air Force Systems Command, its tentative plan for the B-1 bomber program on October 7, 1977, and that the final plan was contemplated for submission on October 17, 1977. At present, the Air Force estimates that it could, with the proper authorizations from higher headquarters, get Rockwell back into active program activities within 24 hours. In turn, DOD estimates that it would take Rockwell approximately 60 days to begin actual production work. This delay is due to the fact that over 8,000 people were laid off as a result of the termination of the B-1 program, and numerous subcontracts terminated.

DISCUSSIONS WITH ROCKWELL

Representatives of Rockwell agreed with DOD that delivery on aircrafts five and six would be delayed and costs increased as a result of having terminated the original contracts. Rockwell told us on October 7 and 11, 1977, that aircraft five could be delivered in March 1980 and aircraft six in September of that year. If constructed, B-1 bomber seven could be delivered in March 1981.

In discussing contract costs, in what the company described as "comparable environments," Rockwell said aircrafts five, six, and seven were originally estimated at a cost of $650-700 million. In light of recent events, Rockwell says it could cost the Government up to $680 million to build only aircrafts five and six. If the Government chose to build aircraft seven additional costs would be about $150 million. In summary, Rockwell says the additional costs to the Government to build all three bombers, in light of having stopped and then restarting production, is expected to range between $130-180 million.

Rockwell said its unsolicited proposal of October 6, 1977, to build aircrafts five and six at a not-to-exceed cost of $680 million is good only until November 1, 1977. Company representatives estimate that costs are expected to increase between $5-10 million for every month of delay. Rockwell projects that it would take about 6 months to finalize any contract with DOD for B-1 bomber production and that it would take about 90 days to get the subcontractors back on the job. (There are said to be 53 major subcontractors

involved.) During the 6-month period estimated for contract finalization, Rockwell said it would undertake its B–1 operations pursuant to the bilateral agreement proposed on October 6, 1977.

Finally, Rockwell told us that it believed it would cost the Government about $50 million in termination costs to discontinue production work on aircraft seven. When compared with a company-estimated cost of about $150 million to build the seventh B–1 bomber, this means that Rockwell projects an additional outlay of $100 million beyond already expected Rockwell costs would be needed for the Government to acquire the seventh aircraft.

We hope the foregoing will be of assistance to you. We will continue to monitor further actions by the executive branch and will notify you of further developments, as appropriate.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

U.S. SENATE,
Washington, D.C., December 22, 1978.

Hon. ELMER STAATS,
Comptroller General of the United States, Government Accounting Office, Washington, D.C.

DEAR MR. STAATS: As you know, the Congress has not completed action on the Supplemental Appropriations bill for 1978, and it is unknown when final action on this bill will be completed. As I have previously stated, this delay in Congressional action on the FY 78 Supplemental is being used by the Department of Defense as justification for failure to fully obligate the previously appropriated funds for the B–1 bomber. Under the provisions of the Impoundment Control Act of 1974, title X of Public Law 93–344, the $462 million in budget authority for B–1 bomber aircraft was required to be made available for obligation on October 5, 1977, the expiration of the forty-five day waiting period provided for in such Act.

Although the press has reported various expenditures of the monies impounded, including $1.8 million as noted by the Washington Post on December 18, 1977, it is understanding that this obligation is not a part of the $462 million.

In an obvious attempt to circumvent the express mandate of the Impoundment Control Act, the Department of Defense has not acted in a way to preserve the integrity of the budget process. Despite the recommendation of the House Appropriations Committee that no Congressional action be taken to rescind the funds previously appropriated for B–1, the action by the full House in rejecting a motion to recede to and concur with the Senate amendment which added language to rescind these funds, and a subsequent motion for the House to insist on its position that was passed by a voice vote, the Department of Defense has violated the spirit and intent of the Budget Act by failing to fully expend all funds previously withheld during such forty-five day period. Accordingly, I have some specific questions that warrant your immediate attention:

1. Pursuant to the express authority of Section 1016 of the Budget Act, do you intend to bring civil action in the U.S. District Court for the District of Columbia against the Department of Defense in order to require the Department to fully obligate the $462 million in budget authority at a monthly rate commensurate with the full and annual obligation that had sought to be rescinded and was subsequently rejected by the Congress?

2. In accordance with Section 1016, do you intend to file on or before January 19, 1978 an explanatory statement with the Congress as to circumstances regarding this contemplated civil action.

3. If you do not plan to notify the Congress on or before January 19, 1978 that you plan to file a legal action, please provide full detail and specific reasons as to why you feel that you should not pursue such action as provided for by Section 1016.

As I believe these questions to be crucially important to the Congress, I would urge your full report by January 3, 1978.

Sincerely,

JAKE GARN.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., December 27, 1977.

In reply refer to: B–115398.

Hon. HAROLD BROWN,
Secretary of Defense.

DEAR MR. SECRETARY: Pursuant to my responsibilities to monitor executive branch compliance with the Impoundment Control Act of 1974, members of this Office have discussed informally with representatives of the Department of Defense (DOD) the status and progress of DOD's efforts to restart production activities in connection with the B–1 bomber program. Briefly, our understanding of what DOD has done to date is as follows.

When the Congress failed to act favorably on the President's request to rescind $462 million in budget authority determined to be excess to DOD's needs as a result of his decision to terminate production of the B–1 bomber, the funds were made available for obligation and the Department began taking steps to utilize the budget authority. Initially, DOD embarked on determining those actions needed to restart B–1 bomber production. To fund these "restart planning" activities, DOD released for expenditure $88,000 in the month of October and $100,000 in the month of November. The $188,000 was obtained from the $462 million proposed, but rejected, for rescission.

DOD planned to increase the rate of obligation on the B–1 program after November 1977. The Department of the Air Force considered spending about $2 million a month for the period December 1977 through February 1978. Pursuant to this plan it released $2 million for proposal formulation activities during the month of December. The total of $6 million over the 3 month period would be used to complete formulation of a formal proposal to begin B–1 production activities. Representatives of DOD told us that they estimated it would take about 3 more months to complete a definitized contract for B–1 bomber production after the proposal was completed.

We discussed these plans with representatives of Rockwell International (Rockwell), one of the prime contractors for the B–1 program. Rockwell told us that it could begin production activities soon after receipt of authority from DOD to do so. The corporation's representatives informally advised us that it could have actual production activities restarted within 30 days of receipt of such authority and have full-scale production underway within 60 days.

Since the amount of funds presently being made available for the B–1 bomber is substantially less than the amount made available prior to the proposed termination of the program, it would appear to us that there is an impoundment in an amount as great as $459.8 million ($462 million minus about $5.2 million obligated since October 1977). Accordingly, we wish your response to the following question:

If our understanding is correct, do you intend to use the funds without further delay, or do you plan to submit a deferral to the Congress pursuant to the Impoundment Control Act of 1974?

If you should conclude the present circumstances warrant a deferral of budget authority, we believe you should consider our letter of October 14, 1977, to Representative John J. LaFalce, copy encolsed. We stressed in that letter our need to consider on a case-by-case basis the permissibility of proposing the deferrals of expanding funds previously proposed, but rejected, for rescission. Accordingly, if you conclude the present circumstances warrant a "deferral of budget authority" as that phrase is used in the Impoundment Control Act, please provide us with a full statement of the facts and circumstances you believe justifies application in this case of section 1013 of the Impoundment Control Act to a second impoundment of funds previously rejected for rescission.

A response to this letter at your earliest convenience will be appreciated.

Sincerely yours,

R. F. KELLER,
Acting Comptroller General of the United States.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., January 5, 1978.

In reply refer to: B–115398.

Hon. E. J. GARN,
U.S. Senate.

DEAR SENATOR GARN: This is in response to your letter of December 22, 1977, concerning the B–1 bomber program and the responsibilities of the Comptroller General under the Impoundment Control Act of 1974.

We have been monitoring the status and progress of Department of Defense efforts to restart production activities. In order to obtain sufficient information to enable us to decide what action would be appropriate, we sent a letter to Secretary of Defense Brown on December 27, 1977, requesting a clear statement of DOD's intention with respect to this matter. In addition to the request for factual clarification and confirmation, we inquired as to whether DOD planned to submit a deferral message in the event that DOD does not intend to use the funds without delay. We also referred Secretary Brown to our letter of October 4, 1977, to Representative John J. LaFalce, in which we stressed our need to consider on a case-by-case basis the permissibility of proposing a deferral of funds previously proposed for rescission, but rejected. Accordingly, we asked Secretary Brown, in the event that DOD concludes that present circumstances warrant a deferral, to address the question of the applicability of section 1013 of the Impoundment Control Act of 1974 to funds previously rejected for rescission. A copy of the letters to Secretary Brown and Representative LaFalce are enclosed for your information.

It should be noted that deferrals proposed in a special message transmitted by the President or deferrals reported to the Congress by the Comptroller General may be disapproved by an impoundment resolution passed by either House of Congress.

The Act expressly empowers the Comptroller General to bring civil action to enforce the Act's requirements. However, no civil action may be brought until the expiration of 25 calendar days of continuous session following the date on which the Comptroller General files with the Congress an explanatory statement of the circumstances giving rise to the contemplated action. Accordingly, even if such an explanatory statement were filed immediately, the 25-day period would not commence until the Congress reconvenes on January 19, 1978.

In light of the time constraints, we intend to thoroughly consider the circumstances of this case prior to determination of the most appropriate course of action consistent with my responsibilities under the Act. We appreciate your interest in this matter and will advise you promptly of DOD's response and whatever determination is made based

upon that response and the most current information available to us.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

COMPTROLLER GENERAL OF THE UNITED STATES,
Washington, D.C., October 14, 1977.

In reply refer to: B–115398.

Hon. JOHN J. LAFALCE,
House of Representatives.

DEAR MR. LAFALCE: This is in further response to your letter of September 30, 1977, in which you asked several questions concerning the Impoundment Control Act of 1974 and the proposed rescissions of budget authority that were transmitted to the Congress in connection with the executive branch's termination of the B–1 Bomber and Minuteman III Intercontinental Ballistic Missile programs. You stated that these questions have arisen in light of the recent action by the House Committee on Appropriations rejecting the rescission requests. Your questions and our answers thereto follow.

"In your opinion, does the Budget Act [Impoundment Control Act of 1974] permit the Executive to submit a second rescission proposal concerning the same funds? If such a second rescission proposal may be submitted, may the Executive use the pendency of the second rescission proposal to justify continued refusal to resume expenditure of the funds after the 45 day period for the first proposal has expired?"

The answer to the first part of this question is yes. There is nothing either expressly or by implication in the Impoundment Control Act of 1974 (Act), title X of Pub. L. No. 93–344, July 12, 1974, that precludes the President from submitting multiple requests to rescind budget authority. There would, however, be a distinction between the first recission proposal and any later requests to rescind the same budget authority.

A rescission proposal under section 1012 of the Act is a special kind of legislative request. Not only does such a proposal ask the Congress to take action to rescind a part or all of a prior appropriaiton act or other statute providing budget authority, but we have held that the proposal also carries with it the authority to withhold the budget authority in question during the pendency of the rescission request—by law, 45 days of continuous congressional session.

While the Act does not preclude multiple rescission requests, it would be totally inconsistent with the purposes of the statute to construe the Act as allowing the President to submit a second (or more) rescission proposal under the Act and to withhold the budget authority for yet another 45-day period. Taken to the extreme, such an approach would permit the executive branch to withhold indefinitely release of impounded funds that were the subject of previously unsuccessful rescission proposals. Similarly, there would never come into play the requirement of section 1012(b) of the Act for the budget authority to be made available for obligation or the Comptroller General's authority under section 1016 of the Act to initiate civil litigation to compel such releases. Clearly, the Act cannot be interpreted to operate in a way that effectively negates the procedures and safeguards that were established by its enactment.

Thus, in our view, once the 45-day period expires without favorable congressional action having been taken on a rescission proposal submitted under the Act, the impounded budget authority must be made available for obligation. This is not to say, however, that the executive branch is forever barred from renewing a rescission request. It obviously is free to do so, but the second request would only be a normal legislative proposal to rescind funds and is not one governed by the Act. In such a case, the 45-day withholding authority would not apply. In sum, we think the President can submit multiple requests for rescission but that, after a rescission proposal governed by the Impoundment Control Act is not acted upon favorably, the funds must be made available for obligation during the pendency of the later rescission proposals. The answer to the second part of the question, therefore, is no.

"After the expiration of the 45-day period on a rescission proposal, could the Executive submit a second rescission proposal and, at the same time, submit a deferral proposal under Section 1013 of the Budget Act [Impoundment Control Act of 1974], seeking to defer continued expenditure of the funds pending a Congressional decision on the second rescission proposal?"

In our answer to the first question we said the executive branch was free to propose rescissions outside the authority of the Impoundment Control Act after a rescission proposal for the same budget authority was rejected by the Congress pursuant to the Act. In our answer to your second question we shall assume the second rescission proposal is one submitted outside the Act, but the deferral is one submitted pursuant to the Act.

In our recent report to the Congress, "Review of the Impoundment Control Act of 1974 After 2 Years," OGC–77–20, June 3, 1977, we recommended that the Act be amended to expressly—

"[allow pursuant to the Act] for deferrals of funds after prior deferrals or rescissions of the money are turned down, *if* the new deferral furthers good administrative practice or is based on circumstances or conditions unknown—and which reasonably could not have been known—when the prior rescission or deferral was considered."

In the absence of a specific factual setting in which to address the issue raised by this question, and in the absence of the amendatory language we proposed, we can only provide you with our general reaction.

It is possible that, after the pendency of a rejected proposal to rescind budget authority, there could occur unusual events after the time the rescission was first proposed to the Congress; the new situation warranting approval of the rescission. Thus, it might develop that the Congress would favorably and expeditiously take action on a resubmitted rescission proposal for the same funds. In such unusual circumstances, we think it would be prudent for the President to delay implementation of the program while the latter rescission request is under consideration. Accordingly, we think that under unusual circumstances a deferral could be proposed under the Act while the Congress considered a second proposal to rescind budget authority previously rejected for rescission. However, we stress that determinations concerning the appropriateness of proposing deferrals while later rescission requests are pending can only be made on a case-by-case basis and we would hope that the executive branch would work closely with the Congress and this Office to resolve and deal with such situations.

"Could the Executive submit a deferral proposal seeking to defer continued expenditure of funds for which a rescission proposal had previously been submitted and rejected, with such deferral to apply during the pendency of other Congressional action that would have the effect of deleting the funds in question?"

Again, we can hypothesize circumstances in which the Congress could or would take action to approve a rescission request outside the procedures of the Act—for example, including language in a supplemental appropriation Act rescinding the funds that were rejected for rescission under the Act's procedures. However, whether such circumstances exist or the extent to which they justify proposing a deferral during the pendency of such congressional action is a determination that can only be made on a case-by-case basis.

"In the event your opinion is that the Executive may not take the actions contemplated in the preceding questions, are you prepared to institute civil proceedings under Section 1016 of the Budget Act immediately upon the expiration of the 45 day period relating to the first proposed rescission if the Executive has not taken steps to resume spending?"

Should the executive branch not comply with what we consider to be its responsibility to make budget authority available for obligation, we would take such actions as are necessary to compel the release of the illegally impounded funds, including the initiation of civil litigation under the Act.

For the present, we intend to monitor closely future actions by the executive branch in connection with the B–1 Bomber and Minuteman III programs as you have requested. We will report to you, as appropriate, major developments and findings.

We hope the foregoing will be of assistance to you.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

DEPARTMENT OF THE AIR FORCE,
Washington, January 27, 1978.

Mr. DAVE FITZGERALD,
Office of the Honorable Jake Garn, United States Senate.

DEAR MR. FITZGERALD: The following are responses to questions you asked regarding the FY 77 B–1 appropriation.

Question—What funds have been authorized for FY 1977 restart activities since October 9, 1977?

Answer—In October and November, a total of $188,000 was authorized for expenditure by our B–1 contractors for FY 1977 production program restart planning. In December 1977, the Air Force authorized $2.0 million to continue the restart planning as well as to begin the preparation of definitive contractor proposals to restart aircraft 5 and 6. These proposals will include detailed pricing information from contractors, subcontractors and vendors.

For the month of January 1978, the Air Force released $3.5 million for the contractors to continue preparation of proposals for production of aircraft 5 and 6 and for restart planning. An additional $4 to $5 million would be required in February for these same tasks.

Question—Has any of this activity reduced the $462 million available for de-appropriation?

Answer—The $462 million proposed for rescission last July was our best estimate of the amount that would be available after all termination actions were completed. The exact amount will not be known for several years after Congress de-appropriates the funds—it will take that long to complete all termination actions. Theoretically, the amount available for de-appropriation should be reduced since funds are now being used for restart activities on aircraft 5 and 6; however, the $5.688 million is considered to be within the estimating error in determining the funds required ($698M) to complete termination actions on the B–1 program. Therefore, the $5.688 million can be accommodated within the $698M and we do not consider it necessary to reduce the amount available for de-appropriation at this time.

We are pleased to be of assistance in providing this information. If we may be of further service, please do not hesitate to contact us.

Sincerely,

CHARLES C. BLANTON,
Major General, USAF,
Director, Legislative Liaison.

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, D.C., January 23, 1978.

Hon. ELMER STAATS,
Comptroller General of the United States, Government Accounting Office, Washington, D.C.

DEAR MR. STAATS: This is in reference to your letter of January 5, 1978 concerning the B–1 bomber and your responsibilities under Title X of the Impoundment Control Act of 1974, (Public Law 93–344).

I appreciate your contacting Secretary of Defense Brown regarding DOD's intentions in restarting production activities, and I am encouraged to know that you have been monitoring the status and progress of these efforts. However, my letter of December 22, 1977 was addressed to the express authority conferred on you under Section 1016 of the Budget Act and your intentions to bring civil action in the U.S. District Court against the Department of Defense in order to require the Department to obligate fully the $462 million in budget authority which the President unsuccessfully sought to rescind.

It appears to me that you have had more than an adequate period of time to fully examine and evaluate the legality of the Defense Department's actions under said Act and, accordingly, should have been able to make a clear determination by this date as to the most appropriate course of action consistent with your responsibilities under Section 1016 of the Budget Act and with the intent of Congress in enacting such section.

Now that Congress has reconvened, I request that you immediately supply me with a substantive and detailed response regarding what action, if any, you propose to take in this matter and how soon.

In the event that there is a further delay by the Department of Defense prior to the full obligation of these funds or the submission of a deferral request to the Congress, how many days will you allow prior to notifying the Congress of your intent to initiate legal action under Section 1016 of the Budget Act? If your response is evasive or uncertain, you will leave me no alternative but to explore other options, including legal action and legislation.

I would appreciate your full report by January 31, 1978.

Sincerely,

JAKE GARN.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., January 31, 1978.

In reply to: B–115398.

Hon. JAKE GARN,
U.S. Senate.

DEAR SENATOR GARN: Pursuant to our responsibilities under the Impoundment Control Act of 1974, we have been closely monitoring Department of Defense (DOD) efforts to restart production activities in the B–1 bomber program. The purpose of this letter is to inform you of our latest findings and conclusions with respect to the program.

On December 27, 1977, we sent a letter to the Secretary of Defense requesting a statement of DOD's progress and plans concerning B–1 bomber production activities. By letter dated January 18, 1978, copy enclosed, we received the DOD reply. Based upon the information we have obtained from DOD and our independent review of the situation, the pertinent facts may be summarized as follows.

When the Congress failed to act favorably on the President's request to rescind $462 million in budget authority determined to be excess to DOD needs as a result of the decision to terminate production of the B–1 bomber, the funds were made available for obligation and DOD began taking steps to utilize the budget authority. Initially, DOD embarked on determining those actions needed to restart B–1 bomber production. To fund these "restart planning" activities, DOD released for expenditure $88,000 in the month of October and $100,000 in the month of November. The $188,000 was obtained from the $462 million proposed, but rejected, for rescission.

The Department of the Air Force released $2 million during December for formulation of a formal proposal to begin B–1 production activities. And, for January 1978, the Department of the Air Force obligated $3.5 million for the program. DOD plans to further increase the amount of funding for proposal formulation for the month of February. The Department of Defense estimates that it will take about 3 months after the formulation of the proposal in order to definitize a contract for B–1 production.

Incident to the Department's proposal formulation efforts, we understand that the contractor has provided firm commitments to the Air Force confirming its estimate of the cost to complete aircraft five and six. As of January 18, 1978, the Secretary stated that there was about a $200 million difference between the contractor's estimate and the Government's estimate of the cost to complete two aircraft and uncertainty regarding the specifics of the aircraft program. We discussed these points with representatives of Rockwell. Rockwell agrees that there do remain for resolution several matters affecting the price and specifications of future B–1 bombers. Rockwell states that its firm commitments are lower than comparable estimates of DOD and that a significant portion of the difference in the cost estimates is attributable to a disagreement over whether certain costs should be considered production costs (and, therefore, included in the contract to build additional B–1 bombers) or research and development costs to be included in the existing research and development contracts. The contractor's officials also stated that one item to be clarified concerns the technical requirements for future B–1 bombers with regard to Cruise Missile carriage. Rockwell anticipates that such requirements would be defined by means of routine engineering change proposal activity under the existing development contract. In view of the above, the Department intends to determine the accuracy of the contractor's estimate prior to reaching an agreement regarding a ceiling on the contract price and resolve the matters relating to the specifications of the B–1. Until the parties agree upon a ceiling price and finalize the contract, actual production activities will not resume.

In view of these developments and the absence of a definitized contract containing the costs and exact specifications of future B–1 bombers, DOD states that it would be imprudent to obligate funds at a faster rate than the Department has done thus far.

Section 1012(b) of the Impoundment Control Act provides that budget authority proposed to be rescinded shall be made available for obligation in the event the proposed rescission is not approved by the Congress. In our view section 1012(b) requires the executive branch to exert reasonable efforts to utilize the budget authority, taking into consideration sound financial practices.

Our review of the DOD activities does not reveal any actions that are inconsistent with the Act's requirements. In view of the facts presently available to us, we believe that DOD has acted reasonably in its efforts to resume production activities and to utilize the budget authority. Thus we conclude that there does not exist an impoundment of budget authority in violation of the Act's requirements.

We intend to continue to monitor DOD's efforts with respect to the B–1 bomber program. We appreciate your interest in this matter and will inform you of further developments and findings, as appropriate.

Copies of this letter are being provided to those Members of Congress who have expressed interest in this matter.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

THE SECRETARY OF DEFENSE,
Washington, D.C., January 18, 1978.

Hon. ELMER B. STAATS,
Comptroller General of the United States, Washington, D.C.

DEAR MR. STAATS: This letter is in reply to Mr. Keller's letter of December 27, 1977, concerning the status of this Department's effort to restart production of the B–1 bomber program. Taking all relevant circumstances into account, we do not believe that our present plans and current rate of obligations constitute an impoundment or require the submission of a deferral to the Congress pursuant to the Impoundment Control Act of 1974.

Your understanding of the amounts actually obligated through the end of December 1977 is essentially correct. However, for January the Air Force obligated $3.5 million for the program, and we anticipate that a greater amount will be obligated for the month of February, although the amount planned for February has not yet been finally determined.

We do not believe it is appropriate to compare the current rate of obligations with the rate of obligations prior to contract termination to determine whether there is an impoundment. Prior to contract termination funds were obligated against definitive contracts with contract requirements and price clearly delineated. Such is not now the case. If the contractors were directed to proceed at this time, there would be no clear indication of what the Government was buying, whether or not the Government could afford what it was buying, or of what the prices would be. Proceeding without a definitive contract at this time would be particularly undesirable because there is about a $2 million difference between the contractor's estimate and the Government's estimate of the cost to complete two aircraft, and considerable uncertainty as to the exact configuration of the aircraft to be manufactured.

Early in March we expect to receive from all three prime contractors full price proposals including cost and pricing data from subcontractors and vendors. Such information is not currently available. Until that time we believe it would be imprudent to obligate funds at a faster rate than indicated above.

We are of course mindful of the pending Supplemental Appropriation Act, and the provision under congressional consideration which would deappropriate the $462 million FY 1977 B–1 funds. Therefore, if it were otherwise prudent and appropriate to obligate funds at this time at substantially higher rates—which is not the case—then we believe a deferral under the Impoundment Control Act of 1974 would be warranted.

Sincerely,

HAROLD BROWN.

Mr. GARN. Yes, they peddle out $188,000 in October and the other figures are there, technically complying with the law. But as far as complying with the spirit and the intent of that law this administration has totally ignored it.

Mr. CULVER. Mr. President, will the Senator yield?

Mr. GARN. Not at this point. I did not interrupt the Senator from Iowa once but would have loved to have several times.

Mr. CULVER. The Senator just made a personal reference to me. We usually yield under those circumstances.

Mr. GARN. I would be happy to yield if the Senator plans not to talk for more than 20 minutes.

Mr. CULVER. I will settle for even 19.

I thank the Senator for yielding. I just had a letter on this impoundment issue that was delivered today, dated January 31, and it is from the Comptroller General of the United States, on this very point the Senator raises about the Presidential responsibilities under the Impoundment Act.

Mr. GARN. I assume it is a copy of the letter he wrote to me and said it would go to other Senators and was just included in the RECORD.

Mr. CULVER. I thought in fairness we should perhaps just read the one paragraph in that letter.

"Our review"—meaning the General Accounting Office.

Our review of the DOD activities does not reveal any actions that are inconsistent with the Act's requirements. In view of the facts presently available to us, we believe that DOD has acted reasonably in its efforts to resume production activities and to utilize the budget authority. Thus we conclude that there does not exist an impoundment of budget authority in violation of the Act's requirements.

Elmer Staats, Comptroller General.

I thank the Senator for yielding.

Mr. GARN. I just put that in the RECORD and the whole series of correspondence with similar answers, but I submit to anyone who wants to examine what would have been spent if the production had continued and these dribbling little amounts that are also in there, $188,000 here and there, are deliberate subversions.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. GARN. No. I wish to finish, I say to the Senator, if I may.

They are deliberate subversions of that law for one purpose. Let us spend as little money as possible so we really cannot be nailed with a civil suit from the Comptroller General of the United States, which is also provided for in the law, and in the meantime we hope Congress will agree with us. That is the game that is going on.

Now, let us be realistic about it. I am sure that technically this administration has complied with the law.

But from all we have heard from this administration, I would expect more than just a technical compliance, and I will go one step further with regard to talking about wasting taxpayers' money. I think there should be an amendment to this law that would say that when a recission order on any program—I do not care what it is—is sent up, a President does not have authority to issue stop work orders until he has gotten concurrence from Congress. We are only talking about 45 days. The example of Minuteman III was the same thing. They fiddled around a little bit at a time and finally the President did comply with this provision I am talking about and restarted the production line on Minuteman III.

Do Senators know what that delay cost? $58 million. There was only $120 million left and so we wasted $58 million in startup costs in that particular program. If the law had been amended or originally written that a President could not do that, we would have saved $58 million in that program. If Congress had agreed, the cost of continuing production for 45 days would be far less than restarting the whole process. We have exactly the same situation on the B–1. I see no difference whatsoever except the administration finally came around and complied with the law not only legalistically, but also in spirit, and reopened that production line. On the B–1 question, they have not.

To me that is very clear. So I do not argue with Elmer Staats, and I would not have put it in the RECORD if I had argued with the technical compliance with the law. But there is certainly a deliberate delay in restarting that production line hoping that the House of Representatives and the Senate would deappropriate. I do not know how Senators can come to any other conclusion than that.

The PRESIDING OFFICER. The Senator's 15 minutes have expired.

Mr. GARN. May I have 5 additional minutes?

Mr. YOUNG. I yield 5 additional minutes.

Mr. GARN. Nevertheless, I think the major argument here, if I can leave my very strong conviction, is that the B–1 is important as part of an overall strategic decision. If these other decisions had not been made such as delaying the MX, the problems with Trident, the unknowns in SALT—what we are going to give away to the Soviets—and the whole strategic picture, I would not be so riled up about a couple B–1's. I would not even be so concerned about the total ongoing production of B–1's. But we as a Congress and this administration had better start looking down the road at the mid-1980's. I am not going to take the Senate's time at this point to go into the differences between Soviet and U.S. strength, but they are staggering and the message needs to be gotten to the American people as to how rapidly we are falling behind.

My distinguished colleague several times has quoted the Air Force on the structural integrity of a B–52. He made the same statement and I give the same answer. Yes, it is structurally sound beyond 1990. So are DC–3s. I saw all kinds of them in Panama. They are still flying. And so is the T–6 and other old airplanes I have flown. They still fly, but mission accomplishment? And there is a further statement—I am sorry, I do not have it before me—after the Air Force says that, the next sentence goes on and questions the mission capability of a B–52. But certainly as to the structural soundness, I am willing to bet you can still fly them in the year 2020.

Mr. CULVER. Mr. President, will the Senator yield?

Mr. GARN. I yield on the Senator's time.

Mr. CULVER. The best witness on this subject, I would think, would be the Commander in Chief of the Strategic Air Command, Gen. Richard Ellis, who testified before our Research and Development Subcommittee of the Armed Services Committee last August. And I quote, "So our opinion, based on the best evidence available, is that properly cared for and properly deployed, our FB–111 and our latest B–52s can continue to be effective penetrators until 1987"—that means carry out the mission—and probably to 1990 or even beyond.

End of quote from the head of the U.S. Strategic Air Command.

I thank the Senator for yielding.

Mr. GARN. I wonder if sometime the distinguished Senator from Iowa would like to go for a ride with me in a B–52 at 200 feet just below supersonic speed.

Mr. CULVER. Will the Senator assure me he will not be the pilot?

Mr. GARN. I am talking about me flying it.

Mr. CULVER. The Senator is talking about him flying it?

Mr. GARN. Yes.

Mr. CULVER. The Senator does not mind if I give more consideration to that invitation?

Mr. GARN. I will give him time to consider. I would like him to see what it feels like at 200 feet in a B–52 and see whether he wants to try to penetrate the Soviet Union in that kind of airplane.

As long as we are talking about that, just one comparison. The B–52 fleet, whether it is good, bad, or indifferent, would have cost about $19 billion to modernize it, put all the gear on it, the new engines, restructuring the wings, that kind of thing. I do not think that is a very cost effective bargain. We would still have a very old B–52, 244 B–1s would have cost $26 to $27 billion. Yes, a lot of money, but you have a new bomber.

On a cost-effective basis I think you will find that most people will decide that you need a penetrating manned bomber, and the B–1, regardless of individual cost, is the most cost-effective. I continue to extend my offer to some future day, awaiting the Senator's answer of whether he would like to go for a ride with me.

Mr. President, I am deeply concerned because today this country is crossing the threshold of the last quarter of the 20th century in a mood of apprehension and confusion relative to the effectiveness and survivability of our strategic Triad, our overall strategic posture, and the undiminished Soviet threat.

Winston Churchill was among the first to see the escalating danger of the U.S.S.R. even before the fall of Adolf Hitler, although his allies, including President Roosevelt, did not agree.

At the conclusion of the Second World War and through the late 1960's, the United States had a clear superiority in force posture. It was a result of that clear superiority that we were able to force the Soviets to back down in Cuba. Since that showdown, the Soviets have doubled and even tripled their efforts in order to preclude a recurrence of the Cuban fiasco.

Probably no area reflects the breadth and width of their efforts more persuasively than those elements that constitute their strategic forces. To quote a

recent study, the advantage the United States held over the Soviets in 1962 will soon be reversed:

By 1978, the Soviet Union may have gained a war-winning capability comparable to that which the United States held in 1962 during the Cuban missile crisis.

The cold war has heated up, Mr. President, and many of us have not even recognized it. Since 1969 we have gradually lost our strategic superiority and may have slipped in a dangerous position of strategic inferiority. Unless we rectify this serious imbalance, we can expect to see the Soviets become more adventuresome in the future.

Today the Soviet Union continues to accelerate the cold war behind the veil of détente.

As we continue to restrain ourselves concerning the future of our new strategic programs, including the B–1, Minuteman, MX, and the recent proposals the President has outlined in SALT II, I am deeply troubled. The Soviets today outnumber us in every major weapon system and their current force levels far exceed reasonable expectation of deterrence requirements.

Whether we like it or not, the SALT talks in Geneva today between the United States and the Soviet Union are historic in that they may reflect the overall strategic posture of the world's two superpowers in the next decade and beyond. These talks will continue to be at the focus of worldwide attention. I am concerned about the evolution of our overall security in the face of manifest growth as a direct threat to our physical security posed by Soviet military power.

I believe that the present administration is headed on a course of action that will drastically change our national military strategy, military force posture, and arms development and procurement policy. I am concerned that at a time when we have all been hopeful that we might achieve a responsible and equitable treaty with the Soviets, the President has allowed us to bargain away vitally critical U.S. strategic programs with absolutely no corresponding concessions in return. I am further concerned that the SALT II agreement that may be submitted to Congress for ratification in the near future is lopsided in favor of Moscow and does not provide us with an adequate deterrence that we need now or in the time to come. Moreover, the purpose of these SALT talks is to promote strategic stability, and I am not convinced that our present proposals have a correlation with that objective—they might well contribute to instability.

Equally as alarming was the President's recent action in attempting to rescind the fiscal year 1977 funds for building B–1 test aircraft 5 and 6.

In his continued effort to subvert the law, our Commander in Chief has not acted properly to preserve the integrity of the Budget Act. Although the Congress has expressed its will in this matter by: First, the House Appropriations Committee recommendation that no congressional action be taken to rescind the funds for B–1; second, the action by the full House in rejecting a motion to recede to and concur with the Senate amendment which added language to rescind these funds; and third, a subsequent motion by the House to insist on its position that was passed by a voice vote. President Carter has failed to obligate the B–1 funds previously withheld.

The media has offered the impression that the President has obligated funds for the B–1, but it is my understanding that the moneys have not been expended at a monthly rate commensurate with the full and annual obligation, and that the $462 million in impounded funds remains intact.

Correspondence placed in the RECORD earlier clearly shows, Mr. President, that the Department of Defense has used the delay in congressional action of the fiscal year 1978 supplemental as justification for failure to fully obligate the previously appropriated funds for the B–1 bomber.

Under the provisions of the Impoundment Control Act of 1974, title X of Public Law 93–344, the $462 million in budget authority for B–1 bomber aircraft was required to be obligated on October 5, 1977, the expiration of the 45-day waiting period provided for in the Budget Act.

I have strongly urged the Comptroller General to exercise his authority and responsibilities under the law, but his dilatory methodology and evasive and uncertain language with the membership of this Congress have been totally unsatisfactory and have allowed the spirit and intent of the Budget Act to be openly violated.

I am further concerned over recent administration decisions which, in my judgment, have seriously impaired the strategic deterrent posture of our country. Mr. John W. R. Taylor, editor of "Jane's All the World's Aircraft," also shared this grave concern over the lack of correlation between the administration's stated desire for a strong national defense and a decision that has seriously jeopardized the credibility of the strategic Triad.

Mr. Taylor writes in his preface to the 1977–78 edition:

If our planet is subjected one day to the unimaginable horrors of a third World War, 1977 might be recorded as a year in which the seeds of defeat for the Western powers were sown.

Taylor describes the B–1 bomber as the "mightiest bomber of all time, but so costly that it was rejected deliberately in favor of cruise missiles. "It may seem irrelevant to point out," he says, "that only one military leader has previously put massive faith in such missiles—Adolph Hitler."

An aviation expert, the editor states that "a mutual deterrent policy that works is still the key to coexistence." However, the Soviet Union has "fought uncompromisingly to restrict U.S. deployment of both the B–1 and the cruise missile. Its leaders must be surprised beyond belief that the U.S. President has disposed of the B–1 without asking any Soviet concessions in return." He further cites serious limitations in cruise missile capabilities.

According to Mr. Taylor:

The Air Force never needed to think solely in terms of an optimum force of 244 B–1 bombers (but) . . . even 100 B–1's would have compelled the Soviet Union to expend huge sums of money and immense effort on developing, producing and maintaining defenses against air attack.

Mr. Taylor, in his continued concern over the maintenance of peace throughout the world, has submitted another statement on the future necessity of the B–1 bomber program. He says in his statement of January 30, 1978, addressed to Chairman MELVIN PRICE, chairman of the House Armed Services Committee, that—

President Carter's decision to cancel production of the B–1 bomber, and to put increased emphasis on cruise missiles was hailed by some people as a decision in favor of the less costly of two equally effective weapons systems. This is a fallacy.

He stressed that the cruise missile must be launched from a capable aircraft, and that aircraft was intended to be the B–1.

Mr. Taylor writes that our current SALT protocol restricts the range of the ALCM to 2,500 km (1,350 nm), thereby limiting the target envelope and enabling the Soviets to predict where to concentrate their defenses.

Mr. Taylor states that—

The Soviet domestic air defense force is reckoned (by DOD) to have 2,540 piloted interceptor fighters, 12,000 surface-to-air missiles on 10,000 launchers, and 6,500 surveillance radars. The interceptors include MIG–25's (Foxbats), the fastest combat aircraft deployed by any air force in the world. This defense system—battle tested in miniature in Vietnam and the Middle East—would not only have to be approached by the cruise missile launch aircraft, but would have to be penetrated by the missiles themselves.

He further cites U.S. officials as suggesting that ALCM's in their present form fly slowly, lack defensive avionics, cannot take evasive action, and are primarily intended for undefended targets. "Where are such targets in the Soviet Union," asks Taylor?

According to Taylor:

First, the B–52 was designed for high elevation flying and to drop free fall nuclear weapons, but now is more than 20 years old:

In no way can its well-used airframe be expected to go on flying through turbulence at very low altitude (the optimum launch height for a missile attack) for another 20 years.

Second, the FB–111H, 15-foot stretch of the FB–111A, is less aircraft and almost as expensive as the B–1 would have been. It could never be as capable as the B–1 bomber.

Third, the 747/DC–10 conversion carrier with its huge radar cross section "in skies patrolled by Foxbats" would be a pilot's nightmare.

Fourth, the B–1 was designed to penetrate sophisticated enemy defenses, most of the development costs have been obligated, the Soviets would no doubt welcome a bomber like the B–1 into their force in place of their own "formidable TU–26 (Backfire) swingwing bomber, of which there are already more than 100 in its growing force."

Taylor adds that the potential maritime role for B-1 should not be overlooked when considering the size of the Soviet Navy.

Mr. President, perceptions are crucially important, and I am concerned about the clear signal we are sending to Moscow concerning the strength of our Triad—both now and beyond. With the Soviets developing and deploying new weapons at an undiminished rate, the time has come to reconsider the practice of unilateral arms restraint.

Mr. Taylor warns that—

Soviet ICBM development threatens to eliminate 90 percent of the U.S. Minuteman force in any first strike. It may not be long before the locations of every missile-launching submarine are permanently pinpointed. Unless the USAF has an airplane in the class of the B-1 (and it is unique in its class) America may lose the third and last component of its strategic TRIAD. Only the balance of power represented in the West by the TRIAD has kept the world free from the unimaginable horrors of a nuclear war for more than thirty years. Before condemning the B-1 as too costly, it is essential to answer the question "How much is it worth to stay alive?" Only then do we appreciate what might be the utlimate alternative to the B-1.

B-1 AND SOVIET BACKFIRE COMPARED

Mr. President, I would like to compare the Soviet Tupelov-designed Backfire and the U.S. Rockwell B-1. Both aircraft have variable-geometry wings, and DOD officials believe there is only about a 15-percent difference in aircraft size, with the Backfire's length 130 feet and B-1's 150 feet. The Backfire is powered by two modified Kuznetsov NK 144 turbofan engines and the B-1 is powered by four General Electric F101's.

What is the significance of these two bombers? The DOD believes that the Backfire force is now at 90 aircraft with a production rate of 2 bombers per month, but some intelligence officials place the production rate at 4 per month. By the mid 1980's a total of 350 Backfires are expected to be in the long-range aircraft division of the Soviet Air Force and an additional 100 are slated for use by the Soviet Navy. Estimates of the range payload capability of the Backfire provided it with an unrefueled radius of 2,750 miles and the capability to conduct single refuel sorties against the continental United States with recovery in Cuba. The Soviets, nevertheless, maintain the Backfire is a medium bomber and apparently the U.S. position in SALT II is to exclude the Backfire supersonic bomber from the total number ceiling if the Soviets provide some assurance that it would not be used as a strategic weapon.

What we have here are two aircraft programs, Soviet style and U.S. style. The Soviet approach is to first make a decision, that is, to build an aircraft with specified performance requirements, and then to produce it in significant quantity to bolster their defense. But we in the United States need not worry about continued production and deployment of Backfire since the Soviets are going to promise not to use it against us.

I submit, Mr. President, that it is time we stopped trifling with our country's future security and demonstrate to the Soviets that we have the national will to provide the necessary defense. Production of the supersonic B-1 strategic bomber with its capability to deliver ALCM, SRAM, and/or nuclear and conventional munitions would be a significant step in the required direction.

Mr. President, today this body still has the option of keeping a modernized manned penetrating bomber leg of the Triad.

When the President of the United States went on national television last June 30 and annouced that he had unilaterally canceled the B-1 bomber production many of us were shocked. We thought at least he would fulfill his pledge that day to continue the development of the B-1 to provide an option should the alternative systems run into difficulty.

I say to you that we will not have a viable option unless aircraft No. 5 and No. 6 are built. Aircraft No. 4 is in final assembly and will be completed early this summer. Without No. 5 and No. 6 the trained work force and subcontractors will be disbanded and no production option will be maintained.

For many decades we in the Congress have supported the strategic Triad concept. The Congress of the United States has under the Constitution not only the authority but the responsibility to provide for our common defense. Let us remember article 1, section 8, which I partially quote:

The Congress shall have the power to raise and support armies . . . provide and maintain a navy . . . make rules for the government and regulaton of militiary and naval forces . . .

The Committee on Armed Services, in reporting to the Senate in September, 1977, on the FY78 Supplemental defense bill reaffirmed its full support of a future mixed bomber force composed of aircraft used as standoff cruise missile carriers, manned penetrating bombers and in a dual role, both launching cruise missiles and penetrating. (S. Rept. 95-455, p. 2)

Defense Secretary Brown also had reaffirmed the Administration's commitment to the option of a future manned penetrating bomber. In a letter to the Committee the support funds for a prototype development program for the FB-111H, he emphasized such a "proposal deserves careful consideration as a way of keeping open an option for such a system as a penetrating bomber at some later time." (S. Sept. 95-455, p. 8) In a colloquy among Senators Stennis, McIntyre, Cranston and others concerning the Committee Report, all concerned agreed on the importance of maintaining the mixed bomber force concept and the development of a future manned penetrating bomber. (Cong. Rec., Oct. 7, 1977, pp. S16695 ff.)

Over the decades our strategic Triad has successfully provided an umbrella of protection for us and our allies. I think all of us were shocked into a sense of reality and felt a sense of ominous foreboding when we read in the newspapers last December the opinion of John Taylor, editor of "Jane's All The World's Aircraft," which I have quoted earlier.

Mr. President, the issue here today is simply whether the United States will continue the strategic Triad and build a new penetrating manned bomber.

For 14 years we have planned, developed and tested the best strategic penetrating manned bomber in the world. The AMSA study which began in 1964 and led to the B-1 had the full support of the Defense Department and the Air Force until the President on June 30 announced that he had canceled the program. What has caused the situation to change suddenly so that we now no longer need a modern manned penetrating bomber? The President would substitute a commercial jet loaded with cruise missiles and extend the life of the 26-year-old B-52. I personally do not believe that this is a viable option for a strategic bomber.

Further, I understand that the Department of Defense is conducting still another study of strategic bombers which might provide a production option for the strategic penetrating bombers beyond 1985. This study will include the B-1, B-52, and FB111-H. Is the real purpose of this study to delay an overdue decision, and what can the study tell us we do not already know? Is it not a fact that as far as the President is concerned there will never be a new penetrating manned bomber and the decision to cancel the B-1 is the end of the line?

My fellow colleagues, I ask your support today in keeping the B-1 option open and sending a message to the President that we insist on keeping the B-1 as a viable production option for the next 2 years.

I will withhold any other comment at this time.

The PRESIDING OFFICER. Who yields time? Does the Senator from Mississippi yield to the Senator from California?

Mr. STENNIS. Yes, Mr. President, I yield myself 1 minute.

As a matter of procedure here, I know the Senator from California—may I ask did he want to use time on the bill?

Mr. CRANSTON. Yes. I was authorized by Senator YOUNG to yield myself time.

Mr. STENNIS. All right. I had requested the Senator from Maine (Mr. MUSKIE) to come and I told him we would give him some time. He had a hearing going on.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. STENNIS. Mr. President, I yield to the Senator from Maine. How much time does he desire?

Mr. MUSKIE. I think 10 minutes.

Mr. STENNIS. I yield the Senator 10 minutes. I especially thank the Senator from California (Mr. CRANSTON).

Mr. CRANSTON. I thank the Senator.

The PRESIDING OFFICER. The Senator from Maine is recognized for 10 minutes.

Mr. MUSKIE. Mr. President, it is evident from the debate I have listened to for the last 20 to 30 minutes that there are strong feelings on both sides of this issue, even emotional feelings on both sides of this issue, and as one who has demonstrated a capacity for righteous indignation myself in debate on the Senate floor, I can sympathize with those who are righteously indignant, whether they are for the B-1 or against it.

But some statements have been made, as I have listened in the last few minutes,

to which I would like to make some brief comments before I get into my prepared remarks.

Incidentally, I rise to speak as chairman of the Senate Budget Committee. We have concerns, budgetary concerns, about the B–1 which ought to be taken into account, as well as the merits of the weapon system itself.

But the distinguished Senator from Utah, Senator GARN, has spoken of the President's unilateral cancellation of the B–1. Well, what can be unilateral about a decision which is occupying the time of the Senate today, and has many times over the last 2 years, and which has occupied the time of the House? Are we debating a decision on which we have no influence? Is that what the Senator means by a unilateral decision? We are participating in the decision. The President has taken the reponsibility, which is his, of submitting a recommendation. The Senator chooses to refer to that as a unilateral cancellation.

I regard that as an exercise of responsibility on his part as to which we have the final word. Otherwise, I do not know what this debate is all about. I do not understand why the distinguished Senator is venting his indignation on the President. If he truly believes that the Senate has no power to influence the decision which he has described as unilateral, then I can understand why the Senator is venting his indignation, but this is not the case.

It is a unilateral decision; it is a decision on which the President has taken the leadership. Whether it is right or wrong, it is wholly appropriate for us to debate, but it is not a unilateral decision.

Mr. GARN. Will the Senator yield at that point?

Mr. MUSKIE. The Senator would not yield to me earlier, and this was the very point I wanted to talk about.

Mr. GARN. The Senator is misinterpreting my point about unilateral decision, and that is the only reason I wanted to ask the Senator——

Mr. MUSKIE. The Senator can expand on his understanding of that later. I would like my remarks to have some continuity in the same way he wishes his remarks to.

The second point I would make is the Senator vents his indignation against the President as a violator of the Budget and Impoundment Control Act. Well, Mr. President, as to the Budget and Impoundment Control Act, it vests in the Comptroller General of the United States the responsibility for defending the act in behalf of the Congress. It is Mr. Staats, who has this role in the Budget Act, who, in the letter dated January 18, has said there had been no violation of the Budget and Impoundment Control Act with respect to this decision by the President.

Why then does the Senator not vent his indignation against Mr. Staats? The President's insistence that he has not violated the act could be self-serving, I concede that. But it is not his opinion to which Senator GARN referred. It is to the position of Mr. Staats, who is our guardian of the Budget and Impoundment Control Act, who has said there has been no violation.

If, after the Congress should decide to go forward with the B–1 bomber, and the President should choose then not to spend the money, then the Budget and Impoundment Control Act would be triggered. If the President violated the act, I would join the Senator in righteous indignation against such a step because he could implement such a decision on his part only by using the procedures of the Budget and Impoundment Control Act.

So, if Mr. Staats believes there has not yet been a violation of the Budget Act, we either agree with him or we do not. If we do not agree with him, then it is to him that we should address our indignation.

I have heard over and over again on another point, Mr. President, I refer to the argument that Defense somehow has a vested right in a certain percentage of the gross national product; that from now on Defense should have a certain percentage of the gross national product, whatever that may be, 24 percent, 25 percent, 26 percent, and that as GNP goes up, Defense ought to automatically get additional dollars to maintain that percentage, whatever the merits of its proposals to spend the money.

If that is the budget principle we are going to use in setting in place the budget for the Department of Defense, how do we deny it to the other functions of the budget? Why should not any function of the budget come before us and say, "We are entitled to some historic percentage of the GNP," regardless of wherever GNP goes, however high, and whatever new needs and priorities we may have to consider as a rational legislative body?

I simply do not buy that argument. But if the argument prevails, then there is absolutely no need for the Budget Committee, for the CBO, or even for a Senate. We simply pass the final appropriation act in this session, which will hold forever, guaranteeing to every function of the budget its current percentage of GNP, or whatever percentage we, as a group, may decide is right for 1978.

Then, we say, whatever is right for 1978 obviously ought to be the same percentage in 1980, ought to be the same percentage in 1985, ought to be the same percentage in 1990.

I doubt very much that any Senator in this body would agree to any such budgeting principle.

Now, with respect to what has happened to defense spending in the year since the budget process has been in force, I hope to put in figures before I finish showing that there has been real growth in defense spending under the congressional budget process. I found myself defending that growth last year in the conference with the House on the first concurrent resolution, under circumstances in which the House had voted for some $4 billion less for defense than had the Senate. So I do not buy the argument that we have not permitted growth.

That we have not permitted growth as some would like is true, but we have done that same thing with every function of the budget. If we were to permit budget growth for every function of the budget in accordance with the most extreme assessment of what that ought to be, I assure the Senator that last year's budget would have been at least $40 billion more than it was.

So if we permit the growth in defense in response to the strongest views of what our minimal defense requirements are, then I suspect we would be bombarded by similar requests from those who are interested in education and from those who are interested in health—and, you know, when we talk about national health insurance, we are talking about an annual budget cost of $150 billion.

I wish to say again to the Senator what I have tried to say, not always very persuasively, for the last year: That making budget choices is not a matter of weeding out the obviously unworthy requests. Those are pretty much weeded out by the Appropriations Committee, and hopefully the Budget Committee makes some contribution to it.

The really tough budget decisions have to do with choosing between proposals and programs all of which have merit. That is tougher. It is a lot easier when you are talking about health, or veterans, or farmers. I suggest that Senators look at the votes on farm legislation last year.

When you talk about any of them, it would be a lot easier to yield to the demands of the most articulate, most emotional, and most insistent groups without argument; and believe me, almost every function of the budget has such constituencies to make more difficult the task of those who must decide, well, this worthy project can be supported and that one cannot. And that kind of argument can apply to the defense budget just as much as any other function of the budget.

The PRESIDING OFFICER. The Senator's 10 minutes have expired.

Mr. STENNIS. I yield the Senator 5 additional minutes.

Mr. MUSKIE. I have not even gotten to my speech yet. I apologize.

Mr. STENNIS. That is all right.

Mr. MUSKIE. The distinguished Presiding Officer at the moment (Mr. ABOUREZK) understands what I mean when I say that.

Mr. President, to get down to the basic issue before us, supporters of the defunct B–1 bomber are asking the Senate today—and I am talking about the budget—for almost a billion dollars to continue a program for which there is no strategic, budgetary, or commonsense justification.

Mr. President, as chairman of the Budget Committee, I support the position previously taken by the Senate—a position supported by the distinguished Senator from Mississippi (Mr. STENNIS) and the distinguished Senator from Iowa (Mr. CULVER)—in agreeing to the rescission of the B–1 production program.

Let us be clear about what the issue before us really is. Backers of the B–1 program state that denial of the rescission merely means keeping the B–1 production lines going and options open for the manned penetrating bomber.

I do not see this as the issue at all. This is a first step in pressuring subsequent Congresses to reverse this tough decision made by President Carter to make room in the defense budget for

spending which has higher priority and greater defense capabilities. We are not voting on two aircraft, but the possibility of 240. We are not voting on a $460 million item, but one that costs a billion dollars, and could go as high as $60 to $75 billion if the full B–1 program investment and operational costs are considered.

Mr. President, we do not need a new manned penetrating bomber under this Nation's defense strategy. The supplemental appropriation which was passed in December provides a less costly alternative which performs the mission intended for the B–1. The supplemental includes $400 million for acceleration of the cruise missile program, B–52 modifications, and a wide-bodied cruise missile carrier. The President, the Secretary of Defense, and the Joint Chiefs of Staff have said the cruise missile can do the job. We do not need the expensive B–1 option to perform this strategic mission.

Mr. President, the Senate position on this issue has been affirmed not once, but twice: First, when the second budget resolution for fiscal year 1978 assumed enactment of the rescission, and second, when the Senate version of H.R. 9375, the supplemental appropriation for fiscal year 1978, specifically included the rescission.

President Carter's decision to stop production of the B–1 bomber was prudent and courageous from both a defense strategy and a budgeting standpoint. It should be supported by the Congress. Wasting a billion additional dollars to produce two aircraft does not make sense.

The President's position effectively continues the Triad defense concept of the United States. We are moving ahead with cruise missiles which are significantly less costly, but equally effective, options to the B–1. They are evidence of the President's commitment that the United States maintain a defense capability second to none in the world.

Mr. President, I urge that in the emotional atmosphere—may I have another 5 minutes?

Mr. STENNIS. Yes, I am glad to yield the Senator 5 more minutes.

Mr. MUSKIE. That in the emotional climate that exists today, we not begin to question each other's commitment to a strong defense. We have differing opinions, obviously, as to what that constitutes, but I have no doubt in my mind that all Senators in this body are committed to a strong defense.

Let us be clear about what is happening. Four B–1 aircraft, including the defensive avionics package on the fourth plane, will be completed. By going forward with the completion of these R. & D. activities on the B–1, the President has kept open options for a manned penetrating bomber in the future, if the option is ever needed.

A vote with the House against the Senate position is to spend $1 billion for two airplanes for which no legitimate strategic need exists.

Moreover, there are very serious budgetary reasons for supporting the President. A primary input into the President's decision to cancel the B–1 centered on the significant costs associated with the program. At a cost of over $105 million per plane and a 25-year total systems cost of at least $60 to $75 billion, including armament for the system and maintenance and support activities, the program would have taken a disproportionate share of funds that are urgently needed for other defense improvements. From a simple economic standpoint, it is impossible to envision spending enormous sums for the B–1 and, at the same time, upgrading our conventional and other strategic forces. The costs for improving conventional forces, particularly those for maintaining European stability, are estimated at over $70 billion for major procurements alone during the next several years and the costs for procuring the Trident program, including the possible startup of the Trident II and 20-year operating costs, are estimated at $50 billion.

I would like to remind my colleagues of another budgetary problem associated with the decision on the B–1 rescission. If the Congress does not support the President regarding the B–1 program, the deficit for fiscal year 1978 will grow by $190 million. The current estimate of the deficit, as reflected in the Senate budget scorekeeping report dated January 16, 1978, is $59.1 billion. So, if the decision is to buy the fifth and sixth B–1 aircraft, the Congress adds another $190 million to the fiscal year 1978 deficit.

Furthermore, there will be an impact on the deficit projected for fiscal year 1979. The President's budget report estimates a 1979 deficit of $60.6 billion. Well, supporters of the B–1 program would add another $140 million to this projected deficit. The $140 million would not provide adequate funding to complete fabrication, buy spares and ground support equipment, test the aircraft, and train personnel for the B–1 activity. It would probably be necessary for the President to submit a B–1 supplemental to cover the full costs of completing and testing the fifth and sixth aircraft. This supplemental could add another $30 million in outlays to the budget in fiscal year 1979 and consequently to the deficit. In sum, the projected deficit for fiscal year 1979 could rise another $170 million.

These are just a few of the difficult budgetary problems ahead for Congress.

Mr. President, my good friend from Oklahoma, Senator BELLMON, and I were queried by a number of our Senate colleagues about whether the Budget Act was being circumvented by the Senate's action in handling the B–1 rescission. We assured our colleagues that there was no inconsistency between the Senate's action on the B–1 and provisions contained in the Budget Act. We replied that we did not believe the use of this supplemental appropriation bill to repeal the previously enacted fiscal year 1977 budget authority for the B–1 presents such a case of circumventing the Budget Act. On the contrary, repeal of those funds and the use of a supplemental appropriation for that purpose are completely consistent with the Budget Act. It is also impelled by the second concurrent resolution on the budget, which assumes this fiscal year 1977 budget authority (which would outlay in 1978), if committed, will be repealed.

Mr. President, I ask unanimous consent that a letter from Senator BELLMON and me, responding to our colleagues on this matter, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., October 18, 1977.

Hon. S. I. HAYAKAWA,
U.S. Senate,
Washington, D.C.

DEAR SAM: Thank you for your letter of October 7 raising the question of whether use of a supplemental appropriation to rescind previously enacted budget authority is consistent with the budget process. We appreciate the concerns you raised in that letter. You know we have insisted that the Congressional Budget and Impoundment Control Act and the Congressional budget process formulated pursuant to it should be observed, both in letter and in spirit, and have consistently opposed Congressional actions which would circumvent or subvert the budget process.

We do not believe the use of this supplemental appropriation bill to repeal the previously enacted FY 1977 budget authority for the B–1 presents such a case. On the contrary, repeal of those funds and the use of a supplemental appropriation for that purpose are completely consistent with the Budget Act. It is also impelled by the Second Concurrent Resolution on the Budget, which assumes this FY 1977 budget authority (which would outlay in 1978), if committed, will be repealed.

We have no doubt of the jurisdiction of the Appropriations Committee to recommend repeal previously enacted budget authority. Section 404(b) of the Budget Act spells out the jurisdiction of the Senate Appropriations Committee and reiterates Rule XXV of the Standing Rules of the Senate. Under Section 404(b), the Appropriations Committee has jurisdiction over "rescission of appropriations contained in appropriations acts (referred to in Section 105 of Title I, U.S. Code)." Section 105 simply defines the necessary title for general appropriation bills indicating that September 30 is the end of the fiscal year. The jurisdiction of the Appropriations Committee to "rescind" appropriations is simply analogous to that of any committee to repeal authorizations which exist in law by virtue of prior enactments. This jurisdictional statement has been recently confirmed in the Senate's adoption of S. Res. 4, which revised Rule XXV and reaffirmed this statement of the Appropriations Committee's jurisdiction therein. The legislative history of Section 404(b) leaves no doubt that Congress intended to confirm the inherent jurisdiction of the legislative branch to repeal prior appropriations action.

The Budget Act confirmed this jurisdiction of the Appropriations Committee wholly apart from any consideration of impoundment, and before the impoundment control title to the Budget Act was formulated. You will recall that the report of the Joint Study Committee on Budget Control, published on April 18, 1973, recommended that Appropriations Committee jurisdiction to recommend rescissions of budget authority be confirmed (p. 29) in order to enhance Congressional control of the budget. The original Budget Act legislation, introduced in both Houses, contained provision for confirming this jurisdiction in the Appropriations Committee. Neither version contained an impoundment title at that time. Although the legislation reported by the Committee on Government Operations, which first reported the Budget Act in the Senate, and the Committee on Rules, which perfected it in largely the form in which it was adopted, also confirmed this jurisdiction in the Appropriations Committee to recommend re-

peal of previously enacted appropriations, neither contained an impoundment title.

The impoundment title was first added in the House proceedings on the Budget Act bill. In the Senate it was added to the already-passed Budget Act in the course of going to conference. Although the conference adopted a Title X to the Budget Act, it is explicitly denominated as a separate enactment, the Impoundment Control Act of 1974. The conference did not, in the course of adopting Title X, further amend the already stated jurisdiction of the Appropriations Committee regarding rescissions. There was no intention on the part of the conferees in recommending the enactment of Title X to reduce the jurisdiction of the Appropriations Committee from that confirmed by original Senate passage of the Budget Act at the time impoundment control was not contemplated as a part of it.

In other words, even if the Budget Act had never been enacted, the Appropriations Committee would have had jurisdiction to repeal budget authority previously enacted. The Budget Act, before it became linked with impoundment, confirmed that jurisdiction. The subsequent addition of the impoundment control title did not change the ability of the Appropriations Committee to recommend such repeals.

Title X, the impoundment control title, was added to the Budget Act to constrict Presidential ability to impound funds. It was never intended to constrict the Constitutional power of Congress to repeal appropriations which it had already enacted. The 45-day period prescribed by Section 1012 of the Budget Act is a limitation on the President's ability to withhold the expenditure of funds Congress has appropriated. It is not a limitation on Congressional power to repeal appropriations it has enacted. Title X was intended to limit the power of the Executive to impound appopriated funds. It was never intended to hamstring the Congress in working its will with regard to appropriations. Nothing in Title X precludes the Appropriations Committee from acting in a general or supplemental appropriation to repeal appropriations enacted in earlier legislation.

It would be as ironic and as unacceptable as it is inconsistent with the facts if Congress had left itself in the position, in adopting the Budget Act, of being able to repeal appropriations only if the President requested it. An interpretation of Title X which would preclude Congress from rescinding earlier appropriations, unless the President requests such rescissions pursuant to Title X, would be inconsitent both with the basic power of the purse vested in the Congress pursuant to Article I to the Constitution and the Congressional control of the budget process, which is a basic purpose of the Budget Act.

A colloquy which occurred duing Senate consideration of the conference report on the Budget Act between Senator McClellan, Chairman of the Appropriations Committee, and Senator Ervin, Chairman of the Senate conferees on the Budget Act and of the Government Operations Committee which originally formulated and reported it, underscores this point:

Mr. MCCLELLAN. What would be the effect if, by the end of the 45 days, Congress had not completed action on the bill, but within a few days thereafter it did complete action? It would be legislation, the President could sign the bill, and the rescission would then become law.

Mr. ERVIN. Oh, yes, I think so, because under the legislative authority given to the Congress by article I of the Constitution and also by the necessary-and-proper clause, even though Congress does not act in the 45 days it could act thereafter.

Mr. MCCLELLAN. It could. There is nothing to keep Congress from acting upon it.

Mr. ERVIN. No.

Mr. MCCLELLAN. That does not prevent or preclude Congress from rescinding thereafter.

Mr. ERVIN. I might say that the 45-day provision is placed in the bill for the purpose of spurring speedy congressional action, but with recognition of the fact that Congress cannot deprive itself of any other power it has under the Constitution.

So we are unable to agree with you that use of a supplemental appropriation bill to repeal the unexpended balance of FY 1977 B–1 funds for this program, which Congress has determined should be terminated, subverts the budget process. Moreover, we believe that repeal of these funds is required by the Second Concurrent Resolution on the Budget which we adopted last month.

As you will recall, the President's decision to cancel the B–1 program was affirmed by the Congress in passing the fiscal year 1978 Defense Appropriations Act. This Appropriations Act eliminated any funds for further production of the B–1 in fiscal year 1978 or later years.

Subsequently, the Second Concurrent Resolution on the Budget which Congress adopted three weeks ago contains limitations for the national defense function of $116.4 billion in budget authority and $110.1 billion in outlays. This outlay figure explicitly assumed the rescission of the 1977 funds which would have had an outlay effect in fiscal 1978. You will also recall that in formulating those totals, in a rare line-item vote, our Committee voted to delete the B–1 funds from the defense ceiling. Should this rescission not take effect, the outlay ceiling for FY 1978 would be exceeded by $190 million.

Under these circumstances and regardless of our personal feeling on the merits of the B–1, we believe the Budget Committee should support rescission of these funds by the Appropriations Committee. It is clear that the Appropriations Committee has authority to add a provision to the 1978 Supplemental Appropriations bill which would rescind authority for the B–1 and related weapons systems previously enacted by Congress.

We hope that you will give this matter further consideration and continue to support the agreed-upon levels for the national defense function in the Second Budget Resolution.

Sincerely,

EDMUND S. MUSKIE,
Chairman.
HENRY BELLMON,
Ranking Minority Member.

Mr. MUSKIE. Mr. President, as I stated earlier, the issue is not two planes, but 240. It is not a half billion or a billion dollars, but $60 to $75 billion. There are five basic reasons for supporting the Senate's position on this matter. These are:

First. The U.S. defense posture does not need a new manned penetrating bomber under present defense strategy. The supplemental appropriation which has been passed provides an initial $400 million for acceleration of the cruise missile program, B–52 modifications, and a wide-bodied cruise missile carrier, as an alternative to the B–1 bomber. It is also less costly than the B–1 option. We do not need the expensive B–1 to perform this particular strategic mission. How long will the pressure be exerted on the Congress to buy a weapon system we do not need?

Second. The $462 million involved in the rescission is only the beginning of further substantial funding requirements for the B–1. It is my understanding that up to $500 million above the $462 million would be needed to complete fabrication of the fifth and sixth aircraft, buy spares and support equipment, and pay training and test costs. Thus, the next two planes would cost close to a billion dollars—not just the $462 million in the rescission.

Third. The estimated cost for the fully armed 240-plane B–1 program is roughly $60 to $75 billion. It is entirely inevitable that if the President's decision on this rescission is not agreed to by the Congress, the next step of the B–1 advocates will be on the full program and a spending level of this amount.

Fourth. The second budget resolution assumed the B–1 rescission, and it means close to $200 million in outlay savings in fiscal year 1978.

Fifth. Failure to support the President adds $190 million to the deficit in fiscal year 1978 and could add $170 million or more to the projected fiscal year 1979 deficit.

Mr. President, the vote on the B–1 bomber squarely confronts the Senate with the issue of whether we can afford all the defense weapons systems we find attractive and all at the same time. We face the same problem frequently in regard to the domestic budget.

The simple fact is that we cannot afford to commit the Federal budget in every direction at once. In defense and in domestic affairs, we must make choices among attractive alternatives. Otherwise, we will become bankrupt as a nation and imperil our defense altogether.

So we must make choices. And for me, as it was for the President, his Secretary of Defense, and his Joint Chiefs of Staff, that decision is clear in the case of the B–1. We should terminate the B–1 program with the four R. & D. planes and a $5 billion investment, and concentrate on less costly and equally effective weapons systems like the cruise missile.

We should not follow the opponents of the President on this issue down a path whose only end is the expenditure of at least another $60 billion to build 240 aircraft which are not required under our national defense strategy.

I yield so I shall not further delay my good friend from California.

Mr. STENNIS. Mr. President, I yield myself 1 minute.

I want especially to thank the Senator from Maine. He went to extra trouble this morning to appear here on this matter. I commend him very highly for the points he made, including the point that I never have bought the idea that any department is entitled to a certain percentage of the national budget. I think that would be the beginning of a calamitous end in the course of time. I am certainly not impelled by that. I push the other way.

Another thing, Mr. President. On this weaponry matter, all these weapons sound mighty good taken alone. They are very attractive. They have the strongest kind of point. But the Senator is so correct: We have to make some kind of final decision on a priority basis. It is choosing between weapons, any one of which or all of which are good.

Again, I commend the Senator for his very fine knowledge of the fiscal affairs of our Government. I am proud of him.

Mr. GARN and Mr. HAYAKAWA addressed the Chair.

The PRESIDING OFFICER (Mr. NUNN). The Senator from Utah.

Mr. GARN. May I have 4 minutes, I ask the Senator from North Dakota.

Mr. YOUNG. I yield 4 minutes to the Senator from Utah.

Mr. HAYAKAWA. May I make a unanimous-consent request?

Mr. GARN. I yield, Mr. President.

Mr. HAYAKAWA. I ask unanimous consent that Mr. Ernest Garcia, of Senator DOLE's staff, may have the privilege of the floor during consideration and vote on this measure.

The PRESIDING OFFICER. Without objection, it is ordered.

Mr. GARN. Mr. President, I would appreciate it if the Senator from Maine is able to listen to some of my replies to some of the things he said.

First of all, I compliment the chairman of the Budget Committee, because what he said is true. In my limited experience in the Senate—3 years—he has tried very hard, not just in the military but in the social area, to hold things down. I congratulate him for that and compliment him and the whole Budget Committee for doing this. However, I do not compliment everybody in the Senate for that. I think he knows that on many matters, I have supported him. On the farm bill last year—and I have farmers at home, too—and on the supplemental, I pretty well supported the Budget Committee's recommendations on funds in those controversial areas. But I am a little puzzled by a few of the things he said.

As to the unilateral matter, I may have misstated myself, but what I was referring to was not just the President, but we collectively made a unilateral decision to give up the B–1 without regard to the Soviets' Backfire bomber. That is what I meant, that we should have insisted that they give up the Backfire if we gave up the B–1. I did not want the Senator to misunderstand that point.

Mr. CULVER. Will the Senator yield on that?

Mr. GARN. In a couple of minutes, I shall yield. I want to finish up a couple of points.

Mr. MUSKIE. If the Senator will yield on that point, I appreciate that clarification, that he meant we unilaterally——

Mr. GARN. No; I did not mean that the President had done it unilaterally. Obviously, he had the consent of Congress on the 1978 budget.

If the Senator from Iowa is on that point, I shall yield on that.

Mr. CULVER. I do not have the control. Will the chairman yield on that one point briefly?

Mr. GARN. I am happy to yield on his time.

Mr. STENNIS. Mr. President, I have begun to run out of time. I have a lot of promises out already.

How much time does the Senator want?

Mr. CULVER. I shall only take 2 minutes.

Mr. STENNIS. All right, I yield 2 minutes.

Mr. CULVER. It is just a question whether we want the debate to be balanced.

Mr. STENNIS. I yield 2 minutes.

Mr. CULVER. I have 2 minutes in the greatest deliberative body in the world.

On this point of whether we unilaterally give up the B–1 and do not pay attention to the Soviets in the SALT context, if this B–1 is crucial to our national interest, we should never bargain it away and we should build it. If it is not, the Soviet Union knows that and they do not worry a bit about our being so dumb as to spend $30 billion on it. The Soviet Union has far more concern, understandably and properly so, in terms of their own air defense capabilities, to be confronted with a mixed manned bomber force with cruise missiles than the B–1 ever presented to them.

I thank the Senator for yielding.

Mr. GARN. Now, if I may get back to the distinguished Senator from Maine, I thought I was very clear in my righteous indignation in saying, at least three times and summarizing, that I agreed with the Comptroller General that the President was in technical compliance with the impoundments law by dribbling out a little bit of money. I thought I made it very clear that my righteous indignation was in respect to an obvious delay in the dribbling of funds without a restart order in compliance with the Impoundment Control Act, in the hopes that Congress would reverse the decision.

So I agree with him: Technical compliance, yes; but certainly not with the spirit of the law. I think the facts show that. That is why I put the whole record of correspondence with Elmer Staats there.

I do not claim a technical violation of the law. I do claim deliberate delay. I think that package of letters over 4 months, back and forth, shows that the administration is barely staying within the law.

I agree with him, the chairman of the Budget Committee, about a certain percentage of the budget not being allotted to any department. All I made was one brief statement—in response to the constant harangue by some in this body that we are spending too much for defense, and talking about reordering priorities—that we were spending a lower percentage of the total of the gross national product for defense than in any year since 1950, period.

I did not say nor do I believe that we should allocate a certain fixed percentage to the defense budget or any other budget. That is why I was so anxious to jump up. My remarks will show in the RECORD that I simply did not say that. I do not believe it. I agree it would be ridiculous to budget on that basis. But I did want to illustrate the point that the defense budget had gone down.

I also said that, in real terms, it had gone up 2 percent this year, which I was grateful for. I think it should have gone up more.

Mr. MUSKIE. Will the Senator yield 30 seconds?

Mr. GARN. Yes.

Mr. MUSKIE. In response to the Senator's remarks, I was also reacting to what seemed to be a strengthening conviction on the part of those who speak for national defense that they sort of support the idea of a fixed percentage. I appreciate the Senator's clarification as to his own position, but there is that big argument.

The growth in the defense budget this year was 2 percent, real growth. Last year, it was 3.6 percent. The year before that, I think it was about 1.9 percent. That is not a monstrous growth, but it is growth.

Mr. GARN. I did want to make that clarification.

Mr. MUSKIE. I appreciate that clarification

Mr. GARN. The response did not sound to me like what I said. Again, I repeat, it is ridiculous to budget on that basis. I think we ought to have a higher percentage, but a fixed percentage, no. That is no way to carry on a budget.

Mr. MUSKIE. I wanted to be sure that I would prod the Senator away from that position, so I may have stated it more strongly than the Senator's real position justified.

Mr. GARN. The distinguished Senator did not have to prod me away from that particular stand.

I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. CRANSTON. Mr. President, I would like to be yielded 15 minutes.

Mr. YOUNG. I yield such time as the Senator may require.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. Mr. President, in the course of this debate we have heard from opponents of the B–1 about jobs, about pigs in a poke, about more bang for a buck, about the vast costs of the B–1. I would like to deal with those matters and then with a few others.

On the matter of jobs, I want to stress, as I have stressed before, that I do not support the B–1 because of jobs. There are many jobs in California related to the B–1. But I have in the past and I will in the future vote against programs that provide jobs if I do not think those programs are needed for valid reasons unrelated to jobs in my State.

I would never support a military program just because of the jobs factor, because there are better and more productive ways, for people being at work if they are not truly needed for national defense programs.

I support the B–1 because of my strong belief that it is essential to our national security and, most of all, to preserving the triad concept of being able to survive any first strike in three ways, and thus prevent us from suffering a first strike.

On the matter of a pig in a poke, it seems to me the cruise missile is the pig in the poke. Its capabilities have not yet been proven and there are some valid questions about the cruise missile I will get into a bit later.

As for the bang for a buck and the vast cost associated with the B–1, I think the B–1 is costly, and yes, the cruise missile sounds very cheap. But if we scrap the B–1 and go to cruise missiles and cruise missile carriers, the ultimate cost may be more, not less, in terms of dollars.

It is true that individual cruise missiles are relatively inexpensive, but their deployment by the United States can destabilize the present delicate balance between our Nation and the Soviet Union and make it more difficult, if not impossible, to reach a meaningful nuclear arms control agreement that can be verified by reliable methods.

A consequent new and unchecked contest with the Soviet Union could produce costs far exceeding those of the B–1.

I know the deep commitment of my friend from Iowa (Mr. CULVER) to SALT. He knows my deep commitment to a viable and reliable and verifiable and sound SALT agreement. I know he subscribes to all those same terms in his concept of SALT.

I have concerns about the switch to cruise missiles as it relates ultimately to our achieving our mutual goals, and they are very important goals in achieving a SALT agreement.

The B–1 is not a destabilizing weapons system. It is well known. It is not an issue in SALT. It can be counted. It can be verified and its range is known.

The cruise missile is a destabilizing weapon system. It is not yet certain if we can exactly count and exactly verify all the important aspects that relate to cruise missiles and to strategic arms limitations.

Going to cruise missiles and dropping the B–1 can make strategic arms limitation agreements more difficult to achieve.

Certainly, if we go to cruise missiles, it is very likely the Soviet Union will go to cruise. That has been the record of past new developments in weapons systems.

As we MIRV'ed, the Soviet Union MIRV'ed, perhaps the single most destabilizing step that has yet been taken in the arms race.

Henry Kissinger originally offered MIRV just as a bargaining chip, and I thing we should never use a weapon as a bargaining chip, but nevertheless it was done. And Henry Kissinger later said, "I wish I never heard of MIRV."

We may be saying a few years from now, "I wish I had never heard of cruise missiles."

I believe we should proceed with the B–1 while at the same time seeking a comprehensive arms control agreement with the Soviet Union which, hopefully, will one day allow both nations to cut back on all strategic weapons systems, including those like the B–1, and specifically including the B–1.

Another point about the B–1 as it relates to arms control issues is the point that it gives us an alternative to pressing the button. Once we launch missiles from submarines or silos, they cannot be turned aside. We cannot abort their mission, as I understand it. We certainly cannot make any show of concern by anything we do with the submarines or the silos.

We can with the B–1. We can put them on alert and in the air, we can start them off toward the targets in the land with which we are having troble, but because they are manned by human beings, we can abort them, turn them aside and instruct them not to drop their bombs down to the very last minute.

We lose that option when we drop the B–1 program. I think it is an option we should keep.

The threat of nuclear war and the effort to avoid nuclear war is the fundamental issue at stake in this issue, and in all issues that relate to the arms race.

Mr. CULVER. Will the Senator yield?

Mr. CRANSTON. Certainly.

Mr. CULVER. Would the B–52 give that same kind of option?

Mr. CRANSTON. Yes, that gives the same.

Mr. CULVER. And we will have that.

Mr. CRANSTON. We will, but we will not have it as an effective way and not after the 1980's. That is the basic question.

Mr. CULVER. Well, we have official Air Force testimony, again, that it will carry out its mission, confidently to 1987 and perhaps well into the 1990's. That was the head of the Strategic Air Command. Then we can watch over the defense in terms of what additional steps might be necessary.

We have that capacity in our current inventory.

Second, on the B–1, as I understand the proponents of the B–1, they are saying, "Give us the B–1 because it's a more reliable cruise missile carrier."

That is not what we heard earlier.

So we not only want the B–1, but as soon as we get it through, put all the cruise missiles on it that we can.

If it were an either/or proposition, we ought to look at it. But no one is even advancing that argument.

Mr. CRANSTON. I am not sure we want to load the B–1 with cruise missiles. That is an option that is being considered. I am not sure it is a wise option.

The Jane's yearbook has raised some serious questions about an upgraded B–52. Mr. John W. R. Taylor, the editor, states:

> The B–52 has been a superb aircraft but, as a design, is now more than 20 years old. Who drives a 20-year-old automobile as his work vehicle? The B–52 was designed to drop free-fall nuclear weapons from a great height. In no way can its well-used airframe be expected to go on flying through turbulence at very low altitude (the optimum launch height for a missile attack) for another 20 years.

Mr. President, many of us disagreed with the President's decision to cancel production of the B–1 bomber and accellerate development of cruise missiles. I am one who favored modernization of the bomber leg of the Triad with the B–1 rather than cruise missiles launched from aircraft because I consider the B–1 the more stable weapon, as I indicated.

Our debate today, however, is not whether to approve or disapprove the President's decision, or to attempt to reverse that decision.

The issue is whether we should maintain the B–1 as one option for a future manned penetrating bomber—a successor to our current B–52.

Mr. President, the President and the Department of Defense favor maintaining the option of a manned bomber. They have made that very plain. At the time President Carter made his decision, he justified his continuing support for B–1 research and development as necessary to retain an alternative should development of cruise missiles meet technical difficulties or if there were a drastic change in United States-Soviet relations.

In announcing his decision, the President said that continued research and development of the B–1 would "continue to provide us with the needed technical base in the unlikely event that more cost-effective alternative systems should run into difficulty." He admits there is a possibility that these alternatives could run into difficulty.

In further recognition of the uncertainties of the future, the President continued:

> But this is a matter of so very very great importance, and, if, at the end of a few years, the relations should deteriorate drastically, which I don't anticipate, then it may be necessary for me to change my mind.

I certainly share the President's hope that U.S.-Soviet relations, and our joint efforts at limiting strategic weapons do not deteriorate or slow down. But we also both realize that such matters are unpredictable and that future improvements in Soviet military capabilities are incalculable.

Likewise, Secretary Brown last year supported the Air Force proposal to develop an FB–111H prototype bomber, stating in a letter to the Senate Armed Services Committee:

> I believe this proposal deserves careful consideration as a way of keeping open an option for such a system as a penetrating bomber at some later time.

Further, he admitted in his October 4 press conference:

> That after a couple of years the option to produce the B–1 is going to get more difficult to exercise. Under those circumstances the Air Force has proposed that we might want to develop and test the FB–111H not because it is more cost-effective than the B–1 but because it may be a better way to preserve an option over an extended period should we later decide that we want a new penetrating bomber.

As my colleagues know, the President has not requested funds for the FB–111H in the fiscal year 1979 budget—despite his support last fall for the Armed Services Committee's addition of $20 million to the supplemental authorization bill for the FB–111H. So here is a change in the President's stance.

It is widely assumed—correctly, I think—that the FB–111H has been scrapped for now—just for now—because it gave hope to those who oppose and wish to reverse the President's decision to cancel B–1 production. But, though the administration has wavered in its support of the FB–111H, it has never repudiated its expressed desire to maintain an option for a future manned penetrating bomber.

Now that the FB–111H has been eliminated as an option for a manned penetrator in the near future, it is even more imperative that the B–1 remain as an option.

Deappropriation of the $462 million in fiscal year 1977 funds would not support

the administration's desire to maintain a full range of options over the next few years. The fourth B–1 aircraft is currently being completed and will not provide the option to return to production past mid-1978 of either the B–1 or a B–1 modified for a mixed bomber force mission.

After aircraft No. 4 is completed in mid-1978, the core skilled technical and production personnel and the production facilities, will be lost. As Secretary Brown noted in his October 4 press conference:

> Given that it is desirable to maintain an option, at what point does the B–1 option disperse? And it is pretty clear that after a couple of years the B–1 is not going to be—the option to produce the B–1 is going to get more difficult to exercise.

Funding aircraft 5 and 6 would extend the B–1 production option for a few more years—until at least 1980—and I believe this is consistent with the President's expressed desire to protect against future uncertainties with a full range of alternatives.

I believe the administration's consistent support for retaining an alternative follow-on to the B–52, as a hedge against uncertainties in cruise missile development, uncertainties in what limitations will be placed on cruise missile in SALT, and uncertainties in United States-Soviet relations in general, can be best fulfilled by joining the House in refusing to rescind funds for B–1 aircraft 5 and 6.

I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. YOUNG. Mr. President, I suggest the absence of a quorum, with the time to be charged against both sides.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, will the Senator yield me 5 minutes?

Mr. YOUNG. I yield 5 minutes to the Senator from Tennessee.

Mr. BAKER. Mr. President, when the Senate votes this afternoon on the motion to insist further on Senate amendment No. 43, the Senate will once again have an opportunity to make an important decision affecting the security of the United States. The amendment, of course, pertains to the rescission of funds allocated for the production of the fifth and sixth B–1 bomber.

Although I support fully the B–1 bomber program, and would support and encourage a Presidential decision to reconsider termination of B–1 development, I can understand why some may feel that it is not now the time to be fully committed to a program of the size and cost of 244 B–1 bombers. But I cannot understand the reluctance to build the fifth and sixth of the series when production costs only 30 percent more than termination and when it is entirely possible that we may at some point in the future decide that full-scale production of the B–1 is, in fact, necessary.

At relatively little cost, we can make a sound investment toward our future defense. We are certain to need a new manned penetrating bomber system; and these two aircraft will perpetuate the technological base that will contribute to that system. Moreover, should we decide to continue the B–1 program itself, production of these two aircraft will assist in the preservation of the manufacturing capability necessary to implement that decision.

In a larger context, I do not believe this the time to be projecting a lack of determination to preserve a very valuable option. We do not yet know the terms of the treaty limiting strategic arms now under negotiation; we do not know whether those terms will be acceptable to the American people and the Senate; and, for that matter, we do not know with any real certainty whether there will be a SALT II agreement at all. Thus uncertain, it seems premature to forgo now what may still be an essential element of our national defense.

We do know that the President's decision to terminate the B–1 program was founded almost entirely on what may be an unwarranted reliance on the development of the cruise missile program. The cruise missile promises to be an important and cost-effective element of both strategic and tactical weapon systems. But its effectiveness and vulnerability are still far too uncertain to place our strategic security in the balance on the strength of a promise. Recent reports by respected analysts indicate that the cruise missile system may be far too vulnerable to place it on such important reliance. Finally, it appears that the administration is negotiating severe limits on the range allowed all three cruise missile systems under proposed SALT II. I would be reluctant to accept this limitation even with the B–1 under full production; I will be far more reluctant to accept it should we determine that we should not preserve even the option to build the B–1.

So. Mr. President, I ask that my colleagues oppose the motion to insist on the Senate amendment in the belief that the expense required for production of B–1's number five and six is a relatively inexpensive insurance policy, considering the very important option that it will preserve and the stakes involved. The potential importance of our decision today was underscored by the editor of "Jane's All the World's Aircraft" in the preface to the 1978 edition, who, in voicing concern with the President's B–1 decision, noted, "1977 might be recorded as the year in which the seeds of defeat for the Western Powers were sown." With so much at stake, I implore my colleagues not to gamble with our strategic destiny further at this time.

Mr. WALLOP. Mr. President, will my colleague yield for a question?

Mr. BAKER. Mr. President, I am happy to yield.

Mr. WALLOP. Mr. President, I can only say that I agree with the statements that the Senator has made.

I had the privilege of attending the SALT talks in Geneva. Indeed, I attended one of the plenary sessions. I had a 4-hour conversation with Ambassador Seminoff and the American negotiators.

The thing that concerns me is that the Backfire bomber is not part of the SALT negotiations because the B–1 bomber is not part of the SALT negotiations.

Is that the Senator's understanding of the way the things have come back here?

Mr. BAKER. Mr. President, that is my understanding.

At the time the President decided to cancel the B–1 bomber program I wondered what he was going to get in return from the Russians, and the answer is we got nothing in return.

Mr. WALLOP. I only concur in the answer that we got nothing.

On that, I quote from Ambassador Earle who told me exactly the same thing, that we got nothing, and it leaves us, I think, in a situation where we are discussing warmaking capacity without discussing the things that we make war with.

It is the most remarkable set of circumstances that I have ever got involved in, and I would only say that I support the Senator. I hope that we have brains enough to carry on with the building program until we get something in return from it from the SALT negotiations.

Mr. CULVER. Mr. President, will the Senator yield?

Mr. BAKER. Mr. President, I have the floor, and I am happy to yield.

Mr. CULVER. I thank the distinguished leader for yielding.

On this SALT point, I think it is very important to keep in mind that if the B–1 is determined to be essential to our national security interests, I think we clearly should build it, we should buy it, we should have it in our inventory, and it does not matter what the Soviet Union wants or is doing or not doing.

However, if it is not essential and it is only marginal, and we have other ways that can carry out the same mission with greater effectiveness and at less cost, which is what the considered judgment of the President, the Secretary of Defense, and the Secretary of the Air Force is at the present time, then it seems to me the Soviet Union is very smart in recognizing that fact. It would be a waste of money for us to spend $30 billion on a B–1 that does not give them as much of a problem in terms of their own air defense situation over and above B–52's, rather than confront the cruise missile option. The Soviets never got very upset about B–1. They have gotten enormously upset, and understandably so, about the cruise missile.

Finally, on the Backfire versus the B–1——

Mr. WALLOP. Mr. President, could I just say——

Mr. CULVER. I wish to finish first and then I will be glad to yield.

On the Backfire versus the B–1, the interesting thing is that tit for tat with the Backfire we never had Backfire previ-

ously in the SALT context, just as we never had any of our forward base systems in the SALT context.

They were not viewed as central strategic weapons. They were in the so-called gray areas. Interestingly enough, we now have been talking about getting Backfire into the agreement.

Our reluctance heretofore has been that we do not want to open up the whole Pandora's box of the whole forward-based system that the United States currently has and which will undoubtedly be on the agenda for SALT III.

So we ourselves have been the ones who have not been too interested in having Backfire, and no one has ever equated the strategic capabilities in the most extreme assessment of a Backfire, which can make it on a one-way mission and land in Cuba, with the strategic capabilities of a B–52 which has been designed for that mission.

So I think it is important to just clarify some of those aspects of the relationship on those particular weapons systems as they relate to the SALT context.

I thank the Senator very much for his generosity in yielding.

Mr. BAKER. I thank the distinguished Senator from Iowa who not only is a valued member of the Armed Services Committe, but who supplies his point and the underlying logic of it with great thoroughness and often convincingly. I must say in all candor he does not convince me in this case, but I respect his point of view.

I will not add unduly to this aspect of the debate except to say that the argument is often made that the Backfire bomber should not be thought of as a strategic weapon, because it cannot fly to the United States or most parts of the United States and return without refueling. I point out, however, that the B–1 bomber cannot fly to Russia and back without refueling either; and I rather suspect that the weapons system was never designed with that in mind but both of them were probably designed for essentially the same mission—that is, to fly to a particular target area, to accomplish a mission, and then to hopefully land in some safe haven, possibly even Cuba, on the one hand, or Greece or Turkey on the other.

So, Mr. President, I think the question of the B–1 bomber, its essentiality to the American defense mix, and its value in the SALT negotiations, is intertwined with the entire question of mutual restraint on strategic arms and that it was a mistake not to include it in the SALT negoiations in the beginning.

Mr. President, I thank the Senator for yielding.

Mr. YOUNG. Mr. President, I yield myself 3 minutes.

Looking back through history, we have entered every war with obsolete weapons, weapons not nearly as good as our opponent's.

We are using much the same argument today. There is no way in which you can modernize B–52 bombers so they will be as effective as a B–1 or a new bomber. Opponents of the B–1 propose to utilize the B–52 another 10 to 15 years. These aircraft are already 20 years old. They would extend the B–52 life to 30 or 35 years.

That is true of almost every weapon, almost every piece of equipment you can think of in our inventory. In the war in the Middle East recently we found our antitank guns were completely obsolete. Those supplied by the Russians were far superior to ours.

We are building new tanks because our old ones are obsolete. Our missiles are being improved. You can go all the way down the line, and you cannot in any way I can see it take an old piece of machinery, even farm machinery, or truck or automobile 20 years old, and no matter how much you spend on it you cannot make it as efficient as a new one.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield myself a half minute just to make this announcement.

As I understood, those in opposition to my motion have several speakers, in that several have asked for time and have been notified to come on over. They have not gotten here yet.

I have allotted considerably more time than the other side. I do not have any other speakers just now.

I propose that we have about a 3-minute quorum call. Mr. President, I suggest on equally divided time that we have a quorum call, but at the end of 3 minutes I will ask that it be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. YOUNG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. YOUNG. I yield the Senator from Ohio such time as he may require. Twelve minutes?

Mr. GLENN. Twelve minutes will be fine. I thank the Senator.

Mr. President, I think it is helpful, on this B–1 question, to look back just a little bit and see where we have been.

When the President canceled the B–1 program, he also stated that the B–1 would remain as an option for the next few years to meet the requirement of a future manned penetrating bomber.

The funds for aircrafts 5 and 6 are needed in order to preserve the production facilities, the work force, the technical expertise, and importantly, too, the management team necessary to preserve the B–1 as a genuine option. Without all those components, we will not have the option the President indicated he wished to retain.

The role and type of manned penetrating bomber within our strategic forces has not yet been fully determined. A manned bomber should carry a large number of weapons, be highly accurate against "hardened" targets, have flexibility in avoiding air defenses, and thus be a highly visible deterrent.

The administration had sought supplemental appropriations of some $20 million to study the FB–111H, an airplane that is admittedly less capable although almost as expensive as the B–1, as a possible penetrating bomber. With the elimination of the funds for the FB–111H from the fiscal year 1979 budget, the need to continue the B–1 option, to me, is even more pressing.

The B–1 is more mission effective and cost effective over the life of the program than the other penetrating bomber options, either the FB–111H or the refurbished B–52.

The cruise missile is not an exact substitute for the B–1 as far as mission goes. The cruise missile is not capable of outmaneuvering air defenses, cannot be called back, and is designed for use on basically "soft" targets, although that can vary.

The cruise missile has not yet been proved effective, and I think that is the main point. Cruise missiles look very promising, but there is a lot of work yet to be done before the cruise missile can replace the need for a manned bomber. If a mix of penetrating bombers and cruise missiles were desired, the B–1 could serve as a launcher for the aircraft-launched cruise missile, the ALCM, as well as serve the penetrating bomber role. In a modified form, the B–1 could also perform as a more cost-effective ALCM launcher than present wide-body standoff cruise missile carrier alternatives.

I believe a replacement bomber for the aging B–52's is necessary for conventional warfare, especially in view of increasing sophistication of air defense systems. I have supported the B–1 as a modernized, conventional bomber possessing a much smaller radar profile, greater speed, and double the payload capacity when compared to the B–52.

The B–1 bomber is not an arms control problem. It will replace an existing bomber and thus need not increase the number of strategic offensive delivery vehicles. We have been trying in SALT to reduce the level of allowable delivery vehicles. The B–1 would not complicate these negotiations or future negotiations, as we see it.

Mr. President, I must admit I never put much stock in the triad concept that was put forth by the Pentagon. We have an ICBM system. To back that up, we have a submarine system, which cruises for extended periods of time over great ranges and is largely undetectable under water when these two systems are capable of launching retaliatory strikes, then to think we need an additional, third way of delivering nuclear weapons, with all of the thousands and thousands of deliverable nuclear warheads that we already have from the first two methods, to me, does not really make much sense. I feel that perhaps the Defense Department was deficient in the way they presented the B–1 argument.

I have supported the B–1 argument on this basis: Any future combat scenario is more likely to start out with conventional warfare and we hope, we pray to God, that it never escalates beyond that.

But should we enter into conventional warfare, we will need all the arms of

conventional warfare. That certainly, in any modern combat scenario, must include a heavy bomber if we are to do the job that has to be done.

(Mr. HATHAWAY assumed the chair.)

Mr. GLENN. I have supported the B–1 on the basis that it is the logical follow-on for the old B–52, which proved in the last days of the Vietnam war to be highly vulnerable to surface-to-air missile attacks. We lost a large number of these aircraft in the last, waning days of the Vietnam conflict. Therefore, I do not believe that the B–52, even refurbished, would be able to do the job in any future conventional-warfare combat situation.

Considering the conventional weaponry to be carried, the B–1 could replace the B–52 on a one for two basis—in other words, one B–1 could replace two B–52's because the B–1 will carry approximately twice the payload of the old B–52. The B–1 can deliver its weapons load with a high altitude run-in or a low altitude run-in, is much more flexible, has a smaller radar profile, and has a much better chance of mission success than the B–52's, that we might be refurbishing and reequipping.

However, the B–52 cannot be made into a supersonic aircraft and cannot even approach the increased crew potential that the B–1 would have in its role.

For those reasons, Mr. President, I have supported the B–1 and still support the B–1 as a follow-on conventional bomber primarily, but with the obvious added benefit of a nuclear delivery capability. Unfortunately, I think, its nuclear delivery capability has become the prime reason for Pentagon support of this weapons system. I plan to vote this afternoon for the production of B–1 aircrafts 5 and 6, because if we are to keep this option open, we need these two additional test airplanes. I do not feel that the funding that is being asked is excessive when it gives us the possibility of keeping this option open. That is all that is asked by this motion.

This is not a buy of 40 or 60 or 150 airplanes involving billions and billions of dollars. It is to provide the funding for aircrafts No. 5 and 6 in order to preserve the production facilities, the work force, the technical expertise, and the management team necessary to preserve the B–1 as the true option the President indicated he wanted to retain. While he cut back on his funding for the whole program, he did indicate that he wanted to keep the B–1 option open and see what developed. I say this vote today is very crucial to maintaining that option as the President desired. I urge my colleagues, Mr. President, to vote in favor of production of the B–1 models 5 and 6 this afternoon.

I thank the distinguished Senator for yielding me time on this most important matter.

Mr. GOLDWATER. Will the Senator yield me not more than 10 minutes?

Mr. YOUNG. I yield 10 minutes to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I am opposed to the language in the fiscal year 1978 supplemental authorization bill that would deappropriate fiscal year 1977 moneys for B–1 bombers 5 and 6. I have made the point before, but it is still a fact that the Senate, through this action, is circumventing the Budget Impoundment and Control Act and I do not believe the Senate position should be reinforced in its conference with the House.

The procedures on rescission in the Budget Impoundment and Control Act are quite clear. Consequently, when the House Appropriations Committee, some time ago, rejected the President's rescission notification on these particular funds, that should have been the end of the matter. As we all know, the House conferees have refused to accept this language, and their position was reinforced by the full House with a vote of 191 to 166 to reject the Senate position. In other words, the House is sustaining its rescission action and is telling the President to build B–1's 5 and 6.

Mr. President, I have examined the new defense budget and, in my opinion, the administration's proposals for strategic programs indicate it still does not have a good understanding of the United States/Soviet strategic equation. For example, there are no funds in this defense budget for even the most basic prototype work for a follow-on to the B–52. Further, research and development funds on strategic programs is down by about $400 million over 1978, and in the total defense budget, there is no real growth in funds for strategic forces.

In the supplemental authorization bill, the Armed Services Committee recognized the need for a follow-on bomber to the B–52 and included $20 million for the FB–111H prototype.

I might add that this aircraft would have all the characteristics of the B–1 within 4 or 5 knots and within a few feet of climb capability, but will only carry 70,000 pounds of payload, compared to 350,000 of the B–1. That authorization was accepted by the House, and Secretary Brown had advised us that was a prudent alternative to examine. However, it was dropped in the appropriations conference. Yet the administration is still pressing to cancel B–1 production, even though it has no alternative in mind and has not included a proposal in the 1979 budget. So one must raise the question of whether the administration understands the concept of a mixed force as emphasized by our Armed Services Committee. Such a force would guarantee that, beyond the life less effective as a penetrator, a follow-on of the B–52, which is becoming less and manned penetrator aircraft was still required.

Mr. President, there is a lot of confusion about this term "penetrator." The old concept of strategic bombing was from high altitudes. The new concept of strategic bombing is from extremely low altitudes, altitudes of from 200 to 300 feet above the ground at speeds of Mach .85, which is about 650 miles an hour.

The B–52 will fly only about 350 miles an hour, and at the extreme turbulence encountered at 200 to 300 feet over most any terrain, the B–52 just cannot take it.

It is not only becoming an ancient aircraft, although a good aircraft, but it is not designed for the modern call for strategic weapons.

The FB–111H would be a comparable airplane and a good one if we feel we can get away with the light payloads that it would be required to carry.

When the President canceled B–1 production, he said it was a decision against the B–1 only and not against the manned bomber concept per se. However, the actions of the administration seem to say otherwise. It is becoming clear that the administration intends to place the primary responsibility on the future strategic air breathing force, as it calls it, on the cruise missile and is not going to pursue a follow-on penetration system, B–1 or otherwise. Consequently, I believe we must take whatever steps are necessary to insure that our future strategic force structure is adequate to meet the projected Soviet defensive threat and we must continue with the B–1 program. There is a definite and supportable need for a manned penetrator beyond the life of the B–52 and the B–1 was designed to fill that need. The testimony before our Research and Development Subcommittee clearly supports this requirement and I do not understand why the administration offers no alternative to the B–1.

I interject here, Mr. President, that the Russians are continuing to build the Backfire bomber. Their production rate is about three a month now.

This aircraft will reach the United States. It cannot return, but that does not seem to be of much concern to the Soviets.

It can land in Cuba or other Communist-sympathizing countries that are now in existence in this hemisphere, or which will be in existence shortly.

We have not gotten anything out of the SALT talks relative to giving up our best strategic weapon.

In my humble opinion, if the President does not allow this No. 5 and No. 6 to continue, if this Senate does not allow 5 and 6 to continue, thereby maintaining a production line, the time will come again, in my opinion, when this Senate is going to reject the SALT treaty, if the negotiators at the SALT talks do not do it themselves.

It is a bad treaty so far. It does nothing for us. It does everything for the Soviets.

But if he is to have something to fall back on, he will have to have the B–1. If we allow the line to stop by not building 5 and 6, he is going to have to start all over again and instead of looking at an aircraft that can cost, maybe, now $110 million, we are going to be looking at one that costs $150 million, and maybe more.

We could prevent that. I will still agree it is an expensive airplane. I might point out that this is a very expensive Congress, too, and everything else that we are doing in this country is expensive.

My concept of the first duty of this country is that the first duty of this country is to protect the people and their property and their freedom, and if we are going to fall so far behind the Rus-

sians that they can call our hands and we do not have an ace in the hole, then we are going to be in bad shape.

If the fiscal year 1979 budget had contained development funds for a follow-on penetrator beyond the B–52, then that might well be considered a basis for not proceeding further with the B–1 program. But, since there are no funds included and the intention of this administration regarding future strategic force structure has become quite clear, the case for building B–1's 5 and 6 is now even stronger than it was last December when we debated this issue. In my opinion the administration has weakened its case considerably by not including an alternative program in the 1979 budget submission.

Mr. President, there are other reasons to proceed with the B–1 program. We are still encountering difficulty at the SALT II negotiations which, in their present state, are unlikely to result in a treaty that the Senate will ratify. I touched on this, but I want to go further with it. Our negotiators are reportedly still trying to resolve the Backfire bomber issue, but it is not likely the Soviets are going to agree to include the Backfire in any treaty. Frankly, I do not think we have the leverage now to make the Soviets move on this point.

Now the administration is proposing an exchange of letters defining the Backfire's limits and use which, to me, would be totally inadequate. The idea that we gave up the B–1 unilaterally dumbfounds me when it seems obvious we could have resolved the Backfire issue using the B–1 as a trade. I would not have given up the B–1 in any case, but if I were the President and was determined to cancel the B–1, I certainly would have tried to get as much from the Soviets as possible for doing that. That might have made the decision more palatable to some in the Congress.

The PRESIDING OFFICER. The Senator's 10 minutes have expired.

Mr. GOLDWATER. Could I have about 3 minutes more?

Mr. YOUNG. Three minutes more.

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. GOLDWATER. I thank the Chair.

We still have not resolved the cruise missile range issue at the SALT II negotiations. The administration has said the cruise missile will be the "senior partner" in the future strategic force, and yet we are still haggling over what the operational range should be. The possibility exists that the cruise missile range we end up with will preclude our being able to reach some targets.

When this occurs, how does the administration propose to cover those lost targets with other than an SLBM or ICBM? Can the administration guarantee that there are no targets in this category that will not require a weapon from a manned penetrator? With the B–1 in the force, this eventuality will not come to pass because the B–1 could penetrate to Soviet targets well into the next century.

Mr. President, it is ironic that, on the one hand, the administration has elected to rely on cruise missiles in the future while, on the other hand, the negotiations it has done at SALT on the range of the cruise missile makes one wonder. This hardly inspires confidence and it does not reflect a coordinated strategic policy within the administration.

The administration's performance at SALT II, thus far, reflects a serious lack of understanding of how to deal with the Soviet Union. The administration has been far too eager to make concessions too early or of a magnitude not required. However, I do not put all of the blame on our negotiators because they are seriously lacking in real leverage, which the President has failed to provide. It is becoming more obvious that the B–1 is required and that we must retain the option and the leverage these two aircraft will provide. I urge our Senate conferees be instructed to recede to the House on this matter.

Mr. TOWER. Will the Senator yield?

Mr. GOLDWATER. Yes, I yield.

Mr. TOWER. I want to associate myself with what the distingu'shed Senator from Arizona has said.

Less than a week ago, I attended the SALT negotiations in Geneva and had an opportunity to sit in a plenary session of the association. I met with both Russian negotiators and with our own.

I must say that the fault lies not with our negotiating team there. They are victims of the instructions and the guidelines they have received from Washington and, as the Senator suggests, they are placed in the unfortunate position of having to play with a stacked deck.

Unilateral cancellation of the B–1, although the B–1 did not appear to be a matter of major Soviet concern at the time, certainly it was after, as part of our arsenal and something from which we proceed, the unilateral cancellation of it, I think, has, as the Senator suggested, placed our negotiators in a very difficult position.

It was at Soviet urging that the Backfire was dropped out of the Geneva discussions. It is not even in the discussions now in Geneva.

Our SALT II negotiating team has nothing to do with the Backfire at this point. It is being dealt with as a separate issue, which in my view is foolish, in the first place. It has to be considered in the context of the whole range of strategic capability.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STENNIS. I yield the Senator 5 minutes.

Mr. TOWER. I think we would vastly strengthen the hand of our negotiating team there should we serve notice that, whether the President likes it or not, we are going to continue with production of the B–1 and that it is something to be reckoned with.

Anybody who knows anything about strategic capability knows that the cruise missile is not a substitute for the B–1. It was intended to be a supplementary system to the B–1, however good the cruise missile might turn out to be.

As the Senator points out, the 2,500 kilometer limitation is going to make it eminently less desirable as a part of our strategic triad.

Mr. GOLDWATER. I think the observations of the Senator from Texas should be clear to everyone in this country who is following the SALT talks.

While I do not believe that our negotiators are what I would call the strongest people we could find, I do not care how strong the negotiator is, if the President of the United States does not back him up, does not give him some weapons with which to fight.

So far, these negotiations have been marked, to me, by a willingness on the part of our negotiators to give the Soviets anything they want. We have been giving and giving and giving ever since the end of World War II. Where we were once the world's greatest military power, we are no longer in that position. Where once we were respected and our name meant something in the power of the world, today it has diminished to the point that even small countries are now willing to stand up and challenge us and take us on.

So I hope that the President would pay some attention to the opinion of some of the Senators in this body, that he should put some muscle on the rather lean arms of the negotiators in Geneva so that they can get along with the job. If we put the B–1 bomber back in and make them recognize that we are going to have a fleet of B–1's, then we will have to talk about the Backfire versus the B–1.

We have gotten nothing from the cancellation of the B–1. We have not even gotten a modified FB–111H. We have not even completed our modification of the B–52 fleet, which is about 7 years away now. Mind you, that airplane is so old that we have crews whose fathers flew some of the airplanes.

I have made this statement before: We stand in strategic nakedness in this country for about 7 more years because of the inattention of our President to the needs of the strategic aspects of our military.

Mr. TOWER. Mr. President, will the Senator yield me 5 minutes?

Mr. STENNIS. I yield.

Mr. TOWER. Mr. President, I want to associate myself with the remarks of the distinguished Senator from Arizona.

I do not have too much to add, except that after meeting in Geneva, I met with a number of NATO parliamentarians and cabinet ministers and military people in Munich over the weekend. They repeatedly asked the question why we unilaterally canceled the B–1. I could not, for the life of me, explain to them.

They also expressed some concern about our softness on the MX. Viewing everything in the aggregate, they wondered what we are going to do in these negotiations, which are going to impact even more adversely on them than on us.

I think that right now, in addition to our own safety, we have to consider what is likely to happen to the cohesion and competence of the North Atlantic Treaty Organization, of our alliance, if we proceed along the lines we are now because we are excluding such things as the

SS–20 and the Backfire and other matters that are of vital concern to them.

We have to remember that what is an intermediate range weapon to us is a strategic weapon to them because it can be launched from the Soviet Union to the United Kingdom or West Germany. Right now, our allies are showing very little confidence in our ability to negotiate this matter properly.

Even if we should achieve a nuclear standoff—which we are not going to do, considering the current trend—what we will have to consider is their growing superiority in intermediate range weapons or the so-called theater or regional weapons, added to that their enormous battlefield superiority in Western Europe, and what kind of real defense in the Western World we have, and how can we expect other nations to follow the leadership of the United States under these circumstances?

They are already talking in West Germany about going back to Ostpolitik, to reach out to Russia because of the fear that they are going to have to make their own individual accommodations, because the United States is going to cop out.

If we think we can accept a degree of strategic inferiority, a lot of intermediate or theater or regional inferiority and battleground inferiority, and withdraw to fortress America and expect everything to be hunky-dory for the United States, regardless of what happens to the rest of the world, then we have no vision in this country.

Mr. GOLDWATER. Our President has made a lot of noise about doing away with the threat of nuclear war. What we are talking about is a strategic concept of nonnuclear war. Yet, if he takes away our B–1, if we do not get the FB–111 modified, if he limits the range of cruise missiles, we are going to wind up with only one alternative, and that is the red button down in the President's office, and he will press it. We are going to be in nuclear war, because we have no other way to fight a strategic war, if he continues to follow the idea of nonconventional weapons but also continues to talk so heatedly against any kind of nuclear weapon. None of us wants nuclear weapons. I wish we could scrap them all. But we are not going to do so because the Soviets are not going to scrap theirs.

So I hope the President would pay some attention to these things. He is going to leave us no alternative but to answer the Russian threat with nuclear weapons, and we do not want to do that.

Mr. TOWER. Or yet perhaps another alternative—being confronted with overpowering Soviet military superiority, and the free world will have to knuckle under to the political and economic domination of the Soviet Union.

Yes, in those circumstances where they had that superiority, we could avoid nuclear war. But how do we avoid it? By becoming a second-rate nation, by weakening ourselves politically in the world, and hence weakening ourselves economically, because we are not an economically self-sufficient country.

What can we expect in this country if we are held hostage to the political and economic global politices of the Soviet Union? We will not have the standard of life we have in this country today, and all our concerns for the poor and the disadvantaged in this country will be magnified many times over because we will not have the resources to make a decent quality of life for the citizens of this country.

Mr. GOLDWATER. The Senator is right.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. GOLDWATER. I think I have about expired, too.

[Laughter.]

Mr. STENNIS. I yield the Senator 2 additional minutes.

Mr. GOLDWATER. I remind the Senator that we no longer have a two-ocean Navy; we are no longer the No. 1 Navy in the world. We are superior in our air forces only because we have fought two wars in the air since the Soviets had to fight one in the air. Our armies can never match the might of the Russian armies because of the simple statistic of numbers.

So we are not too many years away—I am not talking about 10 years; I am talking about perhaps 2 to 5 years—from when this country will be a decidedly second-rate country. If we are going to be second-rate, we might as well be 20th.

Mr. TOWER. The Senator is absolutely right.

We pride ourselves on a lot of qualitative superiority, and we have it both in terms of men and machines. But the fact is that ultimately the numbers are going to catch up with us, and we are going to lose that qualitative edge. We are going to lose it not only because numbers will overwhelm us but also because the Soviets are not prepared to accept from now on the qualitative edge that the United States has in many areas.

And they are beginning to close the gap on the qualitative edge. Does the Senator agree?

Mr. GOLDWATER. I agree completely, although I have never subscribed to the Soviet's supposed great scientific ability. I think they are probably lagging behind us 15 to 20 years.

Mr. TOWER. We hope it is 15 to 20 years.

Mr. GOLDWATER. They are now building stronger jet engines, for example. We lag behind in jet engines. They build their aircraft in a clumsy sort of a way, but they go faster than ours and they are just as maneuverable. They still have better tanks. They still have better field rifles than we have. They have better ways of getting their soldiers across the battlefield. They are just as good at electronic surveillance as we are.

So I agree completely with my friend from Texas.

Mr. WALLOP. Mr. President, will the Senator yield on this point?

Mr. GOLDWATER. I ran out of time.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. YOUNG. Mr. President, I yield 2 minutes to the Senator.

Mr. WALLOP. Mr. President, on that point I point out that the protocol that is being negotiated at this moment on the SALT II treaty would do the one thing that Senator GOLDWATER and Senator TOWER have just been expressing a little trepidation about, and that is our technological capability. One of the things being negotiated right now is the fact that our technological achievements are considered to be circumvential in the basis of the treaty and that any technological improvements which the Soviets may make is a matter of weapons upgrading. So we are negotiating away our own technological ability in addition to the B–1.

Mr. TOWER. The Senator is absolutely right.

I might say that the Senator from Wyoming put in an appearance in Geneva, and we were strongly supported by him there, and he made a positive contribution to what was going on there.

He is absolutely right. We will be accused of circumvention and transfer if we do any improvements, but theirs will be simple maintenance, or something like that.

Unresolved is this business of the modernization of their systems and the vulnerability of ours.

We are treading on very dangerous ground here, and I rather hope they do not resolve the issue because then maybe we will not get a treaty.

Mr. GOLDWATER. Mr. President, I relinquish the floor.

Mr. DOLE and Mr. WALLOP addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. YOUNG. Mr. President, I yield 4 minutes to the Senator from Wyoming.

Mr. WALLOP. I thank my colleague from North Dakota.

The PRESIDING OFFICER. The Senator from Wyoming has 4 minutes.

Mr. WALLOP. Mr. President, I have a statement which I wish to deliver on behalf of the Senate's consideration of extended funding of the two B–1 bombers and perhaps the whole program.

I stand with many of my distinguished colleagues from the Senate and Congress of the United States in support of a stronger national defense and particularly in support of producing the B–1 bomber.

Since the mid-1960's, this country has been engaged in a dangerous experiment. We have not increased the numbers of our strategic launchers, have made only modest improvements in some, and have allowed others—our bombers—to decay. We have largely dismantled our own national defenses against manned bombers. We have done this in order to give the Soviet Union an example of good will, an invitation if you will, to share strategic parity with us, and an inducement to moderate their strategic programs.

The experiment was based on the premise that the Soviet Union accepted the desirability of strategic parity with us, rather than dominance of us.

That premise has been shown to be faulty. We stopped it at 20-odd submarines; they went on to 40. We stopped

our whole commitment to air defenses; they continued. We stopped building a number of things; they continued on on almost every level. In the SALT negotiations that are in front of us, at almost every level where the Soviet Union is being asked to dismantle we are negotiating numbers which we would have to build to achieve. In other words, we do not even have the levels the Soviets do. The premise of strategic parity is faulty, and the experiment with it is failing. Our own inaction, it seems, has given the Soviets the confidence to build up their weapons.

My good friend from Iowa spoke a little earlier, and he said that the B–1 never worried the Soviets. If I were a Soviet negotiator and figured there was a struggle going on and we did not have a B–1, and particularly when I saw the United States make a unilateral commitment not to build it, I would not worry about it either. You cannot negotiate something you do not have in your pocket. We need a few people who have bought a horse once or twice to find out that the closer the time comes when you get to go home, the cheaper the horse becomes.

The Soviets now lead us in every category of strategic weapons except total number of warheads. But our lead is evaporating. By 1982, the administration has conceded, the Soviets could destroy about 90 percent of our land-based missiles with a small fraction of their own.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. WALLOP. I yield.

Mr. GOLDWATER. We do lead in warheads, but let me remind the Senator it takes almost the whole day to put a warhead on and get it accurately aimed at the target. So I do not buy this nonsense that we have more warheads.

Mr. WALLOP. I do not buy it either when other factors are considered, especially when we start counting warheads among those in the Poseidon submarine which rely on satellites to be delivered accurately and when we now know that the Soviets have an antisatellite capability.

So I agree with my colleague from Arizona that while we lead in numbers it is small comfort.

By itself, the B–1 cannot redress the balance. But it can help. Congress was dissuaded from building it earlier this year by the administration's claim that because one B–1 bomber costs as much as 200 cruise missiles, $24 billion spent on cruise missiles, rather than on B–1 bombers, would buy us more defense. But it has since bcome clear that the administration does not intend to buy 200 cruise missiles for each B–1 not built, but only about 10.

And we are negotiating away the capability of it in the first place.

One thing is crystal clear: This Nation must not negotiate itself into a position of inferiority. We cannot give up the B–1 and limit the range of cruise missiles.

The PRESIDING OFFICER. The Senator's 4 minutes have expired.

Mr. WALLOP. Mr. President, will the Senator yield me an additional 1 minute?

Mr. YOUNG. I yield 1 additional minute to the Senator.

The PRESIDING OFFICER. The Senator is recognized for 1 additional minute.

Mr. WALLOP. If there is going to be a negotiated limit to the range of cruise missiles, the United States must be able to attack the Soviet air defenses which can now keep existing launch platforms from penetrating to significant Soviet targets. Our bombers have to be able either to get to their targets or to get within range of the cruise missiles they carry. Since the Soviets, unlike ourselves, have not dismantled their air defenses but have improved them, only a strategic bomber such as the B–1 can deal with them by both avoiding detection and fighting its way in.

There may be nothing sacred about our strategic triad. But the administration has been deprecating the usefulness of bombers in the name of cruise missiles and then negotiating away both the numbers and the flexibility which make the cruise missile useful in the first place.

I suggest, Mr. President, that our strategic inferiority will take on catastrophic proportions unless we change our course. We need the B–1 and the cruise missile.

I thank the Chair and yield back the remainder of my time.

Mr. STENNIS. Mr. President, I am authorized on behalf of the Senator from North Dakota to yield 2 minutes to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas is recognized for 2 minutes.

Mr. DOLE. Mr. President, I have listened to some of the debate in my office with the new sound system, and I have heard many fine statements.

Mr. President, today the Senate faces the responsibility of determining whether or not we should keep the B–1 manned bomber as a practical option in our strategic Triad defense.

A NECESSARY DETERRENT

Mr. President, the Senator from Kansas, as have many others, has supported the development of preliminary procurement of the B–1 in the past. In May of 1976, during consideration of authorization for procurement, I expressed judgment that the B–1 is a necessary element of our strategic deterrent that would help insure this Nation's second-strike capability. Mr. President, I do not see any reason to modify that position today.

MAINTAINING THE TRIAD

As most of us realize, the Triad concept clearly states that the United States will maintain three independent, but interdependent strategic nuclear forces consisting of land-based missiles, sea-launched missiles, and manned strategic bombers. Each of these components supports and complements the others in an attempt to complicate an enemy's defense planning and reduce his ability to launch a successful strike against this country. If we diminish or eliminate one "leg" of this three-prong defense system, we place a greater burden on the other two and increase our vulnerability.

Mr. President, our strategic policy is designed to deter nuclear war, to discourage conventional acts upon Western Europe or elsewhere, and to defend against coercive diplomacy. It is also designed to conclude any future wars on terms acceptable to the United States. Mr. President, the Triad is an essential basis for this policy, therefore, I am convinced that the B–1 bomber is an essential component of the Triad that must be developed to its fullest potential.

IMPORTANCE OF THE MANNED BOMBER

The manned bomber, as we have learned from experts, is the most accurate proven military system. It is a fact that it is the only U.S. weapon system that has actually been used under combat conditions, where it demonstrated its effectiveness and capabilities.

The Senator from Kansas wishes to emphasize three points related to the need for funding of the B–1 aircraft Nos. 5 and 6.

The need for fast escape for the manned bomber leg of the Triad will grow significantly in the coming decade of Soviet first-strike capability growth. As that grows ours must proceed. The B–52, with or without ALCM's, is not survivable against this threat over the long term.

Although the President feels he does not need leverage at the SALT negotiations, it is important for the Soviets to know that Congress is prepared to take steps to prevent the achievement by the Soviets of strategic superiority, regardless of the outcome of SALT.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. DOLE. Mr. President, may I have yielded to me 1 additional minute?

Mr. STENNIS. Yes. I yield the Senator an additional minute on behalf of the Senator from North Dakota.

The PRESIDING OFFICER. The Senator is recognized for 1 additional minute.

Mr. DOLE. Finally, quite apart from the alternate decision to deploy the force of B–1 bombers, it is essential to maintain an active development program in manned bomber technologies, especially in the areas of nuclear survivability and penetration for which these two aircraft will be used.

Mr. President, based on these three specific areas, in addition to the many others that have been stated and considered by the committee and by those who are directing this legislation on the floor, I certainly support the efforts now being made.

OUR NATIONAL DEFENSE

Mr. President, the Senator from Kansas believes a nation's strategic weapons force is something you plan for, hoping never having to utilize it. The only real test of your planning success would be ultimate ability to stabilize peace or to win a final victory in time of war.

This is an issue that goes beyond simple consideration of costs or special interests—it is an issue that bears directly on national survival. My own reasoning

and that of many of my colleagues leads to the conclusion that our defense interests are best served by maintaining a strong manned-bomber system.

Mr. President, the Senator from Kansas strongly supports the action of our colleagues in the House to keep the B–1 as a practical option in maintaining our strategic triad defense.

Mr. STENNIS. Mr. President, I am glad to yield 10 minutes to the Senator from Wisconsin.

The PRESIDING OFFICER. The Senator is recognized for 10 minutes.

Mr. PROXMIRE. Mr. President, I thank the distinguished chairman of the subcommittee and manager of the bill.

A TETRAD IS ENOUGH: B–1 IS UNNECESSARY

Mr. President, I have been listening for the last 45 minutes to the arguments on the side of those who would reject the President's recommendation and force the construction of two additional B–1 bombers. The issue they presented over and over again is that the President somehow is, and the Defense Department and the Chiefs of Staff are, trying to unilaterally disarm our country and weaken our country by following a policy that would make a weaker military.

Mr. President, this could not be farther from the fact. The fact is—and let us take a look at one particular issue—they argue we need a penetrating bomber, and that only the B–1 is the bomber that we have that can do the job, and that by rejecting an additional two B–1's we are turning away from the prospect of having a penetrating bomber.

Mr. President, before discussing what this debate is about, I will list those items that have been discussed but like the flowers that bloom in the spring have nothing to do with the case. We should get down to the true substance of the issue.

First, we are not arguing about production of the B–1 bomber. The issue is whether or not to spend $462 million in fiscal year 1977 funds that remain from an original appropriation of $1.16 billion. That appropriation was made before the President was elected and therefore obviously before he had an opportunity to review the B–1 decision and cancel it.

Of the $1.16 billion, $401 million already has been spent. Contract termination costs will account for another $297 million. This leaves the $462 million before us today.

The $1.16 billion total for fiscal year 1977 was to have produced three B–1 bombers. The plan now, however, is to drop one B–1 and only build two should the Senate and House refuse to go along with the President.

Instead of production line models, as originally planned, these two aircraft will be research and development planes. They will be hand-made in the same sense as the other four R. & D. aircraft.

But spending $462 million for these two B–1s will not be the end of the costs. It will require an additional $280 million to flight-test both aircraft over a number of years. Thus the real cost to the taxpayer, just at this moment, is $462 million plus the $280 million or $742 million. And, of course, this overlooks what the total cost of the two B–1s would be if the Senate and House refuse to back the President. If the full $1.16 billion previously appropriated is allowed to be spent and the $280 million of testing is added, these two B–1s will cost $1.4 billion or $720 million each. This would be the total program cost for these two aircraft.

The second issue we are not discussing or at least should not be discussing today is the question of need of a penetrating bomber in lieu of the B–1. Often overlooked in the B–1 cruise missile controversy is the other half of the President's strategic equation. Not only will we dramatically increase spending for the cruise missile program—by funds contained in this very bill—but we will upgrade and improve the B–52 fleet. The salient point about this upgrading is that at least one-half of the 300 or so top-quality B–52s, including the most modern H models and the older but improved D's, will be used as penetrating aircraft into the 1990's.

I understand that earlier the distinguished Senator from Iowa (Mr. CULVER) read a statement from the head of the Strategic Air Command, Gen. Richard H. Ellis, who testified as follows:

> So our opinion—based on the best evidence available—is that properly cared for and properly employed, our FB–111's and our latest B–52's can continue to be effective penetrators until 1987—and probably to 1990 or even beyond.

In other words, Mr. President, America will remain strong without the B–1. We will have the many advantages of a mixed force of penetrating bombers and cruise missile carriers.

In the face of our Nation's critical needs, we simply cannot afford to waste more money on B–1 production.

That point is well worth repeating, since it seems few people seem aware of this fact. The 150 G models will be used as cruise missile carriers with up to 20 cruise missiles each. But the 150 D's and H's will be used as penetrating bombers for missions deep into the hostile airspace.

Thus the question is not that of canceling the B–1 and therefore dropping plans for any kind of penetrating bomber. The question really becomes what do we replace the penetrating B–52's with when they wear out in the early 1990's?

As to this point there is a difference of opinion. Some argue that we should then produce a new penetrating bomber, the FB–111H or some other version. Others argue that we can replace the penetrating B–52's with the new wide-bodied jet cruise missile carriers.

The point to remember about this debate is that this decision need not be made for several years. We are not now faced with the penetrating bomber decision—no matter what the pro-B–1 lobbyists state.

Along with this penetrating bomber controversy is the question of the Triad. This is a third debating point that should not enter into this discussion. It should not enter into this discussion simply because the decision to proceed with two more B–1's has nothing to do with the Triad. The Triad is composed of sea-based missiles, land-based missiles, and the bomber force. Doing without the B–1 is not doing without a bomber force. We will continue to have at least 300 upgraded B–52's flying into the 1990's. And supplementing that fleet, which by itself is twice as many long-range bombers as the Soviets have, is our fleet of 65 FB–111's.

These existing FB–111's can penetrate Soviet defenses and strike at thousands of important targets in European U.S.S.R. but they cannot attack into the heart of the Soviet Union. That job is reserved for our longer range B–52's and our sea- and land-based missiles. Each element of the Triad complements each other element but as Secretary Schlesinger has stated they need not and should not be duplicative.

In a very real sense the President's decision to emphasize the cruise missile has provided increased punch to the Triad. You could argue that there now is a fourth leg of the "Triad." Maybe it should be renamed the Tetrad to follow the Greek roots we used in Diad and Triad.

In any event the Tetrad is very real. Not only do we have the penetrating manned bomber but now we have an entirely new offensive force based on characteristics distinct from any other element.

The cruise missile uses saturation since it can field great numbers for a cheap price compared to the manned bomber. It is more difficult to detect than the manned bomber. According to the Department of Defense:

> If there were no other factors, a radar could detect the B–1 at 5 to 10 times the range that it would detect the cruise missile. However, at low altitudes a radar's line of sight is very limited. At short ranges a large difference in radar cross section is not a factor. Instead the primary consideration is that the cruise missile is small enough that radar return from ground objects obscures the cruise missile. While there are radar solutions to the problem, present radars (enemy as well as domestic) have been designed for aircraft detection and the very low cruise missile radar cross section will probably require a new generation of radars to provide a satisfactory detection capability.

One final point needs to be made on this subject of the penetrating capability of the B–1 versus that of the cruise missile. The B–1 depends to a great extent on the electronic countermeasures that it carries. Electronic countermeasures come in two basic varieties—passive and active. Since nearly everyone agrees that passive effects do not provide sufficient protection, it is the active countermeasure capability which provides the protection for the B–1. This capability carries with it a measured danger, for the emission of radiation by the electronic countermeasures to mask the position of the aircraft also invites detection. Electronic countermeasures can work both ways. Since they emit radiation, that radiation can be detected and traced back to the aircraft thus giving away its position.

Another often heard argument is the statement that we need to complete air-

craft 5 and 6 in order to finish critical research and development testing and to keep the production line warm in case the SALT negotiations break down.

The simple and most straightforward answer to this argument is that it is completely denied by the Air Force and Defense Department—military and civilians alike.

But perhaps the point deserves more attention. First, do we need aircraft 5 and 6 for further R. & D. testing? The answer is no. The concern over electromagnetic pulse-testing can be satisfied by using R. & D. aircraft number 4. We do not need two more aircraft for that purpose. Furthermore none of the critical testing described by B–1 proponents needs to be done at all until a final production decision is made.

Do we need to protect the production line in case the SALT negotiations break down? Well, while it is always prudent to keep options open in tough negotiations, the building of two more B–1's does not contribute substantially to this goal. At most, it would give us a 6-month head start on a 4-year program. However, if there is any reorientation of the B–1 itself; that is, changes in its mission to a cruise-missile carrier or to a cheaper version—that this 6-month advantage disappears and is replaced by a longer development period. Therefore when pro-B–1 supporters argue that the B–1 can be turned into a cruise-missile carrier, they are really putting forth an argument that would delay the B–1 program and force designers to go back to the drawing boards for a significant period of time.

Now this brings up the issue of the B–1 as a cruise-missile carrier. I presume it should be expected that as soon as the Air Force expected its interest in a cruise-missile carrier, the B–1's developers would come up with a cruise-missile variation. Therefore, I asked the Secretary of Defense about this new plan by Rockwell for turning the penetrating B–1 into a cruise-missile carrier.

The Pentagon replied that for equal effectiveness over 20 years in constant dollars, the B–1 cruise-missile carrier is 60 percent more expensive than a wide-bodied jet cruise-missile carrier and 20 percent more expensive than a B–52 cruise-missile carrier. For equal effectiveness the B–1 would cost $17.7 billion over 20 years while the B–52 would cost $14.8 billion and the wide-bodied jet would cost $10.9 billion.

But would not the B–1 be more effective in this role than the older B–52? Not according to the statistics made public by the Defense Department which are calculated, as I said, for equal effectiveness forces.

If that is not enough to convince a skeptic there is an equally powerful case to be made in terms of destructive capacity. By converting some B–52s to cruise-missile carriers, the equivalent megatonnage of the bomber force will increase by 15 percent while the number of warheads will increase by 85 percent. This means that overall bomber force effectiveness will increase by about 40 percent by using the B–52s as cruise-missile carriers.

Mr. President, I would like to make one last point before I close. Concerning the issue of the 300 mile air defense barrier and the ability of the cruise-missile carrier to launch its missiles before detection and destruction, the 300-mile barrier is an intellectual construction. True, it has a solid basis in statistical assumption but it also has its weaknesses. This barrier, to be constructed of very advanced Soviet airborne radars, picket aircraft, interceptors, ground radars and missile systems, both airborne and land based, is far beyond Soviet capabilities at the present time and for the mid-term. But even assuming the Soviets do produce such a barrier, there are ways to penetrating it. We could penetrate it at points of weakness just as the $50 billion current Soviet air defense structure has significant points of weakness. We could penetrate it with force, by using long-range aircraft to accompany the cruise-missile carriers. We could penetrate by stealth, by confusing the enemy radars and ground coordination techniques.

To assert that this imaginary barrier is a real barrier is akin to believing in the electronic battlefield in Vietnam. Some parts are true but in practice there are ways to get around it.

What this means, therefore, is that the arguments that the 1,500-nautical mile limitation on the cruise-missile range and the point that this does not take into account actual flight paths, are not as important a consideration as presently believed. As Soviet air defense forces our cruise-missile carriers further and further from the Soviet borders, the limitation will have to be raised and, in fact, since the limitation is contained in the proposed Protocol with only a limited time period, that eventuality already has been planned for.

Now, Mr. President, I believe I have covered many of the arguments heard here today and shown why they are extraneous to the debate. The real reason for this debate is the lobbying work of the defense contractors and Rockwell International, in particular. I understand their reasoning. Business activity is at stake. It is a fact of business life that they must fight for their own programs.

In face of the strong recommendation of the chief of staff of the Air Force—contained in his letter to the chairman of the Armed Services Committee—and the statements by the President, Secretary of Defense, Secretary of the Air Force—in fact all the major civilian and military leaders of the Defense Department—in the face of this overwhelming opinion, I do not believe the course of this country's national defense should be forged by one defense contractor.

Mr. President, I want to thank the distinguished Senator from Mississippi. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. YOUNG. How much time does the Senator want?

Mr. HATCH. I would like 15 minutes.

Mr. YOUNG. I yield 15 minutes.

The PRESIDING OFFICER. The Senator is recognized for 15 minutes.

Mr. HATCH. Mr. President, we have before us today an issue that is crucial to the security of this Nation for future generations. In June of last year, President Carter canceled the B–1 bomber production program. In doing so he eliminated the finest plane in the history of avionics. This cancellation was done to make good a campaign promise that Carter, the candidate, had made earlier. I think that it would be safe to say that even the opponents of the plane were shocked at his decision. As late as the day before the cut, Secretary of Defense Harold Brown indicated that he felt that the President would approve at the very minimum a limited production order. However, pressures from within the White House from aides that have opposed the B–1, seemed to prevail at the last minute, and he decided to abandon the B–1 and go with the cruise missile instead. This is not to say that he had abandoned the concept of a need for a manned bomber with the ability to penetrate Soviet air space. Shortly after his decision to cancel the B–1, there arose some amount of support for a stretched version of the FB–111 as a replacement for the B–1. At this time the administration has apparently dropped the idea of adapting the FB–111 to fill the role of a penetrating bomber.

We are now faced with a decision of whether or not to continue the development of the B–1 so that we might keep our options open on this plane. In the supplemental appropriations bill for fiscal year 1978 there is contained the funds to build planes 5 and 6 for continued research on the B–1. The House has already voted to continue this development and the Senate should follow suit. With the elimination of the funding for the FB–111 in the fiscal year 1979 defense budget, it now becomes imperative that we continue with the B–1 as the probable successor to the B–52 in the manned bomber concept of our Triad defense system. A vote for the B–1 prototypes 5 and 6 would not be a vote against the administration, for it is clear that last summer the President intended to keep this option open, especially now that we are in the final stages of the current round of SALT negotiations with the Soviet Union.

At the present time the United States is lagging behind the Soviet Union in many areas of strategic importance. The cancellation of the B–1 has produced a gaping hole in our defense posture. The administration has decided, for the time being, that we will go with the cruise missile as our main line of defense. I am concerned that this will not be sufficient in the future. The cruise missiles will be launched from a mixture of B–52's and a variety of commercial wide-body aircraft. With the range restrictions that have been mentioned in the news about SALT, I am concerned that the cruise missiles have been rendered substantially harmless. I should not have to remind Senators that the Joint Chiefs of Staff had recommended that the range for the cruise missile be extended to 3,000 kilometers and then increased to 3,500 kilometers at the time the B–1 was cancelled. I compare these missiles to the V–1 rockets, more commonly known as buzz bombs,

used by Germany against England during World War II. These were largely ineffective, and although it is true that these were nowhere near the advanced cruise missiles that we are capable of producing today, neither was the defense technology that England used near the technology in air defense systems in use today.

These arguments are all avoiding the real problem that we are faced with. For some time the United States has been committed to a three-pronged system of defense known as the Triad. This includes our land-based intercontinental ballistic missile (ICBM) force, our submarine-launched ballistic missile (SLBM) force, and our manned bomber force. The manned bomber force is the only one of the three that has the ability to be flexible once the system has been initiated. You cannot call back an ICBM once it has been launched. For this reason I think that everyone will agree that the United States must continue to have a manned bomber in its defense plans, and I also think that all will agree that the B–52 is now at a point that we must consider some sort of alternative.

It is my contention that the B–52 no longer provides us with the type of manned bomber that this Nation needs to insure its national security. It is not designed to be a penetrating bomber, and the future plans to use it as a standoff launching platform make it basically a one-use plane. With the continuing improvement in the methods of air defense, the possibility that the B–52 will be forced further and further away in its standoff position becomes very real. At the present time the Soviet Union is in the process of adapting certain classes of Migs to shoot down cruise missiles, and it would not seem illogical to assume that they would be assigning fighter interceptors to engage the B–52's at the earliest moment. As the B–52's are forced further away from the Soviet borders, the range of the cruise missiles is shortened with respect to targets they will be able to strike within the Soviet Union, which correspondingly will provide the Soviet Union greater response time to combat these cruise missiles.

I might add that for these purposes the cruise missile cannot be flown in a straight line. It has to go in a weaving pattern, with ducks and decoys and everything else, in order to be able to get in there; and, especially within the 2,500-kilometer range they are going to enforce on us as a result of these SALT II agreements, this means we will have essentially a toy rocket.

Reports in the media this past month have indicated that the Russians are currently adapting certain classes of Migs to shoot down cruise missiles. This increased response time will greatly increase the percentage of cruise missiles they will be able to destroy before they reach their target. The B–1, on the other hand, would not be subject to the same restrictions. The B–1 is able to fly in a low-level attack pattern, below Soviet radar detection, projecting a much smaller radar blip than the B–52 should it be detected with the ability to make supersonic speed dashes, and therefore penetrate Soviet airspace and launch its payload possibly before detection. This airspace, I might add, is the most heavily defended in the world with 2,700 fighter interceptors on alert and over 12,000 surface-to-air missiles, called SAM's, deployed. Intelligence reports further indicate that the Soviets are developing a hypersonic missile as a specific defense against cruise missiles. This only increases my concern that these cruise missiles be launched in a manner allowing the shortest possible reaction time.

Today we will be considering whether or not to appropriate the $462 million for the production of planes 5 and 6 in the B–1 development. In the original proposal, it called for the production of eight test planes. I am convinced that we need to continue the production line of the B–1. To terminate this phase of the program would be to slam the door on the future reconsideration of this plane. Startup costs, once the production line is shut down, would be prohibitive. Economically it will be more beneficial for the Government to continue to employ the people who produce the B–1. I am talking about the aerospace industry, an industry already crippled with massive cutbacks, an industry that is on the verge of seeing many companies collapse. We here in the Congress make a point of showing great concern over the rising unemployment rate, yet we are now forcing a great number of people out of work by cutting back a contract that by all rights should be honored. I find the kind of logic that would have us introduce the Humphrey-Hawkins full employment bill, a bill designed to have the Government put people to work on make-work public projects, at the same time we are deliberately forcing the private sector to place people on the unemployment roles, is baffling to me. So we do not spend the $462,000,000 on the B–1 prototypes, but we will be forced to spend that money in unemployment benefits, loss of tax dollars, and in the overall depression of the economy in areas supported by the aerospace industry.

Should all of this occur, I think everyone in this country will suffer, and we might have repercussion effects throughout our economy that would be terrible. I could better understand it if the B–1 were not the greatest aircraft in the history of avionics, if it did not create the greatest concern as a deterrent force of any weapon on Earth; but since it does, to me it is almost ridiculous for us to sit here in Washington and provide another Washingtonian program, despite the fact that we know the alternatives do not work as this one does.

The economic factors are a mere side effect of this issue, but ones that should be considered. Yesterday I received a dear colleague letter from the chairman of the Armed Services Committee, the Honorable Senator from Mississippi (Mr. STENNIS), asking that I vote to rescind the funds for planes five and six. Senator STENNIS indicates that he has been a long time supporter of the B–1 and for that reason he voted to retain the $443.4 million for research and development included in the fiscal year 1978 defense budget and that he will also support the $105,000,000 being asked for in the fiscal year 1979 defense budget. In his esteemed opinion this will suffice in keeping our options open on the B–1. I hate to do so, but I have to disagree on this matter. Once we close the production line on the B–1, then we have said the final words on this plane. Oh, I will admit that we will eventually have to replace the B–52, but let us face the problem down the road. We all know that we would then be forced to begin development again on another bomber—one that will force the deployment date even further back. While we debate this issue, at this very moment, somewhere in the Soviet Union, workers are producing another Backfire bomber for the Soviet Air Force. They have not wasted years of research and money by saying it costs too much. They have not set a price tag on their national security. But we continue to do so.

I might add that our SALT talk negotiators are arguing that we are going to allow the Russians to do that on the basis that that plane is not strategic and because the Russians have given us a promise that they will not deploy the Backfire bomber in a strategic fashion. That ought to give everybody a lot of comfort in America, as they continue to produce at least two and a half of those a month.

Mr. President, I support the funding of planes five and six because I feel that it is now up to the Congress to show some backbone in the area of national security. We are quick to fund billions of dollars for one social give-away program or another, but unless we start paying a little more attention to our national security, we run the risk of not needing to worry about any social programs at all. We in Congress must stop the present trend that has developed in the past year. We need only examine our defense program of a mere 15 months ago to see how far down the road we have gone. At that time, the U.S. appeared to be moving in the right direction, moving to overcome the areas where we had fallen behind the Soviet Union.

First. The MX program was on schedule with a projected deployment date of 1986;

Second. Both the air-launched and sea-launched cruise missile programs were proceeding in a satisfactory manner;

Third. The Trident submarine was moving ahead in a smooth manner, and

Fourth. The B–1 bomber was getting close to a production date, along with the plans to improve the SRAM missile for the B–1.

Where have we gone in these 15 months? I think that the answers will cause you to ask some questions.

First. The MX program has effectively been slid back 2 years. There is continuing debate about whether or not to develop the missile at all.

Second. The competition on both the ALCM and SLCM is still incomplete and through the SALT negotiation, we have apparently accepted range restrictions upon them when they are finished.

Third. The Trident submarine has run into massive cost overruns, which threaten the funding for them, and,

Fourth. The President has canceled the B–1 and along with that went the improvement in the SRAM for the B–1.

In 15 short months, just a little over 1 year, this Nation has succeeded in gutting our strategic defense programs. We have placed ourselves in a position where we need SALT more than the Soviets. With all these cuts, we have received no assurance of a single cut from the Soviet Union. Now is the time, it seems to me, for Congress to stop this madness. The B–1 is a system that the Congress funded in the first place, and one that the Congress should maintain in the future.

Mr. President, it is time that we in this Nation quit projecting every new weapons system we develop for 10 years away. The crisis that we may face could well come in the short term. At the end of 1982, the Soviet Union will be at the end of a deployment cycle, putting them at their strongest strength in their history. At the very time that I am standing here speaking, the Soviet Union has, waiting in the wings, a new generation of ICBM's. Four new ICBM's—the SS–21, SS–22, SS–23, and SS–24 are now in the development stage. They are also continuing the development of a new heavy, long-range bomber, one with a longer range even than the Backfire. They are about to deploy a new, modern, heavy submarine in the Typhoon class and a new submarine-launched ballistic missile to go with it. All this plus a multitude of new tactical and conventional weapons. They will accomplish this while the United States continues to muddle around trying to decide which program we will continue with and which we cannot afford.

Mr. President, I have before me a letter that was addressed to the chairman of the House Armed Services Committee, the Honorable MELVIN PRICE. This letter comes from Mr. John W. Taylor, editor of "Jane's All the World's Aircraft," dated January 23, 1978, it is an extremely up-to-date letter, and an important one. In it, he discusses the B–1 airplane. Attached to this letter is a statement on the B–1 that Mr. Taylor asked to have entered into the hearing record in the House. I should like to read this letter to my colleagues:

DEAR SIR: I understand that the House is about to begin hearings on the strategic position of the United States—a subject which is of the very greatest importance to everyone desirous of maintaining world peace.

Clearly, no non-American has the right to interfere in such proceedings. However, I thought it might be helpful for the members of your Committee to know how many people in Europe feel about the current debate concerning the future of the B–1 bomber programme.

I am, therefore, taking the liberty of enclosing a short statement of my views on the B–1, and alternatives. If you consider such a course admissible, I should be grateful if you would enter this statement as evidence for your discussions. Be assured that its sole purpose is the maintenance of peace throughout the world, and in no way is it intended as a criticism of decisions already taken by your Administration. As a Christian, with friends in almost every country in the world through my association with JANE'S ALL THE WORLD'S AIRCRAFT, for more than 20 years, I wish only to see a true balance of power maintained between East and West. This must eventually lead to that stability, peace and friendship which we all desire so strongly, and which is worth any price to attain, to ensure the safe and happy future of our children and grandchildren.

Our thoughts and prayers will be with you as you debate these vital issues.

Yours sincerely,

JOHN W. R. TAYLOR.

B–1: THE ALTERNATIVES

President Carter's decision to cancel production of the B–1 bomber, and to put increased emphasis on cruise missiles, was hailed by some people as a decision in favour of the less costly of two equally effective weapon systems. This is a fallacy. In its long-range strategic form, the cruise missile must be launched from a carrier aircraft; the B–1 was intended to be that aircraft.

The SALT protocol negotiated subsequently by the US and USSR restricts the range of the air-launched cruise missile to 2,500 km (1,350 nautical miles). This limitation enables the Soviet Union to predict the few areas from which it would be viable to launch the missile against specific targets inside its borders, and to concentrate its defences accordingly.

At the present time, the Soviet domestic air defence force is reckoned (by DoD) to have 2,540 piloted interceptor fighters, 12,000 surface-to-air missiles on 10,000 launchers, and 6,500 surveillance radars. The interceptors include MiG–25s (Foxbat-As), the fastest combat aircraft deployed by any air force in the world. This defence system—battle tested in miniature in Vietnam and the Middle East—would not only have to be approached by the cruise missile launch aircraft, but would have to be penetrated by the missiles themselves. Yet published comments by US officials suggest that, in their present forms, cruise missiles fly at subsonic speed, lack effective ECM, are incapable of taking evasive action, and are intended primarily for use against undefended targets. Where are such targets in the USSR? Are not the alternative attack methods inherent in the B–1 (e.g. with SRAMs and free-fall weapons) a valuable insurance against future shortcomings of the cruise missile in an operational environment?

Four possible vehicles for the air-launched cruise missile have been discussed:

1. An uprated B–52. The B–52 has been a superb aircraft but, as a design, is now more than 20 years old. Who drives a 20-year-old automobile as his work vehicle? The B–52 was designed to drop free-fall nuclear weapons from a great height. In no way can its well-used airframe be expected to go on flying through turbulence at very low altitude (the optimum launch height for a missile attack) for another 20 years.

2. The FB–111H. This projected 15-foot stretch of an existing FB–111A airframe would be refitted with two of the engines developed for the B–1. The suggested force of 65 FB–111Hs would cost at least $3.3 billion, for which SAC would gain not one additional airplane in its inventory. Nor could the FB–111H ever be a B–1. There is not even proof that it would work.

3. The B.747/DC–10 carrier. The simple answer to whether conversions of a commercial wide-body transport would prove viable is to ask any SAC crew if they would relish flying such an aircraft—with its huge radar signature—towards skies patrolled by Foxbats, in order to launch their missiles. This is the still-costly solution proffered by a computer, incapable of thinking like a man.

4. The B–1. Designed for the task, and capable of penetrating any known defense system. Much of the development cost has already been committed, with outstanding flight test results. There is little doubt of how much the Soviet Air Force would welcome such an airplane in place of its own formidable Tu–26 (Backfire) supersonic swing-wing bomber, of which there are already more than 100 in its growing force. Nor should the potential maritime role of the B–1 be overlooked in view of the great size and efficiency of Soviet sea power. The B–1 is large enough to carry every type of air-launched weapon now existing or likely to be developed into the 21st century.

In conclusion, it should be borne in mind that when the Royal Air Force lost the TSR.2 bomber, of which a prototype was flown successfully in the mid-sixties, it lost all future claim to the strategic capability that had been the heart of its tradition since World War I. Soviet ICBM development threatens to eliminate 90 percent of the U.S. Minuteman force in any first strike. It may not be long before the locations of every missile-launching submarine are permanently pinpointed. Unless the USAF has an airplane in the class of the B–1 (and it is unique in its class) America may lose the third and last component of its strategic Triad. Only the balance of power represented in the West by the Triad has kept the world free from the unimaginable horrors of a nuclear war for more than thirty years. Before condemning the B–1 as too costly, it is essential to answer the question "How much is it worth to stay alive?" Only then do we appreciate what might be the ultimate alternative to the B–1.

The PRESIDING OFFICER (Mr. ANDERSON). The Senator's time has expired.

Mr. YOUNG. Could the Senator finish in 1 minute?

Mr. HATCH. I believe I can. If not, I shall ask unanimous consent to have the remainder printed.

Mr. Taylor presents a very strong and forceful argument that the B–1 bomber should be maintained. I could read this letter from MELVIN PRICE, of course. I should read the other part, but my time has expired.

I think that this letter and attached statement, and I call attention again to the currentness of the letter, should demonstrate the overwhelming need for continued production of the B–1. The President was wrong when he canceled the B–1 and it is up to Congress to try and right that wrong. It is up to Congress to try and prevent every American from suffering from one man's mistake.

In conclusion, I want to make one point clear at this time. We have fallen behind the Soviet Union in terms of strategic strength. The same people that have been arguing that we were ahead in the past are now beginning to admit that we are, in fact, behind. These same people are going to begin telling us that we must sign the SALT treaty or we will fall even further behind. Well, who was it that took this momentum away from us? Who was it that caused us to fall behind? If you vote against the B–1 today, then you have no right to stand up in the coming year and tell us to ratify the proposed SALT treaty because it is the only way to prevent the Soviets

from increasing their strategic advantage.

The PRESIDING OFFICER. Who yields time?

Mr. SCHMITT. Mr. President, may I have 5 minutes?

Mr. YOUNG. Make it 4, if the Senator can.

Mr. SCHMITT. I may even do it in 3.

Mr. President, this issue has already been before us and I have consistently supported the continued production of the B–1 aircraft numbers 5 and 6. I felt that it was important to complete aircraft 5 and 6 when we considered this issue earlier. Today, however, it is imperative that the production be continued. It was argued earlier that the B–1 bomber was not critical for our national defense because of the advances in the cruise missile. Now we are slowly learning that many aspects of the cruise missile are not substitutes for manned bombers, no matter how important that system is—and I agree that it is important.

In addition, many advantages of our cruise missiles are being bargained away in the SALT II talks, as has already unilaterally been bargained away the B–1 bomber itself.

At the very least, the early aircraft of the B–1 series will provide critical test data as we develop improved bomber concepts for the near future.

The tests involving electronic counter measures will include tests in the new Trestle facility at Kirkland AFB in Albuquerque, N. Mex. Such tests are critical to future weapons development.

The consequences of the President's decision to cancel production of the B–1 bomber will have many extremely serious military, technological, and economic consequences which I tried to point out in July. We cannot expect our allies to have confidence in our ability and willingness to come to their defense when we are compromising our own security.

The survival of freedom on this planet requires that one free nation, the United States of America, must remain obviously and visibly stronger than all other nations, but must never use that strength or freedom has lost.

The maintenance of strength without the use of strength will never be easy or cheap. However, strength must be maintained until new long-term relations between free and still developing nations can be created. It is ironic that, at a time when these new relations are being forged, we are compromising the strength that many countries are looking toward as a protective umbrella.

The United States must remain flexible in our diplomatic and military relations throughout the world. To make our foreign policy successful, it will take an efficient blend of tactical and strategic military systems and of policy for the use of those systems. It will also take an ability and willingness to establish relations based on trust and confidence. It will be difficult to convince the developing nations and our allies in the free world to have the confidence in our military ability if we proceed to unilaterally disarm ourselves.

The critical elements provided by the B–1 type aircraft are advanced weapons and defensive capabilities and the presence of man "in the loop." Obviously, it is important to advance the technology of our weapons so that they are known to be more effective than a potential enemy's abilities to defend against them. I emphasize the word, "known." The B–1 is more effective; the B–52, its purported substitute, is not.

In any conventional warfare situation, the B–1 offers twice the bomb load of the ancient B–52, plus much greater survival capability when faced with enemy defenses. In nuclear war, in combination with the cruise missile, the B–1 represents our most useful deterrent to enemy attack or intimidations.

The most difficult weapon system to defend against is the low-flying, manned aircraft. This is true for the Soviets and Chinese as well as for ourselves. For the next two or three decades, the manned bomber with the cruise missile on board will give the free world the edge in our race to survive and to survive as free nations.

The PRESIDING OFFICER. The time has expired.

Who yields time?

Mr. YOUNG. I will yield time to the Senator.

Mr. SCHMITT. Mr. President, the most crucial element in modern manned bombers is the combination of an advanced technology for attack and defense with the presence of man "in the loop." In our space program, the presence of man in the control loop of our spacecraft gave reliability and flexibility that unmanned spacecraft cannot duplicate. The success of our space program as compared to that of the Soviet Union is a direct outgrowth of our greater emphasis on man's inherent capabilities.

Our nuclear deterrent forces also require men in the loop as long as there is any chance of a peaceful resolution of a global confrontation between nuclear powers. A modern, airborne manned bomber is both a viable threat and a recallable threat. The cruise missile alone does not have these qualities.

Once again, it is imperative, especially in light of the future of the cruise missile as a deterrent, that we continue with the production of the fifth and sixth B–1 aircraft. The future of the free world may depend on the type of national defense that would be provided by both the manned bomber and cruise missile.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. YOUNG. I yield 5 minutes to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. STENNIS. Mr. President, I also yield 4 minutes to the Senator from Oklahoma from my time.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. BARTLETT. Mr. President, I thank the distinguished Senators for their generosity.

Mr. President, I am very pleased to talk on the B–1 bomber.

Mr. President, at this point, I do not believe that it is necessary to repeat a list of the merits of the B–1 bomber. Others here today have described them already. Even its critics recognize that the B–1 is the finest strategic bomber in the world. Nor does it make much sense to quibble over exactly what it will cost to maintain the option to restart production of the B–1 bomber. The figures are changing constantly. Costs have risen greatly since I introduced an amendment in the Senate Armed Services Committee designed to protect the fiscal year 1977 B–1 production funds from just the sort of "deappropriation" which is being attempted today. Even as we speak, even as the costs rise, even as the option to restart is endangered, the initial operating capability of a B–1 bomber force is being delayed. All of this has been made inevitable by the President's decision to terminate B–1 production.

Let us get to the heart of the matter. What is the Senate doing here today debating the merits of a decision made in 1976 when we should be discussing the merits of a budget for fiscal year 1979? The answer is simple.

President Carter made a personal decision to kill the B–1 bomber. It is reported that the announcement gave him great personal pleasure. Why such a difficult and important decision should be so pleasurable is unclear, and its wisdom is equally unclear. And that is why we are here today.

The wisdom of the President's decision has escaped a large percentage of the Congress and, each day, more evidence emerges which calls into question that decision.

The opponents of the B–1 bomber no longer focus on the merits of that aircraft, but rather they argue that time is running out for the B–1. And, that seems to be the President's strategy—to stall until the economic costs of restarting the B–1 are so high that the requisite number of votes can be obtained to deappropriate the funds for the B–1 following his failure to obtain support for a rescission. Apparently, the needed votes against the B–1 were not present in December. So here we are, at the beginning of a new session of Congress, deciding whether or not to take back funds authorized and appropriated two sessions back.

Driving up the costs of retaining the option to produce the B–1 bomber directly threatens the B–1 program. However, the administration has also taken several indirect approaches to kill the B–1 bomber. Recognizing that the air launched cruise missile, which would have been deployed with the B–1, will, in time, be a significant and valuable weapons system, the Carter administration put forth a request for $90 million to purchase a wide-bodied jet transport to use as a test launcher for cruise missiles. The image of a jumbo jet on a strategic mission captured the imagination of many people and temporarily diverted attention away from the impact of the decision to stop production of the B–1.

However, the Research and Development Subcommittee of the Senate Armed Services Committee was not fooled by the smoke and very nearly did not fund the wide-bodied jet program at all.

In its fiscal year 1978 supplemental defense authorization bill, the administration requested $90 million for its wide-bodied cruise missile carrier, but the Defense Department could not tell the committee what type of cruise missile carrier they intended to buy. It could have been a McDonnell Douglas DC–10 or a Boeing 747, or a Lockheed L–1011 or a C–5A or some other airplane. The administration not only did not know what they would buy this year with $90 million, but they could not tell us what they would spend in fiscal year 1979 or how much the entire program would cost. Under cross examination, they could not testify how the money could be spent before the end of the fiscal year or even why the program should begin now and not later.

The administration was embarrassed to discover, again under pressure from the Research and Development Subcommittee, that a wide-bodied jet could be leased rather than purchased, a step which saved $40 million. However, the committee could not justify giving the administration the $50 million it still wanted. The fact that the administration got the $15 million it ultimately received, as opposed to the $5 million reluctantly recommended by the full committee, is a tribute to the ability of the leaders of the President's party in Congress.

President Carter's difficulty in persuading the Congress that he had alternatives to the B–1 was made even more difficult by a series of cruise missile test failures which underscored the fact that the President's alternative to the B–1 was to throw money at a series of R. & D. programs in an effort to create some alternatives. Actually, the cruise missile test difficulties were typical of programs in R. & D. and reflect, not on the promise inherent in the cruise missile, but on its experimental nature. These test problems, however, reminded the Congress that the B–1 had already overcome these hurdles involved in tests and experiments.

The viability of President Carter's R. & D. alternative to the B–1 has been further questioned by reports of major concessions to the Soviets at SALT which placed severe limits on air-, ground-, and sea-launched cruise missiles. For example, range constraints on the air-launched cruise missile will permit the Soviet Union to develop a "barrier defense" against standoff cruise missile launchers, especially the very vulnerable wide-bodied jets.

At the same time that it is placing these restraints on our cruise missiles at SALT, the Carter administration has also slowed down the MX missile, terminated production of the B–1, ended production of the Minuteman ICBM, and stalled the sea-launched cruise missile program. The land-based leg of the Triad appears in some danger in the early 1980's, and the sea-based leg lacks the responsiveness and flexibility required for a balanced strategic force. Given the importance that will be placed on air-launched cruise missiles in the late 1980's, it is amazing that the administration has appeared so willing to make cruise missile concessions at SALT and let the option to produce the B–1 escape.

I wish my colleagues could receive today the briefings I have received from the administration showing how the United States will become heavily dependent upon the air launched cruise missile to maintain the strategic balance in the late 1980's. Yet the ability of the standoff cruise missile launcher to overcome barrier defenses requires penetrating bombers to attack and divert those enemy defenses and to replace cruise missile carriers on strategic missions when those carriers become even more vulnerable and when the targets to be attacked are beyond the range of the cruise missiles.

The need for a new penetrating bomber force to replace the aging B–52's is no later than the late 1980's. Production of such a new penetrating bomber must start right away. There is only one plane ready for production as a penetrating bomber—that is the B–1.

The immediate need for a new penetrating bomber is further justified by the current force of Soviet Backfire bombers which is already half the size of the B–1 force originally proposed. Additionally, the current production rate of Backfires has been increased, and, by 1985 could reach twice the number of B–1 bombers originally planned.

Confidence in the President's decision to terminate production of the B–1 bomber was further undermined when testimony before the Armed Services Committee indicated that a "mixed force" of cruise missiles and manned penetrating bombers was more effective than a pure force of either system in penetrating enemy defenses. A "mixed force" prevents the enemy from optimizing his defenses against either cruise missiles or penetrating bombers.

In other words, for the cruise missile to reach its potential as a weapons system, it requires penetrating bombers.

The importance of a "mixed force" was underscored when the Air Force requested the administration to press for a new manned bomber, the stretched FB–111H. Clearly, a new manned penetrating bomber will be needed by the early to mid-eighties. The difficulty that the manned bomber creates for enemy defenses, along with the great flexibility that it adds to conventional and nuclear forces, and the stabilizing role its slow speed with great payload bring to the nuclear balance, make the case for a manned penetrating bomber clearly persuasive.

A careful examination of all of the evidence presented by the President in support of his decision to stop production of the B–1 bomber in midstream reveals no clear cut case for termination of the B–1, no evidence to justify creating such a gap in the middle of our strategic force structure of the 1980's and beyond. President Carter made a decision against the manned penetrating bomber, not simply against the B–1.

Against the advice of his military commanders, and, I believe, against the advice of his Secretary of Defense, the President issued his personal judgment against the penetrating bomber. Now he is attempting to vanquish from the new budget every vestige of manned penetrating bomber programs. For example, nowhere in the new budget is the alternative FB–111H to be found. Even the B–77 nuclear weapon, vital to all our bomber aircraft—tactical or strategic, will not be entering production as scheduled. This is probably because of the association of the B–77 nuclear weapon with the B–1 bomber. And again, this was a decision by the President made against the recommendations of his technical and military advisers.

So here we are, on the floor of the Senate, attempting to deappropriate funds authorized and appropriated 2 years ago, funds provided in a straightforward manner in accordance with the laws at that time. And why this belated action? Because the wisdom of a Presidential decision made 6 months ago is increasingly less clear to the Members of Congress.

Mr. HAYAKAWA. Mr. President, will the Senator yield?

Mr. STENNIS. I yield 2 minutes to the Senator from California.

Mr. HAYAKAWA. I thank the Senator from Mississippi.

Mr. President, I wish to say a word or two in summary.

The Senate vote was scheduled for last December 15. However, it was postponed by those favoring rescission due to the uncertainty about whether the Senate would have voted to agree with the House not to rescind these funds. We urge you again to join us in support of the action of our colleagues in the House to keep the B–1 as a practical option for our strategic Triad defense.

When the President canceled the B–1 program last June, many of us disagreed with him. Subsequent events raise further doubts as to the wisdom of his action. When the President canceled the B–1 program, he also stated that the B–1 would remain as an option for the next few years to meet the requirement of a future manned penetrating bomber. The Committee on Armed Services and Defense Secretary Brown have reaffirmed that commitment.

Today, the Senate has the opportunity to end this impasse. We believe that supporting the action the House has taken to assure production of B–1 aircraft 5 and 6 is consistent with the President's decision to maintain the manned bomber as a practical option for the next few years. This action is also necessary to insure the effectiveness and survivability of the Triad and our overall defense posture. We hope you will join us in supporting the action of the House.

The PRESIDING OFFICER. Who yields time?

Mr. YOUNG. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator has 2 minutes.

Mr. STENNIS. I yield 2 minutes to the Senator from South Carolina.

Mr. YOUNG. I yield 2 minutes.

Mr. THURMOND. I thank the distinguished Senator from North Dakota and the distinguished Senator from Mississippi.

Mr. President, I rise to speak in favor of construction of numbers 5 and 6 of the B–1 bomber aircraft. The House approved the building of these planes by a vote of 191 to 166 on December 6, 1977.

Mr. President, in my judgment, one of the most dangerous decisions made in this century in the national defense area was the cancellation by the administration of the B–1 bomber program.

CRUISE MISSILE NO B–1 SUBSTITUTE

Under no conceivable scenario can the cruise missile take the place of the B–1 bomber. By allowing this decision to stand, we will have knowingly chopped off one leg of our defense Triad, and in so doing, greatly weakened our strength vis-a-vis the Soviets in the 1980's and beyond.

If this country and its system of government is worth saving, then risking its survival for the sake of an annual saving of less than one-half of 1 percent of the budget is the height of irresponsibility.

We have already spent billions developing the B–1. It performs according to our needs, and the strategic capability it would give us is unrefutable. We need a manned bomber. We have developed the best in the world. Why not build it, even if in limited numbers?

KEEPS OPTION OPEN

Mr. President, approval of B–1 plane numbers 5 and 6 will preserve this high performance manned bomber as a viable option at least until 1980. It is true that building these two planes only provides a limited production base and a limited gain in research and development. However, it will extend our learning curve and keep key personnel on board for several more years. Most important, it enhances our option to produce these planes later if its need becomes more apparent, as I am sure it will.

Even if one accepts the argument, which I do not, that the cruise missile is a substitute for the B–1, we must realize that the cruise missile has not been fully developed and tested.

In doubt, in particular, is the ability of the cruise missile to go in and get the hard targets for which the B–1 was specifically designed. Further, it is the most effective bomber we could build and is a proven weapon system, unlike the cruise missile.

DEFENSE STRENGTH WEAKENED

Mr. President, actions such as canceling the B–1, slowing development of the MX mobile missile, ending Minuteman III production, the Panama Canal treaties, and withdrawal of troops from Korea amount to a retreat from reality and embracement of hopes rather than hardware.

The perceptions of U.S. strength and purpose are bad throughout the world. Now we in the Senate have a chance to send a real signal to the Soviets. Also, we need to tell the President we intend to be an equal partner in defense matters, and to let our SALT negotiators know we will not stand by and see our strength bargained away for a piece of paper.

We have as much, and even more, responsibility to the American people as the President in defense matters. Past experience has shown us that various administrations have not always been right in their defense decisions. I do not believe this one is right on the B–1.

Congress needs to assert itself and keep the manned, penetrating B–1 bomber as a viable option. We are just now modernizing our sea-based missiles with Trident. Our land-based missiles are old and increasingly vulnerable. Our mobile missile development is being slowed, and cruise missiles remain unproven. Every military man in authority will tell you that this country faces a dangerous period in the 1980's. Why, then, should we not maintain the B–1 as an option?

I urge the Senate to support plane Nos. 5 and 6 of the B–1, as the House has done. This Nation can afford whatever it needs in defense if we eliminate nonessential programs.

The Senate should not take one step, cast one vote, or miss one opportunity to let the administration, the Soviets, and the SALT negotiators know we intend to insist on a meaningful strategic force to protect this country.

Mr. STENNIS. Mr. President, I yield myself 5 minutes, and I ask to be informed when that time has expired.

Mr. President, this has been a very good debate, but I call attention to the fact that these matters were before the Senate just a few weeks ago. This whole matter of rescission, which was unanimously approved by the Appropriations Committee by 17 votes, with 6 later recorded in favor, came before the Senate and was unchallenged. That is the only reason there was no rollcall. The position was so strong that it was not challenged.

Nothing of a decisive nature or lasting substance has happened since that time. It has been back and forth somewhat, but all the votes taken by the Senate have been either the type I have just described or the 1978 money, the production money, was voted down on a rollcall vote of 59 to 36. I gave those figures this morning.

There still is an option—unmistakably, there still is an option—and will be an option as to the B–1, even if this money, this appropriation, is rescinded.

The President of the United States said so, according to a letter he wrote Congressmen last October, and I quoted that this morning. The Chief of Staff of the Air Force, who is the most knowledgeable single person on this entire matter and has the responsibility, the enormous responsibility in his official position, very definitely says that there is still an option and that he is interested in that option and that he is for it. He says that he wants to revive and continue the production of the B–1, but that he does not want this money spent in this way, and we are talking about $742 million—we might say three-quarters of a billion dollars.

This same Chief of Staff of the Air Force, the most knowledgeable man—and certainly he is as responsible as any man I know in Government—says that he wants what money he can get for the Air Force spent for the time being in other ways because he says that so far as these two B–1's are concerned the timetable of production would be changed only from 6 to 8 months to go and finish building them now and that change would be at the other end of the time spectrum, the mid-1980's or beyond.

But I would rather not undertake to give my testimony on it, nor to quote what he said. I would rather just read what Chief of Staff David C. Jones says himself in a letter dated yesterday.

I asked him to talk this entire problem over with me and he willingly did. I asked him to get the figures and then I asked him to put in writing in response to a written request by me just what his position was and how he analyzed it and what he wanted done.

I am going to read now just the concluding paragraphs. I sent every Senator a copy of this yesterday, so there would be no mistake about what the facts are and what the planning is of the man that we hold chiefly responsible.

He concludes:

Therefore, in a nutshell, my reservations about building 5 and 6 at such a high cost are that the advantages for the long term are marginal and for the near term, irrelevant—

Irrelevant advantages now and for the long term marginal, and we already mentioned those dates.

In sum, I do not believe that investing nearly three-quarters of a billion dollars to produce and test two more aircraft is the best use of the country's defense resources, particularly in the absence of a realistic expectation of production—

Meaning further production—

I do not question that, like a terminal patient, the program could temporarily be kept artificially alive. But the slippage and uncertainty in the B–1 program which have resulted from program and funding decisions convince me that the time has come—

And I call attention to this.

to call a halt to further investment beyond the 4-aircraft test program.

That is his test program.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STENNIS. I yield myself an additional minute.

And he is saying that now that is enough money to spend on the testing for research and development that is in the bill that we passed last year of $442 million for the further R. & D. work on the B–1 bomber in fiscal year 1978. There is a $109 million request in the 1979 budget for the same purpose.

Now back to General Jones' letter.

I am more concerned with our overall strategic posture than with any single weapon system. So long as the B–1 program remains shrouded in uncertainty, consuming funds without adding to capability and diverting attention from our broader strategic needs, I am convinced that it will be more difficult to focus our collective energies on the many critical issues pertaining to our strategic forces in the days ahead.

Sincerely,

DAVID C. JONES,
General, USAF, Chief of Staff.

I yield myself an additional minute, Mr. President.

This is what I call the best evidence rule.

I think he is the most competent man to pass on the situation we are now in overall about this weapon. He said certainly he is concerned with the strategic situation to which all of us are concerned, which has been alluded to this morning. But he says do not put your money there now on these two B–1's; put the money on these other urgent matters, leave this option open, and we will move from there. I do not know in which direction, but I warn now that this year we are going to have major debates, further debates about the strategic situation in air strength and also the sea forces.

Mr. President, I yield the floor for the time being.

The PRESIDING OFFICER. Who yields time?

Mr. HELMS. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. HELMS. Mr. President, as the United States proceeds into the final stages of delicate arms control negotiations, it is imperative that the Senate, in its advice and consent role under the Constitution, let the executive branch and the Soviets know that we want to keep open as many of our strategic options as possible.

The B–1 bomber is one such option.

In the past several months, the Carter administration has been closing off one option after another. Why? I really cannot find any logical reasons for these actions. Delay of the MX mobile missile. Delay of the sea-launched cruise missile program. Agreeing with the Soviet demand not to include the Backfire bomber as a strategic, intercontinental weapon—in the face of several studies and reports to the contrary.

And, of course, the decision to cancel the B–1 bomber program.

Does the administration think that the Soviets will respond in kind by taking similar initiatives? Does Mr. Warnke think that the Soviets will ape our actions, and unilaterally cancel their Backfire bomber program?

The undisputed facts show otherwise.

The Soviets continue unabated with their development and deployment programs for the Backfire, for a new generation of intercontinental missiles, and for air defense against our missiles and bombers. And, of course, their civil defense program proceeds apace.

Even if President Carter and the arms control advocates who direct current SALT negotiations feel that the United States can do without the programs which have been delayed or canceled, why take unilateral action? Are not these weapons systems—at least—proper bargaining chips in SALT?

For the protection of the American people and for our Nation's security, I do not feel that we can afford delay or cancellation of any of these systems. But, if Mr. Carter is going to take unilateral Executive action to delay or cancel these programs, why not something in return from the Soviets?

But the Soviets have not responded with concessions which protect our security interests. Instead, their response is to stand pat, talk hard and continue to amass what has become the largest and most powerful military machine in the world today.

Mr. President, it is time for the Senate to exercise its constitutional duty of advice and consent in the SALT treaty negotiations process. It is time for the Senate to tell the President and his arms control negotiators that the SALT treaties as now structured simply do not protect adequately the people of the United States. It is time to send the administration a signal that the Senate will not go along with a SALT agreement which is premised on unilaterally giving away some of our most advanced defensive systems while allowing the Soviets to continue with their development and deployment programs almost without restriction.

Therefore, Mr. President, I strongly support the position of the House of Representatives on maintaining the production capability of the B–1 bomber program for at least another year.

Perhaps, by that time, events will have changed and we will find that we do not need a B–1 bomber program. Or, perhaps, we may find that the Soviet development of its SA–10 air defense missile, with its advanced phased-array radar guidance system and superb propulsion characteristics, may have proceeded faster than originally thought—that, indeed, the SA–10 may even at this moment be deployed and operational.

What this could mean for the future of the cruise missile program of our country is sobering. Our first generation cruise missile, as yet undeployed, could be rendered ineffective by latest Soviet air defense developments. And, because cruise missiles will be limited in design and capacity by the current SALT treaty under negotiation, we well may find ourselves in the unenviable position of having to live with a treaty for 3 years which restricts our capability to overcome the effectiveness of the Soviet air defense system.

In such a situation, the United States would need a penetrating bomber and need it badly. In order to evade sophisticated Soviet air defense weapons systems, the United States would need a B–1 bomber. In order to penetrate and deliver our weapons on target, we would need an aircraft with the B–1's delivery characteristics.

Perhaps the Soviets do not have the SA–10 developed and deployed, as yet. The point is, the Congress does not know for sure. Nor do we know for sure what the SALT treaty now under negotiation contains.

Is it not a wiser course of action for the Senate to take to keep open the B–1 bomber assembly lines Nos. 5 and 6 and come back next year and review the decision taken today? If we vote today to keep open the assembly lines, we leave the American people with one more defense option. And we tell the administration that the Senate does not wish to have all of our options closed off, at least just yet.

Closing the assembly lines at this time will cost the taxpayers money and the American people precious time. Time that it will take to start up the assembly lines again if we later find that the Soviets have, indeed, proceeded with programs which force the United States to build the B–1.

Mr. President, a lot has happened since last June, when the President made his decision to cancel the B–1 program. The Soviets, we find, have continued their development and deployment program. The United States has unilaterally delayed or canceled major defense-related programs. Our SALT negotiations have made concession after concession to the Soviets.

The American people are waking up to the dangers of further weakening our strategic defense. In many ways, the House vote to build Nos. 5 and 6 may well reflect that growing sentiment.

We must keep faith with the American people. We must take those steps which are necessary to provide for the security of all Americans. We must not allow America to be put into an inferior position in its defense. We must preserve for the American people vital defense options.

We should, therefore, Mr. President, vote to keep open the B–1 assembly lines and build Nos. 5 and 6.

Mr. STENNIS. Mr. President, I yield 5 minutes at this point to the Senator from Maine, again thanking him for his splendid statement he made this morning.

The PRESIDING OFFICER. The Senator from Maine is recognized.

Mr. MUSKIE. Mr. President, I thank my good friend from Mississippi.

I have listened to his very persuasive argument just concluded. I shall only take a couple of minutes to underscore it. I have listened all day to the arguments of those who are on the other side of the issue. One of the reasons for building aircraft 5 and 6 is to keep the B–1 option open by keeping the production line open. But, Mr. President, my understanding is that there is no production line. The first four aircraft that have been built are R. & D. aircraft. They were not built by a production line committed to the B–1 program. They are R. & D. aircraft and they represent an opportunity to further refine and develop the B–1 concept, and indeed only plane No. 4 contained the defensive avionics package, which is perhaps the most critical single element in the B–1 program.

So aircraft 5 and 6 would not keep a production line open. There is no production line. There is an R. & D. line open, and the R. & D. line is open and would be continued.

In fiscal year 1978, the budget provided over $400 million in R. & D. funds; in fiscal year 1979, the budget contains over $100 million to continue R. & D.; and there is a program in the budget for the fiscal years 1980 to 1982 for which $300 million would be provided to keep R. & D. going.

So the B–1 option is going to be kept alive and healthy by the R. & D. program which is already underway and which will be continued. There is no production line for the B–1.

With respect to aircraft 5 and 6, which are the subject of this debate, two aircraft will not open a production line. No company in America is going to open up a B–1 production line for two aircraft. Those two aircraft would simply be added to the R. & D. program, and would be essentially handmade aircraft, and you do not need to spend $1 billion more to keep the R. & D. program going. It is already very much alive.

No one from the President on down, through every Member of the Senate wants to cut the R. & D. program, so the production line argument, as far as I can see, is a complete phony.

From a point of view of the Budget Committee, we have to be concerned with wasting dollars, not just wasting of all dollars available for Federal programs, but defense dollars.

If there is any Senator in this Chamber who thinks there is an unlimited reservoir of dollars for defense, I invite him to attend meetings of the Budget Committee as we consider the limitations on the resources available. There are limitations. We cannot afford to waste budget dollars for any purpose, and we surely cannot afford to waste defense budget dollars.

So I have listened to this production argument. It has been made by some very well intentioned Senators, and very able Senators, on the other side of this issue. But I have explored it, within the limit of the lines of communication available to me, and there is absolutely nothing to it.

If you want a production line for this B–1 program, you have got to make a decision to build not 2 aircraft but enough aircraft—and there are 240 aircraft in all that the proponents of this program advocate—you have got to make a commitment to a sizable number of aircraft to tempt any company to open up a true production line. There is none at this time.

I urge my colleagues to bear that argument in mind as we proceed to the vote on this issue.

Mr. President, there are some other arguments—I do not know whether I can have the time from my good friend, the Senator from Mississippi—that need repeating at this stage in the debate.

Aside from the points I have just made, Mr. President——

Mr. STENNIS. Mr. President, if I may interrupt, since the Senator used his time in complementing my argument, I want to yield him more time in his speech, and I yield 3 more minutes.

Mr. MUSKIE. Three minutes will be fine.

There are five basic reasons why we ought to support the President's decision on the B–1 argument:

First, the U.S. defense posture does not need any new manned penetrating bomber under present defense strategy. The supplemental appropriation which has been passed provides an initial $400 million for acceleration of the cruise missile program, B–52 modifications to adapt to that program, and a wide-bodied cruise-missile carrier as an alternative to the B–1 bomber. Surely we do not need both at this time. It is also less costly than the B–1 option.

We do not need the expensive B–1 to perform this particular strategic mission.

How long, may I ask, Mr. President, will the pressure be exerted on Congress to buy a weapons system we do not need?

Second, the $462 million involved in the rescission before us is only the beginning of further substantial funding requirements for the B–1. It is my understanding that up to $500 million more would be needed to complete fabrication of the fifth and sixth aircraft. The $462 million in the rescission will not do it, it will not cover fabrication of the aircraft, buy spares, and support equipment, and pay training and tests costs. Thus these two planes would cost close to $1 billion, not the $462 million in the rescission before us.

Third, the estimated cost for the fully armed 240-plane B–1 program is roughly $60 billion to $75 billion. It is entirely inevitable that if the President's decision on this rescission is not agreed to by Congress, the next step of the B–1 advocates will be on the full program, and a spending level of this significant amount built on the precedent of such a favorable vote. Everybody in this Chamber knows that what we are talking about is the first step toward a commitment to 240 planes at a cost of $60 to $75 billion.

If that is a decision that is ever made, it should not be made today, given the fact that the option is still alive without making such a commitment today.

Fourth, the second budget resolution assumed the B–1 rescission, and it means close to $200 million in outlay savings in the current fiscal year.

Fifth, failure to support the President adds $190 million to the deficit in fiscal year 1978, and $170 million more to the 1979 deficit or a total of $360 million.

Mr. President, we are going to be asked to consider additional defense expenditures, such as the Trident program, and building up our forces in Europe, and those two items together could add $100 billion to future defense expenditures above current policy.

There are not dollars to waste. If we spend those dollars unnecessarily here, we are going to reduce our capability to spend them for those programs and other high-priority programs coming down the pike.

Mr. President, recently the editor of Jane's All the World's Aircraft has stated that the West is doomed by the B–1 decision. His position is that cruise missile cannot replace the B–1. The apparent concern, as stated by the edtor, is the supposed inability of the cruise missile to penetrate Soviet air defenses as successfully as a B–1 can, that cruise missile technology is not up-to-date and consequently a gap would exist in the U.S. triad until the technology was modernized, and that the weapons delivery accuracy of the cruise missile is not as great as the B–1.

Mr. President, the Department of Defense has an entirely different viewpoint concerning these arguments for continuing the B–1. To begin with, the DOD has stated that the cruise missile program is considered one of the more successful test programs undertaken by the DOD. The Air Force air launched cruise missile (ALCM) program evolves from the SCAD program dating back to 1972 and earlier cruise missile research. The technology applied to the ALCM and the Tomahawk, the Navy version of the ALCM, is well tested. The engine has over 2,800 hours of various test time. The navigation guidance system has compiled over 2,200 fixes from various platforms.

The DOD response to the penetration and weapons delivery argument is that the cruise missile is projected to be equal to the B–1 in this regard and the cruise missile speed is virtually the same as the B–1 when actually delivering its payload. Further, the DOD expresses more confidence in the ability of the cruise missile to penetrate Soviet air defenses because of the small radar cross section of the missile as opposed to the ECM ability to defend the B–1 while it penetrates Soviet air defenses.

Mr. President, I believe the concerns of the Jane's editor, while very sincere, cannot stand up to the facts surrounding the potential capabilities of cruise missile technology.

I thank my good friend from Mississippi at this time.

Mr. STENNIS. Mr. President, I yield myself 1 minute here. I think the Senator from Maine is so correct in his predictions. We are going to have a merry time here discussing priorities in the military program during this session we are now in, and if these planes are ordered, the money turned loose and spent on them in the face of General Jones' testimony here, you had better look out, fasten your seatbelts, there will be a request for $1 billion for more B–1's at this sitting session.

Mr. MUSKIE. We may not be able to offord the seatbelts.

Mr. STENNIS. Well, that will be a new program that is added to our worries.

Mr. HATCH. Mr. President, will the distinguished Senator yield for a question?

Mr. STENNIS. I had promised the Senator from Georgia I would yield to him next.

Mr. HATCH. Just for a question.

Mr. STENNIS. Yes, I yield for a question.

Mr. HATCH. Mr. President, would my dear friend from Mississippi, my dear colleague, answer this question: Is the Senator aware that in testimony on the fiscal year 1978 defense budget, in those hearings before the Senate Committee on Armed Services, Gen. David Jones—this is something I want to clear up—who was at that time Chief of Staff, U.S. Air Force, made this statement and, as I understand it, General Jones' comments have been relied upon rather extensively here in these debates today:

Against the projected defenses in the very near future, the B–52 will not be able to penetrate adequately. So in order to penetrate you will need the advanced penetrating capability of the B–1.

It is my understanding that he made that statement.

I personally believe he is contradicting himself at this time.

Mr. STENNIS. I beg the Senator's pardon. I assume he made this statement if the Senator says he made it.

Mr. HATCH. He did.

Mr. STENNIS. Here is his entire letter. I sent the Senator a copy yesterday. He said he is still for the B–1, but he does not want this money spent at this time for the purpose in this bill. That is his position.

If the Senator will excuse me now, I want to yield 5 minutes to the Senator from Georgia.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. NUNN. I thank the chairman for yielding to me.

Mr. President, I stand as one who was for the production decision on the B–1. I also felt, and I continue to feel, if we were going to cancel the B–1, it should have been done in the context of SALT II.

I believe in quid pro quos with the Soviet Union when it comes to canceling major weapons systems; but I believe, with the Senator from Mississippi, that with the President of the United States having already canceled the B–1 program, and with the SALT decisions as far as the B–1 is concerned already by the board, to build planes 5 and 6, at a cost of $462 million plus, is unilatarily pointless and fiscally irresponsible. If we are going to keep these planes and be able to fly and test them, it will cost another $280 million. We are talking about spending a total of three-quarters of a billion dollars to build two airplanes that do not preserve any additional options in the future than we now enjoy.

We may reach the point, depending on the outcome of SALT II, the Russian strategic moves, and what we find out about the cruise missile and the cruise missile carrier, where we may have to go into a manned bomber program, and we could reach that point in the next 12 to 24 months. I do not know. But to build these two planes now, at a cost of three-quarters of a billion dollars, and not getting anything we will not have with the first four in the way of continued B–1 research and development and the technology for the B–1, we are really just taking three-quarters of a billion dollars and spending it for a very slight marginal increase in our B–1 capabilities—perhaps some increase, but very slight.

Even David Jones, in his letter to Senator STENNIS dated January 27, which our colleague Senator HATCH has referred to, makes it very plain that he continues to favor the B–1, but he makes it abundantly clear that producing planes No. 5 and No. 6, which we are voting on today, really does very little for our future options, and that, as many priority needs as we have in the defense budget this year, and perhaps others like naval shipbuilding programs, I think it is budgetarily unsound to take three-quarters of a billion dollars and spend it when it does not buy us much of anything.

General Jones, I think, says it best when he says:

> For example, just to manufacture 5 and 6 would cost at least the full amount of the proposed rescission, $462M. But unless we were to simply build and store the aircraft (certainly not intended), the estimate would go up by another $280M for OT&E funds to fly and test them.
>
> The R&D gains from this additional investment in 5 and 6 would be nominal compared to what would be available from continued effort with 1 through 4. Likewise, regarding the option for future production, building 5 and 6 would make only marginal difference for the date for Initial Operational Capability (IOC). Assuming a 4-aircraft baseline, it would take approximately seven years to reach IOC after funds were provided; with 5 and 6 we could advance this date only a few months.
>
> As a practical matter, since there are no B–1 procurement funds in the FY 78 appropriations or in the FY 79 budget, even an early reversal of the production decision would delay IOC until the mid to late 1980s. I believe that circumstances likely to trigger a sudden decision on production of the B–1 would spring from a world situation in which the increased capability would be required before the B–1 could become operational.
>
> Therefore, in a nutshell, my reservations about building 5 and 6 at such a high cost are that the advantages for the long term are marginal and for the near term, irrelevant.
>
> In sum, I do not believe that investing nearly three-quarters of a billion dollars to produce and test two more aircraft is the best use of the country's defense resources, particularly in the absence of a realistic expectation of production. I do not question that, like a terminal patient, the program could temporarily be kept artificially alive. But the slippage and uncertainty in the B–1 program which have resulted from program and funding decisions convince me that the time has come to call a halt to further investment beyond the 4-aircraft test program.
>
> I am more concerned with our overall strategic posture than with any single weapon system. So long as the B–1 program remains shrouded in uncertainty, consuming funds without adding to capability and diverting attention from our broader strategic needs, I am convinced that it will be more difficult to focus our collective energies on the many critical issues pertaining to our strategic forces in the days ahead.

So what we are talking about, Mr. President, is 2, 3, 4, or 6 more months of being able to accelerate production later if the decision were made to go forward with the B–1 program.

For that 6 months, we are going to spend three-quarters of a billion dollars, and I do not believe any fiscal conservative, when looking at the figures in this light, when looking at the marginal improved capability building planes 5 and 6 would give us, can rationally come to the conclusion that we ought to spend this money.

When so many other priority items have to be decided on this year in the defense budget, and to my mind some items will have to be added to the President's defense budget, this is just not a wise expenditure of funds.

I thank the chairman very much for yielding me time.

Mr. STENNIS. I thank the Senator from Georgia for the attention he has given to the problems we have in dealing with armament, personnel, and everything else.

I have a few moments remaining. I am glad to yield to the Senator from North Dakota such time as he may want.

Mr. YOUNG. I thank the Senator.

Mr. President, we are talking about $462 milion to produce these other two planes, Nos. 5 and 6; but what we are actually talking about is the end of the B–1 program. If it is defeated today, that is the end of it, in my opinion.

Mr. STENNIS. I thank the Senator very much.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. STENNIS. I have to yield a minute or 2 to myself. The time is virtually out. I have yielded 25 or 30 minutes to you people over there. Are you going to be voting with me?

Mr. SCOTT. I am going to vote against it. Just 1 minute.

Mr. STENNIS. I am glad to yield to the Senator from Virginia 1 minute.

Mr. SCOTT. Mr. President, the talk is of not building these additional B–1 bombers and utilizing the old B–52's. I saw in the newspaper the other day that we were going to mothball our first nuclear carrier.

It does not make sense to me to put a nuclear carrier in mothballs and yet say we are going to use the old B–52 bombers rather than build new B–1 bombers, and so I have to disagree with the distinguished chairman of our Armed Services Committee.

Mr. STENNIS. I thank the Senator very much. Mr. President, I wish to refer with commendation to the fine fight that the Senator from Utah (Mr. GARN) made this morning, and to quote him here with approval when he said that he would never contend that six bombers made a fleet that could be effective.

Some might think, well, six is better than four, and four is better than none, but he is our expert or one of them on this subject and knows what he is talking about. He is against my position here, but he said this morning in the debate that six of these bombers could not constitute a serviceable fleet.

I believe the time is about up, Mr. President. The Senator from Maine never hit a thing more accurately than when he said there is really no production line. The 1978 money was taken out of the bill on this floor by an overwhelming vote. There is no money requested for 1979. It is like a bridge with both abutments cut out. This old 1977 money is just suspended in midair.

Everyone was pretty well satisfied when we left here last October, but the winds blew in from somewhere and stirred this up again. I believe the Senate will stick by its former sound judgment on this matter, even though we are not all happy to be in this situation, and make these military dollars go as far as they will.

Mr. MUSKIE. Mr. President, the Supplemental Appropriations Act that we are considering today contains $200 million for assistance to low-income families faced with energy emergencies this winter. These funds would be appropriated to the Community Services Administration for use only during specific crisis situations.

Last year in response to the severe winter, Congress provided funds for a similar program through the CSA. That program provided assistance to more than a million families across the Nation. While the assistance came late, after the worst of the winter, it helped many needy people through a very difficult period.

This year, we had a chance to put this program in place before the cold weather hit. But because of controversy about other provisions of this appropriation bill and the resulting delays, we are again faced with the prospect of doing too little, too late.

Already the Midwest and Northeast have been devastated by vicious winter storms—scores of people have died and thousands have been forced from their homes.

The impact of this violent weather will, of course, be felt by all segments of the population. But we can be sure that those hardest hit will be those least able to bear the burden—the poor and the near poor.

The Federal Government has taken action to provide some relief. The Community Services Administration has authorized States to use up to 40 percent of their weatherization funds to provide special crisis assistance to low-income families. But even this is not enough.

Three States—Ohio, New York, and Kentucky—have already asked permission to use even more of their available funds for crisis assistance. And many States—all but one out of the New England States—have no available funds that can be diverted for this use.

The Community Services Administration estimated in the fall that 1.8 million low-income families would be cut off from natural gas supplies this winter. This estimate, which does not even include data for those families that heat their home with other fuels, serves only as a benchmark for the need that is likely to exist for this assistance program. One has only to read the newspapers to determine the real scope of need.

Mr. President, I urge my colleagues to take into consideration this program as they cast their votes today on the supplemental appropriation.

Mr. GARN. Mr. President, during the past weeks, many Members of Congress have expressed grave concern relative to the effectiveness and survivability of the strategic TRIAD and our overall strategic posture. This growing concern stems from concessions offered by the United States in the current SALT negotiations as well as the failure to proceed with our own strategic systems.

You are aware that I strongly encouraged the President for production of the B–1 bomber. Unfortunately, President Carter announced on June 30 that he was canceling B–1 production and in its place we would rely on cruise missiles. Of particular concern is the administration's lack of comment in relation to the current SALT negotiations. Even more alarming was the subsequent action in desiring to rescind the fiscal year 1977 funds for building the B–1 test aircraft 5 and 6. This is because events since the June 30 announcement have made it clear, even to our Commander in Chief that an effective manned penetrator option must be retained as a part of our strategic force.

Despite the unilateral decision by President Carter to terminate the B–1 production program there continues to exist today the requirement for a manned penetrating bomber in our strategic TRIAD of defense. This fact has been emphasized repeatedly by President Carter, Secretary of Defense Brown and the Department of the Air Force following the cancellation decision. This if further emphasized by the DOD efforts in adding a sizable quantity of money in fiscal year 1978 and 1979 to improve the B–52's penetration capability. The Department of Defense has even proposed buying reworked versions of the FB–111, to add to its penetration capabilities in the late 1980's and 1990's.

The requirement for a manned bomber has not gone away with the Carter decision, and it is still a fundamental factor in strategic planning for the following reasons:

It forces large expenditures of adversary resources to counter the penetration bomber capability. These are resources that might otherwise be concentrated on negating other elements of the TRIAD.

It provides full assurance of coverage of hard targets, deep inside enemy territory.

It provides real time on-site damage assessment of primary and secondary targets.

President Carter on June 30, 1977 made two points in his decision to discontinue plans for production of the B–1. First—

> The existing testing and development program now under way on the B–1 should continue to provide us with the needed technical base in the unlikely event that more cost-effective alternative system should run into difficulty.
>
> Continued efforts at the research and development stage will give us better answers about the cost and effectiveness of the bomber support system, including electronic countermeasures techniques.

The President's second point was:

> But this is a matter that is of so very great importance, and if, at the end of a few years, the relations with the Soviets should deteriorate drastically, which I don't anticipate, then it may be necessary for me to change my mind. But I don't expect that to occur.

The B–1 base production should remain a realistic option. If the President does change his mind, we will have the continuity of manufacturing skills, the subcontractors team, and the ability to meet in a timely and cost-effective fashion the option to restart. Procurement of planes 5 and 6, as the House has voted to do, will allow us flexibility while we evaluate the yet unproven cruise missile development and the outcome of SALT II.

In order to see why the manufacturing base for B–1 must be kept viable for the next 2 years until SALT II is reviewed and approved by Congress, several factors must be considered:

Fifty four percent of the total U.S. nuclear throw weight is carried by bombers. SLBM's do not have a hard target kill capability.

Minuteman force is estimated to be highly vulnerable to a new series of Soviet ICBM's by early mid-1980's.

B–52's average 16 years in age, some as old as 25 years; estimated to be highly vulnerable by mid-1980's because of size, speed, age.

Soviets have 10,000 to 12,000 radar guided air defense systems; the United States has virtually none.

Soviets have eight times more medium range bombers than the United States.

Soviets have twice the throw weight as the United States.

Soviets have 94 percent more nuclear tonnage than the United States.

Soviets have 78 percent more SLBM submarines than the United States.

Soviets have 51 percent more ICBM's than the United States.

Soviets have four new strategic missile systems in production and four more in R. & D.

Soviets are developing a new super Delta submarine for deployment.

Soviets are producing the Backfire bomber at a rapid pace—approximately 200 or more already produced/deployed.

Backfire bomber has more range than B–1 and 8 percent more range than B–52, with one refueling.

Soviet cruise missiles: Three or four versions are deployed; U.S. cruise missiles: ALCM–A is canceled, ALCM–B is in R. & D.; Tomahawk is in R. & D. and won't be operational until approximately 1982.

The B–1 is the most thoroughly tested aircraft ever flown—over 811 flight test hours and over 25 hours at supersonic speeds.

Costs, studies, recommendation and other factors:

Although individual cost of each B–1 seems high, its mission effectiveness/cost effectiveness are higher than all alternatives.

GAO told Chairman STENNIS—and apparently no one else—that for threat envisioned for the 1980's, the B–1 was more cost effective than B–52's, FB–111's and wide body cruise missile carriers. If anything, the threat envisioned has worsened.

Secretary of Defense and Chief of Staff Air Force have recently acknowledged higher cost effectiveness of B–1.

Secretary of Defense's recommendation to President was for a mix of B–1's and cruise missiles—not for cruise missiles without the B–1.

The Joint Chiefs of Staff recommended that the cruise missile be used in conjunction with a manned penetrating bomber.

FB–111H and B–1 costs, 20-year life cycle costs are estimated at $17 billion for the FB–111H versus $13 billion for the B–1 by House Appropriations Committee study.

Wide body cruise missile carriers would have to be complemented by some kind of penetrating bomber—the combined cost of which would easily exceed the B–1 program.

747 today costs about $40 to $42 million a copy.

Additional costs for racks, computers, EMP, guidance and control, communications, and defensive measures will result in a 747/CMC which was estimated by DOD to cost $92 to $98 million unit cost.

Continuing B–1 production would result in an average cost of $85.9 million per aircraft—noting that comparisons are for money to be spent in future.

Where the Triad stands:

ICBM's: From now until the early to mid-1980's the U.S. force appears viable. It becomes vulnerable as the new, high accuracy generation Soviet ICBM's are deployed as announced by Secretary of Defense. By 1982–85, as high as 80 to 90 percent of U.S. ICBM's will be vulnerable. The U.S. answer is the mobile MX just now being put into R. & D. OMB has recently recommended only $160 million and slipping full scale development (FSD).

SLBM's: First U.S. Trident submarine is proceeding very slowly and most likely will not be completed until 1981—program continues to slip. Has already suffered overrun of about $400 million. Current SLBM's do not have a hard target kill capability. The Soviet Union has more SLBM's and SLBM submarines than United States. If the Triad is not maintained, Soviet Union resources required for air defense against B–1/cruise missile/SRAM combination would probably be diverted to work on submarine vulnerability problem. If successful within next 8 to 10 years, United States could be in serious jeopardy.

Manned bombers: As B–52 fleet continues to age, they must be replaced. For near time frame until about 1982, they are estimated to remain capable of beating the Soviet Union air defenses. New Soviet efforts with SS–10 could drastically change the balance, requiring introduction of a high speed, near-supersonic, on-the-deck penetrator, to force Soviet expenditures on a broad range of defensive problems involving MX, Trident, cruise missiles, and the B–1 itself. Any manned aircraft having strategic missions must have the following characteristics—whether a B–1, B–52, wide body transport, et cetera.

Pre-launch survivability;

Hardening against nuclear effects, (blast, EMP, et cetera);

Penetrate close enough to launch or drop weapons;

Large enough to carry effective load;

Self-capable to penetrate defenses and protect itself, and

Weapons accuracy sufficient to kill target.

The FB–111H has been proposed as a candidate for the penetrating bomber role, although it is a less capable aircraft and almost as expensive as the B–1 would have been. However, President Carter has stated that he did not cancel B–1 production just to build a less capable bomber for the penetrating role.

These are important considerations when evaluating the need for B–1 bomber planes 5 and 6:

First. President Carter stopped the B–1 in favor of cruise missiles which must also penetrate pronounced enemy defenses—without the benefit of defensive avionics—and which have not undergone the extensive testing that the B–1 has accomplished.

Second. Continuing aircraft 5 and 6 provides the time necessary to be absolutely sure that the cruise missile concept can adequately fulfill the role intended for the B–1 bomber.

Third. From all accounts of the SALT II agreement and the U.S. concessions in the agreement, the United States is accepting range limitations on the cruise missile. The full impact and final SALT agreement is not known and until these considerations are quantified, a B–1 production option is necessary.

Fourth. The United States gave up the B–1 strategic capability with no like concessions from the Soviets.

Fifth. Retaining the production option while finalizing SALT II is the most reasonable course of action.

Perceptions are crucially important, and I am concerned about the clear signal we are sending to Moscow concerning the strength of our Triad—both now and beyond. With the Soviets developing and deploying new weapons at an undiminished rate, the time has come to reconsider the practice of unilateral arms restraint.

Mr. BELLMON. Mr. President, there are many difficult decisions that a Member of Congress must make during ones tenure in Washington, and today's vote to deappropriate funds to build two additional B–1's is one of those decisions, where in my judgment, there is no definitive answer. First, let me say that I support the production of the B–1. In my judgment, the United States clearly needs a penetrating manned bomber that will remain effective as our B–52's become outdated. However, President Carter who is the Commander in Chief of our Armed Forces, as set out in the Constitution, has stated that the United States does not need the B–1 and he does not intend to build the B–1's. Accordingly, I see little logic in expending $462 million on B–1's No. 5 and No. 6 when it appears clear that the B–1 will not be built while President Carter remains in office.

Currently, our present Air Force, largely composed of B–52 penetrators, is a very effective force with a very high probability of penetrating the present Soviet Union air defense. The questions are how much the effectiveness of the B–52 will be degraded 5, 10, or 15 years in the future, and how we should modernize the force to minimize the effect of that degradation. President Carter has chosen to "scrap" the development of the B–1 and rely on the development of the cruise missiles to be our penetrating weapon system.

Mr. President, as I indicated earlier, I favor the production of the B–1 because I believe that we need a manned penetrator replacement for the B–52. A manned penetrator would serve two purposes by being able to carry a gravity bomb or a short-range attack missile to a target or by being able to penetrate deep enough into the Soviet Union to insure that the carrier's cruise missiles have the range to reach their intended targets.

The fallacy in relying entirely on the cruise missile is that it will only be as effective as its carrier, which will likely be an improved B–52. Accordingly, as the B–52's ability to penetrate the Soviet's air defenses decreases, then so will the cruise missile's.

However, the issue before us is not whether the United States needs the B–1, but whether the Congress can or should force the President to build B–1's No. 5 and No. 6 at a cost of close to one-half billion dollars, when it now appears that the B–1 will never be put in production. In my judgment, the Congress should disappropriate the funds for the two additional B–1's, rather than pour $462 million of the taxpayers' money down the proverbial "rat hole."

Granted, there would be some benefit from building two production models of the B–1. The argument is made that by building planes No. 5 and No. 6, companies will be able to keep their production team together, in the event that President Carter should change his mind. This argument is not convincing because No. 5 and No. 6 will be hand built and not produced on an assembly line. In addition, it appears unlikely that the President will change his mind. Also, the total cost of building bombers No. 5 and No. 6 over the next 3 or 4 years is estimated to total close to three quarters of a billion dollars when the total cost of complete fabrication, initial spares and support equipment, and training and testing are taken into consideration.

Although I support production of the B–1, I cannot, in good conscience vote to build B–1's No. 5 and No. 6 when it appears that a fleet of the bombers will never be produced so long as President Carter is in the White House.

Mr. PELL. Mr. President, I strongly support the rescission of $462 million in fiscal year 1977 funds originally appropriated for continued production of the B–1 bomber.

I would not be saying this unless I believed that our present strategic nuclear forces were a sufficient deterrent. In particular, we currently have a capability to deliver over twice as many warheads as the Soviets can, and our lead over them in this regard will be maintained under the SALT II agreement now being negotiated.

Looking at the manned bomber component of our nuclear triad, the B–52's are adequate and will remain so for many years to come. To the extent that this leg of the triad must be modernized, we are doing so through the air-launched cruise missile which can be carried on the B–52 or other aircraft. We can now, and will continue to be able to under SALT II, deploy these cruise missile carriers so that as Soviet air defenses improve, the B–52's or other cruise missile carriers can strike from a safe distance.

In judging the need for the B–1 as against the alternative of cruise missile carrying aircraft, it should be borne in mind that the B–1 is justified princi-

pally on its penetration capability. Yet the whole idea of a penetration bomber may be an obsolescent concept according to many experts. Soviet air defenses may improve to the extent that it would be foolish to have invested so much in the B–1 whose penetration capabilities are in doubt in the 1980's and which is not needed to deliver cruise missiles.

Other aircraft can deliver cruise missiles cheaper now, and better ways can be found to deliver air launched cruise missiles in the future than the B–1. While individual cruise missiles will be vulnerable when the Soviets deploy a lookdown-shootdown capability, the advantage of the cruise missile is that so many of them can be launched from a variety of aircraft. Compared with a B–1 bomber, a cruise missile carrying aircraft has a better chance of delivering its weapons in a cost-effective manner than would an affordable number of B–1's. My concern with cost reduction gathers added significance in a year the President is seeking an approximately $10 billion increase in defense spending.

President Carter has studied the whole question of the nuclear triad and our various weapons options, and came to the same conclusion that I have in the course of my duties as the chairman of the Foreign Relations Committee's Arms Control Subcommittee. Basically, the question is whether there should be another generation of the manned penetration bomber or whether we will move into the 21st century and recognize that the manned penetration bomber is being leap-frogged by another weapons system. Just as the battleship was superseded by the aircraft carrier, and it in turn by the nuclear submarine, so now the manned penetration bomber is being replaced by the cruise missile carrier.

Mr. CULVER. Mr. President, once again we are debating the B–1 bomber program. Almost 2 years ago, the Senate voted to give the incoming administration the final decision on B–1 production. Last summer, we supported the President's decision by removing B–1 production funds from the fiscal year 1978 appropriations. In the fall, we supported the deappropriation of unnecessary money left over from fiscal year 1977.

Although the Senate has been consistent on this issue, our colleagues in the House have not. I believe therefore that we must insist on our position as the best course for our Nation, both militarily and economically.

The immediate question is whether—in face of the conclusive decisions against production of the B–1 at this time—we will force the Government to continue spending money, up to a total of $1,440,000,000 in order to build only two token aircraft.

The fact situation is this: Of the $1.160 billion appropriated for B–1 production before President Carter's decision, $401 million have been spent. Contract termination costs will require another $297 million, leaving the $462 million to be saved by deappropriation. In fact, the savings will actually be greater—$742 million—because the Air Force would need an additional $280 million for operational test and evaluation of these two planes.

Canceling a big program is always painful; powerful economic interests always argue for continuing dollar transfusions. But I believe the time has come to cut our losses, to terminate B–1 production, before we scale a Himalayan peak of waste and extravagance in order to have two planes costing $720 million each.

Mr. President, costs have always been an important factor in the B–1 debate. Many people opposed the program with solid reasons when the predicted unit cost was only $40 million. By the time of President Carter's decision, reliable estimates had soared to $117 million per plane.

If the B–1 were truly essential to our national security, of course, and if there were no cost-effective alternative, then we should build the planes. Cost would be no object in the face of necessity.

But the B–1 is not essential. And we do have a better and far less costly alternative.

Mr. President, since the B–1 program as a whole is wasteful and unnecessary, spending $1.44 billion for only two custom-made aircraft is the height of folly.

We do not need these planes for test purposes, as our distinguished colleague from Arizona, Senator GOLDWATER, told the Senate in December. The four research and development aircraft—three already flying and the fourth being built—are sufficient for necessary testing.

We do not need these planes in order to preserve a production option in case a future decision is made to produce the B–1. The blueprints would still be available, and the key production and management people would likely be retained for other programs. Since the two planes would be essentially hand-made, there will be no full-scale production line.

We are not going to have the B–1 significantly sooner if we build planes No. 5 and No. 6 and then decide on full production. All this huge expediture would buy us, according to Defense Department analysis released yesterday, is "a 6- to 10-month advantage"—in 1986.

I think we can all agree that these planes should not be built as a jobs program. Defense dollars should never be used for make-work. Other Federal programs are more labor-intensive and can create more jobs, if necessary, at much lower cost.

We are not even talking about current jobs, but future jobs, since there are now only about 800 individuals employed on the B–1 production program, according to the Defense Department.

But if we were to go ahead and build these two additional planes, we would have to spend an average cost of $4,150 per month per employee, according to newly released information from the Defense Department. That comes to just under $50,000 per job per year—a staggering and unacceptable sum.

The truth is that the aerospace industry does not even need this platinum-plated subsidy at this time. According to Aviation Week, the aerospace industry is expecting a 2-percent increase in sales in 1978.

And Rockwell International, the prime B–1 contractor, has told its stockholders that it sees "excellent prospects for continued growth" in 1978, and that its B–1 division is "pursuing new business opportunities."

Mr. President, the B–1 is a luxury we can do without because of the more promising technology and lower cost of cruise missiles.

When the Pentagon last year compared the B–1 with the rapidly advancing technology of cruise missiles, it concluded that our existing B–52's, supplemented by a force of some cruise missiles, would be highly effective against even conservative estimates of the future Soviet threat. But a B–1 force with equal capability would cost 40 percent more.

It just did not make sense to spend nearly $30 billion on planes which might become so vulnerable that they could be used only as cruise missile carriers.

The safest way to go is with cruise missiles because they promise a greater certainty of effectiveness. As the Defense Department declared yesterday:

> Because of Soviet advances in electronic warfare technology, it is becoming increasingly more difficult to develop effective bomber ECM (electronic countermeasures), and thus there is considerable uncertainty regarding the B–1's penetration capabilities. We have more confidence in the ability of the small radar cross section cruise missile to penetrate defenses than in the ability of ECM to defend the B–1.

Moreover, defenses against cruise missiles would be very difficult and expensive for the Soviet Union. They would have to field large amounts of new equipment even to begin to counter our capabilities.

Cruise missiles have lived up to their promise so far, with a very successful development program. Operational deployment is expected in 1980.

Even if ranges are ultimately limited by a SALT agreement, Defense Department analysis has determined that—

> 2,500 km is sufficient through at least the mid-to-late 1980's when examined against very conservative estimates of future Soviet defenses.

Finally, let me put to rest the oft-repeated claims about the obsolescence of the allegedly "aging" B–52 fleet. The fact is, that the Air Force has always testified to the structural integrity of those planes through the 1990's. The only question was whether they would be effective penetrators. On the basis of the latest intelligence estimates, our military planners have concluded that we will be able to rely on a sizable force of effective penetrating bombers for many years to come.

The best witness on this subject is the commander in chief of the Strategic Air Command, Gen. Richard H. Ellis, who testified to our Research and Development Subcommittee last August:

> So our opinion—based on the best evidence available—is that properly cared for and properly employed, our FB–111's and our latest B–52's can continue to be effective penetrators until 1987—and probably to 1990 or even beyond.

In other words, Mr. President, America will remain strong without the B–1. We will have the many advantages of a mixed force of penerating bombers and cruise missile carriers.

In the face of our Nation's critical needs, we simply cannot afford to waste more money on B–1 production.

Mr. STENNIS. Mr. President, I do not like to make a motion to table, but it is about the only thing to do under the logic of the situation here.

What is the pending matter before the Senate, Mr. President?

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from California that the Senate recede from its amendment No. 43 to H.R. 9375.

Mr. STENNIS. As I understand, that means that the Senator from Mississippi moved that on amendment 43 the Senate stand firm on its amendment, request a further conference with the House, and that the Chair appoint conferees. The Senator from California offered a substitute motion that would come first for a vote. It is that which I refer to.

Does the management of the floor want a couple of minutes for a quorum call, which will be withdrawn, and then I make my motion to table?

The PRESIDING OFFICER. It is not a substitute motion.

Mr. STENNIS. It is subject to a motion to table, anyway; that is correct, is it not?

The PRESIDING OFFICER. That is correct.

Mr. STENNIS. Does the management want to have a quorum call? It is not necessary.

Mr. President, if I have any time remaining, I yield it back.

The PRESIDING OFFICER. Is all remaining time yielded back?

Mr. YOUNG. I yield back the remainder of my time.

Mr. STENNIS. Mr. President, I move to lay on the table the motion made by the Senator from California.

Mr. HAYAKAWA. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STENNIS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. There is a vote in progress.

Mr. STENNIS. Will the Chair state the question so Senators will know what they are voting on?

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion of the Senator from California that the Senate recede from Senate amendment 43 in disagreement.

The clerk will call the roll.

The assistant legislative clerk called the roll.

(The Vice President assumed the chair.)

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HASKELL), and the Senator from North Carolina (Mr. MORGAN) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

I further announce that if present and voting, the Senator from North Carolina (Mr. MORGAN) would vote "yea".

Mr. STEVENS. I announce that the Senator from Idaho (Mr. MCCLURE) is necessarily absent.

The result was announced—yeas 57, nays 38, as follows:

[Rollcall Vote No. 25 Leg.]

YEAS—57

Abourezk	Ford	Metzenbaum
Anderson	Gravel	Moynihan
Bayh	Hart	Muskie
Bellmon	Hatfield,	Nelson
Biden	Mark O.	Nunn
Brooke	Hatfield,	Packwood
Bumpers	Paul G.	Pearson
Burdick	Hathaway	Pell
Byrd, Robert C.	Heinz	Percy
Case	Hodges	Proxmire

Glenn	Randolph	Zorinsky

NOT VOTING—4

Haskell	McClure	Morgan
Inouye		

So the motion to lay on the table was agreed to.

Mr. STENNIS. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. STENNIS. All time for debate on my motion has expired, has it not?

The VICE PRESIDENT. The Senator is correct.

Mr. STENNIS. I ask for the yeas and nays, Mr. President.

The VICE PRESIDENT. Is there a sufficient second? There is a sufficient second?

The yeas and nays were ordered.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Mississippi that the Senate further insist on its amendment and ask for further conference with the House thereon and that the Chair be authorized to appoint conferees.

Mr. STENNIS. I thank the Chair.

The VICE PRESIDENT. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HASKELL) and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) is absent on official business.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI) is necessarily absent.

The result was announced—yeas 58, nays 37, as follows:

[Rollcall Vote No. 26 Leg.]

YEAS—58

Abourezk	Ford	Metzenbaum
Anderson	Gravel	Morgan
Bayh	Hart	Moynihan
Bellmon	Hatfield,	Muskie
Biden	Mark O.	Nelson
Brooke	Hatfield,	Nunn
Bumpers	Paul G.	Packwood
Burdick	Hathaway	Pearson

Dole	McClure	Weicker
Garn	McIntyre	Young
Glenn	Randolph	Zorinsky
Goldwater	Sasser	

NOT VOTING—4

Domenici	Inouye	Long
Haskell		

So the motion was agreed to.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER (Mr. MOYNIHAN) appointed Mr. MAGNUSON, Mr. STENNIS, Mr. PROXMIRE, Mr. INOUYE, Mr. YOUNG, Mr. CASE, and Mr. STEVENS conferees on the part of the Senate.

COMMENDATION OF THE FLORIDA AGRICULTURAL AND MECHANICAL UNIVERSITY FOOTBALL TEAM ON FINISHING ITS SEASON UNBEATEN AND UNTIED

Mr. CHILES. Mr. President, I send to the desk a resolution and ask that it be read.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read as follows:

The Senator from Florida (Mr. CHILES) for himself and Mr. STONE proposes Senate Resolution 386, to commend the Florida Agricultural and Mechanical University football team on becoming the only NCAA football team to finish its season unbeaten and untied.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The Senator from Florida.

Mr. CHILES. Mr. President, Florida A&M University, located in Tallahassee, is a small school in enrollment but is a giant in football achievement. During the past college football season, the FAMU Rattlers were the only National Collegiate Athletic Association team to finish its complete campaign undefeated and untied. This unblemished record was unmatched by all the so-called powerhouse teams in the country.

Even more startling, Mr. President, I am told that this fine football team has 15 members who received recognition by the Southern Intercollegiate Athletic Conference for excellence in academic achievement. Seven of these young men were selected to the first team All-American (SIAC) and eight were selected to the second team at the conference level.

Because my colleagues might not be aware of the professional players who have emerged from this great university, Mr. President, I think it is noteworthy that FAMU players have at some point graced the roster of almost every team in the National Football League. Perhaps the most famous of these NFL regulars were Hewritt Dixon of the Oakland Raiders, Al Denison of the Denver Broncos, Hubert Ginn of the Miami Dolphins, Clarence Childs of the New York Giants, the late Willie Galimore of the Chicago Bears and, of course, Bob Hayes of the Dallas Cowboys.

Current pro standouts from FAMU include Henry Lawrence of the Oakland Raiders, Ken Riley of the Cincinnati Bengals, Glen Edwards of the Pittsburgh Steelers, Charles Goodrum of the Minnesota Vikings, and Roger Finnie of the St. Louis Cardinals. Then of course, there is Bob Harris, the Lakeland Flash.

I could go on, Mr. President. However, I think the point has been made. It is very clear to the citizens of this country as well as to Floridians that quality is, indeed, FAMU's measure. All of us in Florida are justly proud of FAMU's record not only this past year but throughout its long and illustrious 90-year history.

The introduction of this resolution for consideration by the Senate is my way of commending the football team, Coach Rudy Hubbard and his staff, and newly appointed president, Dr. Walter Smith, for a job well done.

Mr. President, Senator STONE joins me in the introduction of this resolution, and he will have some remarks to make.

Mr. President, I would like to ask that the rules be waived and that the resolution be considered and agreed to.

Mr. ROBERT C. BYRD. Mr. President, this matter has been cleared with the leadership on this side of the aisle, and I have no objection to the immediate consideration of the resolution.

Mr. BAKER. Mr. President, we have no objection.

Mr. STONE. Mr. President, I am very pleased to join my colleague from Florida, Senator CHILES, in introducing this resolution to honor the Florida A&M University football team.

Each fall national attention is focused on the many outstanding college football teams who compete for top national honors. This past year was no exception. However, because Florida A&M University did not play class A competitors all season, their efforts were not given the recognition showered on other teams. All of Florida is proud that this team was the only major college football team in the United States to have an undefeated, untied season.

Each member of the Florida A&M football team and their coach, Rudy Hubbard, can be very proud of the results of their dedication, hard work, and skill on the field. I urge my colleagues to adopt this resolution, to commend this outstanding group of young men for their efforts and for a job well done.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to.

The preamble was agreed to.

The resolution (S. Res. 386), together with its preamble, is as follows:

S. RES. 386

Whereas the Florida A&M University football team vanquished every opponent in its regular 1977 season and

Whereas the Florida A&M University football team was victorious in the Orange Blossom Classic contest on December 1977 and

Whereas the citizens of the United States are generally unaware of the superlative record of the FAMU Rattlers; and

Whereas the 1977 FAMU football team has continued a tradition of excellence that is unparalled in gridiron lore: Now therefore be it

Resolved, that the Florida A&M University football team is commended for attaining a perfect, unbeaten and untied record for the 1977 season.

SEC. 2. The Secretary of the Senate is authorized to transmit a copy of this resolution to the president of the Florida A&M University at Tallahassee, Florida.

ROUTINE MORNING BUSINESS

MESSAGES FROM THE HOUSE

At 3:41 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House agrees to the amendments of the Senate to the bill (H.R. 2719) to authorize the Secretary of the Interior to contract with the Middle Rio Grande Conservancy District of New Mexico for the payment of operation and maintenance charges on certain Pueblo Indian lands.

The message also announced that the House has passed the following bill in which it requests the concurrence of the Senate:

H.R. 9851. An act to amend the Federal Aviation Act of 1958 to improve cargo air service.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The message further announced that the Speaker has signed the following enrolled bills and joint resolution:

H.R. 2719. An act to authorize the Secretary of the Interior to contract with the Middle Rio Grande Conservancy District of New Mexico for the payment of operation and maintenance charges on certain Pueblo Indian lands.

H.R. 5798. An act to amend the Interstate Commerce Act to authorize appropriations for the Office of Rail Public Counsel for fiscal year 1978.

H.R. 10532. An act to amend Public Law 95–18, providing for emergency drought relief measures.

H.J. Res. 386. A joint resolution to provide for the striking of a national medal to commemorate the bicentennial of an outstanding historic event or personality during 1777.

The enrolled bills and joint resolution were subsequently signed by the President pro tempore.

HOUSE BILL REFERRED

The following bill was read twice by title and referred as indicated:

H.R. 9851. An act to amend the Federal Aviation Act of 1958 to improve cargo air service; to the Committee on Commerce, Science, and Transportation.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. TALMADGE, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. Res. 384. An original resolution authorizing additional expenditures by the Committee on Agriculture, Nutrition, and Forestry, for inquiries and investigations. Referred to the Committee on Rules and Administration.

By Mr. STENNIS, from the Committee on Armed Services, without amendment:

S. Res. 385. An original resolution authorizing additional expenditures by the Committee on Armed Services for inquiries and investigations. Referred to the Committee on Rules and Administration.

By Mr. MUSKIE, from the Committee on the Budget, wtihout amendment:

S. Res. 387. An original resolution authorizing additional expenditures by the Committee on the Budget for inquiries and investigations. Referred to the Committee on Rules and Administration.

SELECT COMMITTEE ON SMALL BUSINESS ANNUAL REPORT (REPT. NO. 95–629)

(By Mr. NELSON, from the Select Committee on Small Business, which was ordered to be printed.)

Mr. NELSON. Mr. President, the annual report of the Small Business Committee, which I am submitting today, contains both alarming findings about the status of American small business and evidence of progress in congressional efforts to improve the conditions under which small businesses operate.

The 21 chapters and appendixes of the 28th Annual Report address a substantial number of the critical issues currently facing the Nation's 13 million small businesses.

The committee was active in a number of areas, and some of these deserve a word or two of special attention.

For example, the employment tax credit, a tax incentive first put forward in Small Business Committee hearings, became a part of the tax reform measure enacted into law. This tax credit, which provides Government encouragement for businesses which hire new employees, is a welcome acknowledgment of small business' job-producing potential. It is

a sign that Congress and the President have recognized the fact that private-sector, labor-intensive businesses, including most small businesses, should be the employers of first resort in any comprehensive solution to unemployment.

Eight days of committee hearings focused on product liability insurance, which is becoming prohibitively expensive for many small businesses. The report describes findings from these hearings and from the Federal interagency task force on product liability, as well as the approaches to the problem offered by two bills, sponsored by various members of the committee.

Elsewhere in the report is an analysis of Federal regulatory activities affecting small business. Summaries explain the committee's continuing hearings on Federal regulatory harassment of supplemental air carriers, and a new committee investigation of the cost of regulations to small homebuilders and home buyers. The latter investigation has found considerable evidence that duplicative, unnecessary, and overly burdensome governmental regulations are pricing small homebuilders out of the market and pricing homes beyond the reach of most Americans. Regulatory delays for as long as 3½ years have been documented in homebuilding, during which homebuilders face continuing costs without offsetting sales—resulting in spiraling prices to consumers. The report also details a number of legislative measures in the regulatory area, which have been introduced by committee members, including S. 1974, the Regulatory Flexibility Act, which would provide broad regulatory relief for small businesses, small organizations, and individuals.

Federal paperwork demands on small business also received considerable scrutiny from the committee. The report notes, among other committee successes in this area, an amendment to the minimum wage bill which has reduced reporting requirements on businesses—which hire students—condensing a five-page form and seven pages of instructions to a simple index style card with four questions.

A major new issue, turned up by committee investigations during the past year, is that the United States is in danger of losing the cream of its new technology because a lack of capital for small business in this country is permitting foreign investors to buy up our most promising companies. Traditionally, advanced technology firms have been the foundations on which new industries were built, and they have also provided the fastest growing source of new jobs.

In at least one of the above cases, the company's owners had sought American capital from more than 80 sources.

What does this mean for the U.S. economy in terms of lost jobs, sales, and taxes?

The report notes that the MIT foundation recently compared five young, high-technology companies (Data General, National Semiconductor, Compugraphic Digital Equipment, Marion Laboratories) with six mature companies (Bethlehem Steel, DuPont, General Foods, General Electric, International Paper, and Proctor & Gamble), all among the Nation's 100 largest corporations. The findings for the 5-year period of fiscal year 1969 were as follows.

Compound annual rate of increase in percent

	New companies	Mature companies
Jobs	40.7	0.6
Sales	42.5	11.4
Taxes	34.1	7.8

The inability of small firms to raise capital has become a crisis not only for the firms involved, but has serious implications for the U.S. economy, balance of payments, defense, and disarmament positions.

Independent entrepreneurs and small businesses have invented such products as Xerox machines, Polaroid cameras, jet engines, automatic transmissions, vacuum tubes, cyclotrons, FM radios, walkie-talkies, helicopters, air conditioners, mercury dry cell batteries, cellophane, penicillin, and insulin.

The report points out that U.S. capital has left a serious gap in the funding of these technologically innovative companies, and it is that gap which is being zeroed in on by foreign capital.

Business Week magazine summed it up:

> Access to the capital market has been pretty much open only to the nation's big companies for years now. And some contend that the top 1,000 or so corporations—the ones that can borrow—have been less innovative and less willing to commit funds to risky projects than they have been in the past. The smaller companies, the argument goes, are willing to take the risks but cannot get the money. (Oct. 17, 1977, p. 63.)

Between 1972 and 1976 first-time stock offerings by all companies fell, as a proportion of all stock offerings, from 62 to 16 percent. Registered stock offerings by firms with less than $5 million dropped from 698 in 1969 to 3 in 1975—with only 41 for the last 3 years (1974–76).

This problem is explored in some detail in the report, and a number of legislative strategies for correcting it are suggested.

The report opens with a summary of studies the committee has collected on small business and the quality of American life. The next section of the report presents economic data on small business' strengths and weaknesses. The committee's efforts to improve the operation of the Small Business Administration, through exercise of the legislative jurisdiction over SBA which the Senate recently conferred upon the committee, are dealt with in the next chapter. Included here are analyses of measures recently signed into law, such as the Omnibus Small Business Act, Public Law 95–89, and those which are pending, such as the Small Business Development Center Act, S. 972.

Many of the chapters provide helpful material on questions most frequently asked about Federal taxation and regulation of small business, about capital formation and the economic climate for small business, about the Small Business Administration and Federal policies regarding women and minorities in business, and about specific problems like energy availability and product liability insurance.

In many ways, 1977 was a milestone year for the Small Business Committee. For the first time in the committee's 28-year history, it was authorized to consider and report out legislation. Equipped with this strong Senate mandate to tackle the problems of American small business, the committee had its most active session ever.

During calendar year 1977, a committee record of 65 days of hearings were held, with 73 days projected for the fiscal year ending February 28, 1978, another committee record. Thirty-eight legislative measures, including 30 bills, were referred to the committee. Eighteen of these received markup in committee, eight were passed by the Senate, and two have become public law. In addition, 1 nomination and 24 Executive Communications have been referred to the committee.

A wider understanding of the problems and the potential of small business will have a direct bearing upon our country's ability to increase employment, fight inflation, increase productivity and efficiency, improve work environments, and to keep alive the American dream of business ownership. The committee believes these initiatives described in this report can strengthen the overall economy of our Nation and the fabric of our democratic society.

It is, therefore, our hope that the 28th Annual Report will prove to be a valuable source of up-to-date information on the status and future of small businesses and that it will be a resource for research and action on the part of the Senate, the small business community, and the general public.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

Mr. STENNIS. Mr. President, from the Committee on Armed Services, as in executive session, I report favorably the nominations of Lt. Gen. Bryce Poe II, U.S. Air Force, to be general; and Gen. Daniel James, Jr., U.S. Air Force (age 57), for appointment to the grade of general on the retired list; and Maj. Gen. Edgar S. Harris, Jr., U.S. Air Force, to be lieutenant general. Also, there are 52 in the U.S. Air Force, for temporary appointment to the grade of brigadier general (list beginning with James P. Albritton); and Maj. Gen. Ernest Graves, Jr., U.S. Army, to be lieutenant general; and there are 35 in the Army Reserve and Army National Guard for appointment to the grade of major general and brigadier general (list beginning with Freeman H. Forrest). Also, Vice Adm. Edward W. Cooke, U.S. Navy (age 56), for appointment to the grade of vice admiral on the retired list; and Rear Adm.

William N. Small, U.S. Navy, for appointment to the grade of vice admiral; and Lt. Gen. John H. Cushman, U.S. Army (age 56), to be placed on the retired list in the grade of lieutenant general. I ask that these nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. In addition, there are 40 in the U.S. Air Force Reserve for promotion to the grade of colonel and below (list beginning with Jack D. Abercrombie); and 1,029 for promotion in the Reserve of the Army to the grade of colonel and below (list beginning with James Bennett); and 35 in the U.S. Navy for temporary and permanent appointment to the grade of lieutenant commander and below (list beginning with Rodney A. Marcom). Also, there are 1,506 Naval Reserve Officer Training Corps, to be permanent ensigns in the line or staff corps of the Navy (list beginning with Jimmy L. Aaron). Since these names have already appeared in the CONGRESSIONAL RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the CONGRESSIONAL RECORD of January 20, 1978, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. CULVER (for himself, Mr. CLARK, and Mr. MAGNUSON):

S. 2468. A bill for the relief of Carmichael C. Peters; to the Committee on the Judiciary.

By Mr. INOUYE (by request):

S. 2469. A bill to amend the Federal Aviation Act of 1958 (49 U.S.C. 1301 et seq.) to include Hawaii in the provisions for certification of all-cargo air service; to the Committee on Commerce, Science, and Transportation.

By Mr. TOWER (for himself and Mr. SCHMITT):

S. 2470. A bill to prescribe policies and procedures for electronic fund transfer systems; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. ROTH:

S. 2471. A bill to prohibit employment agency charges for public service jobs provided pursuant to the Comprehensive Employment and Training Act of 1973; to the Committee on Human Resources.

By Mr. CASE (for himself and Mr. PERCY):

S. 2472. A bill to authorize the Secretary of State to implement solar energy and other renewable energy projects in certain buildings owned by the United States in foreign countries; to the Committee on Foreign Relations.

By Mr. PELL (for himself, Mr. WILLIAMS, Mr. JAVITS, and Mr. STAFFORD):

S. 2473. A bill to amend the Higher Education Act of 1965 to improve the basic educational opportunity grants program; to the Committee on Human Resources.

By Mr. KENNEDY (for himself, Mr. SCHWEIKER, Mr. WILLIAMS, Mr. JAVITS, Mr. PELL, and Mr. HATHAWAY):

S. 2474. A bill to amend the Public Health Service Act to extend through the fiscal year ending September 30, 1983, the assistance program for community health centers; migrant health services; to extend through the fiscal year ending September 30, 1981; hemophilia; home health services; to extend through the fiscal year ending September 30, 1979, the assistance programs for comprehensive public health services; hypertension programs; disease control programs; venereal disease programs; genetic diseases programs; and lead-based paint programs, and for other purposes; referred to the Committee on Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. TOWER (for himself and Mr. SCHMITT):

S. 2470. A bill to prescribe policies and procedures for electronic fund transfer systems; to the Committee on Banking, Housing, and Urban Affairs.

FAIR FUND TRANSFER ACT OF 1978

Mr. TOWER. Mr. President, I am today introducing on behalf of Senator SCHMITT and myself the Fair Fund Transfer Act of 1978 to provide a framework for consumer rights and obligations in connection with the issuance and use of debit instruments designed to make payments and effect transfers through electronic terminals.

The Fair Fund Transfer Act is designed to meet recognized consumer apprehensions over the development of the new electronic fund transfer technology without regulatory overkill which could stifle development of a more efficient payment system. It closely follows the recommendations of the National Commission on Electronic Fund Transfers and parallels the credit card provisions of the Fair Credit Billing Act. Its principal features would:

Require disclosure of customer's rights and obligations when an account is opened and when there is a change in terms.

Require that there be made available to the customer in conjunction with every transaction at an electronic funds transfer terminal a written receipt of the transaction.

Require that a customer be furnished monthly a statement identifying all transactions.

Provide a procedure for the correction of account errors in a manner similar to that required under the Fair Credit Billing Act.

Excuse a customer of liability for unauthorized use unless the debit card issuer can establish customer fraud or negligence. Except in the case of fraud or failure to promptly report the loss of an instrument, the customer has no liability beyond $100. After giving notification of the loss of the debit instrument there is no liability.

Define liability for system malfunction.

Provide civil liability for a willful violation of the Act.

Place administrative enforcement in the bank regulatory agencies and the Federal Trade Commission for those not regulated by the bank supervisory agencies.

Provide criminal liability for the fraudulent use of a debit instrument.

Become effective 1 year after enactment.

THE EVOLUTION OF THE DEBIT CARD AS A MEANS OF PAYMENT

One of the greatest dangers inherent in legislation regulating electronic fund transfers is the temptation to treat this new technology as an event so unique that it will require a regulatory structure which will not permit the consumer to choose in a free market environment the sort of payment system which best fits the consumer's needs.

History teaches that our modern payments system has evolved in a halting, irregular, and unplanned way. At an early date in the development of commerce, gold and silver were substituted for barter as a more efficient means of payment. However, there were numerous problems attendant to the use of precious metals as a means of storing value and of exchange. Originally there were some problems in producing standardized units. Of greater concern, an inventory of coins or gold was vulnerable to theft and transportation for use or trade was inconvenient.

It was discovered that it was safer and cheaper to store gold in centralized depositories. The depository would customarily issue a transferable deposit receipt which was used in trade more conveniently than precious metals or coin.

Again, innovators found a better way to transfer funds and make payments. The gold deposit receipt was unnecessarily clumsy since one did not usually wish to transfer all of one's deposited wealth to any one person. Thus, there grew a practice of depositories issuing bank notes reflecting the recognition that the bank was obligated to pay the holder of the note the face amount in gold on deposit.

The next big step in the growth of the payment system involved the introduction of checks. According to Baxter, Cootner, and Scott in Retail Banking in the Electronic Age, there were traders and companies whose needs for funds were so large as to make the use of bank notes themselves clumsy and vulnerable to theft. Hence, these receipts were deposited in banks and could be drawn upon by negotiable instruments called checks or drafts. Baxter, Cootner, and Scott observe that checks have a very long history but were not a significant factor in the payments system in Britain until around 1830 and somewhat later in the United States. Before that time the active media of exchange were coin and bank notes. Checks were first used largely by bank customers who transferred large sums and not by retail customers.

The development of checking in the United States entered on a period of rapid growth after 1863 somewhat due to Government policy which discouraged the issuance of banknotes by restrictions and taxes. Although today most people regard the check as an indispensable part of modern economic life as pointed

out by Baxter, Cootner, and Scott, its development represents a phenomenon that evolved slowly and steadily being used first by those with greater economic means. Throughout the last 100 years there has been a continual development; the maturation of the automated clearinghouse, the check processing by machine, the magnetic ink, the computer batch processing, and online computer processing.

Even today between 20 and 35 percent of U.S. households do not choose to establish demand deposits with checking privileges.

From the consumer's standpoint, the next big development in the payments system was the rise of the credit card. It was not until the late 1940's and early 1950's that the Flatbush National Bank of Brooklyn and the Paterson Savings and Trust Co. of Paterson, N.J., adopted bank charge card plans. These early bank plans involved a paper credit card and a book of script equal to the customer's credit limit for 1 month. When the customer charged merchandise he presented the credit plate and the book of script and was required to sign a sales slip. The store sent the customer's signed sales slips and script to its bank which credited the merchant's deposit account with the full amount. Although these plans were considered to have merit, the use of script involved burdensome paperwork. This early plan was refined by Franklin National Bank of New York in 1951 with the development of a sales slip worded in the form of a bank draft. This more workable plan was rapidly adopted by other banks and became the basis for the modernday credit card. The consumer readily accepted the credit card as a payment medium because it had a number of advantages including a tool for money management and ease of purchasing goods.

The appearance of the debit card represents the next big step in the development of payments mechanisms. It is still in the embryonic stage and its role has not been firmly identified. For example, at least one national credit card interchange is offering to banks a debit card which functions similarily to the credit card except that at the point of sale the merchant produces a bank draft drawn on the customer's bank which after going through the interchange system will cause the customer's account to be debited in the amount of the purchase. In this transaction there may or may not be an electronic transfer. Under this debit card service, there are presently no point of sale computers interfacing with the customer's bank. Thus, the transaction is largely handled manually in the same manner that a credit card transaction is handled.

There are currently in an experimental stage point of sales "transaction terminals" in such locations as supermarkets and department stores that interface through computers with financial institutions holding deposits of the customers. In the typical situation, the customer will take his debit card to the "transaction terminal" at the supermarket or department store and receive cash from the machine which is then used to make a cash purchase from the merchant.

A more rapid development may be seen in the automated teller machine. These are unmanned units that provide a full range of consumer deposit services, including deposit and withdrawal from savings, deposit and withdrawal from checking, transfer of funds between accounts, and some payments on obligations to the financial institutions. These terminals may either be installed within the financial institution's lobby, through the wall, or off-premise in such locations as shopping centers. Strictly speaking, they are not an alternative payment system, for they merely provide a means for a customer at a convenient time and place to access his account to obtain currency with which to make a payment.

Most observers feel that because of consumer resistance and the tremendous expense of establishing a system, on-line point-of-sale debit-card systems will be slow in developing. On the other hand, these same observers predict that the automated teller machines or customer terminals at either the financial institution's office or at remote areas will have a more rapid development.

The history of the development of modern payment systems teaches a number of lessons.

First, the development of new payment instruments is a slow process. For example, the modern check took about 100 years to evolve.

Second, it is difficult, if not impossible, to predict the final form of a new payment system. Those who first went into the credit card business felt that script would be the medium of exchange, but this proved to be unacceptable to both the customer and the merchant. Consequently, there developed the credit card sales slip draft, which was less costly and more efficient.

Third, one means of payment does not surplant another. During the early stages of commercial development both the coin and bank note were used interchangeably. Today's consumer uses currency, checks, money orders, and credit cards as a means of payment.

And finally, both the consumer and commerce have benefited from the development of new technology. If the notion of the paper bank note had not developed into reality, the inflexibility of gold would not have permitted the expansion of commerce. By the same token, the modern check has made possible large commercial transactions as well as facilitated retail purchases by consumers. Equally convenient has been the modern credit card, which makes possible purchases by Americans in any part of the world.

CONSUMER ACCEPTANCE

An essential element in the development of any payment system is customer acceptance. In the last analysis, under our free market system consumers determine the goods and services which will be purchased and used in the marketplace. Therefore, any consideration of the development and regulation marketplace. Therefore any consider-consumer acceptance.

Surveys indicate that most consumers are satisfied with such familiar means of payment as cash, checks and credit cards. Approximately 62 million U.S. households have one or more personal checking accounts and write over 15 million checks a year. (See Arthur D. Little, Inc., The Consequences of Electronic Fund Transfer, prepared for the National Science Foundation, June, 1975) Similarly, most consumers enjoy the use of credit cards as an alternative means of payment. Today, almost two thirds of the consumers in this country have one or more credit cards accounting for about 11 percent of consumer payments other than cash. (Rose Mary Butkovic, Consumer Acceptance and Usage of New Funds Transfer Services, October, 1977) Nonetheless, there appears to be some dissatisfaction with services now being provided. This dissatisfaction probably stems from inconvenience of banking locations, time taken to perform financial transaction, problems or getting errors resolved, and difficulty in getting checks accepted. Thus, consumers generally would probably like to see a more efficient payments system.

It is generally felt that consumer acceptance of electronic fund transfers will be slow in coming. Although much of this is probably due to the low public awareness of electronic funds transfer services, the National Commission on Electronic Fund Transfers in its final report issued on October 28, 1977, concluded that many consumers are reluctant to accept many electronic fund transfer concepts. Some consumer concerns, according to the commission, may result from a lack of experience with new ideas, but others are well founded. The report dealt with many of these areas including privacy, choice of payment methods, disclosure of terms and EFT information, distribution of debit cards, stop payment, unauthorized use of an EFT account, and error correction. The difficulty is to provide adequate consumer protection, yet not unduly interfere with the competitive market place, which the commission recognized as the best means for protecting consumers by providing them with the greatest choice among payment alternatives at the lowest cost.

The objective of the Fair Funds Transfer Act is to achieve these twin goals of consumer protection through a free market and reasonable national standards.

DANGERS FROM REGULATORY OVERKILL

Too hasty consideration and enactment of legislation attempting to regulate the development of this new technology would be a great disservice to the consumer by inhibiting the development of a more efficient and less costly payments system. This is a highly complex area and, as our review of the history of the development of the payments system indicates, it is next to impossible to predict its final course. Consequently, to avoid another regulatory horror story, it is absolutely essential that much thought and study go into this matter before Congress embarks on the difficult task of framing legislation.

The consumer and the commercial interests of this great country will best be served if the appropriate committees of Congress will thoroughly study this matter before attempting to mark up the legislation. Although the Senate Consumer Affairs Subcommittee did hold truncated hearings last year on one bill that had been introduced by the chairman of the subcommittee, those hearings were premature in that they were conducted before the National Commission on Electronic Fund Transfers issued its final report.

I was disturbed to learn that the chairman of the Banking Committee has scheduled a markup on that same legislation on March 15 without additional hearings which will take into consideration the Commission's findings. It is also noteworthy that in early April the National Commission on Uniform State Laws and its subcommittee known as the three, four, eight committee will be meeting in Williamsburg, Va., to consider a comprehensive study made by its reporter on appropriate changes in the Uniform Commercial Code to reflect developments in electronic fund transfers. Any Federal legislation should take into account these State developments. Accordingly, I am urging the chairman of both the Banking Committee and the Consumer Affairs Subcommittee to hold additional hearings on this matter before attempting a markup session.

Mr. President, I ask unanimous consent that the bill and the section-by-section analysis be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 2470

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Fair Fund Transfer Act of 1978".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds and declares that—

(1) The use of electronic and computer systems to transfer funds offers many opportunities to provide credit, debit, and payment services more conveniently and efficiently benefiting all participants in the Nation's payments system.

(2) Many aspects of electronic fund transfers are undergoing evolutionary changes and, thus, projections about future events necessarily involve a degree of speculation. Consequently, the appropriate approach to these new financial service concepts is, in general, to permit their further development in a free market environment and, to the extent possible, in a manner consistent with the nature and purpose of existing law and regulation governing financial services.

(3) Although there is no evidence that electronic fund transfers have yet caused harm to financial markets, financial institutions, or customers, existing law and regulations in the consumer protection area are incomplete or are not applicable to some aspects of the new financial service concepts.

(b) The purposes of this Act are to provide a basic framework establishing the rights, liabilities, and responsibilities of all participants in electronic fund transfers activated by a debit instrument and to guarantee consumers and other customers of the system a number of basic rights in an electronic fund transfer environment.

DEFINITIONS

SEC. 3. As used in this Act—

(1) the term "debit, instrument issuer" means the issuer of a card or other device by the use of which the customer can electronically transfer funds, from, or to the customer's account with the issuer or on deposit with a financial institution;

(2) the term "debit instrument" means a card or other device, other than a check or bank draft, by the use of which the customer can electronically deposit, withdraw, or transfer funds in the customer's account with the issuer or on deposit with a financial institution;

(3) the term "electronic funds transfer" means a deposit, withdrawal, or transfer to or from an account through a network comprised of one or more terminals or automated teller machines, together with any related customer access instruments or devices, communication lines, switches for routing messages, and computer processing facilities, and the messages transmitted through such network; but shall not include a telephone account transfer or payment, a credit or debit authorization, or a check authorization or guarantee.

(4) the term "automated-teller-machine" means any device, whether or not linked to a financial institution by a communication line, which is activated solely by the customer of the debit instrument issuer and enables the customer to make an electronic funds transfer;

(5) the term "customer terminal" means an electronic device (which may or may not require the participation of an operator other than the customer) which enables the customer to make an electronic funds transfer;

(6) the term "account" means a cash balance of a customer's funds paid by a customer to any debit instrument issuer for the purpose of an electronic fund transfer or of a customer's funds on deposit with a financial institution;

(7) the term "person" means an individual who is a citizen of the United States or an alien lawfully admitted for permanent residence, or a partnership, corporation, association, trust, or any other legal entity organized under the laws of a State of the United States;

(8) the term "customer" means any natural person who is a debit instrument patron of a debit instrument issuer who utilizes electronic fund transfer services primarily for personal, family, or household purposes; and

(9) the term "financial institution" means—

(A) a bank or trust company organized under the laws of any State, territory, possession, or Commonwealth of the United States or of the United States;

(B) a savings and loan association or building and loan association organized under the laws of any State, territory, possession, or Commonwealth of the United States or of the United States;

(C) a credit union organized under the laws of any State, territory, possession, or Commonwealth of the United States or of the United States; and

(D) any other depository organization chartered under the banking laws of any State, territory, possession, or Commonwealth of the United States and subject to the supervision of the bank supervisory authorities of a State, territory, possession, or Commonwealth of the United States.

DISCLOSURE OF CUSTOMERS' RIGHTS AND OBLIGATIONS

SEC. 4. (a) Before opening a debit account intended to be accessed electronically with a debit instrument, the debit instrument issuer shall disclose in writing to the customer to whom the service is extended—

(1) the protection provided the customer by section 6 and the customer's liability for any unauthorized transfer under sections 7 and 8;

(2) a full description of any charges and service fees the customer may incur for use of the service;

(3) the procedures to be followed and the name and address or telephone number of the place of business to be contacted to provide notice in the event of any account error, unauthorized use of the account, or lost or stolen debit instrument security device or identification number or code; and

(4) where a debit instrument offers credit or other transaction features, a description of the method used to activate a particular transaction and the service fee and charge for each type of transaction.

(b) (1) In the case of any existing account which may be accessed electronically with a debit instrument and which has an outstanding balance of more than $1 at or after the close of the debit instrument issuer's first full monthly cycle after the effective date of subsection (a) or any amendments thereto, the items described in subsection (a) except changes in security systems, to the extent applicable and not previously disclosed shall be disclosed by the debit instrument issuer in a notice mailed or delivered to the customer not later than the time of mailing the next statement required by subsection (b) of section 5.

(2) In the case of any account in existence on the effective date of subsection (a) which may not be accessed electronically with a debit instrument, before adding debit instrument service to the account, the items described in subsection (a), to the extent applicable and not previously disclosed, shall be disclosed by the debit instrument issuer in a notice mailed or delivered to the customer not later than the time of mailing the next statement required by subsection (b) of section 5.

(c) At least 15 days prior to the beginning date of the monthly cycle in which any change in terms which may be adverse to the customer, such as an increase in service fees or restriction in usage, becomes effective, the issuer shall disclose in writing to the customer any such change.

DOCUMENTATION OF TRANSFERS

SEC. 5 (a) A printed or written receipt shall be made available to the customer or user of the debit instrument in conjunction with every electronic fund transfer transaction which occcurs through the use of a debit instrument at an automated-teller-machine or customer terminal reflecting at least the names of the payee and payor and the amount, the date, and the purpose for which the transfer was made. In the case of a deposit, the receipt shall reflect at least the names of the depository and depositor, and the date, and the amount of the deposit.

(b) The debit instrument issuer shall mail or deliver to the customer a statement of his account for any month or monthly cycle in which an electronic fund transfer activated by a debit instrument occurs reflecting at least—

(1) the outstanding balance in the account at the beginning and close of the monthly cycle;

(2) the amounts and dates of credits and debits to the account identifying the purpose for which the transfer was made;

(3) the amount of any transaction fees or service charges using appropriate descriptive terminology; and

(4) an address to be used by the debit instrument issuer for the purpose of receiving statement inquiries from the customer. Such address shall be preceded by the caption "Send Inquiries To:" or other similar lan-

guage indicating that the address is the proper location to send such inquiries.

In addition to the information required in subsections (b) (1), (2), (3), and (4), in each point-of-sale transaction activated by a debit instrument, an identification of each transaction in a manner which enables the customer readily to determine the seller's name and the address (city and State or foreign country, using understandable and generally accepted abbreviations if the debit instrument issuer desires) where the transaction took place shall be provided.

(c) Descriptive statements need not be mailed or delivered to customers whose only transaction is a preauthorized credit to the customer's account if the debit instrument issuer notifies the customer by use of a prearranged positive or negative notification system that the deposit to the customer's account has or has not been received.

(d) In any action involving a customer and a third person, any documentation or statement required by this section to be given the customer which indicates that a payment was made to the third person shall be accepted in evidence as prima facie proof of payment.

CORRECTION OF ERRORS

SEC. 6. (a) If a debit instrument issuer, within sixty days after having transmitted to a customer a statement of the customer's account, receives at the address disclosed under section 5 a written notice (other than notice on an account statement or payment medium supplied by the debit instrument issuer if the issuer so stipulates with the disclosure required under section 5 from the customer in which the customer—

(1) sets forth or otherwise enables the issuer to identify the name and account number (if any) of the customer,

(2) indicates the customer's belief that the statement contains an error and the amount of such error, and

(3) sets forth the reasons for the customer's belief (to the extent applicable) that the statement contains an error,

the issuer shall, unless the customer has, after giving such written notice and before the expiration of the time limits herein specified, agreed that the statement was correct—

(A) not later than 15 days after the receipt of the notice, send a written acknowledgment thereof to the customer, unless the action required in subparagraph (B) is taken within such 15 day period, and

(B) not later than 45 days after the receipt of the notice either—

(i) make appropriate corrections in the account of the customer, including the crediting or debiting of amounts erroneously stated on the account, and transmit to the customer a notification of such corrections and the debit instrument issuer's explanation of any change in the amount indicated by the customer under paragraph (2) and, if any such change is made and the customer so requests, copies of documentary evidence of the questioned transaction; or

(ii) send a written explanation or clarification to the customer, after having conducted an investigation, setting forth to the extent applicable the reasons why the debit instrument issuer believes the account of the customer was correctly shown in the statement and, upon request of the customer, provide copies of documentary evidence of the questioned transaction.

(b) For the purpose of this section, an error consists of—

(1) a reflection on a statement of a transaction which was not made or, if made, was not in the amount reflected on such statement,

(2) a reflection on a statement of a transaction for which the customer requests additional clarification including documentary evidence thereof,

(3) a reflection on a statement of goods or services not received by the customer or his designee or not delivered to the customer or his designee in accordance with the agreement made at the time of a transaction,

(4) the issuer's failure to reflect properly on a statement a deposit or payment made by or for the customer or a credit issued to the customer, or

(5) a computation error or similar error of an accounting nature of the issuer on a statement.

(c) A debit instrument issuer who fails to comply with the requirements of this section shall forfeit to the customer a sum equal to the amount in dispute, not to exceed $50.

LIABILITY FOR UNAUTHORIZED USE

SEC. 7. (a) A customer has no liability for an unauthorized use of his debit instrument where such use involves a transfer of funds from a positive balance in such account which was unauthorized unless the debit instrument issuer which permitted the transfer can prove that the customer's fraud or negligence substantially contributed to the use and that the debt instrument issuer exercised reasonable care to prevent the loss. As used in this subsection, the term "negligence" means only—

(1) writing on the debit instrument any identification code or number of the debit instrument used to effect the electronic fund transfer,

(2) keeping the identification number or code in close proximity to the debit instrument used to access the system,

(3) permitting both the number or code and the debit instrument to come into the possession of a person who makes or causes to be made any unauthorized transfer,

(4) failing to notify the debit instrument issuer of an unauthorized use within 30 days after the receipt of a statement reflecting such use shall be liable for any unauthorized use after the date of receipt of such statement if such use could have been prevented by notification on or after such date of receipt, or

(5) failing to promptly notify the debit instrument issuer immediately after the loss or theft of a debit instrument which may activate a transfer without an identification number or code.

(b) A customer's liability shall not exceed $100 except where the issuer can establish fraud on the part of the customer or that the customer failed to promptly report the loss, theft, or unauthorized use of a debit instrument. A customer shall have no liability for any unauthorized use or transfer from an electronic fund transfer account after he notifies the debit instrument issuer of such loss except in cases of customer fraud.

(c) The liability of a customer for any unauthorized transfer from his account where an extension of credit is or may be involved shall be determined in accordance with section 133 of the Truth in Lending Act.

LIABILITY FOR SYSTEM MALFUNCTION

SEC. 8. (a) In any case where a customer initiates an electronic fund transfer with a debit instrument in payment of an obligation at a customer terminal, and such transfer is delayed through no fault of the customer, the customer has no obligation to make the payment pending completion of the electronic transfer, unless the person entitled to receive payment has subsequently requested the customer to make payment by nonelectric means by written request.

(b) A debit instrument issuer offering an electronic fund transfer at an automated-teller-machine or a customer terminal which malfunctions shall be liable to a customer (1) for incidental damages directly caused by delay or failure to make a payment resulting from such malfunction, or (2) for incidental damages directly caused by a refusal of a third party to honor a debit instrument of that system resulting from a failure promptly to credit a deposit or payment because of such a malfunction, except that such issuer shall not be liable—

(A) if it can demonstrate that it has employed reasonable care to prevent such a malfunction or the cause of such malfunction is due to circumstances beyond its control; or

(B) for damages caused by a customer's failure to meet an obligation on account of a malfunction of an automated teller machine if that debit instrument issuer can demonstrate that it has exercised reasonable care to prevent such malfunction.

(c) A debit instrument issuer has no liability to a customer for damages in any case where it can demonstrate that the customer knew or should have known at the time he attempted to initiate the transaction that the system was not functioning properly.

WAIVER OF RIGHTS

SEC. 9. A debit instrument issuer may not require, as part of any contract or agreement to provide debit instrument services or as a condition of such services, that a customer waive any right conferred by or cause of action which may accrue under this Act.

CIVIL LIABILITY

SEC. 10. (a) Any debit instrument issuer who willfully fails to comply with any requirement imposed under this Act with respect to any customer is liable to that customer in an amount equal to the sum of—

(1) any actual damages sustained by such person as a result of the failure; and

(2) (A) in an individual action, such amount of punitive damages as the court may allow, or

(B) in the case of a class action, such amount as the court may allow, except that the total recovery in such action shall not be more than the lesser of $500,000 or 1 per centum of the net worth of the debit instrument issuer.

(b) Any debit instrument issuer who is negligent in failing to comply with any requirement imposed by this Act with respect to any customer is liable to that person in an amount equal to the sum of any actual damages sustained by such person as a result of the failure.

(c) In the case of any successful action to enforce the foregoing liability, the costs of the action, together with a reasonable attorney's fee in relation to the work expended and costs shall be awarded to the plaintiff. On a finding by the court that an action under this section was brought in bad faith or for purposes of harassment, the court shall award to the defendant attorney's fees reasonable in relation to the work expended and costs.

(d) In determining the amount of award in any class action under subsection (a)(2)(B), the court shall consider, among other relevant factors, the frequency and persistence of failures of compliance by the defendant, the resources of the defendant, the number of persons adversely affected, and the extent to which the defendant's failure of compliance was intentional.

(e) A debit instrument issuer may not be held liable in any action brought under this Act if the issuer shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adapted to assure compliance.

(f) An action to enforce any liability created by this Act may be brought in any appropriate United States district court without regard to the amount in controversy, or in any other court of competent jurisdic-

tion, within one year from the date on which the liability arises.

ADMINISTRATIVE ENFORCEMENT

SEC. 11. (a) Compliance with the requirements imposed under this Act shall be enforced under—

(1) section 8 of the Federal Deposit Insurance Act, in the case of—

(A) national banks, by the Comptroller of the Currency,

(B) member banks of the Federal Reserve System (other than national banks), by the Board of Governors of the Federal Reserve System.

(C) banks insured by the Federal Deposit Insurance Corporation (other than members of the Federal Reserve System), by the Board of Directors of the Federal Deposit Insurance Corporation;

(2) section 5(d) of the Home Owners' Loan Act of 1933, section 407 of the National Housing Act, and sections 6(i) and 17 of the Federal Home Loan Bank Act, by the Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Insurance Corporation), in the case of any institution subject to any of those provisions; and

(3) the Federal Credit Union Act, by the Administrator of the National Credit Union Administration with respect to any Federal chartered or insured credit union.

(b) For the purposes of the exercise by an agency referred to in subsection (a) of its powers under any Act referred to in that subsection, a violation of any requirement imposed under this Act shall be deemed to be a violation of a requirement imposed under that Act. In addition to its powers under any provision of law specifically referred to in subsection (a), each of the agencies referred to in that subsection may exercise, for the purpose of enforcing compliance with any requirement imposed under this Act, any other authority conferred on it by law.

(c) Except to the extent that enforcement of the requirements imposed under this Act is specifically committed to some other Government agency under subsection (a), the Federal Trade Commission shall enforce such requirements. For the purpose of the exercise by the Federal Trade Commission of its functions and powers under the Federal Trade Commission Act, a violation of any requirement imposed under this Act shall be deemed a violation of a requirement imposed under that Act. All of the functions and powers of the Federal Trade Commission under the Federal Trade Commission Act (except section 18 and 19) are available to the Commission to enforce compliance by any person with the requirements imposed under this Act, irrespective of whether that person is engaged in commerce or meets any other jurisdictional tests in the Federal Trade Commission Act.

FRAUDULENT USE OF A DEBIT INSTRUMENT

SEC. 12. (a) Whoever knowingly in a transaction affecting interstate or foreign commerce, uses or attempts or conspires to use any counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument to obtain money, goods, services, or anything else of value which within any one-year period has a value aggregating $1,000 or more; or

(b) Whoever, with unlawful or fraudulent intent, transports or attempts or conspires to transport in interstate or foreign commerce a counterfeit, fictitious, altered, forged, lost, stolen or fraudulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained; or

(c) Whoever with unlawful or fraudulent intent, uses any instrumentality of interstate or foreign commerce to sell or transport a counterfeit, fictitious, altered, forged, lost, stolen or fraudulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained; or

(d) Whoever knowingly receives, conceals, uses, or transport money, goods, services, or anything else of value (except tickets for interstate or foreign transportation) which (1) within any one-year period has a value aggregating $1,000 or more, (2) has moved in or is part of, or which constitutes interstate or foreign commerce, and (3) has been obtained with a counterfeit, fictitious, altered, forged, lost, stolen or fraudulently obtained debit instrument; or

(e) Whoever knowingly receives, conceals, uses, sells, or transports in interstate or foreign commerce one or more tickets for interstate or foreign transportation which (1) within any one-year period have a value aggregating $500 or more, and (2) have been purchased or obtained with one or more counterfeit, fictitious, altered, forged, lost, stolen or fraudulently obtained debit instrument; or

(f) Whoever in a transaction affecting interstate or foreign commerce furnishes money, property, services, or anything else of value, which within any one-year period has a value aggregating $1,000 or more, through the use of any counterfeit, fictitious, altered, forged, lost, stolen or fraudulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained—

shall be fined not more than $10,000 or imprisoned not more than ten years, or both.

EFFECTIVE DATE

SEC. 13. The provisions of the Act shall become effective one year after the date of enactment of this Act.

SECTION-BY-SECTION ANALYSIS

SECTION 1. The Act is cited as the "Fair Fund Transfer Act of 1978".

SEC. 2. FINDINGS AND PURPOSES.—States that the use of electronic fund transfers may bring conveniencies and efficiencies benefitting all participants in the payments system. Since future developments involve a degree of speculation, the appropriate approach is to permit development in a free market environment. However, since existing law in the consumer protection area is incomplete or not applicable to some aspects of the new financial service concepts, it is the purpose of the Act to provide a basic framework establishing the rights, liabilities, and responsibilities of all participants in electronic fund transfers activated by a debit instrument and to guarantee consumers a number of basic rights.

SEC. 3. DEFINITIONS.—Defines a debit instrument issuer, a debit instrument, an electronic fund transfer, an automated teller machine, a customer terminal, an account, a person, a customer, and a financial institution.

SEC. 4. DISCLOSURE OF CUSTOMERS' RIGHTS AND OBLIGATIONS.—Requires that before opening a debit account, the debit instrument issuer shall disclose in writing the procedure for the correction of errors and the customer's liability for unauthorized transfers; the place to report errors and loss of a debit instrument; a full description of service charges and, where there are credit features, the method used to activate a particular transaction, and the charge for each type of transaction.

In case of an existing account, the issuer shall disclose to the customer after the close of the first full monthly cycle after the effective date of section 4, the information required in section 4. In the case of any account that does not have debit features, before the debit features are added the required information must be disclosed to the customer.

At least one month or one monthly cycle before the change in any term adverse to the customer, the issuer shall disclose to the customer any such change.

SEC. 5. DOCUMENTATION OF TRANSFERS.—(a) A written receipt shall be made available to the customer in conjunction with every electronic fund transfer transaction at an automated teller machine or customer terminal reflecting at least the payee and payor and the amount, date and nature of the transfer. In the case of a deposit, the receipt shall reflect at least the depositor, depository, and the date and amount of the deposit.

(b) The issuer shall mail to the customer a monthly statement reflecting at least the outstanding balance; the amounts and dates of credits and debits identifying the type of transaction; an identification of each point of sale transaction and the address for receiving statement inquiries.

(c) Descriptive statements need not be mailed to customers whose only transaction is a preauthorized credit to the customer's account.

(d) The receipts and statement shall be accepted in evidence as proof of payments.

SEC. 6. CORRECTION OF ERRORS.—(a) If a debit instrument issuer, within 60 days after transmitting the statement, receives from the customer a written notice identifying the customer and an error in the customer's account, the issuer must not later than 15 days acknowledge the notice and within 45 days make corrections or after investigating the matter explain why the issuer feels the account is correct providing, upon request, copies of documentary evidence of the transaction.

(b) Error consists of—

(1) a statement of a transaction which was not made or was an incorrect amount,

(2) a statement of a transaction for which the customer requests additional clarification including documentary evidence.

(3) a statement of goods or services not delivered in accordance with the agreement,

(4) the failure to properly reflect a deposit, payment or credit, or

(5) a computational error.

(c) An issuer who fails to comply with the section shall forfeit to the customer the amount in dispute, not to exceed $50.

SEC. 7. Liability for Unauthorized Use—A customer has no liability for unauthorized use of his debit instrument unless the debit instrument issuer can establish the transfer resulted from the customer's fraud or negligence. Negligence means—

(1) writing the identification number on the debit instrument,

(2) keeping the identification number in close proximity to the debit instrument,

(3) permitting the number and debit instrument to come into the possession of unauthorized use,

(4) failure to notify the debit instrument issuer of an unauthorized use within 30 days after receipt of a statement reflecting such unauthorized use,

(5) failing to promptly report the loss or theft of a debit instrument which can activate a transfer without a number.

(b) A customer's liability shall not exceed $100 except for fraud on the part of the customer or failure of the customer to promptly report the loss or unauthorized use of an instrument. A customer shall have no liability for unauthorized use after giving notification of loss of the debit instrument, except in the case of customer fraud.

(c) Liability for unauthorized transfer involving an extension of credit shall be determined by section 133 of the Truth in Lending Act.

Sec. 8. Liability for System Malfunction.—(a) A customer has no liability for a delay at a customer terminal, which is not the fault of the customer, unless the payee has

subsequently requested payment by non-electronic means.

(b) A debit instrument issuer shall be liable for damages to a customer caused by delay or failure of a machine or terminal because of a malfunction to make a payment or because of the refusal to honor a debit instrument because of a failure of the system to promptly credit a deposit or payment because of a malfunction, except that such issuer shall not be liable (A) if it used reasonable care to prevent the malfunction or the cause of the malfunction was due to circumstances beyond its control; or (B) for damages caused by a customer's failure to meet an obligation on account of a malfunction of an automated teller machine if the issuer exercised reasonable care to prevent such malfunction.

(c) A debit instrument issuer has no liability where it can demonstrate that the customer knew or should have known at the time he attempted to initiate the transaction the system was malfunctioning.

SEC. 9. WAIVER OF RIGHTS.—A debit instrument issuer may not require a customer to waive any right conferred under the Act.

SEC. 10. CIVIL LIABILITY.—A debit instrument issuer who willfully violates the Act shall be liable to the customer for (1) actual damages; (2) in an individual action, such punitive damages as the court may allow, or in a class action, such amount as the court may allow with total recovery not to exceed the lesser of $500,000 or 1 per centum of the net worth of the debit instrument issuer.

(b) Any debit instrument issuer who is negligent in failing to comply with the Act is liable to the customer for actual damages.

(c) In case of a successful action, costs together with reasonable attorney's fees shall be allowed the plaintiff. Where the action has been brought in bad faith, the court shall award attorney's fees to the defendant.

(d) In determining a class action award, the court shall consider the frequency of violations, the resources of the defendant, the number of persons adversely affected, and the extent the violation was intentional.

(e) A debit instrument issuer may not be held liable if he establishes that the violation was not intentional and resulted from a bona fide error.

(f) An action may be brought in any appropriate United States district court without regard to the amount in controversy within one year from the date the liability arises.

SEC.. 11. ADMINISTRATIVE ENFORCEMENT.—(a) Compliance with the Act in the case of financial institutions shall be enforced by the appropriate bank regulatory agencies.

(b) For the purposes of compliance, a violation of the Act shall be deemed a violation of the bank regulatory agencies' supervisory laws.

(c) Where enforcement is not specifically committed to an agency, the Federal Trade Commission shall enforce the Act. The Federal Trade Commission may exercise all enforcement functions under the Federal Trade Commission Act except those contained in sections 18 and 19.

SEC. 12. FRAUDULENT USE OF INSTRUMENTS CARD.—It is made a Federal crime to fraudulently use a debit instrument.

SEC. 13. EFFECTIVE DATE.—The effective date of the Act is one year after enactment.

By Mr. ROTH:

S. 2471. A bill to prohibit employment agency charges for public service jobs provided pursuant to the Comprehensive Employment and Training Act of 1973; to the Committee on Human Resources.

Mr. ROTH. Mr. President, the bill I am introducing is very simple. It will prohibit employment agencies from charging a fee for placing clients in CETA public service jobs.

Frankly I was very surprised to learn that this was possible. Certainly it was never the intent of Congress to permit the diversion of CETA money to employment agencies. But apparently it is perfectly legal for an employment agency to refer a client to a CETA job, then charge a fee if the client is hired, even though these jobs are posted publicly and advertised.

This problem was brought to my attention by an article in this morning's Wilmington newspaper which, if there is no objection, I would like to have inserted in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. ROTH. I hope that my amendment will be adopted by the Committee on Human Resources this year when it revises the Comprehensive Employment and Training Act, which I understand is planned. But if the committee does not adopt this change, I intend to offer this bill as a floor amendment. A loophole like this makes a mockery of a program intended to aid the jobless and the poor.

EXHIBIT 1

GETTING U.S. FUNDED JOB COST HER $472

(By Hugh Cutler)

A private job-placement firm run by a former New Castle County councilman received a $472 fee to place a woman in a federally funded county job last April.

The firm, Casey Employment Services Inc., later was the target of a complaint by the woman before a state regulatory agency but her charge is being dismissed because she failed to file it within the 12-week legal limit.

U.S. Department of Labor officials said they frown on the practice by government agencies of accepting referrals from placement firms for federally funded jobs but there is nothing illegal about it.

Jane C. Wright, 23, now a planning aide in the county Department of Community Development and Housing, was hired April 18 as a clerk-typist fluent in Spanish. She said she answered a newspaper advertisement for the job listed by Casey Employment Services and paid the firm a $472 fee for referring her to the county personnel office.

The placement firm is headed by Andrew J. "Jack" Casey, former Republican state senator of Maplechase and one-term county councilman whose second-term bid was cut off in a September 1976 primary. Casey left office in January 1977.

In her Oct. 4 complaint letter to the state Division of Business and Occupational Regulation, Ms. Wright explained how she landed a federally funded Comprehensive Employment and Training Act (CETA) job, then said:

". . . I am convinced that government positions should not be employment agency-related. Additionally, CETA employment is basically an opportunity for the unemployed. Agency-related positions tend to defeat CETA's purpose by placing the newly hired into debt."

In an interview, Ms. Wright said that "right now the money isn't the problem," even though she had to get a bank loan to pay the Casey agency fee. She said she had since learned that the county has a policy of not listing jobs through private agencies.

Casey yesterday said his firm "acted in very good faith" in Ms. Wright's behalf. "She contracted with us to get a job and she got a job," he said. "We spent a lot of time with her. She never complained to us."

Casey said he did not realize the county job he found her was a CETA post, but he did know it was federally funded. He said he knew of no regulation his firm had violated by placing her there.

"I know they (the county) accept referrals all the time from other agencies," Casey said. He said his firm had been making such referrals for 26 years.

Casey said he "stopped doing business" with the county when he took office as a councilman. During his term, however, he made some job referrals to county posts but took no fees, he said.

Kenneth A. Walls, business and occupational regulation division director, yesterday said Ms. Wright and the Casey firm will be notified today that her complaint has been dismissed.

He cited a division regulation that any complaint about placement agencies must be directed to the division "no later than 12 weeks after the date on which the alleged violation occurred or is discovered."

Walls said he plans to write federal CETA administrators that, "if this type of activity is unethical in their opinion, they should notify their personnel."

Lawrence E. Crowder, equal employment and compliance office director for the U.S. Department of Labor employment and training administration in Philadelphia, said his legal staff found no prohibition against private agency referrals for CETA jobs.

"Of course we frown on it," Crowder said. "We certainly will discuss [the practice] with the people in that area . . . to try to keep that from happening in the future . . . Hopefully, all I'll have to do is request it."

A similar case occurred in Ohio about 18 months ago when a placement firm collected 10-percent fees for placing people in government jobs, according to Jack Hashian, spokesman for the labor department's employment and training administration in Washington. Hashian said the FBI as well as his own office investigated that case, but nothing illegal was found.

New Castle County's personnel department "does not work through employment agencies and does not pay fees," said Bernard E. Grady, chief personnel administrator, in an Oct. 19 letter to the state regulatory agency about Ms. Wright's case.

Grady said, however, that "because the job opportunities are in the public domain and are announced publicly . . . we cannot refuse referrals from employment agencies."

Grady explained that Casey came to his office last winter without appointment and, as Grady recalled, asked if any jobs were open.

Gradey said the Spanish-speaking clerk-typist post was mentioned. He said Casey may have asked if he could refer someone for the job. Casey may have assumed from the conversation that a referral agreement existed, Grady said, but he personally believed "no such agreement existed in any formal business sense."

Casey's firm advertised the job Feb. 28 in the News-Journal papers, however, even though the county already had posted the opening on a public bulletin board.

Ms. Wright answered the Casey ad and eventually got the $6,742-a-year job, paying Casey's firm a 7-percent referral fee, or $472.

Ms. Wright, a recent University of Delaware graduate with degrees in Spanish and psychology, said that at the time, she didn't consider a referral to a county job as unusual. But family and friends typically expressed surprise whenever she explained how she got her job.

By Mr. CASE (for himself and Mr. PERCY):

S. 2472. A bill to authorize the Secretary of State to implement solar energy and other renewable energy projects in certain buildings owned by the United States in foreign countries; to the Committee on Foreign Relations.

FOREIGN MISSION SOLAR ENERGY DEMONSTRATION ACT

Mr. CASE. Mr. President, I am today introducing a bill that will require the Secretary of State to implement projects for the application of solar energy or other forms of renewable energy in U.S. Embassies, Chanceries, and other foreign service buildings overseas.

In part this bill is an outgrowth of a recent study conducted by the Office of Technology Assessment. The OTA draft study, made public last July, was the most exhaustive analysis of small-unit solar technology ever undertaken. While most of its findings applied to domestic use of solar energy, it also concluded that solar energy technology "would be particularly attractive in developing nations, where inexpensive labor and high electricity costs would make solar energy relatively attractive, and that use of solar units might relieve some of the international tensions created by competition over conventional energy supplies."

The experience of the American Embassy at Tel Aviv lends support to that finding.

Solar heated hot water installations were made at two U.S.-owned residential properties in Tel Aviv in April 1975. Based on the experience of the first 4 months of operation of these installations; the State Department estimated annual savings of $300 to $400 a year on electricity consumption by these two residences.

"If similar systems were installed at 26 other residences—in Tel Aviv—substantial additional savings of approximately $7,800 to $10,400 per year in utility costs could be achieved," the State Department reported.

Upon request, the State Department provided a list of 130 other diplomatic posts throughout the world where solar hot water installations could be made profitably. In addition, the State Department identified 11 major projects that might be utilized at posts in Brazil, Mauritania, Niger, Pakistan, India, Iran, Senegal, Egypt, New Zealand, and Bangladesh.

The major projects, which would cost an estimated $4,400,000, range from solar absorption air-conditioning, to solar photovoltaic generation of electricity, to solar wind generation of electricity.

The State Department estimates that the 11 major projects and the 130 solar hot water installations could be implemented for a total, including administrative costs, of $5 million.

My bill authorizes $5 million to be appropriated for this program for the fiscal year beginning October 1, 1978.

Based on the experience of the American Embassy at Tel Aviv, the initial costs of these projects can be expected to be recovered in a relatively short period of time.

But promoting energy efficiency at U.S. diplomatic posts is not the only purpose of the bill.

The use of American technology at our diplomatic posts also is intended to serve as a showcase for the technology. It is intended to demonstrate to the host countries how American technology can be used in their countries to help solve their energy problems.

In the process, it is intended to broaden the demand for this technology and thereby reduce production costs for the benefit of both domestic and foreign customers.

At the same time, it is intended to make U.S. diplomatic posts more energy self-sufficient and less reliant on interruptible local energy supplies, thus providing an added degree of security vital to the operation of sensitive systems within U.S. missions abroad.

A bill identical to the bill I am introducing is being introduced simultaneously in the House by Representative JEFFORDS of Vermont.

The distinguished Senator from Illinois, Mr. PERCY, has asked to join me in introducing this bill and I am happy to have him do so. I ask unanimous consent that his name be added as a cosponsor of the bill. I also ask unanimous consent that a copy of the bill be printed at this point in the RECORD.

I believe this is a good bill and I hope that it will receive widespread support from my colleagues in the Senate.

By Mr. PELL (for himself, Mr. WILLIAMS, Mr. JAVITS, and Mr. STAFFORD):

S. 2473. A bill to amend the Higher Education Act of 1965 to improve the basic educational opportunity grants program; to the Committee on Human Resources.

COLLEGE OPPORTUNITY ACT OF 1978

Mr. PELL. Mr. President, as chairman of the Senate Subcommittee on Education, Arts, and Humanities, I have been deeply concerned over the escalating costs of college education. The fact is that many American families are finding it increasingly difficult to pay for a college education for their children.

The problem is most acute for middle-income families who find themselves pinched to the bone by college costs, but ineligible for existing Government assistance programs.

This development—the pricing of higher education out of the reach of middle-income families—is the greatest challenge facing higher education today, and it is of importance not just to the families and young people involved, but to all of our society. As a nation, we cannot afford to permit the doors of higher education to be squeezed shut to any segment of our society.

For this reason, I am introducing, today, the College Opportunity Act of 1978. This legislation is aimed at helping middle-income families meet the costs of higher education.

Under this legislation, an average family of four with an income of $25,000 and with one child in college and with no unusual expenses will be eligible for an educational assistance grant of $250. Families with more children in college, lower incomes, or with unusual expenses, would be eligible for larger grants. These grants would be provided through a major revision of the existing basic educational opportunity grant program.

Before I outline the provisions of this proposal in greater detail, I think it appropriate to review our past efforts to provide student assistance in higher education, and the current plight of middle-income families. When Congress enacted the 1976 higher education amendments, we reaffirmed the philosophy that underlies Federal policy. That philosophy is that the Federal role in higher education is to guarantee access to as many of our citizens as possible. The Federal goal is to try to help every student receive some higher education. My goal, which I hope we eventually attain, is to see that every citizen with the desire and the ability shall be able to have 16 years of education as a matter of right. We are moving in that direction.

As chairman of the Subcommittee on Education, Arts, and Humanities, of the Committee on Human Resources, I have dedicated my efforts to broadening educational opportunities for all Americans. Thomas Carlyle said that "should one man die ignorant who had the capacity for knowledge, this I call a tragedy." I think our efforts in the past have been in the direction of preventing that tragedy.

I had the satisfaction of initiating legislation that is today providing assistance to many needy students through the basic educational opportunities grant program. This year, almost 2 million students are receiving basic grants. Since the initial enactment of that program, it has been expanded so that more and more families can qualify for these grants. We have also expanded other programs, such as the direct student loan program, and the guaranteed student loan program, to make these programs available to more students.

These programs work well. They provide the opportunity of a college education to a significant segment of society that might not attend college without these programs.

I think many young people, who in the past may have thought that a college education was beyond their financial reach, now find that they are able to attend college.

We all know that these programs have been limited. It is fair to say that they have benefited, for the most part, students from low-income families. This was purposeful, since when these programs were initiated, it was students from low-income families who were being denied the benefits of higher education simply because they could not afford it. Thus, we focused our original efforts on

those students who needed our assistance the most. The programs which sprang from those efforts—basic grants, direct student loan, work-study, guaranteed student loans—were primarily need-based programs. But, the developing burden many middle-income families are facing in their attempts to travel the road of higher education requires that we reexamine the adequacy of these programs. As Sir William James said:

> The world . . . is only beginning to see that the wealth of a nation consists more than anything else in the number of superior men that it harbors.

Our goal is to realize the full potential of superior men and women within this country, yet parents who once nourished the dream of sending their children to college are today finding it increasingly difficult to do so. Let me give you some illustrations from my home State of Rhode Island to demonstrate the full dimensions of this problem.

Today, in Rhode Island, the average annual cost for a student attending Rhode Island College is approximately $2,100. This includes tuition, room and board. Ten years ago that same cost was less than $1,100. Thus, in 10 years the cost to attend Rhode Island College has increased almost 100 percent. That figure alone is sobering, yet it is estimated that 10 years from now, those costs will increase by about 100 percent again. Thus, for the academic year 1987–88, it is projected that the average cost for a student attending Rhode Island College will be almost $4,200.

The same picture exists for the University of Rhode Island. Ten years ago the cost was about $1,200. Today it is $2,600, an increase of 113 percent. Ten years from now it is estimated the cost will be $5,600, more than a 100-percent increase. If we look at Providence College, or Brown University, or the Rhode Island School of Design, the picture is proportionately exactly the same.

This is the reality of the present, and the prospect for the future. What does this mean to a family? How can it plan for its child's college education?

If a family has a child, today, who is 1 year old, it is estimated that that family will have to save an average of $1,570 a year so that they will have the funds to pay for 4 years of education at a public university when their child becomes old enough to enter college. If a family has a child who is 8 years old, and that family has not started saving for his or her college education, they will have to begin saving about $2,000 a year if they are to afford the cost of 4 years of public university education.

If these same two families decide they want to send their child to a private college, they will have to save even more money each year. For the family with the 1-year-old child, they will have to save about $2,700 a year. The family with the 8-year-old child will have to save about $3,500.

These figures are startling. I admit that they might not represent what a family will actually spend for their child's education, since there are grant and loan programs that will influence how much out-of-pocket money will have to be expended. But, I think these figures are accurate in presenting to us the harsh reality that many American families are experiencing in their attempts to secure the American dream of a college education for their children.

Action is necessary to help these families. The time has come to expand our view concerning who needs assistance, and recognize that middle-income Americans need our help. These citizens are in a difficult situation. They are considered to have too much money to be eligible for student assistance programs, yet they themselves know that they do not have enough money to send their children to college. These are the families that have to make particularly painful financial sacrifices if they are to give their child the chance to attend college. I think we have a responsibility to help these families.

Under the legislation I am introducing, an average family of four, with an income of $25,000, one child in college and no unusual expenses, will be eligible for a basic education opportunity grant of $250. Currently, about 60 percent of basic grant funds go to families with incomes of less than $10,000. Because of this, it is probably true that we are meeting a substantial part of the financial needs of most of the students from families in that income level. My proposal would continue to meet those needs, and at the same time greatly increase the number of students eligible for basic grants. The result of such an increase would be that 60 percent of basic grants under my proposal would go to students from middle-income families. The legislation would provide a new direction to the program, aimed at helping the middle-income families while at the same time continuing the assistance we have provided students from low-income families.

I would provide this new direction by legislatively reducing the amount of money a family is expected to contribute to their child's college education under the basic grant program.

As we all know, many middle-income families find themselves ineligible for such grants because the Federal Government, under existing law, expects them to contribute too much of their income to their children's educational expenses. But, these families know that they simply do not have the money to spend on education that Uncle Sam thinks they have.

Most of the letters I receive from parents concerning basic grants raise this point. Parents complain that they are unable to qualify for a basic grant because the Federal Government thinks their income is too high.

My legislation would change that. It would reduce the amount the Government requires a family to contribute for their child's education, thus bringing that family contribution more in touch with reality. This would be done by assessing what is called discretionary net income—the amount which the basic grant program arrives at after Federal taxes, unusual expenses, and a family size offset are subtracted from adjusted gross income—at a straight, across-the-board rate of 10.5 percent.

Today, that assessment rate is 20 percent of the first $5,000 of discretionary net income and 30 percent of any remainder. My proposal would cut in half the existing assessment rates. It would add approximately 1½ million students to the basic grant program, making a total of more than 3,600,000 students eligible for basic grants. It would cost about $1.2 billion more than the existing basic grants program.

We all know that there have been other proposals offered recently to provide assistance in meeting college costs. Probably the most talked about are proposals for a tuition tax credit.

I think my proposal has several advantages over a tuition tax credit. First, my proposal would be less costly. Second, my proposal would not add to Federal administrative problems nor would it create another Federal bureaucracy. And, it would focus assistance on those families, both lower and middle income, who need assistance the most.

Although tuition tax credit proposals are gathering support not only in the Senate, but throughout the country, I think there are several features of these proposals that have not been fully discussed.

First, the proposed goal of a tuition tax credit is that it would provide assistance to middle-income families. Yet, under the proposal submitted by Senator ROTH, which is the proposal that has been most discussed, less than half of the tax credit would go to middle-income families. Almost 40 percent of the benefits of the tax credit would go to families with incomes in excess of $25,000. Middle-income families would benefit from a tax credit, but not as much as they would under a need-based program.

Also, a tuition tax credit would apply to everyone equally. This is often advanced as one of the attractive aspects of such a program. Yet, I think it continues the kind of inequities that have caused our tax system to be criticized. Tax credits do not focus tax breaks on those who need them, but give tax breaks to everyone, across the board, regardless of need. The high-income family as well as the lower and middle income families receive the same break. The wealthy lawyer who sends his child to a low-cost community college gets a $250 credit. The factory worker who struggles to send his child to Harvard or Yale also gets $250. I think this is inequitable. Our tax system should be used to correct income inequities in our society, not exacerbate them.

In addition, I think tuition tax credits might offer a false hope to families. All families would receive a $250 tax credit for each child in college. Such a credit would not lessen the out-of-pocket expenses that a family would have to make to pay their child's college bills each fall. They would still have to find the money to pay these costs. Only when they made out their income tax return would they be able to take the credit. Chances are they would never see any actual money. Also, there is a good chance

that an across the board tax credit to everyone with a child in college would result in an across the board tuition increase at every college. What was thought of as a benefit could quickly disappear.

In addition to all of these features, a tuition tax credit would further complicate an already complicated tax system. Audits to insure that an individual was eligible for a credit would have to be conducted. Bureaucratic intrusion into the lives of families and into the operations of educational institutions, would increase. Additional information would have to be provided on an income tax return that is already too complex. I think we can all imagine the increased bureaucracy that would develop because of these requirements.

And, finally, the Roth tuition tax credit would cost at least $1.5 billion in the first year, which is more than the cost of my proposal.

For all of these reasons, I do not think a tuition tax credit is the best solution to what we all recognize to be a serious problem.

I believe my legislation offers an easier, more effective, and more efficient way to approach the problem of easing the burden of financing a college education.

My proposal would cost less than the Roth tuition tax credit, and it would have the additional benefit of focusing aid on those who really need it.

At the same time, several benefits that do not accompany a tax credit would probably accrue with my proposal. It would require no new program or no new bureaucracy. The existing basic grants program can readily and easily accommodate the expansion I propose. By targeting assistance on those who really need it, we would not involve the Federal Government in giving the taxpayers' money to individuals who can very well afford to pay for their children's college costs. And, colleges would be less likely to raise tuition charges because the additional aid would not be granted across the board to all students, but would be directed to students who most need help.

I think my proposal makes sense. I think it is consistent with a longstanding Federal policy of focusing educational aid on those who need it most.

I think it represents a much-needed change in Federal educational policy, and I am convinced it will go a long way toward making college affordable once again for middle income families.

Over 100 years ago Benjamin Disraeli said that "upon the education of the people of this country the fate of this country depends." What was true of England then is equally true of our country today. Through our combined efforts, education can once again be made available and affordable to all those who want it, and in so doing the fate of America will be secure.

Mr. President, I ask unanimous consent that the text of this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2473

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as "The College Opportunity Act of 1978".

SEC. (2) Section 411(a)(3)(B) of the Higher Education Act of 1965 is amended by adding at the end thereof the following new division:

"(iv) Beginning with the academic year 1979–1980 and thereafter, in determining the expected family contribution under this subparagraph no rate in excess of 10.5 per centum shall be applied to parental discretionary income.".

PAYING COLLEGE COSTS—A SOUND ALTERNATIVE

Mr. JAVITS. Mr. President, today I join with my colleague, the distinguished chairman of the Subcommittee on Education, Arts and Humanities, in cosponsoring legislation to amend the basic educational opportunity grants program. I believe this legislation is a preferred alternative to an untargeted tax credit available tc all persons regardless of their financial circumstances.

At the conclusion of the first session of this Congress, I commented on my interest in such an alternative. The proposal for a college tuition tax credit was not included in the final conference report of the social security amendments. I opposed the college tuition tax credit provision in the Senate version of this legislation for two primary reasons. First, the amendment had no consideration of the financial needs of a family. In some cases, it would have given benefits to persons who clearly did not need the Federal Government to provide assistance to them in meeting tuition costs of a family member. Second, the amendment would have provided great incentive for all colleges simply to lift tuition by the $250 figure. Third, the cost would preempt other help in higher education based cr need and merit. This would have left the taxpayer in no better position than he started, while the Federal Government would lose an estimated $1.2 billion in revenue. For these reasons, the proposals seemed unwise and I pledged myself to seeking an appropriate alternative.

The bill I am cosponsoring today provides such an alternative. An individual family at the $25,000 annual income level will receive the same level of benefit in the form of a basic grant, $250 per year. Families with lesser financial resources will receive proportionately greater benefits.

If enacted, this proposal can be implemented quickly, because it requires only an adjustment in the existing and highly successful basic educational opportunity grants program. Because the benefits are not available to everyone, colleges will be constrained from tuition increases. The benefits will accrue to individuals based on their economic need and the cost of the education which they choose. Students who have higher costs because they have chosen a nonpublic college will receive proportionately greater assistance. In the present price structure of higher education, this seems a reasonable approach.

The Senate has on several occasions passed college tuition tax credit measures, although none have been enacted into law. I have not supported these proposals for the reasons I have stated. I very much hope that my colleagues who previously voted in favor of these proposals will examine this bill's alternative—it is a much better approach.

By Mr. KENNEDY (for himself, Mr. SCHWEIKER, Mr. WILLIAMS, Mr. JAVITS, Mr. PELL, and Mr. HATHAWAY):

S. 2474. A bill to amend the Public Health Service Act to extend through the fiscal year ending September 30, 1983, the assistance program for community health centers; migrant health services; to extend through the fiscal year ending September 30, 1981; hemophilia; home health services; to extend through the fiscal year ending September 30, 1979, the assistance programs for comprehensive public health services; hypertension programs; disease control programs; venereal disease programs; genetic diseases programs; and lead-based paint programs, and for other purposes; referred to the Committee on Human Resources.

HEALTH SERVICES EXTENSION ACT OF 1978

Mr. KENNEDY. Mr. President, today my colleagues, Messrs. SCHWEIKER, PELL, JAVITS, HATHAWAY, WILLIAMS and I introduce the Health Services Extension Act of 1978. This act will extend the various programs administered in the Public Health Services which provide grants for the provision of services.

The legislation extends existing authority for grants to the States for comprehensive public health services (under section 314(d) for 1 year. These formula grants to the States are used for a variety of purposes depending upon State needs. The funds under this program account for less than 5 percent of the total funds expended through State health departments. But the grants are an essential part of the Federal-State partnership for health, providing a stable and flexible source of dollars for the States in their general public health activities.

The extension for only 1 year is proposed at this time so that we may consider this entire program in relation to a comprehensive review of public health and disease control programs, and the Federal-State relationships in public health generally. I anticipate, Mr. President, that after our hearings and further analysis, we will have a clearer picture of these relationships and will be able to either extend this legislation for 3 more years, or amend it consistent with other programs.

DISEASE CONTROL

Also included in this legislative proposal, Mr. President are extensions of expiring authorities supporting a series of preventive health and disease control programs. These include initiatives in the areas of immunization and rodent control authorized under section 317 of the PHS Act, the venereal disease control program authorized under section 318, the Lead-Based Paint Poisoning Prevention Act, and the formula grant program under section 314(d) for hypertension. Most of these programs are administered by the Center for Disease Control. In addition,

the program of grants related to genetic disease under title XI is included in these extensions.

We are proposing that all these programs be extended for 1 year. This limited reauthorization does not express any unhappiness with the thrust of these initiatives or their administration. Rather, we recognize that as a group they comprise a significant portion of the Federal Government's investment in direct services aimed at preventing disease. Disease prevention is one of my paramount concerns in the health field, and later in the year I intend to introduce comprehensive proposals aimed at expanding the Federal Government's commitment to preventing illness. In order to have the flexibility to integrate Federal authorities in the important area of prevention, we are reserving the option of reviewing these expiring authorities later this year in the context of a broad prevention effort. We are not at this time prejudging which of these programs would, in fact, be integrated or which remain separate.

The only expiring program which will require significant increase in authorization is the immunization authority under section 317. This will be increased from $23 million in 1978 to $35 million in 1979. The administration has requested this increase so that it may initiate a nationwide program aimed at raising immunization levels among children from 60 to 90 percent. This should be done and I hope my colleagues will join me in supporting this important initiative. This would require immunizing 16.7 million children and would be accomplished through project grants to State and local health agencies.

The program of grants related to hemophilia (under title XI), including the grants for treatment centers (at a fiscal 1979 level of $5 million) and the grants for blood separation centers (at a fiscal 1979 level of $3.9 million) would be extended for 3 years. The hemophilia program serves as a resource for a special population and is not viewed as potentially part of a broader prevention program. Authorizations in future years would be increased by 10 percent per year.

COMMUNITY HEALTH AND MIGRANT HEALTH CENTERS

The legislation also reauthorized for 5 years both the community health centers programs (section 330), and the migrant health centers program (section 319). It maintains separate legislative authority for each of these programs, so that they can continue to provide health care designed to meet the distinct needs of the populations they serve. The bill provides $330 million for community health centers for fiscal year 1979, and a 10-percent increase in funding for each succeeding year up to and including 1983. The bill provides $40 million for migrant health centers, and $6 million for migrant hospitalization. This authorization also increases 10 percent in each succeeding fiscal year up to and including 1983.

The health center programs have demonstrated that they deliver comprehensive health services at a cost less than or comparable to services provided through other health care delivery systems. Moreover, these centers have been effective in reducing use of hard-pressed emergency room facilities, they have provided preventive services to an extent which often exceeds the traditional health care delivery systems, and they have made health services available to communities previously without health professionals or health care facilities.

The health center programs have now reached a point where the Congress should provide an expression of its confidence and reflect this in a 5-year authorization.

Since 1974, for example:

Physician productivity in health centers has increased by 30 percent.

The cost per patient visit has declined by 5 percent—at a time when similar costs in other health care delivery systems have increased at a rate of 30 percent.

Administrative costs incurred by health centers have declined by 15 percent.

Moreover, within the Health Services Administration of HEW, the administration and policy guidelines for community health centers and migrant health centers, are closely coordinated. The distinction which does exist between the two programs must be maintained in order to assure that they will continue to provide appropriate services over the next 5 years.

The funding received in the bill I am introducing today will also permit much-needed expansion in both the community and migrant health center programs.

For example, community health centers are now reaching just 9.5 percent of the 45 million people in this country living in medically underserved areas. Funding has been so limited that many centers are unable to provide the comprehensive services authorized under existing law. The authorization included in this bill will extend services to an additional 1.5 million people living in medically underserved areas; 12.5 percent of those living in medically underserved areas would potentially be reached by these centers.

With regard to migrant health centers, these programs now reach 20 percent of the 2.7 million eligible migrant and seasonal workers. Hospitalization funds are so scarce that these services can be provided only for high risk infants and mothers. Funding has been so limited that many upstream areas have no migrant health care capacity, a situation which is especially damaging to those workers whose unique concerns and needs cannot be met effectively through the existing health care system. The authorization included in this bill will increase by 156,000 the number of migrant and seasonal workers receiving services, and will extend hospitalization services to an additional 10 to 12 migrant centers.

These provisions are an expression of my conviction that the continuation of community and migrant health centers is essential, even after the enactment of national health insurance. They are cost effective; they are providing medical services in areas which would otherwise be without health care professionals or facilities; and they provide essential preventive services.

We are indebted to Senator JAVITS for developing a new proposal as part of these amendments, which would focus on the special health problems of urban areas, recognizing that community hospitals, both public and private, serve as major health resources for inner-city residents. Senator JAVITS' new initiative would provide earmarked funds under the community health centers program specifically directed at these areas. I am pleased to support this initiative as part of this health services extension bill.

NATIONAL HEALTH SERVICE CORPS

I have been a strong proponent of the National Health Service Corps since it was created in 1970 as part of the Emergency Health Personnel Act, Public Law 91–623. The corps has expanded greatly since it was created—from 20 field assignees in 1971 to a projected 1,725 in 1979. The moneys that were authorized for this program have not, unfortunately, taken into account the expansion of the scholarship program under Public Law 94–484. The current authorization level for 1979 is $57 million and the best projection for 1979 for corps expenses is $63,947,000. The bill that I am introducing today therefore raises the authorization to $64 million for fiscal year 1979.

The Subcommittee on Health and Scientific Research has some concerns about the direction of the corps because of its rapid expansion. The bill therefore directs the National Advisory Council of the National Health Service Corps and the Department of HEW to submit a report to us by February 1, 1979. This report should address the scope of the facilities and populations the corps can potentially serve. The subcommittee wants to examine the current plans of the Department to use a vast majority of the corps in the comprehensive health centers and neglecting other facilities specifically mentioned in the law. The report should address urban versus rural needs and should in particular, address why the corps has failed to address the needs of the inner city.

The NHSC is administered both under the Bureau of Community Health Services and the Bureau of Health Manpower. The study should also address the question of whether the corps is a health services program or a manpower program, and what the relationship should be between these two objectives.

HOME HEALTH SERVICES

The legislation will also continue the small program of grants to develop and expand home health services that will qualify for participation in the medicare and medicaid programs. This program, first authorized in the 94th Congress, has been in operation since 1976, providing needed funds for the initial capital development of these vital programs that deliver services to the elderly, the ill, and the handicapped at home rather than in an institutional setting.

Prior to the inauguration of this grant program there were 788 counties without a medicare certified home health

agency. In 1976, 56 grants were awarded and in 1977 56 grants were again awarded. As a result of the grant program, home health services are now being provided to 92 counties that were not previously served by a home health agency. In addition, 82 projects were funded which expanded existing agencies so that more services and patients could be covered. All the agencies supported are certified under medicare and are becoming financially viable.

However, there are still almost 700 counties without a certified home health agency and thus a continuation of the grant program is indicated and should be encouraged. In the legislation being introduced today, the health programs would be incorporated into a new section (320) of the Public Health Service Act, and the authorized level of $12 million per year, will be extended for 3 years to 1981. In addition, an authorization of $2 million for each year for purposes of training personnel for work in these agencies, particularly home health aides, is included.

Mr. President, I ask unanimous consent that the text of the Health Services Extension Act of 1978 be printed in the RECORD at this point, together with a section-by-section summary.

There being no objection, the bill and summary was ordered to be printed in the RECORD, as follows:

S. 2474

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SEC. 101. (a) This Act may be cited as the "Health Services Extension Act of 1978".

(b) Except as otherwise specially provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Public Health Service Act.

COMPREHENSIVE PUBLIC HEALTH SERVICES

SEC. 102. (a) Section 314 (d)(7)(A) (relating to authorizations for formula grants to States for comprehensive public health services is amended by striking out "and" after "1977,", and inserting before the period at the end of the sentence thereof the following: ", $107,000,000 for the fiscal year ending September 30, 1979".

(b) Title III is amended by adding at the end thereof the following new section (relating to authorizations for formula grants to States for hypertension programs):

"GRANTS FOR HYPERTENSION PROGRAMS

"SEC. 315. (a)(1) The Secretary may make grants to States (which have submitted and had approved State plans in accordance with regulations and guidelines issued by the Secretary) for the purpose of establishing and maintaining programs for the screening, detection, diagnosis, prevention, and referral for treatment of hypertension.

"(2) The Secretary shall, in accordance with such regulations as he may prescribe, allot the sums appropriated under subsection (4), among the States on the basis of the population and financial need of the respective States.

"(3) Nothing in this section shall be construed to prohibit the use of funds for hypertension programs which may be authorized and made available under any other provision of law.

"(4) To carry out the purposes of this section, there are authorized to be appropriated $15,000,000 for the fiscal year ending September 30, 1979.".

DISEASE CONTROL PROGRAMS

SEC. 103. (a) Section 317(g)(1)(A) (relating to authorizations for grants to States for disease control programs to immunize children against immunizable diseases) is amended (1) by striking out "and" after "1977,", and (2) by striking out "for fiscal year 1978" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1978, and $35,000,000 for the fiscal year ending September 30, 1979".

(b) Section 317(g)(1)(B) (relating to authorizations for grants to States for disease control programs for diseases borne by rodents) is amended (1) by striking out "and" after "1977,", and (2) by striking out "for fiscal year 1978" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1978, and $14,500,000 for the fiscal year ending September 30, 1979".

(c) Section 317(g)(1)(C) (relating to authorizations for grants to States for disease control programs, and other programs with authorizations under subparagraphs (A) and (B)) is amended (1) by striking out "and" after "1977,", and (2) by striking out "for fiscal year 1978" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1978, and $5,500,000 for the fiscal year ending September 30, 1979".

PREVENTION AND CONTROL OF VENEREAL DISEASE

SEC. 104. (a) Section 318(b)(2) (relating to authorizations for grants for projects for the conduct of research, demonstration, education, and training programs for the prevention and control of veneral disease) is amended (1) by striking out "and" after "1977", and (2) by striking out "for fiscal year 1978" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1978, and $8,000,000 for the fiscal year ending September 30, 1979".

(b) Section 318(c)(2) (relating to authorizations for project grants to State programs for prevention and control of venereal disease project grants) is amended (1) by striking out "and" after "1977", and (2) by striking out "for fiscal year 1978" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1978, and $43,500,000 for the fiscal year ending September 30, 1979".

MIGRANT HEALTH

SEC. 105. (a) Section (h)(1) (relating to authorization for project grants for planning and development or migrant health centers) is amended by striking out "and" after "1977," and inserting before the period at the end of the first sentence the following: ", $4,000,000 for the fiscal year ending September 30, 1979, $4,000,000 for the fiscal year ending September 30, 1980, $4,000,000 for the fiscal year ending September 30, 1981, $4,000,000 for the fiscal year ending September 30, 1982, and $4,000,000 for the fiscal year ending September 30, 1983.

(b)(1) Section 319(h)(2) (relating to authorizations for operation of migrant health centers) is amended by striking out "and" after "1977,", and inserting before the period at the end of the first sentence thereof the following: ", $40,000,000 for the fiscal year ending September 30, 1979, $44,000,000 for the fiscal year ending September 30, 1980, $48,400,000 for the fiscal year ending September 30, 1981, $53,240,000 for the fiscal year ending September 30, 1982, and $58,564,000 for the fiscal year ending September 30, 1983".

(2) The third sentence of section 319(h)(2) is amended by striking out "and" after "1977,", and inserting before the period at the end thereof the following: ", the fiscal year ending September 30, 1979, the fiscal year ending September 30, 1980, the fiscal year ending September 30, 1981, the fiscal year ending September 30, 1982, and the fiscal year ending September 30, 1983".

(c) Section 319(h)(3) (relating to authorizations for inpatient and outpatient hospital services) is amended by striking out "and" after "1977,", and inserting before the period at the end of the sentence thereof the following: ", $6,000,000 for he fiscal year ending September 30, 1979, $6,600,000 for the fiscal year ending September 30, 1980, $7,260,000 for the fiscal year ending September 30, 1981, $7,986,000 for the fiscal year ending September 30, 1982, and $8,784,600 for the fiscal year ending September 30, 1983".

COMMUNITY HEALTH CENTERS

SEC. 106. (a) Section 330(b) is amended by adding at the end thereof the following new paragraphs:

"(4) The term 'community hospital' means either a public general hospital owned and operated by a State, county, or local unit of government located in an urban area and primarily serving a population designated by the Secretary as having a shortage of personal health services, or a private, nonprofit community hospital located in an urban area and primarily serving a population designated by the Secretary as having a shortage of personnal health services.

"(5) The term 'primary care center' means a unit of a community hospital which—

"(A) delivers primary health services to a catchment area (as determined by the hospital and approved by the Secretary) through a group of health professionals composed of primary care physicians and allied health personnel; and

"(B) provides both (1) referral to emergency medical services and (ii) access to patient medical records on a twenty-four hours a day, seven days a week basis; and

"(C) provides referral to supplemental health services.".

(b) Section 330 is amended by adding at the end thereof the following:

"(h)(1) The Secretary may make grants, to community hospitals to assist such hospitals in planning, developing, and operating primary care centers in urban areas.

"(2) To be eligible for a grant under this subsection, the community hospital must submit an application which contains or is supported by the following assurances, satisfactory to the Secretary:

"(A) that, to the extent practicable, facilities and equipment located in existing emergency rooms, outpatient departments, and other sections of the hospital shall be converted for use in the primary care center; and

"(B) that appropriate emergency room and outpatient services will be maintained or have been maintained after the conversion; and

"(C) that the primary care center will be maintained as a separate and distinct cost unit, from such community hospital.

"(3) Funds for grants under this subsection may be used for covering costs associated with (A) planning, (B) developing (including modernization, renovation of space, and construction), and (C) operating primary care centers.

"(4) The Secretary may not approve an application for a grant under this subsection unless the application contains assurances that the primary care center will be operated in accordance with all the requirements for community health centers in subsection (e), except for subsection (e)(2)(G).

"(5) The Secretary may not approve an application for a grant under this subsection unless the application contains, in addition to the assurances pursuant to paragraph (4), the following assurances: the primary care center must have an advisory board which is composed of individuals a majority of whom receive their medical care at the center. The board shall meet regularly, but no less than

six times per year, to review the operations of the center and to develop recommendations to the hospital's governing board concerning the types of services to be provided and the operation of the center.

"(6) There are authorized to be appropriated for the purpose of making payments for grants under this subsection $34,000,000 for the fiscal year ending September 30, 1979, $72,000,000 for the fiscal year ending September 30, 1980, and $114,000,000 for the fiscal year ending September 30, 1981. No more than 30 per centum of the funds appropriated in any fiscal year may be used for planning and development (including construction, modernization and renovation).".

(c) Section 330(g)(1) (relating to authorizations for the planning and development of community health centers) is amended by striking out "and" after "1977,", and inserting before the period at the end of the sentence thereof the following: ", $10,000,000 for the fiscal year ending September 30, 1979, $10,000,000 for the fiscal year ending September 30, 1980, $10,000,000 for the fiscal year ending September 30, 1981, $10,000,000 for the fiscal year ending September 30, 1982, and $10,000,000 for the fiscal year ending September 30, 1983".

(d) Section 330(g)(2) (relating to authorizations for the operation of community health centers) is amended by striking out "and" after "1977,", and inserting before the period at the end of the sentence thereof the following: ", $320,000,000 for the fiscal year ending September 30, 1979, $352,000,000 for the fiscal year ending September 30, 1980, $387,200,000 for the fiscal year ending September 30, 1981, $425,900,000 for the fiscal year ending September 30, 1982, and $468,500,000 for the fiscal year ending September 30, 1983".

NATIONAL HEALTH SERVICE CORPS

SEC. 107. (a) Section 338(a) (relating to authorization for the National Health Service Corps) is amended by striking out "$57,000,000" and substituting in lieu thereof $64,000,000".

(b) Section 336 (relating to annual reports to Congress) is amended by (1) inserting after "SEC. 336." "(a)", and (2) by inserting at the end of subsection (a) thereof the following:

"(b) In addition to the report required by subsection (a), the Secretary shall submit a special report, developed through consultation with the National Advisory Council on the National Health Service Corps (as defined in section 337), to the Committee on Human Resources of the Senate and to the Committee on Interstate and Foreign Commerce of the House of Representatives on February 1, 1979. Such special report shall delineate the present and future directions of the National Health Service Corps particularly its relationship as a health manpower program and as a health services delivery program, analyze the use of corpsmen in the various settings defined in section 332, address the use of the Corps in meeting urban and rural health needs, and project the estimates of the Corps' manpower and their use through 1985.".

GENETIC DISEASES

SEC. 108. Section 1101(b) (relating to authorizations for grants and contracts for testing and counseling, information and education programs to genetic diseases) is amended (1) by striking out "and" after "1977,", and (2) striking out "for fiscal year 1978" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1978, and $30,000,000 for the fiscal year ending September 30, 1979".

HEMOPHILIA

SEC. 109. (a) Section 1131(f) (relating to authorization for hemophilia programs) is amended by striking "and" after "1977,", and inserting before the period at the end of the sentence thereof the following: ", $5,000,000 for the fiscal year ending September 30, 1979, $5,500,000 for the fiscal year ending September 30, 1980, and $6,050,000 for the fiscal year ending September 30, 1981".

(b) Section 1131(e) (relating to authorizations for blood separation centers) is amended by striking "and" after "1977", and inserting before the period at the end of the sentence thereof the following: ", $3,900,000 for the fiscal year ending September 30, 1979, $4,290,000 for the fiscal year ending September 30, 1980, and $4,712,000 for the fiscal year ending September 30, 1981".

HOME HEALTH SERVICES

SEC. 110. (a) Title III is amended by inserting after section 319 the following new section:

"HOME HEALTH SERVICES

"SEC. 320. (a)(1) For the purposes of demonstrating the establishment and initial operation of public and nonprofit private agencies (as defined in section 1861(o) of the Social Security Act) which will provide home health services (as defined in section 1861(m) of the Social Security Act) in areas in which such services are not otherwise available, the Secretary of Health, Education, and Welfare may, in accordance with the provisions of this section, make grants to meet the initial costs of establishing and operating such agencies and expanding the services available through existing agencies, and to meet the costs of compensating professional and paraprofessional personnel during the initial operation of such agencies or the expansion of services of existing agencies.

"(2) In making grants under this subsection, the Secretary shall consider the relative needs of the several States for home health services and preference shall be given to areas within a State in which a high percentage of the population proposed to be served is composed of individuals who are elderly, medically indigent, or both.

"(3) Applications for grants under this subsection shall be made in such form and contain such information as the Secretary shall prescribe by regulation.

"(4) Payment of grants under this subsection may be made in advance or by way of reimbursement or in installments as the Secretary may determine.

"(5) There are authorized to be appropriated $8,000,000 for the fiscal year ending September 30, 1978, $12,000,000 for the fiscal year ending September 30, 1979, $12,000,000 for the fiscal year ending September 30, 1980, and $12,000,000 for the fiscal year ending September 30, 1981, for payments under this subsection.

"(b)(1) The Secretary of Health, Education, and Welfare may make grants to public and nonprofit private entities to assist them in demonstrating the training of professional and paraprofessional personnel to provide home health services (as defined in section 1861(m) of the Social Security Act).

"(2) Applications for grants under this subsection shall be in such form and contain such information as the Secretary shall by regulations prescribe.

"(3) Payment of grants under this section may be made in advance or by way of reimbursement, or in installments, as the Secretary shall determine.

"(4) There are authorized to be appropriated $2,000,000 for the fiscal year ending September 30, 1978, $2,000,000 for the fiscal year ending September 30, 1979, $2,000,000 for the fiscal year ending September 30, 1980, and $2,000,000 for the fiscal year ending September 30, 1981, for payments under grants under this subsection.".

(b) Section 602 of Public Law 94-63 is repealed.

LEAD-BASED POISONING PREVENTION

SEC. 111. Section 503 of Public Law 91-695 (relating to authorizations for lead-based paint poisoning prevention programs) is amended (1) by striking out "and" after "1977.", and (2) striking out "for fiscal year 1978" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1978, and $14,000,000 for the fiscal year ending September 30, 1979".

HEALTH SERVICES EXTENSION ACT OF 1978—SECTION-BY-SECTION SUMMARY

Sec. 102. Comprehensive Public Health Services—

Section 314(d), which provides formula grants to the states for comprehensive public health services, is extended for one year and authorized for fiscal year 1979 at $107 million.

The section also repeals the present authorization for hypertension programs under section 314(d), and places it in a new section 315, providing formula grants (based on population and financial need) to the states for establishing and maintaining programs for the screening, detection, diagnosis, prevention, and referral for treatment of hypertension. $15 million is authorized for fiscal 1979.

Sec. 103. Disease Control Programs—

Under section 317 immunization programs are extended for one year at an authorized level of $35 million; rat control programs are extended for one year at an authorized level of $14.5 million. The program of special disease control are extended for one year at an authorization of $5.5 million.

Sec. 104. Venereal Disease—

Section 318 is extended for one year, at an authorized level of $43.5 million, plus $8 million for research, demonstration, and training.

Sec. 105. Migrant Health—

Section 319, migrant health programs, is extended for five years with authorizations as follows:

[In millions]

	Planning	Operations	Hospitalization
1979	4	40	6
1980	4	44	6.6
1981	4	48.4	7.26
1982	4	53.24	7.986
1983	4	58.564	8.7846

Sec. 106. Community Health Centers:

Community health center authorizations under section 330 are extended for five years at the following levels:

[In millions]

Planning and development:	*Operations*
1979—10	320
1980—10	352
1981—10	387.200
1982—10	425.900
1983—10	468.500

Sec. 107. National Health Service Corps—

The authorization for the NHSC under section 338 is increased by $7 million to $64 million for fiscal 1979. The Secretary is required to submit a report to the Committee on Human Resources and the Committee on Interstate and Foreign Commerce of the House by February 1, 1979 on the policy, relating the use of the Corps as a health manpower program and as a health service delivery program, including projections through 1982.

Sec. 108. Genetic Diseases—

The program of prevention of genetic disease under section 1101 is extended for one year at an authorized level of $30 million.

Sec. 109. Hemophilia—

The hemophilia prevention program is extended for three years at an authorized level of $5 million for treatment centers and $3.9 million for blood separation centers, FY 1979, with 10% increases in future years.

Sec. 110. Home Health Services—

The program established under section 602 of P.L. 94–63 is made section 320 of the PHS Act, and extended for three years, with authorizations in each year of $12 million for development and expansion of such services and $2 million for training.

Sec. 111. Lead-Based Poisoning Prevention—

Lead-based paint programs are extended for one year at an authorization level of $14 million for fiscal 1979.

Mr. SCHWEIKER. Mr. President, I am today joining with my colleagues on the Subcommittee on Health and Scientific Research in sponsoring a bill which will extend programs of the Public Health Service Act which provide grants to States and other entities to enable them to provide needed services to our citizens.

The Subcommittee on Health and Scientific Research, of which I am the ranking Republican member, will consider how several of the programs can be integrated into a comprehensive measure to place an increased emphasis on prevention of disease. I am concerned that much of the emphasis in health care today is on the treatment of acute and chronic diseases rather than in attempts to prevent them. Accordingly, I am supporting a 1-year extension for disease control programs, comprehensive public health services, venereal diseases, hypertension, genetic diseases, and lead-based paint programs. While all of these programs have made important contributions to the public's health in the past, I will want, during the course of our hearings, to examine whether the increased authorizations will significantly aid them in fulfilling their missions.

The National Health Service Corps was originally intended as a vehicle for deploying physicians to medically underserved areas. During our hearings I hope to learn whether or not the corps has been effective in this regard, particularly in rural parts of our country. In the near future the corps will have almost 2,000 new physicians per year available for placement. I am concerned about their plans for placing these physicians around the country and the attendant costs involved in deploying those physicians.

The provision of medical services to those who have, in the past, had difficulty obtaining them has been greatly improved by the migrant health program and community health centers. It is clear, however, that problems exist in both rural and urban parts of our country. This bill proposes to further expand services to underserved areas through a new initiative to convert poorly utilized health facilities into ambulatory primary care centers. This is an idea I support. However, I believe that the committee should address the important issue of the potential for financial self-sufficiency of these centers and should seek to provide incentives for the centers to improve their record of collecting payments from patients or third-party payors. I am concerned that only 30 percent of the appropriated funds would be available for planning and development. I trust that the committee will address this important issue in our hearings. Furthermore, I am concerned that our rural citizens may not be receiving a fair share of the funds available for this program, and I believe the committee ought to develop an equitable program for all our citizens.

As the subcommittee conducts its hearings on this bill, I would hope that public officials and other concerned citizens will work with us to assure that these services continue to be delivered in an efficient, cost-effective fashion.

Mr. JAVITS. Mr. President, I am pleased to join with my colleague Senator KENNEDY in cosponsoring the Health Services Extension Act of 1978. Basically, the bill provides for the extension of numerous programs authorized under the Public Health Service Act which would otherwise expire this year. In particular, the bill extends for 1 year existing programs dealing with hypertension, immunizations, rat control, disease control programs, venereal disease control, and lead-based paint poisoning prevention. These programs are being given 1-year extensions so that the Human Resoures Health Subcommittee has more time to review them thoroughly in the context of a major prevention initiative which is currently being developed.

It is my long-held conviction that more of our health resources should be directed to preventive, as opposed to curative, health services. Accordingly, it is my intent and understanding that the prevention bill now being drafted will replace the 1-year extension of prevention-related programs in this bill. However, since the prevention bill is not yet ready, we are introducing the present bill in its current form so as to assure the continuation of these various programs, so vital to the public health.

In addition, section 314(d) of the Public Health Service Act—relating to grants for comprehensive public health services—is being extended for 1 year in order to give the subcommittee the opportunity to review the program and to receive testimony from State health officers, Governors, and other interested parties regarding the most appropriate method for distributing funds under this program.

This bill also contains a 1-year extension of the National Genetic Diseases Act, of which I am the author, continuing the authorization at the same level of $30 million. This authorization carries out the recommendation of the Commission for the Control of Huntington's Disease, mandated by the Congress in Public Law 94–63. The National Genetic Diseases Act, incorporated in Public Law 94–278, establishes a national program of regional screening, testing, counseling, and information and education programs, primarily in conjunction with other existing health programs. I am currently in the process of reviewing the legislation and plan to introduce amendments to the program next week. These amendments will respond to bureaucratic problems in interpreting the law and will broaden and improve existing authorities.

Also included in the bill before you now are continuing authorities for community health centers. In conjunction with this section of the bill, I am proposing an urban initiative which is designed to meet some of the critical service delivery problems currently plaguing many urban, inner-city areas. I have long been concerned about the adequacy of health care services in the major urban centers of our country. It is now estimated that there are 49.1 million people residing in areas of the United States which, for purposes of health services, have been classified as "underserved." This means that the area has a shortage of personal health services as determined by factors such as the following: the ratio of primary care physicians to population, relevant health indices and economic factors affecting access to services. Of these 49 million people, almost half live in urban areas.

In medically underserved areas, the poor are being forced to use hospital emergency rooms and outpatient departments for first-contact or primary care services. This phenomenon is attributable, in large part, to two factors: the unavailability of private physicians or the unwillingness of private physicians to care for these individuals. Consequently, persons residing in these areas are being deprived of badly needed comprehensive and preventive medical care services.

Not only are the residents of such areas adversely affected, but hospital resources are severely strained in two ways by the improper use of emergency room and outpatient department facilities: First, additional demands for staff and services are placed on the emergency rooms and outpatient departments; second, greater hospital deficits are incurred because many individuals are unable to pay for the services they receive. For example, it has been estimated that in 18 private, nonprofit hospitals in New York City between 1971 and 1973, the deficit resulting from the delivery of outpatient and emergency services reached $115 million.

In an effort to begin addressing some of the peculiar health service delivery problems facing urban areas, I am including today as part of the Health Services Extension Act of 1978 a proposal which is designed to serve as a first step toward alleviating these problems. I am proposing a demonstration project which would provide grant funds to public general hospitals or private nonprofit hospitals located in medically underserved urban areas for the purpose of establishing hospital-affiliated primary care centers through the reform of emergency rooms and outpatient departments.

Public general hospitals and some private nonprofit hospitals located in inner-city communities often serve as the routine source of medical care for much of the community. Frequently these facili-

ties are the only source of care for medicaid recipients and the working or near poor. My proposal, which amends section 330 of the Public Health Service Act (relating to community health centers), would fund at least 30 demonstration projects over 3 years. This would provide increased access to improved health care services for approximately 1 million people.

In order to receive funds under the program, eligible institutions would submit applications to the Secretary of HEW containing assurances that: First, for purposes of construction, modernization and renovation, existing facilities and equipment—particularly in emergency rooms and outpatient departments—would be utilized; Second, the hospital will maintain appropriate emergency room and outpatient department services; Third, the primary care center will be operated as a separate and distinct cost unit; Fourth, the primary care center will deliver primary health care services through a group of health professionals composed of primary care physicians and allied health personnel; and Fifth, the primary care center will provide for referral for emergency medical services and supplemental health services.

In addition, I am currently exploring the possibility of requiring additional assurances which would provide for incentive reimbursement mechanisms and reorganization of primary care services within the hospital setting. The purpose of these additions would be to make this initiative more consistent with the cost containment and quality of care objectives already established by the Health Subcommittee.

Facilities intended for the receipt of these demonstration grants are primarily urban, inner-city public general or private nonprofit hospitals. I believe that this demonstration project can make two significant contributions to health care services in urban areas: First, because grant funds will cover the costs associated with the planning and operating of the primary care centers, these funds will provide much-needed fiscal relief to the hospitals and will allow them better to perform the various distinct functions associated with emergency rooms, outpatient departments and primary care; second, for millions of people who currently have no alternative, the establishment of these primary care centers will allow for the provision of comprehensive and preventive health services, continuity of care, and the development of a strong and lasting physician/patient relationship.

In addition to the establishment of these demonstration primary care centers, I am also proposing an increased emphasis on the number of free-standing community health centers to be started in urban areas. To date, 302 of the 463 community health centers funded under the community health center program have been established in rural areas. While I recognize the need for targeting such centers toward rural areas, I believe that the needs of urban areas should not be overlooked. In inner-city areas, 111 standard metropolitan statistical areas (SMSA's) have been identified as areas of high priority need for such centers. Consequently, I intend to encourage the committee to adopt policies which will assure that urban areas receive an adequate share of the funds for new community health centers.

ADDITIONAL COSPONSORS

S. 1423

At the request of Mr. NUNN, the Senator from South Carolina (Mr. THURMOND) and the Senator from Wyoming (Mr. WALLOP) were added as cosponsors of S. 1423, the Judicial Tenure Act.

S. 1974

AMENDMENT NO. 849

At the request of Mr. NELSON, the Senator from Missouri (Mr. DANFORTH), the Senator from Maryland (Mr. MATHIAS), and the Senator from Idaho (Mr. MCCLURE) were added as cosponsors of S. 1974, the Regulatory Flexibility Act, and Amendment No. 849 intended to be offered to S. 1974.

S. 2384

At the request of Mr. CRANSTON, the Senator from Texas (Mr. TOWER) and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of S. 2384, the Veterans' and Survivors' Income Security Act.

S. RES 242

At the request of Mr. HATCH, the Senator from Delaware (Mr. ROTH) was added as a cosponsor of Senate Resolution 242, relating to changes in IRS policy toward the taxation of fringe benefits.

S. RES. 356

At the request of Mr. WEICKER, the Senator from New Jersey (Mr. CASE) and the Senator from Iowa (Mr. CLARK) were added as cosponsors of Senate Resolution 356, a resolution insisting that the Republic of Korea cooperate fully with the Select Committee on Ethics and declaring that a failure to cooperate will have a negative impact on relations between the United States and the Republic of Korea.

SENATE RESOLUTION 384—ORIGINAL RESOLUTION REPORTED AUTHORIZING ADDITIONAL EXPENDITURES

Mr. TALMADGE, from the Committee on Agriculture, Nutrition, and Forestry, reported the following original resolution, which was referred to the Committee on Rules and Administration:

S. RES. 384

Resolved, That, in holding hearings, reporting such hearings, and making investigations as authorized by sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, in accordance with its jurisdiction under rule XXV of the Standing Rules of the Senate, the Committee on Agriculture, Nutrition, and Forestry is authorized from March 1, 1978, through February 28, 1979, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned with the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $766,000, of which amount not to exceed $35,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1979.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

SENATE RESOLUTION 385—ORIGINAL RESOLUTION REPORTED AUTHORIZING ADDITIONAL EXPENDITURES

Mr. STENNIS, from the Committee on Armed Services, reported the following original resolution, which was referred to the Committee on Rules and Administration:

S. RES. 385

Resolved, That, in holding hearings, reporting such hearings and making investigations as authorized by sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, in accordance with its jurisdiction under rule XXV of the Standing Rules of the Senate, the Committee on Armed Services, or any subcommittee thereof, is authorized from March 1, 1978, through February 28, 1979, in its discretion (1) to make expenditures fom the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $817,000, of which amount not to exceed $55,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1979.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

SENATE RESOLUTION 387—ORIGINAL RESOLUTON REPORTED AUTHORIZING ADDITIONAL EXPENDITURES

Mr. MUSKIE, from the Committee on the Budget, reported the following origi-

nal resolution, which was referred to the Committee on Rules and Administration:

S. RES. 387

Resolved, That, in holding hearings, reporting such hearings, and making investigations as authorized by sections 134(a) and 136 of the Legislative Reorganization Act of 1946, as amended, in accordance with its jurisdiction under rule XXV of the Standing Rules of the Senate, the Committee on the Budget is authorized from March 1, 1978, through February 28, 1979, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

SEC. 2. The expenses of the committee under this resolution shall not exceed $2,430,800, of which amount not to exceed $100,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 3. The committee shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than February 28, 1978.

SEC. 4. Expenses of the committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

AMENDMENTS SUBMITTED FOR PRINTING

NAVIGATION DEVELOPMENT ACT—H.R. 8309

AMENDMENT NO. 1683

(Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted an amendment intended to be proposed by him to the bill (H.R. 8309) authorizing certain public works on rivers for navigation, and for other purposes.

PANAMA CANAL TREATY—EXECUTIVE N, 95–1

AMENDMENT NO. 18

(Ordered to be printed and to lie on the table.)

Mr. HATCH, as in executive session, submitted an amendment intended to be proposed by him to Executive N, 95–1, the Panama Canal Treaty.

Mr. HATCH. Mr. President, there is an important consideration regarding the Panama Canal Treaties that has been overlooked thus far in our discussion of these agreements. In our efforts to unravel all of the mysteries associated with the precise meanings of various provisions of the treaties as they appear in the English text, we have neglected to examine the language in the Spanish text to determine whether it accurately reflects the language in our own documents. I am persuaded that there are a number of discrepancies which warrant our concern.

Recently, the Senate steering committee, of which I am a member, prepared a comparative analysis of the English and Spanish versions of the treaties. This study is entitled "The English and Spanish Texts of the 1977 Panama Canal Treaties: A Comparison." It was written by Silvia Castellanos, a bilingual staff member of the committee, with the assistance of linguists and legal experts drawn from the universities and the Library of Congress. The study contains a line-by-line analysis of the language in the two versions of the treaties, and concludes that "inconsistencies abound in the documents."

On January 25, 1978, my distinguished colleague from Alabama (Mr. ALLEN) inserted in the RECORD the overview section of this study, which summarizes the basic problems of translation in the documents. I commend Senator ALLEN for calling our attention to this study, and urge Senators to examine it closely. Copies of the full study are available at my office, 6317 Dirksen Senate Office Building.

Mr. President, these inconsistencies create a second layer of problems for the United States. Their presence means that we must contend not only with conflicting interpretations of the English text, but also the Spanish meaning of every word in the documents.

Why the State Department did not carry out its responsibility of insuring that the two versions of the treaties are substantively the same is a question that I cannot answer. I do know, however, that these discrepancies indicate carelessness on the part of the State Department, and arouse skepticism in my mind regarding State Department assurances in the past about the proper interpretations of the agreement and the intentions of the negotiators.

In anticipation of serious disagreements between the United States and Panama about these matters, I am today submitting an amendment to the treaties which would establish needed guidelines for the resolution of controversies pertaining to the proper interpretation of these agreements. The amendment provides that the English text shall prevail whenever there are differences of interpretation between the United States and the Republic of Panama.

Mr. President, I ask unanimous consent that this amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 18

In the signature clause thereof, strike out "both texts being equally authentic" and insert in lieu thereof "but, in case of divergence, the English language text shall be binding on the two Parties".

NOTICES OF HEARINGS

ARBITRATION OF CIVIL CASES IN UNITED STATES COURTS

Mr. DECONCINI. Mr. President, I wish to announce that an open public hearing will be held by the Subcommittee on Improvements in Judicial Machinery of the Committee on the Judiciary on S. 2253, a bill to amend title 28 of the United States Code to encourage prompt, informal, and inexpensive resolution of civil cases by use of arbitration in U.S. district courts, and for other purposes.

The hearing will be held on April 11, 1978, commencing at 9:00 a.m. in room 2228, Dirksen Senate Office Building.

Persons who wish to testify or submit a statement for inclusion in the record should communicate, as soon as possible, with the subcommittee, 6306 Dirksen Senate Office Building, Washington, D.C. 20510.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. PROXMIRE. Mr. President, I wish to announce that the Committee on Banking, Housing, and Urban Affairs will hold 2 days of oversight hearings on the budgets of the three Federal banking agencies: the Federal Deposit Insurance Corporation, the Comptroller of the Currency, and the Federal Reserve System. The hearings will be held on February 7 and 8, 1978, with George LeMaistre, Chairman of the Federal Deposit Insurance Corporation, and John Heimann, Comptroller of the Currency testifying on February 7 and Philip E. Coldwell, member of the Board of Governors of the Federal Reserve System testifying on February 8. Both hearings will begin at 10 a.m. and will be held in room 5302 of the Dirksen Senate Office Building.

Each of the three Federal banking agencies finance their expenditures from revenues they receive from different sources, mostly fees and interest earned on security holdings. None of the agencies are included within the congressional appropriations process, nor are expenditure ceilings imposed by the Congress. Thus, the Banking Committee believes that as part of its oversight responsibilities it should ascertain and study how the FDIC, the Comptroller and the Federal Reserve spend the funds they receive and how any additional funds are used.

Last spring the Banking Committee held the first ever oversight hearing on the budget of the Federal Reserve System for the calendar year 1977. No such hearings were held on the budgets of the FDIC and the Comptroller. The upcoming hearings will take a close look at the 1978 budgets of all three agencies. The committee is also interested in seeing how currently budgeted expenditures and staffing compare with prior years.

Anyone having questions about the hearings or interested in obtaining additional information about them may contact Steven M. Roberts of the committee staff by calling 224–0893.

EXPORT POLICY HEARINGS

Mr. STEVENSON. Mr. President, the Subcommittee on International Finance will conduct hearings on U.S. export performance and export policy. The purpose of the hearings is to examine the competitiveness of U.S. exports and to explore ways to close the trade gap through better U.S. export performance. Our trade imbalance may stubbornly persist. Key industries are losing their competitive edge in world markets, while U.S. policies and programs designed to further exports are inadequate. Neglect of exports in favor of measures to protect the domestic market from imports lead to serious global consequences for production, employment and prices. One out of seven jobs nationally, and one out of six in Illinois, the Nation's leading export State, result directly or indirectly from the production of goods and services for export. While U.S. dependence upon exports is apparent and growing, the answers to U.S. export problems are neither obvious nor easy. These hearings can provide the groundwork for improvements in U.S. export policy.

The hearings will begin on Monday, February 6, with an examination of the changes in world trade wrought by floating exchange rates and dollar depreciation, and the potential impact on U.S. exports of more active intervention by Treasury and the Federal Reserve to protect the dollar. What effect will the shift to a policy of active intervention to support the exchange rate have on U.S. exports? Is the United States abandoning its support for floating exchange rates? Should the United States bear the risk and cost of resisting further appreciation of the German mark, Japanese yen and other surplus country currencies? What effect are other countries' exchange rate policies having on U.S. exports? Are orthodox economic predictions of how exchange markets are supposed to work being overturned in practice? Are higher domestic interest rates an effective way to defend the dollar, and what will be the consequences for the economy?

The second hearing, to be held on Thursday, February 23, will focus on shifts in the composition of, and markets for, U.S. exports. In what product and geographic markets has the United States been a successful exporter and why? Are other countries threatening our position in these markets? Are there industries where declining export competitiveness is likely to result in job losses? Which markets has the United States failed to penetrate and why? Are there new markets that offer substantial potential export growth and what is being done to gain a foothold in these markets? What impact is the expanding export role of developing countries having on U.S. exports? Which U.S. export sectors are being hardest hit by this new competition?

A third hearing, to be held on Monday, February 27, will analyze and compare major foreign government policies and programs aimed at supporting exports. Particular attention will be given to export financing and marketing assistance, policies employed by our major trading competitors—Japan and Germany. To what extent is Japanese export success due to Japanese trading companies and their linkages with banking and manufacturing companies through so-called Zaibatsu or Keiretsu? Do these structures provide competitive advantages in key industries such as steel and electronics? What forms of government export subsidization are occurring in the developing countries? Is there a worldwide shift toward more direct government aid for export industries, in order to offset higher energy import costs?

Hearings on renewed authorization for the Export-Import Bank are scheduled for March 13, 14, 20, and 21. Among the questions expected to arise in the course of those hearings are: What effect does the Bank have on U.S. exports? How much does the Bank cost U.S. taxpayers? How much additional authority should the Bank have to make loans and guarantees in support of U.S. exports? Should the Bank be required to maintain a margin between its charges to customers and the cost of its funds? How do the Bank's export financing programs compare with those of our countries? Could the Bank do more to assist small businesses to become successful exporters? Are additional restrictions needed on the kinds of exports and projects which the Bank may support? Should the Bank be permitted to finance aircraft sales, nuclear powerplant exports, agricultural commodities, factory construction abroad? Should U.S. environmental standards be applied to Eximbank-supported projects in foreign countries? On what grounds should Eximbank credits be denied to certain foreign countries?

A hearing on agricultural export policy and prospects for U.S. agriculture exports will be held in Chicago, Ill., on Thursday, March 30. Are programs to facilitate U.S. agricultural programs adequate? Does U.S. agriculture face increased foreign competition over the next decade? Are the markets for U.S. agricultural exports likely to be stable?

On April 5 a hearing will be held on other U.S. programs and facilities designed to increase U.S. exports, including tax incentives for exports, Commerce and State Department programs, and the efficacy of the Edge Act and Webb-Pomerene Act in facilitating U.S. exports. Particular attention will be given to whether these provisions and programs have enabled smaller businesses to realize the benefits to be gained from exports.

A hearing on April 18 will deal with the competitiveness of high technology U.S. exports in world markets and the potential adverse impact on exports from declining research and development expenditures by U.S. Government and industry. The hearings will explore ways in which U.S. policy can contribute to the maintenance of U.S. technological superiority, and can open up new trade possibilities involving high technology exports.

A final hearing on May 17 will concentrate on explicit and implicit restrictions employed by foreign countries to hold down imports of U.S. goods. Formal tariff and nontariff barriers will be explored, as well as informal barriers such as preferential distribution and marketing systems. The focus will be on determining the relative importance of such formal and informal barriers to the success of U.S. exports in world markets.

It is intended that the hearings will serve as a basis for recommending legislative action to insure the competitiveness of U.S. agriculture and industry in world export markets. Hearings will be held in room 5302, Dirksen Senate Office Building, beginning at 10 a.m., unless otherwise indicated. Persons interested in testifying or desiring additional information should contact Robert W. Russell, counsel to the Subcommittee on International Finance at 202–224–0819.

SELECT COMMITTEE ON SMALL BUSINESS

Mr. NELSON. Mr. President, I wish to announce that the Senate Select Committee on Small Business and the House of Representatives Small Business Committee will hold a joint hearing on minority contracting. The hearing will be held on Monday, February 6, 1978, and will begin at 10 a.m. in room 424 of the Russell Senate Office Building. The Senator from Oklahoma (Mr. BARTLETT) and the Representative from New York (Mr. ADDABBO) will cochair the hearing.

Further information can be obtained from the committee office, room 424 Russell Senate Office Building, telephone 224–5175.

SUBCOMMITTEE ON CIVIL SERVICE AND GENERAL SERVICES

Mr. SASSER. Mr. President, I wish to announce that the Subcommittee on Civil Service and General Services will hold a business meeting on Thursday, February 9 at 9 a.m. in room S. 210 of the Capitol to consider matters before the subcommittee including markup of H.R. 3447, H.R. 3755, and S. 1559 regarding civil service annuities, H.R. 6975 regarding the name and number of hearing examiners, and S. 1265 and S. 1267 relating to Federal records.

NOTICE OF HEARING CHANGE

Mr. CRANSTON. Mr. President, the Committee on Veterans' Affairs has changed the starting time for the hearing on Friday, February 3, from 9:30 a.m. to 9 a.m. This hearing will be held in room 6202 and will be dealing with the proposed Veterans and Survivors Income Security Act, S. 2384. H.R. 5029, a bill to extend the Veterans' Administration's authority to contract for hospital and medical care for certain Filipino veterans, and to maintain a regional office in the Philippines until September 30, 1979, will not be included in this hearing as was originally planned.

ADDITIONAL STATEMENTS

SUPPORT FOR GENOCIDE CONVENTION GROWING

Mr. PROXMIRE. Mr. President, in 1949, President Truman submitted to the Senate a treaty which would have made the destruction, in whole or in part, of a national, ethnic, racial, or religious group a crime under international law. This Genocide Convention has been before the Senate ever since, and it is with deep regret that I note that this treaty has yet to be ratified.

Mr. President, extensive hearings have been held on the convention, and in the years since 1949, several very respectable organizations have voiced concern over some of the provisions of this treaty. Foremost among these organizations was the American Bar Association, and many Senators placed great emphasis on the opposition of this group.

But as I speak before the Senate today, I must point out that the reservations concerning the convention have long since been resolved. It is now fitting to place great emphasis on the support which the American Bar Association gives to the treaty. We have listened long and hard to the objections to the convention, and I believe that we have proved those objections to be groundless. We have taken a long, hard look at the treaties, and failure to act will force us to take a long, hard look at our own consciences. I call upon the Senate to pass the Genocide Convention as soon as possible.

SENATOR GRIFFIN'S POSITION ON THE PANAMA CANAL TREATIES

Mr. STEVENS. Mr. President, on January 26, 1978, Senator GRIFFIN announced his position on the Panama Canal Treaties to the Senate Foreign Relations Committee. I believe that his remarks focus clearly on the issue that will soon be before us. As our distinguished colleague points out, this is one of the most difficult issues we will face in this session, perhaps in our entire careers. I know that Senator GRIFFIN has carefully considered all sides of the issue and has made his decision after a thorough scrutiny of the alternatives presented.

I call specific attention to Senator GRIFFIN's closing remarks.

But, when the call on the merits is as close as I think this is, or as I perceive it to be, I think the judgment of the people ought not to be taken lightly. Very honestly and frankly, I have come to the conclusion that in this situation, as is often the case, the people are right.

I commend these remarks to my colleagues, and ask unanimous consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR GRIFFIN

Senator GRIFFIN. Thank you, Mr. Chairman. This has been such a harmonious meeting up to now that I hate to put in a note of discord.

I do want to join, however, my colleagues in saluting and commending you, Senator Byrd, and you, Senator Baker, for the outstanding leadership which you are providing on this very, very difficult issue and in the best traditions of the Senate.

But I am sure that you also realize, as you have been around here for a long time, that not only are there a lot of people in the country who do not agree with you on this, but there are going to be a lot in the Senate, too. What the numbers will come down to I don't know.

I must say that this has been one of the most difficult issues I have confronted in my 21 years in the Congress. I have long recognized that a major revision in our treaty relationship with the Republic of Panama is desirable and could be in the interests of both countries.

I recognize the importance of maintaining close and friendly relations with the people of Panama and with the people of other nations throughout the hemisphere. I am deeply conscious of and concerned about the impact that outright rejection of the treaties could have on our relations in the hemisphere.

Sometimes political responsibility imposes upon public officials the necessity of chooing among several undesirable courses of action. That may seem to be the dilemma that we face with these treaties.

After months of agonizing consideration, I have concluded that I cannot consent to ratification of the treaties before us. I think they are fatally flawed in a number of substantive respects. In my view they do not adequately protect the interests of the United States or of other nations which depend upon the canal.

I will, of course, be more specific in a statement of my individual views which will be filed with the committee report. I might just point, however, to Article XII, which deeply concerns me. It takes away an option of the United States which I think would be very important between now and the year 2000 to consider the possibility of building another canal, possibly a sea-level canal, in another country. We tie our hands under these treaties and deny ourselves that option, which I think would be a very valuable one and could be a very important one.

I am concerned that too much of the treaty language and in very important areas is full of ambiguities, ambiguities that are so apparent that people representing both countries are telling their respective constituents that the language means different things.

If we are concerned about defending the canal now with the troops that we have stationed there, and that seems to be the motivation of many people in considering these treaties, I must be even more concerned about what would happen after the year 2000 with the provisions that are embodied in these treaties. I don't find the understanding that was reached adequate to cover that concern.

I am very disturbed that between now and the year 2000 we would have a dwindling number of United States citizens and a growing number of Panamanian citizens supposedly operating the canal as employees of the United States, but under the laws of Panama, except to the extent that there is other provision made in these treaties. Not in the year 2000, but in 30 months after the treaties are ratified, if they should be, the Canal Zone would be subject to the laws of Panama, to the police of Panama, to the courts of Panama. I think that is a situation that would be fraught with great difficulty. There is no mechanism, no machinery in these treaties to resolve the disputes that would arise.

Furthermore, I believe that the defects—and I have only focused on a few of them which concern me—are so basic and so serious that they cannot be remedied by trying to rewrite the treaties on the Senate Floor.

Although these treaties should not be ratified, I believe that there is a course open to the Senate other than outright rejection. Despite all of his knowledge about the history of the canal, or perhaps because of it, David McCullough, the distinguished author of "The Path Between the Seas" acknowledged before the committee that he had experienced great difficulty in reaching a personal decision about the merit of these treaties. Although he finally decided on balance to support the treaties, he made a very profound and perceptive point in his testimony before this committee. I would like to quote him: "If we say yes to these treaties in a grudging way because we think we have painted ourselves into a corner and we have to get out, that would be unfortunate and just as wrong, and in some respects a greater mistake than to say no in the spirit of saying no because it should be done right, because we don't want to have to come back in 15 or 20 years and have to do it all over again."

Under the Constitution, of course, the Senate's role is one of advice and consent. Instead of consenting to these treaties, I believe it would be a wiser course for the Senate, preferably acting through the committee, although I am very conscious that the consensus of the committee is otherwise, to exercise only its advice authority. In other words, without rejecting these treaties outright, I believe we would be wise to advise in this instance the President to send the negotiators back to the drawing boards with instructions to persist until a more acceptable treaty can be fashioned.

I want to say in all sincerity that I salute my colleagues and the two Leaders who have come to a contrary conclusion and who in their own minds are convinced that these treaties represent what is in the best interests of the nation. To the extent that you have the courage of your convictions, I think that is in the best interest of the Senate, because I believe with Edmund Burke that a Senator owes his constituents his judgment and should not sacrifice it to public opinion alone.

Senator BYRD. Of course, Edmund Burke was defeated in the next election.

(General laughter.)

Senator GRIFFIN. Yes. But nevertheless I think it was the kind of principle that Senators ought to be expected to abide by.

But, when the call on the merits is as close as I think this is, or as I perceive it to be, I think the judgment of the people ought not to be taken lightly. Very honestly and frankly, I have come to the conclusion that in this situation, as is often the case, the people are right.

PREVENTING FRAUDULENT SOLICITATIONS THROUGH THE MAILS

Mr. SASSER. Mr. President, in my capacity as chairman of the Subcommittee on Civil Service and General Services of the Senate Governmental Affairs Committee, I have been receiving an increasing number of complaints from small businessmen who are receiving fraudulent solicitations through the mails.

In what is apparently becoming a widespread practice, operators buy up

mailing lists of small businessmen. They then print up a simulated bill purportedly for the purchase of advertising in a particular publication or directory and mail such "invoices" far and wide. The unsuspecting businessmen often mistake these solicitations for the bills they resemble and, all too often, pay them.

Postal inspectors are having an increasingly difficult time coping with this problem. The American Business Press of New York has reported to me that they have documented several instances in which four or five different "invoices" were being sent from the same address and using the same postage meter number. By the time the postal inspectors have gathered enough informaiton to indict the operators, the culprits have moved to another address.

Many businessmen have written to me outraged with this procedure asking if the swindlers are not violating some provisions of the law. As a matter of fact, there is a statute which requires that all solicitations which could reasonably be mistaken for a bill must have a disclaimer saying, "This is not a bill. You are under no obligation to make payment."

In spite of this provision, operators continue to violate the law with impunity. Sometime ago, Mr. Walt Stamper, of the Chattanooga Manufacturers Association brought this matter to my attention. He mailed to me several copies of these solicitations which look for all the world like bills. I was distressed to see that they contained the disclaimer required by law in tiny print at the bottom of the "invoice."

In order that these kinds of abuses might be prevented in the future, I called this matter to the attention of Senator JOHN GLENN, chairman of the Subcommittee on Energy, Nuclear Proliferation and Federal Services and I wrote to the Postmaster General for his recommendations. This bill, which I am proud to cosponsor today with my good friend Senator GLENN, is the result of this effort.

Briefly, the effect of the legislation would place the kind of abuses, which I have referred within those schemes considered in false representation proceedings. A violation of this section would then become prima facie evidence of a violation warranting the issuance of an administrative order.

The Post Office suggests that this amendment would give them an effective new weapon in their efforts to stamp out the kind of reprehensible practices that I have described here today. I urge the prompt enactment of this important piece of legislation. Mr. President, I ask unanimous consent to have printed in the RECORD the detailed response to me from Jim Finch, Assistant Postmaster General, who discusses this problem and the need for legislative remedies and a copy of the amendment.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

OFFICE OF THE
POSTMASTER GENERAL,
Washington, D.C., December 19, 1977.

Hon. JIM SASSER,
Chairman, Subcommittee on Civil Service and General Services, Committee on Governmental Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your November 3 letter inquiring as to whether legislation might be in order to provide the business community with a greater measure of protection against the current rash of false billing operations. I believe that legislation to streamline the administrative enforcement processes which can be applied to these schemes would be useful.

By way of background, false billing schemes, the majority of which operate in the vicinity of Los Angeles, California, have typically involved the mailing of solicitations in the guise of bills for advertising in publications with titles which connote an ethnic or minority group orientation, for listings in purported business directories, or for the purchase of office supplies. These Los Angeles-based operations have used more than three hundred trade styles, in combination with a number of addresses, in an attempt to deceive corporations throughout the United States. Despite an increased awareness within the business community (fostered in part by the Postal Service and in part by consumer affairs groups and trade associations) of the tactics employed by the promoters of these schemes, a portion of these false invoices continue to defeat the accounting safeguards of victim firms.

At present, promotions which see fit to solicit business in mailings which resemble invoices are given the option of reproducing in "conspicuous and legible type" the disclaimer set forth at Title 39, United States Code, Section 3001(d)(2)(A) or, in accordance with 39 USC 3001(d)(2)(B), a notice prescribed by the Postal Service. Current postal regulations, found at Part 123.41 of the Postal Service Manual and incorporated by reference into the Code of Federal Regulations at 39 CFR Part 111.5, require a two-part notice, portions of which must appear in either 30-point or 18-point type, displayed in such fashion as will render them prominent. The vast majority of these promotions which utilize the invoice method of solicitation have opted for the more permissive Section 3001(d)(2)(A) disclaimer. The bulk of the complaints directed to the Postal Service concerning the receipt of solicitations in the guise of bills indicate that the disclaimers printed on the questionable items now plauguing businesses are inadequate and afforded little protection against inadvertent payment.

Acting in accordance with the authority granted in 39 USC 3001(d)(2) to promulgate regulations specifying the typography, layout, and color of the statutory disclaimer, the Postal Service has adopted a rule, effective December 8, 1977, which requires that the hitherto-permissive Section 3001(d)(2)(A) notice appear in bold-face, 30-point type. I have enclosed a copy of the rule. However, in the interests of clarity, economy, and specificity, it may be worthwhile to amend Section 3001(d) to provide for a single appropriate disclaimer with such size and display characteristics as would render unattractive any use of the invoice method of solicitation or, in the alternative, to accede to the wishes of a portion of the business community and declare nonmailable any solicitation which could reasonably be mistaken for an invoice, bill, or statement of account due. While the rule or the suggested amendments will make clear what is or is not mailable, they alone will not accomplish the desired result, inasmuch as the administrative remedies available in the event of noncompliance are either ineffectual or involve a disadvantageous burden of proof. Consequently, legislation is required to strengthen these enforcement mechanisms.

The specific enforcement procedures now available for application to alleged violations of 39 USC 3001(d) are found at 39 USC 3001(f), as implemented by 39 CFR Part 953. The Postal Service is empowered to conduct adjudicatory proceedings which may result in the issuance of an crder ruling an item nonmailable and thus subject to disposition as the Postal Service may direct. Since it can be assumed that the operators of false billing promotions woud not give the Postal Service the opportunity to rule in advance on the mailability of their solicitations, these administrative proceedings would not be initiated until after the questionable items had been entered into the mails, delivered as addressed, and resulted in complaints to the Postal Service. In practice, the order declaring a solicitation nonmailable would not be issued until after it had been mailed. In addition, a promotion can easily circumvent an existing order by placing nonmailable solicitations in envelopes which bear no return address or which display a return address different from that employed for previous mailing(s). Even if the promotion made use of the same mailing envelope, the Postal Service would not be in a position to determine whether the enclosed material was identical to that previously ruled nonmailable, unless facts constituting probable cause for the issuance of a search warrant were available. As a final point, it should be noted that these administrative orders with respect to mailability do not in any way prevent the responses of victim firms from reaching the suspect promotion.

The most effective administrative sanction which could be levied against false billing promotions is that provided by 39 USC 3005, as implemented by CFR Part 952. Following notice, a hearing, and the presentation of satisfactory evidence that a promotion is seeking remittances by mail in advertisements which contain false representations, the Judicial Officer of the Postal Service may issue an administrative order requiring Postmasters to return to the senders all mail addressed to the offending promotion. A companion statute 39 USC 3007, provides for injunctive relief authorizing the detention of mail in preparation for or during the administrative false representation proceedings. The value of a False Representation Order is that it deprives the cited promotion of the fruits of its deceptive practices by denying it remittances mailed to the address displayed in the questionable solicitations.

The current problem with respect to the application of 39 USC 3005 to false billing schemes is the lack of a cross reference from Section 3001(d) to Section 3005, stating that failure to comply with the former will subject a promotion to the administrative order authorized by the latter. Thus, even with the adoption of the rule, or the enactment of the suggested amendments to Section 3001(d), the problem would remain. Theoretically, a false billing operation could mail solicitations which did not meet the size and typography requirements of proposed Part 123.41a. of the Postal Service Manual, but which did display a disclaimer, perhaps similar to the marginally-noticeable item now in use. In this situation, the Postal Service would still find itself in the position of having to contend that a solicitation which stated on its face, albeit inconspicuously,

that it was, in fact, a solicitation and not a bill constituted a false representation within the meaning of Section 3005. Substantiating such a contention is difficult at best, dependent upon the availability of a number of witnesses who can testify that they were actually deceived by the solicitation. Identifying such witnesses is a time-consuming, impractical, and expensive proposition, when swift action is necessary to protect the business community from a continuing deception.

The enforcement of 39 USC 3001(d) would be measurably assisted if 39 USC 3005(a) were amended to include within those schemes subject to false representation proceedings, schemes which involve the mailing of solicitations in the guise of bills which do not comply with 39 USC 3001(d) and its accompanying regulations. A violation of Section 3001(d) would, hopefully, then become *prima facie* evidence of a violation of Section 3005, warranting the issuance of the administrative order authorized by Section 3005 (a)(1) and (2).

I hope the foregoing will be helpful. If I can be of further assistance, please contact me.

JIM FINCH,
Assistant Postmaster General, Government Relations.

S. —

A bill to amend title 39 of the United States Code to provide better enforcement procedures for preventing fraudulent solicitations through the mails

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3005(a) of title 39, United States Code, is amended—

(1) by inserting "including the mailing of matter which is nonmailable under section 3001(d) of this title," after "false representations,"; and

(2) by adding at the end thereof the following: "For purposes of the preceding sentence, the mailing of matter which is nonmailable under such section 3001(d) by any person shall constitute prima facie evidence that such person is engaged in conducting a scheme or device for obtaining money or property through the mail by false representations.".

THE CRUDE OIL EQUALIZATION TAX IS DEAD

Mr. DOLE. Mr. President, the energy tax conferees have been struggling with the crude oil equalization tax for almost 3 months. The tax is not only bad energy policy but has, in recent months, become bad politics. Today, I doubt that the crude oil equalization tax, the centerpiece of the administration's energy program, could muster even a handful of votes.

COET IN TROUBLE

The tax ran into trouble from the beginning. A motion to recommit the tax failed in the House by only a few votes. It was opposed during the Senate Finance Committee hearing by such diverse groups as the AFL–CIO, the Chamber of Commerce, and the Consumer Federation of America. Only the administration, which covets the enormous revenues generated by the tax, had any kind words to say about the equalization tax. Recently, the tax experienced another setback when the NAACP attacked the administration's energy program as being seriously deficient.

Mr. President, as passed by the House, the equalization tax would artificially raise the price consumers pay for oil produced in this country by taxing oil up to world level price. With domestic production presently at 8 million barrels per day, revenues from this tax would quickly accumulate. It is estimated that the Government would accrue $15–$18 billion per year on a program that totally ignores our energy problem. At this rate, it costs three times more to save a barrel of oil than it costs to buy one.

During the markup session, an administration official stated that the administration would like to see the tax extended from the 1981 House version to 1985. For many Senators, this remark sealed the fate of the tax.

Another blow was dealt the tax, when the Senator from Kansas introduced the House-passed energy tax bill as a substitute for the Senate bill. The House bill, containing the equalization tax was rejected by the overwhelming vote of 14 to 74.

TAX INCREASE

There was a time that the Senator from Kansas referred to the crude oil equalization tax as the single largest tax increase in America's history. However, with the enactment of the $227 billion social security tax increase, the energy tax bill is only the second largest tax increase in our history. At this pace, the 95th Congress will be known for one thing and one thing only—the Congress that wanted to tax the American public into oblivion.

Mr. President, the events of the past few months indicate that the crude oil equalization tax is dead. It will not solve our energy problems.

MISGUIDED APPROACH

The Congress would only be fooling itself if it takes this misguided approach. The tax will disrupt the economy. It will cause prices to rise, dislocate jobs, and squeeze our budding economic growth.

The administration during the last several weeks has proclaimed that an agreement on the energy bill will soon be reached. Frankly, I do not know what events have occurred which leads them to reach this conclusion. The fact is, support for the energy bill is diminishing and diminishing quickly.

If the United States is to meet the challenge of the OPEC cartel and insure energy supplies at an affordable cost, we must develop new recovery techniques and accelerate the development of our traditional energy resources. Until we adequately address the energy issue, we will continue to be dependent on imported petroleum.

ANNIVERSARY OF EXPLORER I—NEED FOR FUTURE SPACE GOALS

Mr. STEVENSON. Mr. President, January 31, 1978, is the 20th anniversary of the launch of our Nation's first Earth satellite, Explorer I. Not only did this successful launch signal our entry into the space age, but Explorer I was also responsible for the first scientific achievement in space—discovery of the Van Allen radiation belt around the Earth.

The past 20 years have witnessed the establishment of a well-balanced manned and unmanned space flight capability that has resulted in scientific and technological achievements of which the United States can be justifiably proud. The foundation for this activity was created through the enactment of the National Aeronautics and Space Act in July 1958 which established a policy commitment to and purposes for a national space program. The act also established the National Aeronautics and Space Administration as the implementing agency.

Our space program, dedicated to the peaceful use of space and the betterment of humanity, has enhanced our national prestige and our technological base through such scientific and engineering achievements as the Apollo lunar program and the Viking/Mars program. We are also proud of our operational weather and communications satellite systems and the beneficial impact on the daily lives of people at home and abroad. We have demonstrated the ability of man to live and perform useful work in space for extended periods of time during the Skylab program. We have expanded mankind's view of this planet and, in a real sense, dramatized the basic interdependence of all peoples.

With a view toward the future, the most significant factor in the space program today is the development of the Space Shuttle system scheduled for orbital flight test beginning next year. This system offers not only a more flexible and economical launch system when compared to the current families of expendable launch vehicles, but also a new capability to continue space exploration and to exploit the knowledge gained for the benefit of humanity.

However, the advent of the Shuttle dictates that we must define, or in some cases redefine, realistic goals for our national space program. Space projects by their very nature require extensive preparation and long-term planning. It is not sufficient to make these decisions on a year-by-year basis, for this inevitably means ignoring what may be the most useful and far-seeing developments.

There are many possibilities presented by our growing technical competence in space. We must weigh carefully how best to develop our new capability for manned space flight, including the potential of space industrialization, space manufacturing, energy development, and longer-term space habitats. We have identified the potential of earth resource survey satellites for crop forecasting, land use, mineral resource, water resource and other applications and the great potential of space-based communications systems. We have a successful program in

planetary science probing the unknowns of the solar system and trying to interpret how this knowledge relates to the planet Earth.

As we begin the third U.S. decade in space, it is essential that we examine carefully each of these potentials. We must assure ourselves of the space program's direction and purpose, much as we did 20 years ago at the dawn of the space age.

This year the Subcommittee on Science, Technology and Space will aggressively pursue the definition of future program goals. On February 7, beginning at 9:30 a.m., the subcommittee will conduct an all-day symposium on the future of space science and space applications in room 235, Russell Senate Office Building. We have arranged for the participation of some of the Nation's most prominent scholars and experts in space activities in a roundtable discussion on future space goals. I invite my colleagues to participate in this symposium. I look forward to a most stimulating and worthwhile session.

In addition, the definition of future space goals will be stressed during 7 days of hearings now scheduled on the NASA fiscal year 1979 authorization request.

Mr. President, I ask unanimous consent that a statement describing the February 7 symposium on future space goals and the schedule of the NASA authorization hearings be printed in the RECORD. I also ask unanimous consent to have printed in the RECORD a NASA statement dated January 26, 1978, that provides interesting and informative background on our early space efforts that led to the Explorer I success.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXPLORER 1 LAUNCHED 20 YEARS AGO

America's first artificial Earth satellite, Explorer 1, was launched 20 years ago Jan. 31.

The 13.9 kilogram (30.8 pound) object, shaped like a stovepipe, 15.2 centimeters (6 inches) in diameter and 203.2 cm (80 in.) long, ushered the U.S. and the western world into the age of space. Explorer 1's principal scientific achievement was a major one—the discovery of the Van Allen Radiation Belts surrounding Earth.

Explorer 1 was prepared and launched by two Army organizations which are now elements of NASA: the development group of the Army Ballistic Missile Agency (ABMA), Huntsville, Ala., and the Jet Propulsion Laboratory (JPL), Pasadena, Calif. The development group of ABMA was transferred to NASA and became the nucleus of the new Marshall Space Flight Center in 1960. Some 1,400 employees who helped launch Explorer 1 still work at the Marshall Center. JPL was assigned to the space agency in December 1958.

ABMA provided the modified Redstone booster and the basic satellite design, while JPL furnished the solid propellant upper stages of the carrier vehicle and packaged and tested the payload.

Explorer 1's launch from Cape Canaveral, Fla., by a Jupiter C vehicle came at 10:48 p.m. EST, Jan. 31, 1958, which was 84 days after the Department of Defense gave the Army group the go-ahead to prepare the orbiter as a backup to the existing Vanguard satellite project.

The small satellite dispatched information on the space environment to Earth stations until May 23, 1958, when its batteries were exhausted. The vehicle, however, continued to orbit for several years. It reentered March 31, 1970.

The project that culminated in the launch of the Explorer 1 satellite actually had its beginning several years earlier. As early as 1954, the rocket group at Huntsville, led by the late Dr. Wernher von Braun, had proposed orbiting a satellite with available missile hardware.

The proposed multi-stage vehicle would have a Redstone missile as the first stage and would carry solid-propelled upper stages. JPL and the Office of Naval Research joined the fledgling program, to be called "Project Orbiter." But "Project Vanguard," a Naval Research Laboratory/National Academy of Sciences program, was selected as the nation's satellite program and the Orbiter was shelved.

While the Orbiter proposal was turned down, work did not stop entirely on the multi-stage launch vehicle.

The same combination of a multi-stage vehicle was needed at the time for testing reentry nosecones to be used on ballistic missiles. The von Braun group used the proposed vehicle, called the Jupiter C (Composite Reentry Test Vehicle), to develop ablative type materials for war heads that could withstand the extremely high reentry heat.

The third Jupiter C launched in the reentry heat test series sent a one-third scale model nosecone into space Aug. 8, 1957. The object was recovered from the Atlantic Ocean by the Navy after a flight of 1,930 kilometers (1,200 miles) with a peak altitude of more than 966 km (600 mi.). This was the first U.S. manmade object recovered from outer space and the flight proved the feasibility of the ablative-type nosecone.

During the mid-1950s Marshall Center engineers and scientists did some design work and very modest development work on a satellite. The late Josef Boehm, who worked then in the guidance section and later in the center's Astrionics Laboratory, designed a complete satellite in 1954.

The unofficial satellite program had reached a point by early 1957 where there even was a plan for a satellite tracking computer and data gathering system.

Development problems slowed the Vanguard project and in the wake of the first two Russian Sputnik launchings, the Army was told to be ready to put an American satellite into space. When the Defense Department's Nov. 8, 1957 order came, all that was needed to start things rolling was to fabricate the satellite and assemble the Redstone solid-fuel rocket assembly for the launch vehicle.

JPL fabricated the satellite designed by Boehm. The primary difference in Boehm's proposed satellite and the JPL version was that the cylindrical devise was made from metal instead of fiberglass as proposed by Boehm. JPL also provided the solid upper stages.

Dr. James Van Allen, of the State University of Iowa, designed the scientific package carried into space. The radiation detection experiment discovered the Van Allen radiation belt around the Earth, a major scientific finding of the decade. The Explorer 1 launch was a part of this country's participation in the International Geophysical Year.

FROM THE SENATE COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Senator Warren G. Magnuson (D-Wash.), Chairman of the Senate Committee on Commerce, Science and Transportation, today announced the list of participants for the all-day symposium on the future of space science and space applications to be held in Room 235 of the Russell Senate Office Building on Tuesday, February 7, 1978, 9:30 a.m. (reference: Press Release No. 95–176, dated January 9, 1978). This symposium, which will mark the twentieth anniversary of the National Aeronautics and Space Act of 1958, will explore both the opportunities and obstacles associated with space utilization during the balance of this century. Senator Adlai E. Stevenson (D-Ill.), Chairman of the Subcommittee on Science, Technology and Space, will preside at the roundtable discussions.

Space Applications (Morning Session):

1. Mr. Ivan Bekey, Director of Advanced Mission Studies, Aerospace Corporation, Los Angeles, California.
2. Mr. Norman Cousins, Editor, *Saturday Review*, New York, New York.
3. Dr. Kraft Ehricke, President, Space Global, La Jolla, California.
4. Mr. Klaus Heiss, President, ECON, Inc., Princeton, New Jersey.
5. Mr. Herman Kahn, Director, Hudson Institute, Croton-on-Hudson, New York.
6. Dr. Hans Mark, Under Secretary of the Air Force, Washington, D.C.
7. Dr. George Van Reeth, Director of Administration, European Space Agency, Paris, France.

Space Science (Afternoon Session):

1. Professor James Arnold, Department of Chemistry, University of California (San Diego), La Jolla, California.
2. Professor Herbert Friedman, Superintendent, Space Science Division, Naval Research Laboratory, Washington, D.C.
3. Dr. Noel Hinners, Associate Administrator for Space Sciences, NASA, Washington, D.C.
4. Professor Michael McElroy, Center for Earth and Planetary Physics, Harvard University, Cambridge, Massachusetts.
5. Professor Philip Morrison, Department of Physics, Massachusetts Institute of Technology, Cambridge, Massachusetts.
6. Professor Carl Sagan, Director, Laboratory for Planetary Studies, Cornell University, Ithaca, New York.

For additional information please call Allan Hoffman or John Stewart at (202) 224–9351

NOTICE.—Interested persons are advised that the Committee may reschedule or continue these hearings and that unless ample time is available for mailing, notices of changes in dates, times and rooms will only be distributed to the Senate Press Gallery.

FISCAL YEAR 1979 NASA AUTHORIZATION HEARING SCHEDULE

Date, witness, and subject:

FEBRUARY 21

Frosch: Review of stewardship and directions for the future as represented by this budget, budget philosophy and discussion of broad agency policies, problems.

Kline: Organization staffing and manpower policies.

Lilly: Processing of shuttle operations revenues.

FEBRUARY 22

Yardley: Shuttle, transportation system operations, expendable launch vehicles, Spacelab, technology base.

Grier: Aerospace Safety Advisory Panel.

FEBRUARY 28

Hinners: Space Science.

Pozinsky: Tracking and data acquisition.

MARCH 1

Calio: Space applications and technology transfer.

MARCH 7

Kramer: Aeronautics and Space Research and Technology (including energy).

Curtin: Facilities program.

MARCH 8

Frutkin: International programs.

Perry: Department of Defense space and aeronautics programs. 10:00 a.m. (Closed)

MARCH 16

Department of Energy: Nuclear space programs, NASA energy, satellite solar power system.

National Research Council ad hoc committee: Report on Space Shuttle Main Engine.

DEVELOPMENT OF NATURAL RESOURCES IN ALASKA

Mr. STEVENS. Mr. President, late last year, the American Federation of Labor and Congress of Industrial Organization met for their annual convention in Los Angeles. At that convention, the AFL–CIO adopted a number of resolutions. One which I believe the Senate should be made aware of is the resolution which opposes vigorously certain legislation regarding the establishment of new national parks, wildlife refuges, and wilderness areas in Alaska without adequate survey, exploration, and feasible and necessary development of Alaska's natural resources.

The AFL–CIO recognizes that Alaska's mineral wealth is largely unknown and unexplored. They are in full support of continued and extensive exploration, plus the need to locate and inventory potential mineral and other resources in Alaska prior to a permanent decision being made as to specific land use for Federal lands in which these resources are contained. Moreover, the AFL–CIO recognizes that this search must be continuing because improvements in exploration technology provide new information and similar data.

The AFL–CIO resolution maintains that environmentally restrained orderly development of Alaska's energy, mineral, and other natural resources, including recreation and wilderness resources, is essential to the welfare of the American people and also provides reasonable employment opportunities. The resolution maintains that H.R. 39, which is a companion bill to S. 1500 on our side, as presently drafted does not adequately provide for a balanced and reasonable approach to Alaska's d–2 issue.

Mr. President, I ask unanimous consent that this resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

DEVELOPMENT OF NATURAL RESOURCES IN THE STATE OF ALASKA

RESOLUTION NO. 211

Whereas, Alaska's mineral wealth is an established potential for the future, there is incomplete knowledge of its full dimensions. Minerals are scarce in nature and randomly distributed, so extensive exploration is needed to locate and define the deposits. Moreover, the search must be continuing because improvements in exploration technology allow going over previously explored areas and finding new resources. Also, advances in metallurgical processing and other factors can make mining economical in the future where it was not in the past, and

Whereas, The principle of multiple-use, environmentally-restrained orderly development of Alaska's energy and mineral resources and other natural resources—including recreation and wilderness resources—is essential to the welfare of the American people and also provides reasonable employment opportunities. Surveys are essential so the nation can know the full extent of Alaska's resources that are available to meet the nation's needs, and

Whereas, H.R. 39, as presently drafted raises the possibility of unnecessary restraints on surveys and exploration and full knowledge of Alaska's resources; therefore, be it

Resolved, That the AFL–CIO opposes H.R. 39 as presently drafted and supports survey and exploration and multiple-use orderly environmentally-protected development of Alaska's natural resources.

IOWA LOESS HILLS

Mr. CULVER. Mr. President, travelers in western Iowa have always enjoyed the scenic loess hills, which rise sharply from the bottom lands of the Missouri River. Extending from Sioux City for nearly 175 miles to the south, these unusual formations consist of loess soil deposited by prevailing westerly winds more than 14,000 years ago. The only other known deposits of this kind are along the Yellow River in China.

Protection of this unique natural asset is a matter that deserves consideration by the Federal Government. Accordingly I have recently written Mr. William J. Whalen, Director of the National Park Service, requesting his assistance in developing appropriate measures for protecting the particularly significant segments of these hills.

With many of our national parks and monuments already strained beyond their capacities by visitors, we should consider the development of additional sites where Americans can enjoy the recreational, geological, and scenic benefits of unusual natural areas; where they can again be close to the land.

Although the Midwestern and Eastern sections of the United States are not generally recognized for the same variety of spectacular natural areas as is the West, they contain many beautiful places, such as the loess hills, worthy of incorporation into our national system of parklands and monuments.

Recently, two editorials in Iowa newspapers have discussed efforts to protect land with unique natural features. The first, from the Des Moines Register of January 1, 1978, supports Federal efforts to protect the loess hills. The second, from the Des Moines Tribune of December 1, 1977, urges establishment of more Federal parklands in the East and Midwest.

I ask unanimous consent to have copies of my letter to the Director of the National Park Service and these two articles printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
January 26, 1978.

WILLIAM J. WHALEN,
Director, National Park Service, Department of the Interior, Washington, D.C.

DEAR MR. WHALEN: I am writing to ask your assistance in developing measures to protect the loess hills in western Iowa.

These hills comprise a significant natural area extending for nearly 175 miles along the Missouri River bottomlands. The loess soil that forms these hills was deposited by westerly winds more than 14,000 years ago. I am told that the only similar formations are found along the Yellow River on mainland China.

Considerable interest in preserving the loess hills has recently been expressed in Iowa. The Iowa Conservation Commission staff has suggested the Preparation Canyon State Park or the area around Little Sioux, Iowa, for possible designation as a national monument. I understand that the National Park Service in past years has considered a detailed study of the recreation and natural history potential of these formations, but that such a study has never been conducted.

I would like to know what information on the loess hills the National Park Service has compiled. If additional studies are necessary, I would appreciate receiving any suggestions regarding possible avenues for funding them. Finally, I would welcome any thoughts you might have on action that might be taken now to protect these hills.

I would greatly appreciate your earliest possible consideration of this matter, and I hope we can work together to accord the loess hills the national recognition they deserve.

Best wishes.

Sincerely,

JOHN C. CULVER.

[From the Des Moines Register, Jan. 1, 1978]

PRESERVE THE LOESS HILLS

The growing interest in preserving the loess hills of western Iowa is welcome. The only other known large deposits of this soil are along the Yellow River in China. The area has vegetation found nowhere else in Iowa and has considerable scenic beauty.

The loess hills will be one of the areas studied in 1978 under the federal government's National Landmark program. The study will cover the central lowlands area of the U.S., running from Ohio to the Missouri River, to identify natural features that deserve possible national recognition.

If the loess hills are singled out for attention in this study, they would later be the subject of a field study by an expert. The expert could recommend that the area be recognized as a National Landmark by the secretary of the interior. This designation usually is sufficient to protect areas from undesirable development.

The loess hills were studied by graduate students at Iowa State University a few years ago. The ISU study concluded that the best loess hills in Iowa run from around Onawa southeast to Preparation Canyon State Park. This stretch is about 15 miles long, three to five miles wide, and encompasses at least 40,000 acres.

The state owns less than 3,000 of the more than 40,000 acres. Gerry Schnepf, director of planning for the state Conservation Commission, said that budgetary limits prevent the state from acquiring much more of the land in the near future. Schnepf would like to see the area incorporated into the national park system as a national monument.

It would be tragic if the loess hills were destroyed. If the federal government does

not take steps to preserve the area, Iowa should do so.

[From the Des Moines Tribune, Dec. 1, 1977]

BOOSTING PARKS

The Carter administration is on the right track in urging expansion of the network of national parks and recreation areas. A record 268 million visits were recorded last year at the some 300 sites managed by the National Park Service. That mark probably will be topped when this year's figures are tabulated.

Congress voted last year to increase the Land and Water Conservation Fund to $900 million annually, a threefold increase. The fund is used to purchase lands for national parks and recreation areas. The fund also helps state and local governments purchase land for recreation.

The Carter administration has proposed giving special federal protection to nearly 92 million acres in Alaska, with about 40 million acres designated for the national park network. The administration also has backed efforts to expand Redwood National Park in California, which is threatened by logging near its borders. Final approval from Congress is needed.

Though these actions are welcome, federal recreation areas should be increased in the Midwest and East, where most Americans live. Demands are growing for more parks in crowded urban areas.

Congress should give high priority to setting aside more land for national parks and recreation areas—and do it now while there still is time to obtain it for the pleasure of this and future generations.

THE DANGERS IN THE NUCLEAR TEST BAN

Mr. HATCH. Mr. President, to the extent that our rapidly deteriorating strategic position relative to that of the Soviet Union receives any attention, it is in terms of SALT issues. An article in the National Review by two distinguished experts, S. T. Cohen and W. R. Van Cleave, makes it clear that we face great dangers as well in the Comprehensive Test Ban Treaty (CTBT). Mr. Cohen, a nuclear physicist who worked on the Manhattan project, has been a consultant to the Pentagon, the Air Force, and the Los Alamos and Livermore Laboratories. Mr. Van Cleave, a professor of international relations and director of defense and strategic studies at the University of Southern California, has held positions in the Pentagon and the U.S. SALT delegations, and was most recently a member of the "Team B" selected to produce a competitive national intelligence estimate. They are obviously experienced and knowledgeable, and if we are to learn the truth of the situation, we must listen to others in addition to the Chamberlains in our midst.

Our Government, our universities, and our communication media contain many people who believe that the only threat, or the main threat, to ourselves and the rest of the world is a hysterical fear of communism that allows an American "military-industrial complex" to perpetuate a self-serving arms race. Usually cultures have found the devils to be abroad among foreigners who were their enemies, but our culture finds all the devils to be here at home. This makes it extraordinarily difficult to focus any public attention on threatening words and deeds of the Soviet Union. Anyone who makes such an attempt is usually assailed as a madman who wants to blow up the world, and so fewer and fewer try. The Soviets have no trouble reading our situation. When Leonid Brezhnev returned from the Helsinki Conference, he told his Warsaw Pact partners:

Trust us, comrades, for by 1985 . . . we will be able to exert our will whenever we need to.

This statement did not stop George F. Kennan from declaring recently to the Council on Foreign Relations that Brezhnev is "a man of peace," because Brezhnev's own statements are discounted by our own leaders who believe that all devils are American ones.

If we look at the record, it is completely obvious that those who warned of our deteriorating relative strategic position were right, whereas reassuring politicians were wrong. Listen, for example, to Secretary of Defense McNamara in 1965:

The Soviets have decided that they have lost the quantitative race and they are not seeking to engage us in that contest. . . . there is no indication that the Soviets are seeking to develop a strategic nuclear force as large as our own.

Such an incredible error stated with such reassuring certainty is beyond belief, but we all continue to hear similar ones on the floor of the Senate and in the House.

Mr. Cohen and Mr. Van Cleave are courageous men, and I recommend their concerns to the attention of my colleagues. I ask unanimous consent that their article from the National Review be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE NUCLEAR TEST BAN: A DANGEROUS ANACHRONISM

(By S. T. Cohen and W. R. Van Cleave)

President Kennedy made this staunch avowal on March 2, 1962.

Six months before, the Soviet Union had abruptly and without warning terminated a three-year moratorium on nuclear testing by conducting the most carefully prepared, intense, and violent series of thermonuclear explosions in history. After this experience, President Kennedy sought to make it clear that the United States would never again shut off nuclear testing without explicit agreements on inspection and verifiable assurances of Soviet compliance.

At the same time, Kennedy made it clear that meaningful advances in nuclear weapons technology could come about only through actual testing:

"If our weapons are to be more secure, more flexible in their use, and more selective in their impact—if we are to be alert to new breakthroughs, to experiment with new designs—if we are to maintain our scientific momentum and leadership—then our weapons progress must not be limited to theory or to the confines of laboratories and caves."

These technical contentions, of course, were supported by the leading U.S. nuclear weapons scientists of that period, and those still engaged in nuclear weapons work have not changed that judgment over time. If anything, knowing more about the technology and what might yet be accomplished appears to have reinforced the judgment; the director of Los Alamos Scientific Laboratory, Harold Agnew, has stated: "If testing were to stop, then we would not have a capability to design nuclear weapons."

Kennedy knew enough about Soviet secret preparations leading to the massive tests of 1961 to conclude that the answer to a moratorium must be, "Never again." But did he know everything about those preparations? Clearly, the Soviets used the period of the moratorium to prepare clandestinely and methodically the extensive series of tests with which they broke the moratorium. But what President Kennedy may not have realized was that the Russians may have been doing more than just planning; there is a distinct possibility that the Soviets were actually conducting secret underground tests during this period of a presumed moratorium on testing. In view of the phenomenal progress they were able to make in the spasm of atmospheric testing they conducted during the autumn of 1961, it can be argued that they almost had to have performed experiments at lower nuclear explosive levels to check out the basic design of their hydrogen warheads prior to full-scale testing. To have accomplished what they did as rapidly as they did—apparently moving from distinct inferiority to a clear lead over the U.S. in multimegaton weapons technology—without benefit of prior design testing seems technically unlikely.

In President Kennedy's words, "if we are to be alert to new breakthroughs, to experiment with new designs . . . then our weapons progress must be not limited to theory." These words were not merely dramatics to persuade the American public. They are fundamentally correct. On more than one occasion, U.S. efforts to go too quickly from the nuclear drawing board to the testing ground have met with results significantly different from theoretically calculated expectations. On this basis alone, one should be at least highly suspicious—if not utterly confident—that the Russians were testing their lower yield "triggers" so as to check out the design principles of full-scale megaton-range warheads. Was there any indication of such clandestine testing? Maybe.

During the latter half of the 1958–61 test moratorium, the Soviets, with great fanfare and evident pride, announced publicly a series of massive experiments in the use of high explosives (HE) to perform Herculean blasting tasks. The amount of explosives involved in these shots was truly colossal—tens of thousands of tons. Put in the vernacular of nuclear weapons, this would be tens of kilotons, i.e., several times the release of the bomb that destroyed Hiroshima.

With the ending of the moratorium, these experiments apparently also ended. Today, the Soviets make no mention of these HE blasting techniques and are so high on nuclear explosive methods that they refuse to consider any test ban treaty that would threaten to stifle their progress in this area. So one could guess that the HE shots were a bust. Or were they HE shots?

On June 11, 1961, the following dispatch was issued by TASS:

"UZBEK BLASTING.—Preparations are under way in the foothills of Tienshan, Uzbekistan for blasting a high mass of rock, *Pravda Vostoka* reports June 11. For the first time in world practice, 30,000 tons of explosives will blast 14.5 million cubic meters of rock rich in ores. This powerful blast will save four million rubles because it obviates the necessity of building roads, high-tension transmission lines, and other structures. The strength of the peaceful explosion in Tienshan will be such that all seismic stations of the world will be able to register it."

Note three things about this revolutionary technique: the power of the high explosive charge—30 kilotons; the enormous weight of ore blasted out—50 million tons;

and the astounding means of removing this ore—so astounding as not to be revealed to *Pravda Vostoka's* readers, except to note that such ordinary aids as surface transportation and electrical power facilities were not required. (Also not mentioned was how the truly remarkable feat of moving in 30,000 tons of high explosives was accomplished without the aid of surface transportation.)

Perhaps then, the Soviet, announcing "HE experiments" but not permitting inspection of them, were really conducting nuclear tests, in direct violation of the understanding with the U.S. (Admittedly, the moratorium agreement was more in the nature of a "gentlemen's agreement" since nothing of a legal nature was ever signed. Whatever agreement did exist was embodied in unilateral statements and bilateral understandings.)

Today, we see an Administration freshly in office attempting so anxiously to move toward a treaty banning all nuclear testing that it has seriously considered both an uninspected moratorium and unilateral suspension of testing, only hoping that the Soviets could be trusted to follow suit. In other words, the Administration is considering doing what President Kennedy vowed we would never do again—even though the reasons for his declaration hold as true now as then.

Unilateral suspension of nuclear testing is, of course, an option the President can pursue without obtaining congressional permission. A treaty, however, requires Senate consent; and before the Senate could pass judgment on a treaty, the signatories would have to be in accord on specific terms, including means of inspection and verification. The Soviet position on a Comprehensive Test Ban Treaty (CTBT), to date, is very strongly that a CTBT would be unacceptable unless all nuclear-weapons states were parties to it.* Since the Chinese and French (and Indians?) are most unlikely to agree to a CTBT, it would seem that any U.S. initiative would be a unilateral action.

There are two other aspects of a comprehensive test ban that must be considered as well, both having to do with its feasibility.

A comprehensive test ban can never be monitored and verified. Any "comprehensive" test ban would in reality be a threshold test ban—i.e., one applicable only to testing above the threshold of verification capabilities. Technically, nuclear testing relevant to weapons development and advancement may take place on a continuum of energy release from a very few grams' "yield," or less, to millions of tons (megatons) of TNT equivalent. At the lowest end, nuclear weapons testing may be conducted in the laboratory, impervious to any system of detection. Teleseismic verification levels are a matter of debate; but there will always be a substantial area of nuclear explosive testing for which there is no possibility of identification.** When he was the Pentagon's Director of Defense Research and Engineering, Dr. John Foster testified to Congress that a one-kiloton test (well below even the lowest threshold claimed for seismic verification) is indeed a potentially significant weapon test. While laboratory-scale testing by itself may be inadequate to sustain a weapons program for long, the Soviets would have a significant advantage over the U.S. if they were to test at unverifiable, but still appreciable levels in preparation for an end to the ban, while the U.S. refrained from doing the same.

In addition, there is the troublesome matter of "peaceful nuclear explosives" (PNEs). The Soviet position is that PNEs must not be subject to the constraints of a comprehensive test ban. Article III of the Threshold Test Ban Treaty signed by the U.S. and USSR on July 3, 1974 specifically excepts underground nuclear explosions for peaceful purposes. But it must be realized that PNEs can be used for productive military tests. And while the Soviets may allow us to monitor closely the yields of their PNEs, they most certainly aren't about to let us check their nuclear explosive designs. The warhead designed to divert a Russian river may also prove effective in the front end of a Russian missile.

It is curious that at no time has the present Administration spelled out its arguments for the clear and specific advantages of such a treaty—even though those opposed to a CTBT have put forth a number of quite specific and detailed objections. In fact, one impassioned advocate of a CTBT, Stanford physicist and former presidential advisor Wolfgang Panofsky, nonetheless acknowledged in congressional hearings that:

"It is difficult to make a case that a complete nuclear test ban treaty would be a major factor in slowing the arms race. . . . Strong economic reasons for a comprehensive nuclear test ban are difficult to sustain. . . . The danger of ecological risk in itself cannot be considered to be a persuasive reason for proceeding with a comprehensive nuclear test ban."

This leads one to ask: If we don't know why we need a treaty, then why do we want one? In addressing this question, it is just possible that we may find out that there are good reasons why we should not want one.

In this respect, one might note a curious inconsistency on the part of many advocates of a CTBT: they argue both that all that can be accomplished through testing has been accomplished, so there are no further gains to be had, and that testing furthers the qualitative "arms race," so to stop testing will "curb the arms race." The sponsors of Senate Resolution 67, calling for a suspension of U.S. underground testing, assert that "there is no prospect" of new breakthroughs in nuclear technology, yet at the same time argue that "the CTBT has acquired new relevance as a check on qualitative nuclear improvements."

Either nuclear testing is significant for nuclear weapons development, or it isn't. If it is not significant, then it is not very reasonable to maintain that a CTBT will "curb the arms race." If it is significant, then the losses incurred by stopping testing must be weighed against the alleged benefits of stopping. The latter, however, are seldom seriously examined. Usually, a CTBT is offered as a giant step in arms control, without showing how (and furthermore, ignoring what has occurred since the atmospheric test ban was to have accomplished the same objective; as Dr. Edward Teller testified at the time of the hearings on that treaty: "This treaty is not directed against the arms race. This treaty is directed against knowledge, our knowledge"). Even more regularly, many supporters of a CTBT divert examination from its purposes and center the argument on the issue of verification, or feasibility.

There is, admittedly, some official justification for this, since—if one takes declaratory arms control objectives at face value—the U.S., following preambular pledges from the Limited Test Ban Treaty, has maintained that it favors a "comprehensive test ban adequately verified." Given that, the only catch might seem to be "adequately verified," and so the debate has raged around that point.

This whole argument is, however, something of a red herring. One need not be a confirmed cynic to recognize the distinction between arms control rhetoric and real policy, or to recognize the expediency of deferring difficult problems and decisions to the future through affirmation of general support for arms control aspirations. In fact, until very recently the U.S. has been less than enthusiastic in its pursuit of a CTBT not only because of Russian lack of interest but also because of real doubts about both its feasibility (in view of the impossibility of verifying Soviet compliance) and its desirability (in view of the continuing need to improve technology). This was strongly suggested by James Schlesinger, who emphasized, when he was Chairman of the Atomic Energy Commission, that "the question of the desirability of the test ban goes far beyond the question of monitoring what the Soviets are doing."

What this means might be approached through a review of the premises of the 1963 atmospheric test ban treaty and the comparative U.S. and Soviet development since then.

At the beginning of the test ban negotiations (in the late 1950s), the United States, by its own admission, held very substantial leads over the USSR in nuclear weapons and nuclear weapons technology. This was at a time when both countries were doing virtually all of their testing in the atmosphere, making it far easier for the U.S.—by analyzing the atmospheric test debris—to determine how the Soviets were conducting tests. Our judgment, unquestionably correct, was that in nearly all areas we were far ahead.

That the Soviets, in a substantially inferior position, should have been interested in negotiations whose successful outcome would relegate them permanently to that inferior position should have seemed curious, to say the least. Considering that U.S. officials were openly boasting of U.S. nuclear superiority, why would the Soviets wish to concede forever such a key military advantage to the imperialist enemy to whose downfall they were sworn? Yet, no such curiosity was then expressed, nor has there been any searching inquiry since, as to why the Soviets would have been interested in freezing their nuclear weapons inferiority by truly stopping testing.

That the Soviets were interested not in stopping testing, but rather in stealing an advantage, by agreeing to a moratorium in 1958, was revealed when they shattered that moratorium, having achieved gains that reversed the previous U.S. lead in very-high-yield thermonuclear weapons and knowledge of weapons effects (e.g., for ballistic missile defense purposes). Even this flagrant transgression caused little change in U.S. efforts to conclude a comprehensive test ban agreement (as opposed to a moratorium). The U.S. viewpoint in 1963 was set forth by the Director of the U.S. Arms Control & Disarmament Agency, William Foster:

"Without [this] treaty . . . our advantage in small-weight, highyield weapons would most probably diminish . . . In the field of tactical weapons, the Soviets would eventually be able to match our more diversified and numerous arsenal. . . . With a treaty . . . the U.S. advantage in smaller weapons would persist over a longer time. . . . In general, our present nuclear advantages would last for a considerably longer period."

---

*It is, of course, possible that should the Soviets see a competitive advantage to a "comprehensive test ban" involving the U.S. but no others, they would change this position. Over the years prior to agreement on a Threshold Test Ban Treaty (TTBT) at 150 kilotons, the USSR firmly and consistently opposed and rejected anything resembling a TTBT.

**The U.S. Ambassador to the Conference of the Committee on Disarmament (CCD) at Geneva recently warned: "We have to face the fact that, if only national systems are used, even with advanced seismological techniques, there will still be a substantial number of unidentified or ambiguous natural seismic events. These could provide a background against which some number of clandestine nuclear tests could be hidden. On the basis of seismic means alone there could be no objective way to resolve the true character of such events."

In the same vein, with reference to the partial test ban treaty which had been negotiated, Secretary of Defense Harold Brown, who was then the Pentagon's Director of Research and Engineering, declared that he had come to support the treaty only after determining that U.S. strategic superiority would not be seriously threatened and that, in fact, the treaty would "actually improve somewhat the position of the United States vis-a-vis the Soviet Union." His boss, Secretary of Defense McNamara, went even further: "The prolongation of our superiority will be a principal military effect of this treaty."

In the early 1960s it was obviously fashionable to proclaim U.S. superiority and to use its preservation as an argument for arms control agreements. Furthermore, by U.S. decree the USSR found it acceptable to stay well behind and out of competition; in 1965, Secretary McNamara told the public:

"The Soviets have decided that they have lost the quantitative race and they are not seeking to engage us in that contest. . . . there is no indication that the Soviets are seeking to develop a strategic nuclear force as large as our own."

On the basis of such expert assessment, the U.S. decided unilaterally to halt its deployment of strategic offensive delivery systems—ICBMs, SLBMs, and strategic bombers—at levels lower than originally contemplated. Unfortunately, it soon became clear that the experts had erred. Prompted by decisions perhaps made well before 1963, the Soviets began what became the most massive and determined strategic weapons buildup in history.

As the U.S. gaped in astonishment and disbelief, the Soviets moved from distinct inferiority in strategic nuclear weapons, to parity, and then to quantitative—and very likely overall—superiority. The one-sided progress of the test moratorium years was repeated even more profoundly, and with infinitely farther-reaching consequences, during the years of the partial test ban—the years during which we were assured that our strategic superiority would be preserved. U.S. chagrin was expressed by Harold Brown as early as 1968, as the Soviet buildup came into full swing:

"You see, we leveled out our missile force. We announced how big our missile force was going to be. Our plans are that five years from now we will have just about as many missiles as we have right now. They have known that. They have known it for a couple of years, and they keep on building."

Meanwhile, in the area of tactical nuclear weapons (TNW), at the onset of test ban negotiations the Soviets had barely begun to develop their program. The U.S. which had pioneered these weapons, enjoyed clear superiority—virtually a monopoly. By the time of the atmospheric test ban agreement, as if to give the lie to American expectations across the board, the Soviets had dedicated themselves to a tactical as well as a strategic nuclear buildup. However, not until Secretary of Defense James Schlesinger reported in the Annual Defense Department Report for fiscal year 1976 that "it is now the Soviets who set the pace here" was there any official public note of Soviet TNW efforts.

Practically unnoticed, then, the Soviets had amassed a force of theater and tactical nuclear weapons exceeding that of the U.S. and NATO. In August of 1976, the Director of the U.S. Arms Control & Disarmament Agency, Dr. Fred Ikle, reported that, already, these Soviet forces "confer a significant numerical advantage over the much smaller nuclear forces of our NATO allies and U.S. nuclear strike aircraft overseas, and against all nuclear forces in Asia as well," and that furthermore this edge is growing: "Russia's strength in regional nuclear bombers and missiles grows like a towering, dark cloud over Europe and Asia."

Turning then to the question of a CTBT today, is there any vestige of American nuclear superiority to be promoted or protected by a comprehensive ban on testing? Or, if it can be argued that the USSR's nuclear capabilities and technology are in "essential equivalence" with the United States', can it be maintained, considering our experience with past test cessations, that a test ban would freeze this situation and prevent the Soviet Union from further relative gains? Or is it possible that were a CTBT to be signed now, it would place the U.S. where it hoped to place the Soviets 15 years ago—permanently behind?

There are areas of uncertainty. We know far more about the numbers and characteristics of Soviet missile launchers than we do about the design and characteristics of Soviet nuclear warheads. The reason being, as Dr. Teller had warned at the time, that by foreclosing atmospheric testing 14 years ago we also foreclosed our ability to analyze what the Soviets achieved in their nuclear tests.

Clearly, however, the argument today must be that a CTBT, assuming faithful compliance, would freeze the present situation between the U.S. and the USSR and that doing so would not be detrimental to the United States. But here is no way to sustain that position on either score. Moreover, considering how the U.S. has stressed its technological superiority over the USSR as compensating for an unfavorable numerical balance, it would be duplicitous to ignore that factor now in arguing for a CTBT. In fact, it is entirely possible that the Soviets have not only drawn even, erasing U.S. technological advantages, but have gone ahead in important aspects—in which case, it could be argued that a CTBT would be incompatible with the U.S. rationalization for the SALT accords.

Politically and militarily, however, the danger of Soviet advances arises not from the numbers or megatonnage of nuclear weapons per se, but from the fundamentally different Soviet view of nuclear weapons and war. The contrast between U.S. and Soviet viewpoints on nuclear policy, doctrine, strategy, and force posturing is vividly revealed in the representative statements in the accompanying table.

These different views on nuclear weapons and nuclear policies spell out a basic cleavage between the two sides. The cleavage is amply confirmed by the asymmetrical preparations of the two sides for nuclear war. The USSR engages in intensive efforts to train its armed forces and prepare its civilian populace for nuclear war, and also invests heavily in offensive and defensive systems clearly designed for nuclear war. Together the views consistently expressed and the actual preparations made raise serious questions about Soviet perspectives on nuclear war-fighting advantages. They also raise the question whether, in contrast, the United States, having been the first superpower to enter the Nuclear Age, has not been the first to try to back out of it: whether the U.S. is at all prepared, physically or psychologically, to face nuclear challenges at any level from the Soviet Union, and whether Soviet leaders understand this and plan accordingly.

As it now stands, a very ominous asymmetry is developing between the two sides, in respective abilities to initiate, fight, survive, and win a central strategic nuclear war. This asymmetry has been growing continuously and, unless there are U.S. actions to offset it—actions that could be severely inhibited by a test ban or a test moratorium—could be so clear by the early 1980s that U.S., Soviet, and third-country behavior in confrontations would be predestined. If the U.S. is to develop the weapons to correct this asymmetry and to maintain strategic stability, nuclear testing will be a crucial component of its effort. A test ban cannot prevent this dangerous asymmetry; it can only make it much more difficult for the U.S. to do anything about it.

An equally compelling situation exists in the tactical nuclear area. Beginning in 1961, new U.S. policies were introduced that sought to reduce reliance on nuclear weapons for local deterrence and defense, and to increase reliance on non-nuclear means of defense (presumptively, the threat was nonnuclear). At the heart of these new policies was a conviction of the futility of using nuclear weapons in armed conflicts because of the supposedly horrendous destruction they would cause and the great risk of escalation to general nuclear war. To emphasize these risks, modernization of tactical nuclear weapons was ironically impeded. The more destructive the weapons, the more real these risks seemed, and the greater the support given to our policy inclinations.

Even though at that time the U.S. held far more capable tactical nuclear forces than did the Soviet Union, as well as undisputed strategic nuclear superiority, it was believed that the Russians still would move compulsively up the escalatory ladder if the U.S. ever used its tactical nuclear weapons. As a consequence, the policy objective became avoidance of nuclear use (as a higher priority even than deterrence, perhaps), on the assumption that the other side would not resort to nuclear weapons if we did not. On this basis, the U.S. sought to build up adequate conventional force capabilities to contain a conventional attack by the forces of the Warsaw Pact; thereby avoiding the humiliation of conventional defeat and at the same time sparing the world a nuclear holocaust.

No sooner were these policies introduced than the Soviets revealed a profound interest in pushing nuclear weapons development by terminating the test moratorium and by giving evidence of a decision to fashion their military plans around the employment off these "revolutionary" new weapons (e.g., in the 1962 publication of Sokolovsky's Military Strategy). Somehow, for reasons never made clear, the U.S. assessment remained that, underneath, the Politburo shared the Western nuclear apprehensions and would seek at all costs to avoid the "agonizing" decision to initiate the use of nuclear weapons.

Today, having developed their armed forces in accordance with the implications of the nuclear revolution, the Soviets have achieved capabilities which, if a major war broke out, would virtually assure their use of nuclear weapons to gain military victory. As the U.S. Defense Department currently puts it:

"The Warsaw Pact does not think of conventional and nuclear war as separate entities . . . Warsaw Pact forces are in fact postured and trained for theater-wide nuclear strikes against NATO nuclear and conventional military forces and for follow-on attacks by their armored conventional forces to exploit the nuclear attack and rapidly seize NATO territory."

Shying away from the thought of nuclear hostilities, the U.S. has let its tactical nuclear capabilities largely stagnate over the past 15 years while the Soviets have steadily improved and increased their forces, to the point that today, according to a Library of Congress study, they "evince extreme quantitative superiority in Central Europe, where their surface-to-surface missiles outnumber ours by about ten to one and their 700 nuclear-capable aircraft by something like two to one."

If the U.S. has elected to opt out of tactical nuclear conflict, is there any evidence that the Soviets see reason to depart from their established doctrine in order to oblige us? Professor Bernard Brodie, who has written and lectured on nuclear policy and strategy

for some thirty years, thinks not. "Can anyone believe, with confidence," he asks, "that the Soviet Union would challenge us to so deadly a duel and yet leave the choice of weapons entirely to us?"

As matters now stand, NATO is at the mercy of Soviet forces should the USSR elect a military takeover using its nuclear and conventional forces in accordance with its established doctrine. This defeat has become a serious possibility for far more fundamental reasons than the United States refusal to improve its tactical nuclear warhead stockpile. However, since this refusal, in turn, has been essentially a manifestation of these more fundamental reasons, for the U.S. now to seal this tactical nuclear stagnation by concluding a CTBT would, in essence, symbolize a final decision to concede defeat in ground warfare to the Russians.

PROPOSED ARMS SALES

Mr. SPARKMAN. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. Mr. President, I ask unanimous consent that the official notification be printed in the RECORD.

I wish to inform Members of the Senate that such a notification was received on January 25, 1978.

Interested Senators may inquire as to the details of this preliminary notification at the offices of the Committee on Foreign Relations, room S–116 in the Capitol.

There being no objection, the official notification was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., January 25, 1978.

Mr. WILLIAM RICHARDSON,
Professional Staff Member, Subcommittee on Foreign Assistance, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. RICHARDSON: Our letter dated February 18, 1976 indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost in excess of $25 million.

Sincerely,

ERICH VON MARBOD,
Acting Director,
Defense Security Assistance Agency.

WESTERN GOVERNORS URGE ENERGY R. & D. FOR RENEWABLE RESOURCES

Mr. STEVENS. Mr. President, the United States must become increasingly dependent on renewable energy sources—solar, wind, geothermal, bioconversion, and so on—for its future energy supplies to maintain a healthy economy and a high standard of living and to minimize unemployment. Research and development of these renewable resources must be pursued vigorously at this time to assure a smooth transition with minimum economic disruption from our current heavy reliance on oil and gas.

The Western Governors' Conference approved a resolution at their September meeting in Anchorage urging that R. & D. of renewable energy be increased and that special attention be given to economic and social factors, as well as to technical problems.

Renewable energy is as important to Alaska as our nonrenewable resources—oil and gas—which rave received so much attention lately. Many regions in Alaska have great wind and geothermal potential. Hydropower potential is abundant throughout the State. And a number of demonstrations of solar energy are underway. In remote areas, the high costs of conventional fuels make renewable energy, which often requires a large capital investment, even more attractive.

Mr. President, I support R. & D. for renewable energy resources and I ask unanimous consent that the resolution of the Western Governors' Conference be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

ENERGY R. & D. FOR RENEWABLE RESOURCES

Whereas it is the position of the National Governors' Conference that a long-range policy encouraging domestic self-sufficiency in energy production is required to guide foreign and economic policy decisions as well as those in basic research and development;

Whereas research and development efforts should contribute to the integrity and adequacy of the nation's energy resources;

Whereas the long-term nature of such efforts necessitates marshalling our existing dwindling sources of finite fossil fuels through cultivation of an energy conservation ethic nationwide;

Whereas, the Western Governors recognize that far more than technology is involved in decisions relating to the development and use of specific energy sources, costs and benefits must be weighed together with environmental and socio-economic impacts;

Whereas President Carter has declared that "renewable and essentially inexhaustible sources of energy for sustained economic growth" are necessary for the nation in the next century,

Now therefore, be it resolved that the Western Governors' Conference urges the Federal government, through the Energy Research and Development Administration and its successor Department of Energy, to provide continued and increased support for research and development efforts aimed at exploring such "renewable and essentially inexhaustible sources" as called for by the President, including such sources as solar energy, wind power, ocean thermal energy conversion, geothermal power and other alternatives to finite fossil fuels;

And be it further resolved, that such support be integrated with effective measures of energy conservation and the cultivation of an energy conservation ethic;

And be it resolved that certified copies of this resolution be transmitted to the President of the United States, the Secretary of Energy, the Administrator of ERDA, the President of the United States Senate, the Speaker of the House, the chairman of the Senate Committee on Energy and Natural Resources, the chairman of the House Ad Hoc Committee on Energy, the chairman of the National Governors' Conference, and the chairman of the National Governors' Conference Committee on Energy and Natural Resources.

Approved by the Western Governors' Conference, September 2, 1977, Anchorage, Alaska.

S. 1437—FEDERAL CRIMINAL CODE REFORM ACT OF 1978

Mr. KENNEDY. Mr. President, pursuant to the request made on Monday by Senator ALLEN during the debate on S. 1437, I am submitting for the RECORD a list of offenses under current title 18 that have been omitted from the proposed Criminal Code as obsolete. The list of offenses follows:

LIST OF OFFENSES

18 U.S.C. 592, barring troops at election polls.

18 U.S.C. 596, barring polling of the armed forces as to their choice of candidates in an election.

18 U.S.C. 604, relating to soliciting political support from persons receiving unemployment compensation or similar benefits.

18 U.S.C. 605, barring disclosure of names of persons on relief.

18 U.S.C. 754, relating to "rescue" of body of person subjected to death penalty.

18 U.S.C. 969, barring export of arms, liquors, or narcotics to "aboriginal native" of Pacific Islands.

18 U.S.C. 1155, relating to dispensing liquor on land containing an Indian school.

18 U.S.C. 1156, relating to possession of liquor in Indian country.

18 U.S.C. 1384, relating to prostitution near military and naval establishments.

18 U.S.C. 1463, relating to mailing "indecent" matter on mail wrappers or envelopes.

18 U.S.C. 1582, relating to vessels used for slave trade.

18 U.S.C. 1586, relating to working on slave vessels.

18 U.S.C. 1714, barring the mailing of foreign divorce information.

18 U.S.C. 1908, barring disclosure of information by a National Agricultural Credit Corporation examiner—the Corporation no longer exists.

18 U.S.C. 2424, relating to harboring an alien woman or girl for immoral purposes.

18 U.S.C. 2198, seducing a female passenger aboard a vessel.

18 U.S.C. 45, relating to capturing or killing carrier pigeons.

18 U.S.C. 2384, relating to conspiracy to overthrow the government.

18 U.S.C. 2385, relating to advocacy of overthrow of the government, publication of incitement to overthrow the government, and

organizing groups that advocate overthrow of the government.

18 U.S.C. 2388 (relating to false reports intended to interfere with the operations of the armed forces of the United States or to promote the success of enemies of the United States.)

CHAPLAIN (MAJ.) COLIN PURDIE KELLY III

Mr. BAKER. Mr. President, we were highly honored this morning to have been led in prayer by Chaplain (Maj.) Colin Purdie Kelly III, Assistant Chaplain to the Corps of Cadets at the U.S. Military Academy at West Point. Chaplain Kelly also gave the prayer today at the Senate youth program luncheon, and I am certain that the young people there were inspired both by his words and by his and his family's example of dedicated service to this country.

Chaplain Kelly, as you know, is the son of the late Colin P. Kelly, Jr., the first American hero of World War II. Captain Kelly, as an Army Air Corps pilot, saved countless lives during the first few dreadful hours after the attack on Pearl Harbor. After a successful mission, he was killed when his crippled aircraft exploded after he had ordered his crew to bail out to safety.

Chaplain Kelly could have had a Presidential appointment to West Point for the asking, the gift of a grateful nation in honor of his father's bravery. President Roosevelt had left the suggestion for his successor in office when the young man would graduate from high school. But he chose to earn a place in the class through his own efforts. After graduating 1963, Chaplain Kelly served 4 years as a line officer before entering the seminary to become an Episcopal priest. He has since served 2 years as civilian pastor, served in Korea, and completed advanced courses before being named last July to his present post.

I consider it a signal honor to have heard this fine young man today, and I want to commend and congratulate him for his dedication to his country and his God. His father would have been very proud of him today, as are we all.

SECRETARY VANCE CLARIFIES U.S. ECONOMIC COMMITMENT UNDER THE PANAMA CANAL TREATIES

Mr. STONE. Mr. President of great concern to many Americans has been the question: What economic commitments to Panama is the United States entering into under the Panama Canal treaties? Many people have been concerned that our financial commitments will be quite extensive and I have shared their concern.

For this reason I questioned the Department of State extensively during Senate Foreign Relations Committee markup of the treaties and proposed: First an amendment eliminating language from article XIII paragraph 1 of the main treaty requiring the United States to turn over the canal to Panama in the year 2000 "free from liens or debts" and second an understanding that no financial obligation from the United States to Panama is established by ratification of the treaties other than the specifically stated toll revenue provisions of article XIII.

In response to my concerns, Secretary of State Vance today sent me a detailed letter stating clearly that:

First, there are no "hidden or secret" financial agreements or obligations between the United States and Panama arising from these treaties.

Second, the only financial obligations of these treaties are specifically stated in the treaty. Economic and military assistance to Panama would continue only by the regular annual appropriations process involving the Congress.

Third, there will be, at the end of fiscal year 1978, no Panama Canal Company outstanding long-term obligations. Any future liens and debts which may arise would be subject to United States control and approval.

This letter is a useful and informative declaration summarizing the nature of the economic relationship between the United States and Panama arising out of the Panama Canal treaties. It has clarified my concerns and will be a useful addition to the record for the Senate debate and a historical document for interpretation of this economic relationship between our countries in future generations. I ask unanimous consent that this letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SECRETARY OF STATE,
Washington, D.C.

HON. RICHARD STONE,
U.S. Senate.

DEAR DICK: This is with reference to the concerns which you raised during the Senate Foreign Relations Committee Hearings of January 27, and the proposals you made to clarify the nature of the U.S. financial obligation under the proposed Panama Canal Treaty. It is understood that the intended purpose of these two proposals is to ensure that ratification of the Panama Canal Treaty would impose no "hidden" financial obligations of the United States to Panama.

We wish to assure you that all proposed financial commitments to Panama under the new Treaty have been fully disclosed. There are no "secret" agreements. Moreover, we wish to set forth the following specific assurances with regard to the particular concerns you raised.

First, the only financial obligations to the Republic of Panama resulting from the Treaty are those specifically set forth in the Treaty and the two Agreements in Implementation. The contemplated economic and military cooperation programs described in my note to the Panamanian Ambassador of September 7, 1977, would not come into being unless and until (a) a further exchange of notes is entered into between the two Governments and (b) all applicable legislative and program criteria have been met with respect to each proposed project, including the availability of appropriated funds where necessary. These contemplated programs were intentionally made the subject of a separate instrument not legally related to the Treaty to assure that the rights and obligations of the Parties under the Treaty would not be contingent in any way upon the contemplated programs. In short, ratification of the Treaty would establish no obligation on the part of the U.S. with respect to these programs or any similar financial transactions that may be proposed in the future. Rather, these programs are to be addressed on their own merits in accordance with applicable U.S. law and program criteria.

Second, you expressed concern that the U.S. obligation under Article XIII(1) to turn the Canal over to Panama upon the termination of the Treaty in operating condition "and free of liens and debts, except as the two Parties may otherwise agree" be clarified. This provision was included in the Treaty in recognition of the fact that until the termination of the Treaty on December 31, 1999, the Canal will be operated and managed by a United States Government agency in accordance with U.S. law. Accordingly, the U.S. will retain the authority to structure the financial management of the Canal operation as it sees fit.

Our management authority under the Treaty is so broad that the U.S. could, for example, authorize the new Commission to borrow funds from private sources. Accordingly, it was considered appropriate to provide Panama the assurance contained in the quoted phrase that the U.S. would turn over the Canal free and clear, and not subject to a mortgage to which Panama did not consent.

In this connection, I would note that the U.S. has always operated the Canal on a self-sustaining basis, and that the Panama Canal Company has never had to exercise the authority granted it by law to borrow from the U.S. Treasury. In FY 1976 it did use its legal authority to defer $93 million of certain statutorily required payments to the Treasury. It has already paid part of this deferred amount and will pay the remaining $39 million in FY 1978. Once this payment has been made, the Company will have no outstanding long-term obligations and will have continued its record of meeting all its expenses from operating revenues.

The Treaty does, however, provide that if the two Parties agree, liens and debts may be carried over. For example, during the last years of U.S. operation, a major capital improvement might seem desirable, but the U.S. might not wish to finance all of the expenditures required given the remaining length of its tenure as Canal operator. In these circumstances, the Parties could agree to an arrangement whereby Panama would assume responsibility for amortizing the debt involved in the investment when it took over management of the operation. Thus, the Treaty embodies a balanced and responsible approach to the problems involved in a transition from one manager to another.

I trust that the foregoing clarifications and assurances will fully meet the important and legitimate concerns you so clearly defined during the Committee hearings.

With warm regards,

Sincerely,

CYRUS R. VANCE.

THE FOREIGN MISSION SOLAR ENERGY DEMONSTRATION ACT

Mr. PERCY. Mr. President, I am very pleased to join my colleague, Senator CASE, in supporting this bill authorizing the Secretary of State to install solar energy and other renewable energy sources in appropriate U.S. buildings abroad. I am also delighted that Congressman JEFFORDS from Vermont is introducing this bill at the same time on the House side. This bill deserves support for a number of important reasons.

A particularly significant aspect of the bill is that it gives priority to the selection of projects in less developed rather than middle-income countries. The current international energy crisis has had especially severe repercussions for the energy-deficient, less developed coun-

tries. Their economic and social development programs depend heavily on the availability of moderately priced and secure energy supplies. Since the precipitous rise in oil prices in 1973, many of these programs have been derailed. Many Third World nations either simply cannot afford to purchase fossil fuels as they once did, or they do so and incur crippling international debts.

They are therefore confronted with a cruel dilemma: continued underdevelopment or virtual bankruptcy. Many of them are seeking to escape this energy dilemma by turning to rapid expansion of nuclear power.

For obvious reasons this alternative causes great concern to all of us interested in a safe and peaceful world. Indeed, the administration and Members of this body are endeavoring to limit the spread of sensitive nuclear technology and thereby reduce the chances for nuclear weapons proliferation.

It is my belief that recent Third World interest in nuclear power could be diminished if the superiority of nonnuclear options were to be demonstrated in an objective way. The installation of solar and other renewable energy sources in U.S. buildings in these countries could provide such a demonstration. Many of the less-developed countries in the Southern Hemisphere are in the enviable position of having an abundance of sunshine. Yet this potential remains largely untapped.

It is also my belief that the United States has a particular responsibility to make it clear to the Third World that we are sincere in our commitment to use renewable, rather than depletable energy sources. Our failure to curb our oil imports does not attest to a strong commitment. Our huge energy demand has helped OPEC sustain increasingly higher world oil prices which, in turn, have exacerbated the economic problems of the Third World. Senator CASE's bill would be a small signal that the United States is not totally devoid of sensitivity on these issues.

Our installation of safe, environmentally sound energy systems in U.S. buildings abroad would also demonstrate to less-developed countries that the United States considers these technologies to be worthy of demonstration, and are not second-class technologies.

Finally, an administration commitment to install solar and other renewable energy technologies in U.S. buildings abroad might provide an additional market for those American industries producing these technologies. These firms could anticipate further demand from host countries impressed by the feasibility and cost effectiveness of alternative energy systems.

There is also great potential demand for these alternative energy technologies right here in the United States. Visible proof of the viability of such technologies would stimulate their domestic use.

In sum, because this bill would have a beneficial effect upon our own development of renewable energy systems, upon the economies of the Third World, and because it would demonstrate our commitment to safe, environmentally sound energy systems, I urge my colleagues to join with me in helping to assure its passage.

THE PANAMA CANAL

Mr. THURMOND. Mr. President, I have before me an excellent article which appeared in the Tuesday, November 29, 1977, New York Times on the Panama Canal controversy.

It was written by one of our most respected diplomats and statesmen, our friend John Davis Lodge.

Mr. President, this is a scholarly article which should be brought to the attention of each Member of the Senate before the debate begins on the canal treaties, and I, therefore, ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE CANAL: A RAMPART

(By John Davis Lodge)

WESTPORT, CONN.—The principal arguments vehemently raised in support of the Panama Canal treaties are not altogether convincing.

It is alleged in screeching tones that we stole it. That is contrary to the record. It was an act of constructive statesmanship by one of our great Presidents, Theodore Roosevelt. It constitutes a notable public service by the United States to the entire world. We should not be apologetic but proud of this unprecedented engineering achievement. We succeeded where the French failed. But for us, the Panama Canal would not exist. In one way or another it has been paid for by us many times over.

Should we now say that the Louisiana Purchase, by which President Thomas Jefferson bought one-third of the United States from Napoleon for $15 million, was a steal and that therefore we should return this vast area to France? And how about Alaska? And Hawaii?

It is asserted that the Panama Canal constitutes an anachronistic vestige of colonialism in a decolonializing world. Certainly the British, French, Spaniards and Portuguese have been shedding their colonies. But how about the Russians and their satellites? Are these satellites not in effect colonies?

Moreover, the Panama Canal Zone is not a colony. It is inhabited by many thousands of Americans. True, it is not contiguous to the United States, as it is to Panama. Is contiguity then the criterion? Well then, how about Alaska, contiguous to Canada and close to Siberia. Should we hand Alaska over to Canada or perhaps to Russia? Alaska is a state as is Hawaii. Yes—and we could conceivably make a state out of the Panama Canal Zone.

It is declared that the Latin Americans resent the North American presence in the Canal Zone. Yet there are many others who fear Russian control of the canal by means of their control of Fidel Castro's Cuba and Castro's power and influence over Gen. Omar Torrijos Herrera, the current, temporary, unelected, left-wing, military dictator of Panama. And there are many others around the world who fear that the Panamanians, in spite of their threats and promises, will not run the canal as efficiently as we do. We run it very well indeed.

Argentina, Brazil, Chile, Bolivia, Uruguay, Paraguay and Ecuador have anti-Communist Governments and fear Communist infiltration of the Canal Zone. Many in these countries would dread our relinquishing control of it.

The principal argument advanced in favor of the treaties is that, as General Torrijos has warned us, if they are not ratified by the Senate there will be trouble in Panama—demonstrations, riots, bombs, guerrilla activity—and that therefore we must agree to the treaties as an act of appeasement—a mini-Munich, if you will—but, in effect, a shotgun arrangement.

We got tired of the Vietnam War, we refused to help in Angola, and so now it is proposed that 217 million Americans should cave in and run away before the ominous threat of 1.5 million people in Panama. This is the worst possible reason for ratification of the treaties, for it portrays us Americans as a supine pack of cowards, a paper tiger who will give in at the slightest threat of combat. It is succumbing to blackmail.

This is the argument that would cause us to lose face and friends and confidence in many parts of the world, particularly in South America, where our sanctimonious sermonizing about human rights has made us unpopular.

Certainly the treaties can properly be revised. However, let us recognize that in the mortal struggle in which we are inextricably involved, for the United States to surrender control of the canal will, in this jungle world, present the enemy with an advantage. While in some ways the canal may be obsolete, in unfriendly hands it could present a difficult and dangerous problem for the United States, especially in the event of a showdown.

The overriding question is this: Is it in the interests of our national security, is it in the best interest of the United States as leader of the non-Communist world to lessen our control of this vital waterway and rampart at a time when Russian imperialism, heavily and increasingly armed, is very much on the march? The national interest must be the determining factor. We should be governed by geopolitical considerations. If we move out, will the enemy eventually move in?

THE STRATEGIC ARMS LIMITATIONS TALKS

Mr. BIDEN. Mr. President, the Senate will be giving much attention this year to efforts to achieve a new treaty limiting strategic offensive arms.

Prospects appear reasonably good that we can have a new treaty on SALT and that it can be a good one. Clearly, agreement could be achieved very quickly if the leaders of the two sides so decide.

On my way to the office the other day, I was giving particular thought to what kind of SALT agreement I would negotiate if that were my responsibility. Modestly, I must tell you that I was able to negotiate a new SALT treaty which verged upon brilliance. It had a few loose ends, of course, but, after all, it is almost impossible to negotiate an absolutely perfect agreement in a matter of a few minutes. Our negotiating team in Geneva has been trying for more than 5 years.

Of course, I had one tremendous advantage not enjoyed by Ambassador Paul Warnke and his fellow delegates: I was able to play the part of both sides in the negotiation. Accordingly, since I wanted an agreement, I was able to achieve one.

It seems to me that some of those engaged in the public discourse about SALT have lost sight of the simple fact that agreement between two cautious and wary sides—backed up by enormous and suspicious bureaucracies—is far more difficult to achieve than an agreement

close friends might make with each other or that I or any other Senator might make were we able to play both sides.

Under the existing circcumstances, we cannot expect an "ideal" agreement that perfectly meets all of our concerns, or, as some would have it, an agreement which allows us freedom to do everything we might conceivably want to do in strategic armaments, while cutting off every program on the Soviet side which might cause the slightest concern.

What we can hope for is a compromise agreement which meets to a great extent the gravest concerns of the two sides, lessens the perceived threat the two sides pose to each other, and reinforces deterrence—so that we can proceed in a less worrisome fashion to achieve a SALT III which will carry this essentially stabilizing process farther.

In "Little Giddting," T. S. Eliot wrote,

We cannot revive old factions
We cannot restore old policies
Or follow an antique drum.

The thought is most relevant to SALT. The time is long gone during which the Soviet Union lacked nuclear sophistication and that circumstance is not restorable. The simpler equations possible before the two sides had multiple warheads is lost to us. The threat to our land-based forces and our threat to their land-based forces will grow, and SALT cannot erase those threats. The comprehensive SALT proposal made in March was a great opening position, but it could not have been the basis for a final agreement; but we knew that at the time.

The history of the strategic arms buildup on both sides indicates that we would do well to seize this moment to work out a solid, mutually acceptable pact. If we do not make such an agreement soon, the drive for technological advances by the two sides will lead to further changes in the forces. We know how hard it is to achieve quantitative controls. I hope we realize that qualitative improvements are harder by far to stop or control, and to verify. In essence, we face an opportunity now which, once lost, may never be regained.

The concerns the Soviet force poses now would be increased should we abandon SALT. Without SALT and with nothing to constrain them, the Soviets undoubtedly could—and probably would—continue force modernization across the board. We, of course, would be doing the same thing. In the case of military programs in which we lead, we would take further steps to maintain our lead—technological or otherwise. And other programs would be pushed with the argument we had to catch up.

Nobody could possibly want such a situation. We need SALT, and the Soviet Union needs SALT. Considering the alternatives, there is little choice.

The President should be commended and supported for his approach to SALT. He is seeking an agreement in a calm, considered way. With the realization that both sides need a good SALT, he is trying to achieve an agreement which does not jeopardize our national security one iota—but rather enhances our national security. An arms race—the only alternative to a SALT agreement would immeasurably decrease the sense of real security for all Americans.

As we enter the new session, I believe it is critically important that the SALT discussion not be characterized by selective leaks, quarreling, and special pleadings in regard to this or that aspect. We must satisfy our concerns, but we must not get hung up so much on this or that point that we lose our perspective and our ability to judge the whole fabric of SALT.

As a member of the Committee on Foreign Relations, I am going to do everything I can to reinforce the committee's current effort to stay fully informed on SALT, to delve thoroughly and deeply into the numerous questions surrounding SALT, and share with the executive branch reactions to various aspects of the SALT effort, and to prepare to make an informed judgment when a new SALT treaty is before the Foreign Relations Committee and the Senate. The issue of SALT is one of paramount national importance and it deserves our best effort.

The country needs for there to be a great debate in the Senate, so that when our decision is made, the American public will understand not only what the decision is, but the reasoning and judgment upon which the decision is based.

FRANK CARLUCCI

Mr. HEINZ. Mr. President, by a vote of 10 to 0, the Senate Select Committee on Intelligence has now favorably reported the nomination of Mr. Frank Carlucci to be Deputy Director of Central Intelligence. In this position, it is expected that Mr. Carlucci will assume much of the day-to-day administration of the CIA. It is hard to imagine a better choice for such an important and demanding position. I admire him greatly for his professionalism and the fact that he is one of the finest human beings I have had a chance to get to know.

Last Friday, when Frank Carlucci appeared before the Intelligence Committee, I was en route to Panama and, to my great regret, was unable to accompany him personally. He has my emphatic endorsement, however, and I have submitted a statement to this effect for the committee record. For the benefit of my colleagues during further confirmation proceedings on the floor of this Chamber, I ask permission that the statement be reprinted in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SUPPORT FOR NOMINATION OF MR. FRANK CARLUCCI

I am honored to support the nomination of Frank Carlucci as Deputy Director of Central Intelligence. I have known Frank for many years and have followed his remarkable career and accomplishments with the greatest admiration. I have often remarked to him that it seems to be his luck to get only the most taxing assignments; but somehow Frank always proves equal to the challenge, and in the end makes these assignments seem less difficult than they did at first.

In the foreign service, he has been posted always to the troublespots, from South Africa to the Congo to Zanzibar to Brazil and, during the last three years, to Portugal. Most of these countries were at the time in serious turmoil; and it can be assumed that the State Department valued having officers on the spot who performed well under stress, who could report with precision and advise with insight. Knowing Frank, it is not surprising that he was honored in particular for his service in the Congo with the State Department's highest award for "outstanding courage in the face of real danger".

On the domestic front, Frank's assignments were no less challenging. He came to OEO, OMB, and HEW at difficult times, and in positions of increasing responsibility, managed ably to balance his humanitarian instincts with the need to discipline the budget. Unavoidably, this proved controversial; but given such a difficult situation, I think Frank performed remarkably well.

Frank's most illustrious service, however, has been during his tenure, since early 1975, as our Ambassador to Portugal. It must be said that he started out on the right foot, in view of the fact that we had seen fit to appoint one of those rare ambassadors who actually speaks the tongue of the host country. Moreover, though a well-known Administration official, his appointment was not taken as a typical political one, in light of his obvious career dedication to the foreign service.

Although Portugal today is far from being out of the woods, politically or economically, it is easy to forget that a little over two years ago, it was widely thought to be in the firm grip of chaos and communism. The Administration had all but written Portugal off, assuming that a country which had not been tutored in the ways of democracy since 1926 would, in the disruption that followed the 1974 revolution, yearn again for the tranquility that it was thought only a dictatorship could provide.

Frank Carlucci was too much of a detailman and observer-on-the-scene to accept this assessment. Instead, he approached Portugal on its own terms. Rather than confining himself squeamishly to the embassy compound, and wiring back second-hand reports, Frank has persistently exposed himself to the widest variety of people and opinions. Early on he became acquainted with numerous political and military leaders and realized that while their views were not always in accord with our Administration's, these were still many of them sensible and popular men.

When others had given up on Portugal because their particular horses were not winning the race, Frank Carlucci took a more relaxed and ultimately more effective view. Rather than trying to impose our game plan, and insist on all or nothing, he dealt with realities. And he prevailed. When President Ford, in one of his televised campaign debates, pointed to Portugal as one of the Administration's outstanding foreign policy successes, he was pointing—whether he knew it or not—to Frank Carlucci.

To me, this experience in Portugal exemplifies some of Frank's strongest qualities, ones that would serve him well in his new role: political tolerance, a quick grasp of both essentials and details, easy interpersonal relations, a sharp intellect and an extremely organized and analytic mind that is accustomed to functioning in the most complex situations, an unswerving regard for principles and yet an eye for realities, persistence and optimism, dedication, dynamism, and thoroughly-honed administrative skill. He has had an unusually diversified

background in government and national security affairs and has run the obstacle course of bureaucracy with great ease—not least due to the fact, no doubt, that he is an accomplished jogger—something which, in my own experience, I can testify is a talent not to be scoffed at.

The intelligence business has been badly buffeted in recent years, and Frank will do much to put it on even keel. He is a veteran professional, and yet he represents fresh blood and ideas. He is a co-operative and perceptive individual who will work well with Congress, and who will do this committee great credit if it chooses to confirm him. I commend him most highly.

PRODUCTIVITY—AN INTERNATIONAL CONTEST

Mr. NUNN. Mr. President, I am convinced that the improvement of productivity in this country is of vital importance to our economy.

The most recent issue of the publication Industrial Engineering contains an article by Joseph H. Kehlbeck entitled "Productivity, an International Contest." Mr. Kehlbeck, current president of the American Institute of Industrial Engineers, has raised several important points regarding productivity which I believe would be of interest to our colleagues.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[A number of the charts referred to in the following article are not reproducible in the RECORD.]

PRODUCTIVITY—AN INTERNATIONAL CONTEST

IE's around the world are faced with similar demands. How can they measure the scope of their country's problem? Output per employee, trade balances, R & D spending, and capital expenditures are basic yardsticks. Using national productivity centers and other resources of the profession, IE's bear key responsibilities for improvements.

It is important for all of us to recognize the need for productivity and what we can do as industrial engineers to make this a better world in which to live. Every major country is engaged in a productivity battle with all of the other major countries of the world. This battle is going on every day. It is not being fought with cannons, airplanes, and warships; it is being fought in every factory every day as that factory competes in the world market.

MANUFACTURING OUTPUT PER EMPLOYEE

Country	Average annual percent change				Rank
	1966–75	1970–74	1974–75	1970–75	
United States	2.0	2.7	−0.2	1.8	8
Canada	3.9	3.6	1.5	3.0	6
Japan	9.0	7.1	−3.1	5.4	2
France	4.9	5.0	−4.3	3.4	5
Germany	5.3	5.8	3.3	5.4	3
Italy	5.8	7.6	−3.0	6.0	1
Sweden	5.8	5.8	−3.4	4.4	4
United Kingdom	3.3	4.4	−3.1	3.0	7

Source: U.S. Department of Labor.

Figure 1. Percentage change in manufacturing output per employee is one indicator of productivity trends. The United States ranked 8th in this field of 8 for 1970–75.

The winners in this battle are going to generate jobs, improve their standard of living, and reduce taxes. At the same time, the losers in this all-important battle are going to see high unemployment, become a welfare state similar to what exists in England, and the standard of living will be lower than in other nations throughout the free world.

Since it is my home base, let me discuss fundamental problems with the United States as an illustration. A basic problem today in the U.S. is that the rate of growth of productivity is less than most other major countries of the world. Some may not agree with this statement, but the indicators that support this position are Productivity, International Trade, R & D spending, and Capital Expenditures.

Let's first look at Productivity. Figure 1 shows manufacturing output per employee. As you can see, the United States is number 8 in rank, or the lowest rate of growth in productivity of the eight nations shown. The number one country is Italy, believe it or not, with a 6 percent increase, followed by Japan and Germany with 5.4 percent, and then the other major industrial nations, with the United States having the lowest in the average annual percentage of change in the most recent period of time—1970–75.

BALANCE OF TRADE

	1973	1974	1975	1976	1977
Food	$5.8	$7.9	$9.4	$8.1	$5.2
Fuel	−8.3	−25.5	−26.6	−34.6	−43.9
Other	3.9	12.6	28.3	20.8	11.5
Balance	1.4	(5.0)	11.1	(5.7)	(26.2)

Fig. 3. Balance of trade figures for the United States indicate a precipitous turn to the negative from 1973 to 1977, obviously an unfavorable development.

Another way of looking at the rate of change is to assume the United States is at 100 percent, and the leader in productivity compared to other nations, Figure 2. As you can see tremendous growth has taken place in countries such as Japan, Italy, and Germany, and at the same time England has plateaued at about 50 percent of the productivity rate of the United States. Projecting this beyond 1975 you can see that by the year 1990, many of the countries throughout the world, if they keep pace with their present rate of growth, will actually be equal to or exceed the U.S. level of productivity.

Let's look at another indicator: International Trade—Something that we read about every day in the papers and the battle that the U.S. continues to lose.

You can see from Figure 3 that in 1973 the U.S. had a favorable $1.4 billion balance of payments. This changed to $5 billion unfavorable in 1974 with the advent of the higher energy costs—which skyrocketed to $25 billion. In 1975, this reversed itself to $11 billion favorable; in 1976 the U.S. was at $5.7 billion unfavorable, and the latest projection for 1977 is a whopping $26 billion unfavorable balance of trade.

The latest forecast for the balance of trade over the next few years indicates that this $26.2 billion in 1977 will increase to $28 billion in 1978, and level off at $24 billion in 1979 . . . A very unfavorable condition.

The third symptom is Research. Let's look at the dollars being spent for research and development in the United States. The growth in R & D spending has not kept pace with the increase in GNP since 1964. Federal spending has decreased appreciably in R & D as you can see by Figure 4. Due to this lack of funding by the United States, the total amount spent on R & D has substantially decreased over this period. This is a deplorable condition when you recognize that many of the real advances in consumer products have come about as spin-offs of federal spending in the aerospace industry.

To further support my contention that the U.S. is in trouble when it comes to basic research, the trend chart in Figure 5 shows research funds in constant dollars. It shows U.S. total dollars in R & D have declined since 1967 with most of it in the area of development. The U.S. is still spending dollars in applied research and basic research, but has drastically cut back in the area of development where research is put to work to help mankind.

The fourth symptom is Capital Expenditures. Figure 6 shows that the dollars that the U.S. is spending on fixed capital formation as a percent of Gross National Product is the least of any of its major competitors in this economic battle. The U.S. is running at 17.4 percent. Japan is more than double the amount of U.S. investment as percent of Gross National Product.

I recently had the opportunity to talk with a number of Japanese industrialists. In our conversation it became apparent to me that they are spending large sums of money on very sophisticated equipment designed to drastically reduce labor and improve productivity.

Figure 7 is a busy chart which shows that the United States is not doing as well as its competitors in this economic battle when it comes to investment trends. The U.S. peaked late in 1973, dropped drastically in 1974 and 1975, and has never really recovered. West Germany is the only nation not doing as well as the U.S. Canada has continued to invest and is now 25.7 percent over the base of 1972; Japan is at 5.9 percent over 1972, and the United Kingdom, which everyone considers one of the least productive nations in the world, is a 1.4 percent. This chart supports my view that the U.S. has major problems in the lack of capital investments in new plants and equipment.

The indicators we have rapidly reviewed—productivity measurements, international trade, R & D spending, capital investment—identify the key problem areas which contribute to the declining rate of productivity in the United States. The industrial engineers in the U.S. have the responsibility to turn this around. They need to improve productivity in the United States, and through the efforts of every engineer in the U.S., they have the capability if they will all apply their energy to this national problem.

In the business world you need to know all you can about your competitor. This same process needs to apply to one nation as compared to other nations. A nation needs to know its competitors' strategy. What are their natural resources? Do they have the necessary raw materials, manpower, plant and equipment? Do they have technical strength to develop new materials and processes or are they followers? And last but not least, what are their national policies toward improving productivity?—supportive—restrictive?

To answer these questions we industrial engineers need to see for ourselves what our competitors are doing. We can't learn unless we travel. Too often U. S. businessmen sit at home believing the U.S. has all the know-how and travel is a waste of money. While they sit at home their competitors in this economic battle travel throughout the world to pick up the latest know-how and technological advances to incorporate in their business.

An example of what you would see if you visited Japan is the sketch of a highly automated unmanned plant shown in Figure 8. It's on the drawing boards and will be completed in the early 1980's. Seeing something like this would have a major impact on your thinking. Especially when you recognize that this plant with its minimum amount of labor, is going to compete with you on the home front. Wouldn't it be a shocker?

One way for U. S. industrial engineers to know what's going on in the world is to work with and support the National Center for Productivity located in Washington, D. C. If they are not familiar with this organization, I would suggest that they become very familiar with it in the immediate future. They can contact the Center by writing to the National Center for Productivity and Quality of Working Life in Washington, D. C. It's a small federal agency dedicated to improving productivity in the United States. Every industrial engineer in the U. S. should be on the Center's mailing list.

Industrial engineers should also be knowledgeable of the European Association of National Productivity Centers, which is located in Brussels. It has a very active program to make the European Common Market competitive throughout the world. I might add that I recently attended a meeting in which the Executive Director of the European Common Market participated and he had difficulty understanding the union-management adversary relationship in the United States.

The Asian Productivity Organization consists of sixteen Asian nations working together to improve productivity so they can compete in the world market. This group hires U. S. consultants to bring U. S. know-how to the Asian world.

My purpose in mentioning these centers to U. S. engineers and in particular the U. S. National Center is twofold—one, that they should utilize the services of the National Center for Productivity and Quality of Working Life, and two, that the U. S. Center needs their support or it may not survive. The present U. S. administration has shown absolutely no interest in being involved with improving productivity.

The importance of productivity has to be recognized by the federal government and elected U. S. representatives. The U. S. has many laws which substantially add to the cost of doing business with little increase in productivity—to name a few—EPA, OSHA, EEOC, etc. All of these contribute to the cost of producing goods in the U. S. Many competitors of the U. S. in this economic battle do not have to bear this kind of an expense to do business. U. S. engineers have the responsibility to make their government aware of the cost impact associated with these programs to improve the standard of living in the U. S. It does not help to improve the standard of living by driving work offshore and increasing unemployment.

To be successful in this economic battle, citizens need to work as a team to improve productivity. Every citizen of a country—that is labor, government, management, the academic world, engineers, and economists—all need to focus on the common goal of improving productivity.

Industrial engineers are achievers. We all are willing to work to achieve certain goals. Most of us are goal oriented.

If we are going to improve productivity in our countries, the first thing we need to do is establish goals—national goals, industry goals, and government goals. For if we do not, we will just continue to wander in the ocean of opportunity and never reach our destination. All of us must develop productivity goals in our own operation and work to achieve these goals.

What is each industrial engineer's responsibility? Certainly it is to implement productivity improvements. Most of us are being paid to improve productivity. We also recognize the impact technology has on productivity. This needs to be communicated to those less informed.

U.S. engineers also need to support government and private research and development. The key to long-range success in this economic battle is basic and applied research. U.S. engineers need to convince their elected officials that government funds for research need to be increased to levels comparable to other industrialized nations.

The Wall Street Journal had an article "Backing Off Basics" in a recent issue. I would like to quote a statement from this article:

"The National Science Foundation says U.S. expenditures for R&D have slipped to about 2 percent of gross national product from more than 3 percent in 1965 and currently trail the 2.3 percent level in West Germany and estimates of more than 3 percent in the Soviet Union. The federal government adds that the number of patents it granted to foreign inventors in 1975 reached 35 percent of the total, against only 17 percent in 1961."

The U.S. needs to disseminate technological information. When new ideas come up, they need to be made available to U.S. industry so it can compete in the world market. Certainly U.S. engineers need to support the Productivity Center concept. A clearing house for disseminating information is essential to U.S. success. They also need to foster management, labor, and government understanding on the need for productivity goals. Unless U.S. citizens all work together to achieve this common goal, the U.S. will not be successful.

Last, but not least, U.S. engineers need to support capital investment through tax incentive. They must make it worthwhile to become capital intensive. Today the U.S. is not spending adequate amounts of money on new plants and equipment. Japanese friends and economic enemies are walking by the U.S. . . . or should I say running by the U.S. . . . every day of the year. I recently heard a steel executive in the U.S. state that he was running facilities forty to fifty years old and trying to compete with the Japanese who recently obsoleted a 19-year old facility. The United States has a serious problem. Its productivity rate is not going in the right direction. It's coming to a screeching halt. I am confident the industrial engineers of the U.S. can turn this around.

SOCIAL SECURITY AMENDMENTS OF 1977

Mr. NELSON. Mr. President, the Senate Finance Committeee recently published a summary of the Social Security Amendments of 1977 (H.R. 9346). This document explains the various provisions contained in the legislation enacted last December. I ask unanimous consent that this document be printed in full in the RECORD.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

SUMMARY OF H.R. 9346, THE SOCIAL SECURITY AMENDMENTS OF 1977, AS PASSED BY THE CONGRESS [1]

Tax rates.—The bill includes a new social security tax rate schedule which increases the rates in 1979, 1981, 1982, and 1990 to provide additional financing. Tax rates for the self-employed are increased so as to restore the original level of 1½ times the employee rate for the old-age, survivors, and disability portion of the tax, effective in 1981. In addition, H.R. 9346 provides for a reallocation of income to the disability trust fund which would have been exhausted in about a year under present law. The tax rate schedule is as follows:

[1] This bill was signed into law on December 20, 1977, as Public Law 95-216.

TAX RATES FOR THE SOCIAL SECURITY TRUST FUNDS

[In percent]

Calendar year	Present law					H.R. 9346				
	OASI [1]	DI [2]	OASDI	HI [3]	Total	OASI [1]	DI [2]	OASDI	HI [3]	Total
Employers and employees, each:										
1977	4.375	0.575	4.95	0.90	5.85	4.375	0.575	4.95	0.90	5.85
1978	4.350	.600	4.95	1.10	6.05	4.275	.775	5.05	1.00	6.05
1979–80	4.350	.600	4.95	1.10	6.05	4.330	.750	5.08	1.05	6.13
1981	4.300	.650	4.95	1.35	6.30	4.525	.825	5.35	1.30	6.65
1982–84	4.300	.650	4.95	1.35	6.30	4.575	.825	5.40	1.30	6.70
1985	4.300	.650	4.95	1.35	6.30	4.750	.950	5.70	1.35	7.05
1986–89	4.250	.700	4.95	1.50	6.45	4.750	.950	5.70	1.45	7.15
1990–2010	4.250	.700	4.95	1.50	6.45	5.100	1.100	6.20	1.45	7.65

Tax base.—The bill also would increase the taxable wage base above present law levels in 1979, 1980, and 1981. After 1981, the base would be increased annually in line with wage levels, as under present law. Under the bill, as under present law, the tax base would be the same for employers, employees, and self-employed The tax base schedule for employers, employees and the self-employed under present law and under the bill is shown below:

CONTRIBUTION AND BENEFIT BASE

Calendar year	Under present law	Under H.R. 9346
1977	$16,500	$16,500
1978	17,700	17,700
1979	[1] 18,900	22,900
1980	[1] 20,400	25,900
1981	[1] 21,900	29,700
1982	[1] 23,400	[1] 31,800
1983	[1] 24,900	[1] 33,900
1984	[1] 26,400	[1] 36,000
1985	[1] 27,900	[1] 38,100
1986	[1] 29,400	[1] 40,200
1987	[1] 31,200	[1] 42,000

[1] Estimated amount under automatic provisions.

Railroad retirement system and Pension Benefit Guaranty Corporation.—The bill contains a provision to guarantee that the new social security financing provisions which increase the taxable earnings base would not increase the employer tax liability to finance tier II benefits (nor would it increase the amount of those benefits) under the railroad retirement system. Tier II benefits are those paid to supplement the tier I payments which correspond to basic social security benefits. Similarly, the bill provides that the increases in the earnings base specified in the bill would not increase the maximum amount of pension insured by the Pension Benefit Guaranty Corporation established under the Employee Retirement Income Security Act of 1974.

Decoupling and new wage-indexed formula.—The bill provides that the automatic cost-of-living increase provisions will in the future apply only to those already on the benefit rolls at the time of each increase. (Under present law, the increases raise the benefit formula for future retirees as well as for those on the rolls.) For future retirees, the bill adopts a new benefit formula under which benefit amounts would be related to the earnings an individual had under social security with an adjustment to reflect changing wage levels during his working years. The new system would index a worker's earnings to reflect annual increases in average earnings levels up to the second year before eligibility (age 62, death, or disability).

The new benefit computation will provide a benefit level for 1979 averaging about 5 percent lower than the average anticipated under present law. In the future benefits will be kept at approximately the 1976 relationship to preretirement earnings. In order to provide an orderly transition from the present computation procedures to the new computation, the bill guarantees that, for the first 5 years, 1979–1983, retirement benefits paid will not be less than would be paid under the benefit table in effect for December 1978.

The transition provision will not be applicable to disability and survivor cases. As under present law, benefits would continue to be increased according to the increases in the cost-of-living after a person reaches age 62 or becomes disabled, or in the case of survivor's benefits, after the time of the worker's death.

Minimum benefit.—The minimum benefit for future beneficiaries would be frozen at the 1979 dollar amount (about $121 for an individual). In the future minimum benefit would be adjusted for annual cost-of-living increases only after the individual starts receiving benefits.

Special minimum.—The bill increases the special minimum benefit which is paid to some long-term, low-paid workers. Under present law this benefit is equal to $9 times the number of years coverage a worker has in excess of 10 and up to 30, but it is not subject to annual cost-of-living increases. The bill would increase the $9 figure to $11.50, which would make the highest amount payable under the provision $230 a month. Also, H.R. 9346 would make the special minimum benefit subject to annual cost-of-living increases in the future.

Delayed retirement credit.—Present law provides that retirement benefits are increased 1 percent a year for each year that a worker continues to work beyond age 65 without taking his benefits. The bill would increase this to 3 percent; it would apply beginning in 1982. Effective June 1978, the bill would also make the delayed retirement credit applicable to widows and widowers benefits.

Retirement test changes.—The bill would raise to $4,000 in 1978, $4,500 in 1979, $5,000 in 1980, $5,500 in 1981, and $6,000 in 1982 the annual amount of earnings a beneficiary, age 65 to 72, may have without having any benefits withheld. After 1982, the limitation would be adjusted automatically on the basis of earnings levels as under present law. The retirement test of present law, which is to rise from $3,000 this year to $3,240 in 1978 with continuing automatic increases thereafter, would continue to apply to beneficiaries under age 65.

The age at which individuals may receive full benefits without regard to their earnings would be reduced from 72 to 70 beginning in 1982.

The bill would eliminate the monthly exception to the retirement test—the provision in present law under which full social security benefits are paid for any month in which a person does not engage in substantial self-employment and earns one-twelfth of the annual retirement test amount, or less, regardless of total earnings for the year. However, the monthly exception would be retained for the first year in which a worker begins to receive retirement benefits.

Coverage study.—The bill provides for a comprehensive study of the question of expanding coverage under social security by bringing under the system all Federal employees, and the remainder of State and local government employees and employees of nonprofit organizations not now covered. The study is to include methods of coordinating social security coverage with those retirement systems which now apply to the public employees involved. The study would be under the direction of the Secretary of Health, Education, and Welfare who is to consult with the Secretary of the Treasury, the Director of the Office of Management and Budget, and the Chairman of the Civil Service Commission. The HEW Secretary is directed to complete the study and submit a report with recommendations to the President and to Congress within 2 years after enactment of the bill.

Employees of nonprofit organizations.—The bill contains provisions designed to correct some unintended effects of Public Law 94–563 enacted in 1976 to deal with problems of nonprofit organizations that had been paying social security taxes incorrectly because they had not filed the necessary waivers with the Internal Revenue Service to make the payments legal.

One provision in the bill would forgive back taxes due, up to June 30, 1977, on behalf of nonprofit organizations which ceased paying social security taxes after they had found they were not required to do so, but did not receive a refund of these taxes.

Another provision would extend to March 31, 1978, the period during which nonprofit organizations that had received a refund of social security taxes could file a waiver certificate and list only those employees who had wanted to be covered under social security. Under this waiver, they would owe back taxes only on the listed employees. The right to file such a waiver under Public Law 94–563 expired April 18, 1977.

Investment income under limited partnership.—In recent years, a growing number of businesses have offered limited partnerships as a means of acquiring social security coverage solely through the income on investments in such partnerships. The bill excludes from social security coverage the distributive share of income or loss which a limited partner receives from a trade or business.

Taxation of related corporations.—The bill provides that a group of related corporations concurrently employing a worker would be considered as a single employer if one of the group serves as a common paymaster for the entire group. This would mean that the group of corporations would have to pay no more in social security and unemployment taxes for a single worker than a single employer pays.

Coverage of tips.—Under social security, tip income (if over $20 a month) is taxed to the employee alone. Under the bill, the employer will also be taxed on tip income up to the amount that, combined with the employee's salary, equals the minimum wage under the Fair Labor Standards Act.

Clergymen.—The bill would permit clergymen who previously refused social security coverage a new opportunity to come under the system as self-employed persons.

International Social Security Agreements (totalization).—Included in the bill is a provision which would authorize the President to enter into bilateral agreements with interested countries providing for limited coordination of the U.S. social security system with systems of other countries. The agreements, known as totalization agreements, would eliminate dual social security coverage for the same work in each country covered by an agreement, and would enable individuals who work for periods in each of the countries covered by an agreement to qualify for coordinated benefits in situations where they now are not eligible for benefits in one or both of the countries involved. The United States already has negotiated agreements with Italy and West Germany which could be put into effect under this provision. Each agreement will have to be submitted to Congress for 90 days while it is in session before it can take effect; during that period either the House or Senate can veto the agreement by majority vote.

Illinois policemen and firemen.—The bill would allow approximately 400 Illinois policemen and firemen to get credits for past payments into the social security system (and future coverage) even though the applicable law did not permit such payments when they were made.

Mississippi policemen and firemen.—The bill would authorize social security coverage for Mississippi policemen and firemen who previously were excluded from the system.

New Jersey public employees.—The bill would add New Jersey to the list of States which are permitted to hold referendums among public employees for divided coverage under social security. Those voting for coverage would be brought under social security; those voting against would remain out of the system.

Wisconsin public employees.—The bill would authorize a consolidated public employee group in Wisconsin to continue under social security on the same terms which applied to three groups before they were merged into the consolidated organization.

Cost-of-living increases for early retirees.—Under present law, a retiree who begins receiving benefits between ages 62 and 65 has his monthly payment permanently reduced on an actuarial basis to take account of the longer period that he will receive benefits. However, when a subsequent cost-of-living increase is effective, the benefit increase is not based on his reduced benefit amount. For example, at age 65 and later, each increase is based on his full (unreduced) benefit. The bill would apply to cost-of-living increases the same actuarial reduction that was applied to their original monthly benefit.

Limitation on retroactive benefits.—Under present law a person who files an application after he is first eligible can get benefits for a retroactive period up to 12 months before the month in which the application is filed. However, this can result in some cases in a permanent reduction in his monthly benefit. The bill would eliminate retroactive payments where the result would be a permanently reduced benefit.

Benefit payment dates.—The bill provides that social security and supplemental security income benefit checks would be mailed in time to be delivered early when the regular payment date falls on a Saturday, Sunday, or legal holiday.

Reduction in spouses' benefits for public pensions.—The bill contains a provision under which social security dependency benefits payable to spouses or surviving spouses would be reduced by the amount of any public (Federal, State, or local) pension available to the spouse. The reduction would apply only to pension payments based on the spouse's own work in public employment which is not covered under social security. The provision would apply to applications for such dependency benefits in and after the month of enactment of the bill. To assure that persons who have been counting on these benefits for many years and who are now at or near retirement age will not be adversely affected, H.R. 9346 includes a transitional exception under which certain individuals will not have their social security benefits as spouses reduced by the amount of their public pension. The exemption applies to those who are already retired under a public pension program (or who will be eligible for such retirement within the next 5 years) and who also would qualify for spouses benefits under social security under the law as in effect and as administered in January 1977. In the event that the courts find it impermissible to afford this protection to those who anticipated receiving their spouses' benefits prior to March 1977 without providing it also to those would qualify only as a result of a March 1977 court decision, the bill provides that the entire exception would become inoperative so that the reduction in benefits would be applied in all cases.

Disability benefits for the blind.—Blind persons would be eligible for social security disability benefits up to a higher level of earnings than now permitted. Under present regulations, substantial gainful activity (SGA) is measured at $200 a month ($2,400 a year) and earnings over this amount would lead to termination of benefits. Under the bill, the SGA amount for the blind would be the same as the retirement test for persons age 65 and over—that is, $4,000 in 1978, $4,500 in 1979, $5,000 in 1980, $5,500 in 1981, $6,000 in 1982, and adjusted automatically by increases in earnings levels thereafter. The SGA level for other disabled persons is not changed.

Remarried widows.—Under existing law, a widow may receive a social security benefit on her deceased husband's account equal to 100 percent of the benefit he would have received if he were still alive. If the widow remarries and she is age 60 or over when she remarries, she can retain the widow's benefit but at a 50 percent rate instead of 100 percent. The bill would eliminate that reduction to a 50 percent rate when a widow over age 60 remarries.

Divorced wife's benefits.—Under present law a woman can qualify for a wife's benefit on the account of her former husband (or a surviving divorced wife's benefit on the account of a deceased former husband) but only if the marriage lasted at least 20 years. The bill lowers the required duration of marriage to 10 years.

Treatment of men and women.—The bill directs the Secretary of Health, Education, and Welfare, in consultation with the Justice Department Task Force on Sex Discrimination, to carry out a detailed study of proposals: (1) to eliminate dependency as a requirement for entitlement to social security spouse's benefits, and (2) to bring about the equal treatment of men and women in any and all respects. In conducting this study the Secretary is to take into account the effects of the changing role of women in today's society including such things as: (1) changes in the nature and extent of women's participation in the labor force, (2) the increasing divorce rate, and (3) the economic value of women's work in the home. A full and complete report is to be submitted by the Secretary to the Congress within 6 months after enactment of the bill.

Annual wage reporting.—Public Law 94–202 enacted in 1976 modified the law to permit employers to report their employees' wages for social security and income tax purposes annually on forms W–2 (beginning with wages paid in 1978) in place of filing quarterly reports as previously required. However, employers were still required to report quarterly wage data on the annual forms W–2 to enable the Social Security Administration to determine whether a worker has enough "quarters of coverage" to be eligible for social security benefits. The bill changes the way in which quarters of coverage are measured so that annual data will be used instead of quarterly data. Thus, employers no longer will have to report quarterly data on forms W–2. Under present law a worker generally receives credit for a quarter of coverage for a calendar quarter in which he receives at least $50 in wages. Under the bill, a worker is to receive one quarter of coverage (up to a total of four) for each $250 of earnings in a year, and the $250 amount will be automatically increased every year to take account of increases in average wages.

National Commission on Social Security.—The bill provides for establishment of a bipartisan National Commission on Social Security, composed of nine members—five appointed by the President and two each by the Speaker of the House and the President of the Senate—to make a broad study of the social security program, including medicare. The study would include the fiscal status of the trust funds, coverage, adequacy of benefits, possible inequities, alternatives to the current programs and to the method of financing the system, integration of the social security system with private retirement programs, and development of a special price index for the elderly. The Commission is to present its full report to the President and to the Congress within 2 years after a majority of the members have been appointed.

Administrative law judges.—Public Law 94–202 established temporary administrative law judge positions to hear social security, medicare, and supplemental security income cases. The bill converts these appointments to permanent status.

Advisory Council on Social Security.—The bill changes the reporting date for the Advisory Council to be appointed in 1977 from January 1, 1979, to October 1, 1979.

Fiscal relief for welfare costs.—The bill provides for a one-time payment to the States of $187 million as fiscal relief for State and local welfare costs for fiscal year 1978. Half of such funds will be distributed to each State in proportion to its share of total expenditures under the AFDC program for December 1976, and half will be distributed under the general revenue sharing formula. In those States in which local units of government are responsible for meeting part of the costs of the AFDC program the fiscal relief payments would have to be passed through to local governments. States would not be required to pass through an amount in excess of 100 percent of the amount of AFDC costs for which the local government was otherwise responsible.

Distribution of fiscal relief for welfare costs under H.R. 9346

Fiscal incentives for lowering AFDC error rates.—The bill would establish a system of fiscal incentives for States which have low dollar error rates (below 4 percent) as measured by the AFDC quality control findings of incorrect payments.

Under the provision States which have dollar error rates of, or reduce their dollar error rates to, less than 4 percent but not less than 3.5 pecent of the total expenditures would receive 10 percent of the Federal share of the money saved, as compared with the Federal costs of 4-percent payment error rate. This percentage would increase proportionately as shown in the following table:

If the error rate is:	*Incentive percentage* [1]
At least 3.5 percent but less than 4 percent	10
At least 3 percent but less than 3.5 percent	20
At least 2.5 percent but less than 3 percent	30
At least 2 percent but less than 2.5 percent	40
Less than 2 percent	50

[1] The State will retain this percent of the imputed Federal savings.

The dollar error rate of aid will include the payments to ineligibles plus overpayments plus underpayments plus the amount which would have been paid as benefits if the case had not been erroneously terminated or the application erroneously denied. The incentive would be based on Federal savings as compared with a 4-percent rate of excessive payments—that is, erroneous payments for ineligibles and overpayments.

Access by AFDC agencies to wage records.—The bill specifically authorizes State AFDC agencies to obtain wage information from the wage records maintained by the Social Security Administration and the wage records maintained by State unemployment compensation agencies for purposes of determining eligibility for (or amount of) AFDC. The Secretary of HEW would establish the necessary safeguards to prevent the improper use of such information. Effective October 1, 1979, States would be required to request and make use of this wage information either from the State unemployment compensation agency (if available there) or from the Social Security Administration.

State welfare demonstration projects.—The bill would authorize certain types of State demonstration projects related to the AFDC program to be implemented if the Secretary did not specifically disapprove the implementation of such projects within sixty days after the State applies to have the projects approved. In other words, a State could proceed with such projects either when the Secretary approved them, or sixty days after submitting them to the Secretary if no decision had been reached by HEW within that period.

Under this authority, States would be permitted to conduct not more than three demonstration projects but not more than one on a statewide basis. Projects involving public service employment would have to pay prevailing wages and meet reasonable standards related to health, safety and other conditions, could not displace employed workers, would have to be reasonable for the individuals participating, and would have to provide appropriate workmen's compensation protection. Participation in any project by any AFDC recipient would have to be on a voluntary basis.

States would be permitted to waive ordinary statutory rules requiring statewide uniformity, administration by a single agency, and regarding participation in the work incentive program and the disregard of certain amounts of earned income. (Not more than half of all earnings could be disregarded under the waiver authority, however.)

AFDC matching for these demonstration projects would be limited to the amount the State would have received through AFDC if it had not implemented the demonstration project. In addition, the State's general revenue sharing funds could be used to cover the costs of salaries for participants in public service employment which are not covered by AFDC matching.

Once implemented, demonstration projects could continue for up to 2 years unless the Secretary took action to disapprove a State waiver of statutory rules before the end of the 2-year period. The provision would not apply after September 30, 1980.

The bill provides that when a State submits an application it would be required to make a public announcement that such application has been made, make copies of the application available and receive public comments for at least 30 days. The Secretary would also be required to publish a summary of the proposed demonstration project and make copies of the application available.

The Secretary of HEW could deny applications by a State under this provision any time after receipt of the application, but could not approve an application until 30 days after it has been submitted.

Erroneous State supplementary payments.—H.R. 9346 provides authorization and direction for the Secretary of Health, Education, and Welfare to reimburse a State for erroneous State supplementary payments administered by them and paid during 1974 to the extent that an HEW audit (reviewed and concurred in by the Inspector General of the Department) determines is appropriate on the basis that the incorrect payments for the aged, blind, and disabled resulted from a State's good faith reliance upon erroneous or incomplete information furnished to the States by the Department or from a State's good faith reliance on incorrect supplemental security income payments made by the Department.

Wheelchairs.—The bill would permit payment for power-operated wheelchairs under medicare where the vehicle is determined to be medically necessary and safe.

Federal Election Campaign Act amendment.—The bill provides that a contribution to a tax-exempt organization selected by the payor from a list of five or more organizations named by the Government officer or employee would not be treated as an honorarium. It also provides that amounts returned to a payor before the end of the calendar year would not be treated as honoraria. The bill further provides that honoraria would be treated as accepted in the year of receipt.

Social Security Financing Tables

NOTE.—The following tables are based on information furnished by the Social Security Administration.

CHANGE IN ACTUARIAL BALANCE OF THE OASDI PROGRAM OVER THE LONG-RANGE PERIOD (1977-2051) AS A RESULT OF CHANGES INCLUDED IN H.R. 9346

[Percentage of payroll costs; preliminary estimates]

Description of item	OASI	DI	Total
Cost of social security system under present law	15.51	3.68	19.19
Balance under present law	−6.06	−2.14	−8.20
Changes of the bill:			
Decoupling	9.63	2.32	11.95
New (wage-indexed) benefit formula	−5.91	−1.24	−7.16
Freeze minimum at 1978 level (including change in special minimum)	.07	.02	.08
Reduction in spouses' benefits for public pension	.04		.04
Retirement test	−.11		−.11
Delayed retirement credit (including DRC for widows)	−.06		−.06
Marriage/remarriage effect after age 60	−.01		−.01
No retroactive benefit for actuarially reduced benefits	.01		.01
Actuarial reduction applied to general benefit increase	.24		.24
Miscellaneous [1]			
Annual reporting of earnings	−.01		−.01
Total net effect of benefit changes	3.88	1.09	4.97
Change in wage base	.45	.08	.54
Self-employed tax rate to 1½ times employee tax rate	.08	.02	.10
Tax rate schedule	.57	.57	.114
Total net effect of financing changes (including wage base)	.111	.67	.178
Total net cost effect	4.99	1.75	6.74
Balance under bill	−1.07	−.38	−1.45

[1] Includes change in SGA definition for blind, employer tax on tips deemed to be wages, provision on limited partnership coverage, tax relief for affiliated corporations, reduction of 20-yr marriage requirement to 10 yr for certain beneficiaries.

Note: Based on alternative II of the 1977 trustees report.

ESTIMATED AMOUNT OF CHANGES IN OASDI BENEFIT PAYMENTS UNDER H.R. 9346, CALENDAR YEARS 1978–83

[In millions]

	Calendar years—					
	1978	1979	1980	1981	1982	1983
Total amount of change in benefit payments	−$440	−$492	−$844	−$1,446	−$1,696	−$2,577
Benefit structure—net total		−70	−351	−803	−1,473	−2,377
Decoupling and wage-indexing formula (net)		−94	−423	−895	−1,563	−2,466
5-yr transition guarantee		24	79	118	150	180
Frozen minimum benefit			−7	−26	−60	−106
3-percent delayed retirement credit						15
Changes in retirement test—net total	54	266	359	404	895	981
Increases in exempt amount [1]	267	491	585	640	709	762
Reduction in exempt age from 72 to 70 in 1982					403	441
Elimination of monthly measure	−213	−225	−226	−236	−217	−222
Establish the retirement test exempt amount for beneficiaries aged 65 and over as a measure of substantial gainful activity for blind, disabled workers		1	1	1	2	2
Elimination of retroactive payments of actuarially reduced benefits	−339	−536	−550	−559	−565	−569
Limitation on increases in actuarially reduced benefits	−90	−280	−500	−751	−948	1,157
Increase in benefits of surviving spouses, resulting from deceased workers' delayed retirement credits	3	4	5	7	10	−13
Delayed retirement credits for workers with actuarially reduced benefits		14	22	24	26	30
Reduction in benefits of spouses receiving public retirement pensions	−68	−106	−108	−110	−112	−116
Eliminate reduction in widowed spouses benefits due to remarriage after age 60		130	155	166	178	189
Reduction in duration of marriage required for divorced spouses benefits from 20 yr to 10 yr		67	80	86	92	98
Increase in special minimum benefits		12	14	14	15	16
Changes in annual wage reporting provisions	(2)	1	4	9	18	26
Authorization to enter into totalization agreements [3]	(2)	5	4	4	5	6
Increases in contribution and benefit base		(2)	21	62	161	281

[1] Exempt amount increased for beneficiaries aged 65 and over to $4,000 in 1978; $4,500 in 1979; $5,000 in 1980; $5,500 in 1981; and $6,000 in 1982.

[2] Less than $500,000.

[3] The estimates represent additional OASDI benefit payments that would result from implementation of totalization agreements already signed with Italy and West Germany. No agreement can become effective if either House of Congress disapproves the agreement within 90 days after it is submitted to Congress.

Note: A positive figure represents additional benefit payments, and a negative figure represents a reduction in benefit payments.

ADDITIONAL CONTRIBUTION INCOME RESULTING FROM H.R. 9346, CALENDAR YEARS 1978–83

[In billions]

Calendar year	Increase in contribution and benefit base	Reallocation of tax rates between OASDI and HI	Increase in OASDI self-employment tax rates to 1½ times employee rate	Increase in tax rates	Total [1]
OASDI:					
1978		1.6			1.7
1979	4.0	1.1		1.5	6.6
1980	6.3	1.1		1.8	9.2
1981	8.0	1.2	0.2	3.1	17.6
1982	8.8	1.3	.8	10.3	21.3
1983	9.4	1.4	.9	11.1	22.9

[1] Outgo exceeds income by less than $50,000,000.

Note: The above estimates are based on the intermediate set of assumptions shown in the 1977 trustees report.

ORDER FOR RECESS TO 10:45 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10:45 a.m. tomorrow.

The VICE PRESIDENT. Without objection, it is so ordered.

THE PENDING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, what is the pending business now before the Senate?

The PRESIDING OFFICER. The pending business before the Senate, the unfinished business, is S. 897, the Nuclear Non-Proliferation Act of 1977.

Mr. ROBERT C. BYRD. I thank the Chair.

ORDER TO RESUME CONSIDERATION OF S. 897 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the two leaders or their designees have been recognized under the standing order, the Senate resume consideration of the unfinished business, S. 897.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene at 10:45 a.m. tomorrow. After the two leaders or their designees have been recognized under the standing order, the Senate will resume consideration of the unfinished business, S. 897, a bill to strengthen U.S. policies on nonproliferation and to reorganize certain export functions of the Federal Government to promote more efficient administration of such functions.

Rollcall votes may occur on amendments and motions in relation to the same during the day.

RECESS UNTIL 10:45 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10:45 a.m. tomorrow morning.

The motion was agreed to; and at 3:47 p.m., the Senate recessed until tomorrow, February 2, 1978, at 10:45 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate February 1, 1978:

CONSUMER PRODUCT SAFETY COMMISSISON

R. David Pittle, of Maryland, to be a Commissioner of the Consumer Product Safety Commission for the remainder of the term expiring October 26, 1982.

DEPARTMENT OF COMMERCE

Ernest Ambler, of Maryland, to be Director of the National Bureau of Standards.

DEPARTMENT OF STATE

Arthur T. Tienken, of Virginia, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Gabonese Republic.

William E. Schaufele, Jr., of Ohio, a Foreign Service officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Poland.

Richard J. Bloomfield, of Connecticut, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Portugal.

Robert W. Buchheim, of the District of Columbia, for the rank of Ambassador during the tenure of his service as the U.S. Commissioner on the United States-Soviet Standing Consultative Commission.

U.S. ARMS CONTROL AND DISARMAMENT AGENCY

Thomas John Watson, Jr., of Connecticut, to be a member of the General Advisory Committee of the U.S. Arms Control and Disarmament Agency.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

IN THE COAST GUARD

Coast Guard nominations beginning George L. VanBelkum, to be lieutenant commander, and ending Richie M. Keig, to be lieutenant commander, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on January 20, 1978.

HOUSE OF REPRESENTATIVES—*Wednesday, February 1, 1978*

The House met at 3 o'clock p.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

The Lord is my Shepherd. He leads me in the paths of righteousness for His name's sake.—Psalms 23: 1, 3.

Our Father God, who art the source of light and life and the companion of our way through all our days, we thank Thee for Thy presence which makes us strong, keeps us true, and sends us out into each new day with vim, vigor, and vitality. Send us out into this day with Thy Spirit alive in our hearts making us ready to do what is right and good for our Nation and for our world.

Grant that we may not wait to see what action will take place but may we have the courage to make what is right and good come to new life here and now. Give us the faith to stand up for our high ideals lest we sit down with our low ideas and wonder why great and good things do not come to pass. Lead us this day and all days in the paths of righteousness for Thy name's sake. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A mesage from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 5798. An act to amend the Interstate Commerce Act to authorize appropriations for the Office of Rail Public Counsel for fiscal year 1978; and

H.R. 10532. An act to amend Public Law 95–18, providing for emergency drought relief measures.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 7442. An act to amend the Communications Act of 1934 to provide for the regulation of utility pole attachments.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1976. An act to add certain lands to the Redwood National Park in the State of California, to strengthen the economic base of the affected region, and for other purposes.

AMENDING THE COMMUNICATIONS ACT OF 1934

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7442) to amend the Communications Act of 1934 to provide for the regulation of utility pole attachments, with a Senate amendment thereto and concur in the Senate amendment with amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert: That this Act may be cited as the "Communications Act Amendments of 1978".

SEC. 2. Section 503(b) of the Communications Act of 1934 (47 U.S.C. 503(b)) is amended to read as follows:

"(b) Any person who is determined by the Commission, in accordance with paragraph (3) or (4) of this subsection, to have—

"(A) willfully or repeatedly failed to comply substantially with the terms and conditions of any license, permit, certificate, or other instrument or authorization issued by the Commission;

"(B) willfully or repeatedly failed to comply with any of the provisions of this Act or of any rule, regulation, or order issued by the Commission under this Act or under any treaty, convention, or other agreement to which the United States is a party and which is binding upon the United States;

"(C) violated any provision of section 317 (c) or 509(a) of this Act; or

"(D) violated any provision of section 1304, 1343, of 1464 of title 18, United States Code;

shall be liable to the United States for a forfeiture penalty. A forfeiture penalty under this subsection shall be in addition to any other penalty provided for by this Act; except that this subsection shall not apply to any conduct which is subject to forfeiture under title II, part II or III of title III, or section 507 of this Act.

"(2) The amount of any forfeiture penalty determined under this subsection shall not exceed $2,000 for each violation. Each day of a continuing violation shall constitute a separate offense, but the total forfeiture penalty which may be imposed under this subsection, for acts or omissions described in paragraph (1) of this subsection and set forth in the notice or the notice of apparent liability issued under this subsection, shall not exceed—

"(A) $20,000, if the violator is (i) a common carrier subject to the provisions of this Act, (ii) a broadcast station licensee or permittee, or (iii) a cable television operator; or

"(B) $5,000, in any case not covered by subparagraph (A).

The amount of such forfeiture penalty shall be assessed by the Commission, or its designee, by written notice. In determining the amount of such a forfeiture penalty, the Commission or its designee shall take into account the nature, circumstances, extent, and gravity of the prohibited acts committed and, with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and such other matters as justice may require.

"(3)(A) At the discretion of the Commission, a forfeiture penalty may be determined against a person under this subsection after notice and an opportunity for a hearing before the Commission or an administrative law judge thereof in accordance with section 554 of title 5, United States Code. Any person against whom a forfeiture penalty is determined under this paragraph may obtain review thereof pursuant to section 402(a).

"(B) If any person fails to pay an assessment of a forfeiture penalty determined under subparagraph (A) of this paragraph, after it has become a final and unappealable order or after the appropriate court has entered final judgment in favor of the Commission, the Commission shall refer the matter to the Attorney General of the United States, who shall recover the amount assessed in any appropriate district court of the United States. In such action, the validity and appropriateness of the final order imposing the forfeiture penalty shall not be subject to review.

"(4) Except as provided in paragraph (3) of this subsection, no forfeiture penalty shall be imposed under this subsection against any person unless and until—

"(A) the Commission issues a notice of apparent liability, in writing, with respect to such person;

"(B) such notice has been received by such person, or until the Commission has sent such notice to the last known address of such person, by registered or certified mail; and

"(C) such person is granted an opportunity to show, in writing, within such reasonable period of time as the Commission prescribes by rule or regulation, why no such forfeiture penalty should be imposed.

Such a notice shall (i) identify each specific provision, term, and condition of any Act, rule, regulation, order, treaty, convention, or other agreement, license, permit, certificate, instrument, or authorization which such person apparently violated or with which such person apparently failed to comply; (ii) set forth the nature of the act or omission charged against such person and the facts upon which such charge is based; and (iii) state the date on which such conduct occurred. Any forfeiture penalty determined under this paragraph shall be recoverable pursuant to section 504(a) of this Act.

"(5) No forfeiture liability shall be determined under this subsection against any person, if such person does not hold a license, permit, certificate, or other authorization issued by the Commission, unless, prior to the notice required by paragraph (3) of this subsection or the notice of apparent liability required by paragraph (4) of this subsection, such person (A) is sent a citation of the violation charged; (B) is given a reasonable opportunity for a personal interview with an official of the Commission, at the field office of the Commission which is nearest to such person's place of residence; and (C) subsequently engages in conduct of the type described in such citation. The provisions of this paragraph shall not apply, however, if the person involved is engaging in activities for which a license, permit, certificate, or other authorization is required. Whenever the requirements of this paragraph are satisfied with respect to a particular person, such person shall not be entitled to receive any additional citation of the violation charged, with respect to any conduct of the type described in the citation sent under this paragraph.

"(6) No forfeiture penalty shall be determined or imposed against any person under this subsection if—

"(A) such person holds a broadcast station license issued under title III of this Act and if the violation charged occurred—

"(i) more than 1 year prior to the date of issuance of the required notice or notice of apparent liability; or

"(ii) prior to the date of commencement of the current term of such license,

whichever is earlier so long as such violation occurred within 3 years prior to the date of issuance of such required notice; or

"(B) such person does not hold a broadcast station license issued under title III of this Act and if the violation charged occurred more than 1 year prior to the date of issuance of the required notice or notice of apparent liability.".

SEC. 3. (a) The first sentence of section 504(a) of the Communications Act of 1934 (47 U.S.C. 504(a)) is amended by inserting immediately after "recoverable" the following: ", except as otherwise provided with respect to a forfeiture penalty determined under section 503(b)(3) of this Act,".

(b) Section 504(b) of such Act is amended (1) by striking out "parts II and III of title III and section 503(b), section 507, and section 510" and inserting in lieu thereof "title II, parts II and III of title III, and sections 503(b) and 507"; and (2) by striking out ", upon application therefor,".

SEC. 4. Section 510 of the Communications Act of 1934 (47 U.S.C. 510) is repealed in its entirety.

SEC. 5. Section 2(b) of the Communications Act of 1934 (47 U.S.C. 152(b)) is amended by striking the word "Subject" and inserting in lieu thereof the following "Except as provided in section 224 and subject".

SEC. 6. Title II of the Communications Act of 1934 is amended by adding at the end thereof the following new section:

"REGULATIONS OF POLE ATTACHMENTS

"SEC. 224. (a) As used in this section:

"(1) The term 'utility' means any person whose rates or charges are regulated by the Federal Government or a State and who owns or controls poles, ducts, conduits, or rights-of-way used, in whole or in part, for wire communication. Such term does not include any railroad, any person who is cooperatively organized, or any person owned by the Federal Government or any State.

"(2) The term 'Federal Government' means the Government of the United States or any agency or instrumentality thereof.

"(3) The term 'State' means any State, territory, or possession of the United States, the District of Columbia, or any political subdivision, agency, or instrumentality thereof.

"(4) The term 'pole attachment' means any attachment by a cable television system to a pole, duct, conduit, or right-of-way owned or controlled by a utility.

"(b)(1) Subject to the provisions of subsection (c) of this section, the Commission shall regulate the rates, terms, and conditions for pole attachments to provide that such rates, terms, and conditions are just and reasonable, and shall adopt procedures necessary and appropriate to hear and resolve complaints concerning such rates, terms, and conditions. For purposes of enforcing any determinations resulting from complaint procedures established pursuant to this subsection, the Commission shall take such ac-

tion as it deems appropriate and necessary, including issuing cease and desist orders, as authorized by section 312(b) of title III of the Communications Act of 1934, as amended.

"(2) Within 180 days from the date of enactment of this section the Commission shall prescribe by rule regulations to carry out the provisions of this section.

"(c)(1) Nothing in this section shall be construed to apply to, or to give the Commission jurisdiction with respect to rates, terms, and conditions for pole attachments in any case where such matters are regulated by a State.

"(2) Each State which regulates the rates, terms, and conditions for pole attachments shall certify to the Commission that—

"(A) it regulates such rates, terms, and conditions; and

"(B) in so regulating such rates, terms, and conditions, the State has the authority to consider and does consider the interests of the subscribers of cable television services, as well as the interests of the consumers of the utility services.

"(d)(1) For purposes of subsection (b) of this section, a rate is just and reasonable if it assures a utility the recovery of not less than the additional costs of providing pole attachments, nor more than an amount determined by multiplying the percentage of the total usable space, or the percentage of the total duct or conduit capacity, which is occupied by the pole attachment by the sum of the operating expenses and actual capital costs of the utility attributable to the entire pole, duct, conduit, or right-of-way.

"(2) As used in this subsection, the term 'usable space' means the space above the minimum grade level which can be used for the attachment of wires, cables, and associated equipment.

"(e) Upon the expiration of the 5-year period that begins on the date of enactment of this Act the provisions of subsection (d) of this section shall cease to have any effect.".

SEC. 6. Section 222(a)(10) of the Communications Act of 1934 (47 U.S.C. 222(a)(10)) is amended by striking out ", except Hawaii".

SEC. 7. Section 222 of the Communications Act of 1934 (47 U.S.C. 222), as amended, is further amended by adding at the end thereof the following new subsection:

"(g)(1) The authority of any carrier to provide any service or operate any facilities which it is authorized to provide or operate on the date of enactment of this subsection shall not be altered solely by the inclusion of Hawaii within the definition of 'Continental United States', nor shall such inclusion restrict or impair any carrier's eligibility after the date of enactment of this subsection for new or additional authority.

"(2) Whenever, upon a complaint or upon its own initiative, and after opportunity for a hearing, the Commission finds that any charge, classification, regulation, or practice relating to intercarrier arrangements of any carrier serving Hawaii is or will be unjust, unreasonable, discriminatory, or not in the public interest, the Commission shall determine and prescribe what charge, classification, regulation, or practice, or such other remedy as is or will be just, reasonable, nondiscriminatory and in the public interest to be thereafter followed.".

SEC. 8. The amendments made by this Act shall take effect on the thirtieth day after the date of enactment of this Act; except that the provisions of sections 503(b) and 510 of the Communications Act of 1934, as in effect on such date of enactment, shall continue to constitute the applicable law with the respect to any act or omission which occurs prior to such thirtieth day.

Mr. STAGGERS (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the Senate amendment and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The Clerk read the House amendments to the Senate amendment, as follows:

In the matter proposed to be inserted by the Senate amendment to H.R. 7442—

(1) strike out sections 2, 3, and 4, the second section 6 (on page 10 of the Senate engrossed amendment), and sections 7 and 8; and

(2) redesignate section 5 and the first section 6 (beginning on page 7 of the Senate engrossed amendment) as sections 2 and 3, respectively.

The SPEAKER. Is there objection to the first request of the gentleman from West Virginia?

Mr. ASHBROOK. Mr. Speaker, reserving the right to object, I do so in order that my colleague, the gentleman from West Virginia (Mr. STAGGERS) can explain what is happening here. As I understand it, the Senate attached several amendments which we have not agreed to; is that correct?

Mr. STAGGERS. If the gentleman will yield, this is correct. And I would call upon the subcommittee chairman, the gentleman from California (Mr. VAN DEERLIN) to explain. They did attach two amendments, which were not germane, to the bill, and we want to send it back to them after doing what we think is proper.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, I yield to my colleague, the gentleman from California (Mr. VAN DEERLIN).

Mr. VAN DEERLIN. I thank the gentleman for yielding.

Mr. Speaker, what has happened on the Senate side, as the gentleman from West Virginia (Mr. STAGGERS) indicated, was the addition of two amendments, nongermane under House rules, and both of them dealing with subject matters on which this Congress, on the House side, has not conducted hearings.

We saw no choice but to reject both amendments because of this.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, as I understand the parliamentary situation, we are having the bill read, and it is going back to conference and the conferees will just return to conference for that purpose?

Mr. VAN DEERLIN. Mr. Speaker, if the gentleman from Ohio (Mr. ASHBROOK) will yield further, the idea is to accept minor technical amendments that the Senate made in the provisions relating to pole attachments regulation contained in the bill and to reject the two remaining amendments attached by the other body, because we felt that under our rules we could not go to conference on those matters.

Mr. ASHBROOK. Mr. Speaker, I appreciate the gentleman's explanation, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the first request of the gentleman from West Virginia?

There was no objection.

A motion to reconsider was laid on the table.

INTRODUCTION OF BILL RESTRUCTURING SOCIAL SECURITY FINANCING

(Mr. BURKE of Massachusetts asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURKE of Massachusetts. Mr. Speaker, I take this opportunity to inform my colleagues in the House that I am today filing a bill to restructure the financing of social security.

The social security tax in this country is the most regressive tax that we have. It is one of the biggest causes of unemployment. This tax is driving out more business firms in this country than any other cause.

We recently heard figures announced on the trade deficit in this Nation. Some people are saying that this is caused by the increase in oil imports. I do not think the Nation of Japan ships oil to the United States, I do not think we get a single quart of oil from that country, still they have a $10 billion trade surplus with the United States.

We have a condition in this country in which the taxes of the steelworkers of America amount to $1,500 per year more from the employer and per employee. The taxes in the automobile industry are $1,150 a year more employee, employer tax. With the garment workers and the shoe workers, and employer tax the figure is $700 to $800 more a year. This is the biggest deterrent that we have to employment in this country.

If we can put through this restructuring of social security with the same formula that 60 other nations in the world have, it will bring about the employment of 2 million people. That would mean 2 million people taken off the welfare rolls, off the unemployment compensation rolls, off food stamps, and off public service jobs. That would save over $60 billion a year.

We must return the people to the work ethic of this country and make it possible for people to get jobs. Six hundred and fifty thousand jobs were wiped out in New York City in the manufacturing area, and these are jobs that only certain people can hold. They are the only jobs these people qualify to hold. We have to get people back to the manufacturing plants.

Mr. Speaker, I want to close by reciting a little piece I heard many years ago, and I hope every Member of the House will keep this in mind:

> On the beaches of hesitation lie
> The bleached bones of thousands.
> Having sat down to rest awhile,
> Life passed them by.

Mr. Speaker, this is the year to do something on the restructuring of social security.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 9214, BRETTON WOODS AGREEMENT ACT AMENDMENTS

Mr. DODD from the Committee on Rules, submitted a privileged report (Rept. No. 95–862) on the resolution (H. Res. 990) providing for consideration of the bill (H.R. 9214) to amend the Bretton Woods Agreement Act to authorize the United States to participate in the

Supplementary Financing Facility of the International Monetary Fund, which was referred to the House Calendar and ordered to be printed.

BANKRUPTCY LAW REVISION

Mr. EDWARDS of California. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 8200) to establish a uniform law on the subject of bankruptcies.

The SPEAKER. The question is on the motion offered by the gentleman from California (Mr. EDWARDS).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device. and there were—yeas 405, nays 4, not voting 23, as follows:

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 8200, with Mr. SIMON in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Friday, October 28, 1977, title I had been considered as having been read and open to amendment at any point.

Are there any further amendments to title I? If not, the Clerk will read title II.

The Clerk read as follows:

TITLE II—AMENDMENTS TO TITLE 28 OF THE UNITED STATES CODE AND TO THE FEDERAL RULES OF EVIDENCE

SEC. 201. (a) Title 28 of the United States Code is amended by inserting immediately after chapter 5 the following:

"Chapter 6—BANKRUPTCY COURTS

"Sec.
"151. Creation and composition of bankruptcy courts.
"152. Appointment of bankruptcy judges.
"153. Tenure and residence of bankruptcy judges.
"154. Salaries of bankruptcy judges.
"155. Chief judge; precedence of bankruptcy judges.
"156. Division of business among bankruptcy judges.
"157. Times for holding regular sessions.
"158. Adjournment.
"159. Special sessions; places; notice.
"160. Accommodations at places for holding court.
"161. Vacant judgeship as affecting proceedings.
"162. Bias or prejudice of judge.

"§ 151. Creation and composition of bankruptcy courts

"(a) There shall be in each judicial district a bankruptcy court which shall be a court of record known as the United States Bankruptcy Court for the district.

"(b) Each bankruptcy court shall consist of the bankruptcy judge or judges for the district in regular active service. Justices or judges designated or assigned shall be competent to sit as judges of the bankruptcy court.

"(c) Except as otherwise provided by law, or rule or order of court, the judicial power of a bankruptcy court with respect to any action, suit or proceeding may be exercised by a single bankruptcy judge, who may preside alone and hold a regular or special session of court at the same time other sessions are held by other bankruptcy judges.

"§ 152. Appointment of bankruptcy judges

"The President shall appoint, by and with the advice and consent of the Senate, bankruptcy judges for the several judicial districts.

"§ 153. Tenure and residence of bankruptcy judges

"(a) The bankruptcy judges shall hold office during good behavior.

"(b) Each bankruptcy judge shall reside in the district or one of the districts for which he is appointed.

"(c) If the public interest and the nature of the business of a bankruptcy court require that a bankruptcy judge should maintain his abode at or near a particular place for holding court in the district or within a particular part of the district the judicial council of the circuit may so declare and may make an appropriate order. If the bankruptcy judges of such a district are unable to agree as to which of them shall maintain his abode at or near the place or within the area specified in such an order the judicial council of the circuit may decide which of them shall do so.

"§ 154. Salaries of bankruptcy judges

"Each bankruptcy judge shall receive the same salary as may from time to time be

in effect for a judge of a district court of the United States other than the chief judge of the United States District Court for the District of Columbia.

"§ 155. Chief judge; precedence of bankruptcy judges

"(a) In each district having more than one judge the bankruptcy judge in regular active service who is senior in commission and under seventy years of age shall be the chief judge of the bankruptcy court. If all the bankruptcy judges in regular active service are seventy years of age or older the youngest shall act as chief judge until a judge has been appointed and qualified who is under seventy years of age, but a judge may not act as chief judge until he has served as a bankruptcy judge for one year.

"(b) The chief judge shall have precedence and preside at any session which he attends.

"Other bankruptcy judges shall have precedence and preside according to the seniority of their commissions. Judges whose commissions bear the same date shall have precedence according to seniority in age.

"(c) A judge whose commission extends over more than one district shall be junior to all bankruptcy judges except in the district in which he resided at the time he entered upon the duties of his office.

"(d) If the chief judge desires to be relieved of his duties as chief judge while retaining his active status as a bankruptcy judge, he may so certify to the Chief Justice of the United States, and thereafter the bankruptcy judge in active service next in precedence and willing to serve shall be designated by the Chief Justice as the chief judge of the bankruptcy court.

"(e) If a chief judge is temporarily unable to perform his duties as such, they shall be performed by the bankruptcy judge in active service, present in the district and able and qualified to act, who is next in precedence.

"§ 156. Division of business among bankruptcy judges

"The business of a bankruptcy court having more than one judge shall be divided among the judges as provided by the rules and orders of the court.

"The chief judge of the bankruptcy court shall be responsible for the observance of such rules and orders, and shall divide the business and assign the cases so far as such rules and orders do not otherwise prescribe.

"If the bankruptcy judges in any district are unable to agree upon the adoption of rules or orders for that purpose the judicial council of the circuit shall make the necessary orders.

"§ 157. Times for holding regular sessions

"The times for commencing regular sessions of the bankruptcy court for transacting judicial business at the places fixed by this chapter and chapter 5 of this title shall be determined by the rules or orders of the bankruptcy court. Such rules or orders may provide that at one or more of such places the court shall be in continuous session for such purposes on all business days throughout the year. At other places a session of the court shall continue for such purposes until terminated by order of final adjournment or by commencement of the next regular session at the same place.

"§ 158. Adjournment

"(a) Any bankruptcy court may, by order made anywhere within its district, adjourn or, with the consent of the judicial council of the circuit, pretermit any regular session of court for insufficient business or other good cause.

"(b) If the judge of a bankruptcy court is unable to attend and unable to make an order of adjournment, the clerk may adjourn the court to the next regular session or to any earlier date which he may determine.

"§ 159. Special sessions; places; notice

"Special sessions of the bankruptcy court may be held at such places in the district as the nature of the business may require, and upon such notice as the court orders.

"Any business may be transacted at a special session which might be transacted at a regular session.

"§ 160. Accommodations at places for holding court

"Court shall be held only at places where Federal quarters and accommodations are available, or suitable quarters and accommodations are furnished without cost to the United States. The foregoing restrictions shall not, however, preclude the Administrator of General Services, at the request of the Director of the Administrative Office of the United States Courts from providing such court quarters and accommodations as the Administrator determines can appropriately be made available at places where court is authorized by law to be held, but only if such court quarters and accommodations have been approved as necessary by the judicial council of the appropriate circuit.

"§ 161. Vacant judgeship as affecting proceedings

"When the office of a bankruptcy judge becomes vacant, all pending process, pleadings and proceedings shall, when necessary, be continued by the clerk until a judge is appointed or designated to hold such court.

"§ 162. Bias or prejudice of judge

"Whenever a party to any proceeding in a bankruptcy court makes and files a timely and sufficient affidavit that the judge before whom the matter is pending has a personal bias or prejudice either against him or in favor of any adverse party, such judge shall proceed no further therein, but another judge shall be assigned to hear such proceeding.

"The affidavit shall state the facts and the reasons for the belief that bias or prejudice exists, and shall be filed not less than ten days before the proceeding is to be heard, or good cause shall be shown for failure to file within such time. A party may file only one such affidavit in any case. It shall be accompanied by a certificate of counsel of record stating that it is made in good faith.".

(b) The table of chapters of part I of title 28 of the United States Code is amended by inserting immediately after the item relating to chapter 5 of such title the following:

"6. Bankruptcy courts----------151".

SEC. 202. Section 291(c) of title 28 of the United States Code is amended by inserting "or bankruptcy" immediately after "to hold a district".

SEC. 203. Section 292(b) of title 28 of the United States Code is amended by inserting "or a bankruptcy court" immediately after "to hold a district court".

SEC. 204. Section 292(d) of title 28 of the United States Code is amended—

(1) by striking out "either";

(2) by inserting "bankruptcy court," immediately after "in a"; and

(3) by inserting a comma immediately after "district court".

SEC. 205. Section 293 of title 28 of the United States Code is amended by adding at the end thereof the following:

"(e)(1) The Chief Justice of the United States may designate and assign temporarily a bankruptcy judge of one circuit for service in another circuit, either in a bankruptcy court or a district court upon presentation of a certificate of necessity by the chief judge or circuit justice of the circuit wherein the need arises.

"(2) The chief judge of a circuit may designate and assign one or more bankruptcy judges within the circuit to sit upon the court of appeals or a division thereof whenever the business of that court so requires. Such designations or assignments shall be in conformity with the rules or orders of the court of appeals of the circuit.

"(3) The chief judge of a circuit may, in the public interest, designate and assign temporarily a bankruptcy judge of the circuit to hold a district court in any district within the circuit.

"(4) The chief judge of a circuit may, in the public interest, designate and assign temporarily a bankruptcy judge of the circuit to hold a bankruptcy court in any district within the circuit.".

SEC. 206. Section 294 of title 28 of the United States Code is amended—

(1) in subsection (c), by striking out "or district" and inserting in lieu thereof ", district, or bankruptcy";

(2) in the second sentence of subsection (d), by inserting "in a circuit, district, or bankruptcy court outside his own district, in the case of a retired bankruptcy judge," immediately after "retired circuit or district judge,"; and

(3) in subsection (d), by striking out "or district court" and inserting in lieu thereof ", district court, or bankruptcy court".

SEC. 207. Section 295 of title 28 of the United States Code is amended by striking out "or district" and inserting in lieu thereof "district, or bankruptcy".

SEC. 208. Section 331 of title 28 of the United States Code is amended—

(1) by inserting "and a bankruptcy judge" immediately after "and a district judge" in the first sentence in the first paragraph;

(2) by inserting "circuit and district" in the second paragraph—

(A) immediately after "amended section the";

(B) immediately after "for one year, the"; and

(C) immediately after "two years and the";

(3) by inserting at the end of the second paragraph the following: "The bankruptcy judge to be summoned from each judicial circuit shall be chosen by the circuit and bankruptcy judges of the circuit at the annual judicial conference of the circuit held pursuant to section 333 of this title and shall serve as a member of the conference for three successive years, except that in the year following the effective date of this sentence the circuit and bankruptcy judges in the first, fourth, seventh, and tenth circuits shall choose a bankruptcy judge to serve for one year, the circuit and bankruptcy judges in the second, fifth, and eighth circuits shall choose a bankruptcy judge to serve for two years and the circuit and bankruptcy judges in the third, sixth, ninth, and District of Columbia circuits shall choose a bankruptcy judge to serve for three years.";

(4) by inserting "or the bankruptcy judge" immediately after "or the district judge" in the first sentence in the third paragraph; and

(5) by striking out "or district" and inserting in lieu thereof ", district, or bankruptcy" in the first sentence in the third paragraph.

SEC. 209. Section 332(d) of title 28 of the United States Code is amended by inserting "and bankruptcy judges" immediately after "The district judges".

SEC. 210. Section 333 of title 28 of the United States Code is amended by striking out "and district" and inserting in lieu thereof ", district, and bankruptcy".

SEC. 211. Section 372(a) of title 28 of the United States Code is amended by striking out "or district" in the fourth paragraph and inserting in lieu thereof ", district, or bankruptcy".

SEC. 212. Section 372(b) of title 28 of the United States Code is amended by striking out "or district" and inserting in lieu thereof ", district, or bankruptcy".

SEC. 213. Section 451 of title 28 of the United States Code is amended—

(1) by inserting ", bankruptcy courts" immediately after "the Customs Court" in the paragraph beginning with "The term 'court of the United States' "; and

(2) by inserting "bankruptcy courts," immediately after "district courts," in the paragraph beginning with "The term 'judge of the United States' ".

SEC. 214. (a) Sections 455(a) and 455(e) of title 28 of the United States Code are each amended by striking out "magistrate, or referee in bankruptcy" each place it appears and inserting in lieu thereof "or magistrate".

(b) The heading for section 455 of title 28 of the United States Code is amended by striking out "magistrate, or referee in bankruptcy" and inserting in lieu thereof "or magistrate".

(c) The item relating to section 455 in the table of sections of chapter 21 of title 28 of the United States Code is amended by striking out "magistrate, or referee in bankruptcy" and inserting in lieu thereof "or magistrate".

SEC. 215. Section 456 of title 28 of the United States Code is amended—

(1) by striking out "and the United States District Court for the District of Columbia," and inserting in lieu thereof "the United States District Court for the District of Columbia, and the United States Bankruptcy Court for the District of Columbia,";

(2) by striking out "and district and inserting in lieu thereof ", district, and bankruptcy; and

(3) by striking out "and each district judge and inserting in lieu thereof ", each district judge, and each bankruptcy judge".

SEC. 216. Section 457 of title 28 of the United States Code is amended by inserting "of bankruptcy courts," immediately after "The records".

SEC. 217. (a) The heading for section 460 of title 28 of the United States Code is amended by striking out "Alaska,".

(b) The item relating to section 460 in the table of sections of chapter 21 of title 28 of the United States Code is amended by striking out "Alaska,".

SEC. 218. Section 506 of title 28 of the United States Code is amended by striking out "nine" and inserting in lieu thereof "ten".

SEC. 219. (a) Section 526(a)(1) of title 28 of the United States Code is amended by striking out "and marshals" and inserting in lieu thereof ", marshals, and trustees".

(b) The heading for section 526 of title 28 of the United States Code is amended by striking out "and marshals" and inserting in lieu thereof ", marshals, and trustees".

(c) The item relating to section 526 in the table of sections of chapter 31 of title 28 of the United States Code is amended by striking out "and marshals" and inserting in lieu thereof ", marshals, and trustees".

SEC. 220. Section 526(a)(2) of title 28 of the United States Code is amended—

(1) by striking out "referees,"; and

(2) by striking out "and receivers in bankruptcy" and inserting in lieu thereof "in cases under title 11".

SEC. 221. Section 569(a) of title 28 of the United Code is amended by striking out "of the district court" and inserting in lieu thereof "of the bankruptcy court, of the district court,".

SEC. 222. Section 571(a) of title 28 of the United States Code is amended—

(1) by striking out "and of the marshals" and inserting in lieu thereof "of the marshals"; and

(2) by inserting ", and of the United States trustees, their assistants, staff and other employees" immediately after "clerical assistants".

SEC. 223. Section 571(b) of title 28 of the United States Code is amended by striking out "and district" and inserting in lieu thereof ", district, and bankruptcy".

SEC. 224. (a) Title 28 of the United States Code is amended by inserting immediately after chapter 37 the following:

"Chapter 39—UNITED STATES TRUSTEES

"Sec.
"581. United States trustees.
"582. Assistant United States trustees.
"583. Oath of office.
"584. Official stations.
"585. Vacancies.
"586. Duties; supervision by Attorney General.
"587. Salaries.
"588. Expenses.
"589. Staff and other employees.

"§ 581. United States trustees

"(a) The Attorney General shall appoint a United States trustee for each judicial district. The Attorney General may appoint the same individual to serve as United States trustee for more than one judicial district.

"(b) Each United States trustee shall be appointed for a term of seven years. On the expiration of his term, a United States trustee shall continue to perform the duties of his office until his successor is appointed and qualifies.

"(c) Each United States trustee is subject to removal for cause by the Attorney General.

"§ 582. Assistant United States trustees

"(a) The Attorney General may appoint one or more assistant United States trustees in any district when the public interest so requires.

"(b) Each assistant United States trustees is subject to removal for cause by the Attorney General.

"§ 583. Oath of office

"Each United States trustee and assistant United States trustee, before taking office, shall take an oath to execute faithfully his duties.

"§ 584. Official stations

"The Attorney General may determine the official stations of the United States trustees and assistant United States trustees within the districts for which they were appointed.

"§ 585. Vacancies

"The Attorney General may appoint an acting United States trustee for a district in which the office of United States trustee is vacant, or may designate a United States trustee for another judicial district to serve as trustee for the district in which such vacancy exists. The individual so appointed or designated may serve until the earlier of 90 days after such appointment or designation, as the case may be, or the date on which the vacancy is filled by appointment under section 581 of this title.

"§ 586. Duties; supervision by Attorney General

"(a) Each United States trustee, within his district, shall—

"(1) establish, maintain, and supervise a panel of private trustees that are eligible and available to serve as trustees in cases under chapter 7 of title 11;

"(2) serve as and perform the duties of a trustee in a case under title 11 when required under title 11 to serve as trustee in such a case;

"(3) deposit or invest under section 345 of title 11 money received as trustee in cases under title 11;

"(4) perform the duties prescribed for the United States trustee under title 11; and

"(5) make such reports as the Attorney General directs.

"(b) If the number of cases under chapter 13 of title 11 commenced in a particular judicial district so warrant, the United States trustee for such district may, subject to the approval of the Attorney General, appoint one or more individuals to serve as standing trustee, or designate one or more assistant United States trustees for such district to perform the duties of the United States trustee, in cases under such chapter. The United States trustee for such district shall supervise any such individual appointed as standing trustee in the performance of the duties of standing trustee.

"(c) Each United States trustee shall be under general supervision of the Attorney General, who shall provide general coordination and assistance to the United States trustees.

"(d) The Attorney General shall prescribe by rule qualifications for membership on the panels established by United States trustees under subsection (a)(1) of this section, and qualifications for appointment under subsection (b) of this section to serve as standing trustee in cases under chapter 13 of title 11. The Attorney General may not require that an individual be an attorney in order to qualify for appointment under subsection (b) of this section to serve as standing trustee in cases under chapter 13 of title 11.

"(e)(1) The Attorney General, after consultation with a United States trustee that has appointed an individual under subsection (b) of this section to serve as standing trustee in cases under chapter 13 of title 11, shall fix—

"(A) a maximum annual compensation for such individual, not to exceed the lowest annual rate of basic pay in effect for grade GS–16 of the General Schedule prescribed under section 5332 of title 5; and

"(B) a percentage fee, not to exceed ten percent, based on such maximum annual compensation and the actual, necessary expenses incurred by such individual as standing trustee.

"(2) Such individual shall collect such percentage fee from all payments under plans in the cases under chapter 13 of title 11 for which such individual serves as standing trustee. Such individual shall pay annually to the United States trustee, and the United States trustee shall pay to the Treasury—

"(A) any amount by which the actual compensation of such individual exceeds five percent upon all payments under plans in cases under chapter 13 of title 11 for which such individual serves as standing trustee; and

"(B) any amount by which the percentage fee fixed under paragraph (1)(B) of this subsection for all such cases exceeds—

"(i) such individual's actual compensation for such cases, as adjusted under subparagraph (A) of this paragraph; plus

"(ii) the actual, necessary expenses incurred by such individual as standing trustee in such cases.

"§ 587. Salaries

"The Attorney General shall fix the annual salaries of United States trustees and assistant United States trustees at rates of compensation not to exceed the lowest annual rate of basic pay in effect for grade GS–16 of the General Schedule prescribed under section 5332 of title 5.

"§ 588. Expenses

"Necessary office expenses of the United States trustee shall be allowed when authorized by the Attorney General.

"§ 589. Staff and other employees

"The United States trustee may employ staff and other employees on approval of the Attorney General.".

(b) The table of chapters of part II of title 28 of the United States Code is amended by inserting at the end thereof the following:

"39. United States Trustees---------- 581".

SEC. 225. Section 604(a) of title 28 of the United States Code is amended—

(1) by redesignating paragraph (13) as paragraph (14); and

(2) by inserting immediately after paragraph (12) the following:

"(13) Lay before Congress, annually, statistical tables that will accurately reflect the business transacted by the several bankruptcy courts, and all other pertinent data relating to such courts;".

SEC. 226. Section 610 of title 28 of the United States Code is amended by striking out "and district courts" and inserting in lieu thereof ", district courts, and bankruptcy courts".

SEC. 227. Section 620(b)(3) of title 28 of the United States Code is amended by striking out "referees,".

SEC. 228. Section 621(a)(2) of title 28 of the United States Code is amended by striking out "and three active judges of the district courts of the United States" and inserting in lieu thereof ", three active judges of the district courts of the United States, and two active judges of the bankruptcy courts of the United States".

SEC. 229. Section 621(b) of title 28 of the United States Code is amended—

(1) by inserting "(1)" immediately after "(b)";

(2) by striking out "The" and inserting in lieu thereof "Except as provided in paragraph (2) of this subsection the";

(3) by striking out everything after "years" down through "That a" and inserting in lieu thereof ". A"; and

(4) by adding at the end thereof the following:

"(2) Members first elected to the Board from among bankruptcy judges shall continue in office for terms of two and four years, respectively, the term of each to be designated by the Judicial Conference of the United States at the time of his election.".

SEC. 230. Section 621(c) of title 28 of the United States Code is amended—

(1) by inserting "(1)" immediately after "(c)"; and

(2) by adding at the end thereof the following:

"(2) The member first elected to the Board from among bankruptcy judges who is designated by the Judicial Conference of the United States to serve a term of office of two years shall be eligible for reelection to one full term of office.".

SEC. 231. Chapter 42 of title 28 of the United States Code is amended—

(1) by striking out section 629; and

(2) by striking out the item relating to section 629 in the table of sections.

SEC. 232. Section 631(c) of title 28 of the United States Code is amended—

(1) by striking out "of the conference, a part-time referee in bankruptcy or" and inserting in lieu thereof "of the conference,"; and

(2) by striking out "magistrate and part-time referee in bankruptcy," and inserting in lieu thereof "magistrate and".

SEC. 233. Section 634(a) of title 28 of the United States Code is amended by striking out "for full-time and part-time United States magistrates not to exceed the rates now or hereafter provided for full-time and part-time referees in bankruptcy, respectively, referred to in section 40a of the Bankruptcy Act (11 U.S.C. 68(a)), as amended,", and inserting in lieu thereof "not to exceed $48,500 per annum, subject to adjustment in accordance with section 225 of the Federal Salary Act of 1967 and section 461 of this title,".

SEC. 234. (a) Title 28 of the United States Code is amended by inserting immediately after chapter 49 the following:

"Chapter 50—BANKRUPTCY COURTS

"Sec.
"771. Clerks.
"772. Other employees.
"773. Records of proceedings; reporters.
"774. Power to appoint.

"(a) Each bankruptcy court may appoint a clerk who shall be subject to removal by the court.

"(b) The clerk may appoint, with the approval of the court, necessary deputies, clerical assistants and employees in such number as may be approved by the Director of the Administrative Office of the United States Courts. Such deputies, clerical assistants and employees shall be subject to removal by the clerk with the approval of the court.

"(c) The clerk of each bankruptcy court shall reside in the district for which he is appointed. The bankruptcy court may designate places within the district for the offices of the clerk and his deputies, and their official stations.

'(d) A clerk of a bankruptcy court or his deputy or assistant shall not receive any compensation or emoluments through any office or position to which he is appointed by the court, other than that received as such clerk, deputy or assistant, whether from the United States or from private litigants.

"(e) The clerk of each bankruptcy court shall pay into the Treasury all fees, costs and other moneys collected by him, except uncollected fees not required by Act of Congress to be prepaid.

"He shall make returns thereof to the Director of the Administrative Office of the United States Courts under regulations prescribed by him.

"§ 772. Other employees

"Bankruptcy judges may appoint necessary other employees, including law clerks and secretaries, subject to any limitation on the aggregate salaries of such employees which may be imposed by law.

"§ 773. Records of proceedings; reporters

"(a) The bankruptcy court shall require a record to be made, whenever practicable, of all proceedings in cases had in open court. The court may provide that the record be taken by such electronic sound recording means as the Judicial Conference shall prescribe, by a court reporter appointed or employed by such bankruptcy court to take a verbatim record by shorthand or mechanical means, or by an employee of the court designated by the court to take such a verbatim record.

"(b) On the request of a party to a proceeding that has been recorded who has agreed to pay the fee for a transcript, or a judge of the bankruptcy court, a transcript of the original record of the requested parts of such proceeding shall be made and delivered promptly to such party or judge. Any such transcript that is certified shall be deemed prima facie a correct statement of the testimony taken and proceedings had. No transcript of the proceedings of the bankruptcy court shall be considered as official except those made from certified records.

"(c) Fees for transcripts furnished in proceedings to persons permitted to appeal in forma pauperis shall be paid by the United States out of money appropriated for that purpose if the trial judge or a circuit judge certifies that the appeal is not frivolous (but presents a substantial question).

"§ 774. Power to appoint

"Whenever a majority of the bankruptcy judges of any bankruptcy court cannot agree upon the appointment of any officer of such court, the chief judge shall make such appointment.".

(b) The table of chapters of part III of title 28 of the United States Code is amended by inserting immediately after the item relating to chapter 49 the following:

"50 Bankruptcy Courts----------771".

SEC. 235. Section 957(a) of title 28 of the United States Code is amended by inserting "or bankruptcy court" immediately after "district court".

SEC. 236. Section 959(b) of title 28 of the United States Code is amended by striking out "A" and inserting in lieu thereof "Except as provided in section 1165 of title 11, a".

SEC. 237. (a) Section 1291 of title 28 of the United States Code is amended by inserting "the bankruptcy courts of the United States," immediately after "the district courts of the United States.".

(b) The heading for section 1291 of title 28 of the United States Code is amended by inserting "and bankruptcy courts" immediately after "district courts".

(c) The item relating to section 1291 in the table of sections of chapter 83 of title 28 of the United States Code is amended by inserting "and bankruptcy courts" immediately after "district courts".

SEC. 238. Section 1292 (a) of title 28 of the United States Code is amended—

(1) by inserting "the bankruptcy courts of the United States," immediately after "the district courts of the United States," in paragraph (1);

(2) by striking out the period at the end of paragraph (4) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following:

"(5) Final judgments, orders and decrees of the bankruptcy courts of the United States in proceedings arising under title 11 or arising under or related to cases under title 11.".

SEC. 239. Section 1292(b) of title 28 of the United States Code is amended by inserting immediately after "district" each place it appears the following: "or bankruptcy".

SEC. 240. Section 1294 of title 28 of the United States Code is amended—

(1) by striking out "district and territorial" and inserting in lieu thereof "district, bankruptcy, and territorial"; and

(2) by inserting "or a bankruptcy court of the United States" immediately after "a district court of the United States" in paragraph (1).

SEC. 241. Chapter 85 of title 28 of the United States Code is amended—

(1) by striking out section 1334; and

(2) by striking out the item relating to section 1334 in the table of sections.

SEC 242. Section 1360(a) of title 28 of the United States Code is amended by striking out "within the Territory" and inserting in lieu thereof "within the State".

SEC. 243. (a) Title 28 of the United States Code is amended by inserting immediately after chapter 89 the following:

"Chapter 90—BANKRUPTCY COURTS

"Sec.
"1471. Jurisdiction.
"1472. Venue of cases under title 11.
"1473. Venue of proceedings arising under or related to cases under title 11.
"1474. Venue of cases ancillary to foreign proceedings.
"1475. Change of venue.
"1476. Creation or alteration of district or division.
"1477. Cure or waiver of defects.
"1478. Removal to the bankruptcy courts.
"1479. Provisional remedies; security.
"1480. Jury trials.
"1481. Powers of bankruptcy court.

"§ 1471. Jurisdiction

"(a) Except as provided in subsection (b) of this section, the bankruptcy courts shall have original and exclusive jurisdiction of all cases under title 11.

"(b) Notwithstanding any Act of Congress that confers exclusive jurisdiction on a court or courts other than the bankruptcy courts, the bankruptcy courts shall have original but not exclusive jurisdiction of all civil proceedings arising under title 11 or arising under or related to cases under title 11.

"(c) Subsection (b) of this section does not prevent a bankruptcy court, in the interest of justice, from abstaining from hearing a particular proceeding arising under title 11 or arising under or related to a case under title 11. Such abstention, or a decision not to abstain, is not reviewable by appeal or otherwise.

"§ 1472. Venue of cases under title 11

"Except as provided in section 1474 of this title, a case under title 11 may be commenced in the bankruptcy court for a district—

"(1) in which the domicile, residence, principal place of business, or principal assets of the person or entity that is the subject of such case have been located for the 180 days immediately preceding such commencement, or for a longer portion of such 180-day period than such domicile, residence, principal place of business, or principal assets were located in any other district; or

"(2) in which there is pending a case under title 11 concerning such person's affiliate, general partner, or partnership.

"§ 1473. Venue of proceedings arising under or related to cases under title 11

"(a) Except as provided in subsections (b) and (d) of this section, a proceeding arising under or related to a case under title 11 may be commenced in the bankruptcy court in which such case is pending.

"(b) A trustee in a case under title 11 may commence a proceeding arising under or related to such case to recover a money judgment of less than $1,000 or a consumer debt of less than $5.000 only in the bankruptcy court for the district in which a defendant resides.

"(c) A trustee in a case under title 11 may commence a proceeding arising under or related to such case as statutory successor to the debtor or creditors under section 541, 544(b), or 544(c) of title 11 in the bankruptcy court for the district where the State or Federal court sits in which, under applicable nonbankruptcy venue provisions, the debtor or creditors, as the case may be, may have commenced an action on which such proceeding is based if the case under title 11 had not been commenced.

"(d) A trustee may commence a proceeding arising under title 11 or arising under or related to a case under title 11 based on a claim arising after the commencement of such case from the operation of the business of the debtor only in the bankruptcy court for the district where a State or Federal court sits in which, under applicable nonbankruptcy venue provisions, an action on such claim may have been brought.

"(e) A proceeding arising under or related to a case under title 11, based on a claim arising after the commencement of such case from the operation of the business of the debtor, may be commenced against the representative of the estate in such case in the bankruptcy court for the district where the State or Federal court sits in which the party commencing such proceeding may, under applicable nonbankruptcy venue provisions, have brought an action on such claim, or in the bankruptcy court in which such case is pending.

"§ 1474. Venue of cases ancillary to foreign proceedings

"(a) A case under section 304 of title 11 to enjoin the commencement or continuation of an action or proceeding in a State or Federal court, or the enforcement of a judgment, may be commenced only in the bankruptcy court for the district where the State or Federal court sits in which is pending the action or proceeding against which the injunction is sought.

"(b) A case under section 304 of title 11 to enjoin the enforcement of a lien against property, or to require turnover of property of an estate, may be commenced only in the bankruptcy court for the district in which such property is found.

"(c) A case under section 304 of title 11, other than a case specified in subsection (a) or (b) of this section, may be commenced only in the bankruptcy court for the district in which is located the principal place of business in the United States, or the principal assets in the United States, of the estate that is the subject of such case.

"§ 1475. Change of venue

"A bankruptcy court may transfer a case under title 11 or a proceeding arising under or related to such a case to a bankruptcy court for another district, in the interest of justice and for the convenience of the parties.

"§ 1476. Creation or alteration of district or division

"Cases or proceedings pending at the time of the creation of a new district or division or transfer of a county or territory from one division or district to another may be tried in the district or division as it existed at the institution of the case or proceedings, or in the district or division so created or to which the county or territory is so transferred as the parties shall agree or the court direct.

"§ 1477. Cure or waiver of defects

"(a) The bankruptcy court of a district in which is filed a case or proceeding laying venue in the wrong division or district may, in the interest of justice and for the convenience of the parties, retain such case or proceeding, or may transfer, under section 1475 of this title, such case or proceeding to any other district or division.

"(b) Nothing in this chapter shall impair the jurisdiction of a bankruptcy court of any matter involving a party who does not interpose timely and sufficient objection to the venue.

"§ 1478. Removal to the bankruptcy courts

"(a) A party may remove any claim or cause of action in a civil action, other than a proceeding before the United States Tax Court or civil action by a governmental unit to enforce such governmental unit's police or regulatory power, to the bankruptcy court for the district where such civil action is pending, if the bankruptcy courts have jurisdiction over such claim or cause of action.

"(b) The court to which such claim or cause of action is removed may remand such claim or cause of action on any equitable ground. An order under this subsection remanding a claim or cause of action is not reviewable by appeal or otherwise.

"§ 1479. Provisional remedies; security

"(a) Whenever any action is removed to a bankruptcy court under section 1478 of this title, any attachment or sequestration of the goods or estate of the defendant in such action shall hold the goods or estate to answer the final judgment or decree in the same manner as they would have been held to answer final judgment or decree had it been rendered by the court from which the action was removed, unless the attachment or sequestration is invalidated under applicable law.

"(b) Any bond, undertaking, or security given by either party in an action prior to removal under section 1478 of this title shall remain valid and effectual notwithstanding such removal, unless such bond, undertaking, or other security is invalidated under applicable law.

"(c) All injunctions, orders, or other proceedings in an action prior to removal of such action under section 1478 of this title shall remain in full force and effect until dissolved or modified by the bankruptcy court.

"§ 1480. Jury trials

"(a) Except as provided in subsection (b) of this section, this chapter and title 11 do not affect any right to trial by jury, in a case under title 11 or in a proceeding arising under title 11 or arising under or related to a case under title 11, that is provided by any statute in effect on September 30, 1978.

"(b) The bankruptcy court may order the issues arising under section 303 of title 11 to be tried without a jury.

"§ 1481. Powers of bankruptcy court

"A bankruptcy court shall have the powers of a court of equity, law, and admiralty.".

(b) The table of chapters of part IV of title 28 of the United States Code is amended by inserting immediately after the item relating to chapter 89 the following:

"90. Bankruptcy Courts..... 1471".

SEC. 244. Section 1656 of title 28 of the United States Code is amended by inserting "or in a bankruptcy court" immediately after "a district court".

SEC. 245. Section 1869(f) of title 28 of the United States Code is amended by inserting "chapter 6 of title 28, United States Code," immediately after "chapter 5 of title 28, United States Code,".

SEC. 246. Section 1923(b) of title 28 of the United States Code is amended by inserting "and United States trustees" immediately after "United States attorneys".

SEC. 247. (a) Chapter 123 of title 28 of the United States Code is amended by inserting immediately after section 1929 the following:

"§ 1930. Bankruptcy courts

"(a) The parties instituting a case under title 11 shall pay to the clerk of the bankruptcy court a filing fee of $50. An individual instituting a voluntary case or a joint case under title 11 may pay such fee in installments.

"(b) The Judicial Conference of the United States may prescribe additional fees in cases under title 11 of the same kind as the Judicial Conference prescribes under section 1914 (b) of this title.

"(c) Upon the filing of any separate or joint notice of appeal or application for appeal or upon the receipt of any order allowing, or notice of the allowance of, an appeal or a writ of certiorari $5 shall be paid to the clerk of the bankruptcy court, by the appellant or petitioner.

"(d) Whenever any case or proceeding is dismissed in any bankruptcy court for want of jurisdiction, such court may order the payment of just costs.

"(e) The clerk of the bankruptcy court may collect only the fees prescribed under this section.".

(b) The table of sections of chapter 123 of title 28 of the United States Code is amended by adding at the end thereof the following:

"1930. Bankruptcy courts.".

SEC. 248. Section 2075 of title 28 of the United States Code is amended by—

(1) striking out "under the Bankruptcy Act" and inserting in lieu thereof "in cases under title 11"; and

(2) by striking out the last sentence thereof.

SEC. 249. Section 2107 of title 28 of the United States Code is amended—

(1) by inserting "or the bankruptcy court" immediately after "district court"; and

(2) by striking out the final paragraph.

SEC. 250. Section 2109 of title 28 of the United States Code is amended by inserting "or from a bankruptcy court" immediately after "from a district court".

SEC. 251. Section 2201 of title 28 of the United States Code is amended by inserting "or a proceeding under section 505(c) or

1146(d) of title 11" immediately after "the Internal Revenue Code of 1954".

SEC. 252. (a) Chapter 153 of title 28 of the United States Code is amended by adding at the end thereof the following:

"§ 2256. Habeas corpus from bankruptcy courts

"A bankruptcy court may issue a writ of habeas corpus—

"(1) when appropriate to bring a person before the court—

"(A) for examination;

"(B) to testify; or

"(C) to perform a duty imposed on such person under this title; or

"(2) ordering the release of a debtor in a case under title 11 in custody under the judgment of a Federal or State court if—

"(A) such debtor was arrested or imprisoned on process in any civil action;

"(B) such process was issued for the collection of a debt—

"(i) dischargeable under title 11; or

"(ii) that is or will be provided for in a plan under chapter 11 or 13 of title 11; and

"(C) before the issuance of such writ, notice and a hearing have been afforded the adverse party of such debtor in custody to contest the issuance of such writ.".

(b) The table of sections for chapter 153 of title 28 of the United States Code is amended by adding at the end thereof the following:

"2256. Habeas corpus from bankruptcy courts.".

SEC. 253. (a) Rule 1101(a) of the Federal Rules of evidence is amended by striking out ", referees in bankruptcy,".

(b) Rule 1101(b) of the Federal Rules of Evidence is amended by striking out "the Bankruptcy Act" and inserting in lieu thereof "title 11, United States Code".

SEC. 254. Rule 1101(a) of the Federal Rules of Evidence is amended by inserting "the United States bankruptcy courts," immediately after "the United States district courts,".

TITLE III—AMENDMENTS TO OTHER ACTS

SEC. 301. Section 225(f)(C) of the Federal Salary Act of 1967 (2 U.S.C. 356(C)) is amended—

(1) by striking out "section 402(d) and" and inserting "section" in lieu thereof; and

(2) by inserting "and magistrates" immediately before the semicolon.

SEC. 302. The Commodity Exchange Act (7 U.S.C. 1 et seq.) is amended by adding at the end thereof the following:

"SEC. 19. (a) Notwithstanding title 11 of the United States Code, the Commission may provide, with respect to a commodity broker that is a debtor under chapter 7 of title 11 of the United States Code, by rule or regulation—

"(1) that certain cash, securities, other property, or open contractual commitments are to be included in or excluded from customer property or member property;

"(2) that certain cash, securities, other property, or open contractual commitments are to be specifically identifiable to a particular customer in a specific capacity;

"(3) the method by which the business of such commodity broker is to be conducted or liquidated after the date of the filing of the petition under such chapter; and

"(4) how the net equity of a customer is to be determined.

"(b) As used in this section, the terms 'commodity broker', 'contractual commitment', 'customer', 'customer property', 'member property', 'net equity', and 'security' have the meanings assigned such terms for the purposes of subchapter IV of chapter 7 of title 11 of the United States Code.".

SEC. 303. (a) Subsection (a) of section 4 of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499d(a)), is amended by striking out ": And provided further, That the license" and all that follows through the end of such subsection, and inserting a period in lieu thereof.

(b) Subsection (e) of section 4 of such Act (7 U.S.C. 499d(e)) is amended by inserting "and if he finds that the circumstances of such bankruptcy warrant such a refusal," immediately after "corporation adjudicated or discharged as a bankrupt,".

SEC. 304. Section 21(a) of the Agricultural Adjustment Act (7 U.S.C. 623(a)) is amended

(1) by striking out "receivership, and bankruptcy" and inserting "and receivership" in lieu thereof; and

(2) by striking out "bankruptcy," in the second sentence.

SEC. 305. The first section of the Act entitled "An Act to authorize the Secretary of Agriculture to compromise, adjust, or cancel certain indebtedness, and for other purposes." approved December 20, 1944 (58 Stat. 836; 12 U.S.C. 1150), is amended by striking out "Act entitled 'An Act to establish a uniform system of bankruptcy throughout the United States'" and inserting "Bankruptcy Act or under title 11 of the United States Code" in lieu thereof.

SEC. 306. (a) Section 3(a)(7) of the Securities Act of 1933 15 U.S.C. 77c(a)(7)) is amended by striking out "or by a trustee in bankruptcy,".

(b) Paragraphs (9) and (10) of section 3 (a) of such Act (15 U.S.C. 77c(a) (9) and (10)) are each amended by striking out "Any" and inserting in lieu thereof the following: "Except with respect to a security exchanged in a case under title 11 of the United States Code, any".

SEC. 307. Section 303(18) of the Trust Indenture Act of 1939 (15 U.S.C. 77ccc(18)) is amended by striking out "Act entitled 'An Act to establish a uniform system of bankruptcy throughout the United States', approved July 1, 1898, as amended, whether amended prior to or after the enactment of this title" and inserting "Bankruptcy Act or title 11 of the United States Code" in lieu thereof.

SEC. 308. (a) Section 5(b)(1)(A) of the Securities Investor Protection Act of 1970 (15 U.S.C. 78eee(b)(1)(A)) is amended—

(1) by striking out "1(19) of the Bankruptcy Act" and inserting "101 of title 11 of the United States Code" in lieu thereof;

(2) by striking out subclause (ii); and

(3) by redesignating subclauses (iii), (iv), and (v) as subclauses (ii), (iii), and (iv), respectively, (b) Section 5(b)(2) of such Act (15 U.S.C. 78eee(b)(2) is amended by striking out "bankruptcy and of a court in a proceeding under chapter X of the Bankruptcy Act" and inserting "the United States having jurisdiction over cases under title 11 of the United States Code" in lieu thereof.

(c) Section 5(b)(3) of such Act (15 U.S.C. 78eee(b)(3)) is amended by striking out "section 158 of the Bankruptcy Act" and inserting "section 101 of title 11 of the United States Code" in lieu thereof.

(d) Section 5(b)(4)(B)(i) of such Act (15 U.S.C. 78eee(b)(4)(B)(i)) is amended by inserting "or under title 11 of the United States Code" immediately after "Bankruptcy Act".

(e) Section 6(b)(1) of such Act (15 U.S.C. 78fff(b)(1) is amended by striking out "bankruptcy and a trustee under chapter X of the Bankruptcy Act have with respect to a bankrupt and a chapter X debtor and inserting "a case under title 11 of the United States Code" in lieu thereof.

(f) Section 6(b)(2) of such Act (15 U.S.C. 78fff(b)(2) is amended by striking out "appointed under section 44 of the Bankruptcy Act" and inserting "in a case under chapter 7 of title 11 of the United States Code" in lieu thereof.

(g) Section 6(c)(1) of such Act (15 U.S.C. 78fff(c)(1)) is amended by striking out ", the provisions of chapter X and such of the provisions" and all that follows down through the end of such paragraph (1) and inserting in lieu thereof the following: "subchapters I and II of chapter 7 of title 11 of the United States Code. For the purposes of applying such title 11 in carrying out this section, a reference in such title 11 to the date of the filing of the petition shall be deemed to be a reference to the filing date (as defined in section 5(b)(4)(B)).".

(h) Section 6(c)(2) of such Act (15 U.S.C. 78fff(c)(2)) is amended by striking out "section 60e of the Bankruptcy Act" and inserting "subchapter III of chapter 7 of title 11 of the United States Code" in lieu thereof.

(i) Section 6(c)(2)(A) of such Act (15 U.S.C. 78fff(c)(2)(A)) is amended by striking out "the Bankruptcy Act" and inserting "title 11 of the United States Code" in lieu thereof.

(j) Section 6(c)(2)(A)(v) of such Act (15 U.S.C. 78fff(c)(2)(A)(v)) is amended by striking out "60e of the Bankruptcy Act" and inserting "101 of title 11 of the United States Code" in lieu thereof.

(k) Section 6(c)(2)(B) of such Act (15 U.S.C. 78fff(c)(2)(B)) is amended by striking out "all costs and expenses specified in clauses (1) and (2) of section 64a of the Bankruptcy Act" and inserting "claims of the kind specified in section 507 (1), (2), (3), or (4) of title 11 of the United States Code" in lieu thereof.

(l) Section 6(c)(2)(D) of such Act (15 U.S.C. 78fff(c)(2)(D)) is amended by striking out "the Bankruptcy Act" and inserting "title 11 of the United States Code" in lieu thereof.

(m) Section 6(e) of such Act (15 U.S.C. 78fff(e)) is amended—

(1) by striking out "section 28 of the Bankruptcy Act" and inserting "sections 342 (a) and 743 of title 11 of the United States Code" in lieu thereof; and

(2) by striking out "in section 57 of the Bankruptcy Act" and inserting "under title 11 of the United States Code for the allowance of claims" in lieu thereof.

(n) Section 6(i) of such Act (15 U.S.C. 78fff(i)) is amended by striking out "167(3) of the Bankruptcy Act" and inserting "1106 (a)(4)(A) of title 11 of the United States Code" in lieu thereof.

SEC. 309. Section 11(f) of the Public Utility Holding Company Act of 1935 (15 U.S.C. 79k (f)) is amended by striking out "bankruptcy" and inserting "case under title 11 of the United States Code" in lieu thereof.

SEC. 333. Title IX of the Merchant Marine Act, 1936 (46 U.S.C. 1241 et seq.), is amended by adding at the end thereof the following:

"SEC. 908. (a) Notwithstanding any other provision of law, in any proceeding in a bankruptcy, equity, or admiralty court of the United States in which a receiver or trustee may be appointed for any corporation engaged in the operation of one or more vessels of United States registry between the United States and any foreign country, upon which the United States hold mortgages, the court, upon finding that it will inure to the advantage of the estate and the parties in interest and that it will tend to further the purposes of this Act, may constitute and appoint the Secretary of Commerce as sole trustee or receiver, subject to the directions and orders of the court, and in any such proceeding the appointment of any person other than the Secretary as trustee or receiver shall become effective upon the ratification thereof by the Secretary without a hearing, unless the Secretary shall deem a hearing necessary. In no such proceeding shall the Secretary be constituted as trustee or receiver without the Secretary's express consent.

"(b) If the court, in any such proceeding, is unwilling to permit the trustee or receiver to operate such vessels in such service pending the termination of such proceeding, without financial aid from the Government, and the Secretary certifies to the court that the continued operation of such vessel is, in the opinion of the Secretary, essential to the foreign commerce of the United States and is reasonably calculated to carry out the purposes and policy of this Act, the court may permit the Secretary to operate the vessels subject to the orders of the court and upon terms decreed by the court sufficient to protect all the parties in interest, for the account of the trustee or receiver, directly or through a managing agent or operator employed by the Secretary, if the Secretary undertakes to pay all operating losses resulting from such operation, and comply with the terms imposed by the court, and such vessel shall be considered to be a vessel of the United States within the meaning of the Suits in Admiralty Act. The Secretary shall have no claim against the corporation, its estate, or its assets for the amount of such payments, but the Secretary may pay such sums for depreciation as it deems reasonable and such other sums as the court may deem just. The payment of such sums, and compliance with other terms duly imposed by the court, together with the payment of the operating losses, shall be in satisfaction of all claims against the Secretary on account of the operation of such vessels.".

SEC. 334. (a) Section 22(a) of the Organic Act of Guam (48 U.S.C. 1424(a)) is amended by inserting "and a bankruptcy court" immediately after "jurisdiction of a district court".

(b) Section 22(b) of such Act (48 U.S.C. 1424(b)) is amended by striking out "30 of the Bankruptcy Act of July 1, 1898, as amended (title 11, U.S.C., sec. 53), in bankruptcy cases;" and inserting "2075 of title 28, United States Code, in cases under title 11, United States Code," in lieu thereof.

SEC. 335. (a) Section 22 of the Revised Organic Act of the Virgin Islands (48 U.S.C. 1612) is amended by inserting "and a bankruptcy court" immediately after "jurisdiction of a district court".

(b) Section 25 of such Act (48 U.S.C. 1615) is amended by striking out "30 of the Bankruptcy Act in bankruptcy cases" and inserting "2075 of title 28, United States Code, in cases under title 11, United States Code" in lieu thereof.

SEC. 336. (a) Section 20c of the Interstate Commerce Act (49 U.S.C. 20c) is amended by striking out "bankruptcy" and inserting "a case under title 11 of the United States Code" in lieu thereof.

(b) Section 213(a)(3) of such Act (49 U.S.C. 313(a)(3)) is amended—

(1) by striking out "bankruptcy from" and inserting "a case under title 11 of the United States Code from" in lieu thereof; and

(2) by striking out "bankruptcy" and inserting "such case" in lieu thereof.

(c) Section 323 of such Act (49 U.S.C. 922a) is amended by striking out "bankruptcy" and inserting "a case under title 11 of the United States Code" in lieu thereof.

TITLE IV—TRANSITION

REPEALER

SEC. 401. (a) The Bankruptcy Act is repealed.

(b) Section 3 of the Act is entitled "An Act to amend an Act entitled 'An Act to establish a uniform system of bankruptcy throughout the United States,' approved July 1, 1898, and Acts amendatory thereof and supplementary thereto", approved March 3, 1933 (47 Stat. 1482; 11 U.S.C. 101a), is repealed.

(c) Sections 3, 6, and 7 of the Act entitled "An Act to amend an Act entitled 'An Act to establish a uniform system of bankruptcy throughout the United States', approved July 1, 1898, and Acts amendatory thereof and supplementary thereto", approved June 7, 1934 (48 Stat. 923, 924; 11 U.S.C. 76a, 203a, 205a), are repealed.

(d) The sentence beginning "Said section 74" in section 2 of the Act entitled "An Act to amend an Act entitled 'An Act to establish a uniform system of bankruptcy throughout the United States,' approved July 1, 1898, and Acts amendatory thereof and supplementary thereto", approved June 7, 1934 (48 Stat. 922; 11 U.S.C. 202a), is repealed.

(e) Subsection (b) of section 4 of the Act entitled "An Act to amend an Act entitled 'An Act to establish a uniform system of banruptcy throughout the United States', approved July 1, 1898, and Acts amendatory thereof and supplementary thereo", approved June 7, 1934 (48 Stat. 924; 11 U.S.C. 103a), is repealed.

(f) Section 2 of the Act entitled "An Act to amend the Act entitled 'An Act to establish a uniform system of bankruptcy throughout the United States', approved July 1, 1898, as amended and supplemented", approved June 5, 1936 (49 Stat. 1476; 11 U.S.C. 93a), is repealed.

(g) Section 3 of the Act entitled "An Act to amend the Interstate Commerce Act, as amended, and for other purposes", approved April 9, 1948 (62 Stat. 167; 11 U.S.C. 208), is repealed.

EFFECTIVE DATES

SEC. 402. (a) Except as otherwise provided in this title, this Act shall take effect on October 1, 1978.

(b) Except as provided in subsections (c) and (d) of this section, the amendments made by title II of this Act shall take effect on October 1, 1983.

(c) The amendments made by sections 214, 219, 220, 222, 224, 225, 227, 232, 233, 236, 246, 251, and 253 of this Act shall take effect on October 1, 1978.

(d) The amendments made by sections 217, 218, 231, 242, 248, 302, 316, 326, and 327 of the Act shall take effect on the date of enactment of this Act.

(e) The amendments made by sections 313 (j), 334(a), and 335(a) of this Act shall take effect on October 1, 1983.

SAVINGS PROVISIONS

SEC. 403. (a) A case commenced under the Bankruptcy Act, and all matters and proceedings in or relating to any such case, shall be conducted and determined under such Act as if the Act had not been enacted, and the substantive rights of parties in contion with any bankruptcy case, matter, or proceeding shall continue to be governed by the law applicable to such case, matter, or proceeding as if this Act had not been enacted.

(b) The repeal made by section 401(a) of this Act does not affect any right of a referee in bankruptcy, United States bankruptcy judge, or survivor of a referee in bankruptcy or United States bankruptcy judge to receive any annuity or other payment under the civil service retirement laws.

(c) The amendments made by section 313 of this Act do not affect the application of chapter 9, chapter 96, section 2516, section 3057, or section 3284 of title 18 of the United States Code to any act of any person—

(1) committed before October 1, 1978; or

(2) committed after October 1, 1978, in connection with a case commenced before such date.

(d) Notwithstanding subsection (a) of this section, a fee may not be charged under section 40c(2)(b) of the Bankruptcy Act in a case in which the plan is confirmed after September 30, 1978, to the extent that such fee exceeds $100,000.

COURTS DURING TRANSITION

SEC. 404. (a) The courts of bankruptcy, as defined under section 1(10) of the Bankruptcy Act, created under section 2a of the Bankruptcy Act, and existing on September 30, 1978, shall continue through September 30, 1983, to be the courts of bankruptcy for the purposes of this Act and the amendments made by this Act. Each of the courts of bankruptcy so continued shall constitute a separate department of the district court that is such court of bankruptcy under the Bankruptcy Act.

(b) The term of a referee in bankruptcy that expires after the date of enactment of this Act is extended to and expires on September 30, 1983. During the period commencing on October 1, 1978, and ending on September 30, 1983 (hereinafter in this title referred to as "the transition period"), such a referee in bankruptcy shall have the title of United States bankruptcy judge, and shall serve in the court of bankruptcy continued under subsection (a) of this section that appointed such United States bankruptcy judge, in the manner prescribed by this title. Section 8335(a) of title 5 of the United States Code shall not apply in respect of United States bankruptcy judges during the transition period.

(c) Except as otherwise provided in this section or in section 407 of this Act, matters relating to the office of United States bankruptcy judges and to United States bankruptcy judges shall continue to be governed during the transition period by the rules set forth in sections 34, 35, 36, 40a, 40b, 40d, 41, and 43 of the Bankruptcy Act as such Act existed on September 30, 1978.

(d) During the transition period, the United States bankruptcy judges of each district may appoint a clerk, necessary other employees, including law clerks and secretaries, and court reporters the same as the judges of a United States bankruptcy court established under section 201 of this Act may appoint such officers and employees under the amendment made by section 234 of this Act. Such clerk, other employees, and reporters shall have the same rights and powers, shall perform the same functions and duties, and shall be subject to the same provisions of title 28 of the United States Code, as a clerk, other employee, or reporter, as the case may be, appointed under the amendment made by section 234 of this Act by a United States bankruptcy court established under section 201 of this Act. The United States bankruptcy judges of each district

shall have the same rights and powers as a United States bankruptcy court established under section 201 of this Act with respect to such clerk, other employees, and reporters.

(e) During the transition period, the provisions of sections 455, 456, 569(a), 571(b), 620(b)(3), and 957(a) of title 28 of the United States Code shall apply to United States bankruptcy judges and to any court officers or employees appointed or employed under subsection (d) of this section the same as such sections apply to the bankruptcy judges, and to any court officers or employees, of a United States bankruptcy court established under section 201 of this Act. During the transition period, the position of United States bankruptcy judge shall be deemed to be a position within the purview of subparagraph (C) of section 225(f) of the Federal Salary Act of 1967 (2 U.S.C. 356 (C)).

(f) During the transition period, the Judicial Conference of the United States may from time to time in the light of the recommendations of the judicial councils of each circuit, made after advising with the district judges and the United States bankruptcy judges of the respective circuit, and of the Director of the Administrative Office of the United States Courts, increase the number of full-time United States bankruptcy judges, or provide that a part-time United States bankruptcy judge for a particular district may serve in the capacity and receive the salary of a full-time United States bankruptcy judge, as the expeditious transaction of the business of the several courts of bankruptcy may require.

JURISDICTION AND PROCEDURE DURING TRANSITION

SEC. 405. (a)(1) All cases commenced under title 11 of the United States Code during the transition period shall be referred to the United States bankruptcy judges. The United States bankruptcy judges may exercise in such cases the jurisdiction and powers conferred by subsection (b) of this section on the courts of bankruptcy continued by section 404(a) of this Act, and all proceedings in such cases shall be before the United States bankruptcy judges, except—

(A) a proceeding to enjoin a court;

(B) a proceeding to punish a criminal contempt—

(i) not committed in the bankruptcy judge's actual presence; or

(ii) warranting a punishment of imprisonment or of a fine of more than $250; or

(C) an appeal from a judgment, order, decree, or decision of a United States bankruptcy judge.

(2) Any proceeding in a court of bankruptcy in a case under title 11 of the United States Code that is not before the United States bankruptcy judge shall be before the judge of the court of bankruptcy for the district in which such case is pending.

(b) During the transition period, the amendments made by sections 243, 245, 252, and 254 of this Act shall apply to the courts of bankruptcy continued by section 404(a) of this Act the same as such amendments apply to the United States bankruptcy courts established under section 201 of this Act.

(c) During the transition period, an appeal from a judgment, order, decree, or decision of a United States bankruptcy judge shall be to the United States district court for the district where such United States bankruptcy judge sits, and from such district court to a court of appeals as provided under section 1294 of title 28 of the United States Code. The jurisdiction of a district court of an appeal under this section from a United States bankruptcy judge, and of a court of appeals of an appeal under this section from a district court shall be the same as the jurisdiction of appeals from the United States bankruptcy courts established under section 201 of this Act granted to the courts of appeals under sections 237, 238, and 239 of this Act.

(d) The rules prescribed under section 2075 of title 28 of the United States Code and in effect on September 30, 1978, shall apply to cases under title 11 of the United States Code to the extent not inconsistent with such title 11, with the amendments made by this Act, or with this Act, until such rules are repealed or superseded by rules prescribed and effective under such section, as amended by section 248 of this Act.

(e)(1) The parties instituting a case under title 11 of the United States Code shall pay a filing fee of $50. An individual instituting a voluntary case or a joint case under such title may pay such fee in installments.

(2) The Judicial Conference of the United States may prescribe additional fees in cases under such title of the same kind as the Judicial Conference prescribes under section 1914 of title 28 of the United States Code.

TRANSITION STUDY

SEC. 407. (a) The Director of the Administrative Office of the United States Courts shall conduct a study during the transition period to determine the number of judges of the United States bankruptcy courts established under section 201 of this Act that will be needed after October 1, 1983. The Director shall report the results of such study to the Congress before April 1, 1982.

JUDICIAL ADMINISTRATION

SEC. 407. (a) The Director of the Administrative Office of the United States Courts shall appoint a committee of not fewer than seven United States bankruptcy judges to advise the Director with respect to matters that arise during the transition period or that are relevant to the purposes of the transition period.

(b) During the transition period, at least one-third of the members of any committee of the Judicial Conference of the United States that is concerned with the administration of the bankruptcy system shall be chosen from among the United States bankruptcy judges, and at least one member of any committee of the Judicial Conference that is concerned with court administration or supporting personnel shall be chosen from among the United States bankruptcy judges.

(c) During the transition period, the chief judge of each circuit shall summon the United States bankruptcy judges of such circuit to the judicial conference of such circuit called and held under section 333 of title 28 of the United States Code.

(d) During the transition period, there shall be added to the Board of the Federal Judicial Center established under chapter 42 of title 28 of the United States Code two United States bankruptcy judges, elected by vote of the members of the Judicial Conference of the United States, for terms beginning on October 1, 1978, and ending on September 30, 1983.

TRANSFER TO NEW COURT SYSTEM

SEC. 408. (a) On October 1, 1983, there shall be transferred to the appropriate United States bankruptcy court established under section 201 of this Act—

(1) cases, and matters and proceedings in cases, under the Bankruptcy Act that are pending, at the end of September 30, 1983, in the courts of bankruptcy continued under section 404(a) of this Act, other than cases, and matters and proceedings in cases, under—

(A) section 77 or chapter IX of the Bankruptcy Act; or

(B) chapter X of the Bankruptcy Act in which a general reference under section 117 of the Bankruptcy Act is not in effect; and

(2) cases, and proceedings, arising under or related to cases, under title 11 of the United States Code that are pending, at the end of September 30, 1983, in the courts of bankruptcy continued under section 404(a) of this Act.

(b) Civil actions pending on September 30, 1983, over which a United States bankruptcy court established under section 201 of this Act has jurisdiction on October 1, 1983, shall not abate, but continuation of any such action that has not been finally determined before October 1, 1984, may be enjoined, and any claims or causes of actions not resolved may be removed to a bankruptcy court under chapter 90 of title 28 of the United States Code.

(c) All Government publications, law books, recording equipment, and other property furnished to bankruptcy judges' offices as of September 30, 1983, and of particular use to the offices of the judges of the United States bankruptcy courts, shall be transferred to the United States bankruptcy courts under the supervision of the Director of the Administrative Office of the United States Courts.

ADDITIONAL RULEMAKING POWER

SEC. 409. The Supreme Court may issue such additional rules of procedure, consistent with Acts of Congress, as may be necessary for the orderly transfer of functions and records and the orderly transition to the new bankruptcy court system created by this Act.

Mr. EDWARDS of California (during the reading). Mr. Chairman, I ask unanimous consent that the remainder of the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: Page 405, line 19, strike out "or". Page 405, after line 19, insert the following:

(8) for a loan insured or guaranteed under part B of title IV of the Higher Education Act of 1965 (20 U.S.C. 1071 et seq.) if—

(A) such loan first becomes due—

(i) within five years before the date of the filing of the petition; or

(ii) after the date of the filing of the petition; and

(B) excepting such debt from discharge under this paragraph will not impose an undue hardship on the debtor or a dependent of the debtor; or

Page 405, line 20, strike out "8" and insert "9" in lieu thereof.

Page 406, line 11, strike out "or (6)" and insert "(6), or (8)" in lieu thereof.

Page 406, line 15, strike out "or (6)" and insert "(6), or (8)" in lieu thereof.

Mr. ERTEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ERTEL. Mr. Chairman, this amendment is an amendment to the Bankruptcy Act which would prohibit discharge of ex-student loans for a period of 5 years after they become due, except when a severe hardship results to the student or his dependents.

The purpose of this particular amendment is to keep our student loan programs intact. As many Members know,

the default rate in the student loan program has been escalating to tremendous proportions in the past year. In accordance with that, the number of students going into bankruptcy—or ex-students—has increased over the years 1965 through 1972, by 1,200 percent for the years 1972 through 1975. The Washington, D.C., student loan program has collapsed and suspended its program, because there is no more money.

What happens with these programs is that as people borrow the money, go to school and then repay it to the educational institution, when it becomes due approximately 1 year after completion of school. After repaying this loan, this money goes into a revolving fund which is then available for other students on down the line. When they default and do not pay, and eventually reach the bankruptcy stage, we are penalizing students who are coming along through the system.

Some people have said, "Why should student loans be treated any differently than any other loans?"

Well, I would suggest that when one gets a business loan, one has collateral or something to justify that loan. But, on student loans the only thing one can put up for collateral is the ability he will have to make a better living after he has gotten that education. And so, what we have is an unsecured loan granted to students to get a better education.

Some have said that we are discriminating against students. We are not discriminating against students with this amendment to the Bankruptcy Act. In fact, it works the exact opposite. Without this amendment, we are discriminating against future students, because there will be no funds available for them to get an education. The people who are leaving the institutions already have the benefit of their educations, so that this is not an antistudent provision, as some would contend, and is not class discrimination against those students. It is to keep the student loan program going, and to keep it viable.

I have to note that one of my colleagues sent out a "Dear Colleague" letter in opposition to this particular amendment. He says the present bankruptcy law contains exemptions only for loans incurred by fraud, felony, and alimony dodging. That is not quite accurate. We prevented the discharge of debts in the Bankruptcy Act for taxes, including property taxes. We included discharge for wages owed, so that you cannot discharge a debt if you owe wages for a particular period of time. So this is just one more exception to the Bankruptcy Code, and it is not putting ex-students in the class of felons, as was alleged in that particular letter.

Mr. Chairman, I might also point out that if the ex-student has severe financial problems, for instance, if he has a medical problem and cannot repay his student loan, there is a clause that will allow him to get discharged. Upon a determination by the court that it is a hardship for him, he may then be discharged from the student loan. The hardship may also involve a dependent. If he were a married student and his wife had a severe illness, then he could be discharged, under my amendment.

What it does prevent is that when a student gets through school, having taken a student loan, comes out, and says, "Well, it is nice to get a fresh start. I will not pay back my loan. I will declare bankruptcy and I will not have to worry about it." And discharge the only loan they have which is a student loan.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. ERTEL) has expired.

(By unanimous consent, Mr. ERTEL was allowed to proceed for 1 additional minute.)

Mr. ERTEL. Mr. Chairman, I would suggest that this is a policy which should be recognized: We want to keep viable the student loan program in the United States.

I also want to point out that the Secretary of Health, Education, and Welfare supports this amendment and the commissioners of most higher education through out the United States, including those in the States of Pennsylvania, New York, and New Jersey, support this amendment.

Mr. MOTTL. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I yield to the gentleman from Ohio.

Mr. MOTTL. I thank the gentleman for yielding.

Mr. Chairman, I would like to compliment the gentleman for his fine amendment and ask that my colleagues in the committee support his amendment.

Mr. Chairman, I rise in support of the Ertel amendment to H.R. 8200 which would prohibit the discharged in bankruptcy of a student loan until 5 years after the commencement of the repayment period. There has been in the last few years a dramatic upswing in the number of student loan bankruptcies. During the 1965–72 period, the amount of student loan bankruptcies totaled $2.4 million nationally, or $300,000 per year. From 1972 to February 1975, the national value of the bankruptcies totaled $11.3 or 3.7 million per year. This is a 1,200-percent increase.

In Ohio, there were 3,360 defaults and of those 392 were bankruptcies in 1977. GAO indicates that the general default rate on educational loans is approximately 18 percent. Of this 4 percent involve bankruptcies.

If the student loan program is to remain viable it is imperative we pass this amendment so we insure our youngsters in the future that loan money will be available to them as it was to past generations.

Mr. DODD. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. DODD. Mr. Chairman, before I begin addressing this particular amend-

Mr. Chairman, before I begin this particular amendment, I would be remiss if I did not at this point compliment the chairman of the committee, the gentleman from California (Mr. EDWARDS), and his fine committee, for undertaking this herculean task. I served with the gentleman on this committee for a year, and I know that it was a tremendous job to deal with this particular area of the law. I want to extend my compliments to him and the committee.

Mr. Chairman, in addressing this particular amendment which has been offered by the gentleman from Pennsylvania (Mr. ERTEL), let me make a couple of basic points before I address the actual merits of the amendment.

First of all, there are horror stories that we have all heard about in regard to students who have abused the tremendous privilege of getting a student loan. There are horror stories, and I am not going to deny that. We are not here today to deal with the horror stories; we are here to deal with a very sensitive area of bankruptcy law, because it will have the potential of affecting the lives of 10 million people in this country, 10 million people who happen to be students and who happen to need assistance when they are going to college.

First of all, I would like to address what I perceive to be some misconceptions in dealing with the bankruptcy law. First of all, a year ago, when we dealt with the amendments of the Higher Education Act of 1965, the issue was raised as to whether or not we ought to prohibit students from discharging student loans. At that time it was recognized that there were no national statistics with regard to the amount of losses which were being incurred as a result of former students discharging their debts through bankruptcy. So I asked the author of this amendment if we could delay it for 1 year while we conducted a GAO study to find out how severe this problem was.

We were told in September of this year that because we had not dealt with this issue, that provision became law automatically. So as a result we are faced with that provision in the Higher Education Act.

But the GAO did complete its study, and this is what it revealed: the GAO study showed the problem is not with bankruptcies or with student loans, the problem is with defaults, and there is a distinction between defaults and bankruptcies.

First, over the past 6 years we have not seen any dramatic change at all in the number of bankruptcies among students taking student loans. A chart put out by the Office of Education shows a fairly constant figure of about 5 percent of the losses actually being incurred because of bankruptcies being filed, whereas we find a constant figure of 90 to 92 percent of the losses incurred because of defaults.

What do we do about defaults? The default problem is an administration problem. That is something the Office of Education must deal with. We are not going to be able to address the default problem today just because we prohibit

students from discharging loans under bankruptcy. We are not going to address that problem at all.

So to suggest that we are going to somehow alleviate a problem that may exist in defaults by accepting an amendment to the Bankruptcy Act is just a misconception.

Mr. Chairman, let me point out some of the basic fundamental principles that are involved in this decision. Bankruptcy is something that is protected by the Constitution of the United States. This is not something that was concocted in a statute 10, 15, or 20 years ago. The right to go to bankruptcy court is something that is extended to every single citizen of this country, and there are two fundamental principles that apply when we talk about bankruptcy. One is to provide people with a fresh start, and the other is to treat creditors and debtors equally.

If we apply a different standard here to students, we are going to set up a privilege in a sense for the Government, giving it the status of being a privileged creditor.

Under our bankruptcy law we only really define groups of people or different statuses for three types of people who are exempted from discharging their claims under bankruptcy. We are talking about felons; that is a group of people. We are talking about people who have been convicted of fraud; that is another group of people. We are talking about people who have been found guilty and who are in arrears in alimony payments; that is another group of people.

Whether we are to suggest that we are not going to allow them to discharge their debts, this is the point. We are not talking about a single group of people there; we are talking about every group covered under that particular category. So we are adding to this group now. We are not going to say that just people who are guilty of fraud, those who are felons, and those who are in arrears in their alimony payments are not going to be able to discharge. We are also going to say that students are not going to be able to do it.

I think that sets up a class distinction, and I think it is discriminatory to say that students should not be able to discharge.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. DODD) has expired.

(By unanimous consent, Mr. DODD was allowed to proceed for 2 additional minutes.)

Mr. DODD. So in effect, Mr. Chairman, we are setting aside a group of people and making a distinction. As I pointed out earlier, the problem is not in bankruptcy; it is in defaults.

We should address that problem, of course, but let us not discriminate against this class of people, 10 million people in this country, merely because they happen to be students and merely because there are some few who have abused that particular privilege of getting a student loan.

So I ask my colleagues here today to think carefully about this amendment and to reject it as not a sound way of dealing with this particular problem.

Mr. DRINAN. Mr. Chairman, will the gentleman yield?

Mr. DODD. I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Chairman, I thank the gentleman for yielding and commend him for his remarks.

I wish to be associated with the gentleman's very wise approach to this issue. As a member of the subcommittee, let me say that we thought this matter out very carefully. I think the amendment offered by my good friend, the gentleman from Pennsylvania (Mr. ERTEL) would in fact discriminate against students. I commend the gentleman from Connecticut (Mr. DODD) and associate myself with his remarks.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. DODD. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, will the gentleman agree that in New York State during the year 1975–76 bankruptcies accounted for 10.46 percent of all defaults? Would the gentleman agree with that figure?

Mr. DODD. I would not disagree with the figure. But what the gentleman fails to do in his dear colleague letter that he sent out is this: He failed to mention how many student loans were granted. The gentleman just cites a raw figure, but he does not take into consideration the percentage as to how many students loans were granted, to prove his contention.

Mr. ERTEL. Mr. Chairman, would the gentleman agree that 10 percent of all defaults wind up in bankruptcy court in New York, and that that is a substantial figure?

Mr. DODD. Mr. Chairman, the gentleman is talking about 1 State among 50 States. The gentleman tries to deal with the problem by citing the figures from just one State as a single entity, and that is not a proper way to address the problem.

Mr. ERTEL. Mr. Chairman, would the gentleman agree that, in fact, if we continue to press on with these developments, more and more people will take the option for bankruptcy, which is an "out," and that, therefore, the student loan program will come more and more into financial trouble?

Mr. DODD. I would disagree with the gentleman. I think he would find that most people are going to be very hesitant about walking into bankruptcy court, particularly if they have just come out of an educational institution. They are going to be looking for jobs.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. DODD) has expired.

(By unanimous consent, Mr. DODD was allowed to proceed for 1 additional minute.)

Mr. DODD. Mr. Chairman, I think the gentleman raises a good point and one which should be addressed.

People do not go and rush into a bankruptcy court. It is not something that one loves to do, particularly if he is coming out of an educational institution and wants to get a job. That person does not want to list on his résumé that last year he took advantage of the Bankruptcy Act.

Mr. ERTEL. Mr. Chairman, if the gentleman will yield further, the gentleman made the statement that we are giving a preference to the U.S. Government here in this particular instance, and it is a privileged creditor.

Does the gentleman agree that the U.S. Government is a privileged creditor under the Bankruptcy Act for taxes and that certain people are privileged creditors for wages, and that that is written into the law at the present time?

Mr. DODD. Mr. Chairman, the gentleman is missing the point.

The tax exemption applies to everyone. We are not saying that it only applies to businessmen, students, housewives, or blue-collar workers. The tax exemption applies to everyone.

The gentleman is making a distinction on the basis of the fact that someone is a student. That is a class distinction.

Mr. ERTEL. Mr. Chairman, I think the gentleman will agree that property taxes only apply to property holders.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. DODD) has again expired.

Mr. ERLENBORN. Mr. Chairman, I rise in support of the Ertel amendment.

Mr. Chairman, during the consideration in 1976 of the education amendments, I offered an amendment which was adopted and which was sustained in the conference, which, in section 312(a) of the education amendments, provided this prohibition against bankruptcies within 5 years after graduation for the purpose of discharging guaranteed student loans except in a case where there was real financial hardship.

Mr. Chairman, I have heard the arguments pro and con in the course of the years; and I would like to explain why I think these guaranteed student loans are different from ordinary loans and should be treated in this manner.

We hear the argument constantly that these students are being treated differently than the average person. The student is not like the average debtor. The average debtor has credit extended to him because he has assets. He pledges those assets plus his earning power to the payment of the debt.

The student does not have assets and would not, in the ordinary course of events, be able to obtain credit. Because of this and because of our interest in seeing that young people have an opportunity to obtain an education, we have made loans available to them by extending the credit of the United States to guarantee that this loan will be repaid.

The student on his part, not having assets to pledge, is pledging his future earning power. Having pledged that future earning power, if, shortly after graduation and before having an opportunity to get assets to repay the debt, he seeks to discharge that obligation, I say that is tantamount to fraud. It may not technically be fraud, but the student has pledged his future earning power for the

payment of a debt that has been guaranteed by the United States, and then, rather than using that earning power to discharge the debt, as he has promised, he seeks, through bankruptcy, to be discharged of the debt, thereby making the taxpayers pay it for him.

Mr. Chairman, fraud, if it were truly fraud under the Bankruptcy Act, would prohibit the discharge of that debt. I say that this is tantamount to fraud.

As to the number of these bankruptcies, here are the figures: In 1970, the total number was 326. In 1975, it was 3,801. That is better than a tenfold increase in that 6-year period.

Mr. Chairman, I say that it is a growing problem. It will continue to grow. The matter comes up in such vehicles as student newspapers. They carry advertisements. They say, "Don't be a sucker and repay your debt. Here is a number to call, and we will tell you how you can get out of it legally."

Mr. Chairman, the street-wise student who is avoiding his obligation and making the taxpayers pick up the tab for him is going to discredit this program. When the program is discredited, the students who are really in need are not going to be able to get the loans that they need.

I will be happy to yield to my colleague, the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Chairman, pursuing the matter now under consideration, I would ask the gentleman from Illinois (Mr. ERLENBORN) my colleague, if the gentleman can give us the actual figures that represent the tremendous increase from the period 5 years ago and what has been happening now? In other words, I am led to believe, as the gentleman said, that there has actually been a 10-fold increase in the number of students seeking to discharge their debts.

Mr. ERLENBORN. In reply to the inquiry of my colleague, the gentleman from Illinois (Mr. RAILSBACK) let me state that in 1970 the number was 326. In 1971 it rose to 740. In 1972 the figure was 1,183. In 1973 the figure rose to 2,426. In 1974 the figure was 2,834. In 1975, the last year for which I have the data available in this chart, the figure was 3,801.

That is better than a tenfold increase.

Mr. DODD. Mr. Chairman, if the gentleman will yield, I can recall very clearly the gentleman's amendment and that we put a provision in the legislation, as I am sure the gentleman will recall to delay it for a year in order to have a study made so as to determine how comprehensive this particular problem was. The figures have gone up, there is no question about it, in terms of the bankruptcies in this country, but they have not gone up spectacularly in the student loan area. As the gentleman from Illinois (Mr. ERLENBORN) well knows, we have seen a dramatic increase in bankruptcies all over the country.

Mr. ERLENBORN. If I might interrupt the gentleman from Connecticut (Mr. DODD), I might say that I do not have the figures here, but the figures that I have seen indicate that the student loan bankruptcies have gone up at a faster rate than they have in industry and private business.

Mr. DODD. The GAO report—and I do not suggest that this is something coming from "on high" but the GAO report also recites the number of bankruptcies or the increase in the student loan bankruptcies in comparison to the overall increase in bankruptcies across the country and shows that they have been relatively stable, and I am quoting, relatively stable. Therefore, there has been no extraordinary increase in bankruptcies involving student loans.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. ERLENBORN was allowed to proceed for 1 additional minute.)

Mr. ERLENBORN. Mr. Chairman, I do not intend to extend this debate and I will not ask for any additional time. Let me just conclude by saying that in 1976, for the purpose of avoiding a good deal of time and trouble in the debate, this issue was on the floor and there was an agreement that 312(a) would be in the law as I offered it and that I agreed to a 1 year delay to allow a study to be made. It was apparent at the time that I did not expect then and I do not expect now that we will reverse the decision we made. It was valid in 1976 and it remains valid now.

I hope that the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL) will be agreed to.

AMENDMENT OFFERED BY MR. CORNELL TO THE AMENDMENT OFFERED BY MR. ERTEL

Mr. CORNELL. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. CORNELL to the amendment offered by Mr. ERTEL: In the matter proposed to be inserted after line 19 on page 405 by the amendment offered by Mr. ERTEL—

(1) strike out "and" at the end of subparagraph (A); and

(2) redesignate subparagraph (B) as subparagraph (C) and insert the following new subparagraph immediately after subparagraph (A):

(B) the amount of allowed claims for loans of the type described in the preceding provisions of this paragraph constitutes at least 65 percent of the total amount of all claims which are allowed with respect to such debtor under section 502 of this title; and

Mr. CORNELL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. CORNELL. Mr. Chairman, I believe that we can all agree that the intent of the Ertel amendment is to prevent abuse of our student loan program by those who would use bankruptcy simply to avoid repayment of their student loans. My amendment attempts to identify such persons by prohibiting within the 5-year period discharge of debts if the student loan constitutes 65 percent or more of the person's indebtedness. Certainly we do not want to imply by action taken here that all those who resort to bankruptcy and happen to have a student loan are somehow trying to cheat the Government. In all fairness we must remove such a cloud.

Actually the number of cases that would be covered by my amendment would appear from the GAO report to be relatively small. Analysis of 541 cases showed the petitioners to have average total debts of $14,115, of which $4,138 were educational debts. Yet we do not want our action to be perceived as congressional sanction of the use of bankruptcy to discharge student loans.

Restricting those whose student loans constitute 65 percent or more of their total debts puts a sight on the Ertel shotgun and will achieve what I believe this House really wants to do—to eliminate abuse of our student loan program.

Mr. ERTEL. Mr. Chairman, will the gentleman yield?

Mr. CORNELL. I yield to the gentleman from Pennsylvania.

Mr. ERTEL. Mr. Chairman, by the gentleman's amendment, would it not be true that if an individual had about 66 percent of his debt in educational loans, the way to be able to be discharged would be to get more loans so that he would have 64 percent educational loans, by just getting more loans from a loan company and then be eligible for discharge?

Mr. CORNELL. There is always that possibility. I doubt if he would get a loan, however, if he had that amount of indebtedness.

Mr. ERTEL. To change that percentage for that amount, he could get somebody to lend him that amount of money, so we create an incentive for somebody to do something which would be worse.

Mr. CORNELL. Actually I do not think it is worse, because in the approach of the gentleman from Pennsylvania, all those are put under the cloud that they are attempting to avoid paying their student loans.

Mr. ERTEL. On the contrary, if he has a hardship he can go to the court and say: "I have a difficulty" and ask for discharge. Incidentally the prevention of the discharge is only for a 5-year period after the debt becomes due. It is only during that 5-year period when he is prevented. After the 5-year period, if he has not been able to accumulate assets, he can go into bankruptcy.

Mr. CORNELL. I think that gives an additional basis for supporting my amendment, because during that period of time is possibly when they would have the largest amount of student debt.

Mr. ERTEL. That is right. So he discharges his debts and then accumulate assets, and builds up a portfolio. By letting a person out of his debts immediately we do not even give a person a chance to earn enough to pay his debts. During the 5-year period he has an opportunity to accumulate assets, so he will not want to discharge himself in bankruptcy after the 5 years. It seems to me we are encouraging people to go

into bankruptcy more with this provision.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. CORNELL. I yield to the gentleman from Illinois.

Mr. ERLENBORN. Mr. Chairman, I would like to comment. First of all Members should be aware that nothing in the provision of law today or the Ertel amendment prohibits the discharge of the non-student loan debt.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

(On request of Mr. ERLENBORN, and by unanimous consent, Mr. CORNELL was allowed to proceed for 1 additional minute.)

Mr. ERLENBORN. Mr. Chairman, if the gentleman will yield further, I would further say this appears to be an attempt to define, by using percentage terms, what hardship is. I think it is much preferable with the present law and the Ertel amendment which will still allow a discharge of the student loan portion of the debt if there is real hardship, and allow the judge in bankruptcy, exercising his power in equity, to determine in each case what is truly hardship, rather than define it in these percentage terms.

Mr. CORNELL. My concern is that we put all of these who want to use bankruptcy under a cloud that they are trying to rip off the Government. We should have a provision like this, that a fair portion of the indebtedness appears to be for noneducational loans.

Mr. ERLENBORN. If the gentleman will yield further, it could actually work to the detriment of the student, because if his student portion exceeded 65 percent and he did truly have a hardship, the court may say, "The Congress has said it is hardship only if it is below 65 percent," so I think it is better to let the judge decide it.

Mr. CORNELL. We are not eliminating that provision, however, from the law.

Mr. MICHEL. Mr. Chairman, I rise in support of the amendment offered by the distinguished gentleman from Pennsylvania.

I have been disturbed, as many of you have, by reports in the media of an increasing number of defaults on student loans under the guaranteed student loan program. Now I understand that declarations of bankruptcy constitute only a small percentage of these defaults. But the number of bankruptcies is not so important as the principle involved. If we continue to allow the practice of student bankruptcies to continue we are, in effect, saying something to the students and the American people about our attitude toward an old-fashioned word—"responsibility." We are allowing the element of irresponsibility to gain an accepted place in our national life.

I understand that a prominent banker has testified that—

> It has yet to be demonstrated that the (student) bankruptcy losses are out of the ordinary.

If all that were at stake here was whether the losses are more or less than "ordinary," we could forget about the problem and simply hire a computer to get the answer but the problem we have to deal with here is one beyond the power of even the most sophisticated computer. It is a problem of the heart and the spirit. It is a problem of moral, not financial, dimensions. We are dealing with the age-old problem of individual responsibility. The number of bankruptcy cases is not at the heart of the matter. It is the attitude that such cases symbolize.

Suppose it is argued that antisocial acts are occurring at a rate "not out of the ordinary." Does that mean we suddenly declare that such acts are of no concern to society? No, we must deal with both the statistical facts and the moral question involved here.

We have here a question of individual responsibility. Try to gage the effect even a few declarations of bankruptcy must have on the vast majority of students who are trying their best to live up to high standards of responsibility. No wonder there is cynicism about Government among the young.

Restrictions on student bankruptcies is logical. Section 316 is one of those pieces of legislation which, on the surface, appears to be reasonable. After all, why not allow a student to declare bankruptcy? That makes it easier to everyone, does it not?

Well, in fact, it does not. It is time that Congress spoke up for the millions of students who have the decency to do what is right. Yes, I know that there are hardship cases in which bankruptcy is unavoidable. But these are exceptions and as I understand it the amendment offered by Mr. ERTEL allows these to occur.

Yes, this question concerns tax dollars. Yes, it concerns a Government program. But most of all it concerns a view of every individual as a responsible moral being. It is so easy to either ignore what is taking place or to allow it to continue for fear of not seeming compassionate. Well, this Nation has had enough of the fake compassion that says we must treat some members of our population as if they were not even expected to act responsibly That is wrong.

I say it is time we do what is right for all students and that means, in this case putting ourselves on the side of the majority of young men and women who want to do the right thing, even against great odds. The Ertel amendment does just that.

Mr. FORD of Michigan. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have to say that I am shocked to hear my friend, and I use that word advisedly, and long-time colleague on the committee, the gentleman from Illinois (Mr. ERLENBORN) say that when we considered this matter in the Higher Education Act in 1976 he agreed to the 1-year delay in the amendment to the Bankruptcy Act only as a matter of expediency. Since that was then the gentleman's motivation, he now feels he is not bound by any agreement beyond the matter of expediency. The fact is we were sidetracked by a point of order problem on the floor consideration of this amendment because of the relationship to the Bankruptcy Act of an amendment of this kind in an education bill. There was a gentleman's agreement that we would delay the effective date of the amendment to give the committee with proper jurisdiction over the matter of bankruptcy a year to study it.

The record will show we were told by the chairman of that committee it was their intention to have a bill such as this out sometime within the next year when the matter could be handled by people with more expertise in the field than we have.

The problem that we face with this, and I think the gentleman from Illinois may have characterized it well when he said the amount of money involved here is not as important as the attitudes that are involved. I have suspected that for a long time, because any dispassionate check you make of the phenomenon of bankruptcy with respect to student loans and defaults on student loans would indicate that on a dollar basis or percentage basis it represents an infinitesimally small part of the loss, if loss there be in these programs. If we assume we can operate programs to put large numbers of people through college without cost to the taxpayers and anyone can come up with that plan, our committee would be most interested in producing it immediately, because we will have found something better than a perpetual motion machine.

It is going to cost something to run any program. Let me take a look at what we are talking about. First of all, the rate of increase of these bankruptcies did not go up during the last year that bankruptcies were permitted to discharge student loans. As a matter of fact, a careful check of the records I have seen show that student loan bankruptcies have actually declined. They have not declined because of anything this or the previous administration did; they have declined because of the change in circumstances that is related to who had the student loans.

The figures we were debating in 1976, when this issue came to the floor, were based on the people who had used federally insured student loans. Prior to that time, they had gone some 4 or 5 or 6 years beyond college and ended up in default and bankruptcy. Who are we talking about? If Members bear with me and think about it, we did not have the grant programs that are now targeted toward low-income students in colleges and universities until 1973. The student population that made up the statistical base for Mr. ERLENBORN's attack in 1976 was the population made up overwhelmingly of the poorest of the poor kids going to colleges.

We shifted into gear in 1973 with other programs to take care of those people with direct grants, and they depend on loans much less than before. The loan programs have moved more and more toward being a middle-class student's way of staying in or getting into college.

As that group of people with greater expectation for success in getting a job after college replaced the people with the least expectation of success, the percentage of defaults has gone down. The real scandal in the whole student loan program is this: That until last year, there was never a really definitive policy in the U.S. Office of Education or Department of HEW to collect defaulted student loans. Let me ask all of you who are on the floor a question to think about for a minute. What would you tell a former student who walked into your office here or into your office back in your district, and said, "I have been in default for several years on my student loan because I did not have a job. Now I have a job, I want to get right with the world. Where do I go and who do I sit down with to catch up and straighten out my obligations?"

There is not one person in this room—I challenge him or her to stand up and tell me if you know—where to send that person to get right with the Federal Government. We can tell them where to go if they are in default on any other kind of loan, but the reason we cannot tell them is that there never was a mechanism.

When the Federal Government took over the paper, we did not even send a computer letter to the students telling them that now the paper belonged to the Government and the Government would expect payment. No effort was ever made to collect these loans, and as the gentleman from Connecticut indicated earlier, the problem has not been bankruptcy; it has been default, and the major problem with default is the absolutely criminal—criminal—negligence of the previous two administrations in letting year after year after year of these loans accumulate without one bit of effort on their part to make any attempt to recover the money that had been loaned out and then guaranteed by the Federal Government.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(By unanimous consent Mr. FORD of Michigan was allowed to proceed for 1 additional minute.)

Mr. FORD of Michigan. If any other federally guaranteed loan program had been handled in the miserable way HEW handled this program over its life, we would be screaming for the abolition of the department. Thank goodness, this administration is straightening that mess out.

Finally, Mr. Chairman, I would like to point out that the language in this bill repealing the moratorium on discharged student loans through bankruptcy is supported by the American Bankers Association, Consumer Bankers Association, National Bankruptcy Conference, National Conference of Bankruptcy Judges, National Student Lobby, and National Student Association.

I would like to insert in the RECORD at this point a letter from the Coalition of Independent College and University Students, National Student Association, and National Student Lobby which persuasively argues for retention of the committee's provision.

JANUARY 27, 1978.

To members of the U.S. House of Representatives.

From: Coalition of Independent College and University Students, National Student Association, National Student Lobby.

Subject: H.R. 8200, Student Bankruptcy provisions.

DEAR CONGRESSPERSON: The coalition of College Students and University Students, the National Student Association and the National Student Lobby asks for your support of the student Bankruptcy provisions of H.R. 8200. Specifically, we ask you not to support any amendment of the Judiciary Committee bill which would limit the rights of an individual to discharge student loans in a bankruptcy proceeding. We certainly do not endorse fraud or abuse of the loan programs. However, we would like to present the following points in regard to our common position.

First, the Subcommittee on Civil and Constitutional Rights conducted extensive hearings and concluded that student bankruptcies, while a concern, are not out of line with other classes of individual bankruptcy claims. In fact, both bankers and judges have testified in favor of the Subcommittee bill. Mr. Walter W. Vaughan of the American Banker's Association and Consumer Banker's Association Task Forces on Bankruptcy testified, "While there is substantial concern with the abnormally high delinquency and loss rate on student loans, it has yet to be demonstrated that the bankruptcy losses are out of the ordinary."

Mr. Clive Bare, a bankruptcy judge for the Eastern district of Tennessee representing the National Bankruptcy Conference stated, "There is no doubt but that the educational loan program is in difficulty, but from the information available to the Conference, it appears to be primarily the program itself and the manner in which it has been administered that is causing the difficulty and not that of bankruptcy abuses. Further, there is no conclusive data that the number of students petitioning for bankruptcy poses any threat to the continuance of the educational loan program." It appears that those in a position to know, both commercial bankers and judges, agree that the problem of student bankruptcy lies not in bankruptcy law, but in program administration.

Second, opponents of the bill presented statistics which suggest that bankruptcies are rising at an alarming rate. Yet the statistics are only half the story. For example, it is stated that the percentage of increase in student bankruptcies in the state of California rose by 38% from 1971 to 1972—a large percentage to be sure. However if one consults the specific data, one will observe that the percentage figures represent only a rise from 210 to 290 bankruptcies in that year. In another case, we are told that in Pennsylvania there was a 225% increase over one year in students declaring bankruptcy. Again, if one goes to the real data, the increase that year was from 4 to 13 bankruptcies. Clearly, percentages can be misleading. When one considers the real numbers, the bankruptcy problem is placed in perspective.

Third, bankruptcy is portrayed as an easy and painless procedure. This is not true. Bankruptcy is a serious business step. While an individual bankruptcy is less stigmatized now than in the past, it is still a serious admission of financial failure. Subsequent difficulties in obtaining future credit or loans is severe and puts the petitioner at a disadvantage in our consumer society.

Fourth, the GAO in its study of the bankruptcy problem found the following facts: 1. In this study the average earnings for the year prior to filing for bankruptcy was $6,378. That amount of income cannot be considered excessive. 2. Average total debts were $14,115, of which an average of only $4,138 were educational loans. 3. Only 8% of the study group listed educational loans as their indebtedness. These figures from the GAO indicate cause for concern, but demonstrate minimal abuse.

Fifth, the magnitude of the bankruptcy problem, while worrisome, is not as great as critics assert. In reality, fewer than two tenths of one percent (0.19) of the nearly 8 million loans made under this program have been discharged in bankruptcy. The costs of these discharges has been less than three tenths of one percent (2.26) of the nearly $8 billion which have been channeled through the program. While we do not wish to minimize either the personal tragedy or the loss to the guarantors represented by these figures, we believe the program has worked with minimal abuses concerning the bankruptcy allowances.

Sixth, both former Chairman James O'Hara and current Chairman William D. Ford of the House Postsecondary Education Subcommittee are in support of the Judiciary Committee bill. Mr. Ford in a letter to Chairman Edwards of the Civil and Constitutional Rights Subcommittee stated, "I have seen no evidence which convinces me of the need for a remedy as discriminatory and inappropriate as section 439A of the Higher Education Act. I do not believe that bankruptcies involving student loans are increasing at such a rate as to require a provision this drastic, nor am I convinced that young debtors are declaring bankruptcy for the main purpose of 'ripping off' the government by not paying back their student loans."

Seventh, bankruptcy and default are often confused and taken to mean the same action. Defaults on student loans can be reduced and the Department of Health, Education and Welfare is now more aggressively pursuing individuals who default. In fact, on October 27th, the House Postsecondary Subcommittee held an oversight hearing on student loan defaults with Office of Education Officials testifying on their efforts to reduce the default rate. So, while students should have the option to legitimately declare bankruptcy, defaults should be vigorously pursued.

The national student organizations urge you to vote in favor of the Committee bill, H.R. 8200. We ask that you oppose on the floor any amendments concerning student bankruptcy to strike the committee provisions. The Committee has worked hard and studied the problem extensively and we agree with their position. For more information contact: COPUS—659-1747; NSA—332-8428; NSL—234-5574.

Mr. BUTLER. Mr. Chairman, I move to strike the last word, and I rise to speak in opposition to the amendment.

Mr. ERLENBORN. Mr. Chairman, will the gentleman yield?

Mr. BUTLER. I yield.

Mr. ERLENBORN. I thank the gentleman for yielding to me. He is so kind, because the prior speaker, after referring to me in debate, did refuse to yield.

Just to set the record straight, the gentleman from Michigan has informed the committee that the amendment in the 1976 act was an amendment to the Bankruptcy Act, was subject to a point of order, and he did not offer that point of order because of an agreement he had with me. I want the committee to know that section 312(a) was in order, and was an amendment to the Higher Education Act, not to the Bankruptcy Act.

There was no agreement between us, other than if he did not move to strike that germane amendment, I would agree to a 1-year-delay. I wanted the record to be straight.

Mr. BUTLER. I thank the gentleman for setting the record straight.

Mr. Chairman, I will not take my full 5 minutes, but I would like to share with the Members the thoughts of those of us who are on the subcommittee and on the committee which dealt with this problem. I remind the Members that they are being asked to reverse a matter which was decided by the full committee by a vote of 23 to 4 and by the subcommittee unanimously.

What we have before us is a policy decision on which reasonable minds may differ basically about how to deal with students who default in federally guaranteed loans. It is a basic policy decision. But keep in mind that if this amendment passes, if the Ertel amendment passes, this will be the only provision in the bankruptcy law excepting from the bankruptcy act a particular kind of voluntarily incurred debt for discharge. It is a bad policy to single out the student borrower for this sort of treatment. It is basically bad policy. It is foreign to the theory and the substance of the bankruptcy law. Bear in mind that, after this, trash off of the street can walk into your office and tell you about a life in which he has wasted his substance on riotous living and all he has to show for it are debts, debts, debts. He borrowed from a little old lady, he borrowed from this one, he borrowed from that one. But he can get his debt discharged, provided it is not a student loan, provided it is not an educational loan. It is just wrong. It is just wrong to single out the student for this kind of treatment. Bear in mind the time of life we are talking about. Here is a man whom we have told to get an education. That is the key to life in this world, that is the key to a meaningful life. So he has worked his hardest to get an education, he borrowed the money, he did the best he could to get through and get an education, and then he graduates and faces the world and he finds out that he has been misled, that that is not really the answer, that jobs are hard to get, he cannot get a job. If his health fails him, his substance is wiped out, and here he is, faced with this tremendous debt. He cannot get a job, he cannot get started in life so that he can at least restore his credit and try again. What we do in the bankruptcy law is to give him a fresh start. But we are going to single out the student, and deny him the benefits of the Bankruptcy Act—the guy who has really tried to get a good start in life in the traditional American way under adverse circumstances.

It is wrong to pass the Ertel amendment and I urge the Members to reject it.

Mr. EDWARDS of California. Mr. Chairman, I ask unanimous consent that all debate on the Ertel amendment and all amendments thereto close in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was agreed to will be recognized for 50 seconds each.

The Chair recognizes the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Chairman, the subcommittee and the full committee voted on this amendment offered by the gentleman from Pennsylvania (Mr. ERTEL) and soundly defeated it. I urge the defeat of both amendments.

Mr. Chairman, I want to associate myself with the remarks of the gentleman from Virginia (Mr. BUTLER), and I urge a "no" vote on both amendments.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. ERTEL).

Mr. ERTEL. Mr. Chairman, I rise to urge defeat of the Cornell amendment and the adoption of my amendment.

I would point out that the amendment as proposed only delays the ability to be discharged for a period of 5 years and allows that person to be discharged if he shows severe hardship.

This is not directed at a class of people. It is similar to support for a child or former spouse, and that concept has been accepted under a bill proposed by this House. We are trying to protect future students, to make their loans viable, and to give them an opportunity to get an education.

Mr. Chairman, that is the purpose of my amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut (Mr. DODD).

Mr. DODD. Mr. Chairman, I would just repeat again for those Members who did not hear the initial arguments concerning both of these amendments that we are talking about a problem involving defaults.

All the statistical information we have—and there is not enough of it, unfortunately—points to a problem involving defaults, not bankruptcies. No matter how we vote on these two amendments today, we are not going to affect the situation one iota.

I cannot stress enough for my colleagues in the Chamber today the fact that no person I have ever met is overly anxious to run to bankruptcy court. That is not an attractive alternative for people.

So, Mr. Chairman, we are not going to be dealing with the default situation by amending the Bankruptcy Act today. Therefore, I urge the defeat of both amendments.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. ERLENBORN).

Mr. ERLENBORN. Mr. Chairman, my colleague, the gentleman from Virginia, (Mr. BUTLER) made a very persuasive argument, except that I think we should recall that, if there is true hardship, the loan can be discharged. So the hardship case he has described is already provided for in the law.

I think we should remember that these are people who have graduated from school and who have pledged their initial earnings and who are now reneging on their pledge. If they have a true hardship condition, their loan can be discharged.

Those who are interested in this bill, Students for United Aid, the State Financial Aid Offices, and the Secretary of HEW who administers the program, all recommend that the Ertel amendment be adopted.

Mr. Chairman, I urge the Members' support for the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois (Mr. RAILSBACK).

Mr. McCLORY. Mr. Chairman, will the gentleman yield?

Mr. RAILSBACK. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Chairman, I rise in opposition to the Ertel amendment which would, as I understand it, exempt student loans from discharge in bankruptcy.

Our hearings were extensive on this subject and among our witnesses were representatives from major loan companies, specifically Beneficial Finance and Household Finance. They indicated to us, during testimony given on December 8, 1975, and December 15, 1975, respectively, that the percentage of their losses discharged in bankruptcy and attributable to students loans is miniscule to be precise, Beneficial Finance testified that it lost, in the preceding fiscal year, 1974, $10.9 million due to bankruptcy claims. This contrasts with their outstanding loans of $1.3 billion loans discharged in bankruptcy, therefore were 0.8 percent of total loans. Student loans are a fraction of that percentage—infinitesimal.

Similarly, Household Finance reported total loans of $2 billion compared with losses in bankruptcy of $13 million, or 0.65 percent. Student loans again were a fraction of the $13 million.

Such statistics do not support the need to single out students from participation in the bankruptcy process. I believe the Ertel amendment is bad policy and I urge you to vote "no."

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin (Mr. STEIGER).

Mr. STEIGER. Mr. Chairman, I have listened to this debate, and I am impressed with the very persuasive arguments on both sides. However, I am going to come down on the side of my colleague, the gentleman from Virginia (Mr. BUTLER).

I will simply take these few seconds to indicate that perhaps we are all missing the point. The reason we are in the position we find ourselves in is because the nature of the student loan program since its inception has not in my view been dealt with well at all. What we have

to look at and what I hope my colleague, the gentleman from Michigan (Mr. FORD), will look at and do is this: that he will have us examine more carefully something that I have introduced, income contingent repayment, or some other option of that character, something that does not force people to start paying back the loans at the rate at which they have to pay them back without regard to what their income is.

Mr. Chairman, that is the point I hope we will make at some time in the near future.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. CORNELL) to the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The question was taken; and on a division (demanded by Mr. DODD) there were—ayes 21, noes 34.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 54, noes 26.

Mr. ERTEL. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was agreed to.

Mr. BUTLER. Mr. Chairman, I move to strike the last word.

STATUS OF DEBTOR'S ATTORNEY

Mr. Chairman, a question has been raised concerning the capacity of a debtor-in-possession in a case under chapter 11 to retain an attorney who worked for the debtor before the case was filed.

On its face, section 1107 appears to subject a debtor-in-possession to the provisions of section 327(a) which require an attorney to be a "disinterested person" as defined in section 101(13). This would appear to preclude an attorney for the debtor from serving as an attorney for the debtor-in-possession. This is not the intent.

Section 330, treating with compensation of officers, clearly distinguishes the debtor's attorney from other professional persons employed under section 327. The disqualifying language of section 328(c) should not apply to deny compensation to an attorney for the debtor-in-possession solely because of his prior service as attorney for the debtor. That is simply not the kind of direct or indirect relationship intended to abrogate the standard of disinterestedness under section 101(13)(E).

AMENDMENT OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PANETTA: Page 583, strike out lines 3 through 5 and insert in lieu thereof the following: "(a)), is amended by inserting ", unless the Secretary finds upon examination of the circumstances of such bankruptcy, which he shall examine if requested to do so by said licensee, that such circumstances do not warrant such termination" immediately after "bankrupt".".

Mr. PANETTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Virginia.

Mr. BUTLER. Mr. Chairman, I would like to say on behalf of our side that we are familiar with the amendment, have considered it carefully, and have no objection to it.

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from California.

Mr. DANIELSON. Mr. Chairman, would the gentleman from California (Mr. PANETTA) briefly tell us what the amendment is about?

Mr. PANETTA. I shall be pleased to, Mr. Chairman.

Mr. Chairman, I offer this amendment on behalf of myself and my distinguished colleague, from California, the Honorable Mr. SISK.

My amendment is a clarifying amendment in line with the amendment previously introduced by the gentleman from Washington and distinguished chairman of the Committee on Agriculture, Mr. FOLEY and adopted by the committee. It seeks to preserve the effectiveness of the Perishable Agricultural Commodities Act (PACA) by retaining the protective sanctions the Secretary of Agriculture has over licensees and applicants who file or were discharged in bankruptcy. As I understand it, the Department of Agriculture, via a letter from Deputy Secretary of Agriculture John White, supports this amendment.

The Perishable Agricultural Commodities Act has been the mainstay of the agricultural industry, particularly as it relates to fresh fruits and vegetables. By the very nature of these products, rapid harvesting, packing and distribution are essential. Contracts are made and products are picked and delivered on the basis of a person's word, before a written confirmation is delivered to the parties. Trust and high ethical standards are essential to this kind of marketing. It is imperative that the law protect against the possibility of unethical persons taking advantage of these conditions to engage in unfair and fraudulent practices.

The Perishable Agricultural Commodities Act prohibits these unfair trade practices. Under this act, the Secretary of Agriculture has the power to revoke, suspend, or deny a license to a bankrupt buyer of fresh fruits and vegetables unless certain conditions are met. To do any less would place the shipper of perishable fruits and vegetables under jeopardy and at the mercy of less than honorable buyers.

Section 303 of the present bill, however, would significantly reduce the effectiveness of the Perishable Agricultural Commodities Act by removing the protective sanctions the Secretary of Agriculture has over licensees and applicants who file or were discharged in bankruptcy. Section 303 specifically would preclude questioning the fitness of an applicant for a new license after his license was terminated as a result of a discharge in bankruptcy. It would also eliminate the present requirement that a license applicant who has been adjudicated or discharged in bankruptcy, post a bond in a satisfactory amount to insure financial responsibility.

While I can sympathize with the motives behind these sections as they apply to other bankrupts, in this particular area, chaos could result. It would create the situation where a sloppy, marginal, or dishonest operator could "make the rounds" of suppliers and in effect abuse the process and perhaps severely penalize successful producers and farmers.

My amendment would restore the discretion of the Secretary to examine the circumstances of the bankruptcy and make a finding, where appropriate, that the license should not terminate on discharge. The amendment would give the bankrupt the opportunity for the same consideration under his individual circumstances as is presently contemplated in section 303(b) of H.R. 8200.

Putting these provisions into effect will help the farmer overcome some of the unwarranted risk and at the same time give bankrupts who have been victims of catastrophies a chance to get back on their feet.

I urge adoption of the amendment.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Chairman, I wish to thank the gentleman from California for offering this amendment. In attempting to strike a balance between the bankruptcy laws and laws designed to provide protection for farmers and cattlemen, we may have leaned too far in the bankruptcy direction. I believe that this amendment strikes a proper balance, and I am happy to support it. It will insure that those who sell produce and cattle will receive payment for their goods, while permitting those who buy those goods but have run into financial difficulty and bankruptcy through forces beyond their control to get a fresh start and return to business. The Secretary of Agriculture will be able to prevent the unscrupulous trader from returning to business, however.

This amendment has the support of the Department of Agriculture, the Agriculture Committee of the House, and of the Judiciary Committee, and I recommend its adoption.

I yield to the gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. I agree with the gentleman from California, the chairman of the subcommittee, and I wish to echo his remarks. I think that this amendment strikes a good balance. It is fair to the farmers and it is fair to agricultural

traders. I support the amendment and also recommend its approval.

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Washington.

Mr. McCORMACK. Mr. Chairman, do I understand the gentleman to say that the gentleman from Washington (Mr. FOLEY), the chairman of the Committee on Agriculture, supports this amendment?

Mr. PANETTA. That is correct. Also, the Department of Agriculture supports this amendment.

Mr. McCORMACK. Mr. Chairman, I thank the gentleman very much.

Mr. PANETTA. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PANETTA).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. M'KINNEY

Mr. McKINNEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McKINNEY: Page 588, line 23, strike out "by striking out" and all that follows through line 3 on page 589, and insert in lieu thereof the following: to read as follows:

"(1) Cases under title 11 of the United States Code or under the Bankruptcy Act that, from the date of entry of the order for relief or the date of adjudication, as the case may be, antedate the report by more than seven years.".

Mr. McKINNEY. Mr. Chairman, the declaration of bankruptcy was intended by Congress, acting pursuant to a direct constitutional mandate to "establish * * * uniform laws on the subject of bankruptcies", to provide relief and a fresh start to insolvent debtors. Endorsing the accepted view that such relief was meant to be available to individuals as well as insolvent businesses, former Chief Justice Earl Warren described bankruptcy as "a compassionate law intended to give a man an opportunity to rehabilitate himself, get back into business, into the mainstream of economic life, and contribute his part to the future."

Section 605(a)(1) of the Fair Credit Reporting Act, in my view, is not in keeping with this rehabilitative philosophy, and therefore, I propose to amend it so as to conform that law's practice to its spirit. At present the credit reporting statute permits credit agencies to maintain records of reported bankruptcies for up to 14 years. Yet an exhaustive search of the legislative history of this provision has disclosed no compelling reason for the statute's unforgivingly lengthy memory.

The amendment I offer today would shorten this period to 7 years in order to better aid those people who must now file bankruptcy. Since the bankruptcy statute forbids a second declaration of insolvency within 6 years of the first, this provision would still afford the protection lenders need to make credit decisions while removing the unnecessary black mark from the debtor's record.

Mr. Berkeley Wright, Chief of the Division of Bankruptcy of the Administrative Office of the U.S. Courts, has informed me that 90 percent of all bankruptcies today are consumer default cases. He offered this profile of the average bankrupt: 30 to 40 years of age, an average salary of $80 to $150 per week, a median education through the 10th grade, employed in manufacturing and generally owes between $1,000 and $4,000. This is the person bankruptcy was designed to aid, not harm. The extended reporting of a bankruptcy denies this person the opportunity to obtain needed credit for such items as housing, transportation, and clothing. Bankruptcy can even deny a parent access to loans for his/her children's education long after the financial difficulty which lead to the declaration has become nothing more than a bad memory.

I think a historical perspective helps to demonstrate the unnecessarily cruel burden imposed by this 14-year reporting provision. Since World War II the use of consumer credit has grown enormously. So much so that our entire society seems based upon the availability and use of credit cards. Just as the use of consumer credit has increased, so too has the number of consumer bankruptcies. According to the Congressional Research Service, for the 12-month period ending in June 1977, over 182,000 such cases have been filed. Obviously, it serves no good purpose to keep so many outside of the economic system for so long on the basis of one financial problem.

More recent history prompted this amendment. Often consumers are able to keep up with their obligations under normal circumstances but may have saved very little for unexpected financial demands, such as those which are produced by inflation and recession. When a family member is taken seriously ill, medical expenses can drain all available resources. With the family breadwinner laid off, a similar financial crisis ensues. To meet this emergency, the family will be forced more deeply into debt to the point where bankruptcy is their only option. Once insolvency is declared and the emergency passes, financial health may be restored but the record remains for 14 years.

In 1934, Mr. Justice Sutherland stated that bankruptcy gives to "the unfortunate debtor, * * * a new opportunity in life and a clear field for future effort, unhampered by the pressure and discouragement of pre-existing debt." It is in the spirit of Justice Sutherland's statement that I urge my colleagues to consider and support this amendment. To retain this excessive penalty would continue to undermine the beneficial effects of the bankruptcy laws, and would pervert rather than facilitate a fresh start for once unfortunate, but now solvent debtors. Thank you.

Mr. EDWARDS of California. Mr. Chairman, will the gentleman yield?

Mr. McKINNEY. I am happy to yield to the gentleman from California (Mr. EDWARDS).

Mr. EDWARDS of California. Mr. Chairman, I rise in support of the amendment.

This was an area that the subcommittee considered during our long work on the revision of the bankruptcy laws, but we felt that a change such as proposed by the amendment was properly proposed by the Banking Committee. That is why I am pleased that the distinguished gentleman from Connecticut, who is a member of the Banking Committee is offering this amendment.

The amendment will contribute to the fresh start which bankruptcy promises for the poor, overburdened debtor. Once an individual has gone through bankruptcy, it should not hound him for the rest of his life. He is entitled to get back on his feet again, and become a productive member of society. This amendment will contribute to that goal by reducing the time that the fact of a bankruptcy can be carried on a credit report. It is a good amendment, and should be added to the bill.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of California. I yield to my colleague, the gentleman from Virginia (Mr. BUTLER).

Mr. BUTLER. Mr. Chairman, I support the amendment offered by the gentleman from Connecticut. The Fair Credit Reporting Act permits credit reporting services or agencies to carry the fact of an individual's bankruptcy on their records and to report it to creditors that request credit-worthiness information for up to 14 years after the bankruptcy. The purpose of the provision was to keep the record open long enough so that creditors could determine whether the individual involved had filed more than one bankruptcy. A shorter period would not have permitted this determination, because an individual can receive a bankruptcy discharge only once every 6 years.

However, the provision has not worked as intended: Creditors are using the fact of a single bankruptcy as the sole grounds for denying credit. Individuals who have filed bankruptcy are not more likely to repeat than others. In fact, repeaters are rare. Thus, the fact of a bankruptcy is not a rational basis on which to deny credit, and permitting it to be carried on the record for so long has severely hampered the fresh start of many debtors.

Shortening the period to 7 years will bring this provision in line with the time period for other matters that credit agencies may report. It will unquestionably further the purposes of H.R. 8200, and I urge the adoption of the amendment.

Mr. McKINNEY. Mr. Chairman, I thank both the gentleman from California (Mr. EDWARDS) and the gentleman from Virginia (Mr. BUTLER) for their kind remarks.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. McKINNEY).

The amendment was agreed to.

Mr. UDALL. Mr. Chairman, last October when H.R. 8200 was being considered, I voted with the majority in sup-

port of the Danielson-Railsback amendment. Since then I have had occasion to question the wisdom of that vote and am therefore pleased to have another opportunity to vote on the amendment.

It is obvious that Representatives DANIELSON and RAILSBACK made extremely persuasive arguments in favor of their proposal, mostly dealing with the supposed cost-saving nature of retaining the current system of bankruptcy judges operating under the jurisdiction of U.S. district courts.

Fortunately, the Subcommittee on Civil and Constitutional Rights held additional hearings which shed considerable light on numerous questions raised about the impact of the legislation. The hearings pointed up some of the deficiencies of the amendment which were not made clear during earlier debate. The major point, I believe, is that the bill as reported by the Judiciary Committee would in the long run be less expensive and more efficient than the system provided by the amendment. Maintaining the current system and eliminating new provisions for staff to assist bankruptcy judges would actually increase the workload for those judges and necessitate the appointment of many more judges to handle the extremely heavy caseload. It would largely destroy the effect of reforms established by H.R. 8200 to the detriment of the entire system.

In light of all this, I now believe that the committee bill provides the best approach, as it was crafted after many years of hearings, studies, and recommendations from all segments of the legal and banking professions. Since last October I have received communications from constituents who have extensive experience in bankruptcy law and whose judgment I trust. These individuals included others beside bankruptcy judges. Unanimously they favored enactment of H.R. 8200 without amendment.

Therefore, today I intend to vote against the Danielson-Railsback amendment and for the committee bill.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumer the chair, Mr. SIMON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 8200) to establish a uniform law on the subject of bankruptcies, pursuant to House Resolution 826, he reported the bill back to the House with an amendment adopted in the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute?

Mr. EDWARDS of California. Mr. Speaker, I demand a separate vote on the so-called Danielson-Railsback amendment adopted in the Committee of the Whole on October 28.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Clerk will report the amendment on which a separate vote is demanded.

The Clerk read as follows:

Page 309, immediately after line 18, insert the following new paragraph and redesignate the subsequent paragraphs accordingly:

(4) "bankruptcy court" means United States district court for each judicial district;

Page 339, line 2, strike out "536(b)" and insert in lieu thereof "906(b)".

Page 434, line 9, strike out "586(a)(1)" and insert in lieu thereof "906(a)(1)".

Page 437, line 2, strike out "586(a)(1)" and insert in lieu thereof "906(a)(1)".

Page 581, line 25, strike out "586(b)" and insert in lieu thereof "906(b)".

Page 532, line 15, strike out "586(b)" and insert in lieu thereof "906(b)".

Page 545, strike out line 3 and all that follows through line 16 on page 581, and insert in lieu thereof the following:

"TITLE II—AMENDMENTS TO TITLE 28 OF THE UNITED STATES CODE AND TO THE FEDERAL RULES OF EVIDENCE

SEC. 201. (a) Sections 455(a) and 455(c) of title 28 of the United States Code are each amended by striking out "referee in bankruptcy" each place it appears and inserting in lieu thereof "bankruptcy judge".

(b) The heading for section 455 of title 28 of the United States Code is amended by striking out "referee in bankruptcy" and inserting in lieu thereof "bankruptcy judge".

(c) The item relating to section 455 in the table of sections of chapter 21 of title 28 of the United States Code is amended by striking out "referee in bankruptcy" and inserting in lieu thereof "bankruptcy judge".

SEC. 202. (a) The heading for section 460 of title 28 of the United States Code is amended by striking out "Alaska.".

(b) The item relating to section 460 in the table of sections of chapter 21 of title 28 of the United States Code is amended by striking out "Alaska,".

SEC. 203. Section 526(a)(2) of title 28 of the United States Code is amended—

(1) by striking out "referees" and inserting in lieu thereof "bankruptcy judges";

(2) by striking out "and receives in bankruptcy" and inserting in lieu thereof "in cases under title 11"; and

(3) by striking out "United Sttaes commissioners" and inserting in lieu thereof "magistrates".

SEC. 204. Section 571(b) of title 28 of the United States Code is amended by inserting immediately after "judges" the following: "bankruptcy judges, United States trustees and their assistants, staff, and other employees.".

SEC. 205. Section 604(a) of title 28 of the United States Code is amended—

(1) by redesignating paragraph (13) as paragraph (14); and

(2) by inserting immediately after paragraph (12) the following:

"(13) Lay before Congress annually statistical tables that will accurately reflect the bankruptcy business transacted by the several district courts, and all pertinent data with respect to bankruptcy matters relating to such courts;".

SEC. 206. Section 620(b)(3) of title 28 of the United States Code is amended by striking out "referees.".

SEC. 207. Section 621(b)(1) of title 28 of the United States Code is amended by striking out ": *Provided, however*" and all that follows through "a member" and inserting in lieu thereof: "A member".

SEC. 208. Chapter 42 of title 28 of the United States Code is amended—

(1) by striking out section 629; and

(2) by striking out the item relating to section 629 in the table of sections.

SEC. 209. Section 631(c) of title 28 of the United States Code is amended—

(1) by striking out "of the conference, a part-time referee in bankruptcy or" and inserting in lieu thereof "of the conference,"; and

(2) by striking out "magistrate and part-time referee in bankruptcy," and inserting in lieu thereof "magistrate and".

SEC. 210. Section 634(a) of title 28 of the United States Code is amended by striking out "for full-time and part-time United States magistrates not to exceed the rates now or hereafter provided for full-time and part-time referees in bankruptcy, respectively, referred to in section 40a of the Bankruptcy Act (11 U.S.C. 68(a)), as amended" and inserting in lieu thereof "not to exceed $48,500 per annum, subject to adjustment in accordance with section 225 of the Federal Salary Act of 1967 and section 461 of this title".

SEC. 211. (a) Title 28 of the United States Code is amended by inserting immediately after chapter 49 thereof the following:

"Chapter 50—BANKRUPTCY JUDGES

"Sec.
"771. Creation; appointment; tenure.
"772. Qualification; removal.
"773. Oath of office; compensation; benefits; expenses.
"774. Number and locations.
"775. Vacancies; temporary assignments.
"776. Powers.
"777. Duties.
"778. Training.
"779. Dockets.

"§ 771. Creation; appointment; tenure

"(a) There is created in each judicial district the office of bankruptcy judge.

"(b) The judicial council of each circuit shall appoint bankruptcy judges to serve in each district court of the circuit, including territorial district courts, in such numbers and at such locations within each district as the Judicial Conference of the United States may determine pursuant to this chapter. The appointment, whether an original appointment or a reappointment, shall be by the concurrence of a majority of all the judges of the judicial council of the circuit. Whenever there is no such concurrence, appointment shall be by the chief judge of the circuit. In making appointments under this subsection, the judicial council of the circuit may consider any recommendations of the district courts within the circuit, the organized bar within the circuit, and any association or committee for merit selection of judicial officers then in existence in the circuit.

"(c) Each bankruptcy judge shall be appointed for a term of 15 years. An individual appointed as a bankruptcy judge may not serve under this chapter after having attained the age of 70 years, except that, upon the unanimous vote of all the judges of the judicial council of the circuit, a bankruptcy judge who has attained the age of 70 years may continue to serve for the remainder of his term, or for such portion thereof as such judicial council considers appropriate, and may be reappointed under this chapter. Upon the expiration of his term of office, a bankruptcy judge shall continue to perform the duties of the office until a successor is appointed and qualified.

"§ 772. Qualifications; removal

"(a) No individual may be appointed or reappointed to serve as a bankruptcy judge unless such individual—

"(1) has been a member of the bar for at least five years and is currently a member in good standing of the bar of the highest court of the State in which he is to serve, or, in the case of an individual appointed to serve—

"(A) in the District of Columbia, a member in good standing of the bar of the United States District Court for the District of Columbia;

"(B) in the Commonwealth of Puerto Rico, a member in good standing of the bar of the Supreme Court of Puerto Rico, and in territorial district courts, a member in good standing of the bar of the district court of the territory; or

"(C) in two or more districts extending into two or more States, a member in good standing of the bar of the highest court of one of such States:

"(2) is determined by the judicial council of the circuit to be competent to perform the duties of the office;

"(3) is not related by blood or marriage to a judge of the court or appeals of the circuit, or to a judge of the district court in which he is appointed to serve;

"(4) is not holding any office of profit or emolument under the laws of the United States or any State or political subdivision thereof, except that nothing in this paragraph shall be construed to prohibit the appointment of an individual acting as referee in bankruptcy under the Bankruptcy Act nor to prohibit the appointment of any retired officer or retired enlisted personnel of the Regular and Reserve components of the Army, Navy, Marine Corps, and Coast Guard, or member of the National Guard of the United States or of the National Guard of a State, territory, or the District of Columbia, except National Guard disbursing officers who are on a full-time salary basis, and

"(5) is a resident of, and has an office within, the judicial district of the district court or one of the district courts under which such individual is to hold appointment, except that—

"(A) whenever a bankruptcy judge is temporarily transferred or permanently appointed to another judicial district, residence or office in such other district shall not be required for eligibility; and

"(B) bankruptcy judges serving the District of Columbia shall reside in the District of Columbia or within 20 miles thereof.

"(b) Removal of a bankruptcy judge during the term for which he is appointed shall be only for incompetency, misconduct, neglect of duty, or physical or mental disability. Removal shall be by the judicial council of the circuit in which the bankruptcy judge serves, but shall not occur unless a majority of all the judges of such judicial council concur in the order of removal. Any cause for removal of any bankruptcy judge coming to the knowledge of the Director of the Administrative Office of the United States Courts shall be reported by him to the chief judge of the circuit in which such bankruptcy judge serves, and a copy of the report shall at the same time be transmitted to the judicial council of the circuit, to the judges of the district court concerned, and to such bankruptcy judge. Before any order of removal may be entered with respect to a bankruptcy judge, a full specification of the charges shall be furnished to such bankruptcy judge, and he shall be accorded an opportunity to be heard on such charges.

"§ 773. Oath of office; compensation; benefits

"(a) Each individual appointed as a bankruptcy judge under this chapter shall, before performing the duties of his office, take the same oath as that prescribed for judges of the district courts of the United States. The appointment of a bankruptcy judge shall be entered of record in the appropriate district court, and notice of such appointment shall be given to the Director of the Administrative Office of the United States Courts by the clerk of such court.

"(b) Each bankruptcy judge shall receive as full compensation for his services a salary of $48,500 per annum, subject to adjustment in accordance with section 225 of the Federal Salary Act of 1967 and section 461 of this title.

"(c) All bankruptcy judges, and all clerical and secretarial assistants employed in the office of a bankruptcy judge, shall be deemed to be officers and employees in the judicial branch of the United States Government within the meaning of subchapter III of chapter 83 of title 5 (relating to civil service retirement), chapter 87 of such title (relating to Federal employee's group life insurance, and chapter 89 of such title (relating to Federal employee's health benefits program).

"(d) A bankruptcy judge serving under this chapter shall be allowed actual and necessary expenses incurred in the performance of his duties, including compensation for necessary secretarial and other necessary supporting personnel. Such expenses and compensation shall be determined and paid by the Director of the Administrative Office, under such regulations as he shall prescribe with the approval of the judicial Conference. The Administrator of General Services shall provide bankruptcy judges with necessary courtrooms, office space, furniture, and facilities in buildings owned or occupied by departments and agencies of the United States. If suitable courtroom and office space is not available in such buildings, the Administrator of General Services, at the request of the Director of the Administrative Office, shall procure and pay for suitable courtrooms, office space, furniture, and facilities in other buildings, but only if such request has been approved as necessary by the judicial council of the appropriate circuit.

"§ 774. Number and locations

"(a) The Director of the Administrative Office of the United States Courts shall make continuing studies and surveys of conditions in the judicial districts to determine the number of bankruptcy judges needed for the expeditious and effective administration of justice and the locations at which such bankruptcy judges should serve.

"(b) In conducting any survey under subsection (a) of this section, the Director of the Administrative Office shall take into account local conditions in each judicial district, including the areas and the population to be served, the transportation and communications facilities available, the numbers and types of bankruptcy cases filed, and any other material factor. The Director of the Administrative Office shall give consideration to suggestions from any interested party.

"(c) Upon completion of the surveys conducted under subsection (a) of this section, the Director of the Administrative Office shall report his recommendations concerning the number of bankruptcy judges needed and their suggested locations to the district courts, the judicial councils of the circuits, and the Judicial Conference of the United States. The district courts shall advise the judicial councils of their respective circuits, stating their recommendations and the reasons therefor. The judicial council of each circuit shall advise the Judicial Conference, stating its recommendations and the reasons therefor, and shall also report to the Judicial Conference the recommendations of the district courts within its circuit. The Judicial Conference shall, in light of the recommendations required by this subsection, determine the number of bankruptcy judges to be appointed and the locations at which they shall serve.

"(d) Except as otherwise provided in this chapter, the Judicial Conference may, from time to time, in light of the recommendations of the Director of the Administrative Office, the district courts, and the judicial councils of the circuits, change the number of bankruptcy judges and the locations at which they shall serve.

"§ 775. Vacancies; temporary assignments

"(a) Whenever the office of bankruptcy judge is vacant, the clerk of the district court in which the territory or any part of the territory served by such bankruptcy judge is located shall immediately give notice of such vacancy to the Director of the Administrative Office of the United States Courts. Upon the recommendation of the Director of the Administrative Office, the district court, and the judicial council of the circuit that the office be continued without change, the vacancy may be filled. If a change in the office is recommended by the Director of the Administrative Office, the district court, or the judicial council of the circuit, the vacancy shall not be filled until the Judicial Conference has acted thereon.

"(b)(1) Whenever the office of a bankruptcy judge is vacant or whenever the expeditious transaction of the bankruptcy business of the district court or courts requires—

"(A) the judge or any one of the judges of the district court may act;

"(B) the judge or the chief judge of the district court may designate and assign temporarily any bankruptcy judge of the district to act;

"(C) the chief judge of the circuit may designate and temporarily assign one or more bankruptcy judges within the circuit to act in any district within the circuit;

"(D) the chief judge of the circuit may, with the consent of the chief judge of any other circuit, designate and temporarily assign a bankruptcy judge from such other circuit to act in any district within the circuit;

"(E) the chief judge of the circuit may order that pending cases be referred and future cases referred to one or more bankruptcy judges within the circuit; or

"(F) the chief judge of the circuit may, with the approval of the Director of the Administrative Office, designate and temporarily assign a retired bankruptcy judge to act in any district within the circuit, and such retired bankruptcy judge shall be deemed to be a reemployed annuitant within the meaning of the civil service laws.

"(2) All designations and assignments made pursuant to paragraph (1) of this subsection shall be entered of record in the office of the clerk of the district court to which the bankruptcy judge is assigned. A bankruptcy judge designated and assigned pursuant to such paragraph shall discharge all judicial duties for which he is designated and assigned, and shall have all the powers of a bankruptcy judge for the district to which he is assigned for the period of such assignment.

"(3) The chief judge of a circuit or a judge or chief judge of a district court may make new designations and assignments in accordance with the provisions of this subsection, and may revoke designations and assignments previously made by him.

"§ 776. Powers

"(a) Each bankruptcy judge serving under this chapter shall have—

"(1) the power to conduct all proceedings under title 11;

"(2) to the extent authorized by rule or order of the district court, the power to conduct trials and other proceedings in actions under section 1334(b) of this title; and

"(3) the power to administer oaths and affirmations.

"(b) A person aggrieved by an order of a bankruptcy judge in a case or proceeding under title 11 or aggrieved by a judgment entered in a case heard by a bankruptcy judge under subsection (a)(2) of this section, may, within ten days after the entry thereof or within such extended time as the court may allow for good cause shown upon petition filed within such ten-day period, file with the bankruptcy judge a petition for review or appeal of such order or judgment by a judge of the district court and serve a copy of such petition upon the adverse parties who were represented at the hearing or trial. Such petition shall set forth the order or judgment complained of and the alleged errors with respect to such order or judgment. Unless the person aggrieved petitions for review of such order or judgment within such ten-day period, or any extension thereof, the order of the bankruptcy judge shall become final. Upon application of any party in interest, the execution or enforcement of the order or judgment complained of may be suspended by the court upon such terms as will protect the rights of all parties in interest.

"(c) Notwithstanding any other provision of law (other than section 362 of title 11), a bankruptcy judge may not enjoin a proceeding in any State or Federal court.

"(d) In a proceeding before a bankruptcy judge, any of the following acts or conduct shall constitute a contempt of a district court for the district in which such bankruptcy judge is serving:

"(1) disobedience or resistence to any lawful order, process, or writ;

"(2) misbehavior at a hearing or other proceeding, or so near the place thereof as to obstruct such hearing or proceeding;

"(3) failure to produce, after having been ordered to do so, any pertinent document;

"(4) refusal to appear after having been subpoenaed or, upon appearing, refusal to take the oath or affirmation as a witness, or, having taken the oath or affirmation, refusal to be examined according to law; or

"(5) any other act or conduct which, if committed before a judge of the district court, would constitute contempt of the court.

A bankruptcy judge may impose a fine not in excess of $1,000 for contempt of court. Upon the commission by any person of any act warranting imprisonment or a fine in excess of $1,000, the bankruptcy judge shall forthwith certify the facts to a judge of the district court. The judge of the district court shall serve or cause to be served upon such person an order to appear before such judge to show cause why such person should not be adjudged in contempt by reason of the facts so certified. The judge of the district court shall thereupon hear the evidence of the act or conduct complained of and, if warranted, punish such person in the same manner and to the same extent as for a contempt committed before a judge of such court, or commit such person upon the condition applicable in the case of defiance of the process of such court or misconduct in the presence of a judge of such court.

"§ 777. Duties.

"(a) A bankruptcy judge shall—

"(1) furnish or cause to be furnished such information with respect to cases or proceedings before such bankruptcy judge as may be requested by a party in interest;

"(2) transmit to the clerk of the district court such papers as may be on file before such bankruptcy judge whenever such papers are needed in any proceeding in court, and secure the return of such papers after they have been used, or, if it is impractical to transmit the original papers, transmit certified copies thereof by mail;

"(3) on request of a party in interest, preserve the evidence taken, or the substance thereof as agreed upon by the parties when a reporter is not in attendance;

"(4) prepare promptly and transmit to the clerk of the district court certificates on petitions for review of orders made by such bankruptcy judge, together with a statement of the questions presented, the findings and orders thereon, the petition for review, a transcript of the evidence or a summary thereof, and all exhibits; and

"(5) safety keep, perfect, and transmit to the clerk of the district court, at the conclusion of a case, the records required to be kept by this title.

"(b) A bankruptcy judge shall not engage in the practice of law or any other business, occupation, employment, or activity inconsistent with the expeditious, proper, and impartial performance of the duties of his office.

"§ 778. Training.

"The Federal Judicial Center shall conduct periodic training programs and seminars for bankruptcy judges, including an introductory training program for new bankruptcy judges.

"§ 779. Dockets.

"The Director of the Administrative Office of the United States Courts shall furnish bankruptcy judges adequate docket books and forms prescribed by the Director.".

(b) The table of chapters of part III of title 28 of the United States Code is amended by inserting immediately after the item relating to chapter 49 the following:

"50. Bankruptcy judges..... 771".

SEC. 212. (a) Title 28 of the United States Code is amended by inserting immediately after chapter 55 thereof the following:

"Chapter 66—UNITED STATES TRUSTEES

"Sec.
"901. United States trustees.
"902. Assistant United States trustees.
"903. Oath of office.
"904. Official stations.
"905. Vacancies.
"906. Duties; standing trustees; supervision.
"907. Salaries.
"908. Expenses.

"§ 901. United States trustees.

"(a) here is created in each judicial district the office of United States trustee.

"(b) The district court for each judicial district shall appoint a United States trustee by the concurrence of a majority of all the judges of the district. Whenever there is no such concurrence, such appointment shall be by the chief judge of the district. The same individual may be appointed to serve as United States trustee for more than one judicial district.

"(c) Each United States trustee shall be appointed for a term of seven years. On the expiration of his term of office, a United States trustee shall continue to perform the duties of the office until a successor is appointed and qualifies.

"(d) Each United States trustee is subject to removal for cause by the concurrence of a majority of all the judges of the judicial district in which such trustee is serving.

"§ 902. Assistant United States trustees.

"(a) The district court for each judicial district shall, subject to the approval of the Judicial Conference, appoint one or more assistant United States trustees by the concurrence of a majority of all the judges of the district. Whenever there is no such concurrence, such appointment shall be by the chief judge of the district.

"(b) Each assistant United States trustee is subject to removal for cause by the concurrence of a majority of all the judges of the judicial district in which such trustee is serving.

"§ 903. Oath of office

"Each United States trustee and assistant United States trustee, before taking office, shall take an oath to execute faithfully the duties of the office.

"§ 904. Official stations

"The Judicial Conference may determine the official stations of the United States trustee and any assistant United States trustees within the judicial districts for which such trustees are appointed.

"§ 905. Vacancies

"The chief judge for a judicial district may appoint an acting United States trustee whenever the office of United States trustee in such district is vacant. The individual so appointed may serve until the earlier of 90 days after such appointment or the date on which the vacancy is filed by appointment under section 901 of this title.

"§ 906. Duties, standing trustees; supervision

"(a) Each United States trustee, within his district, shall—

"(1) establish, maintain, and supervise a panel of private trustees that are eligible and available to serve as trustees in cases under chapter 7 of title 11;

"(2) serve as and perform the duties of a trustee in a case under this title when required under title 11 to serve as trustee in such a case;

"(3) deposit or invest, under section 345 of title 11, money received as trustee in cases under title 11;

"(4) perform the duties prescribed for the United States trustee under title 11; and

"(5) make such reports as the Judicial Conference directs.

"(b) If the number of cases under chapter 13 of title 11 commenced in a particular judicial district so warrant, the United States trustee for such district may, subject to the approval of the Judicial Conference, appoint one or more individuals to serve as standing trustee, or designate one or more assistant United States trustees for such district to perform the duties of the United States trustee, in cases under such chapter. The United States trustee for such district shall supervise any such individual appointed as standing trustee in the performance of the duties of standing trustee.

"(c) Each United States trustee shall be under the general supervision of the Judicial Conference. he Director of the Administrative Office of the United States Courts shall provide general coordination and assistance to the United States trustees.

"(d) The Judicial Conference shall prescribe by rule qualifications for membership on the panels established by the United States trustee under subsection (a)(1) of this section, and qualifications for appointment under subsection (b) of this section to serve as standing trustee in cases under chapter 13 of title 11. The Judicial Conference may not require that an individual be an attorney in order to qualify for appoint-

ment under subsection (b) of this section to serve as standing trustee in cases under such chapter 13.

"(e)(1) A United States trustee who has appointed an individual under subsection (b) of this section to serve as standing trustee in cases under chapter 13 of title 11 shall, pursuant to guidelines promulgated by the Judicial Conference, fix—

"(A) a maximum annual compensation for such individual, not to exceed the lowest annual rate of basic pay in effect for grade GS–16 of the General Schedule prescribed under section 5332 of title 5; and

"(B) a percentage fee, not to exceed ten percent, based on such maximum annual compensation and the actual, necessary expenses incurred by such individual as standing trustee.

"(2) An individual appointed to serve as standing trustee shall collect the percentage fee fixed under paragraph (1)(B) of this subsection from all payments under plans in the cases under chapter 13 of title 11 for which such individual serves as standing trustee. Such individual shall pay annually to the United States trustee, and the United States trustee shall pay to the Treasury—

"(A) any amount by which the actual compensation of such individual exceeds five percent upon all payments under plans in cases under chapter 13 of title 11 for which such individual serves as standing trustee; and

"(B) any amount by which the percentage fee fixed under paragraph (1)(B) of this subsection for all such cases exceeds—

"(i) such individual's actual compensation for such cases, as adjusted under subparagraph (A) of this paragraph; plus

"(ii) the actual, necessary expenses incurred by such individual as standing trustee in such cases.

"§ 907. Salaries

"The Judicial Conference shall fix the annual salaries of the United States trustee and any assistant United States trustees at rates of compensation not to exceed the lowest annual rate of basic pay in effect for grade GS–16 of the General Schedule prescribed under section 5332 of title 5.

"§ 908. Expenses

"Each United States trustee serving under this chapter shall be allowed actual and necessary expenses incurred in the performance of his duties, including compensation for necessary secretarial and other necessary supporting personel. Such expenses and compensation shall be determined and paid by the Director of the Administrative Office of the United States Courts, under such regulations as he shall prescribe with the approval of the Judicial Conference. The Administrator of General Services shall provide United States trustees with necessary office space, furniture, and facilities in buildings owned or occupied by departments and agencies of the United States. If suitable office space is not available in such buildings, the Administrator of General Services, at the request of the Director of the Administrative Office, shall procure and pay for suitable office space, furniture, and facilities in other buildings.".

(b) The table of chapters of part III of title 28 of the United States Code is amended by inserting immediately after the item relating to chapter 55 the following:

"56 United States trustees.....901".

SEC. 213. Section 959(b) of title 28 of the United States Code is amended by striking out "A" and inserting in lieu thereof "Except as provided in section 1165 of title 11, a".

SEC. 214. (a) Section 1334 of title 28 of the United States Code is amended to read as follows:

"§ 1334. Proceedings under title 11; related cases

"(a) The district courts shall have original jurisdiction, exclusive of the courts of the States, of all cases or proceedings under title 11.

"(b) Subject to subsection (c) of this section, the district courts shall have original, but not exclusive, jurisdiction of all civil proceedings by or against a debtor in possession, a trustee, or other representative of the estate of a debtor appointed under title 11 to administer the debtor's estate.

"(c) An original action under subsection (b) of this section may be filed only with the consent of the district court, upon a showing of need to have the case heard in a district court to prevent a potential loss of assets or to avoid other adverse effects on the administration of the estate of the debtor. The decision of a district court denying consent to the filing of such an original action shall not be reviewable by appeal or otherwise.".

(b) The items relating to section 1334 in the table of sections of chapter 85 of title 28 of the United States Code is amended by striking out "Bankruptcy matters and proceedings" and inserting in lieu thereof "Proceedings under title 11; related cases".

SEC. 215. Section 1360(a) of title 28 of the United States Code is amended by striking out "within the Territory" and inserting in lieu thereof "within the State".

SEC. 216. Section 1391 of title 28 of the United States Code is amended by adding at the end thereof the following:

"(g) Except as provided in subsection (i) of this section, a case or proceeding under section 1334 (a) of this title may be brought only in the judicial district—

"(1) in which the debtor has resided or has had his domicile or principal place of business, or in which his principal assets have been located, for the longest portion of the 180-day period immediately proceeding the commencement of the case or proceeding; or

"(2) in which there is pending a case under title 11 concerning such debtor's affiliate, general partner, or partnership.

"(h) A case of proceeding under section 1334(b) of this title may be brought only in accordance with the provisions of subsections (b) through (f) of this section.

"(i) A case under section 304 of title 11 may be brought only in the judicial district in which the principal place of business of the debtor in the United States is located, or the principal assets of the estate in the United States are found, except that—

"(1) a case to enjoin the commencement or continuation of an action or proceeding in a State court, or the enforcement of a judgment, may be brought only in the judicial district embracing the court in which is pending the action against which the injunction is sought; and

"(2) a case to enjoin the enforcement of a lien against property or to require the turnover of property of the estate, may be brought only in the judicial district in which such property is found."

SEC. 217. Section 1441 of title 28 of the United States Code is amended by adding at the end thereof the following:

"(e) Any party may, in accordance with subsection (b) of this section, remove a civil action of which the district courts have original jurisdiction under subsection 1334 (b) of this title brought in a State court to the district court embracing the place where such action is pending upon a showing that such removal would prevent a potential loss of assets or avoid other adverse effects on the administration of the estate of the debtor, except that no civil action by a governmental unit to enforce such governmental unit's police or regulatory power may be removed under this subsection. A petition for removal under this subsection shall be filed in accordance with the requirements of section 146(b) of this title.".

SEC. 218. Section 2075 of title 28 of the United States Code is amended by—

(1) striking out "under the Bankruptcy Act" and inserting in lieu thereof "in cases under title 11"; and

(2) by striking out the last sentence thereof.

SEC. 219. Section 2201 of title 28 of the United States Code is amended by inserting "or a proceeding under section 505(c) or 1146(d) of title 11" immediately after "the Internal Revenue Code of 1954".

SEC. 220. (a) Rule 1101(a) of the Federal Rules of Evidence is amended by striking out "referees in bankruptcy" and inserting "bankruptcy judges" in lieu thereof.

(b) Rule 1101(b) of the Federal Rules of Evidence is amended by striking out "the Bankruptcy Act" and inserting in lieu thereof "title 11, United States Code".

Page 581, strike out lines 22 and 23 and insert in lieu thereof the following:

(2) by inserting ", bankruptcy judges, and magistrates" immediately before the semicolon.

Page 590, strike out lines 18 through 22 and insert in lieu thereof the following:

(A) by striking out "referee" each place it appears and inserting "bankruptcy judge" in lieu thereof; and

(B) by striking out "receiver,".

Page 592, strike out lines 11 through 14.

Page 599, strike out lines 9 through 12.

Page 599, line 13, strike out "(b)" and insert in lieu thereof "SEC. 334.".

Page 599, line 13, strike out "such Act" and insert in lieu thereof "the Organic Act of Guam".

Page 599, strike out lines 19 through 22.

Page 599, line 23, strike out "(b)" and insert in lieu thereof "SEC. 335.".

Page 599, line 23, strike out "such Act" and insert in lieu thereof "the Revised Organic Act of the Virgin Islands".

Page 600, line 17, strike out "TITLE IV—TRANSITION" and insert in lieu thereof "TITLE I—GENERAL PROVISIONS".

Page 602, strike out lines 3 through 16 and insert in lieu thereof the following:

EFFECTIVE DATE

SEC. 402. This Act shall take effect 180 days after the date of enactment of this Act.

Page 603, line 2 and line 4, strike out "United States".

Page 603, immediately after line 17, insert the following new subsections:

(e) Any individual serving as a referee in bankruptcy on the date of enactment of this Act shall continue to serve until the expiration of his term of office and until his successor is appointed and qualified.

(f) The rules of bankruptcy procedure in effect on the date of enactment of this Act shall remain in effect until amended or repealed by the Supreme Court pursuant to section 2075 of title 28 of the United States Code.

Page 603, strike out line 18 and all that follows through line 23 on page 611.

Mr. EDWARDS of California (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the amendment and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. The question is on the amendment.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. DANIELSON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 146, nays 262, not voting 24, as follows:

[Roll No. 26]

Heckler	Richmond	Wilson, Bob

The Clerk announced the following pairs:

On this vote:

Mr. McDonald for, with Mr. Thompson against.

Mr. Hightower for, with Mr. Jones of Tennessee against.

Mr. Teague for, with Mr. Brown of California against.

Mr. Dent for, with Mr. Bingham against.

Mr. Whitten for, with Mr. Richmond against.

Mr. Roncalio for, with Mr. Rostenkowski against.

Until further notice:

Mr. Lehman with Mr. Carr.

Mr. Meeds with Mr. Downey.

Mr. Moss with Mr. Bob Wilson.

Mr. Armstrong with Mr. Thone.

Mr. Mitchell of New York with Mr. Brown of Ohio.

Mr. Risenhoover with Mrs. Heckler.

Messrs. DORNAN, COLLINS of Texas, ANNUNZIO, WHITE, BADHAM, NEAL, and GAYDOS changed their vote from "nay" to "yea."

Messrs. SARASIN, CONYERS, WALGREN, and SKELTON changed their vote from "yea" to "nay."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the amendment, in the nature of a substitute, as amended.

The amendment in the nature of a substitute, as amended was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. McCLORY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

So the bill was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1977

Mr. MURPHY of New York. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 1614) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from New York (Mr. MURPHY).

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. The Chair will count.

Two hundred and thirty-five Members are present, a quorum.

So the motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 1614, with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Tuesday, January 31, 1978, title II was under consideration.

Are there any further amendments to title II?

AMENDMENT OFFERED BY MR. STUDDS

Mr. STUDDS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STUDDS: Page 227, strike out line 16 and all that follows down through and including line 15 on page 233 and insert in lieu thereof the following:

"SEC. 30. (FISHERMEN'S GEAR COMPENSATION FUND.—(a) As used in this section, the term—

"(1) 'commercial fisherman' means any citizen of the United States who owns, operates, or derives income from being employed on, a commercial fishing vessel;

"(2) 'commercial fishing vessel' means any vessel which is used primarily for the handling or harvesting of living marine resources for commercial purposes; and

"(3) 'fishing gear' means (A) any commercial fishing vessel, and (B) any equipment, whether or not attached to such a vessel, which is used in the handling or harvesting of living marine resources for commercial purposes.

"(b)(1) There is hereby established in the Treasury of the United States a Fishermen's Gear Compensation Fund (hereafter in this section referred to as the 'Fund'). The Fund shall be available to the Secretary without fiscal year limitation as a revolving fund for the purpose of making payments pursuant to this section. The total amount in the Fund shall at no time exceed $600,000. Amounts paid pursuant to the provisions of paragraphs (3) and (4) of this subsection shall be deposited in the Fund. The Fund may sue or be sued in its own name.

"(2) The Secretary is authorized to establish and maintain an area account within the Fund for any area of the outer Continental Shelf for purposes of providing reasonable compensation for damages to fishing gear and any resulting economic loss to commercial fishermen due to activities related to oil and gas exploration, development, and production in such area.

"(3) Upon assessment by the Secretary, any holder of a lease issued under section 8 of this Act for any tract in any area of the outer Continental Shelf shall pay the amount specified by the Secretary for the purpose of the establishment and maintenance of an area account for such area. In any calendar year, no lessee shall be required by the Secretary to pay an amount in excess of $5,000 per lease.

"(4) Subject to paragraph (1) of this subsection, each area account established pursuant to this section shall be maintained at a level not to exceed $100,000 and, if depleted, shall be replenished by equal assessments by the Secretary of each lease holder in such area.

"(5) Amounts in each such area account shall be available for disbursement and shall be disbursed, subject to such amounts as are provided in appropriations Acts, for only the following purposes:

"(A) Administrative and personnel expenses of such area account and administrative and personnel expenses of the Fund which relate to such area account.

"(B) The payment of any claim in accordance with procedures established under this section for damages suffered as a result of activities in the area for which such area account was established.

"(C) Reasonable attorney's fees awarded pursuant to subsection (e)(1) of this section.

"(6) After the date of enactment of this section, any lease issued by the Secretary to a lessee for a tract in any area of the outer Continental Shelf shall contain a condition that such lessee, upon assessment by the Secretary, shall pay the amount specified by the Secretary for purposes of the establishment and maintenance of an area account for such area under paragraph (2) of this subsection. In any calendar year, no lessee shall be required by the Secretary to pay an amount in excess of $5,000 per lease.

"(c)(1) In carrying out this section, the Secretary may—

"(A) prescribe, and from time to time amend, regulations for the filing, processing, and fair and expeditious settlement of claims pursuant to this section, including a time limitation on the filing of such claims;

"(B) establish and classify all potential hazards to commercial fishing caused by outer Continental Shelf oil and gas exploration, development, and production activities, including all obstructions on the bottom, throughout the water column, and on the surface; and

"(C) establish regulations requiring all materials, equipment, tools, containers, and all other items used on the outer Continental Shelf to be properly stamped or labeled, wherever practicable, with the owner's identification prior to actual use.

"(2)(A) Payments may be disbursed by the Secretary from the appropriate area account to compensate commercial fishermen for actual and consequential damages, including loss of profits, due to the damage of fishing gear by materials, equipment, tools, containers, or other items associated with oil and gas exploration, development, or production activities in such area.

"(B) Notwithstanding the provisions of subparagraph (A) of this paragraph, no payment may be made by the Secretary from any area account established under this section—

"(i) when the damage set forth in a claim was caused by materials, equipment, tools, containers, or other items the ownership and responsibility for which is known;

"(ii) in an amount in excess of $75,000 per incident;

"(iii) to the extent that damages were caused by the negligence or fault of the commercial fisherman making the claim; or

"(iv) when the damage set forth in the claim was sustained prior to the date of enactment of this section.

"(d) With respect to any claim for damages filed pursuant to this section, there shall be a presumption that such claim is valid if the claimant establishes that—

"(1) the commercial fishing vessel was being used for fishing and was located in an area prescribed by the Secretary of Commerce as an area affected by outer Continental Shelf activities;

"(2) a report on the location of the material, equipment, tool, container, or other item which caused such damages and the nature of such damages was made within five days after the date on which such damages were discovered;

"(3) there was no record on nautical charts or the Notice to Mariners on the date such damages were sustained that such material, equipment, tool, container, or other item existed in such area; and

"(4) there was no proper surface market or lighted buoy which was attached or closely anchored to such material, equipment, tool, container, or other item.

"(e)(1) Upon receipt of any notification of a claim under this section, the Secretary shall refer such matter to a hearing examiner appointed under section 3105 of title 5, United States Code. Upon receipt of any notification of a claim under this section, the Secretary shall notify all lessees in the area, and any such lessee may submit evidence at any hearing conducted with respect to such claim. Such hearing examiner shall promptly adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code. If such decision is in favor of the person filing the claim, the hearing examiner shall include as part of the amount certified to the Secretary under paragraph (4) of this subsection reasonable attorneys' fees incurred by such person in pursuing such claim.

"(2) For purposes of any hearing conducted pursuant to this section, the hearing examiner shall have the power to administer oaths and subpena the attendance and testimony of witnesses and the production of books, records, and other evidence relative or pertinent to the issues being presented for determination.

"(3) A hearing conducted under this section shall be conducted within the United States judicial district within which the matter giving rise to the claim occurred, or, if such matter occurred within two or more districts, in any of the affected districts, or, if such matter occurred outside of any district, in the nearest district.

"(4) Upon a decision by the hearing examiner and in the absence of a request for judicial review, any amount to be paid, subject to the limitations of this section, shall be certified to the Secretary, who shall promptly disburse the award from the appropriate area account. Such decision shall not be reviewable by the Secretary.

"(f) Any person who suffers legal wrong or who is adversely affected or aggrieved by the decision of a hearing examiner under this section may, no later than sixty days after such decision is made, seek judicial review of such decision (1) in the United States court of appeals for the circuit in which the damage occurred, or, if such damage occurred outside of any circuit, in the United States court of appeals for the nearest circuit, or (2) in the United States Court of Appeals for the District of Columbia.

"(g) Not later than one year after the date of the establishment of any area account under subsection (b) of this section, the Secretary shall submit a report to the Congress setting forth his recommendations as to whether or not claims should be paid from such account which are based on damages caused by materials, equipment, tools, containers, or other items, the ownership and responsibility for which is known on the date of the submission of such claims.

Mr. STUDDS (during the reading). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. STUDDS. Mr. Chairman, this amendment is designed to simplify and clarify the administration of the Fishermen's Gear Compensation Fund which would be created by this section. The amendment was drafted in consultation with the administration, and I understand that it has their support.

The amendment clarifies the structure of the Fishermen's Fund. by authorizing the Secretary to establish separate regional accounts for various areas of the Outer Continental Shelf. In addition, it makes clear that this section will apply to all leases issued or maintained under this act; it sets $75,000 as the maximum amount which could be disbursed from the fund for any single incident; it establishes criteria to aid in assessing the validity of any claim; and it asks the

Secretary of Interior to make recommendations concerning the desirability of expanding coverage of the fund in future years.

The amendment also makes clear that this section will be subject to the appropriation process, and that it will be fully in compliance with the budget procedures of the Congress.

I am not aware of any opposition to this amendment, and I hope that it can be adopted without controversy.

The amendment authorizes the creation of one central fund, with separate regional accounts for various areas of the Outer Continental Shelf. Although no specific number of area accounts is mandated, it is our expectation that these would cover the six or seven major OCS leasing areas, one for Alaska, one or two on the west coast, one for the Gulf of Mexico and two or three on the east coast.

As I stated in the beginning, Mr. Chairman, I am aware of no objection to this amendment. As I say, this is the product of a joint, intensive effort of the staff on both sides. I will also say that it is my understanding that the gentleman from Louisiana (Mr. TREEN) has amendments to this amendment which, in turn, have agreement from both sides and which, when they are offered, will be accepted by both sides.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, as I understand it, the bill before us already contains a provision which provides for a "fishermen's gear compensation fund." How does this amendment differ from what is already in the existing committee language.

Mr. STUDDS. Mr. Chairman, in response to the inquiry of the gentleman from Louisiana (Mr. BREAUX) let me state that most of the changes are technical. We are trying to meet some of the objections which caused the administration some concern in the way we originally wrote the language with respect to this fund. We now establish one fund with a series of regional accounts and with a set limit of $75,000 for any single incident.

Mr. BREAUX. Mr. Chairman, I commend the gentleman from Massachusetts (Mr. STUDDS) for his remarks.

Mr. STUDDS. Mr. Chairman, I thank the gentleman from Louisiana (Mr. BREAUX).

AMENDMENT OFFERED BY MR. TREEN TO THE AMENDMENT OFFERED BY MR. STUDDS

Mr. TREEN. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. TREEN to the amendment offered by Mr. STUDDS: Page 2, immediately after "Shelf" on line 13, insert the following: "and any holder of a permit issued for the construction of a pipeline in such area".

Page 2, line 16, insert "or permittee" immediately after "lessee".

Page 3, line 6, strike out the period and insert in lieu thereof ", except that amounts disbursed for such expenses in any fiscal year shall not exceed 15 per centum of the amounts deposited in such revolving account in such fiscal year.".

Page 3, line 12, strike out "(1)" and insert in lieu thereof "(2)(B)".

Page 3, strike out lines 13 through 22, and insert in lieu thereof the following:

"(6) After the date of enactment of this section, any exploration plan and any development and production plan approved by the Secretary for an area of the outer Continental Shelf and any permit issued for the construction of a pipeline in such area shall contain a condition that the lessee or permittee, upon request by the Secretary shall pay the amount specified by the Secretary for purposes of the establishment and maintenance of a fishermen's gear compensation fund for such area. No lessee or permittee shall be required by the Secretary to pay in any calendar year an amount in excess of $5,000 per lease or permit.

Page 5, beginning on line 8, strike out "the ownership and responsibility for which is known" and insert in lieu thereof "attributable to a financially responsible party".

Page 5, line 14, strike out "or".

Page 5, line 17, strike out the period and insert in lieu thereof a semicolon.

Page 5, immediately after line 17, insert the following new clauses:

"(v) in an amount in excess of the depreciated value of the fishing gear with respect to which the claim is filed;

"(vi) in the case of a claim for loss of profits (I) for any period in excess of 6 months, and (II) unless such claim is supported by records with respect to the claimant's profits during the previous 12-month period; and

"(vii) for any portion of the damages claimed with respect to which the claimant has or will receive compensation from insurance.

Page 6, strike out line 13 and all that follows down through line 14 on page 9, and insert in lieu thereof the following:

"(e)(1) Any commercial fisherman suffering damages compensable under this section may file a claim for compensation with the Secretary, except that no such claim may be filed more than 60 days after the date of discovery of the damages with respect to which such claim is made.

"(2)(A) Upon receipt of any claim under this section, the Secretary shall refer such matter to a hearing examiner appointed under section 3105 of title 5, United States Code, and shall make reasonable efforts to notify all persons known to have engaged in activities associated with outer Continental Shelf energy activity in the vicinity. Each such person shall promptly notify the Secretary as to whether he admits or denies responsibility for the damages claimed. Any such person, including lessees or permittees or their contractors or subcontractors, may submit evidence at any hearing conducted with respect to such claim. The hearing examiner shall, within 120 days after such matter is referred to him by the Secretary, adjudicate the case and render a decision in accordance with section 554 of title 5, United States Code.

"(B) If the decision of the hearing examiner is in favor of the commercial fisherman filing the claim, such hearing examiner shall include, as part of the amount certified to the Secretary under paragraph (5)(A) of this subsection, reasonable attorneys' fees incurred by such commercial fisherman in pursuing such claim.

"(3)(A) For purposes of any hearing conducted pursuant to this section, the hearing examiner shall have the power to administer oaths and subpena the attendance of testimony of witnesses and the production of books, records, and other evidence relative or pertinent to the issues being presented for determination.

"(B) In any hearing conducted pursuant to this section with respect to a claim for damages resulting from activities on any area of the outer Continental Shelf, the hearing examiner shall consider evidence of obstructions in such area which have been identified pursuant to the survey conducted under subsection (1) of this section.

"(4) A hearing conducted under this section shall be conducted within the United States judicial district within which the matter giving rise to the claim occurred, or, if such matter occurred within two or more districts, in any of the affected districts, or, if such matter occurred outside of any district, in the nearest district.

"(5)(A) Upon a decision by the hearing examiner and in the absence of a request for judicial review, any amount to be paid, subject to the limitations of this section, shall be certified to the Secretary, who shall promptly disburse the award. Such decision shall not be reviewable by the Secretary.

"(B) Upon payment of a claim by the Secretary pursuant to this paragraph, the Secretary shall acquire by subrogation all rights of the claimant against any person found to be responsible for the damages with respect to which such claim was made.

"(C) Any person who denies responsibility for damages with respect to which a claim is made and who is subsequently found to be responsible for such damages, and any commercial fisherman who files a claim for damages and who is subsequently found to be responsible for such damages, shall pay the costs of the proceedings under this subsection with respect to such claim.

"(6) Any person who suffers legal wrong or who is adversely affected or aggrieved by the decision of a hearing examiner under this section may, no later than 60 days after such decision is made, seek judicial review of such decision in the United States court of appeals for the circuit in which the damage occurred, or, if such damage occurred outside of any circuit, in the United States court of appeals for the nearest circuit.

"(k) The Secretary shall submit an annual report to the Congress which shall set forth—

"(1) an evaluation of the feasibility and comparative cost of preventing or reducing obstructions on the outer Continental Shelf which pose potential hazards to commercial fishing or fishing gear by (A) imposing fines or penalties on lessees or permittees, or contractors or subcontractors of lessees or permittees, who are responsible for such obstructions, or (B) requiring the bonding of such lessees or permittees or such contractors or subcontractors;

"(2) a description of the types of damages set forth in claims filed with the Secretary during the previous year for compensation from a fishermen's gear compensation fund;

"(3) the amount of compensation awarded to claimants during the previous year; and

"(4) the number of cases during the previous year in which damages were determined to be the responsibility of a lessee or permittee conducting operations on the outer Continental Shelf, or the contractor or subcontractor of such a lessee or permittee.

"(l)(1) The Administrator of the National Oceanic and Atmospheric Administration shall conduct a two-year survey of obstructions on the Outer Continental Shelf. Such survey shall be conducted for purposes of identifying (A) natural obstructions on the outer Continental Shelf which pose potential hazards to commercial fishing or fishing gear, and (B) in addition, in the case of areas in which oil and gas exploration, development, or production is taking place, manmade obstructions relating to such activities which pose potential hazards to commercial fishing or fishing gear.

"(2) The Administrator shall report the

results of the survey conducted under this subsection to the Secretary and to the Secretary of Commerce, and shall, on the basis of such survey, develop charts for fishermen identifying obstructions on the outer Continental Shelf.

"(3) During the first six months of the survey conducted under this subsection, the Administrator shall concentrate on areas of the outer Continental Shelf where oil and gas production has commenced or is expected to commence prior to the expiration of the two-year period of such survey.".

Mr. TREEN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. TREEN. Mr. Chairman, this amendment has been worked out with the author of the program on the Fishermen's Compensation Fund, the gentleman from Massachusetts (Mr. STUDDS), and all of these amendments to this section have been agreed to by him. I know he will respond in a moment.

I think this improves the program, and the gentleman has told me that he thinks so as well. It will speed up the time for recovery. It will require adjudication within 120 days. It will limit administrative costs to 15 percent of the fund. It will deny recovery in case a fisherman recovers from an insurance company. It will encourage fishermen to make claims against the responsible oil company or pipeline company rather than the fund. And it also brings the pipelines into the purview of the program in addition to the oil and gas companies that explore and produce in the OCS. There are a few other things that it does to improve the regime, but I will not take the time of the committee for further explanation.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from Massachusetts.

Mr. STUDDS. Mr. Chairman, I thank the gentleman for yielding.

I would like the RECORD to reflect at this time that while the gentleman from Louisiana and I, as the gentleman knows, have had frequent disagreements during the course of the consideration of this legislation, the gentleman from Louisiana has always been fair and has addressed himself to this problem straightforwardly and with a great deal of clarity and a great deal of honesty.

The gentleman has proposed changes which I think are uniformly helpful to the amendments which I suggested. I am certainly happy to accept them.

Mr. TREEN. I thank the gentleman for his remarks. This is a fine example of cooperation between New England and the gulf coast. I appreciate very much the opportunity of working with the gentleman from Massachusetts on this program.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. TREEN. I yield to the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Chairman, I thank the gentleman from Louisiana for yielding. I hope this spirit of cooperation continues throughout the rest of the afternoon.

Mr. TREEN. I can assure the gentleman it will.

Mr. MURPHY of New York. If there was one startling revelation from the hearings in the gulf and the Massachusetts areas it was the fact that there is a great vulnerability of fishermen in terms of damage to the fishermen's nets and gear, which is very expensive and which makes it particularly economically devastating to the small business people. The language proposed by the gentleman from Massachusetts and the gentleman from Louisiana is acceptable to the committee. We are happy to accept the gentleman's amendment.,

Mr. TREEN. I ask for an "aye" vote on my amendment and the amendment by the gentleman from Massachusetts (Mr. STUDDS).

Mr. FORSYTHE. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to join in this love fest we have on this particular amendment and to congratulate both the gentleman from Massachusetts and the gentleman from Louisiana for improving a very important section of this bill. It is one of the sections of the bill which has been creating some of the problems off the east coast and particularly for New England. I certainly join them in asking for an "aye" vote on this amendment and congratulate them and thank them.

Mr. EMERY. Mr. Chairman, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from Maine.

Mr. EMERY. I thank the gentleman for yielding.

Mr. Chairman, I also congratulate the gentleman from Massachusetts and the gentleman from Louisiana for producing this amendment. It helps the fishing industry in New England, which has been very concerned about the destruction of fishing gear due to foreign vessels and other obstructions in the New England fishing grounds. The fishermen in the New England area will be more readily receptive of offshore oil development with some guarantee that they can reclaim value from damaged or lost fishing gear. I think this amendment will go a long way toward helping them with those problems.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. TREEN) to the amendment offered by the gentleman from Massachusetts (Mr. STUDDS).

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts (Mr. STUDDS), as amended.

The amendment, as amended, was agreed to.

AMENDMENT OFFERED BY MR. DODD

Mr. DODD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DODD: Page 169, line 16, strike out "(h) through (n)" and insert in lieu thereof "(i) through (o)".

Page 169, immediately after line 18 insert the following new subsection:

"(c)(1) Following each notice of a proposed lease sale and before the acceptance of bids and the issuance of leases based on such bids the Secretary shall allow the Attorney General and the Federal Trade Commission thirty days to review the results of such lease sale, except that the Attorney General and the Federal Trade Commission may agree to a shorter review period.

"(2) The Attorney General and the Federal Trade Commission may each conduct such antitrust review on the likely effects the issuance of such leases would have on competition as the Attorney General and the Federal Trade Commission deem appropriate and each shall advise the Secretary with respect to such review. The Secretary shall provide such information as the Attorney General and the Federal Trade Commission may require in order to conduct any antitrust review pursuant to this paragraph and to make recommendations pursuant to paragraph (3) of this subsection.

"(3) The Attorney General and the Federal Trade Commission may make such recommendations to the Secretary, including the nonacceptance of any bid, as may be appropriate to prevent any situation inconsistent with the antitrust laws. If the Secretary determines, or if the Attorney General or the Federal Trade Commission advises the Secretary, prior to the issuance of any lease, that such lease may create or maintain a situation inconsistent with the antitrust laws, the Secretary may—

"(A) refuse (i) to accept an otherwise qualified bid for such lease or (ii) to issue such lease, notwithstanding subsection (a) of this section; or

"(B) issue such lease, and notify the lessee, the Attorney General, and the Federal Trade Commission of the reason for such decision.

"(4) An antitrust review authorized by this subsection shall be deemed to be an 'antitrust investigation' within the meaning of the Antitrust Civil Process Act (15 U.S.C. 1311 et seq.).

"(5) Neither the issuance of a lease nor anything in this subsection shall be admissible in any way as a defense to any civil or criminal action for violation of the antitrust laws or modify or abridge any private right of action under such laws.

Renumber succeeding subsections of section 205 accordingly.

Page 172, line 21, strike out "8(j)" and insert in lieu thereof "3(k))".

Page 172, line 22, strike out "(43 U.S.C. 1337(j))" and insert in lieu thereof "(43 U.S.C. 1337(k))".

Page 158, line 17, strike out "8(k)" and insert in lieu thereof "8(l)."

Mr. DODD (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. DODD. Mr. Chairman, I am offering this amendment on behalf of myself

and the gentleman from Ohio (Mr. SEIBERLING). I will try to be brief in my explanation of this amendment. It is not a very complicated one. The ramifications of the amendment, I think, are far-reaching, but it is not that difficult to understand.

I might point out as well that it is endorsed by the administration. It has received the support of the Attorney General and the Federal Trade Commission. It is designed to set up a discretionary mechanism whereby each lease can be reviewed prior to issuance by the Justice Department and the Federal Trade Commission to determine whether or not the proposed lease or proposed sale will give rise to any inconsistencies in our antitrust laws.

Specifically, this amendment will allow the Attorney General and the Federal Trade Commission Chairman an opportunity to conduct an antitrust review of any proposed lease sale following its notice and prior to its issuance and to make any appropriate recommendations concerning the sale by the Secretary of the Interior, who may then in his discretion go forward or halt the review of the lease sale.

This is not a mandatory review. It is a discretionary review. I want to emphasize that point. Similar language, I might point out, was first incorporated in the committee bill in 1976 and was subsequently approved by both this House and the other body as well. In addition, virtually identical antitrust language exists in two other pieces of legislation this House has dealt with in the past, and I am speaking specifically to the Federal Coal Leasing Amendments and the Naval Petroleum Reserve Production Act, where identical language as I have just seen in this amendment is included.

The intent of the Congress has thus consistently been to set in place a system through which appropriate Federal agencies specifically check on the state of competition and the exploration for production of the public's resources.

This illustrates why the antitrust review method is especially needed.

In the case of OCS lease sales, let me give you just a few examples from our recent experience. The first one is the Gulf of Alaska sale which took place in April of 1976. In that sale the top nine companies involved cornered 72.6 percent of the market, with the top four accounting for a full 61.6 percent of the available tracts.

In the Baltimore Canyon lease sale which took place in August of 1976, the nine top companies emerged with 64 percent of all the market shares, with the top four ending up with over 50 percent of the market shares. The top 9 companies, I may point out, in both cases are ranked among the top 15 oil companies in the world, both in terms of production as well as sales. This would seem to indicate that market concentration on the Outer Continental Shelf is something that must be carefully considered, since such high concentration ratios as I have just cited may have a very strong impact on competition.

(By unanimous consent Mr. DODD was allowed to proceed for 5 additional minutes.)

Mr. DODD. The amendment is thus, in our opinion, an important component of the overall objectives of the bill, one which is clearly to promote competition in development of Federal OCS tracts. Along with alternative bidding systems, the antitrust review process for instance, would insure that proper attention is given to the competitive implications of the sale of OCS oil and gas leases.

Let me just try and conclude here. I think I have covered the main points. I think, the main question that comes to most people's minds, has to do with delay. Are we going to delay the process by adopting this amendment? Is this discretionary review process going to delay any further the development of OCS reserves?

The answer is no. The review process has to occur between the time that notice is given of the proposed lease sales and the actual issuance of the lease sales. It must occur within that period of time so that there can be no additional delays in the actual process of developing these resources. That is the thrust of the amendment.

Again, it should be remembered that this review is discretionary; it is not mandatory. It will allow the Justice Department and the FTC to have the opportunity periodically, if they so desire, to determine whether too much concentration is developing in the leasing of OCS tracts. I would strongly urge my colleagues to support this amendment.

Mr. WIGGINS. Mr. Chairman, I rise in opposition to the amendment.

Ladies and gentlemen of the Committee, the bill which formed the basis of the ad hoc committee's markup contained a very similar provision. After full and fair debate, that committee voted to strike the similar provision from the bill. Mr. DODD has offered to reinstate the language with some changes. The essential change is that the antitrust review will be discretionary rather than mandatory.

It is true that the administration objected—strongly objected—to the mandatory review of each lease by the Attorney General and by the Federal Trade Commission. I accept the gentleman's statement that the administration now supports this present modified version. Notwithstanding that powerful endorsement, I do not, and I urge my colleagues to listen to some reasons why not.

Ladies and gentlemen, I am mindful that antitrust review sounds like a good idea.

But bear in mind the nature and scope of the activities which we require in the event that such a review is undertaken, even on a discretionary basis. For the Attorney General to make a decision within 30 days with respect to the anticompetitive impact of any proposed lease is either going to be an empty pro forma gesture on his part or it is going to be a meaningful review. A meaningful review cannot be conducted within that time frame because anticompetitive impact involves a highly sophisticated analysis of the marketplace. That, in turn, cannot be done until the successful bidders are known. One cannot determine whether or not a bidder is going to produce an anticompetitive impact on the market unless you know who that bidder is.

The last section to the amendment is intended to address an obvious problem. Let me state what that problem is. Let us suppose that company A proposes to bid on a lease and makes the bid accordingly. Let us further suppose that the bid is submitted to the Attorney General for a review with respect to its anticompetitive impact, and either no comment is made or the Attorney General finds there is no anticompetitive impact and the lessee proceeds to acquire the leasehold. The last section of the amendment says that neither the issuance of the lease nor anything else in this section is admissible in any way as a defense in a civil or criminal action for the violation of the antitrust laws.

What does that mean? It means that this case which I have just described might be challenged later on by the Attorney General who might sue the company involved, either civilly or criminally, for a violation of antitrust laws. Quite naturally the defendant would say, "But, Your Honor, the Attorney General previously approved the lease." Such evidence seems to me highly relevant in that trial, but this amendment cleverly prohibits the defendants offering it. Whatever else one might think of the amendment, one could not favor that kind of a prohibition of the introduction of relevant evidence in the course of a criminal trial.

The better part of wisdom here is to reject a proposal which has been rejected already, in essence, by this Committee, and to stick with the committee language, subject to some further amendment which I may propose.

Mr. HUGHES. Mr. Chairman, will the gentleman yield on that point?

Mr. WIGGINS. I yield to the gentleman from New Jersey.

Mr. HUGHES. I thank the gentleman for yielding.

Mr. Chairman, will the gentleman agree that probably the two major points he makes is that there just is not time to do the impact review called for?

The CHAIRMAN. The time of the gentleman from California (Mr. WIGGINS) has expired.

(On request of Mr. HUGHES and by unanimous consent, Mr. WIGGINS was allowed to proceed for 2 additional minutes.)

Mr. WIGGINS. Mr. Chairman, I yield further to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Second of all, even if one is done, there is no preclearance and any review would not be admissible; and that, therefore, that is unfair to the lessee.

Would the gentleman agree that we had basically the same issue in the premerger notification bill that was before our committee, the Committee on the Judiciary, and the very same arguments were utilized in that instance? And correct me if I am wrong, but did not the

gentleman join with us in the support of that particular legislation?

Mr. WIGGINS. Yes, I did. And I recognize that there is a certain similarity between an antitrust review and the premerger review which we recently authorized.

But let me express my recollection. It may be imperfect. If the Department of Justice undertakes a review of a merger as a result of the premerger notification statute and puts its imprimatur on the merger, it cannot turn around and file an action under the antitrust laws for violating those laws by reason of the very merger which it approved.

Here, as I understand it quite clearly from the language of the amendment, the Department of Justice is in no way estopped from approving a sale and then suing the successful bidder.

Mr. HUGHES. Mr. Chairman, I think the gentleman's reading of the language is correct. But let me say that my view of the premerger notification legislation is this: That it incorporates the very same rationale as incorporated in this amendment. It is the theory that we just cannot have a perfect in-depth review in 30 days or even 60 days. But it is better that we try to catch the most flagrant violations before they occur, preserving the right of the Attorney General and the Federal Trade Commission to pursue the matters as time permits and more information is available.

The CHAIRMAN. The time of the gentleman from California (Mr. WIGGINS) has expired.

(By unanimous consent, Mr. WIGGINS was allowed to proceed for 2 additional minutes.)

Mr. HUGHES. Mr. Chairman, if my colleague will yield further, the theory is that it is better really to try to prevent the most flagrant violations, still reserving to the Attorney General and the Federal Trade Commission the right to seek additional remedies if in fact it is subsequently found that based on additional data, a lease sale may in fact violate the antitrust laws.

Mr. WIGGINS. Mr. Chairman, I realize, in response to the gentleman's observation, that there is a certain apparent beauty in involving the Department of Justice early on in a proposed transaction and receiving its opinion as to whether that transaction violates the antitrust laws.

But the difficulty is that it makes the Department of Justice a business partner in effect with respect to a private business transaction. It makes the Department of Justice a partner in the decision to go forward in a business process which that very same Department may later wish to challenge.

Far better than involving the Justice Department as a planner to help fashion the proposal to meet the standards of the antitrust laws is the present practice. The Department of Jusice has ample authority to investigate any and all transactions, and the Federal Trade Commission has broad authority to make a complete investigation. But it is investigating conduct on which it has not given its prior approval. Its discretion and its flexibility to institute civil or criminal actions are therefore not incumbent.

Mr. HUGHES. Mr. Chairman, I appreciate the gentleman's explanation.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague's yielding.

Is there any time limit on the process that the Federal Trade Commission or the Attorney General can take, or may they take forever?

The CHAIRMAN. The time on the gentleman from California (Mr. WIGGINS) has again expired.

(On request of Mr. ROUSSELOT and by unanimous consent, Mr. WIGGINS was allowed to proceed for 2 additional minutes.)

Mr. WIGGINS. Mr. Chairman, in response to the gentleman's question, the amendment provides that following the notice of a proposed lease sale and before the issuance of any lease, the Secretary shall allow the Attorney General and the Federal Trade Commission 30 days in which to conduct a review. So there is a time limit.

Mr. ROUSSELOT. For the Attorney General?

Mr. WIGGINS. But the problem is, of course, that they cannot conduct a sophisticated antitrust review within 30 days.

Mr. ROUSSELOT. So the time limit does present a problem as to the thoroughness of the review?

Mr. WIGGINS. It is so short that inevitably the Department of Justice will either throw up its hands or give a pro forma approval. In either event the Department of Justice has been involved in the matter of whether a given bidder is going to acquire a leasehold interest, and it certainly prejudices the Department of Justice later on to sue for doing the very thing it had an opportunity to review.

Mr. ROUSSELOT. Mr. Chairman, I thank the gentleman.

Mr. SEIBERLING. Mr. Chairman, I rise in support of the Dodd amendment.

Mr. Chairman, I strongly commend the gentleman for offering this amendment.

Mr. DODD. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Connecticut.

Mr. DODD. Mr. Chairman, I thank the gentleman for yielding.

I would just like to make a couple of points. The first point is this: This is not the same amendment in effect that was voted on by the committee at the time there was a one-vote margin that separated us. I think there were a couple of Members who may even have been absent on that particular vote. In any event, it was a very narrow vote.

The difference is that on that vote concerning the amendment in committee, the Members registered their vote on the amendment to mandate a review on every lease sale.

The gentleman is substantially correct, and I must point out at this particular juncture that I have a tremendous amount of respect for the gentleman from California (Mr. WIGGINS) and for his ability to create a good argument. But here we would be allowing a discretionary review; and the administration felt that even if a review were mandated in every case, it would cause no delays. Therefore, the administration opposed its being put under a discretionary system and felt it might increase some fears.

The second point is in regard to the time frame. We actually are not talking about 30 days; we could be talking about as many as 100 or 110 days, and let me explain why that is so.

At the time that the notice of the lease sale occurs, the legislation requires that the Governors of the various States be notified of what is going to happen. They have 60 days in which to take a look at that, not veto power, but an opportunity to participate in the decision anyway as to what is going to happen in their own area. It then comes back to the Secretary, and then we have the 30-day period. The clock begins to run, so right there we have 90 days. Presuming that there is a week's time in between, actually, when that 30-day clock begins to run, we are talking about 100 days or more. Therefore, we are talking about 3 months, anyway, at which time the Federal Trade Commission and the Attorney General would have an opportunity to look at that lease sale.

Mr. Chairman, what are they looking at? What are the criteria that they would look at?

I would quote from a memorandum from the Attorney General with regard to the criteria for predicting competitive effects, and I quote paragraph 2 on page 10 of that report, which says as follows:

> In effectuating the Congressional intent underlying Section 7 to check trends toward less competitive market structures, courts have evolved a set of objective criteria to gauge the likelihood of anticompetitive effects arising from a given acquisition. These are concentration ratios, market share statistics, industry concentration trends and entry conditions.

A lot of those particular items are items which, if the Attorney General and the FTC wants to insist, will be provided. They are going to have a lot of that information. It is not going to be de novo in each particular case they may be looking at. Therefore, much of that information will be there already.

For those two particular reasons, Mr. Chairman, I would again urge that my colleagues support this amendment.

Mr. Chairman, I thank the gentleman from Ohio (Mr. SEIBERLING) for yielding and for his support of this amendment.

Mr. SEIBERLING. Mr. Chairman, I thank the gentleman from Connecticut (Mr. DODD).

I was the author of the amendment that lost by a margin of one in the committee. Let me say that that was a much tougher amendment than this one because it mandated a review and, as I recall it also required a hearing if the Justice Department made an adverse recommendation. However, it was similar to provisions which we put in the Elk Hills bill and in a whole lot of other bills. The Dodd amendment merely contains

the mild requirement that the Secretary give the FTC and the Attorney General an opportunity to review. They do not have to take any position. They do not even have to review if they do not think it is important, but they should have that opportunity.

Mr. Chairman, let me just cite a couple of recent instances as to how important this provision could be. The Attorney General intervened last year in the ICC proceeding as to the rates to be charged by the Alyeska pipeline, the oil pipeline in Alaska, as a result of which the ICC lowered the rate to a point which saved the consumers about $900 million a year.

Secondly, the Attorney General in connection with the Alaska natural gas pipeline proceeding issued a report which indicated that if the producers of gas held an interest in the pipeline, it could have an adverse effect, as there would be a monopoly giving them the opportunity to manipulate not only the price but the quantity of gas made available to particular sectors of the consuming public.

Those are just two examples, Mr. Chairman.

Mr. MURPHY of New York. Mr. Chairman, I move to strike the requisite number of words.

I would like to congratulate the gentleman from Connecticut (Mr. DODD) for tightening up a provision that probably should have been in the bill as it was reported to the committee.

As recent lease sales in the Baltimore Canyon, and southern California, have demonstrated, and as the studies prepared by the General Accounting Office, and others have proven, present OCS leasing arrangements suffer from lack of competition. There are many provisions in the present OCS bill—including use of new bidding systems; comments and recommendations by the Attorney General and the FTC on leasing programs and the preparation availability of more prelease information—that should help to provide and promote more competition offshore. However, one important provision which has been included in most recent energy bills, has been excluded—that is antitrust review of lease sales prior to the issuance of a lease. The gentleman's amendment would provide that the Attorney General and the FTC would be able to conduct an antitrust review of each lease sale in order to determine whether such lease sale has been competitive or anticompetitive. The amendment is analogous to those included in legislation already passed by Congress—in the Naval Petroleum Reserve Production Act and the Federal Coal Leasing Act amendments. The amendment has been carefully drafted so as to preclude any delays because of such a review. The Justice Department and the FTC are given the discretion to determine which leases should be commented upon and thus which lease sale should have minimal or extensive review. In addition, it has provided that there should be minimal overlap in the collection of information gathered as all relevant data from other agencies is to be collected in a manner that will protect any confidential or proprietary information.

I should note that I have been told that the Department of Justice, which did not support the amendment as originally introduced, in the committee, does support this provision. They recognize, as should this House, that this amendment would further our intent that our offshore drilling program not lead to further concentration in the petroleum industry, but that on the contrary, it serve to promote free enterprise competition.

Mr. Chairman, I support the amendment, and hope that the committee will agree to it.

Mrs. FENWICK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think this amendment is an excellent one, except for the last clause.

I believe that the time has come when we must discontinue the use of that fancy little ending. I have seen small businesses ruined by that escape clause. It seems to be contrary to commonsense and to decent justice and equity that when a duly constituted agency of the U.S. Government is asked to pass on a contract, or anything else, faithful compliance with that judgment is not a defense in court.

A small business in Louisiana was ruined by this. The Government is not being fair to perfectly honorable people who are trying to get a ruling from their Government. It will be very difficult to support this amendment, which I heartily endorse, if it continues to contain that noxious final clause.

Mr. DODD. Mr. Chairman, if the gentlewoman would yield, I appreciate the gentlewoman's support for every other part of the amendment. Let me try to distinguish the rationale for that particular language and what we are dealing with here. Let me say first that we are not talking about inconsistencies in antitrust laws nor about necessarily a decision on whether or not in fact a monopoly exists. Again I would like to address the attention of the gentlewoman from New Jersey (Mrs. FENWICK) to the standards that will be used in reaching the decision by the Attorney General as to whether or not such inconsistencies exist in reaching a later decision that such a monopoly situation might exist. To permit a company to use as a defense against antitrust action the fact that we did not have an antitrust inconsistency at some earlier point simply would not be fair to the public.

Mrs. FENWICK. Then could we not rephrase that language saying that if at a later date there are violations of the antitrust law, they will be prosecuted. What is not fair is when there is nothing wrong with the lease itself, and they have asked a duly constituted body for a decision and are still liable. Remember, this is not mandatory—there are many companies that may not be looked at which will be fully liable from beginning to end. It is really awful that these duly constituted agencies or bodies may approve a contract and later, when businesses have been told that it is legal, they are open to suit. Should not this be taken into consideration?

Mr. DODD. Certainly that will be the case.

Mrs. FENWICK. But can we put that language in the amendment? Could the gentleman do that?

Mr. DODD. No, I cannot do that. No court is going to necessarily apply or allow as a defense in a later case what has been held in an earlier situation, it has no relationship to this.

Mrs. FENWICK. But will the gentleman from Connecticut (Mr. DODD), agree to an amendment to his amendment to see that that is covered?

Mr. DODD. No. Because it would not be proper to do so. In effect what we would be saying then is that a company may be engaging in practices inconsistent with the antitrust laws and yet allow that company to use as a defense that an Attorney General 20 years ago or 10 years ago made a different decision.

Mrs. FENWICK. I do understand what the gentleman is referring to but what I am trying to say is that I do not think that they ought to be caught on the lease if they have done what they ought to do. If they are doing something illegal then they are fair game.

But there ought to be something made clear in that clause, it seems to me, that any antitrust factor rising out of that lease, and nothing else, if approved by the Justice Department will not be liable to the antitrust laws.

Mr. SEIBERLING. Mr. Chairman, will the gentlewoman yield?

Mrs. FENWICK. Will the gentleman accept such an amendment?

Mr. DODD. I really do not think I could, I think it invokes a possible exposure of the public interest in this particular case.

Mrs. FENWICK. Why? How can we go on like this, seriously speaking? We have contracts submitted to the Federal Trade Commission which is charged as a duly constituted enforcement agency and the people are told that their contract is in complete compliance. So they sign contracts with members of the public, and then later on somebody finds it is not in compliance. The Government agency made a mistake and so they have no defense.

Mr. SEIBERLING. If the gentlewoman will yield, I am a coauthor of this amendment.

Mrs. FENWICK. I am aware of that.

Mr. SEIBERLING. Also I practiced antitrust law before I got into this institution. I believe that any court, despite this disclaimer in the law, is going to take into account, and certainly any jury is going to take into account, whether in fact the Justice Department did have the facts at the time it reviewed and approved a contract. In such case, the Government would surely have to show something more in order to stick a defendant with a violation of the antitrust laws.

Mrs. FENWICK. Then why is it called this?

AMENDMENT OFFERED BY MR. BREAUX TO THE AMENDMENT OFFERED BY MR. DODD

Mr. BREAUX. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. BREAUX to the amendment offered by Mr. DODD: Strike out the words "inconsistent with" wherever they appear in the DODD amendment and insert in lieu thereof, the words "in violation of".

Mr. BREAUX. Mr. Chairman, I apologize for not having a copy of my amendment but it is because I just wrote it.

First of all I would like to make a comment. I think the language the gentleman from Connecticut is offering in his amendment is really not necessary. The Attorney General and the Federal Trade Commission should under their existing authority already be checking to see that companies that are bidding and participating as oil and gas companies are not doing so in violation of any antitrust provisions. That is the existing law of the United States. They should be doing that already.

For us to come in and say in this particular legislation that they should follow the law they already should have to follow, to me does not make a great deal of sense. It is one of the many areas where I think we are adding additional regulations to the law and saying now we have a 30-day period when the Attorney General and the Federal Trade Commission should come in and do what they should be doing under normal circumstances.

If we are to have this type of amendment, I do not think it follows any logic to say the Attorney General or the Federal Trade Commission should look at companies that are bidding on leases and doing anything that is inconsistent with antitrust laws, and if they find that it is consistent with antitrust laws, the Secretary could really void the entire sale and bring it back to day 1, because if we can fail to issue the lease when the sale has been completely finalized merely when they find that what is going on in the bidding process is in violation of the antitrust laws—it seems to me it is either in violation or not. If it is in violation, it should have been stopped. They should have stopped it a long time ago. Instead of saying they can stop all these things and throw out a bid merely because within 30 days they must make a finding within that time that something is inconsistent—that it is not consistent with existing law. If it is inconsistent with the antitrust laws, it does not mean it is in violation. If it is in violation, it should be stopped. My amendment provides they can proceed if it is in violation of the antitrust laws.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, this is a classic example of the ease with which we can make a mistake if we rush into drafting an amendment on the spur of the moment that would apply to a situation which is much more subtle and much more complicated than it may appear to be upon a superficial examination.

Mr. BREAUX. Which amendment, the amendment of the gentleman from Connecticut or the amendment of the genleman from Louisiana?

Mr. SEIBERLING. I am referring to the amendment of the gentleman from Louisiana. The amendment of the gentleman from Connecticut is a very carefully worked out amendment which has been drafted over a period of very many months with the participation of the Justice Department.

Mr. BREAUX. Mr. Chairman, I will not yield any further for argument on the merits of the amendment.

Mr. DODD. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield for a question but not to argue the amendment.

Mr. DODD. Mr. Chairman, there are two points I would make. One is the reason for this amendment is that the Secretary without this language does not have the opportunity to deny a lease sale unless and if in fact there are antitrust affects of the lease sale. It could be challenged immediately in court. To say it could go presently forward would be a drastic mistake.

Second, as the gentleman from Ohio has pointed out, to use the words "in violation of" instead of "inconsistent with" really runs contrary to all the laws we have in this area. If the gentleman will yield further, I would like to read again what was reported to us by the Justice Department:

> In our view, the appropriate standard against which to measure the competitive effects of OCS leasing is whether an OCS lease sale would create or maintain a situation inconsistent with the antitrust laws—the standard which governs the Department's antitrust review responsibilities under various federal statutes.

So this is not some language which has been dreamed up.

Mr. BREAUX. Mr. Chairman, I will not yield any more. I merely make it a point to say if it is in violation, we should stop the sale.

To say it is merely inconsistent, we should stop the whole sale, in my opinion, goes far beyond the intent of any existing law; so I think my amendment is a fair interpretation of how it should be run.

Mr. WIGGINS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the amendment offered by the gentleman from Louisiana is addressed to a problem which exists in the Dodd amendment; but it does not correct it. It creates new problems. The answer to this dilemma is not to support the substitute and create new problems, but rather to beat them both. The cause of all this difficulty is the Dodd amendment. The Dodd amendment sets a novel standard for the Attorney General to make his determinations. He is not required to determine whether conduct is illegal, but rather only that it is inconsistent with the antitrust laws.

Well, who says they are inconsistent? The Attorney General, of course. In other words, he would make decisions based upon his own notions of antitrust policy, rather than on what the law commands. However, if we adopt the Breaux amendment and say that the standard must be violation of law, well, then, I do not expect an advisory opinion out of the Attorney General. I expect an indictment. He certainly cannot condone action which he declares to be in violation of the law. He must proceed immediately against the offender.

There is no point in doctoring up a bad idea with the Breaux substitute amendment.

The answer to this is, as I indicated, kill the Breaux amendment and then kill the Dodd amendment. In that event, we have the best of both worlds.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, I take it the gentleman from California is referring to killing the Breaux amendment and not to killing the gentleman from Louisiana.

Mr. WIGGINS. I apologize for the oversight.

Mr. DODD. Mr. Chairman, the amendment of the gentleman from Louisiana is not the same as the amendment of the gentleman from Connecticut.

Mr. WIGGINS. I do not wish either amendment a happy fate. I think the House would be using good sense to defeat them both.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, the gentleman's comment on the Breaux amendment, I completely agree with. As to the language in the Dodd amendment, even stronger equivalents are in the Atomic Energy Act, the Coal Leasing Act, and the Elk Hills Act. It uses the expression "consistent with the antitrust laws," because the Attorney General would be talking about prospective actions, and it is not until after the fact that a determination can be made as to whether there has been a violation of the law, and that requires a trial and a conviction. So the Breaux amendment presupposes a fact situation that is totally at odds with the actual situation that the Attorney General would be reviewing.

Mr. WIGGINS. Mr. Chairman, I see the gentleman's point with respect to the Breaux amendment and happily accept the gentleman's support in killing that amendment; however, I do not expect the gentleman's support in killing the Dodd amendment. However, the rest of us should join in the assassination.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana (Mr. BREAUX) to the amendment offered by the gentleman from Connecticut (Mr. DODD).

The amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Connecticut (Mr. DODD).

The question was taken; and the Chairman being in doubt, the Committee divided, and there were—ayes 15, noes 24.

Mr. DODD. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. Sixty-one Members are present, not a quorum.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Connecticut (Mr. DODD) for a recorded vote.

Does the gentleman insist upon his request?

Mr. DODD. I do, Mr. Chairman.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 241, noes 162, not voting 29, as follows:

[Roll No. 27]

Mr. AuCOIN changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PANETTA: Page 177, immediately after line 13, insert the following new section:

RESERVATIONS BY THE CONGRESS

SEC. 207. Section 12(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1341) is amended by inserting "(1)" immediately after "(a)" and by adding at the end thereof the following new paragraph:

"(2) The Congress of the United States may, from time to time, withdraw from disposition any of the unleased lands of the outer Continental Shelf by the passage of a concurrent resolution so declaring and identifying the lands to be withdrawn.".

Redesignate sections 207 and 208 as sections 208 and 209, respectively.

Page 128, in the table of contents, redesignate the items relating to section 207 and 208 as 208 and 209, respectively, and insert immediately below the item relating to section 206 the following new item:

SEC. 207. RESERVATIONS BY THE CONGRESS

Mr. PANETTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PANETTA. Mr. Chairman, this amendment is basically in tune with the basic thrust of the legislation and the arguments that have been presented on this bill over the last few days dealing with congressional oversight. The provisions of this bill in themselves provide for congressional oversight. The Fish substitute provided for an element of congressional oversight. I think it is accepted that this issue is too important not to have Congress have the ability to participate in this process.

My amendment would essentially give Congress the same authority as the President has over the disposition of OCS lands. The President now, under the 1953 act, has the power to exclude lands for leasing through executive order. What my proposal would do would be to allow Congress, through concurrent resolution, to have the same power. Obviously, now this could be done by a bill, but it would be subject to presidential veto. Through the concurrent resolution, it would avoid the veto and therefore perfect the power. There are two basic points. One is that this amendment in no way stops the ongoing process of the Secretary in proceeding to lease lands. This proposal only deals with unleased lands. Second, it provides the kind of shared responsibility by the executive and legislative branches which I think is important to the process of decisionmaking on OCS lands.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield.

Mr. MURPHY of New York. Mr. Chairman, after reviewing the gentleman's amendment, it is acceptable to the committee.

Mr. PANETTA. I thank the gentleman.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield.

Mr. FISH. I would like to have a clarification, if I could, of the amendment.

It seems to me that the gentleman is attempting to have Congress to make it possible for Congress by a concurrent resolution mandate that an area not be leased. Is that correct?

Mr. PANETTA. By concurrent resolution of both bodies; that is correct. That is something we could now do, of course, through a bill, but it would be subject to Presidential veto. I think this clarifies that power. It should be provided through concurrent resolution.

Mr. FISH. The gentleman says the committee bill before us has the power of Congress to review these leased programs?

Mr. PANETTA. That is correct.

Mr. FISH. And actually I presume, under its own jurisdiction, there would be oversight of OCS activities?

Mr. PANETTA. That is correct.

Mr. FISH. Now, does the gentleman see any possibility of delay of lease sales if we indeed are going to consider each and every tract, review every tract, and vote upon that?

Mr. PANETTA. No, the essential point is to deal only, as I stated, with unleased lands. There is no inhibition here on the Secretary proceeding with his process and going ahead with the leasing of it should Congress not act on a concurrent resolution, so that he is certainly free to proceed. There would be no delay except and unless Congress decided to proceed with action on a concurrent resolution.

Mr. FISH. What would trigger this congressional review of a particular lease?

Mr. PANETTA. Well, clearly the presentation of a proposed concurrent resolution to the Congress would do that, and would then proceed to go to the appropriate committee for hearings.

Mr. FISH. Well, my point is that the gentleman is going to have a concurrent resolution introduced every time there is a lease sale, and we have got to decide on the basis of whether or not we want to pass it or report it out of the House.

Is the trigger mechanism going to be the interest of one Member in that particular lease area?

Mr. PANETTA. My point is simply this: We have stressed here the congressional oversight and congressional power in dealing in that area. We could do that now through bills. We could introduce legislation to remove a particular area from consideration.

I think it is far better, so far as dealing with the bill area, which would be subject to veto by the President, to simply go with a concurrent resolution if it is the Congress will that we do that, then the Congress should certainly be the final judge on that matter. Then we could make that decision without fear of Presidential veto. That is really all this does.

Mr. FISH. My point is that I would not like to have us consider the merits of every single lease sale that is made on the Outer Continental Shelf, without any need for it. You would have to have a Member introduce a concurrent resolution who personally objected and that he would have to sell the respective committee on his argument. Is that the way the gentleman thinks it would work?

Mr. PANETTA. That is exactly right. Obviously, if Members were introducing specious proposals, they would not get anywhere.

Mr. FISH. So it is not going to work like the current Budget Impoundment Act, where, if the President takes an action on deferrals, then the committee would then have to consider it and report out a bill for the House to vote on?

Mr. PANETTA. That is absolutely right.

Mr. FISH. That would not be the case?

Mr. PANETTA. That is not the case.

Mr. FISH. I thank the gentleman.

Mr. TREEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to ask the author of the amendment a couple of questions. As I read the gentleman's amendment, the Congress could pass this concurrent resolution at any time before the leases were actually signed; is that correct?

Mr. PANETTA. If the gentleman will yield, that is correct. We are only dealing with unleased lands.

Mr. TREEN. There is a lot that goes on in a prospective lease area, a great deal that takes place prior to a lease being signed.

Mr. PANETTA. I understand.

Mr. TREEN. For example, the Secretary of the Interior, by permit, allows companies to go in and do geological and geophysical surveys. Under this bill that might even be stratigraphic onstructure drilling. The land is put up for bid. The companies that are interested go to all of the effort of putting together their bids. Then you have review by the Justice Department. All of this. So it seems to me that the gentleman's amendment is dangerous, in that you could withdraw this land at the last minute, after a lot has been done and much money expended.

Mr. PANETTA. If the gentleman will yield on that point, obviously, if a Member were to introduce a bill and the bill procedure were to proceed, we would have the same problem. What the gentleman should be aware of—and I am sure he is—is the fact that the Congress would nevertheless have to act. Not only would the Congress have to report, but the House pass it and the Senate pass it. That action would be required, before any kind of area would be withdrawn, in the concurrent resolution. If an individual were to introduce a bill to withdraw an area, obviously it would be subject to hearings and to criticisms which might be made. My point is that, once the Congress makes a decision, the House and the Senate were to act on it, it would seem to me at that point the Congress will ought to stand, not subject to a Presidential veto at that point.

Mr. TREEN. I appreciate the gentleman's intent, but I am concerned about the amendment, in that it would make it much easier to take land out of possible production. It does ease it, in the sense that a concurrent resolution would not be subject to a Presidential veto.

But I am very much concerned about the fact that there are no time limitations here, and that a great deal of effort could go into getting ready for a lease sale and then at the last minute Congress might come in with a concurrent resolution and take this land out of the area of exploration and production.

I just do not think this is the time in the history of this country, with the crisis we face on energy and with our balance-of-payments problems, for us to make it easier to take these lands out of production.

Mr. PANETTA. Mr. Chairman, if the gentleman will yield just on that point, it seems to me that if the will of the Congress indeed is reflected in the passage of a concurrent resolution, certainly there would be some substance warranting that kind of action, and at that point I think the membership would certainly reflect its will that something ought to be excluded at that point.

The Congress is not going to act on the basis of very slight evidence or it is not going to act speciously, it seems to me. If we are going to act and if we have the power to act, it seems to me we ought to act as we see fit and not worry about a Presidential veto.

Mr. TREEN. Mr. Chairman, I understand the gentleman's intent here.

However, I oppose the amendment. I think we can accomplish his purpose when that action is necessary by a bill introduced in the regular legislative fashion. This is not needed. It could be done by a separate bill. It could be done in the proper legislative fashion. It could be handled in the same fashion as the gentleman from California (Mr. JOHN L. BURTON) handled the matter with respect to the wilderness area in his district off the coast of California.

Mr. Chairman, I oppose the amendment, and I ask the Members to reject it.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take this time just to ask a couple of questions of the author of the amendment.

No. 1, I take it that after a lease sale has been completed, the Congress at that time, after the completion of the lease sale and after the bids have been received and the contracts awarded, could not come in and invalidate any of the tracts that had been let?

Mr. PANETTA. The gentleman is correct.

Mr. BREAUX. Mr. Chairman, the second question I have, one that gives me some concern, is this:

If the Secretary designates a certain number of tracts to be put up for bid and the bidding process begins, we may find that it is a long, drawn out affair because we would carefully evaluate the value of the tracts so they can get the highest bid. If the Congress at that point starts considering a resolution taking out one or more of those tracts, I think we are going to probably discourage a lot of companies from even submitting a bid on that particular tract, or, in fact, if they do submit one, it might be one that is going to be surprisingly low, for fear that Congress might continue to consider the matter and pass the resolution.

I am wondering if, assuming Congress has not in fact passed the resolution but is just considering it and the Secretary receives bids that are inordinately low,

we are perhaps creating a real problem here by proposing this type of mechanism.

Mr. PANETTA. Mr. Chairman, the point is that in effect if the Members are that concerned about it, we could in fact introduce legislation or introduce a bill to eliminate that problem. That procedure is available to Members, and the same points could then be raised.

In essence, what I am saying is that once a justified proposal has been presented and the Congress and the committees have acted on it, at that point it could be done by a bill, but it is subject to Presidential veto. All I would do is work through the concurrent resolution, because I think that in fact establishes our authority in this area. That is all I am interested in.

Mr. HALL. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Texas.

Mr. HALL. Mr. Chairman, I notice that in the amendment it states that this property could be withdrawn. Now, for how long a period of time under the amendment would that concurrent resolution keep that tract of land out of the marketplace? That is No. 1.

No. 2, what would be necessary to get the property back into the main stream of leasing?

Mr. PANETTA. Mr. Chairman, if the gentleman from Louisiana will yield, I think that would be subject to the terms of the concurrent resolution itself. It would seem to me that the time frame is an issue that could be proposed by the membership. It certainly could be dealt with by the committee, and it certainly could be dealt with by the House when it considers that issue.

So I do not have any particular time frame in mind. I am not arguing that the resolution would provide that it be withdrawn in perpetuity.

Mr. HALL. So it is not the gentleman's intent that it be in perpetuity?

Mr. PANETTA. That is correct.

Mr. HALL. There could be something done at the proper time to get the property back in the main stream of leasing?

Mr. PANETTA. The gentleman is correct.

Mr. HALL. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PANETTA).

The question was taken; and on a division (demanded by Mr. PANETTA) there were—ayes 40, noes 39.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. MILLER OF CALIFORNIA

Mr. MILLER of California, Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MILLER of California: on pages 165–167 of the committee print (dated August 29, 1977), delete everything from page 165, line 24, through page 167, line 5 inclusive.

Renumber subsequent sections accordingly.

Mr. MILLER of California. Mr. Chairman, the purpose of this amendment is to make rational the amendments and the work of the subcommittee and of the full committee here yesterday dealing with the bonus bidding system.

As the Members know, those who sat on the floor during consideration of this bill have gone to graduate school with respect to the bidding system on the Outer Continental Shelf.

Through the Emery amendment, it was determined that the Secretary shall mandate at least 20 percent in alternative bidding systems, and by his own approval, as high as 50 percent in alternative bidding systems.

The rationale for alternative bidding systems is that different tracts present different evidence and that one knows more about the likelihood of oil and the size of the find under some tracts than he knows about the likelihood of a find under other tracts. Moreover, where there is a certainty of oil, there would probably be little reason to require a front-end bonus bid; but, rather, one would be interested in having the oil companies bid on the basis of royalty as the city of Long Beach did in California, because it was very clear that they were going to find a tremendous amount of oil in that State and the city decided that it should share in those revenues.

Mr. Chairman, what the bill says is that after the Secretary has determined that he wants to engage in an alternative bidding system on a sale, he shall then select the tracts for the purposes of the alternative system at random. Therefore, now that he is gathering all of his information, now that he has made determinations as to the Department's view of value, as to the Department's view of the size of the find, and as to the Department's view as to the return expected to the Treasury, we tell him to go out and select those tracts at random.

Mr. Chairman, I dare say that we are greatly endangering the value of revenues that the Treasury will receive; and much of the argument was that, in fact, we will have these losses to the Treasury if we do not go with the bonus bid system.

Mr. Chairman, what this system does as it is now written into law is that it insures that we are going to have a loss to the Treasury. It insures that one does not know what he is doing, so if we were worried about the competency of the Department of the Interior in the past, the bill as it is now written, without this amendment, insures that that incompetency will continue because what, in effect, it says is that. given all of the information that they now have and possess under this law as it is rewritten, they will not be able to use that to determine where they can get the greatest value and determine where the best tracts are for alternative systems.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. Mr. Chairman, I am delighted to yield to our distinguished colleague, the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Chairman, I thank the gentleman for yielding.

I support the gentleman's amendment. The present provision in H.R. 1614 provides for random selection of tracts, unless the Secretary wishes to withdraw specific areas or tracts from use of the random selection method. Some concern has been raised that use of this random selection process could either delay or not permit use of alternative bidding systems for OCS lease sales, and might also create serious management problems. For example, if lease tracts offered under the cash bonus system are on the same geological structure as tracts offered under another system, there may be an inducement to produce directly from a tract which would be subject to a low royalty, and drain higher royalty tracts.

We are happy to accept the gentleman's amendment.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to the amendment of the gentleman from California which would remove a key provision from H.R. 1614. Under H.R. 1614, when the Secretary of Energy decides to offer tracts utilizing experimental bidding methods, he must randomly select the tracts to which these new systems would be applied. This is a simple procedure. It only requires one action on the part of the Secretary and would give rise to no serious management problems as alleged by the amendment's sponsor. This one time division of tracts between old and experimental systems would be done by computer and should not take more than a minute or so. It is impossible for me to understand how this short and simple process could in any way delay lease sales or prevent the use of alternative bidding systems in OCS lease sales which have already been scheduled. There is no truth to any such allegation.

Random selection is a valid scientific tool which is used to insure that the results of an experiment are unbiased. If selection of OCS leasing tracts is not done on the basis of an initial random selection as required in H.R. 1614, how could the Secretary know which system was really the best? Those in charge of designating which bidding systems are to be applied to which tracts could easily prejudice the results of their tests by assigning their favorite bidding system or systems to tracts which seem to hold the greatest amounts of oil or natural gas. If we are to have valid experimentation, we must take steps to prevent any possibility of either intentional or unintentional influencing of tests. Under this amendment an employee of the Department of Interior who devised a new bidding system could make it look good by leasing only likely oil or gas prospects under the new system.

It has been alleged that the present provisions of H.R. 1614 could cause problems where one tract on a geological structure is leased under the cash bonus system and the tract is leased under another system. The claim is that "there may be an inducement to produce directly from a tract which would be subject to a low royalty (bonus bid tract),

and drain higher royality tracts." In the first place, geological structures vary greatly in size and are usually found totally within a single leased tract. Where such a structure extends under more than one lease tract, one company would have to own both tracts before drainage from the higher royalty tract could take place. If more than one company was involved, the one on the higher royalty tract lease could not afford to sit idly by while the other company drained away its profits. In this, the more normal situation, the effect of random selection would be to speed up recovery from nonbonus tracts, because of the fear that if such recovery was not pursued with all possible speed, the lessee's profits would be drained away by the bonus bid lessee.

Assuming that one company would win the bids on two adjoining leases which contain parts of the same geological structure, there is still one factor which prevents any cheating on the part of the lessee regarding the amount of royalty he should be required to pay. The power exists for each lessee to be required to produce from each of his leases at the maximum efficient rate of production. Therefore, there can be no unilateral restraint on production on the part of a lessee in an attempt to avoid the payment of royalties or profit shares under any of the new alternative bidding systems.

H.R. 1614 imposes limitation on the flexibility of the Secretary in determining which bidding system shall be used on any particular tract. Random selection only takes place one time and simply results in a selection of which tracts will be offered under the old lease and which will be offered under the new systems. Random selection is not employed to determine which of the new systems is to be applied to any particular tract.

I urge defeat of the gentleman's amendment to preserve the integrity and scientific impartiality of the bidding system experiments mandated in H.R. 1614.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think it is very important we understand the situation, if we can, at this point. No. 1, we had a system in the bill which said the Secretary can use a whole number of different experimental bid systems in trying to see which one works the best. Yesterday we adopted an amendment which says he can use these 50 percent of the time and the other the rest of the time.

Then in the committee bill we said if he wanted to use these experimental bid systems we should try it across the board and not make any pinpoint decisions to test it here and not there. We adopted the provision in the Murphy bill, which all of a sudden the gentleman does not support, which says we will select the tracts we are going to experiment with by doing it randomly, by putting them in the hat, so to speak, and seeing which ones we are going to use it on, and not by just picking the ones we think it will work really well on or fail on, but we will randomly select the tracts we are going to experiment with.

The second point is we have a provision in the committee bill that clearly says the Secretary may exclude a tract from the use of this random selection method if he determines that using random selection would unduly delay the development or production of oil or gas or not permit a fair return from the lease.

We are saying if he makes a finding or determination it will cause some problems, he does not have to use random selection.

If we are going to experiment, it should be an across-the-board experiment. That is why the committee adopted that amendment.

Mr. MILLER of California. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the author of the amendment, the gentleman from California.

Mr. MILLER of California. Mr. Chairman, my concern would be you are basing this on using this based on scientific evidence, and then we take the scientific evidence and throw it out the door and throw this into the hat, so we end up trying to have a fair test and yet we allow the Secretary to exclude some tracts. It seems to me if the gentleman knew when he was talking about conducting a fair test, we have already said these are untried systems and new systems. It seems to me then we should take all the scientific evidence in our power and apply it to where they have the best likelihood of both returning oil to the companies and returning money to the national treasury.

Mr. BREAUX. The point I am making is if we are going to get a fair test across the board, we cannot pick and choose where to have the tests. We should have them across the board. That is why we have the random selection, so he cannot just pick and choose and say: "Look how well the tests work." Because if we only pick the tracts we know it will work well on, of course we will get positive results. The random selection is the only way to determine whether the process we are going to use is going to work to the satisfaction of everyone.

In the bill we say he can withdraw the experimental tests if he determines it will make a difficulty to use them.

I think in this instance we should join with the gentleman in supporting the committee bill. He has done that consistently in the debate in the last 3 days, so I ask him to join now as I join now in supporting my chairman and leaving this in the bill.

Mr. EMERY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think at this point we ought to underscore some of the points made by the gentleman from Louisiana. What we are talking about is the soundness of scientific methods. If the random selection were to continue on into the future for an unlimited length of time, then the random selection process would certainly be detrimental to the development of oil and the cost of oil that is developed. Certainly if the random selection showed one method were much better than others, then at some point in time we have to move in the direction of promoting that method and using it, because it will be best for the consumer, it will be best for the oil industry, and it will be best for the people who are depending on the rapid development of that petroleum.

But until we know which one of the methods that we may wish to develop as alternatives to the present system, it is necessary that we create a solid scientific base from all the computer samples and data that we can develop.

One of the things that we must be very careful about is not to unknowingly skew the data. It would be a natural tendency for a bureaucrat or someone with an environmental bias, a consumer bias, or an oil industry bias to pick and choose particular sites and leasing systems that he might favor for some personal reason, regardless of the basis for his selections. Without a random sample of all possible combinations, we cannot know for certain which combination is really best, but, instead, we will only know whether that bureaucrat was a good guesser or a poor guesser.

Mr. MILLER of California. Mr. Chairman, will the gentleman yield?

Mr. EMERY. I yield to the gentleman from California.

Mr. MILLER of California. Mr. Chairman, I think that is a marvelous idea. Why do we not do it after the leases are let? Then we can measure performance under one kind of lease and we can see if we would have or we could have gotten this; but the purpose of the bill is to bring oil into production. We know in certain cases royalty makes sense. In certain cases net profit makes sense. In certain cases some people would insist bonus bidding makes sense; but why fool around with the scientific evidence that certain tracts give you certain amounts of oil that will be available and then ignore that evidence because the random method did not pick that tract. Do that afterward.

Mr. EMERY. Mr. Chairman, I do not think the gentleman appreciates the scientific method involved.

Mr. MILLER of California. I do appreciate it.

Mr. EMERY. It is not fair to try to stack the deck in favor of a particular method. We are trying to avoid doing that. If we wait until after the lease, we will have picked and chosen the areas in advance, regardless of scientific analysis of scientifically collected data.

Mr. MILLER of California. Mr. Chairman, if the gentleman will yield further, that is exactly the point, to pick and choose a method which is most compatible with the type of structure you have, based upon long history in other countries, long history in the oil industry how that is done, not to shoot the shotgun and say we pick certain tracts; not at all.

Mr. EMERY. Mr. Chairman, if I may reclaim my time, there is a provision in the bill that shows if one method has proven itself, obviously you can shift to that method.

Another thing you have to realize is

that when tracts are picked after the random selections method has pointed to an optimum leasing system, they should not be picked totally at random without consideration of geological formations. We should then match geological formations to those leasing mechanisms that have been shown, by scientific examination to lead to the most efficient oil development within them.

Mr. MAGUIRE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have been listening to the debate and, frankly, I am puzzled by just exactly what it is that the proponents of the random approach to this are expecting that they are going to get by way of scientific data. I wonder if anybody could enlighten me on that subject?

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. MAGUIRE. I yield to the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, I think the committee in its wisdom debated this point and adopted the random selection process because we were trying to set up a system that would give us an honest experiment. We will try by random systems across the board to see if it gives us a greater return on revenues. If we allow the Secretary to pick only the areas we want to try to experiment on, what about the other areas he is trying to exclude?

Mr. MAGUIRE. Mr. Chairman, presumably the variables are how much is paid under what sort of arrangement on the one hand and how much oil comes out of the ground on the other; right?

Mr. BREAUX. That is right.

Mr. MAGUIRE. The gentleman from California has already pointed out that once you have that data, you can make whatever calculations you will wish with respect to what might have been the case under any other way of altering the relationship between the variables; so to say that we are looking for some kind of unique and new scientific data, I think really misstates the case. In fact, what we have is several alternative ways of proceeding, some of which are better for some of these things and others are better for other kinds of things.

I think everyone here would agree as to which classes, which kinds of approaches were better.

I fail to understand the argument of the gentleman from Louisiana and the gentleman from Maine. I would urge support for the amendment of the gentleman from California (Mr. MILLER). It seems eminently rational to this Member of Congress.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. MILLER).

The question was taken; and on a division (demanded by Mr. FISH) there were—ayes 27; noes 23.

RECORDED VOTE

Mr. FISH. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 225, noes 174, not voting 33, as follows:

[Roll No. 28]

Findley	Roncalio	Wilson, Bob

The Clerk announced the following pairs:

On this vote:

Mr. Thompson for, with Mr. Jones of Tennessee against.

Mr. Bingham for, with Mr. McDonald against.

Mr. Brown of California for, with Mr. Teague against.

Mr. Dent for, with Mr. Steed against.

Mr. Rostenkowski for, with Mr. Risenhoover against.

Mr. Moss for, with Mr. Mahon against.

Mr. Rosenthal for, with Mr. Hightower against.

Mr. Lehman for, with Mr. Chappell against.

Mr. WHITTEN and Mr. JEFFORDS changed their vote from "aye" to "no."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. FISH

Mr. FISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FISH: Page 192, lines 15 and 16, strike out ", the Secretary of Labor,".

Page 193, line 10, strike out "achievable" and insert in lieu thereof "feasible".

Page 193, line 15, strike out "(1)".

Page 193, strike out lines 16 through 22, and insert in lieu thereof "of this section, the Secretary of the Department in which the Coast Guard is operating shall promulgate regulations or standards applying to diving activities in the waters above the outer Continental Shelf, and to other unregulated hazardous working conditions for which he determines such".

Page 194, strike out lines 3 through 10.

Page 197, line —, strike out "Secretary of Labor: and insert in lieu thereof "Secretary of the Department in which the Coast Guard is operating.

Page 197, line 12, strike out ", the Secretary of Labor,".

Page 197, line 18, strike out "of Labor" and insert in lieu thereof "of the Department in which the Coast Guard is operating".

Page 197, line 25, strike out ", the Secretary of Labor,".

Page 198, beginning on line 10, strike out "the Secretary of Labor and".

Mr. FISH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. FISH. Mr. Chairman, because of the hour, I thought it would be appropriate, while we have so many Members in the room, to get to an exciting eye-opener subject, which is, of course, that of OSHA.

Mr. Chairman the amendment that I am offering will strike references to OSHA wherever they appear in this bill.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman. I ask unanimous consent to make the following technical corrections to my amendment previously adopted as an amendment to the amendment offered by Mr. STUDDS:

On the first page of my amendment, after line 5, insert the following: On page 2, line 23, insert "and each pipeline permit holder" immediately after "lease holder".

On page 7 of my amendment, in subsection (L) (2) insert "commercial" immediately before "fisherman".

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. FISH. Mr. Chairman, this amendment seeks to restore the present jurisdictions of both the Coast Guard and OSHA. The Coast Guard, in my amendment, would be kept in its present status of lead agency. The Coast Guard's mission since its inception has been the protection of life at sea. Their exploits are legion and they have done their job well. In the matter of expertise in promulgating and enforcing safety requirements in the marine environment, it is clear that there is no group of men and women more capable and dedicated doing an excellent job than the U.S. Coast Guard. They understand the difference between operations in the marine environment and in a factory on land.

In the matter of safety in commercial diving, the Coast Guard has cooperated closely with those involved in this profession. The divers and the companies they work for have worked with the Coast Guard in setting unbelievably detailed and comprehensive regulations that the industry itself has enforced. The expansion of Outer Continental Shelf oil and gas operations in recent years has given rise to a similar expansion of the number of divers and diving companies operating in the seas off our coasts. The Coast Guard working with OSHA assistance has promulgated diver safety regulations. This is precisely the cooperation, I seek to preserve by offering my amendment. There must be a single lead agency. Two heads are not better than one when they are attached to the same body!

The Outer Continental Shelf Lands Act (OCSLA) presently gives the Coast Guard the duty to regulate "safety equipment and other matters relating to the promotion of safety of life and property." The Occupational Safety and Health Act in section 4(b)(1) requires that the Occupational Safety and Health Administration of the Department of Lazor act to insure worker safety only in areas where agencies with specific grants of jurisdiction have not acted to carry out their responsibility. That act clearly states that the exercise of power by the Department of Labor is only done on a stopgap (interim) basis and that no permanent concurrent jurisdiction was granted to the Department of Labor. The legislative history of the Occupational Safety and Health Act makes it very clear that the Congress rejected the idea of granting the Department of Labor any permanent concurrent jurisdiction where other agencies have statutory jurisdiction for health and safety matters. The action of the ad hoc select committee would, if enacted into law, result in a significant enlargement of OSHA's role in OCS regulations.

H.R. 1614 would greatly expand OSHA's jurisdiction and make it into the lead agency in the area of commercial diving on the OCS.

The legislation states:

Notwithstanding section 4(b)(1) of the Occupational Safety and Health Act of 1970, regulations for occupational safety and health shall be promulgated and enforced by the Department of Labor and the Department in which the Coast Guard is operating, in accordance with their respective statutory authority.

Mr. Chairman, I must protest the inclusion of these sections in the Outer Continental Shelf legislation. First, the appropriate committee for matters relating to OSHA is the House Education and Labor Committee which was not represented in the ad hoc committee. What has been written in H.R. 1614 is not simply a reiteration of existing OSHA law. It is instead a complete change from the original intent of Congress. The Education and Labor Committee never got to review this important change in the law.

Although, I am sure, the people at OSHA are hard working and devoted to their task, they are not experts in the area of marine safety.

The horror stories about OSHA are well known to all of us. Every time they have attempted to move into a new area, chaos erupts. In 1976, the American farmer was subjected to the bionic flagman, the privy on the prairie, and other proposed OSHA regulations that were stopped only through congressional action.

OSHA has already attempted to issue regulations covering divers. But due to a suit the divers instituted against OSHA, a Federal District Court issued an injunction against OSHA preventing regulations. I might add that OSHA was aware that the Coast Guard was drafting their own regulations in this area, and that the issuance of these regulations by OSHA was contrary to recommendations made by members of the House Education and Labor Committee. The Coast Guard has since published these regulations, and expects promulgation shortly.

The provisions of H.R. 1614, giving specific instructions on updating of regulations, and specific authority for enforcement are commendable; however, the inclusion of OSHA in these areas would be unfortunate even disastrous. The administration has proposed an amendment to H.R. 1614 which would also prevent OSHA from undertaking new responsibilities in the enforcement of OCS safety regulations.

My amendment eliminates expansion of OSHA from the provisions of H.R. 1614, while retaining the language of sections 21 and 22 and retaining the present jurisdictions of OSHA and the Coast Guard.

The purposes for which these sections were included in H.R. 1614, are retained, will provide for improvement in the health and safety of the human environment on the OCS.

I hope this amendment will be adopted.

The CHAIRMAN. The time of the gentleman from New York (Mr. FISH) has expired.

(By unanimous consent, Mr. FISH was allowed to proceed for 4 additional minutes.)

AMENDMENT OFFERED BY MR. MURPHY OF NEW YORK AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. FISH

Mr. MURPHY of New York. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The clerk read as follows:

Amendment offered by Mr. MURPHY of New York as a substitute for the amendment offered by Mr. FISH: On page 193, strike lines 15 to 24 and on page 194 strike lines 1 to 3 and insert: "(c) Notwithstanding section 4 (b)(1) of the Occupa-".

Mr. FISH. Mr. Chairman, I reserve a point of order against the amendment.

I do so because I was not exactly sure which amendment the gentleman was going to offer, and I still have not got it in front of me, but if indeed his amendment strikes or is an amendment to a provision which I strike, I do not think it is in order.

The CHAIRMAN. The gentleman from New York (Mr. FISH) reserves a point of order against the amendment.

The Chair recognizes the gentleman from New York (Mr. MURPHY) for 5 minutes in support of his amendment.

Mr. MURPHY of New York. Mr. Chairman, the amendment as offered by my colleague, the gentleman from New York, would replace vital provisions of H.R. 1614 that were clearly debated and compromised and worked on very carefully by the committee and they provide for modernized and improved safety regulations and enforcement.

Specifically, the amendment effectively eliminates the strong worker safety protection provisions—which require preparation of regulations for hazardous working activities, and the involvement of Department of Labor, using the Occupational Safety and Health Administration, in promulgating and enforcing the worker safety regulations. Finally, it eliminates an important provision of this bill encouraging coordination of regulatory activities.

As detailed at the hearings, many areas of OCS activities have been unregulated. Until recently, for example, activities as to divers offshore had been totally unregulated, despite the clear proof of their hazardous nature. It was not until the Occupational Safety and Health Administration prepared interim regulations, later withdrawn, and then final regulations, for hazardous working activities as to divers that these divers were protected. It is also clear from the testimony of witnesses from both of the Department of Labor and the Coast Guard, that Labor and Coast Guard continued to work together to prepare and implement safety regulations. This bill does not in any way affect that cooperation. Rather, it provides a procedure and a machinery to insure such cooperation does occur. This section simply provides that OSHA, with primary jurisdiction over Occupational Safety and Health industrywide, and with its special expertise, is not to be displaced in the development, enforcement, and promulgation of regulations concerning occupational safety and health on the Outer Continental Shelf by the action of any other agency, including the Federal and State governments, so as to avoid inconsistent or duplicative requirements. In addition, to allow all citizens and lessees to know the entire regulatory scheme surrounding OCS activities, the bill provides that a compilation of all safety and other regulations are to be prepared and made available. The gentleman's amendment by deleting these two important provisions, could lead to confusion, and a bureaucratic nightmare.

My substitute is intended to clarify problems and concerns that have been raised in the provisions of H.R. 1614 providing for input by OSHA into the OCS safety regulations and enforcement. At the time of consideration by the ad hoc committee no regulations had been promulgated for divers' safety. Such regulations have now been promulgated. Therefore this amendment removes the language providing for any such regulations to be issued.

The deletion of this language in no way affects OSHA's current power in section 6 of the Occupational Safety and Health Act to propose and promulgate interim regulations for hazardous working conditions.

The substitute also makes it clear that section 21 does not grant leading agency responsibility to Labor and OSHA as to workers' safety on the OCS. Labor and Coast Guard as specifically stated on line 7, page 199, are to act "in accordance with and respect to their statutory authority."

All section 21(c) now requires is that the Coast Guard must work with OSHA in promulgating and enforcing appropriate regulations. OSHA is not to be ousted. The Coast Guard is not limited in its present authority as the lead agency on the Continental Shelf; both must work together and that, simply stated, is what the substitute does.

POINT OF ORDER

The CHAIRMAN. Does the gentleman from New York (Mr. FISH) insist on his point of order?

Mr. FISH. Mr. Chairman, I just want a clarification here. If I understand the gentleman here, the gentleman is striking out lines 15 through 24 on page 193 and lines 1 and 2 on page 194. That is the amendment that I have been handed; is that correct?

Mr. MURPHY of New York. Mr. Chairman, if the gentleman will yield, that is substantially what the substitute does.

Mr. FISH. Well, now, Mr. Chairman, this language in my amendment calls for some revision of that language, but does not strike out several of the lines, the lines that are the subject of the gentleman's offered substitute. I just was not aware that that would be in order in the light of the part of my amendment that deals with pages 193 and 194.

The CHAIRMAN. Does the gentleman from New York (Mr. FISH) insist on his point of order?

Mr. FISH. Yes, Mr. Chairman.

The CHAIRMAN. Does the gentleman from New York (Mr. MURPHY) desire to be heard upon the point of order?

Mr. MURPHY of New York. Yes, Mr. Chairman.

Mr. Chairman, I would say that the substitute strikes a portion of the language; that the amendment of the gentleman clearly strikes a much larger area and, accordingly, would be in order.

Mr. FISH. Mr. Chairman, may I be heard?

The CHAIRMAN. The Chair will hear the gentleman from New York.

Mr. FISH. Mr. Chairman, I do not think that is quite accurate. It is just the reverse, that the part struck by the gentleman from New York (Mr. MURPHY) covers more language on page 193 than does that part of the amendment I offered.

Mr. Chairman, this has been characterized as a substitute to my amendment. I understood if that be the case, it would have to be substantially the same.

I direct the Chairman's attention to the fact that my amendment addresses itself to the lines on pages 192 and 193 in three places and pages 194 and 197; so I do not see how the gentleman from New York can be offering a substitute that is narrow in focus and dealing with only one of the several issues that is covered by my amendment.

The CHAIRMAN. The Chair is ready to rule. In the opinion of the Chair, the substitute amendment offered by the gentleman from New York (Mr. MURPHY) deals with a lesser portion of the bill that the gentleman from New York (Mr. FISH) desires to perfect, and as conceded by the gentleman from New York (Mr. FISH) in a more restricted fashion. The Murphy substitute deals only with interim regulations, while the Fish amendment deals with OSHA's role in promulgating both interim and final regulations.

Therefore, the Chair overrules the point of order and holds the substitute to be in order.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and members of the committee, I know there might be a great deal of confusion here. Many Members have heard and read dear colleague letters concerning whether we are going to have OSHA in the business of regulating offshore diving industry authority. The chairman of the committee has offered an amendment which knocks out a portion of what they initially tried to do in making OSHA the lead agency as far as writing regulations for the offshore diving industry. In that sense, it is an improvement.

However, I think the amendment offered by the gentleman from New York (Mr. FISH) is really saying, "No OSHA in OCS activities," which is a far more preferable approach.

We are talking about activites that are going on offshore; that is, activities over water. Diving activities are normally conducted from vessels, from ships, from boats, which are already regulated and watched over by the Coast Guard. So, what we are trying to do, I think, with the adoption of the amendment offered by the gentleman from New York is split up the jurisdiction and say, "All right, let OSHA regulate diving activities. Let them try and fight it out with the Coast Guard as to who is going to have jurisdiction, and somehow let them come up with another set of rules when the Coast Guard is going to regulate ships, vessels, that carry the divers, but let OSHA become involved in regulating divers' activities."

We have enough problems without bringing OSHA into the picture. I question very seriously, how are we going to carry out the section which would be left in there saying that OSHA should participate in writing regulations and enforcing them? How is the Department of Labor going to participate in regulating diving operations? Are we going to buy vessels and ships so that the Department of Labor can go offshore and follow diving vessels to find out that they are in fact operating according to what the Department of Labor thinks they should be doing?

The Coast Guard has the manpower, the equipment; they have published a set of rules and regulations which affect and regulate the diving industry. I just think that it is a sad, sad mistake if we go in and put OSHA in the business of regulating basically what are maritime activities.

I cannot understand why anybody who looks at what has happened to them would think the record of OSHA is so good in enforcing safety that we should now give them additional duties which

they do not have the experience for, to buy vessels and ships, when the Coast Guard is already equipped to do that.

Mrs. BOGGS. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentlewoman from Louisiana.

Mrs. BOGGS. If OSHA does have these responsibilities under this bill, will there be additional inspectors who will be trained and be on the line in the offshore industries?

Mr. BREAUX. That is a very good point. Right now in Louisiana, just in the Gulf of Mexico, we have approximately 100,000 men and women working in offshore industry. If OSHA is going to become involved in regulating this very hazardous occupation, I do not think anywhere in this bill do we authorize any additional manpower.

Mrs. BOGGS. I have been very upset because OSHA has had some very severe difficulties in my district recently. They have not, apparently, had sufficient manpower and training to be able to protect the persons who are in the hazardous business of working in the grain elevators.

The hazardous business of diving and being out on the Outer Continental Shelf operations is an additional difficulty with which they are unfamiliar.

Mr. BREAUX. The gentlewoman makes a very important point. If we look at the record of OSHA in the recent grain elevator problems, I think they have enough to do just trying to clean up that mess and getting additional manpower to properly regulate grain elevators. To give them additional authority, which I do not think they have the manpower to carry out in this area, I think is totally unacceptable.

Mrs. BOGGS. I was going to make the point, if the gentleman will yield, that at the time that OSHA really went into being, the grain sales of the United States were greatly increased, and it was apparently a Government decision and program to have increased grain sales. And yet when OSHA set up its inspection agency, it did not take this new Federal program into account. And here we are, setting up another Federal program. I was, naturally, interested in whether OSHA would be given the manpower and the training to accommodate it.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. BREAUX) has expired.

(On request of Mr. MURPHY of New York and by unanimous consent, Mr. BREAUX was allowed to proceed for 2 additional minutes.)

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, I would like to point out to my colleagues that in December, 1976, and January, 1977, in New Orleans, the Coast Guard and OSHA had worked out complete working agreements and arrangements between themselves. This legislation, as this substitute is clearly drafted, involves the Coast Guard as the enforcement agency on the Outer Continental Shelf where safety regulations are in effect. But it permits and specifically brings OSHA into that regulation-making process because of their responsibility to the safety of the workingmen. It does not give OSHA the lead responsibility but does bring them in in a clearly articulated role.

Mr. BREAUX. It clearly says, beginning on line 4, page 194, that:

> * * * regulations for occupational safety and health shall be promulgated and enforced by the Department of Labor and the department in which the Coast Guard is operating * * *

I do not think OSHA should have any business there. How would they get offshore. They do not even have a boat.

Mr. LIVINGSTON. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Louisiana.

Mr. LIVINGSTON. Mr. Chairman, I would like to associate myself with the remarks of the gentleman from Louisiana (Mr. BREAUX), as well as with the remarks of the gentlewoman from Louisiana (Mrs. BOGGS). OSHA has been under fire for several years now for some of their absurd regulations. To date, the President is considering cutting back a number of those regulations. As a matter of fact, I understand there are some 47 regulations on the books of OSHA to teach people how to climb ladders. I think this body ought to be very deliberate and ought to weigh the position of the gentleman from Louisiana (Mr. BREAUX) very carefully. Therefore, I would ask my colleagues to endorse and support his position to reject the amendment by the gentleman from New York (Mr. MURPHY), and to support the amendment by the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I had previously talked about my amendment, which strikes reference to OSHA's responsibility on the Outer Continental Shelf, making reference to safety regulations, on page 192, to enforcements on page 194 and 195, and through 198. The substitute amendment offered by the gentleman from New York goes to one paragraph, one-half page, on 193, dealing with divers safety in the promulgation of the interim regulations and standards.

May I ask my chairman, is it not true that what the gentleman is asking this body to do, is to delete a provision in the law that is not needed. By that I mean the gentleman is striking the provision from the bill that calls for OSHA and the Coast Guard to issue temporary regulations, which they have already done?

Mr. MURPHY of New York. The Gentleman is correct.

Mr. FISH. So, in other words, the gentleman's amendment does absolutely nothing in changing the OSHA parts of this bill. It does not touch on safety, it does not touch on enforcement, but it strikes out some matters of diversion in my amendment, referring to a provision which is of little or no consequence except historically.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield at that point?

Mr. FISH. I certainly will yield to the gentleman.

Mr. MURPHY of New York. By striking that language, we make it very clear and explicit that OSHA is not to be denied its statutory role in the promulgation of regulations and enforcement. The amendment clearly improves this language.

Mr. FISH. Absent this bill, there is no authorization for OSHA to be in the Outer Continental Shelf in any capacity, and I think the chairman of the committee knows that.

The gentleman's amendment would change nothing. OSHA would remain a coleader on the Shelf in all safety and enforcement activities—everything except divers. This is the narrow focus of the gentleman's amendment to my amendment, and is a matter which has already been covered by the issuance of regulations by OSHA and by the Coast Guard.

So, Mr. Chairman, I strongly urge a "no" vote on the Murphy substitute and an "aye" vote on my amendment.

Mr. LONG of Louisiana. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from New York, Mr. FISH, and in opposition to the substitute amendment offered by the gentleman from New York (Mr. MURPHY).

The regulatory processes that we now have in effect governing the health and safety of the workers on the Outer Continental Shelf have been handled by the Coast Guard as the lead agency for a long period of time. This has really worked very, very well. The duties have been carried out by the Coast Guard efficiently. They have been carried out effectively by the Coast Guard, with the aid and assistance of OSHA where its assistance was required, with OSHA not sticking its nose in where it was not needed, not sticking its nose in where it was not required.

My main concern with this regulation that would result in pushing OSHA into this area is that we as legislators are perhaps stepping into one of the natural pitfalls in our business of running the government or trying to run the government, and that is in the mistaken belief that legislation is the cure-all for our problems. I think we should have learned by now that legislation is often apt to generate problems rather than cure them.

Many of the Members know, from having listened to the discussions here during the last few days, that we have a great deal of offshore oil development in Louisiana. We have had that for many, many years. We have an absolute minimum of difficulty in the enforcement of safety standards, and we have developed methods that were never tried before. We have tried these methods off the shores of Louisiana, we have had many

years of experience, and many millions of dollars have been expended.

I fear that if we put an overzealous bureaucracy such as OSHA into the offshore oil development to the extent that would occur under the Murphy substitute, we may be creating a situation which demands immediate changes. I feel that our goals would be better accomplished by the way this whole system has developed offshore from Louisiana, and that is with a high degree of safety and with an absolute minimum degree of difficulty.

If we do agree to the Murphy amendment and do not agree to the Fish amendment and OSHA does become even more involved in offshore oil development than it is today, I see a real delay and a real danger resulting from the possible delays that may follow in our offshore oil development as another new agency gets deeper and deeper into the process.

I do not believe that these delays may be much of a problem, for instance, off the coast of New England, but where we have an ongoing operation that is proceeding efficiently as it is in the Gulf of Mexico, where we are dependent on production for a great percentage of our natural oil and gas, I believe the effect would be devastating. The delays that are occasioned by the codification of new rules and regulations and by the expanding of the authority of OSHA—which is what the substitute amendment offered by the gentleman from New York (Mr. MURPHY) would do—would impact on innumerable small business concerns scattered all over the Gulf of Mexico area.

These people basically provide services for this offshore industry. They transport people to and from rigs.

They live in the districts of the gentlewoman from Louisiana (Mrs. BOGGS), of the gentleman from Louisiana (Mr. BREAUX), of the gentleman from Louisiana (Mr. LIVINGSTON), of the gentleman from Louisiana (Mr. TREEN), and in my district, too, practically all along that area and over into Texas. If the operations there were not safe, if the system was not operating well, we would have been hearing about it; and we have not been hearing about it.

Mr. Chairman, I tell the Members this: My theory is, if something ain't broke, we ought not to try to fix it; and I recommend that we do not try to do that here.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the Fish amendment and disagree with the amendment of my colleague, the gentleman from New York (Mr. MURPHY).

Mr. Chairman, let me tell the Members why I rise in support of the Fish amendment.

Section 21 of H.R. 1614 directs OSHA to be the lead agency for regulations of divers on the OCS as well as being directly involved and sharing the lead in other areas with the Secretary of the Interior and the Coast Guard. Why do we now need OSHA in the OCS? The answer is—we do not. Since 1953, the Coast Guard has been charged with regulating health and safety in the marine environment and is far better qualified to continue doing so than OSHA. Granting such authority to the Occupational Safety and Health Administration is clearly a contradiction in OSHA's enabling legislation which states that the agency cannot issue regulations when another agency is already enforcing safety and health requirements. Court cases have already been litigated and won which bear this fact out.

For example, OSHA attempted to issue regulations covering divers last year. Divers in Louisiana took OSHA into Federal court and an injunction was issued halting the implementation of the regulations and OSHA later withdrew them altogether. It should be noted that the regulations OSHA so quickly tried to promulgate before going to court had been estimated by industry to cost anywhere from $34 to $40 million to implement—$34 to $40 million in an industry whose total domestic revenues were estimated to be less than $100 million. On a cost-benefit ratio, this would have made the diving industry one of the heaviest regulated in this country today.

Let me give two other examples by quoting from a column in the Los Angeles Times by Paul Houston on January 31 of this year:

CONFLICTING ORDERS ISSUED—AVAST! U.S. TRIPS UP ON SILLS FOR SAILORS

(By Paul Houston)

WASHINGTON.—Which is worse for sailors to stumble or to drown?

Befuddled owners of merchant ships have been hearing two answers from the government for more than three years.

First the Coast Guard required that all seagoing vessels be equipped with doorsills—high thresholds—to help seal watertight doors and to prevent water from sloshing around the ship.

But then the Occupational Safety and Health Administration said that the high thresholds were a hazard to low-stepping sailors. The agency ordered them removed.

The dispute dragged on until Harrison Wellford, President Carter's man in charge of government reorganization, heard about it. He said Monday he had told OSHA and the Coast Guard. "This is ridiculous. Let's do something about it."

Wellford added with a quip, "We may have to create that rare entity, the movable doorsill."

Wellford also cited a case in which OSHA required slaughterhouses to install steel guardrails around slaughter pits, but the Department of Agriculture ordered the railings removed, saying that blood crusted on them, creating unsanitary conditions.

"This was settled by providing safety belts so that if workers slipped near the blood pit, they wouldn't become part of your next hamburger," Wellford said.

At a luncheon with reporters, Wellford cited these as examples of cases where the government was working at cross purposes. He said the Administration was on schedule in preparing reorganization plans to try to resolve such problems involving too little government coordination and too much regulation.

Mr. Chairman, not only does OSHA not have the authority to regulate the diving industry, it does not have the ability. For example, during oversight hearings on the grain elevator explosions before the House Education and Labor Committee, a witness from the agency testified that the grain elevator accidents were not due to negligence on OSHA's part because they (OSHA) are ill equipped to do the job they are supposed to do. Given that kind of statement, how can Congress in good conscience put OSHA into the marine environment business. Historically, the Coast Guard has been responsible for protecting life at sea and I say they should continue to be.

The proponents of having OSHA on the OCS claim that 26 divers died on the Outer Continental Shelf. These are worldwide figures—there has only been one death in the last 16 months on the U.S. OCS. The deaths in the United States due to OCS development were unpreventable and due to human error. Furthermore, while even one death is tragic, the U.S. safety figures indicate that even when there were no Coast Guard safety regulations promulgated in the United States, the diving industry was safer than the regulated construction, fertilizer, publishing, food, leather and aerospace industries just to name a few.

The point is, the Coast Guard has taken the lead and has promulgated a diving standard. We can protect lives in the Outer Continental Shelf. There is no need to broaden OSHA's authority and I urge my colleagues to support the Fish amendment to keep the agency out of the OCS and reaffirm the Coast Guard's lead agency responsibility in regulating the health and safety of the marine environment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. MURPHY) as a substitute for the amendment offered by the gentleman from New York (Mr. FISH).

The amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. FISH).

The question was taken; and on a division (demanded by Mr. MURPHY of New York) there were—ayes 58, noes 23.

Mr. MURPHY of New York. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DINGELL: Page 147, strike out line 7 and all that follows down through the period on line 6 of page 148 and insert the following:

"SEC. 5. Administration of Leasing of the Outer Continental Shelf.—The Secretary shall administer the provisions of this Act relating to the leasing of the outer Continental Shelf, and shall prescribe such rules and regulations as may be necessary to carry out such provisions. The Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of

the natural resources of the outer Continental Shelf, and the protection of correlative rights therein, and, notwithstanding any other provisions herein, such rules and regulations shall apply to all operations conducted under a lease issued or maintained under the provisions of this Act.".

Mr. DINGELL. Mr. Chairman, I offer this amendment on behalf of the ranking minority member of our subcommittee, Mr. BROWN of Ohio, and myself.

Mr. Chairman, current law applicable to Outer Continental Shelf leasing provides any regulations issued by Interior or the DOE for the preservation of waste and conservation of the natural resources of the shelf and the protection of correlative rights "shall apply to all operations conducted under a lease issued or maintained" under the 1953 act. In short, such regulations apply to existing leases from the date of regulations.

This important authority has been used in several very important instances which are familiar to us. For example, following the disastrous oil spills in the Gulf of Mexico from Chevron platforms and in the Santa Barbara area of California from Union Oil operations, new safety and antipollution regulations were promulgated by Interior to correct deficiencies in lease operations, prevent future spills, and provide liability for damage caused by the spills. This authority was also used in 1974, at the urging of Congressmen REUSS and Moss and myself, to halt the practice by oil companies of flaring or venting huge amounts of natural gas without any payment of royalties for such gas. A May 23, 1974, Interior Department news release estimated that some 60 million Mcf of natural gas was vented or flared during 1973 alone which would otherwise have returned about $2 million in revenues to the United States.

H.R. 1614 seriously restricts this provision of existing law by prohibiting application of safety, antipollution, conservation, and other regulations to existing leases, except "where there is a finding of serious or irreparable harm or damage" to health, life, property, or mineral deposits. Under these limited criteria, it is unlikely that Interior could have stopped the wasteful flaring of natural gas. This weakening of existing law benefits the oil company lessees. Who are they? Why who else—Exxon, Gulf, Texaco, Mobil, Chevron, Union Oil, and oil and gas corporations. It is detrimental to the public interest and could endanger this public resource.

Our amendment restores existing law that has worked well since 1953. It is supported by the administration and we urge its adoption.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, I thank the gentleman from Michigan (Mr. DINGELL) for yielding.

Mr. Chairman, the amendment is acceptable to the committee. We will be happy to accept it.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I am pleased to yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, I would ask the gentleman from Michigan (Mr. DINGELL) if I am correct that what the gentleman is referring to would mean applying the regulations to all existing leases no matter when the regulations are promulgated? Is that what the gentleman is referring to?

Mr. DINGELL. The answer is that the amendment merely continues existing law.

It does not make retroactive that which is not retroactive. As a matter of fact, it does not authorize retroactive issuance of regulations. Regulations under the amendment are only authorized to be prospective in character.

Mr. TREEN. Under the bill, under the section the gentleman is amending, we provide for retrospective application.

Mr. DINGELL. I am not aware that the bill does provide for that. Indeed, I think that would be wrong. What the amendment does is strike a section of the bill which imposes lengthy findings upon the Secretary which I do not regard as being necessary.

Mr. TREEN. Will the gentleman refer me to that section?

Mr. DINGELL. Yes, it is page 148, at the top of the page.

But, more importantly, the section in the committee bill to which I allude and which would be stricken by the amendment and replaced by existing law as drawn could prevent the Secretary from issuing regulations relating to the Santa Barbara oil spill. It could prevent the issuance of regulations relating to liability for damages therefrom or as was done at the urging of the gentleman from California (Mr. Moss) and the gentleman from Wisconsin (Mr. REUSS) and myself when we found that there was very extensive flaring. In that case, Interior used this authority to apply it to existing leases to halt this wasteful practice.

I point out that on May 23, 1974, it was estimated by the Department of the Interior that some 60 million cubic feet of natural gas was lost through flaring in 1973 alone. This wasted gas would have returned some $2 million in revenues to the United States.

The tests imposed under the bill do not require protection of the interests of the United States. I would simply strike the tests and findings that are required and utilize existing law, which has worked splendidly and for which I am unaware of any need for change.

Mr. TREEN. Mr. Chairman, will the gentleman yield further?

Mr. DINGELL. I yield to the gentleman from Louisiana (Mr. TREEN).

Mr. TREEN. Mr. Chairman, I have got to confess I do not have a good grasp of what the gentleman has been offering because it has been difficult to follow and I have not had before me a copy of the amendment.

Mr. DINGELL. I delivered one to the minority desk.

Mr. TREEN. On page 147 of the bill, does the amendment offered by the gentleman affect that material?

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(By unanimous consent, Mr. DINGELL was allowed to proceed for 3 additional minutes.)

Mr. DINGELL. Mr. Chairman, to try to be of help to my good friend and colleague, I seek only to continue the power of the Secretary to issue regulations under existing law, as he does at this time, and not to change that power and apply them to existing leases. The bill as drawn adds a succession of findings, none of which really deal with the full sweep of existing law. They curtail existing law and might in my view deny the Secretary the authority to prevent flaring or to impose additional restraints on the fashion of drilling so as to prevent casing blowouts and things of that kind which have been mischievous and polluted the waters off California and in the Gulf of Mexico.

The simple fact of the matter is existing law works splendidly and I see no reason for the changes which the committee has set out at the top of page 148 in the findings. That is why I urge my colleagues to continue existing law, not to change it in this fashion. It has worked and has prevented flaring and has permitted the Secretary to issue necessary regulations to protect the interests of the United States, to protect the interests of our leaseholders, and to protect the mineral resources to which we address ourselves.

Mr. TREEN. Will the gentleman address himself to page 147 of the bill?

Mr. DINGELL. Yes, I am.

Mr. TREEN. That is beginning on line 17.

Mr. DINGELL. Yes, I have.

Mr. TREEN. The gentleman is striking in effect the material on line 17 down through the end of that page; is he not?

Mr. DINGELL. Yes, and replacing it with the language of the law as it now exists.

Mr. TREEN. All right. I understand that.

Mr. DINGELL. Which is an excellent law and works splendidly.

Mr. TREEN. The committee apparently in its wisdom when it was writing this bill did not feel that way.

Will the gentleman yield further?

Mr. DINGELL. I am glad to yield but I am not prepared to express to the gentleman why the committee chose this course, but I disagree with them.

Mr. TREEN. But you are making a substantive change which is important.

Mr. DINGELL. No, I am continuing the existing law.

Mr. TREEN. But the gentleman is making a substantive change in the bill.

Mr. DINGELL. Yes, but I am continuing existing law.

Mr. TREEN. We ought to understand what the gentleman is doing to the bill, and what he is doing is taking out the provision which provides that if new regulations are promulgated that would impose additional requirements which, in turn, would result in undue delays in exploration or development of the resources, those regulations would not be applicable to existing leases unless the Secretary makes certain findings.

Mr. DINGELL. Maybe the gentleman would like to explain to me what that means and why that language is necessary. I am not aware of any need for that.

I am unaware of any need for that. For that kind of action to take place I am almost certain that the action would be arbitrary.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(By unanimous consent, Mr. DINGELL was allowed to proceed for an additional 2 minutes.)

Mr. DINGELL. Mr. Chairman, if that kind of action by the Secretary were to be retroactive so as to impose additional requirements which would result in undue delays in exploration would result in a situation where probably the Secretary would have to either respond in damages and be subject to lawsuit, or where the Secretary would probably have his rule or regulation upset as being arbitrary or capricious.

Mr. TREEN. Mr. Chairman, if the gentleman will yield further, what the committee was attempting to do is explained in the report on page 130. It was to meet a concern about the retroactive application of new regulations. Let me read from the report:

> Specific concern was raised in the committee that unnecessary regulations that might delay expeditious exploitation of OCS resources might be promulgated. To insure against such a result, the committee provided that any regulation: (1) That imposed additional requirements on lessees; (2) who held a lease prior to the date that a new regulation is proposed; and that (3) resulted in undue delays—must be justified.

Justified, that is, by the Secretary making specific findings. It imposed a burden on him, if he were to impose additional requirements on specific lessees, to make specific findings that such regulations were necessary to prevent serious or unreparable harm a damage to health, life, property, et cetera.

Mr. DINGELL. Mr. Chairman, if the gentleman will yield, that is specifically what I object to, because the way I read this language, it would prevent the Secretary of the Interior from going after the lessee in the Santa Barbara Channel and requiring him to double case and do other things to prevent a blowout and to do other things to the lessee, so we would not have that kind of contamination.

It is also my fear that these findings which are very curiously drafted, that do not deal really with the protection of the United States, would permit flaring of natural gas. In other words, this preventing of flaring might conceivably prevent the lessee from beginning to deliver petroleum products at the earliest minute. The Secretary might not be able to sustain the test as set forth in the bill and, thereby, be denied the right to prevent the flaring which has been going offshore for a number of years; so I seek to use existing law.

I might say to the gentleman, there is no showing anywhere that I am aware of that existing law has been used to unduly delay or hinder the development of mineral resources on the offshore, particularly the section that we are now addressing ourselves to. I stress too, Mr. Chairman, that while my amendment would make new regulations applicable to existing leases, such regulations would not apply to such leases retroactively.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, this is an issue that we debated a long time in the committee and I think the committee position is very sound. Therefore, I oppose the Dingell amendment. Specifically, as I read the amendment of the gentleman from Michigan (Mr. DINGELL), it says that the Secretary in administering this act may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of the natural resources, and so forth.

The committee agrees that the Secretary in promulgating regulations for future lease ought to be able to say in advance what the terms and conditions are going to be; but, if he is going to make his provisions retroactive, a different standard should prescribe.

Many leases have been out there for 20 and 25 years and still are producing leases. The Secretary comes in at this point and says we have some new regulations that are needed and not only are they going to be effective in all future leases, but we are going to go back and pick up everything we have done over the past period of time. I think that is almost unconstitutional.

No. 1, we have allowed a provision in our bill that says the Secretary can make these regulations and he can also provide these additional requirements. He cannot make them retroactive unless the Secretary makes a finding that such regulation is necessary to prevent serious or irreparable harm or damage to health and it will result in an undue delay.

In other words, we tried in committee to say, "Well, he has to make a finding that is not going to produce an undue delay before he can come up with regulations and make those regulations retroactive."

I offered an amendment that said that he could not do it unless it meant no delay whatsoever. The chairman of the committee offered a compromise position and said, "Well, only if it would cause undue delay would he not be able to offer these retroactive regulations." I think that is a very fair and stable position.

Mr. DINGELL. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield.

Mr. DINGELL. The point I made was that there was extensive flaring of natural gas going on. There was flaring of gas worth about $2 million in royalties to the United States. Under the terms on page 148, they would not be able to engage in the immediate correction of the situation.

That is what I am really seeking. I do not seek an existing law as set out in the language. It does not permit retroactive regulations. I am not out to have retroactive regulations. The gentleman ought to know that.

Mr. BREAUX. I would clearly say to members of the committee at this time that what is in the bill right now says the Secretary can promulgate regulations; he can make them retroactive, unless it causes some undue delay. He even has an out there to say if he makes a finding that is necessary, and so forth, to prevent irreparable harm or damage to health, he can still make those regulations. I think the committee position is very sound, and I support it and oppose the Dingell amendment.

Mr. DINGELL. If the gentleman will yield further, I do not seek to make retroactive regulations. Regulations would apply only prospectively, and only from the date that they were made up. I strongly oppose retroactive regulations. It is not in the amendment.

Mr. BREAUX. The thing that gives me concern is the section that says the Secretary may at any time prescribe and he may offer rules and regulations as he determines, and so forth and so on. That means he can do it at any time, after the lease is already granted and producing.

Mr. DINGELL. The gentleman is correct that he can do it at any time, but that language does not say he can do it retroactively. I wrote this language rather carefully. It does not say he can retroactively do it.

Mr. BREAUX. If the gentleman would amend his amendment to say that this is clearly intended to be only prospectively, I think he could probably clarify his amendment a great deal.

Mr. DINGELL. The comments I have made on the matter make very clear what the language is and what the language means. If the gentleman wants to offer an amendment——

Mr. BREAUX. I think very clearly the language saying that he may at any time prescribe such rules and regulations means he can do it to leases already in existence.

Mr. DINGELL. If my good friend from Louisiana would yield again, I would point out that there is nothing here in the legislative history, nothing in the language of the amendment, that says these may be retroactive.

Mr. BREAUX. I differ on the interpretation of the language.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I think the gentleman from Michigan knows very well that the minority has welcomed his participation in this legislation as a leading expert on energy matters in the House, and his insights have been very helpful, and we have accepted every amendment he has proposed. In this case, however, I am not so sure that what he is suggesting falls within the policy and the intent of this legislation.

After all, we did spend some 2½ years on this bill, and we may not all agree with what is in it, but I think at least we knew what we were writing. In this particular case, I think that we have to ask ourselves what the national interest

is, and the answer to this is spelled out in the policy preambles to the legislation, and that is to accelerate the job of producing the vitally needed energy resources on the OCS.

It is for this reason that we changed the existing law and said that no regulation promulgated under this act affecting operations commenced on an existing lease before the effective date of such regulation shall impose any additional requirements which would result in undue delays in the exploration, development, or production of resources. However, we granted the Secretary the authority to institute these new regulations only if serious and irreparable harm would occur. I think the Members would not expect anything more from us than that. It seems to me that if we scrap this new provision and go back to existing law, we are allowing the new regulations to have a potentially devastating effect, without providing any opportunity for the application of commonsense. I do not think this is what the members of the committee had in mind when they were considering this legislation. Therefore, I oppose this amendment.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from Louisiana.

Mr. TREEN. I thank the gentleman for yielding.

Mr. Chairman, I know it is late and the Members are anxious to get on with this. But this amendment is not as innocuous as people might think it is. What we have done in the bill is to say that the Secretary can promulgate these regulations to prevent waste and to preserve natural resources, and so forth, that if he is going to apply new regulations to existing leases and those new regulations would result in undue delays in the exploration, development, or production of resources, then the Secretary has to make a specific finding that that regulation is necessary to prevent serious or irreparable harm or damage to health, life, property, et cetera. In other words, he has the power to issue the regulations. If he is going to issue regulations to existing leases and that would cause undue delay in production, then he has to make a specific finding that irreparable harm would occur.

What is wrong with that kind of language, if we are interested in the production of energy from the OCS?

Mr. FISH. I thank the gentleman for his remarks.

Mr. STUDDS. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak very briefly in favor of the amendment.

I must say that I am somewhat confused to hear from people who have been telling us in the 3-year course of the development of this legislation to leave well enough alone. Again and again and again in the past 3 years the gentleman who has spoken against this amendment has told us, "Why are we tampering with the old Outer Continental Shelf Lands Act? It has worked well for 25 years. Why tamper with it?" We have heard at least five times on the floor this week that "if it ain't broke, don't fix it." This is one case when the committee took a look and said, "It isn't as good as existing law." In this case we agreed that the existing laws are working very well, and I challenge any opponent of this amendment to cite any instance in the past 25 years of the history of this statute where the Secretary of the Interior has used the language of the law which the gentleman from Michigan (Mr. DINGELL) would restore, to delay capriciously or unreasonably the development of any offshore area. Let there be no doubt that the amendment offered by the gentleman from Michigan is not particularly mysterious. It simply restores the language which has been the law of the land for 25 years and which we are told by those who oppose the bill is perfectly fine and ought to be left alone.

May I say, with genuine humility, that the section in our bill which the gentleman from Michigan (Mr. DINGELL) seeks to strike is a very infelicitously written one. In fact, it does not make sense. It essentially reads as follows: "No regulation shall impose any additional requirements which would result in undue delays unless * * *"

What it effectively does is set up two situations in which we authorize undue delays. I submit that does not make any sense of any kind. When you come up with language which is essentially gobbledygook like this, the only wise thing to do is to return to the statute which some say has served us so well for 25 years.

Mr. TREEN. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from Louisiana.

Mr. TREEN. Mr. Chairman, I would have to say that this is a case where you should fix it because it is broke. I am a little surprised with my dear friend from Massachusetts, with whom I have collaborated in "fixing something that was broken"—the lack of compensation for fishermen who get hung up on these pipelines and rigs also, in saying that this language is inartfully drawn, that is a curious statement in light of the chairman's repeated assertion that this bill has been very carefully drawn over 3 years of committee consideration.

For the majority not to defend what we have done in committee is a real surprise to me.

Mr. STUDDS. Mr. Chairman, I think we should recognize that errors may be made by the majority, and I am surprised by the willingness of the gentleman from Louisiana (Mr. TREEN) to authorize in any circumstances, much less under this explicit language of the bill, "undue delays." We do not favor undue delays.

Mr. Chairman, we ask for the adoption of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. DINGELL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WIGGINS

Mr. WIGGINS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WIGGINS: Page 174, strike out "The" on line 13 and all that follows through the period on line 21 and insert in lieu thereof the following: "The Secretary shall approve such plan, as submitted or modified, within 30 days of its submission or resubmission, except that the Secretary shall disapprove such plan if he determines that (A) any proposed activity under such plan would result in any condition described in section 5(a)(2)(A)(i) of this Act, and (B) such proposed activity cannot be modified to avoid such condition. If the Secretary disapproves a plan under the preceding sentence, he may, subject to section 5(a)(2)(B)(i) of this Act, cancel such lease and the lessee shall be entitled to compensation in accordance with the regulations prescribed under section 5(a)(2)(B)(ii) or (iii) of this Act.".

Mr. WIGGINS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WIGGINS. Mr. Chairman, this is an amendment which has previously been submitted to the majority, and I understand that it has the support of the majority. It has also been cleared by our ranking minority member.

The section which I seek to amend deals with the period in which an exploration permit may be suspended for certain stated reasons expressed in the bill. The present bill permits the Secretary to extend without limit the period of suspension. My amendment does provide a limit beyond which the Secretary could not continue to suspend without treating the permit as canceled.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, I appreciate the gentleman's yielding.

Our study of the amendment indicates that it is acceptable. It makes a proper correction, and the majority is happy to accept it.

Mr. WIGGINS. Mr. Chairman, I believe the minority is also in support of my amendment.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, the majority is happy to accept the amendment.

Mr. WIGGINS. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. WIGGINS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. EMERY

Mr. EMERY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EMERY: Page 166, line 17, strike out "and shall" and all that follows through line 23 and insert in lieu thereof a period.

Page 167, immediately after line 13, insert the following new paragraph:

(8) Not later than thirty days before any lease sale, the Secretary shall submit to the Congress and publish in the Federal Register a notice—

(A) identifying any bidding system which will be utilized for such lease sale and the reasons for the utilization of such bidding system; and

(B) designating the lease tracts selected which are to be offered in such sale under the bidding system authorized by subparagraph (A) of paragraph (1) and the lease tracts selected which are to be offered under any one or more of the bidding systems authorized by subparagraphs (B) through (J) of paragraph (1), and the reasons such lease tracts are to be offered under a particular bidding system.

Mr. EMERY. Mr. Chairman, currently, the bill before us, as amended, requires that the Secretary of the Interior file a report to Congress 6 months after the beginning of each fiscal year, detailing the leasing systems he is going to use, the tracts that were offered for lease and those to be offered, the benefits and costs associated with conducting lease sales, reasons why a particular bidding system has been or will not be utilized, and an analysis of the capabilities of each bidding system.

The Secretary is not, and really cannot be bound by the report as pertains to areas for lease or the systems at the time of lease, since any tract can be nominated for lease sale at any time. In addition, neither the legislation nor the act are specific as to the ability of the Secretary to lease an area unless it is nominated, and it should also be pointed out that the area for lease does not have to be confined to a specific tract.

For these reasons, I am offering an amendment that will encourage the administrative branch to provide us with all necessary and pertinent information as pertains to activities on the OCS, by requiring that 30 days prior to each lease sale, the Secretary must report to Congress, as well as publish in the Federal Register, what areas he is offering for lease, and why, under what bidding systems, and why, and what bidding systems are being used with what areas and why.

This amendment will not only provide full disclosure to the public concerning the leasing of energy resources, but also keep Congress informed. It will allow the Congress to fully monitor the success or failure of experimental leasing methods, and the existence or lack of competition, as well as give us a clearer understanding of environmental problems or of unnecessary delays in orderly offshore development.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Maine (Mr. EMERY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. LAGOMARSINO

Mr. LAGOMARSINO. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. LAGOMARSINO: Page 166, immediately after line 13, insert the following:

"(C) If, not later than the thirtieth day before the initial announcement of the tracts selected for inclusion in a proposed lease sale based upon public nominations of lease tracts submitted to the Secretary, the Governor of any State which may be an affected State as a result of such lease sale, or the chief executive officer of any local government of such State which may be an affected local government as a result of such lease sale, requests that the Secretary hold a public hearing to consider suggestions and comments from any residents of the State, the Secretary, prior to such initial announcement, shall hold such a public hearing within the area of such State which is adjacent to the area of the outer Continental Shelf where such lease tracts are located.".

Page 166, line 14, strike out "(C)" and insert in lieu thereof "(D)".

Page 166, line 24, strike out "(D)" and insert in lieu thereof "(E)".

Mr. LAGOMARSINO (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. LAGOMARSINO. Mr. Chairman, I offer an amendment to help promote local public participation in the selection of OCS tracts to be offered for future sale. Development of the Outer Continental Shelf potentially affects the lives, the environment, and the physical makeup of coastal local communities perhaps more than any other Government action. I, therefore, feel it is most important for the local citizens to have an opportunity to participate in a meaningful way in the formulation and selection of areas for future offshore oil and gas development. If we are to rebuild the trust between the Government and the people, we must encourage public input in areas which have a significant impact on their lives and communities. My amendment seeks to do that.

This amendment simply requires the Secretary of Interior to hold a public hearing in the area adjacent to a proposed OCS lease sale, if either the Governor of the affected State or the executive of any affected local government requests such a hearing. It is my hope to provide for meaningful input without requiring additional delays. As such, I felt it best to require the affected local officials to request a local public hearing before making it mandatory. The amendment also provides that the request for a hearing must be made no later than 30 days prior to the Secretary's final selection of the tracts for sale. This will eliminate any delays that might have resulted from a Governor or local executive making a request for local public hearings one of 2 days prior to the Secretary's announcement of final selection.

The amendment requires the hearing to be held prior to the Secretary's final selection of the tracts to be offered for future sale. This will provide for a much greater input and a more meaningful format. The Secretary would have the benefit of the local residents' views prior to making his final determinations on which tracts to be offered.

Following the blowout in the Santa Barbara Channel in 1969, the people of my congressional district are, understandably, suspicious of further offshore development in the Santa Barbara Channel. Indeed, many feel that the Federal Government is bent on making decisions—for or against drilling without taking into consideration the views of the most directly affected residents. Effective public participation will provide an opportunity for these concerned individuals to express their concerns and directly participate in future decisions which stand to substantially affect their lives and their communities, whether they happen to be pro or anti offshore oil development.

Mr. Chairman, this amendment is important to my constituents and I would think to other Members who represent areas which play, or will play, a role in producing the oil and gas which lies off our shores.

I urge adoption of the amendment.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, a study of the amendment shows that it does enhance the language pertaining to the issue of the input by the States, and we certainly will accept this amendment.

Mr. LAGOMARSINO. I thank the gentleman.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I take this time just to make a record, because I think the question might come up later, as it has so frequently, as to whether a provision of this sort might delay any offshore development.

I wonder whether the gentleman would care to comment on that.

Mr. LAGOMARSINO. Yes, I would.

I very carefully constructed, I believe, this amendment to the bill so as to require that the request for a hearing must be made only within 30 days prior to the Secretary's final selection of the tract which he wishes to lease. Therefore, there should be no delay in the leasing program resulting from this amendment.

Mr. FISH. Mr. Chairman, I thank the gentleman, and I am happy to accept his amendment.

Mr. LIVINGSTON. Mr. Chairman, will the gentleman yield?

Mr. LAGOMARSINO. I yield to the gentleman from Louisiana.

Mr. LIVINGSTON. Mr. Chairman, I support the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. LAGOMARSINO).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FORSYTHE

Mr. FORSYTHE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FORSYTHE: Page 190, strike out lines 11 through 19.

Mr. FORSYTHE. Mr. Chairman, this very simple amendment has, I think, a very significant purpose. In the committee bill the language now requires that baseline studies continue to predict impacts that may occur on the Outer Continental Shelf. It just is a completely irrelevant operation, because baseline studies, by definition, are designed to provide benchmarks or starting points against which you can measure the impact of anything that may happen. To say that that benchmark study can predict impacts that are going to occur later down the field just is not so. Therefore this would strike that part of the bill that requires that these baseline studies continue.

In any case, NEOA legislation which would provide for EIS under NEOA law is the place where these impacts would be measured, the place where one would undertake the baseline study as the basis for those impacts as they are established on that baseline study.

So I think we should really change this bill and not find ourselves in a position where we will affect NEPA in a way which I believe is unreasonable, and are presently within NEPA so as to protect this whole situation. Therefore I urge an aye vote on my amendment.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. FORSYTHE. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, if I understand the gentleman correctly, the thrust of his amendment is to eliminate the delay which would occur in what in effect is an additional EIS?

Mr. FORSYTHE. That is essentially what it would do.

Mr. FISH. I am happy to accept the amendment.

Mr. STUDDS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, this amendment was offered in committee by the gentleman from New Jersey and I am sorry to state that I could not understand it in the committee then and I do not understand it now.

The amendment would strike from the bill one sentence. I will read to the committee from that sentence and I believe the Members will see why we have had difficulty understanding the reason why we should strike it. It refers to striking section (3) of section 20 of the bill, which requires baseline studies, environmental base line studies in each region in which there is a lease sale to be conducted. I think it is simple commonsense that we would want to develop all the studies and information possible so that we can measure the possible deterioration of the marine life in the area affected. All of the following language would be stricken out in the amendment proposed by the gentleman from New Jersey (Mr. FORSYTHE):

"(3) In addition to developing baseline information, any study of an area or region, to the extent practicable, shall be designed to predict impacts on the marine biota which may result from chronic low level pollution or large spills associated with outer Continental Shelf production, from the introduction of drill cuttings and drilling muds in the area, and from the laying of pipe to serve the offshore production area, and the impacts of development offshore on the affected and coastal areas.

As I say, Mr. Chairman, the amendment offered by the gentleman from New Jersey (Mr. FORSYTHE) would in fact strike that language. I cannot understand why, and most particularly why someone from a coastal region such as the gentleman from New Jersey, would want to remove from all of the baseline studies data designed to predict impacts on the marine biota which may result from chronic low level pollution or large spills associated with Outer Continental Shelf production. One of the things that our fishermen are most fearful of is the impact of chronic, low-level pollution marine life, especially that in the larval stage floating on the surface of the water. This is data that needs to be known, whether and how this will affect such life. I wonder if the gentleman can tell us why he opposes this kind of information derived from the baseline studies. I would appreciate the gentleman telling us why.

Mr. FORSYTHE. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from New Jersey.

Mr. FORSYTHE. Mr. Chairman, I would like to point out the base line study is the benchmark from which we measure these things. This is the EIS, which is in this section, and just purports to get us the necessary information. It is not that we are opposed to getting this kind of information, but this is the kind of information we have to get and it will be gotten in the definition of the EIS.

Mr. STUDDS. Is the gentleman arguing that this is redundant or that these things are not a proper part of the base line study?

Mr. FORSYTHE. It is not a part of the base line study and it is a part of the EIS.

Mr. STUDDS. I am not about to return to my area and explain to the fishermen why these effects on the Marine biota are not a part of the base line study.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. FORSYTHE).

The amendment was rejected.

AMENDMENT OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURPHY of New York: Section 23(a)(2)(B) page 199, strike lines 12–19 and insert in lieu thereof:

"(B) If the Attorney General has commenced and is diligently prosecuting a civil action in court of the United States of a State with respect to such matter, but in any such action any person having a legal interest which is or may be adversely affected may intervene as a matter of right."

SEC. 23(a)(4) page 199, strike line 25, page 200 strike lines 1–3 and insert in lieu thereof: "In any action commenced pursuant to this section, the Attorney General, upon the request of the Secretary, or any other appropriate Federal official, may intervene as a matter of right."

SEC. 24(a) page 203, line 8, strike "At the re . . ." and strike lines 9–18 and insert in lieu thereof: "Upon a request by the Secretary, the Attorney General may institute a civil action in the District Court of the United States for the District in which the affected operation is located for a temporary restraining order, injunction, or other appropriate remedy to enforce any provision of this Act, any regulation or order issued under this Act, of any term of a lease, license, or permit issued pursuant to this Act.".

SEC. 316, page 260 strike lines 20–26 and insert in lieu thereof the following: "Upon a request by the Secretary, the Attorney General may institute court actions and represent the Fund for all claims under this title.".

Mr. MURPHY of New York (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MURPHY of New York. Mr. Chairman, I am offering this amendment in response to a request of the Carter administration. Presently, the sections in H.R. 1614 dealing with litigation might create ambiguities regarding control of law suits within the Federal Government. This amendment proposes that all litigation be coordinated under the Attorney General rather than being given to others, including the Secretary of the Interior.

One of the main purposes of the 1977 amendments is to provide for coordinated OCS action and in this way speed the OCS exploration, development, and production process. I, therefore, urge you to adopt this important amendment, which does precisely that.

Mr. WIGGINS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I listened very diligently to the reading of the amendment. It is to a section that I have an interest in and I am not certain I caught every word. It would be helpful to me if one of the staff would bring me a copy. In the meantime I will try to say something useful.

This is an amendment to section 23 dealing with citizen suits. I have had some trouble with this section, Mr. Chairman, because it affects or apparently affects the law of standing to sue. I would like the chairman to affirm, if he is able to do so, that it is not the intent of the committee in recommending citizens' suits to alter the law of standing, and that we merely are adopting the law in the Alyeska case.

Mr. MURPHY of New York. The committee report states, that gentleman is correct, that we are not changing the standing.

Mr. WIGGINS. With respect to the amendment, it appears to give more con-

trol over litigation to the Attorney General. Is that true?

Mr. MURPHY of New York. That is correct.

Mr. WIGGINS. That is an objective which I support, and upon that understanding I would support the amendment, especially in view of the gentleman's statement just made that this section does not alter the law of standing. Since no change in the law of standing is made, it appears that the entire section is surplusage. It does not have much effect, but since it can do no harm I have no problem endorsing the amendment and the section.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. MURPHY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. FISH

Mr. FISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FISH: Page 225, strike out 13 through 19 and insert in lieu thereof the following:

"(2) the term 'small refiner' has the meaning given such term by Small Business Administration Standards 128.3–8(d) and (g)."

Mr. FISH. Mr. Chairman, the purpose of this amendment is to provide an accurate and precise small business standard for the purposes of this section.

Mr. Chairman, under this section, the Small Business Administration is referenced as the standard for "small" as pertains to oil refiners and gas processors. Since the Small Business Administration has several sets of standards that are used for service contracts, supply contracts, and other purposes, I have selected the standard for supply contracts since that is one of the larger standards, and most closely meets the standards as contained in the Emergency Petroleum Allocation Act.

The reason the standard under the EPAA is not used, as it was earlier in the bill under the 20-percent small business set-aside, is that gas processors are not dealt with under EPAA.

This is a simple amendment, technical in nature, and I hope it will be accepted.

In striking this provision from the bill, my amendment also eliminates in the definition of "small refiner" the inclusion of refineries that are not in operation.

If, as has been stated, this language is meant to include those refineries, or processors that have been temporarily out of business due to market problems, then again there is no need for this language as this is handled by SBA standards. It seems to me that by including this language in the bill, we are providing the opportunity for some people to use this as a tax dodge.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from New York.

Mr. MURPHY of New York. Mr. Chairman, the gentleman's amendment is worthy and the majority will accept it. The amendment would adopt the definition used in the regulations of the Small Business Administration for the small refiners provision which provides that those regulations may be changed by the SBA in the future if necessary.

We support the gentleman's amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. FISH):

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: On page 227, strike out lines 3 through 15, and insert in lieu thereof the following:

"SEC. 29. RESTRICTIONS ON EMPLOYMENT.—No full-time officer or employee of the Department of Interior who directly or indirectly discharged duties or responsibilities under this Act, and who was at any time during the twelve months preceding the termination of his employment with the Department compensated under the Executive Schedule or compensated at or above the annual rate of basic pay for grade GS–16 of the General Schedule shall—

"(a) within two years after his employment with the Department has ceased, knowingly act as agent or attorney for, or otherwise represent, any other person (except the United States), in any formal or informal appearance before, or with the intent to influence, make any oral or written communication on behalf of any other person (except the United States) to, or knowingly aid or assist in representing any other person (except the United States) in any formal or informal appearance before—

"(1) any department, agency, or court of the United States, or any officer or employee thereof, and

"(2) in connection with any judicial or other proceeding, application, request for a ruling or other determination, regulation, order, lease, permit, rulemaking, or other particular matter involving a specific party or parties in which the United States is a party or has a direct and substantial interest, and

"(3) which was actually pending under his official responsibility as an officer or employee within a period of one year prior to the termination of such responsibility or in which he participated personally and substantially as an officer or employee; or

"(b) within one year after his employment with the Department has ceased, knowingly act as agent or attorney for or otherwise represent any other person (except the United States) in any formal or informal appearance before, or with the intent to influence, make any oral or written communication on behalf of any other person (except the United States) to—

"(1) the Department of Interior, or any officer or employee thereof, and

"(2) in connection with any judicial, rulemaking, regulation, order, lease, permit, regulation, or other particular matter, and

"(3) which is pending before the Department of Interior or in which the Department has a direct and substantial interest.".

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HUGHES. Mr. Chairman, the purpose of my substitute for section 29 is to bring this section in line with the recommendations recently made by the House Judiciary Committee.

I offered the original language of section 29—the language that is in H.R. 1614 at the present time—in response to the serious problem of the "revolving door" that has existed between the highest levels of government and industry.

The current language prohibits high-level Interior Department employees from accepting any employment with a regulated industry for a period of 2 years after leaving Government. While this would have accomplished our purpose, many have felt that the restriction was too onerous, and that it might produce an unfair result.

The Judiciary Committee has given great attention to this problem, and has made its own recommendations. My amendment would incorporate those recommendations into H.R. 1614.

Basically, my substitute amendment provides that former high-ranking Interior Department employees may not represent a party other than the United States for a period of 2 years after leaving the Interior Department, if that representation relates to a matter that was within his official responsibility.

It also prohibits any effort by a former high-ranking employee to influence the Interior Department on any matter for a period of 1 year after leaving the Department.

The basic problem which this section seeks to deal with is the ease with which high level industry officials, with a strong interest in their own firm's success, have been drawn into and out of the ranks of government, which is supposed to regulate and make decisions based on the public interest.

This problem, of course, is not unique to the Department of the Interior. But it is revealing that a former Secretary of Interior, Stewart L. Udall, called the potential abuses of the revolving door system "incestuous and corrupting."

To illustrate the extent of this problem, I will refer to an October 1976 study by Common Cause. As examples, they found that 17 of the 36 regulatory commissioners who left Government between 1971 and 1975 went with companies that their agencies had been regulating, or for their law firms.

In the same time period, all but 1 of the 12 attorneys who left the Food and Drug Administration went to work for FDA-regulated companies or their law firms.

Of 29 former officials who left Government for industry, 20 contacted high-ranking associates in their former agencies about policy matters or specific proceedings.

In the Department of the Interior, Russell Cameron left his position as Bureau of Mines oil shale supervisor to become president of Cameron Engineers, Inc., which specializes in mining and is heavily involved in the oil shale area. He wrote to former Secretary of the Interior Stanley Hathaway urging increased Government promotion of the oil shale industry.

Another example is that of Stephen Wakefield who left his post as Deputy Assistant Secretary for Energy Affairs to join Baker & Botts, which represents oil and gas companies. He wrote to

Secretary Thomas Kleppe on behalf of a gas company requesting a waiver of a requirement to file a statement of production before bidding on oil and gas leases.

The amendment I am offering seeks to restrict that kind of communication, or attempt to influence, and remove any incentive a firm might have to hire a former officer of Government for the influence he might carry with his old agency.

This is not a new concept for the House. We have agreed to a much stricter form of the amendment I am offering on three prior occasions—in July of 1976 when the OCS amendments were last before us, again in July of 1976 when we considered the Nuclear Fuel Assurance Act, and also in September 1976, when we considered the Defense Officer Personnel Management Act.

It is certainly not inappropriate for an industry to hire a person who is an expert in Government regulations so that they can draw on his or her experience to keep their operations consistent with what the law requires of them. What is inappropriate is for such individuals to exercise undue influence with their former agencies in the resolution of matters they might have participated in while employed by the Government.

The language I am offering would prohibit that type of activity without working any undue hardship. I urge my colleagues to support this much needed reform.

Mr. MURPHY of New York. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the committee is happy to accept the gentleman's amendment.

Mr. WIGGINS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, nobody could quickly and happily accept an amendment which had as its consequence the denial of the opportunity for employment to a former Federal official; but that, of course, is the effect of this amendment.

Now, this matter of the so-called revolving door, that is, people moving out of the Federal Establishment and into the private sector and capitalizing on their expertise, is a complicated problem that extends far beyond the Department of the Interior.

The Congress is going to deal comprehensively with this subject in legislation pending before another committee, to establish a uniform law with respect to employees generally, and to regulating their right to enter into certain transactions affecting their former employer. I think the gentleman from New Jersey is aware of legislation which was before the House Judiciary Committee affecting this subject. In light of the pendency of that bill, which deals comprehensively with all Federal employees, it would be unwise to anticipate that legislation now and deal with the employees of the Department of the Interior only.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. WIGGINS. I yield.

Mr. HUGHES. As the gentleman well knows, we have not had a rule granted for that particular legislation, and we are not at all certain just exactly what is going to occur. We do know that the language I am submitting is in conformity with the broad criteria which is established in the House Judiciary Committee legislation. After going through those hearings and examining the problems in depth, I am satisfied that the language I am offering is much preferable to the language presently in the legislation.

I also believe that since we are legislating on a very important subject, the Outer Continental Shelf, and since many of the major problems have occurred in areas dealing with the energy industry, it is important that we have the kind of conflict-of-interest provision that is inherent in this amendment. I do not think we can wait until perhaps the Senate and the House adopt legislation and send it to the President. I think we have an opportunity to do it now, and we ought to do it now.

Mr. WIGGINS. I appreciate the gentleman's point of view. This proposal applies only to employees of the Department of the Interior. It does not apply to employees of other affected agencies such as the Department of Energy. It does not apply to Members of Congress, fortunately.

The point is, I think that the way to deal with this problem is comprehensively rather than on a rifle shot basis, affecting only one agency. I would urge my colleagues to vote against the amendment, not because they disagree conceptually with what my colleague is attempting to achieve, but rather because they disagree that it should be handled in this way.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

The question was taken; and on a division (demanded by Mr. HUGHES) there were—ayes, 20; noes 15.

So the amendment was agreed to.

AMENDMENT OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURPHY of New York: On page 207, strike lines 15–20 and insert in lieu thereof: "The Secretary shall, at least once in each frontier area, declare the approval of a development and production plan or plans to be a major Federal action. In preparing an environmental impact statement on such action, the Secretary shall evaluate the cumulative effect on the area and the affected states as a result of activities proposed in the plan or plans submitted for approval, plans previously approved and available preliminary plans for production in the area."

On page 207, strike lines 21–22, and insert in lieu thereof:

"(2) The Secretary may require lessees of tracts for which development and production plans have not been approved, to submit preliminary or final plans for their . . ."

Mr. MURPHY of New York. Mr. Chairman, before we start the debate on this amendment, I would like to ask my colleague from New York if we could perhaps get some agreement on time? I would ask my colleague, the gentleman from Louisiana (Mr. BREAUX), to participate in this colloquy. We have just about concluded most of the amendments, with the exception of what we feel are maybe two or three major issues, particularly revenue sharing, and then the question of "buy and sell America." I think if we conclude this amendment, perhaps we could ask unanimous consent that debate on all amendments and substitutes to H.R. 1614 be concluded and a final vote taken at 2 o'clock tomorrow.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I will yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, if I understand the gentleman correctly, we will be rising in about 40 minutes or 35 minutes; is that correct?

Mr. MURPHY of New York. At about that time, yes.

Mr. FISH. And that we start tomorrow at 11 a.m.?

Mr. MURPHY of New York. Eleven a.m. the House will come in.

Mr. FISH. And there is no business that the chairman knows about that might intervene prior to the consideration of the amendments of this bill?

Mr. MURPHY of New York. There would be no delays before we go into the Committee of the Whole.

Mr. FISH. I think perhaps 3 hours is a reasonable time.

Mr. WIGGINS. Mr. Chairman, if the gentleman will yield, has the gentleman asked unanimous consent for anything?

Mr. MURPHY of New York. Mr. Chairman, I ask unanimous consent that debate on all amendments and substitutes to H.R. 1614 be concluded and a final vote taken at 2 o'clock tomorrow.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. WIGGINS. Reserving the right to object, Mr. Chairman, I want to counsel my leader here that this is not the time to make that deal. The time to make that deal is after we start tomorrow, so we know how much time we have to bargain with. There is no certainty at all that we would convene at 11 o'clock and proceed until 3 o'clock. We may not start until 2:30. I would caution the gentleman not to be too hasty.

Mr. FISH. Mr. Chairman, if the gentleman will yield, I will add to what has been said. There is other legislation. If I understand the wishes of the majority leader, there are two other bills to be brought before the House Thursday, the last legislative day.

I would qualify what I say to the Chairman in accepting the understanding, and that is that not only do we proceed for one-half hour this evening, but we will have the full 3 hours prior to 2 p.m. tomorrow.

Mr. MURPHY of New York. Mr. Chairman, I will revise the unanimous-consent request.

Mr. Chairman, I ask unanimous consent that when we convene tomorrow, all debate on H.R. 1614 and all amendments and substitutes thereto end after 3 hours of debate.

The CHAIRMAN. Is there objection to

the request of the gentleman from New York?

Mr. STEIGER. Mr. Chairman, reserving the right to object, may I inquire of the Chairman of the committee: Does that include quorum calls and rollcall votes?

Mr. MURPHY of New York. Mr. Chairman, if the gentleman from Wisconsin will yield, yes, it would. In the process of the Committee of the Whole it would include those.

Mr. STEIGER. So the 3 hours of debate could be shortened by virtue of short quorums or long quorums, as well as any votes on amendments; is that correct?

Mr. MURPHY of New York. That is correct. But I would assure my colleague that I have no intention and the members of the committee have no intention to limit debate by that type of device.

Mr. STEIGER. Mr. Chairman, further reserving the right to object, I recognize that that is not what the gentleman would like to do.

May I ask another question? If we were to agree to this procedure tonight, what Members are going to be recognized tomorrow? Will it be those Members who are standing, the majority leader, the gentleman from Texas (Mr. WRIGHT) the gentleman from Illinois, and a few others? There are four or five Members standing, and I am one of those standing. That gives me 58 minutes by my calculations.

Is that what the gentleman intends to do, or is the gentleman going to make this request again tomorrow morning so all Members will have warning as to what we are going to do?

The CHAIRMAN. The Chair would like to advise the gentleman from Wisconsin (Mr. STEIGER) that regardless of the time fixed, we would proceed under the 5-minute rule at the outset.

Mr. STEIGER. Regardless of the time fixed, we proceed under the 5-minute rule?

The CHAIRMAN. We will proceed under the 5-minute rule. The Chair would like to advise the gentleman that it would be premature for the Chair to allocate time at this point.

Mr. STEIGER. Mr. Chairman, further reserving the right to object, let me say that the gentleman from Kentucky (Mr. NATCHER) is an exceedingly fair Chairman of the Committee of the Whole. It would surely be premature for the Chair to allocate the time now. For those Members who are included, it might be exceedingly good, but for those Members who would be cut out, it would not be good at all.

The CHAIRMAN. The Chair will advise the gentleman once again that such an allocation of time would be premature at this time.

Is there objection to the request of the gentleman from New York?

Mr. TREEN. Mr. Chairman, reserving the right to object, may I make an inquiry as to whether or not the gentleman from Louisiana (Mr. BREAUX) will be offering his substitute? I think that is pertinent to the question of how much time we are going to need to get through this bill.

Pending that, I would ask the committee chairman the purpose of his asking unanimous consent to end consideration of this bill at 3 o'clock tomorrow.

Mr. MURPHY of New York. Mr. Chairman, if the gentleman will yield, we did not set 3 o'clock tomorrow as the time to terminate the debate. We said we would have 3 hours of debate.

The problem is that there are two bills that are on the calendar for tomorrow that will have to be accommodated, hopefully after the conclusion of our announced schedule for the House to terminate at 5:30 p.m. tomorrow.

Mr. TREEN. Mr. Chairman, may I make this suggestion to the Chair.

I am inclined to object to this request now, because we have a number of important amendments to be considered. I wonder if the chairman of the committee would withdraw this request now and make the request tomorrow? Then we would have some time between now and then to see how much time we will need.

I certainly do not want to prolong this matter. I wish it could be completed tonight. I assure the gentleman that is not my purpose in asking the gentleman to renew the request tomorrow. That would give us an opportunity to see how much time we will need.

Mr. MURPHY of New York. Mr. Chairman, if the gentleman will yield further, the purpose of my asking for those 3 hours tomorrow is to try to accommodate the Committee as far as the time is concerned tonight. We will continue to debate, then, and work tonight and dispose of the business of this bill tonight, if necessary. I was merely trying to accommodate the House and agree to a fixed 3 hours tomorrow.

Mr. FISH. Mr. Chairman, reserving the right to object, I do appreciate this colloquy, and I do share the view of the Chairman of the Committee that we want to accommodate the House and define a reasonable time.

I think, however, the sentiment of the minority has been expressed, and that is that we think it is quite premature, even though I myself think that we may finish the amendments before us in a 3-hour stand. We have worked with the Committee Chairman very diligently to achieve that.

I think it is obvious that overwhelmingly the minority members of the committee do not want to be bound at this point to an arrangement within the framework of the unanimous-consent request.

The CHAIRMAN. The Chair would like to make an inquiry of the gentleman from New York (Mr. MURPHY).

Assuming that the unanimous-consent request for 3 hours is approved, ordinarily the time for quorum calls and rollcall votes would not be deducted from the 3 hours of debate unless that is the intention of the gentleman from New York (Mr. MURPHY). The unanimous-consent request for 3 hours would cover debate time only, and it would not take into consideration the time consumed for quorum calls and rollcall votes.

That would be the ordinary procedure, unless the gentleman from New York (Mr. MURPHY) would like to stipulate that those be included in the 3 hours.

Mr. MURPHY of New York. Mr. Chairman, I would like to stipulate in the unanimous-consent request that any time allocated to quorum calls or to rollcalls not be included in the 3 hours.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

PARLIAMENTARY INQUIRY

Mr. TREEN. Reserving the right to object, Mr. Chairman, I do so in order to propound a parliamentary inquiry

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. TREEN. Mr. Chairman, if the unanimous-consent request is granted, will all amendments that are in the RECORD as of tonight have the protection of the 5-minute rule, including any amendments that are put in the RECORD tonight?

The CHAIRMAN. The Chair would like to advise the gentleman that his inquiry is correct. They would be protected; all amendments placed in the RECORD tonight would be protected.

Mr. TREEN. And each would have 5 minutes for presentation; is that correct?

The CHAIRMAN. The Chair will state that the gentleman is correct; 5 minutes would be allotted to each side.

Mr. TREEN. I thank the Chairman, and I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. FISH. I object, Mr. Chairman.

The CHAIRMAN. Objection is heard.

Mr. MURPHY of New York. Mr. Chairman, I presume that we are back on debate on the amendment just read; is that correct?

The CHAIRMAN. The Chair will state that the gentleman is correct.

Mr. WIGGINS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have lost my train of thought with respect to the gentleman's amendment. I would be pleased to yield to the gentleman from New York if he would once again explain what this amendment is.

Mr. MURPHY of New York. Mr. Chairman, in response to the gentleman, the amendment as read is pretty self-explanatory.

In the OCS committee report it was made clear that an environmental impact study was to be prepared for development and production in an area or region and might include a number of development and production plans and address their cumulative effects.

This amendment would make this intent explicit and thus eliminate any delays in the initial development of an area that could be caused by waiting for a permanent environmental impact statement.

Mr. Chairman, I would certainly strongly, on the basis of time, hope this amendment would be adopted.

Mr. WIGGINS. Mr. Chairman. I thank the gentleman.

Mr. TREEN. Mr. Chairman, I move to strike the requisite number of words.

Let me just inquire of the chairman if this is the amendment that is recommended by the Secretary of the Interior?

Mr. MURPHY of New York. If the gentleman will yield, yes, it is.

Mr. TREEN. And the net result is that he would still have, at least once, to declare approval of the D. & P. plan to be a major Federal action and thereby would activate the provisions of NEPA at this time; is that correct?

Mr. MURPHY of New York. The gentleman is correct.

Mr. TREEN. But under this amendment would the chairman interpret it to mean that the Secretary would not have to declare approval of the first D. & P. plan to be a major Federal action?

Mr. MURPHY of New York. The gentleman is correct.

Mr. TREEN. He might wait until after several of them had been approved, on the theory that sooner or later in this area we will declare one of these to be a major Federal action; is that correct?

Mr. MURPHY of New York. The gentleman is correct.

Mr. TREEN. I thank the gentleman, Mr. Chairman, and yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. MURPHY).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. MURPHY OF NEW YORK

Mr. MURPHY of New York. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MURPHY of New York:

Delete section 31, add new section 31.

"SEC. 31. DOCUMENTATION, REGISTRY, AND MANNING REQUIREMENTS.—(a) Within six months after the date of enactment of this section, the Secretary of the Department in which the Coast Guard is operating shall by regulation require that any vessel, rig, platform, or other vehicle or structure which is used for activities pursuant to this Act, shall comply with such minimum standards of design, construction, alteration, and repair as the Secretary of the Department in which the Coast Guard is operating establishes; and except as provided in subsection (b) of this Section,

"(1) which is used at any time after the one-year period beginning on the effective date of such regulation for activities pursuant to this Act shall be manned or crewed by citizens of the United States or aliens lawfully admitted to the United States for permanent residence, unless (A) specific contractual provisions or national registry manning requirements in effect on such date of enactment provide to the contrary, or (B) there are not a sufficient number of citizens or aliens who are qualified and available for such work;

"(2) which is contracted to be built or rebuilt one year after enactment for use in the exploration, development or production of the mineral resources located on or under the seabed and subsoil of the Outer Continental Shelf be built or rebuilt in the United States and when required to be documented, be documented under the laws of the United States;

(b) The Secretary may waive the requirements of this section if he determines that:

(1) compliance will unreasonably delay completion of any vessel or structure beyond its contracted delivery date;

(2) the requirements will result in costs that are unreasonable; or

(3) the articles, materials, or supplies of the class or kind to be used in the building or rebuilding are not produced or manufactured in the United States in sufficient and usually available commercial quantities and of a satisfactory quality.

(c) As used in this section, the terms "vessel," "documented under the law of the United States," and "citizen of the United States" shall have the meanings assigned to them under the first section and section 2 of the Shipping Act of 1916 (46 U.S.C. 801 and 802), and "built or rebuilt in the United States" means that only articles, materials and supplies of the growth, production or manufacture of the United States as defined in paragraph K of Section 1401 of manufacture of the Tariff Act of 1930 may be used in such building or rebuilding:

Mr. MURPHY of New York (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MURPHY of New York. Mr. Chairman, this amendment, often improperly referred to as a "Buy America" amendment, but which really is only a "preference America" provision, is necessary, reasonable, and will bring several, significant benefits to our national economy.

On Thursday of last week, this House twice considered and once accepted an amendment to two substitute bills—offered by the gentleman from Louisiana (Mr. LIVINGSTON)—almost identical to the changes I propose to section 31.

Last December, this House approved an amendment to the Federal Water Pollution Control Act requiring only American-made materials for all treatment works. This is now law.

This House is, therefore, on record in supporting our workers, our companies, and our balance of payments by insuring a preference for our products and our citizens and residents.

My amendment is limited—insuring more jobs but also providing for exceptions to a rigid rule in appropriate cases.

It is structured in three parts.

First, with certain exceptions, manning of OCS vehicles, vessels, and structures by U.S. citizens is made a requirement.

Second, any vessel, rig, platform, or other vehicle or structure used in OCS activities, when required to be documented, is to be documented under the laws of the United States. Whether documented or undocumented. They must comply with all environmental, safety, and other regulations and requirements of the United States.

Third, again with certain exceptions, any vessel, rig, platform, or other vehicle or structure contracted to be built or rebuilt 1 year after date of enactment for use in OCS activities, is to be built or rebuilt in the United States.

I will discuss the exceptions in a few moments. They provide some flexibility to existing continental results and the national interest. But first, I must discuss the need for this amendment.

Two-thirds of the substance of this amendment, has already been rebated and adopted by the ad hoc select committee. The amendment we are discussing adds a third element—that of domestic construction, and use of domestic materials.

All three elements are necessary to guarantee maximum safety in offshore drilling operations, and to assure that maximum U.S. employment and other economic benefits will accrue to the American economy from offshore oil and gas development.

Development of the Outer Continental Shelf can mean thousands of jobs from all spectrums of the work force. My amendment will help guarantee those jobs will be for our citizens and residents.

Foreign workers on rigs and platforms on the U.S. OCS have been increasing in recent years. Reports from industry officials indicate that in recent months, rigs employing large numbers of foreign crewmembers have arrived on the U.S. Outer Continental Shelf. It is difficult to determine exactly how many aliens are at work on rigs off the United States. The only publicized report was on the *Sedco J.* which drilled in the Baltimore Canyon. Foreign crewmembers made up about one-half the crew in that case alone.

In the last 5 years, the number of foreign rigs in U.S. waters has grown from three to 25. Foreign rigs now comprise 22 percent of the registered rigs off the U.S. coast. The Coast Guard predicts that the number of foreigners employed on all rigs off the United States will continue to grow.

American offshore workers are the world's best and most experienced. These jobs belong to them. My amendment will make sure they get them.

This amendment will have no impact on American workers operating overseas. In the first place, there are not that many of them. In most cases, Americans on U.S. rigs in the North Sea are the minority of the crew: Generally they represent only supervisory personnel. Americans at work on foreign rigs in foreign waters are only there, because the foreign nations lack the skilled work force to replace them.

My amendment is limited. First, it would not require U.S. manning where existing contracts on requirements otherwise provide. Second, it would not require U.S. manning where an insufficient number of qualified and available Americans are present. Third, it would include "permanent resident aliens" as Americans for application of the requirement.

Recent studies, including one prepared

pursuant to my request, by the Library of Congress, "North Sea petroleum policies in the United Kingdom and Norway," clearly note preferential policies and practices in these nations. Both the United Kingdom and Norway grant licenses on a discretionary basis, and not on the competitive bidding basis practiced here. In the United Kingdom, for example, licenses are granted to those companies who cooperate with other government policies—such as hiring British citizens, and purchasing supplies and equipment from British companies. In Norway, the ability of energy companies to obtain property rights is based on their prior use of local crews and firms. Both countries provide extensive subsidies. American companies and workers are not asking for money—just an equal opportunity to develop our on and offshore resources in a way that would accrue maximum benefits to the American economy.

This amendment would also mandate that the Coast Guard strictly enforce U.S. safety and operating standards on all equipment used in the OCS. At the present time, U.S. regulation on foreign rigs is practically nonexistent. The potential disastrous consequences to our coastlines if failure to regulate continues are very clear.

The registry requirement contained in my amendment serves primarily to enhance U.S. control over such basics as big design and construction. U.S. documentation and registry requirements are the most comprehensive and stringent in the world. It is imperative that we mandate that all OCS equipment used here comply with tough U.S. standards. Our marine and coastal environment is far too precious to gamble with by using any other standards of safety but our own.

This requirement will not disrupt any drilling operations currently taking place on our OCS. These regulations will be implemented in a manner which provides for the needed transitional time for full compliance with U.S. standards.

The final element of this amendment requires that any vessel, rig, or structure used in American OCS activities must ordinarily be built or rebuilt (if necessary) in the United States.

This provision will insure that Americans will obtain the maximum economic benefits from the exploitation of our own OCS resources by creating many jobs for American labor and many contracts for the depressed American shipbuilding industry.

Statistics presented in testimony by the shipbuilding industry, clearly demonstrate the need for this portion of my amendment. Rigs, structures, and vessels for use on the American OCS are being built overseas at an increasing and alarming rate.

In 1972, the United States was the world leader in drill manufacturing, and built a full 59 percent of the world's rigs. Today, American shipyards have only 29 percent of world rig orders. Without a domestic construction policy firmly in place, further erosion of this vital American industry is inevitable. During the next 10 years, the United States will grow to be one of the largest offshore markets in the world. In just two States, California and Alaska, the offshore work will involve close to 3 million tons of steel and 180 million manhours of work. If we add the development which will happen off our Atlantic coast States, with all the inland work which accompanies it, the beneficial economic impacts we can expect to accrue are absolutely staggering. We must not let these benefits slip through our fingers.

As I previously mentioned, the U.S. shipbuilding industry is experiencing a period of economic decline. Workers in this industry face dismissal prospects of even more unemployment in the future. Putting these people to work manning the rigs and structures; and building the structures as well as manufacturing the materials they comprise will help to lessen prospects of further economic decline.

The steel industry experiencing massive layoffs and closing of U.S. steel mills, is but one example of both the need and the advantages of this amendment. Although much OCS equipment used in the world is manufactured in the United States, the steel in the platforms and vessels is foreign. This is a substantial amount of steel. Approximately, 4,500 tons of various types of steel are required to build just one semisubmersible platform. Another 5,000 tons of steel are required for the mobile platform of a jackup, depending on size. To allow this business to drift abroad and cause the American steel industry to lose this much needed business would be preposterous. In July 1977, steel imports accounted for 19 percent of U.S. consumption. These imports have resulted in over 66,700 steelworkers being certified to receive adjustment assistance as provided by the Trade Act of 1974. In fact, since the assistance program was implemented in 1975, 36,600 steelworkers have received $53.8 million through June 1977.

My amendment will insure that domestic construction supplies, when available and at reasonable cost, will be used in the building or rebuilding of drilling structures. Simply, this will insure that the maximum amount of revenues generated by this construction will stay within the realm of our economy and our balance of payments.

This amendment is compatible with the long-adhered to philosophies dealing with our coastal trade and economy in other areas. Specifically, this amendment embodies the spirit of the Jones Act which requires that only U.S.-built, documented, and manned vessels may operate in the coastwise, intercoastal, inland waterway, and noncontiguous trades of the United States. The thrust of the Jones Act principle has been to protect domestic transportation from incursion by foreign interests, through the exclusion of foreign-built, and foreign-operated vessels. My amendment is consistent with this principle.

This amendment is consistent with important national defense and national security interests. It helps to guarantee that an adequate industrial and manpower base will exist to support the exploration, development, and production of oil and gas resources on our OCS.

Without my amendment, the existence of this base, even for national security reasons, looks very dim. In spring of 1977, only 14 of the 117 offshore drilling rigs in use on our OCS had been built in foreign yards. But, and this is a big but, at that time, 34 of the 40 rigs under construction for U.S. offshore use were being built in foreign yards.

As I have noted earlier, most foreign countries have implemented such preference provisions in their laws, contracts, negotiations, and leasing procedures. There can be no retaliation. They already do it now.

Again, my amendment is limited. It is only a preference. The Secretary may waive the requirements to avoid delays, to avoid unreasonable costs, and to insure high quality.

In summary, the benefit of this amendment are many and significant:

U.S. shipyards and equipment manufacturers would reap the maximum benefits to be had from rig manufacturing on the OCS.

U.S. building trade workers would be guaranteed billions of dollars in work constructing oil production facilities.

Thousands of man-years of employment would accrue from construction of these facilities and in allied and support industries in every State of the Nation.

U.S. Safety standards would be applied uniformly to the American Outer Continental Shelf.

Americans will receive employment on the American OCS, and the influx of cheap, foreign labor will be halted.

I urge my colleagues to adopt this amendment which would firmly establish that it is in our national interest to develop American oil and gas reserves by Americans.

The CHAIRMAN. The time of the gentleman from New York (Mr. MURPHY) has expired.

(By unanimous consent, Mr. MURPHY of New York was allowed to proceed for 5 additional minutes.)

Mr. MURPHY of New York. I might say at this point, we have had the arguments on Smoot-Hawley, and if we go back and look at that law that has been brought up so many times in connection with this issue when we try to protect American industry and American jobs, let us realize that Smoot-Hawley is a tariff bill. This is not a tariff bill. Because it has been brought up before on this amendment let me explain the nonrelevance of that argument. The depression of the late 1920's led to legislation being proposed in the Congress, in 1929, to protect American agricultural products from the effects of the recession. The introduction of this legislation encouraged other manufacturers of goods and services to ask for similar or additional protection under this bill. The result in 1930 was the passage of the Smoot-Hawley Tariff Act—which was the most comprehensive and the most protectionist act in the history of the United States.

Title I of the act includes almost every manufactured good in the United States.

There have been many interpretations of the impact of the Smoot-Hawley Act. One is that it helped to intensify the depression and formed one of the bases for Hitler's rise to power. The premise

behind this interpretation is that many countries owed us money from World War II and that the Smoot-Hawley Act hurt their economy and thus, their ability to repay the loans. This decline in world trade which resulted from the Smoot-Hawley Tariff Act produced a negative effect on the economy of Europe and permitted Hitler to wage his campaign for power.

However, another interpretation is that the depression, in fact, led to a concern about American goods and services and, consequently, the Smoot-Hawley Act. It should be noted that the Smoot-Hawley Act has been amended dozens of times since the 1930's and that some of the earliest amendments were attempts to reduce the stringency of that act. Specifically, immediately after the act was passed in 1930 our import trade dropped off by 50 percent. In the years which followed immediately, there were a number of amendments in which the President was given power to engage in reciprocal trade agreements to reduce tariffs on certain products. By 1936, our import trade level had reached almost back to the level it was before 1930. By 1939 our trade was back to the pre-Smoot-Hawley level. Consequently, it is absurd to claim that in 1939, when the war broke out, that it was the result of that Tariff Act of 1930.

Those who try to draw an analogy between a "buy America" amendment and the Smoot-Hawley Act are making gross exaggerations. In the 1930's, the Congress passed a number of "buy American" acts. Basically, that involved the question of giving preference to domestic suppliers of goods and services over foreign suppliers. One typical example involves procurement by the Defense Department. U.S. firms are to be given preference by the Defense Department if the costs of goods and services of that firm are not more than 50 percent higher than foreign firms. These selective statutes, which can be called buy America laws, are hardly in the same magnitude as the Smoot-Hawley Act. Nobody has claimed, for example, that buy America acts have led to armed conflict.

In fact, the U.S. Congress has its own buy America provision whereby it must give preference to U.S. firms for the purchase of supplies and services.

It is unfortunate, but true, that every time one tries to protect an American industry in a reasonable and balanced fashion, the sector of the Smoot-Hawley Act is raised.

What we are proposing in this amendment is merely and simply a guarantee that U.S. workmen and U.S. companies have the advantage of work opportunity to the maximum extent on our Outer Continental Shelf. I think that is reasonable. We have seen other countries adopt far more stringent protectionism, and I would hope that the committee would adopt this amendment.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, I would like to ask the gentleman to what extent this differs from the amendment along the same lines that was offered in the committee and was defeated?

Mr. MURPHY of New York. It does not differ significantly. We do add one minor element. However, I would summarize, again, the benefits which will accrue from the adoption of this amendment.

In summary the benefits would be that the U.S. shipyards and equipment manufacturers would reap the maximum benefits to be had from rig manufacturing on the OCS. The U.S. building trade workers would be guaranteed billions of dollars in constructing oil production facilities. Thousands of manyears of employment would accrue from construction of these facilities in the allied and support industries in every State in the Nation.

The CHAIRMAN. The time of the gentleman from New York has expired.

(By unanimous consent, Mr. MURPHY of New York was allowed to proceed for an additional 2 minutes.)

Mr. MURPHY of New York. Mr. Chairman, U.S. safety standards would be applied uniformly to the American Outer Continental Shelf and Americans will receive employment on the American OCS and the influx of cheap foreign labor will be halted.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I am happy to yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, I am still not clear how this differs from the amendment that was defeated in the committee.

Mr. MURPHY of New York. It provides a little more flexibility and a few more exceptions than the amendment offered as an amendment to the Breaux substitute.

Mr. SEIBERLING. Mr. Chairman, if the gentleman will yield further, as I recall, the administration opposed the amendment in the committee. Do they now support this amendment?

Mr. MURPHY of New York. We have the same opposition that we had in the committee to this amendment.

Mr. SEIBERLING. Mr. Chairman, if the gentleman will yield further, Has there been any further exploration of the various ramifications that led to their objection, such as the impact on the trade negotiations, on the efforts to get the Japanese and other countries to lower their restrictions and that sort of thing?

Mr. MURPHY of New York. No; I think this opposition is opposition we have seen generally, particularly from some elements in the State Department where traditionally the question of Americans trying to protect their own industry is phrased in the catchall of "free trade," a definition and a concept that disappeared in the 19th century. We can talk about free trade and American trade that other people can exploit and use, whereas we are not permitted to move into the trade of other areas.

I would just like to give you the example of Norway—a country, by the way, that has exploited and taken advantage of virtually every American trade route in its movements by steamship—but the licensees in Norway must carry out their exploration from a petroleum base in Norway. His organization must be in Norway and he must make all decisions as to that activity in Norway.

The licensee shall use Norwegian goods and services in the activity as far as they are competitive with regard to quality, service, schedule of delivery and price.

Norwegian contractors shall be included in invitations for tenders as far as they produce goods or render services of the kind required.

On evaluating the offers given by Norwegian or foreign bidders, the licensee shall take into account the extent to which the bidders will use Norwegian goods and services.

The licensee is responsible for the observation of these provisions by his contractors and their subcontractors.

That is about as tight as you can get on the Norweigian portion of the North Sea Shelf.

The United States has traditionally been able to respond to restrictive trade practices of foreign nations only by adopting laws designed to also protect U.S. industries. Unlike European nations that can use a combination of laws and heavy government pressure to force companies to build domestic as in Norway and the United Kingdom the U.S. Government is restricted to acting as the laws allow.

The weaknesses of the U.S. system in responding to foreign trade practices are typified in the operation of the world offshore equipment market. Norway and Britain have both adopted laws to restrict the freedom of North Sea oil companies in the purchase of equipment and employment of workers. These laws are reinforced by government pressure on these companies to build in British or Norwegian yards. As a result, much of the North Sea oil drilling equipment was built in the surrounding countries.

The latest example of this trend, cited in Seatrade magazine in December, was the expected British Government pressure to build a North Sea firefighting rig in Great Britain. The British yards are competing with Japan for the order.

There are other nontariff barriers to U.S. trade used effectively in Europe to close off their markets to U.S. goods. At the international trade talks, the United States has listed some 600 significant nontariff trade barriers that restrict U.S. trade in the developed countries. The United States has very few such barriers.

Unless the United States is to preserve its declining share of the world offshore equipment market, which has slipped from 71 percent to 34 percent in only 7 years, we must adopt equally effective laws to protect our offshore market.

We are merely seeking to preserve a share of a market we once dominated and which we are in danger of losing. Examples of the threat we face are the growth in foreign built rigs off the United States. Five years ago there were three. Today foreign built rigs off the United States total 22 percent of all

rigs. Many of these rigs were built in state-supported yards or with state assistance.

U.S. oil companies are reported to be seeking bids from Japanese yards for oil platforms to be placed off California. If these platforms are built in Japan with cheap Japanese steel, they will surmount the present U.S. reference price system for steel imports, which is based on raw steel imports. By building and fabricating the steel rigs abroad, the Japanese steel industry and shipyards both benefit and a multimillion dollar order is lost to U.S. companies.

These are the imaginative ways in which our trading partners are beating us at the trade game and circumventing our efforts to protect domestic industries.

Those who raise the outdated and misleading scare tactics of Smoot-Hawley and the depression forget the modern lessons of huge trade deficits, nontariff barriers and closed U.S. industries. Tariffs are no longer the threat and the laws being adopted abroad are far more effective than tariffs in protecting their markets.

If we do not act to protect U.S. industry in the same way the foreigners protect theirs, we will continue to lose vital industries such as offshore construction. At stake is a huge industry that is a major customer of the steel, iron, and chemical industries.

Unless we act Japan, Canada, and other nations will be in a position to dominate an industry that would operate on the shores of States with some of the worst unemployment in the United States. We cannot allow foreign built equipment, manned by foreigners to work for months or years on U.S. Federal lands within sight of U.S. shores. In effect, these floating factories will be runaway industries that could be totally United States if we pass the domestic preference legislation.

Another argument heard in regard to domestic preference is that it will cause retaliation abroad. This is nonsense, because where they can the Europeans have already shutout our equipment, and where they cannot the Europeans use U.S. citizens because they are the best and most competent offshore workers available.

American citizens such as Red Adair are hired because they are the best at their job and thus are indispensable to the foreign operations.

Also much of the equipment the U.S. manufactures cannot be duplicated abroad. Drill bits, chemical systems, pumps, and piping are all made best by U.S. companies. Thus, passage of the domestic preference would not affect these companies, as they already have a technological advantage. However, the amendment would help the U.S. rig and platform producers who face competition from Japan, Norway, Britain, Singapore, Hong Kong, and so forth and who do not have a technological advantage.

Clearly, world oil drilling operations are already heavily penetrated with government involvement. If the United States does not realize this and respond to it by also protecting these segments of the offshore construction industry being hurt by foreign competition, then this industry, except for certain specialized parts, will steadily be more and more foreign dominated.

This is the threat that "domestic preference" deals with.

Mr. SEIBERLING. Mr. Chairman, if the gentleman will yield further, is there anything in this amendment which would allow the Secretary or the administration to waive these restrictions as to countries who provide reciprocal reductions of their restrictions on a similar scale?

Mr. MURPHY of New York. There is no reciprocal agreement in this amendment, but there are other flexibilities allowing the Secretary to waive these restrictions. For example, if compliance would unreasonably delay completion of any vessel or structure beyond its contracted delivery date; or the requirement would result in costs that are unreasonable; or the articles, materials or supplies of the class or kind to be used in the building or rebuilding, to be used are not provided in the United States in usual and sufficient commercial quantities and at the same terms, the Secretary can waive the requirements of this provision and go foreign.

The CHAIRMAN. The time of the gentleman from New York has expired.

(At the request of Mr. SEIBERLING, and by unanimous consent, Mr. MURPHY of New York was allowed to proceed for an additional 2 minutes.)

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, well, I must say that nobody is more interested in preserving American jobs than I am; but it seems to me we are starting on a road here which may have the opposite effect and we have the opposition of the administration because they are engaged in trying to break down barriers abroad so as to have an expanding world trade .

I think we make a serious mistake. If it is safety regulations we are concerned about, we can apply uniform standards regardless of the point where the construction takes place and we can require other standards, and we do in this bill; but it seems to me the whole thrust of this is counter to the efforts that are now ongoing under Mr. Straus to try to break down such barriers in foreign countries and open them up to our products. I am very worried that we are undermining the very thing we are trying to achieve by other means.

Mr. MURPHY of New York. I would say to the gentleman that of the foreign commerce of the United States, only 4.8 percent is carried in American vessels. We are down to the point where we are violating our own maritime acts by not carrying a substantial portion of America's foreign commerce. We have watched the policy of administration after administration in the last 40 years virtually bargain away American jobs and American industry.

The American economy and the value of the American dollar today is testimony to the type of activity that is necessary to protect us. We had a $67 billion trade deficit last year because other nations are using devices to undercut American industry. It is about time that we draw the line. We are not moving into the tariff areas here. What we are doing is simply saying that if we are going to develop an American resource, that we make it applicable for Americans to work on that shelf; for American industry to take advantage of the construction of the materials there, and we are not entering into a protectionism per se, but what we are doing is moving in the best interests of working men and women and our companies.

Mr. BREAUX. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in very strong opposition to the chairman's amendment. Basically, what the chairman is trying to do is put in a buy-American, man-American provision. The administration, although I do not support it on many issues on energy policy, very strongly opposes this section. Why? Because basically, right now, all of the equipment, all of the oil and gas production and equipment, is American already.

The statistics from some of the testimony we have heard indicates that about 90 percent of all the world's oil and gas production equipment right now is already American-built. Who do the Members think is building the rigs operating in the North Sea and off the coast of Indonesia? Oh, sure, about 10 percent is foreign made, but about 90 percent of all those rigs, the equipment, is American-produced right now.

Here is the letter I have from the State Department saying why they are opposed. They say that it is unnecessary at best, and could be quite harmful to the United States. The United States dominates the oil-drilling equipment industry here and abroad. Nearly all oil rigs on the United States OCS today are American-made, and American-owned and manned by Americans already.

I represent a part of the country where many hundreds, literally thousands, of men and women work all over the world in offshore oil and gas industry. Not only do they work off United States shores, but they work in the North Sea, off the coast of Indonesia. The very first thing that is going to happen is, if we take the position of only Americans working in our waters, the British, the Norwegians, are going to say, "Only British can work in the North Sea, or only Norwegians, and you can only use Norwegian-built rigs."

We are going to come out way, way on the short end. I think the unions who support this are very much mistaken. We already have the best of both worlds. We are allowing our workers to work in our waters, where they are doing it almost entirely. There are almost no foreigners working in U.S. offshore waters.

In addition to that, we are working all over the world. I think—and I agree with the administration—that we should oppose this. If the gentleman's amendment requiring "buy American" is defeated, I

also plan to offer an amendment to the bill to take out "man-American." We already have the best of both businesses.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield.

Mr. MURPHY of New York. The gentleman from Louisiana traveled very extensively with our committee, and in our traveling through Scotland we saw the construction of various types of rigs in that country. We went to Norway and saw the construction of rigs in Stavanger, and saw the technology that had developed in those countries.

I would like to state to the gentleman that what he has said refers only to the past. I want to bring everybody up to the present. Without this amendment, the existence of the industrial base for building the rigs, and even for national security, we can see is starting to erode. In the spring of 1977, only 14 of the 117 offshore drilling rigs in use in our OCS had been built in foreign yards.

But—and this is a big but—at that time 34 of the 40 rigs under construction for U.S. offshore use were being built in foreign yards.

They are building them for our shelf and without this amendment they will be used on our shelf. They use their steel. That is another reason, to protect our own steel industry, we should adopt this amendment.

Mr. BREAUX. What would happen if the amendment is adopted is that we would see all of the rigs and all of the equipment in foreign waters being built in foreign countries. Right now we have about 90 percent of all of the action.

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Chairman, the gentleman from New York (Mr. MURPHY) said this is not a protectionist measure, and in the next breath he says the purpose is to protect American industry. He also said it is not a tariff measure. Of course, it is not. But the big problem we have in selling American goods abroad is not the result of tariffs; it is the result of nontariff protectionist devices. If we now start down that road in this country, we will be building a 1970's equivalent of Smoot-Hawley. This amendment is going in the wrong direction if we want to open up markets in Japan—and we have made some progress in that in recent months. We must take very careful steps and know what we are doing. For that reason, I would be constrained to oppose the amendment.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. BREAUX) has expired.

(On the request of Mr. MURPHY of New York and by unanimous consent, Mr. BREAUX was allowed to proceed for 4 additional minutes.)

Mr. MURPHY of New York. Mr. Chairman, if the gentleman will yield, I would like the Members to see how we have eroded in this once dominant area of rig construction. In 1972, the United States was the world leader in drill manufacturing and built a full 59 percent of the world's rigs. Today American shipyards have only 29 percent of the world's rig orders and it is still dropping. Without a domestic construction policy firmly in place, further erosion is going to exist. We know the capability in Japan. We know the capability in Singapore, Stavanger, and in Fife. We know the capability today in the Persian Gulf. The technology came from here. The expertise came from here. But now it is offshore and in foreign areas.

Mr. BREAUX. Mr. Chairman, I would merely say to the members of the committee that this is probably the first time that the administration, the gentleman from Louisiana and the gentleman from Ohio all agree that we should not have this amendment. I think that is a pretty good reason to vote against it.

Mr. SEIBERLING. Mr. Chairman, if the gentleman will yield further, Secretary of the Interior Cecil Andrus, in his letter to the distinguished chairman of the ad hoc committee presenting the views of the administration, vigorously opposed any "buy American" amendments to this bill as being contrary to the best interests of the United States and as being likely to reduce rather than to increase American jobs.

Here are Secretary Andrus' actual words, facts, and figures:

Buy and Hire American.—We recommend deleting new section 31, on pages 233–234, and oppose any buy American amendments. Section 31, would require (subject to certain exceptions) U.S. documentation, registry, and employment of U.S. nationals for OCS facility and vessels. It would serve to protect a market that needs no protection at the cost of inviting retaliation by other countries in a major export market for American products. We strongly believe, that such requirements, even if modified by possible exceptions or waivers, would not be in the best interests of the United States.

According to information from the Petroleum Equipment Suppliers Association in Houston, American manufacturers produce approximately 90 percent of the world's oil and gas production equipment (Standard Industrial Code 3533). Last year American firms exported $1.69 billion worth of these products. These exports represent 63 percent of the total American sales of these products and contribute significantly to employment in this industry.

The Embassies of Norway and Great Britain have protested the OCS manning requirements in section 31 and have expressed concern that a "buy-American" amendment may be added to the proposed legislation. These governments are under considerable pressure from labor and industry groups to institute "buy national" restrictions in the North Sea oilfields under Norwegian and British jurisdiction. So far the Norwegian and British Governments have successfully resisted pressure for "buy and hire national" restrictions in the North Sea. Current British practice only requires that Britons and British firms be given a fair chance to participate in projects run by offshore operators. We note that American sales of equipment to Great Britain for North Sea projects during the first eight months of 1977 have already exceeded 77.5 million dollars; an additional amount has been earned by Americans providing services. Sales of equipment to Norway were approximately 14.6 million dollars during the first eight months of 1977. Given the importance of these markets, American firms and their employees would stand to lose more by a proliferation of "buy and hire national" restrictions than they could hope to gain.

Accordingly, we recommend deletion of section 31 and oppose any buy American amendments.

AMENDMENT OFFERED BY MR. WHALEN AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. MURPHY OF NEW YORK

Mr. WHALEN. Mr. Chairman, I offer an amendment as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. WHALEN as a substitute for the amendment offered by Mr. MURPHY of New York: Page 233, strike out line 16 and all that follows through line 17 on page 234.

Page 233, insert a closing quotation mark and a period at the end of line 15.

Page 129, in the table of contents for title II, strike out the item relating to section 31 and insert a closing quotation mark and a period at the end of the item relating to section 30.

Mr. McDONALD. Mr. Chairman, I intended to offer an amendment to H.R. 1614, the OCS amendments, to delete references to the Secretary of Labor in section 21 which would give the Occupational Safety and Health Administration (OSHA) concurrent authority with the Coast Guard to issue regulations or standards applying to diving activities in the waters above the Outer Continental Shelf. Due to a change in plans, I am now unable to be present to offer this amendment. Therefore, when this amendment is offered by one of my colleagues, I would like my statement in support of this amendment to appear in the recorded debate. The statement follows:

STATEMENT

Traditionally the OCS divers have been within the jurisdiction of the Coast Guard which has done an efficient job in guaranteeing the safety of the OCS divers. Their record is excellent. The fatality ratio is less than that of the construction, fertilizer, electric utilities, cement and tobacco industries, among others.[1] As for non-fatal injuries, a three-year survey (1974–76) conducted by a major diving industry association has shown that the frequency rate for such injuries in the Commercial Diving Industries was 8.55, while the Aerospace Industry's frequency rate was 56.05, Construction—72.55, Food—86.80, Federal Government Civilian Employees—31.95, Leather—87.50 and Printing and Publishing—50.3. As the figures show, non-fatal injuries in the commercial diving industries is substantially lower than in other industries.[2]

It is a legitimate concern that OSHA's lack of expertise in this area will only lead to regulations even worse than those which have plagued the industries which it currently oversees. In fact, OSHA has issued emergency diving standards that are both costly and ridiculous. First the cost—according to the Council on Wage and Price Stability, the emergency standard set forth by OSHA would cost the diving industry from $33 million to $100 million a year. (The latter figure is more than the entire diving

[1] The University of Rhode Island, through federal funds, conducted a survey. Their report stated that between 1971 and 1976, six divers lost their lives in the context of commercial diving operations—for offshore construction and salvage, including oil and gas-related operations.

[2] This survey was conducted by Sub Sea International, Inc. It was included in committee testimony on OCS bill.

industry grosses annually.) The Wage and Price Council's $33 million number is its estimate of what it would cost the diving industry to prevent two diver deaths a year, or about $16 million a life. In the most recent study on the subject, the Coast Guard, however, suggested for the purpose of setting standards that the value of a human life be set at $370,000. A substantial difference. Now the ridiculous—the Navy has estimated that a diver would weigh nearly 1,000 pounds if he carried all the equipment recommended by OSHA. Fortunately, these regulations were prevented from becoming effective due to an injunction by the Federal Courts in Louisiana.

The Coast Guard has both the specific duty and the necessary expertise to continue to provide safety to the divers on the OCS, while OSHA, and its land-locked mentality is only directed to regulate worker safety in areas where no other agency is exercising its authority. Why should we extend OSHA to determine the safety and health standards on the OCS when such an extension is not needed and will not benefit the safety of the OCS divers?

The Outer Continental Shelf contains vital energy resources which we desperately need. We should not hinder the development of these resources by allowing OSHA to over-regulate and mis-regulate in this area, too.

References to the Secretary of Labor in Section 21 is not only opposed by me, but by evidence of a letter received by Chairman Murphy on January 24 from Secretary of Interior Andrus, the Administration is also opposed to it.[3] Therefore, I encourage my colleagues to approve this amendment to delete any reference to the Secretary of Labor in Section 21, thus allowing the Coast Guard to retain its responsibility to issue regulations or standards applying to diving activities in the waters above the Outer Continental Shelf.

Thank you.

Mr. DODD. Mr. Chairman, I ask my colleagues to join me today in support of the Outer Continental Shelf Lands Act Amendments of 1977. I seek their support of this legislation without any additional weakening amendments because of my firm conviction that its passage will improve the complexion of the oil and gas industries as we know them today and, consequently, play an important role in shaping our emerging energy policy. This will not only insure an orderly development of our offshore resources, but it will also introduce more competition into an industry which has been notably short on competition.

Regrettably, during the last few days of consideration of H.R. 1614, the House has adopted several provisions to the committee's bill which will weaken some very important efforts to open up the leasing process and introduce a greater level of competition into the industry. Even so, we still have before us an important piece of legislation which will make important strides in meeting the challenge of OCS development and at the same time open the process to a greater number of participants.

Recently, much public attention has been given, and properly so, to the energy bill currently in the conference committee. This bill, important as it is to the formation of our energy policy, concerns itself primarily with conservation and pricing issues. The bill before us now, however, substantially increases the flow of domestic supplies of oil and natural gas which every American knows are badly and urgently needed.

Regardless of how the energy bill emerges from conference, the OCS bill is an indispensable part of our plan of ensuring a sufficient and continuous flow of domestic oil and gas.

As a native of New England where energy prices are soaring and where such basic commodities as home heating oil in cold winter months are sometimes scarce, I am acutely aware of the need to insure continuous supplies of energy to the American public at a reasonable cost.

Yet increased production of fuels is only half our task. What will development of the Outer Continental Shelf really mean in the next few years—to the consumer, to the oil and natural gas companies, to the people who will take the jobs it will bring, to the communities on the shoreline, to local governments struggling to meet the needs of those suddenly burgeoning communities, to the air we breathe, to the condition of our beach areas, and last but not least to the delicate ecological systems in the oceans?

To resolve these complex issues, the Ad Hoc Select Committee on the OCS, which was formed almost 3 years ago, has conducted extensive hearings both in the field and in Washington prior to the markup of this legislation. Hearings were held in more than 15 cities; a total of 375 witnesses were heard; and more than 10,000 pages of hearing records were compiled. All who will be affected, including the public, have been heard; and, therefore, the proper foundation has been laid for this comprehensive revision of the OCS Lands Act of 1954 as is accomplished by this bill.

What we have before us in a comprehensive piece of legislation which provides for an orderly, equitable, safe, and expeditious way for our offshore resources to be tapped. It is comprehensive yet specific. Its provisions are tough, yet it provides enough flexibility to permit modifications by the Secretary of the Interior during the first years of its application. It further allows State and local governments, which will be directly affected, to be brought into the process.

Let me remind my colleagues that this is an issue which can wait no longer. Development of the Outer Continental Shelf will happen. The question before us is who will control how it happens—the Congress or the oil and gas industry? Without passage of a strong bill, I believe that Congress would be abdicating its responsibility for maximizing domestic production and at the same time protecting the interests of the American consumer.

Significantly, the extensive and largely unexplored reserves of domestic oil and gas which exist off our shores are solely owned by the U.S. Government and, therefore, by the American people. The Government will be leasing tracts for exploration and production of publicly-owned resources, acting in effect as a trustee for the public, and, therefore, has a clear responsibility to guarantee the American people the maximum return on their investment in the form of fairly priced fuels.

No one disagrees that development of the reserves in the Outer Continental Shelf will substantially increase our domestic production of oil and natural gas. The U.S. Geological Service estimates the undiscovered recoverable oil and gas resources on the Continental Shelf to be 26 billion barrels of oil and 109 trillion cubic feet of natural gas. In the Atlantic alone where production has yet to begin, the USGS estimates that there are between 400 million and 1.4 billion barrels of oil and between 2.6 and 9.4 trillion cubic feet of natural gas. At its peak, the USGS estimates that Atlantic production will reach 90,000 barrels of oil a day.

Of all domestic oil and gas produced, some 17 percent now comes from the Continental Shelf—about 18 percent of our oil and 15 percent of our natural gas. However, some experts believe that it can become the largest domestic source of oil and gas between now and the 1990's. One estimate suggests that it could comprise as much as one-fourth to one-third of the total U.S. oil production by 1985.

If this potential is realized, it will have a tremendously beneficial impact. The Congressional Budget Office report indicates that substantial increases in our domestic supplies could potentially cause a decrease in the world price of oil, and in that event would be reflected in the prices and costs of virtually all products and services in the national economy, thus resulting in a net negative inflationary impact.

Furthermore, it will bring us that much closer to energy self-sufficiency, borrow a little time to develop alternative energy sources for the future, reduce our current dependence on foreign sources, assure our national security, and help bring back a favorable balance of payments in world trade, which without oil imports last year would have shown a surplus of $15 billion rather than the $27 billion deficit we experienced.

I confess that I cannot remember a time since I have been in the Congress when I have heard such a rosy picture portrayed although I would not try to convince any of my colleagues that this is a cure-all piece of legislation. However, I am firmly convinced that it is a far-reaching bill with vast implications for our energy policy and the well-being of our future economy.

Given this tremendous potential, you might well wonder who could be opposed to this bill.

Not the Senate which has passed this legislation twice—once in the 94th Congress and again last year. Not the administration which has voiced strong support for these much-needed reforms, and not many of the consumer advocacy groups, including the Environmental Policy Center and Energy Action.

It is opposed by Big Oil.

The industry claims that this legislation will cause delays in the ultimate production of oil and natural gas, ignor-

[3] Second page of "Additional Talking Points, Minority Amendment No. 22" contains Administration's language opposing OSHA involvement.

ing those provisions in the committee's bill to prevent this occurrence. It seems to me, however, that the greater threat of delay would come from lack of comprehensive legislation in this area.

There is considerable concern by the Governors of Connecticut and Massachusetts that the powers to implement environmental safety and health protections that currently rest in the hands of the Secretary of the Interior will be legally challenged by the oil companies unless they are written into law.

For example, Western Oil & Gas Association has already brought a suit challenging the Secretary's authority for canceling lease sales in the Pacific.

And on Friday of last week, a Massachusetts district court judge granted a preliminary injunction to hold off the George's Bank Lease Sale, resulting in Secretary Andrus' announcement that he was postponing the sale which had been scheduled for January 31. No matter what the ultimate resolution of this particular issue will be, it illustrates the problems presented by the present law which lacks clarity and provisions for the evaluation of the impact of all affected interests in the leasing decision.

Opponents of H.R. 1614 have made much of the argument that its passage will result in delays in expediting production of urgently needed gas and oil products. What is clear to me, however, as I review these isolated but not unrelated events, is that without codification and the resulting clarification, the real danger of delay lies in the prospect of continuous initiation of protracted and costly litigation.

The industry has been concentrating its opposition on several key sections in this bill, and unfortunately they have been successful to some extent. Let's take a look at the most hotly contested provisions.

First, is the introduction of new and multifaceted bidding procedures. The bill provides for seven new bidding systems in addition to the two now being used and the authority to introduce still others in the future. It further requires that one of the new bidding systems be used in a minimum of 20 percent and a maximum of 50 percent of the frontier areas offered by lease each year. The Secretary of the Interior does have the discretionary authority to waive certain requirements if it is determined that compliance would unduly delay OCS development.

Even though the minimum use was reduced from 50 to 20 percent, this provision is still significant for one principal reason: It provides alternative ways for companies to obtain leases without putting forth enormous cash sums, as is currently required, which effectively eliminates all but the largest oil companies from most of the bidding. For example, in the offshore leases which were granted by the Department of the Interior during the years of 1969 and 1976, seven of the largest oil and gas producers in this country accounted for an average of 45.5 percent of all OCS leases acquired in lease sales.

The large oil companies have done well for themselves and naturally want to keep things the way they are; but I think it is time to open up the game to some new players, and eliminating the "cash-up-front" requirement will accomplish that purpose. Competition is the keystone of our economic system, and I believe this reform is long overdue.

A second key provision, which was included in the committee bill, was the introduction of "dual leasing," which would have applied to the awarding of two separate leases for a particular tract—an exploration lease initially, and then a development and production lease. This procedure would have allowed the Government to contract for adequate surveys which could have more accurately estimated the extent of the reserves.

It is most unfortunate that this provision was removed from the bill since, without having the proper information on how much gas and oil are present, it will be impossible for the Government to accurately estimate reserves and know what will be a fair price for the lease.

A third major provision is the requirement of development plans, including a time schedule for development, from all lessees, which would be reviewed by the Department of the Interior. Current legislation permits leases to be renewed automatically at the end of 5 years regardless of production levels. To meet existing requirements, a company can do as little as dig one hole and be guaranteed lease renewal. While the cost and subsequent price of this exhaustible resource was rocketing during our recent oil embargo, charges were made that the oil companies held back on production in order to benefit from the higher prices. While I cannot personally testify to the veracity or falsity of this charge, I do believe that the Government has a responsibility to require some demonstration of production during a 5-year period. Surely there is no greater example of not serving the public interest than to allow existing domestic resources not to be utilized expeditiously and to the fullest extent possible.

I was pleased that the House adopted an amendment which I offered today in conjunction with my colleague, Representative SEIBERLING, which sets up a discretionary mechanism whereby each OCS lease can be reviewed prior to its issuance by the Justice Department and the Federal Trade Commission to determine whether or not the proposed sale gives rise to any inconsistencies with existing antitrust laws. Specifically, they would have a maximum of 30 days to conduct an antitrust review of any proposed lease sale, following its notice and prior to its issuance, and to make any appropriate recommendations concerning the sale to the Secretary of Interior who may then, at his discretion, either go forward or halt the reviewed lease sale.

The amendment is an important component of the overall objectives of this legislation, one of which is clearly to promote competition in the development of Federal OCS tracts.

These key provisions, an alternative bidding system to promote competition, the requirement of development plans insuring maximum and continuous production, and the mechanism to allow an antitrust review prior to lease sales, are essential to this bill.

They are essential because they are tough enough to significantly alter the way American energy is produced in this country. Up until now, the oil and gas companies, particularly the largest ones, have had most of the action with little Government oversight in one of the most important industries in this country.

It is clear they have had a good thing going, and they are intent on keeping it that way. When this bill passes, they will lose control of the rules of the game and will be forced to bring more players into the arena. No longer will they be able to "play the energy market" to their own advantage.

Because of its far-reaching impact on our country's future energy supplies, H.R. 1614 may be as significant a bill as any currently in the Congress. By passing it we could provide a tremendous boon to an energy-scarce economy. By failing to act we will be guaranteeing a continued boondoggle by the oil and gas companies, which to me is unconscionable.

I fully recognize the complexities and innovations which exist in this legislation. The issues are not simple, and there are legitimate differences of opinion on how best to serve the public interest. However, let me simply remind my colleagues that this is a crucial bill which will determine how some of our most important resources will be developed in the next decade. Let us be sure it is done to the benefit of the American people—not Big Oil.

Mr. LUKEN. Mr. Chairman, I rise in support today for the "Preference America" amendment that is being offered today to the Outer Continental Shelf Lands Act.

It is imperative that such an amendment be included in this bill if we are going to act responsible in protecting our offshore oil vessel construction industry. The current trend of competitors who are willing to build offshore oil drilling equipment at no profit or even at a loss must be dealt with before we let, yet again, another industry suffer at the hands of foreign governments. Especially when these governments have, at times, even gone so far as to subsidize their industry in order to get their foot in the door and squeeze our workers out.

Japan, for example, with the help of its government assisted steel industry, is able to produce offshore equipment that is often priced at depressed levels. This not only reduces U.S. construction industry employment, but hurts allied U.S. industries such as steel and electronics.

This amendment, by requiring that all offshore equipment be built in the United States of U.S. materials, will help to protect thousands of U.S. construction and offshore workers jobs that are in serious jeopardy. Further, it will have the effect of halting the steady erosion of the U.S. offshore construction industry to low wage foreign nations. The importance of such an amendment is emphasized by the fact that 4 years ago the U.S. construc-

tion industry built 59 percent of the drilling rigs. Now approximately 75 percent of this construction work is performed by other nations.

This amendment will create new employment on the east and west coasts as offshore development proceeds. This is of particular importance because unemployment in these areas is significantly below the national average and projections indicate an even further drop on the east coast for the next few years. In addition, minority workers who already compose a large percentage of the unemployed population stand to be even harder hit without the help of this amendment as they constitute one-fifth of the current industry.

Additional benefits to adoption of this amendment is the effect it will have on our presently troubled steel industry which is suffering from a serious downturn in production. The offshore platform potential between 1977–87 on both coasts is between 120 and 170 platforms which will require from 2 to 3 million tons of steel. The producing and fabricating of this steel will provide work for approximately 8,000 workers per year for the next 10 years.

In conclusion, Mr. Chairman, I wish to point out that the well-recognized arguments relating to free trade, do not, in my judgment seem applicable to this matter. What we are talking about is that American-owned and American-manned facilities to be erected in American territories should most definitely be built by American workers.

Mr. ANDERSON of California. Mr. Chairman, the Pacific coast or southern California is no stranger to the development of resources on the Outer Continental Shelf. We are well aware of the need for development of these resources. But, we are also aware of the dangers inherent in this exploration, and of the need to take strong, careful steps to prevent disastrous accidents.

That is why I am pleased to rise in support of H.R. 1614 to amend the Outer Continental Shelf Lands Act as presented by the select committee. The members of that body, as well as its chairman, should be congratulated for the outstanding work they have accomplished in bringing this landmark legislation before us today.

The demands of this Nation for energy and new resources of raw materials mandate that we proceed with OCS development.

There have been four offshore oil and gas lease sales on Federal areas of the submerged lands off California. Two were in the Santa Barbara Channel, one in offshore northern California, and the last off southern California in 1975.

In the 1975 lease sale off southern California alone, the U.S. Geological Survey estimated that recoverable resources in the lease area totaled approximately 1.6 to 2.7 billion barrels of oil, and 2.4 to 4.8 trillion cubic feet of natural gas. The Western Oil & Gas Association's most probable estimate of resources from this area was 14 billion barrels of oil and 28 trillion cubic feet of natural gas.

Mr. Chairman, in these times of diminishing domestic energy supplies, the Outer Continental Shelf represents a vitally needed area of new fuel production.

However, we in California have learned that more knowledge is needed for the Federal Government to accurately assess offshore reserves. And we learned—at our cost—what a single bad accident can accomplish.

In 1969, platform "a" in the Santa Barbara Channel blew out. Miles of oceanfront were covered with crude oil; birds, seals, fish and other wildlife were badly damaged. In many ways, the platform "a" blowout awakened this Nation to the need for greater environmental protection in offshore drilling operations. Certainly, it was a major factor in the subsequent efforts of the State of California to protect and preserve its coastline.

If the 1969 Santa Barbara spill showed us the need for stricter regulations, the 1975 December lease sale in southern California showed us the need for better advance knowledge of the tracts to be offered.

First of all, the disparity in the estimated resources available were great—1.6 billion barrels of oil by the U.S. Geological Survey, to a maximum of 19 billion by the Western Oil & Gas Association. Natural gas estimates were also widely different—4.8 to 28 trillion cubic feet, respectively.

Prior to the sale, the Department of the Interior expected the offers to total between $1.5 to $2 billion for exploratory leases. The total offers were only $438.2 million—far less than expected.

Prior to the lease sale in December, geological hazards were discovered that resulted in the removal, 2 days before the sale, of four of the tracts from the offer. When we consider that the sale was originally scheduled for October, we realize that only the good fortune of other delays spared us from some possible catastrophies. Such fortune cannot be depended upon to avoid hazards. Clearly, more thorough and deliberate investigation must precede any future sales.

The need for more detailed knowledge of the Outer Continental Shelf lands and their resources has therefore been amply illustrated. The committee bill authorizes advance core sampling by the U.S. Government before a tract is offered. I strongly believe that this provision is in the best interests of the public. Not only will it help to pinpoint geologically-sensitive areas, it will also afford us a better idea of the available resources.

Dual leasing will better serve the public interest by insuring that the Government receive a fair return from what is, after all, a public resource. Increasing Federal involvement in exploration may seem to some to be an infringement on free enterprise. However, in the long run, this is the soundest course to take. The oil companies will remain heavily involved in exporation and production. And the Federal Government will be able to safeguard its own—and the people's—best interests.

Therefore, I strongly urge my colleagues to join me in voting for the committee version of H.R. 1614. It will allow us to proceed with OCS development; it will help in safeguarding the environment; and it will help insure a fair return on the development of publicly-owned resources.

Mr. MURPHY of New York. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1614) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes, had come to no resolution thereon.

LABOR DEPARTMENT SUES TEAMSTER FUND

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PICKLE. Mr. Speaker, I would like to draw the attention of my colleagues to an action this morning by the Department of Labor. In a press conference this morning Secretary Ray Marshall gave details of a suit by the Department against 17 former trustees of the Teamster Central States pension fund.

This suit is very important in that it stems from the landmark 1974 Pension Reform Act (ERISA) and in that it seeks to restore to the fund money lost through alleged imprudent practices by the trustees.

I take this opportunity to commend Secretary Marshall for his diligent pursuit of the Government's Central States investigation. I think his action is reassuring and deserves the full support of the Congress.

Last year the Government moved to protect the pension fund assets by putting them under the control of independent investment managers. This action is part of a continuing effort to set the Central States pension fund on a sound basis.

Following is a statement I have made regarding this action and a copy of the press release issued this morning by the Department of Labor.

STATEMENT BY U.S. REPRESENTATIVE J. J. PICKLE

I am glad to see Secretary Marshall and the Department of Labor moving forcefully not only to secure Central States Pension Fund assets for the future but to seek restitution to the Fund for assets lost in the past. I think this action will be reassuring to the Congress and the people.

The Labor action arises out of enforcement of the landmark 1974 pension reform act (ERISA). This action does not, however, totally settle the outcome of the government investigation of the Central States Fund.

For instance, we have yet to have any estimate of the actuarial soundness of the

Fund. The Fund has a book value of $1.6 billion, but when we get down to actual market value I suspect this figure will be a mythical one.

I do not agree with the Secretary that the Labor Department has no concern with Daniel Shannon and the current trustees because they still have a vital role to play. For instance, they still set the general investment policies of the fund, they still set the ultimate retention of the independent investment managers at the end of five years, and they run the general and day-to-day administration of benefits to individual Fund participants.

As a member of the Ways and Means Committee, I would also hope that the IRS is being equally diligent in pursuing its duties to assure that fund assets are recouped for the benefit of Fund participants. In particular, this would involve steady and substantial progress in the ongoing "legal audit" review of all loans and transactions in the ten years prior to the enactment of ERISA. The legal audit was required under the terms of the tax requalification granted to the Fund by the IRS on April 26, 1977.

It is important to keep in mind that the Labor Department suit, substantial as it is, can only affect actions since January 1, 1975, when the Department was given jurisdiction under ERISA to take corrective steps regarding pension funds. Furthermore, the role of the Justice Department in any criminal referrals is somewhat blunted by the statute of limitation. The IRS has a substantial role in the ultimate restitution of any lost money for the half million people who depend on this Fund for their retirement.

STATEMENT BY SECRETARY OF LABOR RAY MARSHALL ON TEAMSTERS CENTRAL STATES PENSION FUND SUIT

This morning, the Labor Department filed in Federal District Court in Chicago a civil law suit against 17 former trustees of the Teamsters Central States Pension Fund. In addition, one current and one former official of the fund have also been named as defendants.

The suit has been filed under the provisions of the Employee Retirement Income Security Act (ERISA). The suit contends that these trustees and officials of the Fund failed to adequately discharge their fiduciary responsibilities to prudently manage the assets of the Fund. The complaint details a series of questionable loan transactions that illustrates the pattern of imprudent behavior by these trustees and officials.

Our suit seeks reimbursement for all losses stemming from the failure of these trustees and officials to carry out their fiduciary obligations in managing the Fund.

This suit is another major step in the Labor Department's intensive investigation of the Central States Fund.

When I became Secretary of Labor, I had two major goals in respect to the Department's handling of the Central States Fund investigation. One was to safeguard the remaining assets of the Fund. The other was to take whatever civil action was necessary under ERISA to restore the losses that had been incurred by the Fund.

In March 1977, the four "holdover" trustees of the Fund agreed to resign and to place the Fund's assets in the hands of competent, independent investment managers. In June 1977, the Equitable Life Assurance Society agreed to supervise the independent investment managers.

As anyone who has been following our investigation knows, documenting the questionable loans made by the Fund has been a tremendously complex process. As a result it has taken many months and much investigative work to prepare this suit.

As you will note from reading the complaint, we do not seek a specific dollar amount in damages. Instead, we have asked the court to hold all the defendants liable for the losses that the Fund has suffered as a result of their actions. Since many of the questionable loans will not come due for a number of years, we have also asked that the defendants be ordered to indemnify the Fund for future losses as they become ascertainable.

At this time, we are unable to set a fixed dollar amount on the past or future losses of the Fund. Part of the problem is due to the nature of the real estate market and part is due to the lack of specific information about the current status of some of the investments. In addition, as I mentioned earlier, many of these investments will not mature until some time in the future.

Obviously, much of the information about the extent of the losses will come out in the course of this litigation. We have also made some estimates of the minimum amount of the losses we expect to be able to prove during the trial. This amount is very substantial. However, our estimates are not a matter of public record and it would be inappropriate for me to discuss them at this time.

I have with me today Solicitor of Labor Carin Clauss and Assistant Secretary Frank Burkhardt. We will be glad to answer your questions on this law suit. However, I must add that there will be some questions we will not be able to answer because this is a matter of pending litigation.

(Attached are a fact sheet and a brief chronology of events.)

FACT SHEET

Background information on the fund

The Central States, Southeast and Southwest Areas Pension Fund was started in 1955.

It is a Taft-Hartley, multi-employer employee pension benefit plan.

It is one of the largest pension plans associated with the International Brotherhood of Teamsters.

It has approximately 480,000 participants, approximately 63,000 of whom are currently receiving pension benefits.

By the number of participants it is the 3rd largest private pension plan in the nation.

Its participants work for approximately 19,000 employers in 33 states, and are members of about 300 local unions.

In its most recent annual report the Fund reported assets of approximately $1.4 billion which would rank it as the 16th largest plan in the nation by the size of its assets.

According to the annual report, approximately 70 percent of the Fund's assets are invested in real estate related loans or ventures.

The Fund receives approximately $25 million per month in contributions and pays out approximately $17.8 million per month in benefits.

Brief chronology of events

January 1975—ERISA takes effect.

January 1976—The Special Investigation Staff was formed within the Department of Labor to investigate possible violations of ERISA involving the Central States Pension Fund.

June 1976—IRS disqualified the Fund.

October 1976—As a result of the Department's investigation twelve of the Fund's sixteen trustees resigned from their positions with the Fund.

March 14, 1977—The Department announced that the trustees had agreed to delegate control of all investment assets of the Fund to one or more independent investment managers and that the hold-over trustees had agreed to resign from their positions with the Fund.

April 1977—The hold-over trustees resigned. IRS requalified the Fund.

June 17, 1977—The new trustees of the Fund announced the selection of a group of independent investment managers which would be supervised by the Equitable Life Assurance Society of the United States.

NUCLEAR ENERGY: FRIEND OR FOE?

(Mr. BOB WILSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BOB WILSON. Mr. Speaker, it has been rumored that the United States will be bereft of its best fossil fuels—oil and gas—in a few decades or less. If this rumor is true, it would appear prudent to reduce consumption of U.S. stocks. Reduced consumption, particularly as boiler fuels, would rapidly cause energy shortages with immediate serious consequences on the economy and employment. The past winter and this one have given ample proof of such consequences. Lowered gas supplies put hundreds of thousands out of work. Frozen coal piles at powerplants forced a dangerous reduction in voltage, further hampering industry. Anticipated coal shortages, from the strike, will cause greater hardships.

Nuclear powerplants do not suffer from fuel shortages or winter weather. As a matter of fact, nuclear powerplants are increasingly carrying a larger part of U.S. electricity production with little fanfare but with high reliability. Why, then, is there a constant outcry against nuclear power? I am certain that these attacks come from a masochistic desire on the part of a few to generate a "national guilt" because World War II was ended by nuclear weapons. "Nuclear is nuclear!" The attack takes many forms.

The U.S. public has been badgered by the antinuclear forces for years. These groups—small in number, loud of voice—have insisted that nuclear power proponents prove "negative statements." For example: "Prove that a nuclear power plant anywhere in the United States (or the world) will never have a serious accident." If a reasonable explanation of why a serious accident—that is, loss of coolant flow and fuel meltdown—is not likely, the anti will come out with:

"YES, BUT WHAT IF . . .?"

An opponent can "Yes, but what if * * *" until Hades freezes over. Let us consider the real world. In the 33 years the United States has had nuclear weapons on alert, in storage, under test, under fabrication, or dismantled for retirement, there has never been an accidental or unauthorized nuclear detonation. I mention this outstanding accomplishment for one very significant reason. The high technology trained engineers and scientists who design and construct nuclear powerplants, which now provide a significant portion of the total electricity in some areas, are of the same caliber as the engineers and scientists who designed and fabricated the highest integrity and safety into our national security nuclear defenses.

The chances of a serious nuclear powerplant accident affecting the American public is about as likely as any given American being struck by a meteorite. It is not very likely.

I would like to examine several aspects of the nuclear power industry and to try to separate fact from rhetoric.

NUCLEAR POWER AND THE PUBLIC

The referendum in California and in other States on whether the public favored nuclear powerplants came out in each case with votes about 2 to 1 in favor of nuclear power. This fact seems to have been forgotten in Sacramento. A Harris poll after the April 20, 1977, energy message by President Carter indicated Americans favored a speedup in nuclear plant construction by 68 percent to 21 percent—a 3-to-1 margin for nuclear. This is evidently unknown in Sacramento. A Harris survey in May 1977 indicated a major disagreement between the public and consumer activists on the importance of targeting nuclear energy for attack. The public response showed 19 percent seeing nuclear as an important target; 61 percent of the activists took this view. The demagogs in Sacramento who are "targeting" nuclear power are either ignorant of this fact or have just decided to ignore the public. I wonder how they define "democracy" or even "democratic"?

NOBEL LAUREATES, SCIENTISTS, ENGINEERS, AND THE COMMON MAN

The 69,000-member National Society of Professional Engineers agreed to the following statement:

Nuclear power is an essential power source for the immediate future.

The Energy Committee of the 170,000-member Institute of Electrical and Electronics Engineers is on record as having stated:

Any energy policy should include the increased use of nuclear energy for electric power generation.

Does the Nobel laureate recipient of the peace prize have more knowledge about the safety of nuclear power systems than trained engineers, scientists, and electric power generating equipment operators? Would the average American allow a Nobel laureate in medicine to pass judgment on the "ills" of his automobile? Personally, I would sooner trust a trained automobile mechanic.

Yet, the common man is "snowed" by the mixed metaphors of untrained, highly educated pontificators who are prone to discuss the immorality of plutonium as a nuclear fuel because it is used in nuclear weapons. I have not heard recently about the immorality of dynamite. The few educated defectors from the ranks of nuclear energy technologists are treated by the media like profligate prodigals that have recovered their sanity. The hundreds of thousands of their peers who point out the bias or the errors in the defectors' statements are ignored by the same media.

Many years ago in a comedy show, one of the characters said: "Don't bother me with facts; my mind is made up."

The not-so-funny situation engendered by the Governor and his henchmen (and henchwomen—maybe henchpersons) in Sacramento is ludicrous and dangerous. A seminarian-lawyer, a few lobbyists, and a few environmentalists have decided that the sovereign State of California can—might—survive on existing energy sources for the next 20 years, or whatever it takes to develop new erotic supplies like biomass.

Does Jerry Brown know enough about nuclear technology to make a rational decision about safety, waste disposal, or plutonium proliferation? I do not believe the Governor or the incompetents who surround him have any idea of how nuclear plants are built. It is another example of self-appointed royalty telling the common man, "Now that you have put us in office, we will run your life."

The people of California stated 2 to 1 they wanted nuclear power. The ignorant arrogance displayed in Sacramento is unconscionable.

CAN CALIFORNIA SURVIVE WITHOUT NUCLEAR ENERGY

The White House energy staff put out the energy program fact sheet. It states, in part:

Even with vigorous conservation, America's demand for energy will continue to grow for the next decade. Although the United States will eventually make extensive use of solar and other nonconventional sources, it will have to rely, for at least the next two decades, on the conventional sources now at hand: oil, natural gas, coal, nuclear power and hydroelectric power.

Let us examine what this statement is trying to tell us:

First. No matter how hard conservation is practiced, energy demand will grow for the next decade; and I would add, forever after.

Second. Eventually—no date given—the United States will make extensive use (no percentage of total energy given) of non-conventional sources (generally nonconventional is interpreted as sources not too efficient for use very soon).

Third. Reliance for at least two decades on conventional (now in use) sources:

Gas and Oil—We are told we must conserve. Do not use as a boiler fuel.

Coal—"Strip mine it from somebody else's back yard." "Do not burn it in California."

Hydroelectric—No more dams. The really endangered species—man—must move over for the snail darter.

Nuclear—the White House Energy Staff calls for the building of 300 additional nuclear plants by the year 2000. How many will California need?

On the scale of quadrillions (Q) of British thermal units (Btu), one Q is equal to 180 million barrels of oil. The United States used about 75Q in 1976 with a civilian work force of 85 million. The Bureau of Labor Statistics estimates a work force of 113 million by 2000 and the use of 170Q, reduced, perhaps to 150Q by stiff conservation practices. The United States has over 215 million people; California has about 10 percent of the total. The work force is estimated to increase about 25 percent and energy use almost 100 percent by the year 2000.

If it is not obvious that nuclear power will be the only way to provide the necessary increase in electricity by 2000, it becomes obvious that the disbeliever needs no facts, his mind is made up.

IS NUCLEAR POWER SAFE?

How safe is power generation? We have had dam failures, mine fires, gas explosions, and oil spills and fires, all of which have seriously affected the public. There is risk in every human activity, and power generation is no exception. However, nuclear power generating plants have never had a material failure or human miscalculation which resulted in an accident that affected even a single member of the public. The absence of interaction with the public when accidents or failures occur is due entirely to the careful planning and redundancy of safety systems incorporated in nuclear powerplants. It is no accident that the public has never been involved in a nuclear powerplant mishap. "Fail Safe" is more than a motto; it is a fact of life in nuclear power generation.

I would like to point to our nuclear weapons program as the birthplace for the excruciatingly rigorous training given nuclear powerplant designers, constructors, and utility operators. In the weapons case, we can be proud of the fact that no aircraft crash or other accident has ever resulted in a nuclear event. In power generation, we can be equally proud that, on a world-wide basis, there have been over 1,300 reactor years of operating experience without the occurrance of any accident that released a significant amount of radiation. Again I state, no member of the public has hardly been inconvienced, let alone hurt. The industry's concept of defense in depth has been a winner.

Whenever we point to this remarkable safety record, some antinuke nut will come up with a "Yes, but what if * * *?" At that point I am tempted to counter with, "Yes, but what if your mother had had a miscarriage?"

The people of California indicated they wanted nuclear energy in spite of the phony horror stories they were told. Safety is the name of the nuclear game. California's officials had better listen to the people, or the State may have to depend on Las Vegas-type industries to survive—using candlelight, of course.

ARE NUCLEAR POWERPLANTS RELIABLE AND COMPETITIVE?

It would not make good sense to opt for nuclear powerplants if you could not depend upon them being online when scheduled. The following table compares nuclear and fossil plants in the two major categories, operating availability and capacity factor.

Availability is defined as the proportion of time during a given period that a plant was capable of producing electricity; and

Capacity factor is the electricity actually produced during a period of time compared to the amount that could have been generated had the unit run constantly at full capacity.

PERFORMANCE OF LARGE FOSSIL AND NUCLEAR PLANTS—600 MEGAWATTS ELECTRIC AND LARGER

(In percent)

Nuclear	Availability	Capacity
1966–1975	74.4	59.5
1976	69.4	58.8
1977 (9 months)	74.5	65.1
Fossil		
1966–1975	74.3	57.5
1976	73.2	56.4
1977 (3 months)	74.1	58.2

These data are more eloquent than words.

On December 2, 1942, the first nuclear reactor operated in the squash courts under Stagg Field on the University of Chicago campus. Two years after construction was started, nuclear reactors were producing plutonium for the Trinity weapons test of July 17, 1945 and for the weapons used over Japan. Today, it can take 4 to 6 years to get clearance to build a nuclear powerplant, in most parts of the United States. Actual construction is now estimated to 8 to 10 years. In Japan—the site of the first and only use of nuclear weapons—it takes only 5 or so years to put a plant online. In California, it may take forever.

As one utility executive said, the cost of borrowed money over these long construction periods is more than is spent on the actual generating machinery. That is a ridiculous situation.

For nuclear plants now online, the cost of producing elecricity is favorable. A June, 1977 Authur D. Little Co. study showed nuclear power had an advantage of 0.1 cent (1 mill) per kilowatt-hour when compared to use of low-sulfur western coal, to 5.5 to 6.5 mills (0.55 to 0.65 cents) per kilowatt-hour when compared to the use of high-sulfur eastern coal. In 1976, nuclear energy produced, on the average in the United States, a kilowatt-hour of electricity for 1.5 cents, according to an industry survey. This was 18 percent less than the cost of coal generation (1.8 cents) and 58 percent less than oil generation (3.5 cents).

FUEL REPROCESSING, NUCLEAR WASTE AND PROLIFERATION

This could also be called economics, health, and war. Each year about one-fourth to one-third of the fuel elements in a commercial nuclear reactor need to be replaced. The replaced fuel elements still contain much valuable uranium in addition to the plutonium generated during the fission process. The Carter administration has declared a moratorium on the reprocessing of the fuel elements from commercial reactors. It seems incredible that in a country which is pricing its manufactured products out of the world markets because of energy costs, the national leaders would deny the people the benefits of valuable energy materials. Reprocessing is now available in six nations abroad. The Carter administration says it is concerned over current world safeguard procedures. It has deferred U.S. reprocessing in the belief that this will help prevent the possible division of reclaimed plutonium for weapons purposes.

Let me state unequivocally that nations which depend on nuclear energy to prevent bankruptcy from the cost of imported oil will find ways to get back for future use the uranium and plutonium in their used fuel elements. The Carter approach is unreasoned and unreasonable.

The long-term storage of the residue from fuel reprocessing activities is another point of attack by anti-nuclear-power groups. The attack is unjustified. The fission products that remain after the plutonium and uranium are removed during reprocessing are highly radioactive and require isolation from the biosphere. The national security nuclear program has done this since 1943 on a "temporary" basis in huge steel tanks at Hanford, Wash.; Aiken, S.C.; and Idaho Falls, Idaho. Although some tanks have developed minor leaks, they were repaired or removed from service. To date there has been no interaction with the public and none is anticipated.

A permanent solution of waste encapsulation in glass and burial in salt mines is under development. The Russians, French, and Germans have used such systems on actual and trial bases with good results. There is no reason why this system will not work as a permanent way to isolate waste products.

The hyperbole surrounding nuclear powerplant waste stems primarily from wild charges that plutonium is one of the most toxic substances known to man and that the release of a quantity of plutonium into the environment would result in thousands of additional cancers.

The claims made about the toxicity of plutonium are misleading. Plutonium is not penetrating; a piece of writing paper is not a rapidly acting poison like potassium cyanide. Its principal radiation is not penetrating; a piece of writing paper can serve as an effective shield. But it is a radioactive substance and toxic if it is lodged in the body, so proper precautions must be taken to prevent exposure to it.

Tons of plutonium have been handled in the U.S. weapons programs over a period of many years without any known instance of plutonium-induced cancer among employees or the public.

How many Americans who are frightened by tales about the thought of plutonium encapsulated in glass and placed in steel casks which are buried in salt mines 3,000 feet underground, are ever told that over 5 metric tons—more than 12,000 pounds—of plutonium have been released to the Earth's atmosphere by nuclear weapons testing. Yet, there is not one recorded case of cancer which can be attributed to this free-flying plutonium. If, as the nuclear power opponents claim, a single dose of 0.000000035 ounce of plutonium can cause cancer, the 12,000 pounds released to the atmosphere equals 5.5×10^{12} cancer doses. This is better than 1,000 doses for every human on Earth. Let me repeat: Not one case of cancer attributable to plutonium has been reported in the 33 years of weapons testing in the atmosphere.

I conclude that this argument that buried wastes can cause cancer is phony and deliberately misleading.

The argument against nuclear power involving weapons proliferation is also a phony. There are many ways to control plutonium which is to be used as nuclear power fuel. The problem again is the "Yes, but what if . . ." groups that will try to generate the most insane scenarios possible to discredit honest attempts to provide real life protection.

If the U.S. Government leadership cannot protect fuel element plutonium as well as it does weapons plutonium, we had better get new leadership.

FOREIGN MISSION SOLAR ENERGY DEMONSTRATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Vermont (Mr. JEFFORDS) is recognized for 20 minutes.

Mr. JEFFORDS. Mr. Speaker, I am today introducing a bill which would require the placement on our diplomatic and consular buildings abroad projects which utilize alternative energy systems. Such systems would be of a variety of alternative energy technologies, all of which are being developed by the Department of Energy, including heating and cooling, wind, photovoltaics, solar thermal, and biomass.

This bill has a number of purposes. First and foremost, it is designed to help move us to a position of leadership in implanting these technologies, at a much faster rate than is currently the case, across the globe. I need not belabor the reason: Fossil fuels are not only finite but increasingly expensive; nuclear power is outside the financial reach of most developing nations and presents proliferation problems. It is altogether proper and, I think, necessary for us to demonstrate our technological capacities to accelerate the solar transition across the world.

Mr. Chairman, last summer the Office of Technology Assessment released a major study entitled "Application of Solar Technology to Today's Energy Needs." The study, in discussing the international scene, concluded:

> Development of a foreign market for solar energy devices could provide an excellent opportunity for U.S. exports, and the expanded sales resulting from this would probably lead to lowered costs and improved quality of domestic solar equipment. The international utilization and impact of solar energy may depend critically on U.S. initiatives over the next few years. In most areas, U.S. research is the most advanced in the world, so many nations will look to the United States for guidance in this field. A U.S. commitment to solar power would encourage foreign commercialization of the technology, if only by giving it prestige.

It is an unfortunate fact that much of the developing world has considered the acquisition of conventional and nuclear energy systems as status symbols; and

that so-called alternative systems have been looked upon by many as poor man's energy. We must break this psychology as quickly as possible. The bill calls for projects which will give "visible incentives" to these nations "to develop and use local solar energy." Thus the projects selected should be "adaptable to the local resources, climatic conditions, and economic circumstances of the host country in order that such countries will more likely implement similar projects."

Information, technical, and engineering assistance to the Department of State under this measure would be provided by the Department of Energy.

I would point out that this is not a new concept to the Department of State. Several years ago, the State Department placed solar heated hot water installations on two U.S. mission residences in Tel Aviv, Israel. The savings in electrical consumption was dramatic and, according to the Department, "it is estimated that the average savings per annum on electricity for hot water per house will be approximately $300 to $400." Furthermore, "if similar systems were installed at 26 other residences, substantial additional savings of approximately $7,800 to $10,400 per year in utility costs could be achieved."

This saving in electricity costs, as already demonstrated in Israel, can be achieved in many parts of the world with a variety of systems. At my request, the Office of Foreign Buildings in the Department of State has compiled a list of "possible solar installations" to serve as an illustration of what could be done. The list includes 11 major installations in various countries, including Niger, Pakistan, Iran, Senegal, Egypt, New Zealand, Bangladesh, Malawi, Philippines, and Kenya; the technologies range from photovoltaics, to solar windpower to solar thermal absorption. The Department has also compiled a list of 130 installations on all continents in our many posts where solar domestic hot water might be implaced.

The total estimated cost of these projects, after engineering studies to determine feasibility, is roughly $5 million. It is this figure which the bill I introduce today authorizes the Department to spend in fiscal year 1979 on these projects.

The potential for American leadership in this field is large and still unrealized. Take, for example, photovoltaic technologies. The present cost of these systems is uneconomically high, because the industry has been in the handicraft stage. But, with congressionally mandated funding, as already agreed upon by the Energy Act conferees, over the next 3 years, the industry will be able to automate and costs will drop dramatically. Based on these new cost projections very recent studies by the NASA-Lewis Research Center and Lincoln Laboratory at MIT are optimistic over the future of photovoltaic technologies in the less developed world. A March 1977 study for DOE by Lincoln Laboratories concluded that "photovoltaic power possess certain attractive features that suggest an important role in meeting the energy needs of less-developed countries.' And in a June 1977 NASA-Lewis study entitled "The Market for Solar Photovoltaic Power in Developing Countries: 1977–2000", it was concluded:

It is clear . . . that the adoption of renewable resource (e.g., solar) decentralized energy technology (e.g., photovoltaic, wind) should provide significant benefits for economic development and the quality of life in LDCs. Major benefits to the U.S. would be (1) enhancement of national security by lessening pressure created by declining economic positions of large masses of the world population, (2) creation of new foreign markets, and (3) to provide markets to support the major portion of the growth of fledgling U.S. solar energy industry.

I would point out, Mr. Speaker, that the United States is not in the lead in the international marketing of these technologies. Far from it, there are a number of countries—including Japan, France, Germany, and Israel which are currently pursuing more aggressive strategies in marketing their alternative technologies. We are behind, and I am suggesting this measure as one small step to help move us in the right direction.

An identical measure is being introduced today in the Senate by Senator CLIFFORD CASE of New Jersey. It is my hope that this measure will receive the widespread support of our colleagues in both Chambers of the Congress.

The following is the text of the Foreign Mission Solar Energy Demonstration Act:

H.R. 10699

A bill to authorize the Secretary of State to implement solar energy and other renewable energy projects in certain buildings owned by the United States in foreign countries

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Foreign Mission Solar Energy Demonstration Act".

SEC. 2. (a) It is the purpose of this Act to demonstrate solar energy and other renewable energy technologies in foreign countries by using such energy in buildings acquired under subsection (a) of the first section of the Foreign Service Buildings Act (22 U.S.C. 292(a)), in order that—

(1) host nations may be given visible incentives to develop and use local solar energy or other renewable energy resources to reduce dependence upon petroleum and petroleum products;

(2) markets may be developed for American solar energy systems and components in order to stimulate investment in such systems and components and to reduce the costs of such systems and components to reasonable levels;

(3) in order to further the purpose of section 119 of the Foreign Assistance Act of 1961, cooperation may be developed between the United States and other countries in an effort to develop solar energy or other renewable energy systems within a short period of time; and

(4) equipment which is vital to the operation of sensitive systems within United States missions abroad may be made more self-sufficient and reliable and will not be dependent upon interruptible local energy supplies.

(b) (1) The Secretary of State shall implement projects for the application of solar energy or other forms of renewable energy in buildings acquired under subsection (a) of the first section of the Foreign Service Buildings Act.

(2) The Secretary of State shall select projects under paragraph (1) in consultation with the Secretary of Energy. Such projects shall apply available solar energy and other renewable energy technologies, including those for—

(A) the heating and cooling of buildings;

(B) solar thermal electric systems;

(C) solar photovoltaic conversion systems;

(D) wind energy systems; and

(F) systems for developing fuels from biomass.

The Secretary of Energy shall inform the Secretary of State of all such technologies which are feasible for such projects, taking into account the resources and environmental conditions of the host countries concerned. Upon the request of the Secretary of State, the Secretary of Energy shall provide to the Secretary of State such technical information or other technical assistance, with respect to any project, as the Secretary of State considers necessary. Any project selected under this section should be similar to projects which have been demonstrated by the Department of Energy or its predecessors to be reliable, maintainable, and technically feasible.

(3) Any project selected under this section shall be adaptable to the local resources, climactic conditions, and economic circumstances of the host country in order that such country will more likely implement similar projects.

(4) The Secretary of State shall take the steps necessary to insure that any project selected under this section is demonstrated to, and available for inspection by, officials and other citizens of the host country.

(5) In selecting projects under this section, the Secretary of State shall give priority to projects to be implemented in less developed countries.

(c) Whenever any building is constructed under the authority contained in the first section of the Foreign Service Buildings Act, the Secretary of State shall take the steps necessary to insure that the planning for such construction takes into account those renewable energy systems which are available in the country in which the building is to be constructed.

(d) There are authorized to be appropriated to carry out this section for the fiscal year beginning on October 1, 1978, $5,000,000.

PROFESSIONAL STUDY, MONITORING AND REPORTING OF NATIONALLY SIGNIFICANT NATURAL AND HISTORIC RESOURCES NOW INSTITUTIONALIZED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas, (Mr. SEBELIUS) is recognized for 10 minutes.

Mr. SEBELIUS. Mr. Speaker, Public Law 94–458, approved October 7, 1976, contains a provision directing the Secretary of the Interior "to investigate, study and continually monitor the welfare of areas whose resources exhibit qualities of national significance and which may have potential for inclusion in the National Park System." These studies are to result in a list, to be submitted by the Secretary to the Congress each October 1, comprising not less than 12 such areas which appear to be worthy of addition to the National Park System.

This directive represents the most recent and the most methodically comprehensive and continuous effort to identify nationally significant new areas to be considered for addition to our national park system. It is intended to provide a

professionally derived listing of meritorious areas which the Congress may wish to consider drawing upon in its efforts to legislate new additions to the National Park System.

The first list, along with supportive study material, was submitted on November 30, 1977, and consists of 13 such areas. The list and brief background on each area is available as House document No. 95–264, part 1. The 13 listed areas are:

Friendship Hill, Pa.
Guam Parks, Guam.
Prairie, Kansas/Oklahoma.
Antietam, Md.
City of Rocks, Idaho.
Great Basin, Nev.
New River Gorge, W. Va.
San Antonio Missions, Tex.
Mineral King, Calif.
Hagerman Fauna Sites, Idaho.
Channel Islands, Calif.
Potomac River, West Virginia/Virginia/Maryland.
Valle Grande, N. Mex.

Specific study background on each of the above is contained in individual printed documents, parts 2 through 14 of the above House document.

'A second feature of the law provides that annually on the same October 1 date, the Secretary is also to transmit a complete and current list of all areas included on the Registry of Natural Landmarks and those areas of national significance listed on the National Register of Historic Places, which exhibit known or anticipated damage or threats to the integrity of their resources.

The list recently submitted includes 41 natural landmarks and 102 historic landmarks. While these are identified as being damaged or threatened, this listing effort accomplishes no more than providing increased visibility of their plight. No mechanism is now in place or on the drawing boards to do anything about this dilemma, other than what might be accomplished in ad hoc, case-by-case individual actions of some type. Herein lies a need and a challenge to action to find some acceptable methodology for protecting these nationally significant historic and natural features.

Mr. Speaker, I would like to commend the Secretary of the Interior and the National Park Service for the excellent effort and product which resulted from this first annual effort under this new law.

Only 1 year was available to inaugurate a whole new procedure, detail manpower, perform and update studies, and monitor many sites in the field in order to bring these first lists and studies through for submission to the Congress. Of course, some of the mechanisms were already in place, as important documents like the National Park Service's theme studies, the National Park System plan, and various site-specific studies for potential new park system consideration were already at hand. While some of the study material is not as complete and up to date as was intended, I am sure that as time goes on and we move further from the initial startup time problems, past imperfections in process and results will disappear. I believe that with this good start already made, we can look forward to an even more perfected professional product this next October.

I want to point out, Mr. Speaker, that the work we see from this submission represents only the tip of the iceberg in terms of natural and historic resource values which may be in serious need of protection, however. Much professional work already done to identify nationally significant sites sits unprocessed within the Department of the Interior. Hundreds, if not possibly a thousand or more sites, have been nominated by professional study to be considered for natural landmark designation by the Secretary.

While many of these sites are known to be threatened by adverse impacts or outright obliteration, they cannot be identified on the threatened landmarks list submitted annually to Congress because the Secretary has not yet reviewed these areas to consider whether they are first worthy of landmark status itself. The latest list I have shows 142 of these areas, for example, in California alone, which are awaiting review as to their merits for achieving designation as natural landmarks. This is a type of bottleneck which must be promptly alleviated.

Mr. Speaker, now that we have this type of material at our disposal, it is incumbent upon those of us in positions of being able to take or devise further action, to act accordingly to further protect those important threatened resources. I hope that the Congress and concerned groups and individuals will work aggressively together to help bring more rapid and thorough protection to these threatened elements of our great natural and historic heritage.

TIME TO ACT IN COAL STRIKE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. QUAYLE) is recognized for 5 minutes.

Mr. QUAYLE. Mr. Speaker, it is imperative that President Carter and Secretary of Labor Marshall immediately reevaluate their positions in regard to invoking the Taft-Hartley Act to require striking coal miners to return to work.

In his press conference on Monday, the President said he saw no immediate prospect of having to exercise the Taft-Hartley provisions because the situation is not critical enough.

Mr. Speaker, in the wake of one of the worst blizzards in history, the citizens of Indiana, Ohio, and Michigan are on notice that special conservation measures now are necessary because of dwindling supplies of coal used in making electricity. Governor Bowen of Indiana has called for a reduction in electric power usage by 10 to 15 percent to conserve supplies.

Many electric utilities have less than 60-day supplies of coal on hand, and even if the miners were to return to work immediately, it is possible that mandatory curtailments may have to be imposed.

As the days pass, without progress in this 2-month-old strike, further stringent conservation actions will be necessary and there could be serious impact on the economy.

Time is running out. The President and his Secretary of Labor should take a new look at the situation and take whatever steps necessary to get the miners back to work and the negotiations resumed.

We may not be able to control the weather, but surely we can find a way to insure sufficient coal supplies to generate the power for our towns, homes, and factories.

UNANSWERED QUESTIONS ABOUT THE RETURN OF ST. STEPHEN'S CROWN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DORNAN) is recognized for 10 minutes.

Mr. DORNAN. Mr. Speaker, when President Carter announced his intention to contravene 25 years of national policy and return the symbol of Free Hungary, the Crown of St. Stephen, to the Soviet-dominated Kadar regime, the public outcry was deafening.

But as we know, the President and his State Department chose to ignore the wishes of the American people and the concerns of the Congress. The crown was duly surrendered to the Communists in Budapest on January 5.

But questions about the methods which the executive branch and the media used in dealing with the public and with the Congress during the time preceding the surrender still remain. These questions, if left unanswered, raise grave doubts about the veracity of the statements made by the executive branch and the trustworthiness of the press.

So that my colleagues have the opportunity of being aware of the larger unanswered questions attending the surrender of the crown, I ask that three items be reprinted as part of my remarks. They are: First, an editorial which appeared in the January 28, 1978, Kanadi Magyarsag, the largest Hungarian weekly in the free world. It is entitled "Carter's Handling of the Hungarian Crown—New Watergate Scandal. State Department's Perjured Testimony Decided Court's Decision"; second, a letter written by Mr. George Sibrik, complaining to the New York Times of misstatements which appeared in the newspaper in connection with Mr. Sibrik's sworn testimony before the Supreme Court; and third, Mr. Sibrik's testimony before the Supreme Court:

CARTER'S HANDLING OF THE HUNGARIAN CROWN—NEW WATERGATE SCANDAL

STATE DEPARTMENT'S PERJURED TESTIMONY DECIDED COURT'S DECISION

The revelations about Watergate led to the resignation of President Nixon. High government officials were sentenced to prison for perjury.

Following the shocking events of Watergate, the American people elected a "Born Again Christian" who promised to govern with high moral standards. The United States and its friends hoped for a regeneration of traditional American constitutional, legal and moral values.

The events of the last two months regarding the U.S. handling of the Holy Crown of Hungary reveal a scandal wider than Watergate in its institutional dimensions. In Watergate only the conduct of the Executive Branch, of the Office of the President was involved. The present scandal touches the President, the Departments of State and Justice, the Congress and, most unfortunately, even the Federal courts. For this reason the scandals is worse than Watergate.

As Congresswoman Mary Rose Oakar (Dem., Ohio) wrote, "deceit and deception have characterized the entire handling of this issue" by the White House, the National Security Council and the Department of State.

Senior members of the House of Representatives, Congressman Clement J. Zablocki (Dem., Wisconsin) and Lee H. Hamilton (Dem., Indiana) also carry a heavy burden of conscience for which they should answer to Congress and the American people. They manipulated the Congressional machinery in the support of President Carter to prevent the House from considering Congresswoman Oakar's Bill to keep the Crown in the United States.

Far more distressing, however, are the events which took place before the American courts. The record shows that, on Christmas Eve, under heavy pressure from the Justice and State Departments, Judge Earl E. O'Connor of the Federal District Court in Kansas City moved the hearing date, originally set by him on the proposal of the State Department for January 3, 1978, forward to December 29, 1977. He took this action without the prior knowledge or consent of the plaintiff Senator Dole or his lawyers. Under these circumstances, Dole's lawyers had only two days, December 27 and December 28, to assemble the affidavits and prepare their case. Obviously, with the mails delayed by the Christmas rush, with potential witnesses away on vacation, this was an impossible task.

This was the first serious injudicious blunder of Judge O'Connor.

His next blunder was far worse. In a manner probably without precedent in American court practices he gave credence to the categorical assertion of the State Department's Deputy Legal Adviser that he, Mark B. Feldman, after having searched all relevant files has not discovered any indication of any understanding between United States and Hungarian authorities concerning the application or non-application of the 1947 Treaty of Peace to the Crown of St. Stephen, tacit or otherwise.

Senator Dole's affidavit included a letter from Deputy Assistant Secretary of State Walworth Barbour to Assistant Attorney General D. S. Townsend indicating a "special trust." Affidavits by other witnesses indicated that some evidence of some kind of secret discussions and tacit understanding had taken place between American and Hungarian officials.

Despite this, Judge O'Connor did not submit Mr. Feldman to any judicial cross-examination. Instead, giving full weight and credence to Mr. Feldman, Judge O'Connor dismissed Senator Dole's assertions as having no basis whatscever.

The documents we have published show without challenge that the highest levels of the American and Hungarian governments had had in fact many discussions and had reached an agreement on the Crown, tacit and secret in nature because of the Soviet occupation of Hungary.

Moreover, the Hungarian witnesses to the crucial incidents which led to that tacit agreement are alive and resident in the United States. One is former prime Minister Ferenc Nagy. They should have been heard by Judge O'Connor.

The evidence points to one conclusion. The Court has been deceived. The State Department, in the person of Mark Feldman, has committed perjury.

Judge O'Connor cannot plead innocence for his too-ready accommodation of the Carter administration in moving the hearing date forward from January 3, 1978 to December 20, 1977. He can plead even less innocence for his injudicious opinions and conclusions based on the misleading and categoric affidavit given under oath of Mark Feldman.

Neither can the appellate judges in Denver, Colorado avoid the judgment of history on the errors in reviewing the record. Nor can Supreme Court Justice Byron R. White hope that his own oversights will be passed over in silence.

Whatever extenuations they will plead, they can not now claim on the basis of the public evidence that they do not know that the affidavit of Mark Feldman, on which Judge O'Connor placed such total reliance, is subject to serious challenge on the grounds of perjury. On this ground alone, it is their duty, as defenders of the integrity of the judicial system of the United States, to order a full disclosure of those documents which Mark Feldman in fact examined and of all other documents in the possession of the United States regarding the Crown, including those which Mark Feldman did not examine, although he swore that he read all pertinent material.

The entire world awaits what Judge O'Connor, the appellate court in Denver, Colorado, and Supreme Court Justice White will do to correct the official judicial record.

The reputation of the United States and especially of its judiciary are at stake.

WASHINGTON, D.C.,
January 9, 1978.

THE EDITOR,
The New York Times,
New York, N.Y.

DEAR EDITOR: Your January 6th editorial carried an unsigned "Special Report" on the Holy Crown from your Washington Bureau which contains many serious errors of fact and, unfortunately, even more serious omissions of relevant information which your correspondents, David Binder and Linda Charlton received. As I shall reveal to you, large portions of that special report were written to discredit publicly my sworn affidavit submitted to Justice White. Under these circumstances, I am sure you will publish my letter in full to set the record straight.

I have now ascertained that on January 3, Linda Charlton of your Washington Bureau received a copy of my sworn affidavit regarding the conditions which Colonel Pajtas negotiated during the 81-day period from May 6 to July 25, 1945 prior to delivering the Crown to the American authorities. I am also informed that she showed this affidavit to David Binder, who subsequently supervised the preparation of the unsigned "Special Report" which you published.

Neither Linda Charlton nor David Binder telephoned me for any supporting information. Instead, your Washington Bureau telephoned Dr. Andor Klay, who is misquoted in your article, and asked him to comment on my reputation and to solicit his views as to the likely truthfulness of my sworn affidavit.

Dr. Klay, with whom I have spoken since learning of this affair, reported that he had the highest regard for me. As to the facts in my affidavit, which were read over the telephone to him, his comments were that he himself had spoken to Colonel Pajtas and Admiral Horthy in 1945, while on assignment with the Office of Strategic Services (OSS) and that neither of them had mentioned any conditions having been set by Colonel Pajtas. Dr. Klay did not say, and does not now say, that he positively knows that no condition was negotiated.

Consequently, the following sentence in your "Special Report", which I note is significantly not in quotation marks, is seriously misleading: "Dr. Klay, then serving in the United States Office of Strategic Services, interviewed Colonel Pajtas after the crown was handed over to Major Kubala, and recalls that Hungarian officer set no conditions on his desire to place the crown in American custody".

I am informed that Dr. Klay made no such statement but said instead that Colonel Pajtas did not mention the subject of conditions during their interview and for this reason Dr. Klay inferred that no condition was set. Dr. Klay reinforced his inference by certain other speculations and hypotheses but at no time did he say that to his positive knowledge no condition was set. Thus your report is seriously misleading.

There is a second, even more serious misstatement in the report, this one regarding Prime Minister Ferenc Nagy. Your Special Report states the following:

"The country's only freely elected postwar Prime Minister Forenc Nagy who was ousted by the Communists in 1948, requested the United States not to return the crown".

First, Prime Minister Nagy was ousted in 1947 and not in 1948. Even more importantly, his request not to return the Crown took place prior to the Paris Peace Treaty of February 10, 1947.

The circumstances in which the Prime Minister Nagy made this request has been confirmed by him on several occasions and a record exists in the classified archives of the Department of State, as well as the White House.

The facts are the following. The Hungarian Restitution Mission, accredited to the U.S. occupation authorities in Frankfurt/Hoechst submitted two formal requests to the American Authorities for the return of the Crown under the signature of Sandor (Alexander) Hahn, as Head of that Mission. Mr. Hahn was an official of the Hungarian Ministry of Finance. His first request was in July 1946; the second was made in January 1947.

During this period the Paris Peace Treaty, signed February 10, 1947, was being negotiated in Paris by representatives of the Hungarian Foreign Ministry.

Noting that the Hungarian delegation in Paris had not requested the return of the Crown, while the Mission in Frankfurt had requested its return, President Truman and the Department of State wanted a resolution of these contradictory positions, particularly to assure themselves that the request of Mr. Hahn represented the view of the Hungarian government. Under the most secret codes from the President and the State Department, the American Legation was instructed to ascertain the wishes of the Hungarian government directly from Prime Minister Ferenc Nagy. The reply of the Prime Minister was, that the United States should not send the Crown back as long as conditions in Hungary remained as they were under the Soviet occupation.

This was the highest level of expressions of the tacit agreement between the American and Hungarian authorities about which so much has been written and spoken.

Both Dr. Hahn and Mr. Nagy are in the United States and will confirm these facts.

Because these dates are so significant, in light of the allegations which Senator Dole raised in his suit, I believe that it is a public disservice for you to leave the inference that Mr. Nagy's request was sometime in 1948. For my own part, I confess I was appalled to learn that the State Department Deputy Legal Advisor, Mr. Mark B. Feldman, gave in a statement delivered under oath that, after having searched all relevant files he "has not discovered any indication of any understanding between the United States and Hungarian authorities concerning the application or nonapplication of the 1947 Treaty of Peace to the Crown of St. Stephen, tacit or otherwise."

I have since also seen a copy of Judge Earl E. O'Connor's decision and find that he placed great weight on Mr. Feldman's affidavit and that he wrote as follows in rejecting Senator Dole's contention:

"The record is void of anything indicating that Hungarian officials who approved the 1947 Paris Peace Treaty, President Truman and the United States Senators who voted in favor of ratification, were aware of and understood the 'silent agreement by tacit omission' ".

I believe that both the public interest and the respect which you owe my reputation and honor indicate that you should publish this letter in full.

I am sending copies of this letter to President Carter, Secretary of State Vance, Judge O'Connor, Justice White (before whom my sworn affidavit was placed), Mr. Feldman, Dr. Hahn, Mr. Nagy, Dr. Klay, Senator Dole and your Washington Bureau attention David Binder and Linda Charlton.

Sincerely yours,

GEORGE DE SIBRIK.

PRESENTED AS TESTIMONY BEFORE THE U.S. SUPREME COURT, JANUARY 3, 1978

AFFIDAVIT

I, George De Sibrik, being first duly sworn, depose and say:

1. I am the last member of a family which traces its descent from King Andrew II, King of Hungary and of Jerusalem. Among my antecedents is also St. Elizabeth of Hungary, wife of Louis of Thuringia. For these reasons I had access to the Regent, Admiral Nicholas of Horthy and to other persons who were associated with the safekeeping of the Holy Crown of Hungary, the Crown of St. Stephen.

2. In 1944 I had been assigned primarily diplomatic functions although I had a military commission as Colonel in the high command of the Hungarian forces. My role however was, at that time, primarily diplomatic liaison. I was in Austria and Germany from March 1945 to July 1952, when I emigrated to the United States. Thus I have personal knowledge of the events I describe below.

3. I am now retired from my office as Vice President's Assistant at Georgetown University, where I served for ten years. (1955–1965)

4. I reside at 2419 Chain Bridge Road, Washington, D.C. and have been a citizen of the United States since 1957.

THE CONSTITUTIONAL CHARACTER OF THE HOLY CROWN AND ITS STATUS AS A LEGAL PERSON IN INTERNATIONAL AS WELL AS HUNGARIAN LAW AS EVIDENCED BY AGREEMENTS

5. At the outset, it must be recognized that the Holy Crown of Hungary is not an object of law but the subject and source of Hungarian law. The Holy Crown is the sovereign person, to which the King is subordinate. But under Hungarian and international law, the Holy Crown is the legal and constitutional person and incorporates the totality of Hungarian constitutional power and national existence. This personality has been recognized in international law. As obvious evidence of fact, I refer to the established legal records, including those relating to the legal accession of Francis-Joseph as King of Hungary in 1867. Following the European revolutions of 1848, Francis-Joseph was proclaimed by his government as King in 1849. However, he was never considered legally and constitutionally King because he had not issued the diploma and oath to the Holy Crown and not been crowned by the Holy Crown until 1867 (the so-called Ausgleich). On that occasion, all his acts between 1849 and 1867 were declared null and void as illegal. I know these events intimately because I have had access to the records of the Ausgleich, which was drafted and negotiated by my grand uncle, Ferenc Deak.

6. The constitutional and legal personality of the Holy Crown under the Doctrine which governs it both in Hungarian and international law can be best understood on the analogy of the sacramental doctrine of the Christian Eucharist, particularly as formulated by the Catholic tradition. Just as the Communion host is, through the sacramental act of the Priest, the real body and the real blood of Christ under the appearance of bread and wine (the doctrine of Transsubstantiation), so the Holy Crown is the living person of the Hungarian nation and its executive, legislative, judicial and other national functions and international existence are incorporated in this personality. Under this constitutional doctrine, the individual kings, members of Parliament, citizens are like the cells of a body which continues to live on when one set of cells dies and is replaced by another set of cells. The Holy Crown is constitutionally and legally the nation of Hungary. Consequently, kings can be nominated and elected, members of parliament can be chosen, but until they take the oath to the Person of the Holy Crown, they cannot have office. The King is only a candidate, even if elected by the parliament, until the King issues the diploma recognizing the sovereignty of the Crown and of the nation incorporated in the crown and until, having deposited this diploma he is confirmed as King under the Holy Crown by a public act of coronation. This public act is like the sacramental act, when the priest pronounces the words over the bread and wine.

7. Colonel Erno Pajtas fully understood this Doctrine and, as I shall narrate hereunder, negotiated the surrender of the Holy Crown under the terms of asylum for a legal person. Thus the receipt which he received, which I shall describe below, is a receipt for a legal person and the U.S. commitment given him was the commitment of asylum and not of custody. The relationship established was the legal relationship of guardian and ward and not the relationship of bailor/bailee. Colonel Pajtas used the 81 days between May 6 and July 24, 1945 to obtain this legal commitment from the United States authorities, according to the information I possess.

MY RELATIONSHIP TO COLONEL PAJTAS, ADMIRAL HORTHY AND THE RECEIPT RECEIVED BY COLONEL PAJTAS

8. I knew the late Colonel Erno (Ernest) Pajtas, Commander of the Hungarian Holy Crown's Body Guard since 1912 when we were both admitted to the Royal Hungarian Military Academy, LUDOVIKA in Budapest, Hungary. We both graduated on October 15, 1914 as second lieutenants, Pajtas with the artillery and I with the cavalry.

9. I know positively that Colonel Pajtas was a man of the highest moral integrity and honesty, and that he was chosen to protect the Holy Crown because of his exceptional dedication and loyalty to his mission. He was never a member of Szalasi's Arrowcross Party (the equivalent of the German Nazi Party) and all his actions in regard to the transportation of the Holy Crown out of Hungary were discharged under his oath to protect the Holy Crown as the sovereign personality of Hungary.

10. I knew the Regent, Admiral Horthy since 1919 and had access to him regularly while in Hungary. Consequently, his relationship to me was both personal and official, and he was prepared to confide state secrets to me both in my capacity as an officer of the Hungarian High Command and as a diplomat.

11. On April 6, 1948 I was the guest of the Regent and his family at their transitional residence, Polingergasse 25, Wellheim, Bavaria. Present with him were his brother, Eugene de Horthy, his wife, Mrs. de Horthy and the widow of the Regent's eldest son, Ilona de Horthy, and her son Istvan who then was sick with measles.

12. The Regent narrated to me the events of his capture and deportation from Hungary by the German Nazis, the operation he had undergone in Munich when he was in U.S. custody. Finally, the Regent began to discuss the subject of the Holy Crown and of its fate as the sovereign personality in Hungary.

13. In this connection he showed me a handwritten letter sent by Colonel Ernest Pajtas, written in Hungarian, regarding the conditions under which the Holy Crown was delivered to the American authorities. This letter was delivered by courier to Admiral Horthy to assure that he received it.

14. To my most accurate recollection, the letter began with Colonel Pajtas excusing his poor handwriting because of his serious illness. He then reported that he had honorably and completely carried out the orders given to him by the Guardian of the Holy Crown, Baron Sigismund de Pereny, when he ordered Colonel Pajtas to leave Hungary with the Holy Crown and to seek to bring the Holy Crown to Switzerland; if this were impossible to achieve, to deliver it to American forces on condition that the Holy Crown be treated as a person requesting the right of asylum, until foreign Soviet troops had departed Hungary.

15. When the Holy Crown had been in Kammer at the Attersee, Szalasi wanted to break up the Holy Crown into many pieces, as many as there were Cabinet ministers with him, and to give each minister a part. To protect the Holy Crown, Colonel Pajtas took the Holy Crown to Mattsee and buried the Holy Crown near a small lake.

16. After delivering the chest, without the Holy Crown, to the Americans on May 6, 1945, he was placed under extreme pressure to reveal its hiding place. He informed the Americans that he would disclose its location only on condition that the Americans granted the Holy Crown its continuing recognition as the Sovereign Person in Hungary and would treat the Holy Crown as a personality enjoying the right of asylum until Soviet troops left Hungary. Finally, the Americans granted this recognition, he received a receipt, which he enclosed and which I saw, according the Holy Crown the right of asylum as a legal person. On that condition, he agreed to disinter the Holy Crown and deliver it to the American authorities. The receipt was in the Hungarian language and the word for asylum was "menedekjog"—Right of Asylum. Pajtas had insisted on the language of the receipt being in Hungarian to assure that the Hungarian language would be the official language as to the legal guardianship given to the Holy Crown as a legal ward of the American people.

17. Having known Colonel Pajtas well, I recognized the letter as being in his handwriting. The receipt was also handwritten, in a different handwriting from that of Colonel Pajtas. To the best of my recollection the receipt was signed with a signature which I read to be "Grandpierre".

18. After the Regent allowed me to read the letter and the receipt, he discussed his own future and indicated that he wanted to commission me to continue to be the protector of the Holy Crown, particularly since Colonel Pajtas was seriously ill and since the Regent would be leaving Germany. He asked whether I would accept this Commission and I agreed.

19. Following this act of commission, I began to organize the Defenders of the Holy Crown, a society whose purpose was to gather all materials regarding its legal status.

20. I have noted that Senator Dole said there were, in addition to the presence of Soviet troops, "other" reasons for omitting the reference to the Holy Crown of Hungary

in the Paris Peace Treaty of 1947. I submit that the "other" reasons included the legal status of the Holy Crown in light of the conditions of its delivery by Colonel Pajtas to the American authorities as the "sovereign legal person" of Hungary.

21. In light of this legal status of guardian and ward, President Carter cannot order the delivery to Hungary of the Holy Crown as an object. Its delivery must be either an order of deportation, or extradition, or solemn treaty return the constitutional legal person of the Holy Crown to authorities who are disposed to recognize its personality as the sovereign of Hungary and to take oath to that effect. Any other form of delivery is a violation of the Constitutional rights which the Holy Crown enjoys under the American constitution and laws and would be both unconstitutional and illegal.

22. To carry out a deportation or an extradiction requires a court order, in light of the legal personality of the Holy Crown. No such court order for deportation or extradition exists.

23. To carry out its delivery to the Hungarian authorities as the legal sovereign requires a solemn treaty between Hungary and the United States, in which the Hungarian authorities undertake to accord the Holy Crown its constitutional and legal prerogatives. Such a treaty needs to be ratified by the Senate of the United States. No such treaty exists.

24. Absent either a court order of deportation or extradition, and absent a treaty, the United States as guardian of the Holy Crown would act illegally insofar as the President cannot on his own authority divest the United States of its obligation to treat the Holy Crown as an internationally recognized legal person. This action would violate the original terms of the guardianship assumed by the United States.

25. Under these circumstances, I find it incumbent to bring these facts to the tribunals of the United States and to request that the courts order a stay of delivery until the terms under which the Holy Crown was delivered to the American authorities by Colonel Pajtas are deposited in the Federal courts of the United States as a basis to establish the Constitutional and legal status under which the President of the United States must act when dealing with a legal person in the United States under the protection of the American constitution and laws.

GEORGE DE SIBICK.

ADDRESS BY HON. DAN ROSTENKOWSKI TO AMERICAN HOSPITAL ASSOCIATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. WRIGHT) is recognized for 5 minutes.

Mr. WRIGHT. Mr. Speaker, this morning, before the annual meeting of the house of delegates of the American Hospital Association, our colleague and my good friend, DAN ROSTENKOWSKI, made a very important address concerning the issue of hospital cost containment.

While some may not agree with everything the distinguished deputy whip had to say, I personally much appreciated his cogent and illuminating comments on this most complex and controversial subject. For that reason, I commend his remarks to the attention of every Member of the House:

REMARKS OF THE HONORABLE DAN ROSTENKOWSKI

It is both an honor and a distinct pleasure to address this meeting of the House of Delegates. My remarks today will be focused on an issue that is important both to me as a legislator and to you as the major force in the delivery of hospital services in this country—the continuing effort to responsibly restrain the unparalleled growth in the cost of hospital care.

Ladies and gentlemen, I shall not stand before this group and recite the statistics that say that we in America have a health cost problem. All of us in this room have known for some time that the problem exists. Rather, this morning let me concentrate on the various strategies for containing escalating costs that have emerged and on the direction I believe can and should be taken.

As you all know, last April, the President sent a Health Message to the Congress focusing on the need for statutory restraints on the rapid increase in hospital costs. The legislation, the Hospital Cost Containment Act of 1977, was introduced for the Administration in the House by Congressman Paul Rogers and me.

Since its introduction, action on the bill has been sporadic at best. Of the four committees that must consider the bill—two in the House and two in the Senate—only one, the Senate Committee on Human Resources, has completed work on the bill. Elsewhere in the Senate, the Finance Committee has yet to act on the Administration's proposal. And I know my good friend, Senator Talmadge, has his own ideas about what a cost containment bill should look like.

In the House, my Subcommittee on Ways and Means and Paul Rogers' Subcommittee in Interstate and Foreign Commerce have held markup on the Administration's proposal. Mr. Rogers' Subcommittee has completed action on the bill. However, members of my Subcommittee raised many fundamental questions which were left unresolved at the conclusion of the first session.

On November 2 of last year, after it became quite apparent that further action on hospital cost containment would not be possible before the end of the session, I made a statement on the floor of the House of Representatives expressing my thoughts on the hospital cost containment debate and the role of the hospital industry in that debate.

At that time, I stated that "In all my years in Congress, I have never been persuaded that the federal government could solve all of the problems of the American people. Government should intervene selectively where it can be of assistance; otherwise, the private sector should be relied upon to act on its own initiative."

I meant that then; I mean that now.

Based on that premise, I expressed the sincere hope that hospitals would use the time between the first and second sessions wisely and demonstrate that you can take the initiative and effectively move to restain cost increases on your own.

Those remarks have been categorized as a challenge to the industry . . . and that they were.

And today, ladies and gentlemen, I am heartened to see that the challenge has been accepted. I am pleased by the seriousness of purpose and the delineation of goals of the so-called "Voluntary Effort."

You have acted with all deliberate speed to establish principles and propose a national mechanism which has the potential of translating these principles into tangible results. Even your harshest critics must be impressed with these early efforts.

In embracing the challenge with such vigor, you have recognized the plain fact that something must now be done to address the cost issue. I am heartened to finally see the provider community focus on real alternatives to the cost problem.

In a sense, the impact of President Carter's nine percent cap solution could be paralleled to the impact of the old Selective Service System. Nothing stimulates volunteers more quickly than the genuine fear of a draft.

But whether it was that fear of a draft or not, the industry's expressed willingness to hold down total cost has added an entirely new element to the hospital cost equation that we have struggled to balance on Capitol Hill.

Members of my Committee, both Democrats and Republicans, would like nothing better than to set aside H.R. 6575—the Hospital Cost Containment Act of 1977—as an unneeded remedy to an illness that will surely be cured.

And that, ladies and gentlemen, is in effect what I intend to recommend to my Subcommittee. In the same spirit as the industry was willing to accept the sincerity of my challenge, I will accept the sincerity of your goals.

The voluntary cost containment program has announced a goal of reducing through voluntary restraints the national rate of increase in hospital costs by two percent this year and an additional two percent next year. In my view, if the industry is able to achieve this goal—when the reductions are measured against an appropriate figure for the increase that has already occurred in 1977—no federal regulatory program should be put into effect.

However, if it is established that well-intentioned voluntary actions are not in themselves sufficient to achieve either the proposed 1978 or the 1979 reduction, I believe that it would be appropriate to have fallback federal controls available to assist you at that time.

The important point here, of course, is that we have to be sure that progress in cost containment is real progress, not the illusory progress that is achieved through the questionable use or manipulation of statistics. That means, I believe, measuring progress against an appropriate 1977 benchmark. Spokesmen for The Voluntary Effort have, during the past several months, used various figures and measures in speaking about the rate of increase in 1977 in hospital costs. I am not persuaded that there is agreement on what the right benchmark should be. However, I believe that benchmark should be one that will permit us to compare results of the voluntary program against the kind of results that might have been expected to occur under the Administration's bill. I do not say we need necessarily be looking for the identical results, but we need to be able to make meaningful comparisons.

To accommodate the possibility, however remote, that The Voluntary Effort falls short of its goals, I shall ask my subcommittee to develop a legislative proposal which would include only standby hospital costs controls. These would be modeled on the President's original proposal, but they would be implemented only if the rate of increase in hospital costs did not decline by 2 percent in 1978 or an additional 2 percent in 1979.

I believe that such a proposal is very much in keeping with the President's recent state of the Union message in which he expressed his conviction that "a sincere commitment to voluntary constraint provides a way—perhaps the only way—to fight inflation without Government interference."

This morning, then, I ask you all to renew the sincere commitment that your association has made.

In furtherance of my commitment to you and your efforts, I have asked the Ways and Means staff to redraft the administration's bill to the specifications that I have outlined. It is my hope that a revised bill with

such a contingent effective date will be ready for subcommittee consideration by the 16th of February.

In developing a new draft bill, the staff also has been instructed to delete title II of the administration's bill which relates to capital controls. In my opinion, such a resource allocation issue is best considered in tandem with other planning issues currently under review in the Interstate and Foreign Commerce Committee. And, on that matter, I intend to consult with my good friend, Congressman Paul Rogers, and urge him, in his development of appropriate limitations on capital growth, to take into consideration your proposals in that area.

In addition, I intend at the earliest opportunity to outline to the President this proposal, which I believe is a constructive type of compromise. As I told his staff in recent discussions, I believe this approach will further two stated goals of his first administration—to address the hospital cost inflation question in an effective and responsible manner, and to promote the development of a strong partnership between the Government and the people designed to better address our problems.

I am hopeful that your efforts to bring costs more into line will be successful in the short run. All of us realize, however, that over time changes must be made in the way we finance health care in the United States. Many of the cost problems of today are products of outdated and inefficient reimbursement policies—policies that providers alone cannot change. I hope that your short-term work on the Voluntary Effort will be the catalyst which encourages all parties—providers, insurers, consumers, and Government—to now begin to more seriously discuss our future.

Although some might choose to differ, I am convinced that we in this country have a health care system that we can be proud of. The quality of our health care professionals, the state of our technology, and the condition of our facilities are the envy of the world. And that is nothing to be ashamed of.

We live in a country where most Americans have ready access to quality care and an insurance arrangement to assist in payment for that care.

All too often politicians and others choose to focus on the shortcomings of our system. In the process, the skill and effort involved in all of what you do is too often overlooked.

Yes, we have our problems in American health care. We always have—and, unfortunately, probably always will. But they are problems that can be confronted—and most effectively confronted—through a partnership of Government and the private sector. Your work in the next few months to achieve your cost containment goals can immeasurably strengthen this partnership so that together we might face the other challenges that await your industry and all our people.

SANTA ROSA MEDICAL CENTER: THE LARGEST CATHOLIC HOSPITAL IN THE UNITED STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Speaker, Friday, January 27, I had the pleasure of being present for the dedication of the Century II project at the Santa Rosa Medical Center in San Antonio.

Santa Rosa, which is located in the heart of the 20th Congressional District of Texas which I represent in Congress, is the largest Catholic hospital in the United States. The hospital is conducted by the Sisters of Charity of the Incarnate Word under the very able and dedicated efforts of the executive director, Sister Angela Clare Moran.

The $16.5 million Century II modernization and expansion project took 10 years of planning and 2 years of construction. The new facilities do not add to total bed capacity of the center, but provide ample space for new medical and surgical intensive care units.

The new building also houses two new operating rooms for major surgery such as open heart operations as well as new admitting and business offices.

Medical and surgical intensive care units are described by Santa Rosa officials as the "largest and most extensively equipped units in the Southwest."

To a center dedicated to the treatment of the total person—physical, mental, and spiritual—the addition of Century II gives Santa Rosa the capability to deliver a full range of the most advanced medical services available anywhere today. From highly sophisticated and diagnostic and testing, to superadvanced operating rooms and lifesaving support, Santa Rosa now has it all.

Added to a medical center that already boasts among other things—an excellent Children's Hospital, a complete neo-natal care unit, a highly developed data-processing capability and advanced data-processing capability and advanced management procedures such as "discharge planning" that follows a patient out the door and anticipates his or her future needs—Century II clearly qualifies Santa Rosa as second to none in health care excellence.

Century II points out something else that is important for San Antonians, and that is a profound commitment on the part of Santa Rosa Medical Center to the future of downtown San Antonio as a vital center of a great city.

With the neighboring Rosa Verde Tower Professional Building, Santa Rosa delivers a network of medical services from the city's hub that reach out to all of Bexar County and south Texas.

At the same time Santa Rosa's central location enables it to provide badly needed services to San Antonio's poorer, innercity residents, a fact borne out by Santa Rosa's record as one of the largest providers of service to medicaid recipients in the State of Texas.

A part of the center—the Villa Rosa Hospital—is the only private psychiatric facility in the San Antonio and south Texas portion of the Southwest and neighboring States.

Santa Rosa has given 108 years of loving care to the sick since three Sisters of Charity of the Incarnate Word traveled by buckboard from Galveston in 1869 to answer a call from San Antonio's city fathers to provide relief from a cholera epidemic and to build the first hospital in San Antonio, then a frontier village of 12,000.

We in San Antonio are very proud of their record of service.

THE CONSUMER REPRESENTATION AND REORGANIZATION ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. BROOKS) is recognized for 5 minutes.

Mr. BROOKS. Mr. Speaker, next week the House is expected to consider H.R. 9718, the Consumer Representation and Reorganization Act of 1977. This is a very important piece of legislation which the administration has given a high priority.

H.R. 9718 represents a fair and reasonable compromise among the various interests that will give the consumers a long-needed voice in the regulatory process in Washington without creating any undue burden on our business community.

Earlier this year, the American Bar Association testified before my subcommittee in support of the then proposed Consumer Protection Act of 1977. The Bar Association has now had an opportunity to review H.R. 9718 which I will offer on the floor as an amendment and have notified me that the association supports passage of H.R. 9718. I insert in the RECORD at this point the letter I received from the Honorable William B. Spann, Jr., president of the American Bar Association:

JANUARY 24, 1978.

Hon. JACK BROOKS,
Chairman, Government Operations Committee, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: The American Bar Association supports passage of H.R. 9718, the "Consumer Representation and Reorganization Act of 1977."

Earlier this year the American Bar Association testified before your Committee's Subcommittee on Legislation and National Security in support of the then-proposed "Consumer Protection Act of 1977" (H.R. 6118).

That legislation has since been refined twice—once as H.R. 6805, reported by the Committee on May 16, and now as H.R. 9718 which I understand will be offered as a substitute for H.R. 6805 when that measure is considered by the House in February.

Recognizing that H.R. 9718 constitutes a compromise among divergent interests and therefore may not fully satisfy any of them, but recognizing, too, that it constitutes a major step forward in promoting and providing for the representation of consumer interests, the American Bar Association recommends its approval by the House of Representatives.

Sincerely yours,

WM. B. SPANN, JR.

LEGISLATIVE PRIORITIES FOR THE YEAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ADDABBO) is recognized for 30 minutes.

Mr. ADDABBO. Mr. Speaker, I would like to speak for a few minutes as we begin this 2d session of the 95th Congress about my personal legislative goals

for this coming year, as well as what I hope the Congress will enact this year.

We have heard the President deliver the state of the Union message and it is generally agreed that the priorities he has set will get first attention from the Congress.

But one issue that the President did not mention in his delivery of the speech is, at least in my view, the matter of extending Federal assistance to New York City within the next 5 months. What we in the House must not forget is that the New York City problem is not just a matter of whether a local government remains viable or not it is a question of whether the Nation's largest and most important city can be saved.

Believe me when I say to you that if New York City goes bankrupt, millions of small investors around the Nation will be seriously hurt, and the Nation's economy, already struggling, will be damaged, perhaps beyond repair. Let me add that the city is trying mightily to undue the fiscal excesses of past years, and progress is being made. The new city administration, led by our former colleague Ed Koch, will prove, I think, to be capable of leading the city back to fiscal responsibility. But we cannot abandon the city now, after all that has been done to save it, in midstream. I would appeal to all Members of the House to remember that when we extend a helping hand to this city once again, we help ourselves avert financial disaster for the Nation at large.

If New York City is the paramount area of concern this year, there remain other issues of equal importance. Time does not permit me to cover all of them, but let me touch on some of them.

We must still conclude work on the supplemental appropriations bill which has remained from last year. In that bill is contained a provision to kill off two last research and development planes for the B–1 program. The B–1 program has been repudiated by the Congress, and it would be a gross waste of money to build these two additional planes.

In that same bill is a provision allowing the expenditure of $200 million for assistance to the families who cannot afford to pay high heating bills this winter. I introduced that proposal on this floor and it was accepted by the House and the Senate and I would urge prompt action on the supplemental bill that this needy program can be implemented as quickly as possible.

We must face the unpleasant reality that the United States is being strangled by the oil-producing nations, and this powerful Nation is being reduced to that of a supplicant in begging those nations not to raise these prices even more. But for our part, we need to conserve petroleum as much as possible to minimize our balance-of-payments deficits and we need to begin to utilize our superior technological assets to our own advantage by seeking alternatives to petroleum.

We have seen solar energy costs drop tremendously just within the last year and there are indications that we are on the edge of a major breakthrough in that field if we will just spend enough on research. We can make automobiles that will operate well on electrical energy, and we ought to do far more in research in that field than is being done. I also believe that the Federal Government ought to provide exciting incentives to private enterprise in fields that show promise of helping us once more become independent of other nations for energy resources.

In less esoteric fields I believe it would be wise and prudent for the Congress to reexamine the decisions it made last December on social security. The facts of life are simple and unchallengable in that persons whose sole income is social security benefits exist at best at the brink of poverty. We all know that there is no alternative to providing cost-of-living increases to social security recipients. To expect that American workers can truly absorb the scope of the increased costs of maintaining the social security system as contained in the December legislation is unrealistic as well as self-defeating.

The only viable alternative to these high payroll taxes is to absorb part of the cost out of the general operating fund of the Federal Treasury. That is, I know, a controversial proposal but I contend that it is a straight-forward way of doing what must be done.

The percentage of taxes that the American worker will pay by 1980 will be considerably higher than what that same worker paid in 1965. I see no benefit to adding to that load through additional payroll taxes. I prefer that the government take the more honest approach by saying that it is a decent and important goal to make retirement a better way of life than mere existence and that to do so, part of the annual budget will go to support the social security system so that it can function without additional charges to people whose taxes support it.

I also think that the Federal Government must soon devise a system to help young families purchase housing, both new and rehabilitated. Within my congressional district of Queens we have abandoned housing that could be utilized if it were restored. The citizens groups who have thus far sought to devote their time and energies to this service, both as a means of creating jobs and creating housing, have been frustrated by the intricacies of Federal regulations. Very likely, that same situation exists in every major city in America where there are decaying neighborhoods. I know that the administration has restated its determination to get on with the job of creating housing, especially inner-city areas, and I would hope that Congress will provide the administration with the tools and the money to get moving as quickly as possible on these vital programs.

Happily, the Nation's unemployment problems seem to be easing slightly, and that is good news after a long drought. I support the President's proposals to provide incentive money to business to employ and train the unskilled workers. I think the President has gone to the root of the problem in determining that if we are ever to end the welfare cycle we have to seek ways to provide legitimate and meaningful employment for those able and willing to work but whom, up to now, simply have not had the skills to compete in the labor market.

As chairman of the Subcommittee on Minority Enterprise and General Oversight of the House Small Business Committee, I have been able to help small business enterprises, especially minority firms improve their situation over the last year or so. The subcommittee's record of supporting strong and progressive legislation will certainly continue in the coming year. And there is much to be gained by everyone as we improve the small business climate throughout the Nation. That is one of the functions of the Small Business Committee and it is a challenge that has been and is being met.

We must move forward in establishing some sort of national health insurance while at the same time determining means of holding skyrocketing medical costs down. I send a questionnaire to my district each spring, and of all the questions that my constituents were asked last year, they felt most strongly about national health insurance. Of the people responding, 80 percent of all men and 92 percent of all women said they favor national health insurance for all illnesses, and 91 percent of the men and 96 percent of the women felt that at the very least there should be a national health insurance program to protect against catastrophic illness.

We all know of instances where an extended illness has exhausted a family's insurance benefits and then exhausted all of a family's resources. There is no need for any family to be left financially ruined simply because they care enough to provide the care that a member of their family needs. I believe the time is now for the Kennedy-Corman bill.

There are many other important issues I will support and work for in the year to come. I have not even mentioned other matters coming before the subcommittees on which I sit, nor the many issues that the President has put on his list of priorities for this year.

There are questions ranging from tax credits for education, aid to education, full employment, tax reform, abortion, and many, so many, major issues. As I indicated earlier, last year I sent a questionnaire to my constituents asking their opinions about some of these vital issues, and I would like to share with my colleagues their answers.

To the question, "Do you favor National Health Insurance for (a) catastrophic illness (b) all illness," 91 percent of the males favored catastrophic coverage and 80 percent favored coverage for all illness. Females voted 90 percent for "a" and 92 percent for "b."

To the question, "Should it be funded (a) by the Federal Government or (b) private means, 78 percent of the males

answered yes to "a" and 19 percent to "b." Females voted 85 percent "a" and 10 percent "b."

To the question, "Should the U.S. exploit off-shore deposits," 80 percent (male) said yes, and 11 percent said no. For women, 85 percent said yes, 12 percent voted no.

To the question, "Should Congress create an ongoing watchdog committee to monitor the gas and oil companies on behalf of the consumer," 68 percent (male) said yes, 21 percent said no. Females voted 74 to 15 percent in favor of yes.

Sixty-one percent of the men and 67 percent of females said they supported the Supreme Court ruling on abortions. Twenty-one percent of the men and 29 percent of the women said they disagreed.

Sixty-eight percent (male) and 59 percent (female) said Congress should do nothing more about the abortion issue. Twenty-seven percent of the men and 25 percent of the women said a proposed constitutional amendment should be passed to reverse the Court ruling.

Thirty-nine percent of the males and 42 percent of the females said national security as it now stands is adequate. Only 19 percent of the men and 29 percent of the women felt the defense budget ought to be cut back further.

On public financing of congressional elections, 31 percent of the men and 46 percent of the women favored spending tax dollars to finance Federal elections. Thirty-nine percent of the men and 30 percent of the women were opposed.

Forty-nine percent of men and 38 percent of women said they utilize the checkoff box on their tax forms to support Federal financing of Presidential elections. Twenty-five percent of the men and 21 percent of the women said they do not.

Asked if they would support paying higher social security operating costs, including recipient increases by (a) higher deductions or (b) supplementing the fund from the general revenue fund, 23 percent of the men voted for "a" and 58 percent voted for "b." Women voted 40 percent for "a" and 49 percent for "b."

Twenty-nine percent of the men and 40 percent of the women said they would support a simplified tax reporting system even if some of the deductions and credits to individual taxpayers might be lost or diminished. Fifty-eight percent of the men and 62 percent of the women said no.

And, finally, 82 percent of the men and 91 percent of the women said they favor reinstitution of the draft as a means of improving the standing Army and reducing costs of supporting active services. Fifteen percent of the men and 5 percent of the women were opposed to that.

HUMPHREY FOREIGN ASSISTANCE LEGISLATION (INTERNATIONAL DEVELOPMENT CORPORATION ACT OF 1978)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 5 minutes.

Mr. ZABLOCKI. Mr. Speaker, it is my pleasure to introduce today, along with colleagues from the Committee on International Relations, the last major piece of legislation on which Hubert Humphrey was working at the time of his death. Joining as cosponsors are Congressman DANTE B. FASCELL, DONALD M. FRASER, LEE H. HAMILTON, MICHAEL HARRINGTON, PAUL FINDLEY, and LARRY WINN, JR.

As we all are aware, among the many causes and concerns advocated by the late Senator Humphrey was that of the poor people around the world. He was the principal Senate advocate of doing more to help the least developed nations, and his voice was heard both in the Senate and in the House.

In 1973, when members of the House International Relations Committee drafted a new policy for the U.S. bilateral assistance program, known as the New Directions, it was Hubert Humphrey who led the cause in the Senate and convinced his colleagues that this new focus, specifically on the needs of the poor overseas, was the correct focus for U.S. foreign assistance.

It is, therefore, appropriate that we now introduce in the House a bill containing major features of the measure Humphrey had planned to introduce, and which has been introduced by his colleagues in the Senate. While maintaining the New Directions focus, the Humphrey bill would bring into one organizational structure all of the instruments of U.S. foreign assistance.

In introducing the bill in the House, the sponsors do not intend to signify their commitment to any of its specific provisions, but we do intend that it serve as a useful vehicle for discussion. I plan to appoint an ad hoc group within the International Relations Committee, which I will chair, to study the bill and report to the committee.

Because it is a truly comprehensive measure, it is unlikely that we will be able to complete a review of all aspects prior to the May 15 deadline for authorizing bills. However, we will be giving careful attention to relevant portions of the bill as we move ahead with legislation for the fiscal 1979 foreign assistance authorization. We will at the same time be continuing with other reviews and studies the committee has underway concerning various aspects of the bilateral assistance program.

INTERNATIONAL DEVELOPMENT COOPERATION ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. LONG) is recognized for 5 minutes.

Mr. LONG of Maryland. Mr. Speaker, I wish to endorse the concept of the International Development Cooperation Act of 1978 (S. 2420) because it takes a major step toward consolidating our fragmented foreign aid programs under one agency and one policy—helping the poorest people in the poorest countries to a better life. One of the major flaws in the U.S. foreign aid efforts has been fragmentation among agencies with conflicting objectives. Our foreign aid should be focused on the only goal that makes sense—helping poor people in poor countries to help themselves to a better life.

The International Development Cooperation Act does many things in addition to creating the International Development Cooperation Administration (IDCA), and my statement does not mean that I necessarily endorse every detail of the bill. Nor do I endorse increased levels of aid that the administration has requested or reportedly will request. Indeed, how can we consider increasing foreign aid when our current programs do not reach the poor as they had claimed to intend?

Restructuring foreign aid programs under one agency could make a significant contribution toward consolidating these programs' effectiveness and developing a coherent rationale for foreign aid.

LEGISLATION TO PROHIBIT SALE OF SMOKE DETECTORS CONTAINING RADIOACTIVE ISOTOPES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

Mr. WEISS. Mr. Speaker, I am introducing legislation today to prohibit the sale of a widely used variety of smoke detector containing radioactive istopes and urge my colleagues to join me by cosponsoring this important bill.

The article that follows these remarks, reprinted from the August edition of Progressive magazine explains in detail the hazards posed by ionization smoke detectors. These devices, which account for about 75 percent of all currently marketed smoke detectors, contain a highly radioactive substance, usually americium-241.

A number of high respected scientists and radiologists have pointed out that this material, a waste product from the nuclear cycle, represents a serious threat to human health and to the environment. Americium-241 is, for example, 53 times more radioactive by weight than plutonium-239. It has a half-life of 458 years, meaning that it will retain its potentially lethal properties for several centuries. Ingestion of even a minute amount of americium-241 can cause cancer.

Many manufacturers of ionization smoke detectors do not adequately inform consumers of the presence within the product of this radioactive substance, nor do they properly stress the need to dispose of the detectors in a safe, carefully regulated manner.

Some 20 million ionization smoke detectors will soon be in operation in homes and workplaces. The Federal Government, through regulations issued by the Department of Housing and Urban Development, is encouraging proliferation of these devices by mandating installa-

tion of unspecified types of smoke detectors in homes built with Federal Housing Administration or Veterans' Administration assistance.

Since purchasers of ionization smoke detectors are not being properly notified of potential radiation dangers or disposal procedures, it seems inevitable that some of the americium-241 from these devices will eventually enter the environment and, ultimately, the human food chain.

A safe and reliable alternative to the ionization type detector is currently available. This is the photoelectric variety which does not contain any radioactive material and has been shown to be effective in providing early alerts.

There is no justification, therefore, for continuing to sanction the sale and distribution of a device which significantly increases radiological health hazards.

I hope that my colleagues will recognize the danger posed by this product.

CAUTION: SMOKE DETECTORS MAY BE DANGEROUS TO YOUR HEALTH

(By McKinley C. Olson)

Mary Anne and her husband Charlie were horrified to learn that they, like millions of other American families, had a radioactive element in their home that is as dangerous and even more radioactive than plutonium-239.

Plutonium, which is produced in nuclear fission power reactors, is one of the most toxic materials handled in quantity by man. A thousandth of a gram inside the lungs can kill within a matter of hours or days; a millionth to a trillionth of a gram or even less can cause cancer. I was visiting Mary Anne and Charlie in Pennsylvania after attending an energy conference in the East, where most of the discussion had centered on the growing controversy over nuclear power.

I happened to mention my concern about the widespread and growing use of radioactive smoke detectors in homes and places of work around the country. My friends, who are staunch opponents of nuclear power, suddenly sat up straight.

"Mary Anne brought a smoke detector home the other day from the place where she works," Charlie said. "I wonder if it's the kind you're talking about." He took the device off a pantry shelf. When we turned it over and removed a metal plate, we found a label which read:

"Ionization Principle. Caution: Radioactive Material: Contains 1 microcurie Americium-241."

There are two kinds of smoke detectors on the market—a photoelectric unit and the radioactive kind. They had the radioactive device. Although such detectors are supposed to carry instructions for their transportation and disposal, this one did not.

There are "thousands of lethal doses" in one microcurie of amercium-241, according to Dr. Edward A. Martell, an environmental radiochemist with the National Center for Atmospheric Research in Boulder, Colorado.

This transuranic element, which is formed by plutonium, has been defined as a radioactive "alpha-emitter that accumulates in tissues and constitutes a hazard comparable to plutonium" by Dr. William J. Bair, a radiobiologist widely known in his field, a staunch supporter of nuclear power, and the manager of Battelle Pacific Northwest Laboratories' biomedical and environmental research program in Richland, Washington. He has also written:

"Americium and curium (another by-product of plutonium) are largely translocated from lung to liver to skeleton, even when inhaled as oxides, and are expected to occur in increasing amounts in future nuclear power technologies. . . ."

Other prominent scientists concur with these assessments—among them Dr. Karl Z. Morgan, who was for many years the director of the Health Physics Division at the Oak Ridge National Laboratory and is now with the School of Nuclear Engineering at Georgia Tech in Atlanta, and Dr. Dean E. Abrahamson, physician, physicist, long-time critic of nuclear power, and a professor in the School of Public Affairs at the University of Minnesota.

"The risks are identical for plutonium-239 and americium-241," Morgan told me. "And once in the environment, americium is more of a risk than plutonium, because it is more readily taken up by animals and plants" that are part of the human food chain.

Dr. Abrahamson agrees. "There is no question about the toxicity of americium, especially if it gets into the food chain," he says.

There are more than four million radioactive smoke detectors in homes and places of work around the United States, and more are now entering the marketplace at a rate of about nine million a year—compared to about one million annually for the photoelectric type, according to a spokesperson for the National Bureau of Standards.

The average home detector contains about two-and-a-half microcuries of americium-241; those in factories and office buildings contain up to fifteen microcuries of this carcinogenic material.

Americium-241, which is fifty-three times more radioactive by weight than plutonium-239, transforms the air that flows through the detector into the conductor of a small electric current, when this current is interrupted by particles of smoke, an alarm is triggered. The photoelectric detector alarm goes off when a beam of light inside the unit is interrupted by particles of smoke. Both types "can suffice" says Richard Bright, a fire research engineer with the National Bureau of Standards.

The americium oxide salt in the ionization smoke detectors lies between thin laminated layers of gold and silver about an eighth of an inch square. The detectors themselves have a useful life of about fifteen years at most, according to Bright. But americium-241 has a radioactive half-life of 460 years, which means it will be a potential threat to human health and safety for thousands of years.

Scientists and engineers have been trying for thirty years to come up with a safe method of storing, containing, and disposing of the radioactive poisons produced by nuclear fission (such as strontium-90, cesium-137, plutonium and americium) for periods of time ranging from hundreds to thousands to hundreds of thousands of years. It is a formidable challenge whose cost has recently been estimated at $70 to $80 billion just to bring the current radioactive waste problem under control.

The large water-cooled casks in which boiling-hot, high-level radioactive wastes are now temporarily stored and cooled, pending a permanent solution of the waste disposal problem, have a disquieting life expectancy of about fifty years at best, after that, or well before, they begin to leak.

On a nuclear reservation, americium is regarded and handled with the utmost caution because of its cancer-causing capabilities. In the marketplace, however, where americium smoke detectors are regarded as a hot commercial property, and where the element is also used in oil exploration, there seems to be little concern about the increasing use and distribution of americium-241, though Ralph Nader's Health Research Group has been trying to have the ionization smoke detectors withdrawn and banned from the market.

Theoretically, the americium in smoke detectors is supposed to remain leak-proof inside its metallic foil covering during normal use and even when enveloped by flames. Theoretically, too, these radioactive units are to be returned eventually to the company that manufactured them (even, one supposes, if it has gone out of business in the meantime), which, in turn, will hand them over to the U.S. Nuclear Regulatory Commission for the thousand-year disposal job.

And theoretically, the companies that use americium to explore for oil will keep this radioactive poison from entering the biosphere—but we know of one instance, according to a Nuclear News report of October 17, 1974, when four curies of plutonium were "lost" in a natural gas wellhead fire near Six Lakes, Michigan, between August 16 and 21, 1974. A similar fate may befall other—perhaps many—sources of plutonium and americium in the environment.

Americium, which is soluble, accumulates in the biosphere—in soil and water—from which it enters the human food chain in drinking water, plant foods, fish, and animals. Once ingested into the human organism, it moves readily from the gastrointestinal tract into the bloodstream, where it remains to cause cancer of the liver and bone.

As Edward Martell puts it, "If americium doesn't hurt us, it's going to hurt our children and grandchildren." Martell is "horrified" by the widespread distribution of radioactive smoke detectors, which he regards as "grossly irresponsible . . . and insensitive to the risks."

Mary Anne and Charlie, who kept their americium smoke detector near the refrigerator and shelves of food in their Pennsylvania home, wondered if their ionization detector could pose an immediate danger. Sure, I replied, if recoil fragment particles from the americium source escaped into their pantry and kitchen. The "alpha recoil action" on the americium surfaces inside the smoke detector forces small clusters of atoms to break away from their source, releasing particles of respirable size inside the metal foil covering, from which they could escape if the covering were damaged or melted.

These particles are likely to be only a small fraction of a micron in diameter (a micron is one-millionth of a meter)—but such minute amounts represents a significant cancer risk, according to knowledgeable scientists.

Smoke detectors can be and have been destroyed in fires, according to Dick Bright of the National Bureau of Standards. When that happens, the americium source can vaporize and oxidize. The gold foils that contain the americium are quite thin and will melt at only 1,063 degrees centigrade; they are not eternally indestructible.

Furthermore, Ralph Nader's Health Research Group has warned of "the possibility that americium exposure presents a hazard to workers in facilities where ionization smoke detectors are assembled" and that "firemen risk exposure to radiation while fighting fires in facilities where the detectors are installed or stored."

The Nuclear Regulatory Commission (NRC) defends radioactive smoke detectors on the grounds that they will save lives that might otherwise be lost to fire. The NRC also contends that the amount of americium they contain is so minute that it can be dismissed as a potential threat to human health and safety. Kenneth R. Chapman, director of the NRC's Office of Nuclear Material Safety and Safeguards, claimed in a letter to the Nader health group that any accidental radiation leak from the americium smoke detectors would be "negligible" and, therefore, would not constitute a health problem.

The NRC and other defenders of ionization smoke detectors have lulled consumers into a false sense of security by gauging the amount of radiation emitted by the detectors against natural background radiation, which is many times higher. Federal standards governing our exposure to radiation tend to lump all forms of radiation together and then average out this amount of radiation, which might actually be confined to less than one gram of tissue, as if it were irradiating the whole body, or a whole organ, with a uniform dose.

Such averaging is reasonable when applied to high-energy gamma radiation, medical and dental x-rays, and beta radiation (from television sets and luminous-dial wrist watches). Gamma radiation and x-rays can be deeply penetrating, beta radiation is less so, but even beta rays can penetrate considerable distances in the human body. Both types of radiation would pose an immediate danger in the event of a major nuclear power plant accident. But this standard practice of averaging the dose is wholly misleading when applied to alpha radiation, especially when it is in the form of particles lodged in tissue, irradiating the cells at small focal points.

In light of these facts and risks, what will become of the americium in radioactive smoke detectors? It is not unreasonable to suspect that within a relatively short time, some of these units will wind up in trash cans, incinerators, and junkyards.

"Some americium will certainly seep into the soil and water," agrees health physicist Karl Morgan. "The only question is where and how much. . . . Even though the risk may be small—and I'm not saying it is—when you have millions of these smoke detectors, and you multiply a 'small risk' by a large number, the risk can be much larger."

Morgan calls the use of ionization smoke detectors "an inappropriate use of radioactivity . . . of radioactive contamination in homes and into man's environment. I don't approve of this application," he said, "especially when there are other, safer, better ways of doing the job."

Dr. Donald P. Geesaman, a noted biophysicist, claims it is "insidious" to manufacture and distribute radioactive smoke detectors, and concurs that "it's inevitable that some of this americum will enter the human food chain."

"What's happening," according to Dr. Dean Abrahamson, is that they [the nuclear establishment are commercializing the use of as much radioactive waste products as they can. . . . The commercial use of these extremely toxic materials is an immediate danger."

Still, it appears likely that americum smoke detectors will continue to be hawked across the country. The U.S. Department of Housing and Urban Development requires that buildings financed by the Federal Housing Administration and the Veterans Administration must have smoke detectors, cities such as Chicago have enacted ordinances requiring the use of smoke detectors in apartments, the National Safety Council has applauded their use.

Dr. Edward P. Radford, a physician with the Department of Environmental Medicine at Johns Hopkins University in Baltimore, which does research on radiation, fire, and air pollution, told me that he and his colleagues have been looking at smoke detectors as part of their study on the toxicity of fire gases. They have concluded that "the benefits of smoke detectors are not that substantial."

"Our studies do not bear out the notion that the great percentage of people who die in fires will, or would have been saved by smoke detectors," Dr. Radford said. He suggested that manufacturers of the detectors sometimes use "scare tactics" to sell their products, and, that in any case, "they are being oversold as a panacea."

In any case, there is a safe alternative to the radioactive smoke detector. Photoelectric smoke detectors, which pose no hazard, are almost as effective as the radioactive units, according to the National Bureau of Standards, which has approved both types. The photoelectric type responds most quickly to a smoldering fire, from a mattress or chair, where the smoke particles are large, whereas the radioactive unit responds more readily to clean flames and smaller smoke particles.

Either device will normally do for the home because of the wide range of smoke particles usually found in a dwelling fire. The Nader health group claims that "smoldering, smoky fires . . . account for most fire deaths 75 per cent of fires within the home start as smoldering fires."

Industry has preferred the ionization detectors because they respond faster in the presence of clean flames that might be more common than smoldering smoke in a factory setting. However, there have been marked recent improvements in the photoelectric smoke detectors produced by at least two manufacturers who have brought their product up to the capability of radioactive units.

Under these circumstances, it would seem highly desirable, and even urgent, to remove the americium smoke detectors from the market; to have them returned to the manufacturers in an attempt to channel the americium in their foils to the Nuclear Regulatory Commission for proper disposal, or to hand them directly over the NRC.

But the scientific and medical communities do not seem to be much interested in the issue. Dr. Sidney Wolfe, the physician who heads the Nader Health Research Group, has been trying to sound the alarm. Dr. John W. Gofman, a physician and medical physicist, and former associate director at the Lawrence Livermore Radiation Laboratory in California, has expressed profound concern, as have such other scientists as Martell, Karl Morgan, Dean Abrahamson, and Donald Geesaman. But Dr. Albert W. Hillberger, a physician and staff member of the Advisory Committee on the Biological Effects of Ionizing Radiation, Division of Medical Sciences, National Academy of Sciences in Washington, D.C., says the committee "has not studied the problem," and that he, in fact, has six radioactive smoke detectors in his home.

Those who believe in nuclear power and its offshoots find it difficult to conceive that plutonium and americium will ever present an immediate or long-term threat to human health and safety, though the amount of man-made radiation to which authorities contend we can be exposed without undue harm continues to drop as scientists learn more about the relationship between radiation, cancer, and other diseases.

As chemist and Nobel Laureate Linus Pauling once wrote, "The nature of high-energy radiation and the nature of the gene are such that genetic mutations could occur even at the lowest dose rates. . . . That is, there is no Isafel threshold."

Every large light-water nuclear fission power reactor used to produce electricity also produces 400 to 600 pounds of plutonium in an operating year, 11 percent of which will form americium-241. This is why such scientists as Martell worry, in his words, that "if plutonium doesn't give us cancer, americium and curium will. We get it both ways from nuclear power—plutonium by inhalation, americium (and curium) by drinking and eating."

If we have any regard for humanity, we will not want to leave an irreversibly poisoned planet to those who must follow in our footsteps. People who have been fatally exposed to low-level radiation may not immediately fall down and die, but that does not mitigate the horror and suffering from cancer and other diseases that will rise up to claim them many years later.

INTERNATIONAL DEVELOPMENT ASSISTANCE ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota, (Mr. FRASER) is recognized for 5 minutes.

Mr. FRASER. Mr. Speaker, it is a great pleasure for me to join today in sponsoring in the House the 1978 International Development Assistance Act, the last major legislative initiative of our dear friend from Minnesota, Hubert Humphrey. Senator Humphrey felt very strongly that the time had come to modernize the 17-year-old Foreign Assistance Act so the United States could respond more effectively to the poorest of the poor of the world. He intended to introduce this bill in the Senate before he died. His Senate colleagues have followed his wishes and I am pleased we are introducing it here today.

I expect to participate actively as a member of the ad hoc group that CLEM ZABLOCKI, is establishing to study this bill and to report it to the Committee on International Relations this spring.

The bill itself is complex and comprehensive. While it would keep the "New Directions" policy focus of U.S. bilateral assistance, it also calls for a major reorganization of the administration of U.S. development assistance. Specific features of this bill are:

First. It would establish a new development agency, the International Development Cooperative Administration (IDCA) which will have responsibility for administering all the major U.S. development assistance programs, including the bilateral assistance program now run by the Agency for International Development (AID); the contributions to the World Bank Group and the regional development banks now coordinated by the Department of the Treasury; the voluntary contributions to the United Nations technical and humanitarian agencies now coordinated by the Department of State, and the development and relief aspects of the Public Law 480 food for peace program, now coordinated by AD.

Second. It designates an Administrator of the IDCA, who will report to the President and be responsible for the effective and efficient administration of U.S. foreign assistance programs, and coordinate the making of overall U.S. development policies.

Third. It provides a clear statement of the importance the United States places on development, both because of the increasing importance to the United States of the developing world, and because of the people of the United States in helping others. By establishing a new institution with an Administrator who has direct access to the President, the act assures that these development interests will be reflected in the formulation of overall U.S. international economic policy.

Fourth. It presents clear, modern guidelines for U.S. development assistance policy, and repeals the outdated

Foreign Assistance Act of 1961. The act further clarified the 1973 new directions goals of using direct U.S. grant and loan assistance in ways which promote economic growth with equity and assure that the basic human needs of the poor majority are met.

Fifth. It establishes an International Development Institute as the main focus of U.S. Government support for public and private voluntary programs involving development. The Peace Corps would be transferred to the Institute from ACTION, while maintaining its administrative autonomy.

Sixth. It introduces new measures for assisting the poorest developing countries, including the encouragment of assistance in the form of grants rather than loans, and a provision to allow these countries to satisfy official development debt obligations to the United States through local currency expenditures on development-related projects.

Seventh. It consolidates programs which improve the access of middle-income developing countries to private capital markets, investment resources, and technical services. These programs, such as the housing investment guaranties, entail almost no expenditure of U.S. Government funds, but involve guaranty programs for investments and loans, and reimbursable services.

Eighth. It establishes an economic support fund to replace the current security supporting assistance program, assuring that such funds will be spent on development-related activities to the greatest possible degree.

Besides these aspects of the bill which our ad hoc committee will want to discuss in detail, there are other provisions, including those for population planning that we will want to consider very carefully.

The task before us is formidable. As Senator Humphrey would remind us, "it's not impossible." It is my hope that this bill will provide a durable framework for our foreign aid program and a living testament to a man who cared so much about the well-being of all peoples of this world.

LABOR DEPARTMENT FILES SUIT TO RECOVER LOSSES TO TEAMSTERS' PENSION FUND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. GIBBONS) is recognized for 5 minutes.

Mr. GIBBONS. Mr. Speaker, as chairman of the Ways and Means Oversight Subcommittee whose inquiry into the conduct of the Teamsters' Central States Pension Fund lead to investigations by the Internal Revenue Service, Labor Department, and Justice Department, I am pleased to acknowledge the filing today of a major civil lawsuit by the Labor Department to recover losses to the pension fund for breaches of fiduciary duties occurring after January 1, 1975. I commend Secretary Marshall for his continuing fine efforts toward assuring that the promise of retirement security will be kept for some 450,000 Teamsters Union members and their families.

However, the scope of this lawsuit underscores the fact that much territory remains to be covered. As I have mentioned, the lawsuit covers only civil responsibility for actions taken after January 1, 1975. Transactions entered into within a 10-year period before this date fall within the responsibility of the Internal Revenue Service which required, as a condition for its April 26, 1977, requalification of the fund, that an investigation of all fund transactions between February 1, 1965, and April 30, 1977 be undertaken by parties independent of the fund to determine the potential for legal recourse against delinquent borrowers—the so-called legal audit.

In addition, the Justice Department has responsibility for the investigation and prosecution of any violations of the criminal law during the periods before and after that covered in the Labor Department's complaint. My concern is that we have heard relatively little from either of these agencies. With regard to the "legal audit," my concern is that the IRS has neglected to control the process and permitted the fund to investigate itself and drag its feet in the process. Out of perhaps 600 loans and transactions that are subject to this review, the latest reports indicate that less than a handful have actually been referred for independent outside review in the past 10 months. Moreover, the entire process is required to be completed by May 1, 1978—3 months from now.

Without covering the field, I will mention one other fundamental concern. It is that no concrete action has yet been taken to restore the actuarial soundness of the Central States Pension Fund. In fact, neither the new independent investment managers nor the Government have yet come up with an assessment of the total value of this fund's assets. Thus nobody yet knows just how much will be needed to enable this fund to meet its entire obligation to its hundreds of thousands of working Teamsters throughout the central and southeastern portions of the United States.

BIDDING PROCEDURES ON NATIONAL FOREST LANDS (H.R. 6362)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. ULLMAN) is recognized for 5 minutes.

Mr. ULLMAN. Mr. Speaker, the House is expected to consider on Thursday H.R. 6362, legislation concerning bidding procedures for the sale of timber from national forest lands. As a strong supporter of this proposal, which will be slightly altered by Chairman FOLEY's amendment in the nature of a substitute (the language of S. 1360), I rise to clarify a misunderstanding perpetuated by opponents of the bill.

It has been argued that this legislation would lead to collusive bidding practices; that a vote for this legislation is a vote for collusion. This argument is a gross distortion, not only of the provisions of H.R. 6362, but of the effects of oral bidding.

The substitute to be offered by Chairman FOLEY would not promote collusive bidding practices. The legislation, rather, requires the Secretary of Agriculture to monitor bidding patterns in the sale of all national forest timber. Should the Secretary find that collusive bidding practices are occurring, he is required to report instances of such collusion to the Attorney General. He may also alter bidding methods or take any other action necessary to eliminate the illegal practices.

A vote for the Foley substitute is not a vote for mandated oral bidding procedures. The substitute merely eliminates the apparent mandate in section 14(e) of the National Forest Management Act to use sealed bidding in most situations. The Secretary is provided the authority to select the bidding method which insures fair competition and a fair return to the Federal Government, as well as the protection of the economic stability of communities dependent on national forest timber. In the South, the East, and other areas where sealed bids are the customary practice, there is no reason to believe that such bidding procedures would be changed. I want to reemphasize this point: The substitute does not mandate the use of oral bidding procedures. It simply authorizes the Secretary to consider the economic needs of each area before determining which bidding method to use.

There is no evidence that oral bidding is more conducive to collusion than sealed bidding procedures. Forest Service Chief John McGuire has testified that there is no evidence to support the conclusion that sealed bidding does any more to reduce collusion than oral auction. No such evidence has ever been presented to Congress. Individuals prone to collude will do so under any bidding system.

There is no reason to believe the collusion is widespread in the industry. There have been convictions for collusion in the industry in only one area in 70 years. Certainly this record is not one which would support the need for drastic changes in policies which have served our Nation so well over the years.

If collusion is occurring, the guilty should be prosecuted. Legitimate timber purchasers, however, should not be punished, or should dependent communities be threatened by ill-considered Government actions designed to discourage a few alleged wrong-doers.

Mr. Speaker, I thank you for this opportunity to address this important matter. I strongly urge my colleagues to give their support to Chairman FOLEY's substitute, as well as to final passage of H.R. 6362.

NATIONAL LATIN WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. SHARP) is recognized for 5 minutes.

Mr. SHARP. Mr. Speaker, earlier this year, I met with a young man from my district, Mr. Tom Moran, who is president of the National Junior Classical League. Each year the league holds a national convention and gathers students from across the Nation for the purpose of studying Latin and the classics. Mr. Moran reminded me that this

year will mark the 25th anniversary of the league as they hold their annual convention in July.

Because I feel that this organization demonstrates that many young people in this country maintain a serious interest in academics and the classics, and because I also feel that many facets of our modern life are rooted in the Greek and Roman civilizations, I am introducing a resolution to designate the week of July 30, 1978, as "National Latin Week." I would welcome cosponsorship by other Members of Congress who would like to join me in honoring the occasion of the 25th annual convention and I will be soliciting support in the coming weeks.

VOTING RECORD

(Mr. FOLEY asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FOLEY. Mr. Speaker, I would like to insert in the CONGRESSIONAL RECORD a compilation of my complete voting record for the 1st session of the 95th Congress:

1. Election of Speaker. For election of the Speaker of the House of Representatives for the 95th Congress the nominees were Rep. Thomas P. O'Neill, Jr. (D. Mass.) and Rep. John J. Rhodes (R Ariz.), minority leader since 1973. O'Neill was elected 290–142. Foley for O'Neill.

2. H Res 5. House Rules. Wright (D Texas) motion to order the previous question on the House rules proposed by the Democratic Caucus at its meetings in early December 1976. Motion agreed to 261–140; Yes. Jan. 4, 1977.

3. H Res 5. House Rules. Adoption of the resolution detailing the Rules of the House of Representatives for the 95th Congress. Adopted 256–142; Yes. Jan. 4, 1977.

4. S 474. Natural Gas Emergency. Staggers (D W. Va.) motion to suspend the rules and pass the bill to authorize the President to allocate interstate natural gas through April 30, 1977, and to allow emergency sales of such gas through July 31, 1977, at higher prices than usual, but still controlled. Motion agreed to 367–52: Yes.

5. Procedural Motion. Wright (D Texas) motion to approve the House *Journal* of Tuesday, Feb. 1, 1977. Motion agreed to 413–2: Yes. Feb. 2, 1977.

6. S 474. Natural Gas Emergency. Adoption of the conference report on the Emergency Natural Gas Act of 1977 granting the President temporary emergency powers to allocate and allow unregulated sales of natural gas. Adopted 336–82: Yes. Feb. 2, 1977.

7. H Res 222. Select Committee on Assassinations. Adoption of the rule (H. Res 230) providing for House floor consideration of the resolution to reconstitute the select committee charged with a new inquiry into the deaths of President John F. Kennedy and Dr. Martin Luther King Jr. Adopted 265–145: Yes. Feb. 2, 1977.

8. H Res 222. Select Committee on Assassinations. Clawson (R Calif.) amendment to delay a full-scale investigation until such time as the committee made recommendations as to whether a further investigation was needed. Rejected 165–237; No, Feb. 2, 1977.

9. H Res 222. Select Committee on Assassinations. Adoption of the resolution to reconstitute for 90 days, effective Jan. 3, 1977, the Select Committee on Assassinations to inquire into the deaths of President John F. Kennedy and Dr. Martin Luther King Jr.; the committee to be funded under the continuing resolution allowing it approximately $84,000 per month. Adopted 237–164: Yes, Feb. 2, 1977.

10. Procedural Motion. Wright (D Texas) motion to approve the House *Journal* of Friday, Feb. 4, 1977. Motion agreed to 329–3: Yes, Feb. 7, 1977.

11. H J Res 227. Supplemental Power Appropriation, Fiscal 1977. Adoption of the resolution to make available $6.4-million in emergency appropriations for the Department of the Interior's Southwestern Power Administration. The resolution also permitted the Energy Research and Development Administration to spend previously appropriated fiscal 1977 funds without requiring passage of an authorization measure. Adopted 341–5: Yes, Feb. 7, 1977.

12. H J Res 240. 200-Mile Fishing Limit. Brademas (D N.Y.) motion to suspend the rules and pass the resolution giving congressional approval to international fishery agreements negotiated with foreign countries in accordance with the Fishery Conservation and Management Act of 1976 (PL 94–265). Passed 353–35: Yes.

13. Procedural Motion. Wright (D Texas) motion to approve the House *Journal* of Tuesday, Feb. 8, 1977. Motion agreed to 364–3: Yes, Feb. 9, 1977.

14. H Res 252. Ethics Committee South Korean Investigation. Adoption of the resolution authorizing and directing the Committee on Standards of Official Conduct (ethics) to determine whether any members of the House or their immediate families or associates accepted anything of value from the South Korean government or representatives thereof. Adopted 388–0: Yes, Feb. 9, 1977.

15. HR 692. Small Business Amendments. Passage of the bill to raise the ceiling on Small Business Administration loans and investments in fiscal 1977 to $8-billion, from $6-billion, and, within that amount, to increase the ceilings on economic opportunity loans to $525-million, from $450-million, and on aid to small business investment companies to $1.1-billion, from $725-million; and to bring more small businesses under the programs. Passed 381–0: Yes, Feb. 9, 1977.

16. Procedural Motion. Wright (D Texas) motion to adjourn from Thursday, Feb. 17, until Monday, Feb. 21, 1977. Motion rejected 109–226; yes, Feb. 17, 1977. (Opponents of a scheduled pay raise for members of Congress tried to force a direct vote on the issue by keeping the House in session over the Feb. 19–20 weekend. The raise automatically was to take effect Feb. 20 unless either house by that date voted against it. After the vote, Speaker Thomas P. O'Neill Jr. (D Mass.) said that under no circumstances could the leadership have brought the pay raise to a vote. The House subsequently adjourned without objection.)

17. HR 27. Air Fare for the Elderly and Handicapped. Anderson (D Calif.) motion to suspend the rules and pass the bill to authorized reduced air fares on a space-available basis for elderly and handicapped persons. Passed 403–0; yes, Feb. 22, 1977.

18. H J Res 132. Marian Anderson Gold Medal. Passage of the resolution to authorize an official gold medal to be awarded to singer Marian Anderson in recognition of her distinguished career. Passed 398–4; yes, Feb. 23, 1977.

19. H Con Res 110. Fiscal 1977 Budget Revisions. Rousselot (R Calif.) substitute amendment, to the committee amendment to revise binding levels for fiscal 1977 revenues and outlays, providing for a $19-billion permanent tax rate reduction. Rejected 148–258; no, Feb. 23, 1977.

20. H Con Res 110. Fiscal 1977 Budget Revisions. Adoption of the resolution revising binding levels for fiscal 1977 to provide for revenues of $348.8-billion, budget authority of $477.9-billion, outlays of $419.1-billion and a deficit of $70.3-billion. Adopted 239–169; yes, Feb. 23, 1977.

21. HR 11. Public Works Jobs Program. Adoption of the rule (H Res 304) providing for House floor consideration of the bill to authorize an additional $4-billion for the emergency public works jobs program. Adopted 384–5; yes, Feb. 24, 1977.

22. HR 11. Public Works Jobs Program. Edgar (D Pa.) substitute amendment, for the Shuster (R Pa.) amendment to change the method of allocating program funds among the states to reflect both absolute numbers of unemployed persons and the severity of state unemployment rates. Rejected 187–201; yes, Feb. 24, 1977.

23. HR 11. Public Works Jobs Program. Shuster (R Pa.) amendment to change the method of allocating program funds among states to base state shares in most cases solely on the number of unemployed persons. Adopted 229–158; no, Feb. 24, 1977.

24. HR 11. Public Works Jobs Program. Passage of the bill to raise the authorization level to $6-billion from $2-billion for the emergency public works employment program as part of President Carter's economic stimulus package. Passed 295–85: No. Feb. 24, 1977.

25. HR 2329. Fish and Wildlife Administration. Murphy (D N.Y.) motion to suspend the rules and pass the bill, as amended, to improve the administration of federal fish and wildlife programs. Motion rejected 206–136: No. Feb. 28, 1977.

26. HR 3753. U.S. 200-Mile Fishing Zone. Leggett (D Calif.) motion to suspend the rules and pass the bill to give congressional approval to international fishery agreements negotiated with foreign countries in accordance with the Fishery Conservation and Management Act of 1976 (PL 94–265). Passed 377–18: Yes. March 1, 1977.

27. HR 3365. Interest Rate Ceilings. Passage of the bill to extend for one year, through March 1, 1978, federal agency authority to set ceilings on interest rates paid by depository institutions ("Regulation Q") and to broaden the lending powers of federally chartered credit unions. Passed 401–4: Yes. March 1, 1977.

28. H Res 287. House Ethics Code. Bolling (D Mo.) motion to order the previous question and thus end debate on the rule (H Res 338) under which the resolution to impose a new financial ethics code on House members was considered. Motion adopted 267–153: Yes. March 2, 1977.

29. H Res 287. House Ethics Code. Frenzel (R Minn.) amendment to delete from the resolution the section banning members from maintaining private unofficial office accounts and to increase by $5,000 the amount available to each member for official expenses. Rejected 187–235: No. March 2, 1977.

30. H Res 287. House Ethics Code. Murphy (D Ill.) amendment to delete the section of the resolution prohibiting members from earning more than 15 per cent of their official salaries through outside jobs. Rejected 79–344: No. March 2, 1977.

31. H Res 287. House Ethics Code. Adoption of the resolution to require comprehensive financial disclosure by House members, ban private office accounts, increase official allowances, ban gifts from lobbyists, limit outside earned income and impose other financial restrictions on members. Adopted 402–22; Yes. March 2, 1977.

32. H J Res 269. Urgent Disaster Relief Appropriations, Fiscal 1977. Passage of the resolution appropriating $200-million in additional disaster relief funds in fiscal 1977 to help alleviate the hardships caused by severe cold weather in the eastern United States. Passed 411–4; Yes. March 3, 1977.

33. HR 3839. Second Budget Rescission, Fiscal 1977. Chappell (D Fla.) amendment, to the committee amendment, to restore $81.6-million in previously appropriated long-lead-time funds for a Nimitz-class nu-

clear aircraft carrier. Rejected 161–252; No. March 3, 1977.

34. HR 3839. Second Budget Rescission. Fiscal 1977. Bennett (D Fla.) amendment, to the committee amendment, to restore $371-million in previously appropriated funds to outfit the *USS Long Beach* with the Aegis antiaircraft system. Rejected 137–269; Yes. March 3, 1977.

35. S Con Res 10. Fiscal 1977 Budget Revisions. Adoption of the conference report on the resolution setting new binding levels for the fiscal 1977 budget of revenues of $347.7-billion, budget authority of $472.9-billion, outlays of $417.45-billion and a deficit of $69.75-billion. Adopted 226–175; Yes. March 3, 1977.

36. HR 2846. John F. Kennedy Center Act Amendments. Adoption of the rule (H Res 359) providing for House consideration of the bill to amend the John F. Kennedy Center Act to authorize funds for certain repairs to the John F. Kennedy Center for the Performing Arts. Adopted 292–22; Yes. March 4, 1977.

37. HR 2846. John F. Kennedy Center Act Amendments. Grassley (R Iowa) motion to recommit the bill to the Public Works and Transportation Committee with instructions to report it back to the House with an amendment reducing the authorization by $1.4-million, to $3.3-million. Rejected 101–213; No. March 4, 1977.

38. HR 2846. John F. Kennedy Center Act Amendments. Passage of the bill to amend the John F. Kennedy Center Act to authorize $4.7-million for certain repairs to the building. Passed 239–78; Yes. March 4, 1977.

39. H Res 111. Select Committee on Professional Sports. Adoption of the resolution to create a House Select Committee on Professional Sports for the 95th Congress. Rejected 75–271: No. March 7, 1977.

40. House Committee on Assassinations. Acceptance of the resignation of Henry B. Gonzalez (D Texas) as chairman and member of the House Select Committee on Assassinations. Accepted 296–100: Yes. March 8, 1977.

41. HR 3477. Stimulus Tax Cuts. Pepper (D Fla.) motion to order the previous question and thus end debate on the rule (H Res 360) providing for House floor consideration of the bill to cut individual and business taxes, simplify tax preparation and increase the standard deduction. Motion agreed to 208–181: March 8, 1977.

42. HR 3477. Stimulus Tax Cuts. Adoption of the Ways and Means Committee amendment to phase out the 1976 tax rebate for those earning more than $25,000 annually and to grant $50 payments to recipients of Aid for Families with Dependent Children (AFDC), black lung benefits, and veterans' compensation and pensions. Adopted 312–103: Yes. March 8, 1977.

43. HR 3477. Stimulus Tax Cuts. Adoption of the Ways and Means Committee amendment to increase the standard deduction for single persons to $2,400 from $2,200. Adopted 386–29: Yes. March 8, 1977.

44. HR 3477. Stimulus Tax Cuts. Adoption of the Ways and Means Committee amendment to provide for a new two-year jobs tax credit (with a $40,000 limit) equal to 40 per cent of the first $4,200 in wages paid to additional employees over 1976 and 1977 levels and to give an additional 10 per cent credit for employment of the handicapped. Adopted 341–74: No. March 8, 1977.

45. HR 3477. Stimulus Tax Cuts. Conable (R N.Y.) motion to recommit the bill to the Ways and Means Committee with instructions to report it back with a substitute amendment reducing the tax rates in the lowest seven tax brackets rather than providing a $50 tax rebate and $50 payments to federal assistance recipients. Rejected 194–219: announced for March 8, 1977.

46. HR 3477. Stimulus Tax Cuts. Passage of the bill to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, to increase the individual standard deduction and to simplify tax preparation. Passed 282–131: Announced for, March 8, 1977.

47. H Res 383. House Select Committee on Ethics. Bolling (D Mo.) motion to order the previous question and thus end debate on the resolution establishing a House Select Committee on Ethics. Motion agreed to 242–175: Yes, March 9, 1977.

48. H Res 383. House Select Committee on Ethics. Adoption of the resolution establishing a House Select Committee on Ethics to implement the House code of ethics. Adopted 410–1: Yes, March 9, 1977.

49. H Res 357. Judiciary Committee. Ashbrook (R Ohio) motion to recommit to the House Administration Committee the Judiciary Committee funding resolution for the 1977 session with instructions to limit funds for internal security investigations of the Judiciary Committee to $300,000. Motion rejected 159–249: No, March 9, 1977.

50. HR 3843. Fiscal 1977 Supplemental Housing Authorization. Adoption of the rule (H Res 388) providing for House floor consideration of the bill to authorize additional funds for housing assistance programs for low- and moderate-income families, to extend the contract term for Section 8 assisted housing programs from 20 to 30 years and to extend the crime and riot insurance programs. Adopted 411–0: Yes, March 10, 1977.

51. HR 3843. Fiscal 1977 Supplemental Housing Authorization. Adoption of the Banking, Finance and Urban Affairs Committee amendment to increase the term of Section 8 assistance contracts from 20 to 30 years for new or rehabilitated units financed conventionally or under the Department of Housing and Urban Development co-insurance program. Adopted 323–87: Yes, March 10, 1977.

52. HR 3843. Fiscal 1977 Supplemental Housing Authorization. Oakar (D Ohio) amendment to require that public members of the National Commission on Neighborhoods include an equal number of men and women. Adopted 249–157: No, March 10, 1977.

53. HR 3843. Fiscal 1977 Supplemental Housing Authorization. Goldwater (R Calif.) amendment to delete Title II of the bill establishing a National Commission on Neighborhoods. Adopted 243–166: Yes, March 10, 1977.

54. HR 3843. Fiscal 1977 Supplemental Housing Authorization. Passage of the bill to authorize an additional $407.6-million for housing assistance programs for low- and moderate-income families, to extend the contract term for Section 8 assisted housing programs from 20 to 30 years and to extend the crime and riot insurance programs. Adopted 380–30: Yes. March 10, 1977.

55. HR 2647. Small Business Loans. Adoption of the conference report on the bill to raise the ceiling on Small Business Administration loans and assistance to $7.4-billion, from $6-billion, and, within that amount, to incease the ceilings on economic opportunity loans to $525-million, from $450-million, and on assistance to small business investment companies to $887.5-million, from $725-million; and to increase the authorization for the surety bond guarantees program to $110-million, from $56.5-million. Adopted 355–1: Yes. March 14, 1977.

56. HR 1746. Rhodesian Chrome Imports. Bauman (R Md.) amendment to prohibit the importation of chrome from any nation that violated the human rights provisions of the United Nations Charter. Rejected 153–246: No. March 14, 1977.

57. HR 1746. Rhodesian Chrome Imports. Stratton (D N.Y.) amendment to delay the effective date of the bill for 30 days so that the President, as required by the amendment, could report to Congress on the status of negotiations to establish majority rule in Rhodesia. Rejected 160–236: No. March 14, 1977.

58. HR 1746. Rhodesian Chrome Imports. Passage of the bill to halt the importation of Rhodesian chrome in order to bring the United States into compliance with United Nations economic sanctions imposed on Rhodesia in 1966. Passed 250–146: Yes, March 14, 1977.

59. H Res 404. Television Coverage of House Proceedings. Adoption of the resolution authorizing the House Rules Committee to evaluate the impact of television coverage of House proceedings, including the possibility of public dissemination, after completion of the 90-day test of audio-visual recording of floor proceedings that began March 15. Adopted 398–10: announced for March 15, 1977.

60. HR 4876. Economic Stimulus Supplemental Appropriations, Fiscal 1977. Adoption of the rule (H Res 402) providing for House floor consideration of the bill to appropriate $22.6-billion of supplemental fiscal 1977 funds for a variety of federal programs, including the components of President Carter's economic stimulus package. Adopted 333–71: Yes. March 15, 1977.

61. HR 4876. Economic Stimulus Supplemental Appropriations, Fiscal 1977. Couglin (R Pa.) amendment to reduce, to $250-million from $632.5-million, the appropriation for the "countercyclical" aid program to help state and local governments continue recession-threatened services. Rejected 183–225: Yes. March 15, 1977.

62. HR 4876. Economic Stimulus Supplemental Appropriations, Fiscal 1977. Cederberg (R Mich.) amendment to require that projects funded under the emergency public works program reserve 10 per cent of their jobs for local residents who had been unemployed at least 30 days. Rejected 165–245: No. March 15, 1977.

63. HR 4876. Economic Stimulus Supplemental Appropriations, Fiscal 1977. Passage of the bill to appropriate $23.3-billion of supplemental fiscal 1977 funds for a variety of federal programs, including the components of President Carter's economic stimulus package. Passed 281–126: Yes. March 15, 1977.

64. HR 4877. First Regular Supplemental Appropriations, Fiscal 1977. Adoption of the rule (H Res 403) waiving points of order against certain provisions of the bill for failure to comply with House rules prohibiting legislation in an appropriations bill and unauthorized appropriations. Adopted 331–58: Yes. March 16, 1977.

65. HR 4877. First Regular Supplemental Appropriations, Fiscal 1977. Obey (D Wis.) amendment to add $200-million for the emergency energy-fuel assistance program. Adopted 233–170: No. March 16, 1977.

66. HR 4877. First Regular Supplemental Appropriations, Fiscal 1977. Myers (R Ind.) amendment to prohibit use of funds in the bill to carry out President Carter's Vietnam amnesty program. Adopted 220–187: No. March 16, 1977.

67. HR 4877. First Regular Supplemental Appropriations, Fiscal 1977. Young (R Fla.) amendment to delete from the bill the $55-million U.S. contribution to the International Development Association. Rejected 171–234: No. March 16, 1977.

68. HR 4877. First Regular Supplemental Appropriations, Fiscal 1977. Passage of the bill to provide supplemental appropriations of $27.9 billion in fiscal year 1977, including $13.1 billion for housing assistance, $3.2 billion for higher education and $2.1 billion for recent pay increases for military and civilian personnel. Passed 306–98. Yes. March 16, 1977.

69. HR 4088. NASA Authorization. Adoption of the rule (H Res 405) providing for House floor consideration of the bill to authorize $4.05 billion for the National Aero-

nautics and Space Administration in fiscal 1978. Adopted 389–0. Yes. March 17, 1977.

70. HR 4088. NASA Authorization. Passage of the bill to authorize $4.05 billion for the National Aeronautics and Space Administration for fiscal 1978. Passed 338–44: Yes, March 17, 1977.

71. HR 3712. Library Services and Construction. Brademas (D Ind.) motion to suspend the rules and pass the bill to extend the Library Services and Construction Act (PL 84–597) for four years and to authorize additional funding. Passed 368-1: Yes. March 21, 1977.

72. HR 4800. Supplemental Jobless Benefits. Moakley (D Mass.) motion to order the previous question (thus ending further debate and possibility for amendment) on the rule (H Res. 411) providing for House floor consideration of the bill to extend for one year, through March 1978, a 13-week program of supplemental unemployment insurance. Motion agreed to 213–164: Announced for March 21, 1977.

73. HR 4800. Supplemental Jobless Benefits. Adoption of the rule (H Res 411) providing for House floor consideration of the bill to extend for one year, through March 1978, a 13-week program of supplemental unemployment insurance. Adopted 236-141: Announced for March 21, 1977.

74. HR 4800. Supplemental Jobless Benefits. Passage of the bill to extend for one year, through March 1978, a 13-week program of supplemental unemployment insurance to provide a maximum of 52 weeks of benefits in states and local areas with high unemployment rates. Passed 327-63: Yes. March 21, 1977.

75. HR 3437. Vocational Education Amendments. Perkins (D Ky.) motion to suspend the rules and pass the bill to make technical amendments to the 1976 education amendments to the Vocational Education Act of 1963 and to increase the flexibility states had in using federal funds for vocational education administration. Passed 396–1: Yes. March 22, 1977.

76. S Con Res 7. Freedom of Emigration. Zablocki (D Wis.) motion to suspend the rules and adopt the concurrent resolution protesting human rights violations to the Soviet Union, including harassment of Soviet Jews and other minorities trying to obtain emigration visas, in disregard of the 1975 Helsinki Declaration. Adopted 400–2: Yes. March 22, 1977.

77. HR 4250. Common-Site Picketing. Adoption of the rule (H Res. 423) providing for House floor consideration of the bill to permit labor unions to picket all contractors at a construction site in disputes with a single contractor working at that site. Adopted 297–112: Yes. March 23, 1977.

78. HR 4250. Common-Site Picketing. Ashbrook (R Ohio) amendment, to the Sarasin (R Conn.) substitute amendment, to restrict common-site picketing to employers "primarily engaged in construction," thus limiting the ability of construction unions to appeal to employees of non-construction employers to observe their strikes. Adopted 212–209: No. March 23, 1977.

79. HR 4250. Common-Site Picketing. Quie (R Minn.) amendment to the Sarasin (R Conn.) substitute amendment to exempt from common-site picketing employers using certain "fast-track" or phased methods of construction. Rejected 181–241: No. March 23, 1977.

80. HR 4250. Common-Site Picketing. Edwards (R Okla.) amendment, to the Sarasin (R Conn.) substitute amendment, to exempt from common-site picketing residential builders of units of three stories or less. Adopted 252–167: Yes. March 23, 1977.

81. HR 4250. Common-Site Picketing. Erlenborn (R Ill.) amendment, to the Sarasin (R Conn.) substitute amendment, to require a secret ballot approval of any authorized common-site picketing action by union, nonunion and industrial workers at the affected site. Rejected 115–304: No. March 23, 1977.

82. HR 4250. Common-Site Picketing. Sarasin (R Conn.) substitute amendment, to the Quie (R Minn.) substitute amendment, to permit common-site picketing practices in somewhat more limited circumstances than the original bill, along the lines of the final version of picketing legislation (HR 5900) vetoed in the 94th Congress. Adopted 246–177: Yes. March 23, 1977.

83. HR 4250. Common-Site Picketing. Passage of the bill to permit a labor union with a grievance with one contractor to picket all contractors on the same construction site and to establish a construction industry collective bargaining committee. Rejected 205–217: Yes. March 23, 1977.

84. Procedural Motion. Wright (D Texas) motion to approve the House *Journal* of Wednesday, March 1977. Motion agreed to 386–3: Yes. March 24, 1977.

85. HR 3965. Federal Aviation Administration Authorization. Passage of the bill to authorize $85-million for research and development programs of the Federal Aviation Administration (FAA) for fiscal 1978 and to require FAA policymakers to disclose any financial interest they might have in any person applying for or receiving financial assistance under the bill. Passed 402–6: Yes. March 24, 1977.

86. HR 4991. National Science Foundation Authorization. Passage of the bill to authorize $868-million in fiscal year 1978 for operations of the National Science Foundation. Passed 378–29: Yes. March 24, 1977.

87. HR 5040. Supplemental State Department Authorization. Passage of the bill to authorize additional funds for activities of the State Department in fiscal 1977. Passed 292–114: Yes. March 24, 1977.

88. H Res 420. Congressional Operations Committee. Adoption of the resolution creating a new Select Committee on Congressional Operations to replace the Joint Committee on Congressional Operations, which was made inoperative when the Senate Feb. 4 voted to discontinue its participation on the panel. Adopted 211–147: Yes. March 28, 1977.

89. HR 5045. Executive Branch Reorganization Authority. Walker (R Pa.) amendment, as a substitute for the bill, to require Congress to vote to approve reorganization plans submitted by the President rather than to allow them to take effect unless disapproved by either the House or Senate within 60 days of their submission. Rejected 87–329: No. March 29, 1977.

90. HR 5045. Executive Branch Reorganization Authority. Passage of the bill to extend for three years the President's authority, which expired in 1973, to transmit to Congress plans for the reorganization of agencies in the executive branch (such authority did not include plans to establish, abolish or merge Cabinet level departments or independent regulatory agencies). Passed 395–22. Yes. March 29, 1977.

91. H. Res. 433. Select Committee on Assassinations. Adoption of the rule (H. Res. 445) providing for House floor consideration of the resolution to continue the select committee charged with a new inquiry into the deaths of President John F. Kennedy and Dr. Martin Luther King Jr. for the duration of the 95th Congress. Adopted 285–124. Yes. March 30, 1977.

92. H. Res. 433. Select Committee on Assassinations. Bauman (R., Md.) amendment to delete language allowing the committee to intervene and bring lawsuits and to make applications to courts. Adopted 223–195. No. March 30, 1977.

93. H. Res. 433. Select Committee on Assassinations. Bauman (R., Md.) motion to resolve into executive (closed) session for further consideration of H. Res. 433. Rejected 185–226. No. March 30, 1977.

94. H. Res. 433. Select Committee on Assassinations. Adoption of the resolution to continue the Select Committee on Assassinations to inquire into the deaths of President John F. Kennedy and Dr. Martin Luther King Jr. for the duration of the 95th Congress. Adopted 230–181. Yes. March 30, 1977.

95. H. Res. 393. House Administration Funds. Adoption of the second part of the resolution to authorize funds for additional office personnel and the lease of equipment for the House leadership offices—up to $30,000 each for the majority and minority leaders and up to $15,000 each for the majority whip and minority whip. Adopted 276–128. Yes. 367–4: Yes. April 19, 1977.

96. H. Res. 393. House Administration Funds. Adoption of the resolution (H. Res. 393), as amended, to authorize funds for two additional employees in the minority leader's office, one additional employee each in the majority whip and chief deputy majority whip's offices and a salary increase for the House postmaster, such funds to be paid out of the contingent funds of the House. Adopted 276–122. Yes. March 31, 1977.

97. HR 4895. Strategic Materials Stockpile Fund. Passage of the bill to establish a separate fund from the proceeds of the sale of excess government stockpiled materials to be used only to purchase other strategic materials for the stockpile. Passed 373–24. Yes. March 31, 1977.

98. HR 4975. Biomedical Research Extension. Passage of the bill to extend for one year, through fiscal 1978, the National Library of Medicine, the national cancer program, the national research service award program and the national heart, blood vessel, lung and blood program at an overall authorization level of $1.5 billion. Passed 385–4: Yes, March 31, 1977.

99. HR 4976. Health Services Extension. Pepper (D Fla.) amendment to increase the authorization for home health services under the bill to the fiscal 1977 level of $8 million for demonstrations and $4 million for training, instead of the $3.45 million and $1 million, respectively, contained in the bill. Adopted 322–69: No. March 31, 1977.

100. HR 4976. Health Services Extension. Passage of the bill to extend for one year, through fiscal 1978, the health services programs of maternal and child health and crippled children services, community health centers, family planning, comprehensive health services, community mental health centers, migrant health centers, hypertension programs, home health services, hemophilia treatment centers, blood separation centers and sudden infant death syndrome programs at an authorization level of $1.1 billion. Passed 376–4: Yes. March 31, 1977.

101. HR 5027. Veterans Administration Medical Services. Roberts (D Texas) motion to suspend the rules and pass the bill to liberalize eligibility for Veterans Administration medical benefits to certain veterans. Motion agreed to 402–0: Yes. April 4, 1977.

102. HR 3695. Veterans' Medical Facilities Funding. Roberts (D Texas) motion to suspend the rules and pass the bill to increase to $15 million the annual program of grants to states for construction and remodeling of veterans' medical care facilities for fiscal years 1978–79. Motion agreed to 399–0: Yes. April 4, 1977.

103. HR 1828. Sick Pay Taxation. Ullman (D Ore.) motion to suspend the rules and pass the bill to delay for one year, until Jan. 1, 1977, the effective date of certain changes in existing tax law that would end the exclusion for sick pay for all but totally disabled retired taxpayers. Motion agreed to 404–0: Yes. April 4, 1977.

104. HR 4800. Supplemental Jobless Benefits. Adoption of the conference report on the bill to extend for seven months, through Oct. 31, 1977, a 13-week program of supplemental unemployment insurance, thus providing a maximum of 52 weeks of benefits

in states with high unemployment rates. Adopted 406–2: Yes. April 4, 1977.

105. HR 5294. Consumer Credit Protection. Adoption of the resolution (H. Res. 469) providing for House floor consideration of the bill to prohibit debt collection agencies from engaging in certain practices alleged to be unfair to consumers. Adopted 347–44: Yes. April 4, 1977.

106. HR 5294. Consumer Credit Protection. Passage of the bill to prohibit debt collection agencies from engaging in certain practices alleged to be unfair to consumers. Passed 199–198: Yes. April 4, 1977.

107. HR 5717. Romanian Earthquake Relief. Zablocki (D Wis.) motion to suspend the rules and pass the bill to authorize $20-million for the relief and rehabilitation of refugees and other victims of the March 4, 1977, earthquake in Romania. Motion agreed to 322–90: Yes. April 5, 1977.

108. HR 7. Career Education Program. Perkins (D Ky.) motion to suspend the rules and pass the bill to authorize $275-million for fiscal years 1978–85 for grants to states to help local and state agencies provide career education programs for elementary and secondary schools. Murphy (D N.Y.) motion to suspend the rules and pass the bill to authorize $700,000 each for fiscal 1978, 1979 and 1980 to fulfill U.S. obligations under the Atlantic Tunas Convention Act of 1975 and to participate in research on Atlantic Ocean tunas. Motion agreed to 407–2: Yes. May 10, 1977.

198. HR 6206. Commercial Fisheries Research Authorization. Murphy (D N.Y.) motion to suspend the rules and pass the bill to extend for two years the Commercial Fisheries Research and Development Act (PL 88–309), which was scheduled to expire Sept. 30, 1978, and to authorize $14.5 million in each of fiscal years 1978–80 for grants-in-aid to states to develop and expand commercial fisheries. Motion agreed to 402–9: Yes. May 10, 1977.

199. HR 6655. Housing and Community Development Programs. Hannaford (D Calif.) amendment to delete from the bill a new alternative formula for allocation of community development block grant funds. Rejected 149–261: No. May 10, 1977.

200. Procedural Motion. O'Neill (D Mass.) motion to approve House *Journal* of Tuesday, May 10, 1977. Motion agreed to 386–12: Yes. May 11, 1977.

201. HR 6655. Housing and Community Development Programs. Grassley (R Iowa) amendment to require that 25 per cent of funds available for urban development action grants be used for cities under 50,000 population that were not central cities of a standard metropolitan statistical area. Adopted 279–129: No. May 11, 1977.

202. HR 6655. Housing and Community Development Programs. Taylor (R Mo.) amendment, as amended by Ichord (D Mo.) amendment, to require lending institutions to notify property owners in flood-prone areas to whom they made loans whether they were entitled to federal disaster relief and to bar government "bailout" of individuals who undertook development in flood-prone areas without taking adequate measures to protect against future floods. Adopted 220–169: No. May 11, 1977.

203. HR 6655. Housing and Community Development Programs. Passage of the bill to authorize $12.45-billion for the community development block grant program for fiscal years 1978–80 and to authorize more than $2-billion for federally assisted, public and rural housing and to continue FHA mortgage and flood insurance programs. Passed 369–20: Yes. May 11, 1977.

204. HR 6714. Foreign Economic Aid. Adoption of the rule (H Res 556) providing for House floor consideration of the bill to authorize $1.7-billion for foreign economic aid programs in fiscal 1978. Adopted 380–14: Yes. May 12, 1977.

205. H.R. 6714. Foreign Economic Aid. Lott (R Miss.) amendment to reduce by $25-million the $271-million authorization recommended by the International Relations Committee for U.S. voluntary contributions to international organizations and programs. Adopted 233–171 No. May 12, 1977.

206. HR 6714. Foreign Economic Aid. Separate vote, requested by Jenrette (D S.C.), on the Johnson (R Colo.) amendment to make tobacco products ineligible for PL 480 Food for Peace export sales to foreign nations. Adopted 229–178: No. May 12, 1977.

207. HR 6714. Foreign Economic Aid. Ashbrook (R Ohio) motion to recommit the bill to the International Relations Committee with instruction that it be reported back to the House with an amendment prohibiting the use of any authorizations in the bill for any form of aid or trade with Vietnam or Cuba. Motion agreed to 288–119: Yes. May 12, 1977.

208. HR 6714. Foreign Economic Aid. Passage of the bill to authorize $1.7-billion for fiscal 1978 for foreign economic aid programs and modifying the PL 480 Food for Peace program. Passed 252–158: Yes. May 12, 1977.

209. HR 6810. Countercyclical Assistance Authorization. Adoption of the rule (H Res 560) providing for House floor consideration of the bill to extend the countercyclical assistance program through Sept. 30, 1978. Adopted 390–3: Yes. May 12, 1977.

210. HR 6810. Countercyclical Assistance Authorization. Brooks (D Texas) motion that the House resolve itself into the Committee of the Whole to consider the countercyclical aid bill. Motion agreed to 322–0: Yes. May 13, 1977.

211. HR 6810. Countercyclical Assistance Authorization. Aspin (D Wis.) amendment to change the formula for allocating program funds to emphasize state and local tax effort rather than unemployment rates. Rejected 127–216: No. May 13, 1977.

212. HR 6810. Countercyclical Assistance Authorization. Passage of the bill to extend for an additional year, through fiscal 1978, a program of "countercyclical" grants to help state and local governments avoid cutbacks in employment and public services and to authorize a maximum of $2.25-billion for the program for the five quarters beginning July 1, 1977. Passed 243–94: Yes, May 13, 1977.

213. HR 3849. Oceans and Atmosphere Advisory Committee. Murphy (D N.Y.) motion to suspend the rules and pass the bill to authorize $750,000 in fiscal 1978 for operation of the National Advisory Committee on the Oceans and Atmosphere (NACOA). Motion agreed to 387–6: Yes. May 16, 1977.

214. HR 5493. National Wildlife Refuge Authorization. Murphy (D N.Y.) motion to suspend the rules and pass the bill to provide the following authorizations through Sept. 30, 1980, for three national wildlife refuges: $1.6-million for the Seal Beach, Calif., refuge; $20.3-million for the San Francisco Bay refuge; and $21.1-million for the Great Dismal Swamp refuge in Virginia and North Carolina. Motion agreed to 384–4: Yes. May 16, 1977.

215. HR 3348. Canal Zone Biological Research Authorization. Murphy (D N.Y.) motion to suspend the rules and pass the bill to authorize $750,000 annually, instead of $350,000, for Smithsonian Institution biological research on Barro Colorado and other small islands in Gatun Lake in the Panama Canal Zone. Motion rejected 245–141: Yes. May 16, 1977.

216. HR 4140. Fishermen's Protective Act Extension. Murphy (D N.Y.) motion to suspend the rules and pass the bill to extend through Sept. 30, 1980, provisions of the Fishermen's Protection Act of 1967 (PL 90–482) that provide for reimbursement to U.S. fishermen by the federal government for fines and losses incurred when they were unlawfully seized by foreign countries. Motion rejected 239–151: Yes, May 16, 1977.

217. HR 3477. Economic Stimulus Tax Cuts. Adoption of the conference report to the bill increasing the standard deduction, extending individual and business tax cuts, providing a jobs tax credit for new employees and

making other changes in the federal tax laws. Adopted 383–2: Yes, May 16, 1977.

218. HR 3477. Economic Stimulus Tax Cuts. Ullman (D Ore.) motion that the House recede from its disagreement with a Senate amendment and concur with an amendment to extend the countercyclical aid program for an additional year, through fiscal 1978, and to authorize a maximum of $2.25-billion for the program for the 15 month period beginning July 1, 1977. Motion agreed to 252–134: Yes, May 16, 1977.

219. HR 6138. Youth Jobs. Hawkins (D Calif.) motion to suspend the rules and pass the bill to expand job and training opportunities for unemployed youth by establishing a new program to employ young adults in conservation projects, guaranteeing part-time jobs and summer jobs to disadvantaged high school students in selected locations, and arranging for a variety of other experimental programs. Motion agreed to 334–61: Yes, May 17, 1977.

220. HR 5742. Drug Abuse Law Enforcement Authorization. Rogers (D Fla.) motion to suspend the rules and pass the bill to authorize $645-million through Sept. 30, 1980, for an extension of drug abuse law enforcement under the Controlled Substances Act. Motion agreed to 393–1: Yes, May 17, 1977.

221. HR. 3722. Securities and Exchange Commission Authorization. Eckhardt (D Texas) motion to suspend the rules and pass the bill to authorize $67-million for SEC operations in fiscal 1978. Passed 375–22: Yes. May 17, 1977.

222. HR 4746. Water Research Authorization. Meeds (D Wash.) motion to suspend the rules and pass the bill to authorize $14.5-million through fiscal 1978 for research on national water supply needs and on saline water conversion. Motion agreed to 397–2: Yes. May 17, 1977.

223. HR 6752. Water Resources Planning Authorizations. Meeds (D Wash.) motion to suspend the rules and pass the bill to authorize $3.9-million in fiscal 1978 for state water resources planning grants and to finance the U.S. Water Resources Council and regional river basin commissions. Motion agreed to 390–6: Yes. May 17, 1977.

224. HR 5885. River Basin Flood and Navigation Projects Authorization. Roberts (D Texas) motion to suspend the rules and pass the bill to authorize $1.239-billion through fiscal 1979 to continue construction of Army Corps of Engineers flood control and navigation projects in 18 river basins. Motion agreed to 310–89: Yes. May 17, 1977.

225. HR 2501. Medicine Bow National Forest Survey. Roncalio (D Wyo.) motion to suspend the rules and pass the bill to authorize an amendment to the public survey records to settle a conflict of private Agriculture Department property title to 160 acres of land located in the Medicine Bow National Forest, Wyo. Motion agreed to 371–26: Yes. May 17, 1977.

226. HR 6010. Aviation Insurance and Reinsurance. Anderson (D Calif.) motion to suspend the rules and pass the bill to expand the aviation war risk insurance program to include loses from hijacking, riots and civil disturbances not considered when the program began in 1951. Passed 388–8: Yes. May 17, 1977.

227. HR 6197. Disaster Relief Authorization. Roberts (D Texas) motion to suspend the rules and pass the bill to authorize necessary funds through fiscal 1978 for federal assistance to individuals and state and local governments in natural disaster emergencies. Motion agreed to 393–5: Yes. May 17, 1977.

228. HR 6401. Deepwater Ports Authorization. Roberts (D Texas) motion to suspend the rules and pass the bill to authorize annual appropriations of $2.5-million in fiscal 1978 through 1980 for licensing and regulation of offshore ports to receive oil from tankers too large for conventional ports. Motion agreed to 387–6: Yes. May 17, 1977.

229. H Res 322. House Solar Energy Study. Mineta (D Calif.) motion to suspend the rules and adopt the resolution to authorize $50,000 for the House Public Works and Transportation Committee to conduct a feasibility study on the use of solar energy in the House office buildings complex. Motion agreed to 368–29: Yes. May 17, 1977.

230. S 1279. Community Drought Relief. Johnson (D Calif.) motion to suspend the rules and pass the bill to authorize $225-million through April 30, 1978, for federal assistance to communities of 10,000 population or more to mitigate the impact of the 1976–77 drought. Motion agreed to 395–2: Yes. May 17, 1977.

231. S Con Res 19. Fiscal 1978 Budget Targets. Giaimo (D Conn.) motion to concur in the Senate amendment to the House amendment to the conference report, the effect of which was to agree to the conference levels that set fiscal 1978 budget targets of revenues of $396.3-billion, budget authority of $503.45-billion, outlays of $460.95-billion and a deficit of $64.65-billion, and set binding fiscal 1977 limits of revenues of $356.6-billion, budget authority of $470.2-billion, outlays of $409.2-billion and a deficit of $52.6-billion. Motion agreed to 221–177: Yes. May 17, 1977.

232. HR 1139. Child Nutrition Programs. Adoption of the rule (H Res 569) providing for House floor consideration of the bill to extend through fiscal 1979 the summer food program and to make other changes in the school lunch and child nutrition programs. Adopted 388–10: Yes. May 18, 1977.

233. H.R. 1139. Child Nutrition Programs. Quie (R Minn.) amendment to limit the bill's authorization for any state for the summer food program to the amount needed to support the average daily participation in the program by twice the number of children between ages 5 and 17 from families currently living below the official poverty level. Rejected 180–218: No. May 18, 1977.

234. HR 1139. Child Nutrition Programs. Quie (R Minn.) amendment to limit the authorizations in the bill for local areas for the summer food program to the amounts needed to support the average daily participation in the program of those children under 18 that were eligible to receive free or reduced-price meals under the school lunch and breakfast programs. Rejected: 192–216: Yes. May 18, 1977.

235. HR 1139. Child Nutrition Programs. Goodling (R Pa.) amendment to give local school districts during fiscal 1978 and 1979 the option to receive cash instead of commodities under Section 6 of the School Lunch Act. Rejected 138–272: No. May 18, 1977.

236. HR 1139. Child Nutrition Programs. Passage of the bill to extend through fiscal 1979 the summer food program and make other changes in the school lunch and child nutrition programs. Passed 393–19: Yes. May 18, 1977.

237. HR 6884. Foreign Military Aid. Adoption of the rule (H Res 576) providing for House floor consideration of the bill to authorize $3.2-billion in foreign military aid, security assistance, military sales credits and related programs for fiscal 1978. Adopted 359–48: Yes. May 18, 1977.

238. HR 10. Hatch Act Amendments. Adoption of the rule (H Res 575) providing for House floor consideration of the bill to revise the 1939 Hatch Act. Adopted 348–60: Yes. May 18, 1977.

239. HR 10. Hatch Act Amendments. Lott (R Miss.) amendment to guarantee the right of federal employees to refrain from political activity. Adopted 259–144: Yes. May 18, 1977.

240. HR 10. Hatch Act Amendments. Harris (D Va.) amendment to prohibit elected or appointed officials of the federal government from submitting political job referrals to the Civil Service Commission. Rejected 153–248: Yes. May 18, 1977.

241. HR 10. Hatch Act Amendments. Clay (D Mo.) motion to end House debate on the bill to revise the Hatch Act at 9 p.m. Rejected 169–237: No. May 18, 1977.

242. HR 10. Hatch Act Amendments. Fisher (D Va.) amendment to permit federal employees to engage in political activities at the state and local level and to run for part time state and local office, but to prohibit them from engaging in political activities at the federal level. Rejected 143–266: Yes. May 18, 1977.

243. HR 10. Hatch Act Amendments. Ashbrook (R Ohio) amendment to prohibit a federal employee organization from coercing, threatening or intimidating its workers into participating in any form of political activity and to prohibit the organization from using dues or fees for political purposes. Adopted 229–168: No. May 18, 1977.

244. HR 10. Hatch Act Amendments. Gudger (D N.C.) amendment to delete language providing for criminal penalties for extortion of political contributions from federal personnel. Rejected 73–319: No. May 18, 1977.

245. HR 10. Hatch Act Amendments. Clay (D Mo.) motion that the Committee of the Whole rise, thus suspending further consideration of the bill. Motion agreed to 326–84: Yes. May 18, 1977.

246. HR 6111. Juvenile Justice and Delinquency Act. Passage of the bill to extend the Juvenile Justice Act and the Runaway Youth Act for three years, to authorize $125-million for fiscal year 1978 and open-ended authorizations for succeeding years through fiscal year 1980 and to amend certain provisions of the Juvenile Justice Act. Passed 389–5: Yes. May 19, 1977.

247. HR 6258. Privacy Commission. Preyer (D N.C.) motion to suspend the rules and pass the bill to extend the life of the Privacy Protection Study Commission for two and one-half months until Sept. 30, 1977, to plan for an orderly termination of the commission. Motion agreed to 387–3: Yes. May 23, 1977.

248. HR 1862. Veterans' Disability Benefits. Montgomery (D Miss.) motion to suspend the rules and pass the bill to increase by approximately 6 per cent the rates of disability compensation for disabled veterans and their survivors. Motion agreed to 393–0: Yes. May 23, 1977.

249. HR 6501. Special Disabled Veterans' Benefits. Montgomery (D Miss.) motion to suspend the rules and pass the bill to increase disability compensation for certain veterans who had suffered the loss of paired extremities. Motion agreed to 385–7: Yes. May 23, 1977.

250. HR 6502. Disabled Veterans' Automobile Benefits. Montgomery (D Miss.) motion to suspend the rules and pass the bill to provide allowances for modification of automobiles to disabled veterans of World War I. Motion agreed to 386–11: Yes. May 23, 1977.

251. HR 5645. Civil Rights Commission. Edwards (D Calif.) motion to suspend the rules and pass the bill to raise the authorization for the U.S. Commission on Civil Rights for fiscal 1978 to $10,540,000, from $9,450,000 in fiscal 1977. Motion agreed to 365–34: Yes. May 23, 1977.

252. HR 5970. Fiscal 1978 Defense Procurement Authorization Conference. Bennett (D Fla.) motion that the House conferees on the bill be instructed to vote to close meetings of the conference committee when classified information was discussed, but that any House member would be eligible to attend meetings of the conference. Motion agreed to 273–114: Yes. May 23, 1977.

253. HR 6884. Foreign Military Aid. Studds (D Mass.) amendment to delete from the bill $700,000 authorized for military education and training aid for Argentina and to prohibit military equipment sales to that coun-

try. Rejected 187–200: Announced no. May 23, 1977.

254. HR 6884. Foreign Military Aid. Zablocki (D Wis.) motion that the House resolve itself into the Committee of the Whole to proceed with floor consideration of the fiscal 1978 foreign military aid bill. Motion agreed to 400–0: Yes. May 24, 1977.

255. HR 6884. Foreign Military Aid. Ichord (D Mo.) amendment to delete a committee provision establishing a $100-million African Special Requirements Fund to aid those countries affected by the civil strife in Rhodesia. Rejected 204–208: No. May 24, 1977.

256. HR 6884. Foreign Military Aid. Bonker (D Wash.) substitute amendment, for the Bauman (R Md.) amendment, to delete language in the bill requiring countries to be ruled by a majority before they could receive aid from the proposed $100-million African fund. Adopted 238–173: Yes. May 24, 1977.

257. HR 6884. Foreign Military Aid. Harkin (D Iowa) amendment to reduce by $102.7 million the fiscal 1978 foreign military sales authorization of $675,850,000. Rejected 139–260: No. May 24, 1977.

258. HR 6884. Foreign Military Aid. Findley (R Ill.) motion to recommit the bill to the International Relations Committee with instructions to report it back to the House with an amendment permitting the President to suspend the 1975 embargo on U.S. military assistance to Turkey if the Ankara government met certain conditions. Rejected 150–256: No. May 24, 1977.

259. HR 6884. Foreign Military Aid. Passage of the bill to authorize $3.2-billion in foreign military security aid and weapons sales credits for fiscal 1978. Passed 242–163: Yes. May 24, 1977.

260. HR 6161. Clean Air Act Amendments. Adoption of the rule (H Res 589) providing for House floor consideration of the bill to revise the 1970 Clean Air Act. Adopted 383–1: Yes. May 24, 1977.

261. HR 6161. Clean Air Act Amendments. Rogers (D Fla.) motion that the House resolve itself into the Committee of the Whole to proceed with floor consideration of amendments to the bill amending the 1970 Clean Air Act. Motion agreed to 369–1: Yes. May 25, 1977.

262. HR 6161. Clean Air Act Amendments. McKay (D Utah) substitute amendment, for the Breaux (D La.) amendment as amended by the Emery (R Maine) amendment to allow sulfur dioxide pollution to exceed permissible levels for 18 days of the year in high terrain Class II areas. Rejected 170–237: No. May 25, 1977.

263. HR 6161. Clean Air Act Amendments. Breaux (D La.) amendment, as amended by Emery (R Maine) substitute amendment, to allow state governors to permit Class I and Class II areas to exceed pollution levels for 18 days in a year. Adopted 237–172: Yes. May 25, 1977.

264. HR 6161. Clean Air Act Amendments. Grammage (D Texas) amendment to postpone compliance measures in areas that have not attained public health standards for clean air until 60 days after completion of a one-year Environmental Protection Agency study. Rejected 162–242: No. May 25, 1977.

265. HR 6161. Clean Air Act Amendments. Rogers (D Fla.) motion that the House resolve itself into the Committee of the Whole to proceed with floor consideration of amendments to the bill amending the 1970 Clean Air Act. Motion agreed to 380–1: Yes. May 26, 1977.

266. HR 6161. Clean Air Act Amendments. Preyer (D N.C.) substitute amendment, for the Dingell (D Mich.) substitute, to delay automobile emissions schedules by one additional year and to waive certain restrictions on small diesel engines. Rejected 190–202: Yes. May 26, 1977.

267. HR 6161. Clean Air Act Amendments. Dingell (D Mich.) substitute for Title II to delay and relax automobile emissions standards, to reduce the warranties for emissions control devices, and made other changes in existing law regarding mobile sources of air pollution. Adopted 255–139: Yes. May 26, 1977.

268. HR 6161. Clean Air Act Amendments. Passage of the bill to revise the 1970 Clean Air Act (PL 91–604) to set new standards for automobile exhaust emissions, regulate new sources of pollution in clean air areas including national parks and allow limited industrial expansion in areas that have not yet achieved national health standards for clean air. Adopted 326–49: Yes. May 26, 1977.

269. HR 6967. Peace Corps Authorization. Adoption of the rule (H Res 600) providing for House floor consideration of the bill to authorize $81-million in fiscal 1978 for activities of the Peace Corps. Adopted 333–2: Yes. June 1, 1977.

270. HR 6970. Tuna-Dolphin Protection. McCloskey (R Calif.) amendment, as amended by the Bonker (D Wash.) amendment, to reduce to a total of 68,910 the number of dolphins that could be accidentally taken during commercial tuna fish operations in 1977 and to reduce further the quota after 1977, and to ban the importation of fish products whose production caused dolphin kills exceeding U.S. standards. Adopted 244–109: Yes. June 1, 1977.

271. HR 6970. Tuna-Dolphin Protection. Pritchard (R Wash.) amendment to levy a $32 fee for each dolphin killed incidental to commercial tuna fishing operation. Rejected 158–194: No. June 1, 1977.

272. HR 6970. Tuna-Dolphin Protection. Passage of the bill to limit to 68,910 the total number of dolphins that could be accidentally taken during 1977 commercial tuna fishing operations, to authorize significant further reductions in that quota after 1977, to establish a 100 per cent federal observer program on tuna boats, to establish certain incentives and penalties to encourage conservation of dolphins, to ban transfers of tuna vessels to foreign registry unless U.S. tuna fishing standards were observed, and to require initiation of multilateral negotiations aimed at placing U.S. observers on foreign flag tuna vessels. Passed 334–20: Yes. June 1, 1977.

273. HR 6967. Peace Corps Authorization. Passage of the bill to authorize $81-million in fiscal 1978 for activities of the Peace Corps, plus necessary increases for salary, retirement and employee benefits. Passed 305–43: Yes. June 1, 1977.

274. HR 6804. Federal Energy Department. Adoption of the rule (H Res 603) providing for House floor consideration of the bill to create a Cabinet-level Department of Energy by consolidating the functions of the Federal Power Commission (FPC), the Federal Energy Administration (FEA), the Energy Research and Development Administration (ERDA) and other energy functions scattered throughout the federal government. Adopted 345–2: Yes. June 2, 1977.

275. HR 6804. Federal Energy Department. Conyers (D Mich.) amendments, considered en bloc, to establish an independent regulatory board, called the National Energy Board, to assume the regulatory functions and powers of the FPC, FEA and ERDA, as a substitute for the committee-recommended Federal Energy Regulatory Commission to be included within the proposed department. Rejected 83–277: No. June 2, 1977.

276. HR 6804. Federal Energy Department. Moss (D Calif.) amendment to limit the authority of the proposed Energy Department Secretary to issue general applicability rules; to give the proposed Federal Energy Regulatory Commission rather than the Secretary the authority to set natural gas wellhead prices; and to give the commission 30 days to comment on rules proposed by the commission functions, except in emergencies. Adopted 236–119: No. June 2, 1977.

277. HR 6804. Federal Energy Department. Udall (D Ariz.) amendment to delete language giving the Energy Department Secretary veto power over the economic terms of leasing of energy resources on federal lands. Rejected 170–180: No. June 2, 1977.

278. HR 6804. Federal Energy Department. Levitas (D Ga.) amendment to provide that any rule or regulation promulgated by the Energy Department Secretary or independent regulatory commission would be reviewed by Congress and could be disapproved by either house of Congress within 90 days. Adopted 200–125: No. June 2, 1977.

279. HR 6804. Federal Energy Department. Brooks (D Texas) motion that the House resolve itself into the Committee of the Whole to proceed with floor consideration of amendments to the bill to create a Cabinet-level Energy Department. Motion agreed to 313–0: Yes. June 3, 1977.

280. HR 6804. Federal Energy Department. Hughes (D N.J.) amendment to prohibit high-level regulatory officials in the new department from accepting jobs or compensation for two years after leaving the agency from any person or company regulated by the department. Rejected 146–184: No. June 3, 1977.

281. HR 6804. Federal Energy Department. Broyhill (R N.C.) amendment to make authorities under the bill subject to a "sunset" provision whereby they would expire Dec. 31, 1982, unless extended by Congress. Adopted 202–126: Yes. June 3, 1977.

282. HR 6804. Federal Energy Department. Passage of the bill creating a Cabinet-level Department of Energy by combining all powers currently held by the Federal Power Commission, the Federal Energy Administration, the Energy Research and Development Administration, and various other energy authorities and programs currently scattered throughout the federal bureaucracy. Passed 310–20: Yes. June 3, 1977.

283. S 955. Federal Crop Insurance. Jones (D Tenn.) motion to suspend the rules and pass the bill to raise the capital stock of the Federal Crop Insurance Corporation to $150-million from $100-million. Motion agreed to 377–5: Yes. June 6, 1977.

284. HR 75. Soil and Water Conservation. Jones (D Tenn.) motion to suspend the rules and pass the bill to require the Secretary of Agriculture to appraise the nation's soil, water and related resources by Dec. 31, 1979, and at five-year intervals thereafter, and to develop a national soil and water conservation program by the same date. Motion agreed to 365–16: Yes. June 6, 1977.

285. HR 6794. Federal Energy Administration Extension. Dingell (D Mich.) motion to suspend the rules and pass the bill to extend the Federal Energy Administration (FEA) through fiscal 1978 and the FEA's powers to order certain utilities and industries to convert to coal through Dec. 31, 1978, and to authorize $1.44-billion for the agency in fiscal 1978. Motion agreed to 272–111: Yes. June 6, 1977.

286. HR 6893. Congressional Members' State Income Taxes. Danielson (D Calif.) motion to suspend the rules and pass the bill to amend the U.S. Code to stipulate that members of Congress do not have to pay income taxes to any state except those they represent (currently members living in the Maryland suburbs of Washington, D.C., are re-

quired to pay Maryland state income taxes). Motion agreed to 294–83: Yes. June 6, 1977.

287. HR 6990. Military Construction Authorization. Hagedorn (R Minn.) amendment to exempt certain Defense Department construction contracts authorized in the bill from the provisions of the Davis-Bacon Act. Rejected 76–298: June 6, 1977. No.

288. HR 6990. Military Construction Authorization. Passage of the bill to authorize $3,508,560,000 for military construction projects of the Defense Department for fiscal 1978. Passed 351–24: June 6, 1977. Yes.

289. HR 10. Hatch Act Amendments. Clay (D Mo.) motion that the House resolve itself into the Committee of the Whole to proceed with further consideration of the bill to revise the 1939 Hatch Act. Motion agreed to 371–26: June 7, 1977. Yes.

290. HR 10. Hatch Act Amendments. Rousselot (R Calif.) amendment, to the Clay (D Mo.) amendment to delete language that no labor union activities could be made unlawful that were not unlawful under the Federal Election Campaign Act. Rejected 131–277: June 7, 1977. No.

291. HR 10. Hatch Act Amendments. Clay (D Mo.) amendment to specify that the intent of the Ashbrook (R Ohio) amendment was that activities of labor unions must be consistent with provisions of the Federal Election Campaign Act of 1971. Adopted 266–139: June 7, 1977. Yes.

292. HR 10. Hatch Act Amendments. Allen (D Tenn.) amendment to eliminate the exceptions under which persons in certain restricted positions—such as agents of the Federal Bureau of Investigation, Internal Revenue Service, Central Intelligence Agency and purchasing agents—could participate in local nonpartisan elections. Rejected 56–344: June 7, 1977. No.

293. HR 10. Hatch Act Amendments. Kindness (R Ohio) to add language defining the term "extortion" as an attempt to obtain property from another person by the use of threatened force or fear. Rejected 190–219: June 7, 1977. No.

294. HR 10. Hatch Act Amendments. Bauman (R Md.) amendment to prohibit federal employees from soliciting political contributions from another federal employee, whether he was a supervisor or not. Rejected 156–251: June 7, 1977. No.

295. HR 10. Hatch Act Amendments. Passage of the bill to revise the 1939 Hatch Act to allow federal civilian and postal employees to participate in political activities and to protect such employees from improper political solicitations. Passed 244–164: No. June 7, 1977.

296. S 521. Kennedy Center Repairs. Adoption of the conference report on the bill to authorize $4.7-million to repair and renovate the John F. Kennedy Center for the Performing Arts in Washington, D.C., to correct leaks in the building. Adopted (thus completing congressional action) 291–90: Yes. June 8, 1977.

297. HR 7552. Treasury, Postal Service Appropriations, Fiscal 1978. Passage of the bill to appropriate $7,522,028,000 for fiscal 1978 operations and programs of the Treasury Department, Postal Service, Executive Office of the President and various independent agencies. Passed 359–45: Yes. June 8, 1977.

298. HR 7557. Transportation Appropriations, fiscal 1978. Koch (D N.Y.) amendment to prohibit use of funds appropriated under the act for air traffic control of supersonic aircraft at John F. Kennedy International Airport, New York, unless the aircraft was in compliance with the Federal Aviation Administration noise standard for subsonic aircraft. Rejected 128–274: No. June 8, 1977.

299. HR 7557. Transportation Appropriations, Fiscal 1978. Passage of the bill appropriating $14,047,570,000 for the operations and programs of the Transportation Department and related agencies for fiscal year 1978. Passed 391–11: Yes. June 8, 1977.

300. HR 7010. Compensation to Victims of Crime. Adoption of the rule (H Res 601) providing for House floor consideration of the bill to authorize $150 million in fiscal 1978–80 to provide grants to state crime victim compensation programs at a 50 per cent matching level for state crimes and at 100 per cent for federal crimes, and to establish a nine-member Advisory Committee on Victims of Crime headed by the Attorney General. Adopted 312–79: Yes. June 8, 1977.

301. HR 7636. Interior Department Appropriations, Fiscal 1978. Adoption of the rule (H Res 616) providing for House floor consideration of the bill to appropriate funds for the operations of the Interior Department and related agencies for fiscal 1978. Adopted 332–65: Yes. June 9, 1977.

302. HR 7636. Interior Department Appropriations, Fiscal 1978. McCormack (D Wash.) amendment to add $38.78-million for research and development relating to energy conservation programs of the Energy Research and Development Administration (ERDA). Rejected 145–251: Yes. June 9, 1977.

303. HR 7636. Interior Department Appropriations, Fiscal 1978. Passage of the bill to appropriate $9,545,741,000 for fiscal 1978 for activities and programs of the Interior Department and related agencies. Passed 395–7: Yes. June 9, 1977.

304. HR 6666. Legal Services Corporation. Adoption of the rule (H Res 617) providing for House floor consideration of the bill to extend the Legal Services Corporation for two years and to authorize $238.7-million in fiscal 1978 and $300-million in fiscal 1979. Adopted 352–52: Yes. June 9, 1977.

305. HR 6666. Legal Services Corporation. Butler (R Va.) amendment to prohibit legal services attorneys from taking active part in either partisan or nonpartisan political activities. Rejected 178–198: Yes. June 9, 1977.

306. HR 5840. Export Administration Act/Arab Boycott. Adoption of the conference report to the bill to extend the Export Administration Act of 1969 through Sept. 30, 1979, and to prohibit American firms from complying with the Arab trade boycott against Israel. Adopted 306–41: Yes. June 10, 1977.

307. HR 7556. State, Justice, Commerce and Judiciary Appropriations, Fiscal 1978. Burgener (R Calif.) amendment to prohibit the use of any appropriated funds for salaries or expenses of any diplomatic personnel assigned to Cuba. Rejected 139–206: No. June 10, 1977.

308. HR 7556. State, Justice, Commerce and Judiciary Appropriations, Fiscal 1978. Slack (D W.Va.) motion that the House resolve itself into the Committee of the Whole to proceed with further consideration of the fiscal 1978 appropriations bill for the Departments of State, Justice and Commerce, the Judiciary and related agencies. Motion agreed to 354–2: Yes. June 13, 1977.

309. HR 7556. State, Justice, Commerce and Judiciary Appropriations, Fiscal 1978. Holtzman (D N.Y.) amendment to increase the appropriation for the Law Enforcement Assistance Administration (LEAA) by $104.5-million over the committee-recommended amount of $600-million. Rejected 172–210: No. June 13, 1977.

310. HR 7556. State, Justice, Commerce and Judiciary Appropriations, Fiscal 1978. Passage of the bill to appropriate $7,606,-119,500 for fiscal 1978 operations and programs of the Departments of State, Justice and Commerce, the Judiciary and related agencies. Passed 353–42: Yes. June 13, 1977.

311. H Con Res 248. Joint Economic Committee Study. Bolling (D Mo.) motion to suspend the rules and adopt the resolution to authorize $900,000, through Dec. 31, 1978, for a study by the congressional Joint Economic Committee of economic changes in the United States and the world since the enactment of the Employment Act of 1946 and to make recommendations to Congress to assist it in formulating a comprehensive economic policy. Motion agreed to 324–79: Yes. June 14, 1977.

312. HR 7200. Public Assistance Amendments. Corman (D Calif.) motion to suspend the rules and pass the bill to amend the Social Security Act to make changes in the programs of Supplemental Security Income benefits, Aid to Families with Dependent Children, child welfare services and day care services. Motion agreed to 335–64: Yes. June 14, 1977.

313. HR 7553. Public Works-ERDA Appropriations, Fiscal 1978. Conte (R Mass.)-Derrick (D S.C.) amendment to delete funding for 16 water projects and reduce funding for one more project, but to retain the total appropriations amount in the bill. Rejected 194–218: No. June 14, 1977.

314. HR 7553. Public Works-ERDA Appropriations, Fiscal 1978. Passage of the bill to appropriate $10,186,746,000 for fiscal 1978 water and power public works of the Army Corps of Engineers, Department of the Interior and several independent officers, and for most programs of the Energy Research and Development Administration (ERDA) Passed 356–54: Yes. June 14, 1977.

315. HR 7554. HUD, Independent Agencies Appropriations, Fiscal 1978. Adoption of the rule (H Res. 624) providing for House floor consideration of the bill to appropriate $70,241,683,000 for fiscal 1978 operations and programs of the Department of Housing and Urban Development and independent agencies. Adopted 370–20: Yes. June 15, 1977.

316. HR 7554. HUD, Independent Agencies Appropriations, Fiscal 1978. Coughlin (R Pa.) amendment to earmark 75 per cent of the public housing funded in the bill for the elderly and handicapped. Rejected 183–214: No. June 15, 1977.

317. HR 7554. HUD, Independent Agencies Appropriations, Fiscal 1978. Burke (D Calif.) amendment to restore comprehensive planning grant (Section 701) funds for cities over 50,000 and for urban counties. Rejected 156–248: No. June 15, 1977.

318. HR 7554. HUD, Independent Agencies Appropriations, Fiscal 1978. Beard (R Tenn.) amendment to withhold veterans' benefits from Vietnam-era servicemen who received upgraded discharges under President Carter's review program. Adopted 273–136: Yes. June 15, 1977.

319. HR 7554. HUD, Independent Agencies Appropriations, Fiscal 1978. Miller (R Ohio) amendment to withhold 1 per cent of the nonmandatory spending in the bill from obligation and expenditure. Rejected 169–237: No. June 15, 1977.

320. HR 7554. HUD, Independent Agencies Appropriations, Fiscal 1978. Passage of the bill to appropriate $70,241,683,000 for fiscal 1978 operations and programs of the Department of Housing and Urban Development and various independent agencies, including the Veterans' Administration. Passed 374–32: Yes. June 15, 1977.

321. HR 7555. Labor/HEW Appropriations, Fiscal 1978. Flood (D Pa.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to appropriate fiscal 1978 funds for the Departments of Labor and Health, Education, and Welfare and related agencies. Motion agreed to 342–4: Yes. June 16, 1977.

322. HR 7555. Labor/HEW Appropriations, Fiscal 1978. Symms (R Idaho) amendment

to reduce the appropriation for the Occupational Safety and Health Administration (OSHA) in the Department of Labor by $6.3-million, to $130.3-million from $136.6-million. Rejected 162–231: No. June 16, 1977.

323. HR 7555. Labor/HEW Appropriations, Fiscal 1978. Michel (R Ill.) amendment to reduce the bill's total appropriations by $563.5-million, affecting 11 health, education and elderly programs. Rejected 72–334: No. June 16, 1977.

324. HR 7555. Labor/HEW Appropriations, Fiscal 1978. Mottl (D Ohio) amendment to prohibit the use of federal funds for busing students beyond the schools nearest to their homes and to prevent HEW from requiring local school districts to merge, pair or cluster schools to foster integration. Adopted 225–157: No. June 16, 1977.

325. HR 5262. International Lending Institutions. Rousselot (R Calif.) motion to instruct conferees on the bill to insist on language requiring United States officials to vote against loans by international financial institutions to nations that violated human rights. Rejected 161–200: No. June 17, 1977.

326. HR 7555. Labor-HEW Appropriations. Fiscal 1978. Hyde (R Ill.) Amendment to prohibit the use of federal funds to finance or encourage abortions. Adopted 201–155: No. June 17, 1977.

327. HR 7558. Agriculture Department Appropriations, Fiscal 1978. Adoption of the rule (H Res 634) providing for House floor consideration of the bill to appropriate $12,658,830,000 for fiscal 1978 operations and programs of the Department of Agriculture and related agencies. Adopted 352–5: Yes. June 20, 1977.

328. HR 7558. Agriculture Department Appropriations, Fiscal 1978. Michel (R Ill.) amendment to prohibit the use of any funds appropriated in the bill to pay the salary of any employee who formulated or carried out a program to make payments to sugar processors. Rejected 119–272: No. June 20, 1977.

329. S 826. Federal Energy Department. Broyhill (R N.C.) preferential motion that the House conferees on the bill to create a new federal Department of Energy insist on title IX, which provided that the new department would expire on Dec. 31, 1982. Motion agreed to 228–179: No. June 21, 1977.

330. HR 7558. Agriculture Department Appropriations, Fiscal 1978. Rousselot (R Calif.) amendment to reduce the appropriation in the bill for the food stamp program to $5-billion from $5.7-billion. Rejected 154–262: No. June 21, 1977.

331. HR 7558. Agriculture Department Appropriations, Fiscal 1978. Passage of the bill to appropriate $12,658,830,000 for fiscal 1978 operations and programs of the Department of Agriculture and related agencies. Passed 380–35: Yes. June 21, 1977.

332. HR 7589. Military Construction Appropriations, Fiscal 1978. Adoption of the rule (H Res 618) providing for House consideration of the bill to appropriate fiscal 1978 funds for the Department of Defense military construction programs. Adopted 404–0: Yes. June 21, 1977.

333. HR 7589. Military Construction Appropriations, Fiscal 1978. Passage of the bill to appropriate $2,819,501,000 for fiscal 1978 military construction programs of the Department of Defense. Passed 391–16: Yes. June 21, 1977.

334. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Adoption of the rule (H Res 649) providing for House floor consideration of the bill to appropriate $7-billion for fiscal 1978 foreign aid programs of the State Department. Adopted 349–41: Yes. June 22, 1977.

335. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Young (R Fla.) amendment, as modified by the Lott (R Miss.) substitute amendment, to cut $31-million from the $120-million contained in the bill for the United Nations Development Program. Rejected 182–232: No. June 22, 1977.

336. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Young (R Fla.) amendment to delete the entire $50-million contained in the bill for development aid in the Sahel region of Africa. Rejected 160–255. No. June 22, 1977.

337. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Ichord (D Mo.) amendment to delete the $100-million contained in the bill for the Southern African Special Requirements Fund to aid those nations that border Rhodesia. Rejected 199–209: No. June 22, 1977.

338. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Roybal (R Calif.) amendment to prohibit the use of $700,000 earmarked in the bill for training military forces in Argentina. Adopted 223–180: No. June 22, 1977.

339. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Young (R Fla.) amendment to prohibit funds contained in the bill from being used directly or indirectly (through multilateral lending institutions) in Uganda, Cambodia, Laos or Vietnam. Adopted 295–115: No. June 22, 1977.

340. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Wolff (D N.Y.) amendment to prohibit the payment of reparations to Vietnam. Adopted 359–33: Yes. June 22, 1977.

341. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Long (D Md.) motion that the House resolve itself into the committee of the Whole for further consideration of the bill to appropriate funds for foreign aid programs and for operations of the State Department in fiscal 1978. Motion agreed to 382–5: Yes. June 23, 1977.

342. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Young (R Fla.) amendment to reduce the appropriation in the bill for the U.S. contribution to the International Development Association by $477-million, thus reducing the contribution to $473-million. Rejected 175–233. No. June 23, 1977.

343. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Long (D Md.) motion to limit additional debate on the Wilson (D Texas) amendment to 15 minutes. Motion rejected 171–220: No. June 23, 1977.

344. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Wilson (D Texas) amendment to reinstate funds deleted by the committee for military assistance, military training and education or for military credit sales to Nicaragua. Adopted 225–180: No. June 23, 1977.

345. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Moore (R La.) amendment to prohibit any funds in the bill from being used by international financial institutions for loans establishing or expanding production of sugar, palm oil or citrus crops if the United States was a producer of the same or similar commodities. Adopted 209–179. No. June 23, 1977.

346. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Ashbrook (R Ohio) amendment to prohibit the use of any appropriations in the bill from being used for any form of trade or assistance to Cuba, either directly or indirectly through international financial institutions. Adopted 274–112: No. June 23, 1977.

347. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Miller (R Ohio) amendment to cut 5 per cent overall from the $7,046,454,000 recommended by the Appropriations Committee for foreign aid programs (payments required by law, however, would not be affected, and no program could be reduced by more than 10 per cent). Adopted 214–168: No. June 23, 1977.

348. HR 7797. Foreign Aid Appropriations. Fiscal 1978. Passage of the bill to appropriate $7,046,454,000, less 5 per cent of the amount for fiscal 1978 foreign aid programs, international financial institutions and the operations of the State Department. Passed 208–174: Yes. June 23, 1977.

349. HR 7933. Defense Department Appropriations, Fiscal 1978. Adoptions of the rule (H Res 655) providing for House floor consideration of the bill to appropriate $110.6-billion for fiscal 1978 operations and programs of the Department of Defense. Adopted 337-1: Yes. June 24, 1977.

350. HR 7933. Defense Department Appropriations, Fiscal 1978. Addabbo (D N.Y.) amendment to delete funds from the bill for the purchase of the nonnuclear-armed Lance missile. Rejected 123–226: No. June 24, 1977.

351. HR 6666. Legal Services Corporation. Kastenmeier (D Wis.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to extend the Legal Services Corporation for two years and to authorize $538.7-million for fiscal 1978–79. Motion agreed to 359–1: June 27, 1977.

352. HR 6666. Legal Services Corporation. Kindness (R Ohio) amendment to maintain the appropriation for the corporation at the existing $175-million level for each of fiscal 1978 and 1979, pending a July 1977 report to Congress assessing the corporation. Rejected 158–221: No. June 27, 1977.

353. HR 6666. Legal Services Corporation. Kindness (R Ohio) amendment to require all corporation funding requests to be submitted for approval by the Office of Management and Budget prior to submission to Congress. Rejected 160–223: No. June 27, 1977.

354. HR 6666. Legal Services Corporation. Wylie (R Ohio) amendment to prohibit the use of funds in the bill to pay for legal assistance in cases involving school desegregation. Adopted 208–174: No. June 27, 1977.

355. HR 6666. Legal Services Corporation. Ashbrook (R Ohio) amendment to terminate the corporation on Sept. 30, 1979. Rejected 166–214: No. June 27, 1977.

356. HR 6666. Legal Services Corporation. McDonald (D Ga.) amendment to prohibit legal assistance in cases arising out of disputes over the issue of homosexuality or gay rights. Adopted 230–133: No. June 27, 1977.

357. HR 6666. Legal Services Corporation. Kindness (R Ohio) motion to recommit the bill to the Judiciary Committee with instructions to report it back to the House with an amendment restoring a prohibition on grants or contracts to outside "backup" support centers for research and training. Rejected 154-213: No. June 27, 1977.

358. HR 6666. Legal Services Corporation. Passage of the bill to extend the Legal Services Corporation for two years, with authorizations of $217-million for fiscal year 1978 and $275-million for fiscal 1979 and amend the Legal Services Corporation Act of 1974. Passed 267-103: Yes. June 27, 1977.

359. Procedural Motion. O'Neill (D Mass.) motion to approve the House *Journal* of Monday, June 27, 1977. Motion agreed to 377-15: Yes. June 28, 1977.

360. S 964. Congressional Pay Raises. Solarz (D N.Y.) motion to suspend the rules and pass the bill to deny an October 1977 cost-of-living pay increase for high-level federal officials, members of Congress and federal judges who had received a pay increase in February 1977. Motion agreed to 397-20: Yes. June 28, 1977.

361. HR 7933. Defense Department Appropriations, Fiscal 1978. Addabbo (D N.Y.) amendment to delete $1.5-billion from the bill for production of five B-1 bombers. Rejected 178-243: No. June 28, 1977.

362. HR 7933. Defense Department Appropriations, Fiscal 1978. Lloyd (D Calif.) amendment to procure 96 rather than the 144 A-10 attack planes recommended by the

administration and approved by the Appropriations Committee. Rejected 122-299: Yes. June 28, 1977.

363. HR 7932. Legislative Branch Appropriations, Fiscal 1978. Adoption of the rule (H Res 664) providing for House floor consideration of the bill to appropriate funds for the operation of the legislative branch for fiscal 1978. Adopted 279-139: Yes. June 29, 1977.

364. HR 7932. Legislative Branch Appropriations, Fiscal 1978. Grassley (R Iowa) amendment to prohibit use of funds appropriated in the bill to pay for the 29 per cent pay increase for high-level federal officials that took effect March 1, 1977. Rejected 181-241: No. June 29, 1977.

365. HR 7932. Legislative Branch Appropriations, Fiscal 1978. Mitchell (D Md.) amendment to provide $225,000 to operate the Joint Committee on Defense Production. Rejected 172-244: Yes. June 29, 1977.

366. HR 7932. Legislative Branch Appropriations, Fiscal 1978. Stratton (D N.Y.) amendment to delete $55-million for a proposed 22-foot extension of the West Front of the Capitol. Rejected 204-212: No. June 29, 1977.

367. HR 7932. Legislative Branch Appropriations, Fiscal 1978. Passage of the bill to appropriate $928,335,800 for fiscal 1978 operations of the legislative branch and related agencies and a fiscal 1977 supplemental appropriation of $10,919,400. Passed 250-161: Yes. June 29, 1977.

368. HR 7933. Defense Department Appropriations, Fiscal 1978. Mahon (D Texas) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to appropriate funds for operations and programs of the Department of Defense for fiscal 1978. Motion agreed to 399-1: Yes. June 30, 1977.

369. HR 7933. Defense Department Appropriations, Fiscal 1978. Edwards (R Ala.) amendment to delete $26-million for the development of a new engine for the Navy's F-14 fighter plane. Rejected 122-282: Yes. June 30, 1977.

370. HR 7933. Defense Department Appropriations, Fiscal 1978. Jenrette (D S.C.) amendment to delete language phasing out the use of Civil Service technicians in military reserve units. Adopted 288-119: No. June 30, 1977.

371. HR 7933. Defense Department Appropriations, Fiscal 1978. Gilman (R N.Y.) amendment to prohibit use of funds appropriated in the bill to conduct a review of the status of those U.S. military personnel still missing-in-action in Southeast Asia. Rejected 160-246: No. June 30, 1977.

372. HR 7933. Defense Department Appropriations, Fiscal 1978. Wilson (R Calif.) amendment to delete language requiring military retirees to forfeit their military pensions if they were hired during fiscal 1978 to work for the federal government. Adopted 219-174: No. June 30, 1977.

373. H.R. 7933. Defense Department Appropriations, Fiscal 1978. Passage of the bill to appropriate $110,097,296,000 for programs and operations of the Defense Department for fiscal 1978. Passed 333-54: Yes. June 30, 1977.

374. H.J. Res. 24. National Lupus Week. Lehman (D., Fla.) motion to suspend the rules and pass the joint resolution to designate Sept. 18-24, 1977, as National Lupus Week to draw attention to Lupus erythematosus, a chronic disease of the connective tissue between vital organs that affects 500,000 Americans. Motion agreed to, 297-3: Yes. July 11, 1977.

375. H.R. 2960. Constitution Gardens Memorial. Nedzi (D., Mich.) motion to suspend the rules and pass the bill to authorize the Interior Secretary to establish a memorial in Constitution Gardens on the Mall in Washington, D.C., to honor the 56 signers of the Declaration of Independence. Motion agreed to, 302-3: Yes. July 11, 1977.

376. H.R. 5023. Indian Claims Statute of Limitations. Adoption of the rule (H. Res. 642) to amend the U.S. Code to extend for four and a half years, to Dec. 31, 1981, the period in which the United States could litigate on behalf of Indians for damages accrued prior to July 18, 1966. Adopted, 299-0: Yes. July 11, 1977.

377. H.R. 7658. Disabled Veterans' Housing Assistance. Roberts (D., Texas) motion to suspend the rules and pass the bill to provide assistance to veterans with service-connected disabilities to acquire specially adapted housing. Motion agreed to, 403-0: Yes. July 12, 1977.

378. H.R. 7345. Veterans' and Survivors' Pensions. Roberts (D., Texas) motion to suspend the rules and pass the bill to provide a 7-percent cost-of-living increase in benefits for all veterans and eligible survivors and to provide an additional 25-percent increase to eligible widows, age 78 and over, of non-service-connected disabled veterans, effective Jan. 1, 1978. Motion agreed to, 403-0: Yes. July 12, 1977.

379. H.R. 5023. Indian Claims Statute of Limitations. Passage of the bill to extend for two years, until July 18, 1979, the statute of limitations under which the federal government could litigate on behalf of Indian tribes and individuals' claims for money damages that accrued before July 18, 1966. Passed, 331-69: No. July 12, 1977.

380. HR 5970. Defense Procurement Authorization. Adoption of the conference report on the bill to authorize $36,097,300,000 for the Defense Department for weapons procurement, military research and development and civil defense in fiscal 1978. Adopted 350-40: Yes. July 13, 1977.

381. HR 4963. Maritime Programs Authorization. McCloskey (R Calif.) amendment to prohibit use of federal maritime operating subsidies for shipment of U.S. grain to Russia. Rejected 143-251: No. July 13, 1977.

382. HR 4963. Maritime Programs Authorization. Passage of the bill to authorize $553,597,000 for fiscal year 1978 maritime programs. Passed 355-40: Yes. July 13, 1977.

383. HR 2777. National Consumer Cooperative Bank. Adoption of the rule (H Res 638) providing for House floor consideration of the bill to establish a national consumer cooperative bank with $500-million in federal seed money. Adopted 339-55: Yes. July 13, 1977.

384. HR 2777. National Consumer Cooperative Bank. St Germain (D R.I.) motion that the House resolve itself into the Committee of the Whole for consideration of the bill (HR 2777) to establish a national consumer cooperative bank. Motion agreed to 349-1: Yes. July 14, 1977.

385. HR 2777. National Consumer Cooperative Bank. La Falce (D N.Y.) substitute to establish an interagency task force to study consumer cooperatives and to provide $20-million for an experimental loan program for cooperatives. Rejected 170-228: No. July 14, 1977.

386. HR 2777. National Consumer Cooperative Bank. Rousselot (D Calif.) amendment to terminate the consumer cooperative bank on Dec. 31, 1982, and transfer authority for collecting payment of outstanding loans to a government agency. Adopted 203-196: No. July 14, 1977.

387. HR 2777. National Consumer Cooperative Bank. Passage of the bill to authorize $500-million in federal seed money for a bank to make loans to consumer cooperatives and $250-million for a Self-Help Development Fund to help inner-city residents start cooperatives. Passed 199-198: Yes. July 14, 1977.

388. H Res 658. House Select Intelligence Committee. Passage of the resolution to establish a permanent House Select Committee on Intelligence. Adopted 227-171: Yes. July 14, 1977.

389. HR 4287. Mine Safety. Adoption of the rule (H Res 682) providing for House floor consideration of the bill to toughen federal regulation of mine health and safety. Adopted 359-11; Announced yes. July 14, 1977.

390. HR 4287. Mine Safety. Gaydos (D Pa.) motion that the House resolve itself into the Committee of the Whole to consider the bill to toughen federal regulation of mine health and safety. Motion agreed to 298-3: Yes. July 15, 1977.

391. HR 4287. Mine Safety. Gudger (D N.C.) amendment, to the Sarasin (R Conn.) substitute amendment to delete provisions transferring authority over mine health and safety standards from the Interior Department to the Labor Department. Rejected 112-227: No. July 15, 1977.

392. HR 4287. Mine Safety. Sarasin (R Conn.) substitute amendment, for the committee bill, to strengthen health and safety standards for metal and nonmetal mines while retaining separate regulatory authority and procedures for coal and noncoal mines. Rejected 151-188: No. July 15, 1977.

393. HR 4287. Mine Safety. Andrews (D N.C.) amendment to continue federal/state arrangements that let states develop and enforce their own mine health and safety standards. Rejected 165-169: No. July 15, 1977.

394. HR 4287. Mine Safety. Passage of the bill to toughen mine health and safety standards and enforcement procedures by applying the same set of regulatory processes to both coal and noncoal mines and transferring administrative authority from the Interior Department to the Labor Department. Passed 244-88: Yes. July 15, 1977.

395. HR 6936. Federal Election Commission. Thompson (D N.J.) motion to suspend the rules and pass the bill to authorize $8,123,000 for the operations of the Federal Election Commission for fiscal year 1978. Motion agreed to 383-22: Announced yes. July 18, 1977.

396. H J Res 372. National Family Week. Lehman (D Fla.) motion to suspend the rules and adopt the joint resolution to authorize the President to proclaim Thanksgiving week in November as National Family Week each year. Motion agreed to 400-3: Announced yes. July 18, 1977.

397. HR 7012. Agricultural Census Amendments. Lehman (D Fla.) motion to suspend the rules and pass the bill to amend procedures proposed for the Agriculture Census of 1979 by reducing the number of questions by 40 per cent, redefining the term "farm" for census purposes and setting a firm date of publication of census findings. Motion agreed to 401-9: Yes. July 18, 1977.

398. HR 2387. Office of Management and Budget Salaries. Schroeder (D Colo.) motion to suspend the rules and pass the bill to upgrade the positions and salaries of the director and deputy director of the Office of Management and Budget to Cabinet-level and deputy secretary level, respectively. Motion rejected 253-158: Yes. July 18, 1977.

399. HR 6974. Federal Court Administration. Schroeder (D Colo.) motion to suspend the rules and pass the bill to increase by 15 the number of GS-16, GS-17 and GS-18 positions in the Administrative Office of the U.S. Courts. Motion rejected 189-224: Yes. July 18, 1977.

400. HR 6975. Administrative Law Judges. Schroeder (D Colo.) motion to suspend the

rules and pass the bill to increase the number of Civil Service hearing examiners at GS–16 level to 340, from 240, and to redesignate them as administrative law judges. Motion agreed to 284–131: Yes. July 18, 1977.

401. HR 4319. Federal Retirement Benefits. Spellman (D Md.) motion to suspend the rules and pass the bill to reduce from 12 years to 5 years the length of service required of a federal employee to be eligible to retain health and life insurance benefits during retirement. Motion agreed to 373–37: Yes. July 18, 1977.

402. HR 7557. Transportation Appropriations, Fiscal 1978. Adoption of the conference report on the bill to appropriate $14,340,105,000—including $6,196,609,023 in new budget authority—for the operations and programs of the Transportation Department and related agencies for fiscal year 1978. Adopted 397–14: Yes. July 18, 1977.

403. HR 7556. State, Justice, Commerce, Judiciary Appropriations, Fiscal 1978. Adoption of the conference report on the bill to appropriation $7,709,432,000 for fiscal 1978, plus $211,515,000 in supplemental funds for fiscal 1977 for operations and programs of the Departments of State, Justice and Commerce, the Judiciary and related agencies. Adopted 326–85: Yes. July 18, 1977.

404. HR 7554. HUD. Independent Agencies Appropriations, Fiscal 1978. Adoption of the conference report on the bill to appropriate $69,352,854,000 for fiscal 1978 operations and programs of the Department of Housing and Urban Development and various independent agencies, including the Veterans' Administration. Adopted 379–30. Yes. July 19, 1977.

405. HR 7554. HUD, Independent Agencies Appropriations, Fiscal 1978. Boland (D Mass) motion to retain the original House position excluding from the bill funds for a Jupiter Orbiter Probe. Rejected 131–280: No. July 19, 1977.

406. HR 7554. HUD, Independent Agencies Appropriations, Fiscal 1978, Boland (D Mass.) motion to retain the original House position withholding veterans' benefits to Vietnam-era servicemen who received upgraded discharges under President Carter's review program. Motion agreed to 251–160: No. July 19, 1977.

407. HR 4088. NASA Authorization. Adoption of the conference report to the bill to authorize $4 billion in fiscal 1978 for the operations and programs of the National Aeronautics and Space Administration. Adopted 379–29. Yes. July 19, 1977.

408. S. 1474. Military Construction Authorization. Adoption of the conference report on the bill to authorize $3,724,718,000 for new military construction projects of the Defense Department for fiscal 1978. Adopted 370–34: Yes. July 19, 1977.

409. HR 6138. Youth Jobs. Adoption of the conference report on the bill to authorize a series of new youth employment and training projects, including a year-round program to employ young adults in conservation-related jobs on public lands. Adopted 356–58: Yes. July 19, 1977.

410. HR 7171. 1977 Farm-Food Bill. Adoption of the rule (H. Res. 666) providing for House floor consideration of the bill to extend the major commodity programs for four years, the food stamp program for four years, the Food for Peace program for two years and to make other changes in conservation and agricultural research programs. Adopted 367–38: Yes. July 19, 1977.

411. Procedural Motion. Bauman (R Md.) motion to approve the House *Journal* of Tuesday, July 19, 1977. Motion agreed to 386–12: Yes. July 20, 1977.

412. HR 4746. Water Research Authorization. Adoption of the conference report on the bill to authorize $21,950,000 for fiscal 1978 for research on national water supply needs and on saline water conversion, and $40,000,000 for four demonstration plants. Adopted 401–1: Yes. July 20, 1977.

413. HR 4975. Health Assistance Programs Extension. Adoption of the conference report on the bill to extend for one year, through fiscal 1978, the federal health services, biomedical research and health planning and resources development programs at an authorization level of $3.4-billion. Adopted 401–6: Yes. July 20, 1977.

414. HR 7171. 1977 Farm-Food Bill. Findley (R Ill.), amendment to limit producers of wheat, feed grains, rice and upland cotton to $20,000 a year in federal farm subsidy payments through fiscal year 1981. Rejected 183–230: No. July 20, 1977.

415. HR 7171. 1977 Farm-Food Bill, Nolan (D Minn.) amendment to prohibit payment of federal farm subsidy payments to corporations or partnerships in which those holding majority interest were not engaged in farming operations as a sole proprietorship. Rejected 199–207: No. July 20, 1977.

416. HR 7933. Defense Department Appropriations, Fiscal 1978. Mahon (D Texas) motion to close to the public the House-Senate conference committee on the differing versions of the fiscal 1978 Defense Department appropriations bill at such times as classified national security information was under consideration, pursuant to House Rule 28, but to allow any member of Congress to attend any of the closed sessions. Motion agreed to 376–0: Announced Yes. July 21, 1977.

417. HR 6714. Foreign Economic Aid. Adoption of the conference report on the bill to authorize a total of $1,646,800,000 in fiscal 1978 for U.S. bilateral development assistance and to make changes in the Food for Peace (PL 480) program; the bill specifically prohibited any aid for Vietnam, Cambodia, Laos or Cuba. Adopted 254–158: Yes. July 21, 1977.

418. HR 6884. Foreign Military Aid. Adoption of the conference report on the bill to authorize a total of $3,195,900,000 for fiscal 1978 for U.S. foreign security and military assistance programs, including $677-million to finance sales of military equipment to foreign governments. Adopted 262–147: Yes. July 21, 1977.

419. HR 7171. 1977 Farm-Food Bill. Findley (R Ill.) substitute amendment, to the Fithian (D Ind.) amendment, to set a new limit on annual subsidy payments to sugar producers of $50,000. Rejected 167–241. No. July 21, 1977. (The Fithian amendment, setting the limit at $50,000 per person, subsequently was rejected by voice vote.)

420. HR 2. Strip Mining. Adoption of the conference report on the bill to set environmental protection performance standards for surface mining of coal, provide for regulation and enforcement, establish an abandoned mine reclamation fund and establish mining and mineral research institutes. Adopted 325–68: Yes. July 21, 1977.

421. HR 7171. 1977 Farm-Food Bill. Foley (D Wash.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to extend the major commodity and food stamp programs for four years and the Food for Peace (PL 480) program for two years and to amend conservation and research programs. Motion agreed to 352–4: Yes. July 22, 1977.

422. HR 7171. 1977 Farm-Food Bill. Rose (D N.C.) amendment to require a standard of quality for ice cream covering the weight and amount of milk solids and milk fat that must be included before the ice cream could be designated with the Department of Agriculture's seal of approval. Adopted 363–11: Yes. July 22, 1977.

423. HR 7171. 1977 Farm-Food Bill. Harkin (D Iowa) amendment. to the Foley (D Wash.) substitute amendment to the Weaver (D Ore.) amendment, to require the Agriculture Secretary to establish a grain reserve of up to 35 million tons, dependent upon voluntary farmer participation. Rejected 141–223: No. July 22, 1977. (The Foley substitute amendment, which made the reserve program discretionary with the Secretary, instead of mandatory as required by the Weaver amendment, subsequently was adopted by voice vote.)

424. HR 7553. Public Works-ERDA Appropriations, Fiscal 1978. Adoption of the conference report on the bill to appropriate a total of $10,294,414,000, including $6,781,004,000 in new budget authority for fiscal 1978 water and power public works programs of the Army Corps of Engineers the Interior Department and several independent agencies, and for most programs of the Energy Research and Development Administration (ERDA). Adopted 318–61: Yes. July 25, 1977.

425. HR 4544. Black Lung Benefits. Adoption of the rule (H Res 702) providing for House floor consideration of the bill to amend the Federal Coal Mine Health and Safety Act to provide black lung benefits to anthracite miners employed for 25 years, and their survivors, and bituminous miners employed for 30 years, and their survivors. Adopted 306–83: Yes. July 25, 1977.

426. HR 7932. Legislative Branch Appropriations, Fiscal 1978. Adoption of the conference report on the bill to appropriate a total of $990,067,800 in new budget authority for fiscal 1978 operations and programs for the legislative branch and related agencies. Adopted 252–152: Yes. July 26, 1977.

427. HR 7932. Legislative Branch Appropriations, Fiscal 1978. Mitchell (D Md.) motion that the House recede and concur with the Senate amendment to appropriate $225,000 for the activities of the Joint Committee on Defense Production. Rejected 160–250: Yes. July 26, 1977.

428. HR 7171. 1977 Farm-Food Bill. Heckler (R Mass.) amendment to reduce the price support for peanuts grown within a national quota based on weight to $390 per ton for the 1978 crop. $375 per ton for 1979, $360 per ton for 1980 and $345 per ton for 1981 and subsequent years, from the $420 a ton each year recommended in the committee bill. Rejected 207–210: No. July 26, 1977.

429. HR 7171. 1977 Farm-Food Bill. Whitely (D N.C.) substitute amendment, to the Johnson (R Colo.) amendment, to give priority to financing the sale of food and fiber commodities under Title I of the Food for Peace (PL 480) program. Adopted 260–151: Yes. July 26, 1977.

430. HR 7558. Agriculture Department Appropriations, Fiscal 1978. Adoption of the conference report on the bill to appropriate a total of $13,763,935,000 for fiscal 1978 for the operations and programs for the Agriculture Department and related agencies, including $12,749,378,000 in new budget authority. Adopted 377–33: Yes. July 27, 1977.

431. HR 7171. 1977 Farm-Food Bill. Foley (D Wash.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to extend the major commodity, food stamp and Food for Peace programs and to amend conservation and research programs. Motion agreed to 410–4: Yes. July 27, 1977.

432. HR 7171. 1977 Farm-Food Bill. Symms (R Idaho) amendment to prohibit use of food stamps to purchase non-nutritional foods as determined by the Food and Nutrition Board of the National Academy of Sciences-National Research Council. Rejected 185–227: No. July 27, 1977.

433. HR 7171. 1977 Farm-Food Bill. Latta (R Ohio) amendment, to the Mathis (D Ga.) amendments (see vote 434, below), to reduce to $5.6-billion the limit on food stamp program expenditures in fiscal 1978. Rejected 168–248: No. July 27, 1977.

434. HR 7171. 1977 Farm-Food Bill. Mathis (D Ga.) amendments, considered en bloc, to limit food stamp program expenditures to $5,847,600,000 in fiscal 1978, $6,158,900,000 in fiscal 1979, $6,188,600,000 in fiscal 1980 and $6,235,900,000 in fiscal 1981. Adopted 242–173: No. July 27, 1977.

435. HR 7171. 1977 Farm-Food Bill. Fenwick (R N.J.) amendment, to the Kelly (R Fla.) amendment to allow families of strikers with children under 16 to be eligible for food stamps. Rejected 152–266: No. July 27, 1977.

436. HR 7171. 1977 Farm-Food Bill. Fenwick (R N.J.) amendment, to the Kelly (R Fla.) amendment to allow families of strikers with children under 16, elderly or disabled dependents to be eligible for food stamps. Rejected 190–227: No. July 27, 1977.

437. HR 7171. 1977 Farm-Food Bill. Kelly (R Fla.) amendment, to the committee amendment, to eliminate from the food stamp program any household in which a member is on strike unless the household was eligible before the strike. The amendment would not apply to persons who refused to accept employment at a plant or site because of a strike or lockout. Rejected 170–249: No. July 27, 1977.

438. HR 7171. 1977 Farm-Food Bill. Symms (R Idaho) amendment, to the committee amendment, to require that recipients pay for a portion of their food stamp allotment. Rejected 102–317: No. July 27, 1977.

439. HR 7171. 1977 Farm-Food Bill. Jeffords (R Vt.) amendment, to the committee amendment, to require that food stamp households with adjusted gross incomes in excess of twice the poverty level return the excess, up to the amount of their food stamp allotment, to the government. Rejected 149–262: No. July 27, 1977.

440. HR 7171. 1977 Farm-Food Bill. Foley (D Wash.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to extend the major commodity, food stamp and Food for Peace programs and to amend conservation and research programs. Motion agreed to 386–4: Yes. July 28, 1977.

441. HR 7171. 1977 Farm Food Bill, Findley (R Ill.) amendment, to the committee amendment, to permit the Agriculture Secretary to implement an unlimited number of pilot projects in which work would have to be performed in return for food stamps. Rejected 159–255: No. July 28, 1977.

442. HR 7171. 1977 Farm-Food Bill. Foley (D Wash.) committee amendment, as amended, substituting the text of HR 7940 for Title XII of the bill and revising the food stamp program to provide free food stamps, simplifying eligibility determinations, tightening work requirements and cutting down on fraud and abuse. Adopted 320–91: Yes. July 28, 1977.

443. HR 7171. 1977 Farm-Food Bill. Wolff (D N.Y.) amendment to delete the provision in the bill to establish a wheat research and education program to be supported by an assessment on wheat processors (bakeries). Adopted 300–109: No. July 28, 1977.

444. HR 7171. 1977 Farm-Food Bill. De la Garza (D Texas) amendment to establish a price support program for sugar beet and cane producers at a price support level between 55 and 65 percent of parity. Adopted 246–165: Yes. July 28, 1977.

445. HR 7171. 1977 Farm-Food Bill. Nolan (D Minn.) amendment to provide support payments of up to 13.5 cents a pound for sugar crops not covered by the sugar subsidy plan approved in the Rep. de la Garza amendment. Rejected 173–238: Yes, July 28, 1977.

446. HR 7171. 1977 Farm-Food Bill. Findley (R Ill.) motion to recommit the bill to the Agriculture Committee with instructions to limit support payments for wheat, feed grains, cotton and rice to $30,000 a year through fiscal 1981. Rejected 201–210: No. July 28, 1977.

447. HR 7171. 1977 Farm-Food Bill. Passage of the bill to extend and increase support payments for wheat, feed grains, cotton and rice for four years, through fiscal 1981, to extend the federal food stamp program for four years with numerous changes, including elimination of the program's purchase requirement, to extend the Food for Peace (PL 480) program for two years, to amend the peanut support program, to expand agricultural research programs, to authorize the establishment of a grain reserve, and to make other changes in U.S. agricultural programs. Passed 294–114: Yes. July 28, 1977.

448. Procedural Motion. Bauman (R Md.) motion to approve the House *Journal* of Thursday, July 28, 1977. Motion agreed to 342–18: Yes. July 29, 1977.

449. H Con Res 317. Congressional Adjournment. Adoption of the concurrent resolution providing that upon adjournment of the House on Aug. 5, 1977, and the Senate on Aug. 6, 1977, they will reconvene at 12 noon, Sept. 7, 1977. Adopted 320–54: Yes. July 29, 1977.

450. H Res 661. House Administration. Adoption of the resolution to create two positions on the Capitol Police force: a general counsel to the chief of the Capitol Police and a deputy chief of the Capitol Police, and to increase the salary of the House chaplain. Adopted 383–2: Yes. July 29, 1977.

451. S J Res 77. HUD Insurance Programs. Adoption of the resolution to extend until Sept. 30, 1977, the authority of the Secretary of Housing and Urban Development to insure mortgages and set interest rates under certain Federal Housing Administration programs, to enter into new flood insurance contracts and to extend certain authorities under the Farmers Home Administration's rural housing program. Adopted 383–2: Yes. July 29, 1977.

452. HR 8444. National Energy Policy. Bolling (D Mo.) motion to order the previous question, thus ending debate on the rule (H Res 727) under which HR 8444, a bill to establish a comprehensive national energy policy, was considered. Motion agreed to 231–156: Yes. July 29, 1977.

453. HR 8444. National Energy Policy. Adoption of the rule (H Res 727) providing for House floor consideration of the bill to establish a comprehensive national energy policy. Adopted 238–148: Yes. July 29, 1977.

454. HR 8444. National Energy Policy. Pepper (D Fla.) motion to table, and thus kill, the Bolling (D Mo.) motion to reconsider the vote on the adoption of the rule (H Res 727) under which HR 8444, a bill to establish a comprehensive national energy policy, was considered. Motion agreed to 254–120: Yes. July 29, 1977.

455. HR 3744. Minimum Wage. Adoption of the rule (H Res 715) providing for House floor consideration of the bill to raise the minimum wage to $2.65 an hour from $2.30, with provision for automatic future adjustments, and to make other changes in the Fair Labor Standards Act. Adopted 331–44: Yes. July 29, 1977.

456. HR 8444. National Energy Policy. Ashley (D Ohio) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to establish a comprehensive national energy policy. Motion agreed to 365–12: Yes. Aug. 1, 1977.

457. S 826. Federal Energy Department. Adoption of the rule (H Res 731) providing for House floor consideration of the conference report on the bill to create a Cabinet-level Department of Energy by consolidating the functions of various federal agencies dealing with energy. Adopted 294–115: Yes. Aug. 2, 1977.

458. S 826. Federal Energy Department. Kindness (R Ohio) motion to recommit the conference report, and thus kill, the bill to create a federal Department of Energy. Motion rejected 157–257: No. Aug. 2, 1977.

459. S 826. Federal Energy Department. Adoption of the conference report on the bill to create a Cabinet-level Department of Federal Power Commission, the Federal Energy Administration, Energy Research and Development Administration and other energy functions scattered throughout the federal government. Adopted 353–57; Yes. Aug. 2, 1977.

460. HR 8444. National Energy Policy. Ad hoc energy committee amendment to part 1 of Title I of the bill to establish an energy conservation program by requiring states or the Federal Energy Administration to supply residential customers information on qualified home insulation installers and financing arrangements and to allow public utility companies to provide home insulation services. Adopted 217–205: Yes. Aug. 2, 1977.

461. HR 8444. National Energy Policy. Ad hoc energy committee amendment to require a one-year study by the Department of Transportation of the energy conservation potential of off-highway recreational vehicles, including airplanes and motorboats used for pleasure riding. Adopted 212–210: Yes. Aug. 2, 1977.

462. HR 8444. National Energy Policy. Ad hoc energy committee amendment to require a one-year study by the Department of Transportation of the energy conservation potential of bicycle use. Adopted 252–166: Yes. Aug. 2, 1977.

463. HR 8444. National Energy Policy. Ford (D Mich.) amendment to apply the Davis-Bacon Act to certain provisions so that workers employed in programs authorized by the bill to insulate schools, hospitals and public buildings be paid no less than wage rates prevailing in their area. Adopted 265–161: Yes. Aug. 2, 1977.

464. HR 8444. National Energy Policy. Ad hoc energy committee amendment to authorize $65-million through fiscal 1979 in federal grants to state and local governments to cover up to half the costs of identifying and installing energy conservation controls in local government buildings. Adopted 317–105: Yes. Aug. 2, 1977.

465. HR 7555. Labor-HEW Appropriations, Fiscal 1978. Adoption of the conference report on the bill to appropriate a total of $60,168,561,000 for fiscal 1978 for the operations and programs of the Labor Department and the Department of Health, Education and Welfare and related agencies. Adopted 337–82: Yes. Aug. 2, 1977.

466. HR 7555. Labor-HEW Appropriations, Fiscal 1978. Flood (D Pa.) motion to concur in a Senate-passed amendment relating to abortion with an amendment to bar the use of any funds appropriated in the bill for abortions, except where the life of the mother would be endangered by continuing the pregnancy. Motion agreed to 238–182: No. Aug. 2, 1977.

467. HR 8444. National Energy Policy. Bolling (D Mo.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to establish a comprehensive national energy policy. Motion agreed to 404–5: Yes. Aug. 3, 1977.

468. HR 8444. National Energy Policy. Brown (R Ohio) amendment to end federal controls on the price of new onshore natural gas retroactive to April 20, 1977, and on new offshore natural gas beginning April 20, 1982, and to extend the Emergency Natural

Gas Act of 1977 for three years. Rejected 199–227: No. Aug. 3, 1977.

469. HR 8444. National Energy Policy. Flowers (D Ala.) amendment to delete provisions in the bill that would have extended antitrust review to utilities building new facilities. Adopted 257–160: Yes. Aug. 3, 1977.

470. HR 8444. National Energy Policy. Horton (R N.Y.) amendment to delete provisions in the bill authorizing $75-million for purchase of 6,000 vans for a van-pooling program for federal workers. Adopted 232–184: No. Aug. 3, 1977.

471. HR 8444. National Energy Policy. Bolling (D Mo.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to establish a comprehensive national energy policy. Motion agreed to 378–3: Yes. Aug. 4, 1977.

472. HR 8444. National Energy Policy. Howard (D N.J.) substitute amendment, to the ad hoc energy committee amendment to increase the federal gasoline tax by 5 cents, effective Jan. 1, 1979, with half the revenue going to support mass transit programs and half toward repair of the nation's bridges and highways. Rejected 82–339: No. Aug. 4, 1977.

473. HR 8444. National Energy Policy. Ad hoc energy committee amendment to increase the federal gasoline tax by 4 cents with revenues to support programs for research, mass transit and state highways. Rejected 52–370: No. Aug. 4, 1977.

474. HR 8444. National Energy Policy. Jones (D Okla.) amendment to return to oil and gas producers money derived from the proposed crude oil equalization tax in order to provide an incentive for increased energy production. Rejected 198–223· No. Aug. 4, 1977.

475. HR 8444. National Energy Policy. Waggonner (D La.) amendment to use 1978 revenues from the proposed crude oil equalization tax to supplement the Social Security trust fund system rather than for rebates to individual taxpayers. Rejected 190–226: Yes. Aug. 4, 1977.

476. H Res 729. House Intelligence Committee. Adoption of the resolution providing $302,499 for the operations and investigations of the House Permanent Select Intelligence Committee—established by the House July 14—for the remainder of calendar year 1977. Adopted 342–10: Yes. Aug. 5, 1977.

477. HR 8444. National Energy Policy Conable (R N.Y.) amendment to cut general income taxes in proportion to 1978 revenue received from the proposed crude oil equalization tax (the bill would have rebated the revenue from the tax to individual taxpayers). Rejected 175–232: No. Aug. 5, 1977.

478. HR 8444. National Energy Policy. Ad hoc committee on energy amendment to delete from the bill a provision that automatically exempted new plants from having to pay the proposed oil and gas users taxes if such plants were exempted from regulatory orders prohibiting use of those fuels. Adopted 221–198: Yes. Aug. 5, 1977.

479. HR 8444. National Energy Policy. Anderson (R Ill.) amendment to substitute for the bill a series of energy proposals agreed upon by Republican members of the ad hoc committee on energy. Rejected 147–273: No. Aug. 5, 1977.

480. HR 8444. National Energy Policy. Horton (R N.Y.) amendment to reaffirm an earlier vote deleting provisions in the bill authorizing $75 million for the purchase of 6,000 vans for a van-pooling program for federal workers. Adopted 239–180: No. Aug. 5, 1977.

481. HR 8444. National Energy Policy. Steiger (R Wis.) motion to recommit the bill to the ad hoc committee on energy with instructions to report it with an amendment deleting the proposed crude oil equalization tax. Motion to recommit rejected 203–219: No. Aug. 5, 1977.

482. HR 8444. National Energy Policy. Passage of the bill to establish a comprehensive national energy policy. Passed 244–177: Yes. Aug. 5, 1977.

483. HR 7933. Defense Department Appropriations, Fiscal 1978. Adoption of the conference report to appropriate $111,184,166,000 for programs and operations of the Department of Defense in fiscal 1978, including $1.4 billion for production of five B–1 bombers. Adopted 361–36: Yes. Sept. 8, 1977.

484. HR 7933. Defense Department Appropriations, Fiscal 1978. Addabbo (D N.Y.) amendment, to the Mahon (D Texas) motion, to recede and concur with the Senate amendment to delete $1.4-billion for the production of five B–1 bombers. Adopted 202–199: Yes. Sept. 8, 1977.

485. H Con Res 341. Fiscal 1978 Budget Levels. Rousselot (R Calif.) substitute to H Con Res 341 to set fiscal 1978 budget authority of $446.8-billion, outlays of $406.6-billion, revenues of $406.6-billion and a zero deficit. Rejected 169–230: No. Sept. 8, 1977.

486. H Con Res 341. Fiscal 1978 Budget Levels. Coughlin (R Pa.) amendment to reduce revenues by $175-million to provide for tax credits of up to $250 per year taken against tuition of full-time college and vocational school students. Adopted 311–76; Announced yes. Sept. 8, 1977.

487. H Con Res 341. Fiscal 1978 Budget Levels. Caputo (R N.Y.) amendment to reduce budget authority by $109-million and outlays by $108-million for the purpose of reducing U.S. food commodity support programs for South Korea. Rejected 181–205: No. Sept. 8, 1977.

488. H Con Res 341. Fiscal 1978 Budget Levels. Jacobs (D Ind.) amendment to reduce budget authority by $144-million and outlays by $110-million for the purpose of reducing U.S. military and economic assistance programs for South Korea. Rejected 120–268: No. Sept. 8, 1977.

489. H Con Res 341. Fiscal 1978 Budget Targets. Adoption of the budget resolution setting binding levels of budget authority of $508-billion, outlays of $459.5-billion, revenues of $397.9-billion and a deficit of $61.6-billion. Adopted 199–188: Yes. Sept. 8, 1977.

490. HR 6566. ERDA Authorization: Military Programs. Adoption of the rule (H Res 640) providing for House floor consideration of the bill to authorize $2.6-billion for the Energy Research and Development Administration's military programs for fiscal 1978. Adopted 348–0: Yes. Sept. 9, 1977.

491. HR 6796. ERDA Authorization: Non-Nuclear Programs. Adoption of the rule (H Res 657) providing for House floor consideration of the bill to authorize $6.7-billion for nonnuclear programs of the Energy Research and Development Administration for fiscal 1978. Adopted 338–14: Yes. Sept. 9, 1977.

492. HR 2176. Audit of Federal Banking Agencies. Adoption of the rule (H. Res. 728) providing for House floor consideration of the bill to authorize audits of the Federal Reserve Board, the Federal Reserve banks, the Federal Deposit Insurance Corp. and the Office of the Comptroller of the Currency. Adopted 312–47. Yes. Sept. 9, 1977.

493. HR 5383. Mandatory Retirement Age. Adoption of the rule (H. Res. 738) providing for House floor consideration of the bill to amend the Age Discrimination in Employment Act of 1967 to raise the mandatory retirement age to 70, from 65. Adopted 362–0. Announced yes. Sept. 9, 1977.

494. HR 6683. Earthquake Hazards. Adoption of the rule (H. Res. 639) providing for House floor consideration of the bill to establish a national earthquake hazards reduction program. Adopted 350–3. Yes. Sept. 9, 1977.

495. HR 6669. National Climate Program. Adoption of the rule (H. Res. 641) providing for House floor consideration of the bill to authorize $50 million to establish a national climate program to respond more effectively to climate-induced problems. Adopted 348–2. Yes. Sept. 9, 1977.

496. HR 6683. Earthquake Hazards. Passage of the bill to authorize the President to designate a federal agency responsible for a multi-agency, national earthquake hazards reduction program, and to provide $210-million for fiscal 1978–80 for scientific and engineering research on earthquake prediction ($102.5-million for the National Science Foundation, $102.5-million for the U.S. Geological Survey, and $5-million for general purposes). Passed 229–125. Yes. Sept. 9, 1977.

497. H.R. 6669. National Climate Program. Passage of the bill to authorize $50-million in fiscal 1978 to establish a federal National Climate Program Office to develop a climate prediction program to enable federal agencies to make long-range plans to cope with climate-induced problems. Passed 282–60. Announced yes. Sept. 9, 1977.

498. HR 3455. Nuclear Regulatory Commission. Udall (D., Ariz.) motion to suspend the rules and pass the bill to authorize $301,950,000 in fiscal 1978 funds for activities of the Nuclear Regulatory Commission. Motion agreed to 396–2. Yes. Sept. 12, 1977.

499. HR 3454. Wilderness Preservation. Roncalio (D., Wyo.) motion to suspend the rules and pass the bill to add 1,170,372 acres from 16 national forest areas in eight western states to the national wilderness preservation system. Motion agreed to 380–18. Yes. Sept. 12, 1977.

500. HR 8698. Veterans' Benefits for Upgraded Discharges. Roberts (D Texas) motion to suspend the rules and pass the bill to establish conditions under which Vietnam-era veterans whose discharges were upgraded under President Carter's special review program could receive benefits. Motion agreed to 321–75: Yes. Sept. 12, 1977.

501. HR 8701. Veterans' Education Benefits. Roberts (D Texas) motion to suspend the rules and pass the bill to provide a 6.6 per cent increase in veterans' education benefits. Motion agreed to 397–0: Yes. Sept. 12, 1977.

502. HR 8175. Veterans Administration Physician and Dentist Comparability Act Extension. Teague (D Texas) motion to suspend the rules and pass the bill to extend for one year, until Sept. 30, 1978, authority to grant incentive pay to certain Veterans Administration physicians and dentists. Motion agreed to 397–1: Yes. Sept. 12, 1977.

503. HR 4341. Elimination of Veterans' Mobile Homes Inspections. Teague (D Texas) motion to suspend the rules and pass the bill to eliminate inspections by the Veterans Administration (VA) of mobile homes purchased with VA-guaranteed loans and of the plants in which they were manufactured. Motion agreed to 394–1: Yes. Sept. 12, 1977.

504. HR 6803. Oil Pollution Liability and Compensation. Murphy (D N.Y.) motion to suspend the rules and pass the bill to increase the liability of those who cause oil spills, and to set up a $200-million fund to pay for oil spill cleanup and damages. Motion agreed to 332–59: Yes. Sept. 12, 1977.

505. HR 3702. Military Retirees Survivor Benefits. Stratton (D N.Y.) motion to suspend the rules and pass the bill to make various changes in the benefit programs for survivors of military retirees. Motion agreed to 391–0: Yes. Sept. 12, 1977.

506. H Con Res 341. Fiscal 1978 Budget Levels. Giaimo (D Conn.) motion to recede and concur with a Senate amendment to set binding fiscal 1978 budget levels of budget authority of $500.1-billion, outlays of $458.25-billion, revenues of $397-billion, a deficit of $61.25-billion and a public debt of $775.45-billion. Motion agreed to 215–187: Yes. Sept. 15, 1977.

507. HR 3744. Minimum Wage. Erlenborn (R Ill.) amendment to delete procedures in the bill for automatic adjustment, or "indexing," of the minimum wage and to substitute a three-step increase from the current level of $2.30 an hour to $2.65 on Jan. 1, 1978, to

$2.85 on Jan. 1, 1979, and to $3.05 on Jan. 1, 1980. Adopted 223–193: Yes. Sept. 15, 1977.

508. HR 3744. Minimum Wage. Perkins (D Ky.) and Tucker (D Ark.) amendment to establish a nine-member commission to study indexing the minimum wage and other issues. Adopted 301–118: Yes. Sept. 15, 1977.

509. HR 3744. Minimum Wage. Phillip Burton (D Calif.) amendment to increase the minimum wage from the current level of $2.30 an hour to $2.65 on Jan. 1, 1978, and to establish a temporary indexing mechanism to automatically adjust the minimum each year through 1983. Rejected 189–227: No. Sept. 15, 1977.

510. HR 3744. Minimum Wage. Quie (R Minn.) amendment to delete provisions reducing the "tip credit," which would have required employers to pay a higher base wage to workers who earned tips. (The effect was to retain current procedures for offseting tip earnings against 50 per cent of the minimum wage.) Adopted 264–161: No. Sept. 15, 1977.

511. HR 3744. Minimum Wage. Milford (D Texas) amendment to retain existing minimum wage and overtime exemptions for employees at seasonal amusement parks. Adopted 241–183: No. Sept. 15. 1977.

512. HR 3744. Minimum Wage. Cornell (D Wis.) amendment to permit employers to pay only 85 per cent of the minimum wage to young workers under age 18 during their first six months on a job. Rejected 210–211: No. Sept. 15. 1977.

513. HR 3744. Minimum Wage. Meeds (D Wash.) amendment to waive minimum wage requirements for children under age 12 who manually harvested crops during the summer. Adopted 282–132: R 122–17: Yes. Sept. 15, 1977.

514. HR 3744. Minimum Wage. Ashbrook (R Ohio) amendment, to the Blouin (D Iowa) amendment to broaden the minimum wage and overtime exemption for small retail and service firms to include other types of businesses and to raise, to $500,000 from $250,000, the dollar volume cutoff applied to the exemption. Rejected 118–289: No. Sept. 15, 1977.

515. HR 3744. Minimum Wage. Pickle (D Texas) substitute amendment, to the Blouin (D Iowa) amendment, to raise the dollar sales cutoff, to $500,000 from $250,000, that exempted small retail and service enterprises from minimum wage and overtime requirements. Adopted 221–183: No. Sept. 15, 1977.

516. HR 3744. Minimum Wage. Passage of the bill to raise the minimum wage from $2.30 an hour to $2.65 on Jan. 1, 1978, to $2.85 on Jan. 1, 1979, to $3.05 on Jan. 1, 1980, and make other changes in minimum wage and overtime coverage. Passed 309–96: Yes. Sept. 15, 1977.

517. S. 275. 1977 Farm-Food Bill. Adoption of the conference report on the bill to extend and increase support payments for wheat, feed grains, cotton and rice for four years, through fiscal 1981; to extend the food stamp program for four years and to eliminate the program's payment requirement; to extend the Food for Peace (PL 480) program for four years; to establish a new sugar subsidy program; to amend the peanut support program; to expand agricultural research programs; and to authorize the establishment of a grain reserve. Adopted (and thus completing congressional action) 283–107: Yes. Sept. 16, 1977.

518. HR 5262. International Financial Institutions. Adoption of the conference report on the bill to authorize $5.1-billion for the International Bank for Reconstruction and Development (World Bank) and five other international institutions, and instruct U.S. officials to vote against loan applications when other efforts failed to guarantee that recipient nations were observing basic human rights standards. Rejected 153–230: Yes. Sept. 16, 1977.

519. HR 9005. District of Columbia Appropriations, Fiscal 1978. Passage of the bill to appropriate $436,466,000 in federal funds and $1,401,622,700 in local funds for the District of Columbia in fiscal 1978. Passed 298–64: Yes. Sept. 16, 1977.

520. HR 4544. Black Lung Benefits. Erlenborn (R Ill.) substitute amendment, for the Thompson (D N.J.) substitute amendment for the committee bill, to shift responsibility for new black lung claims to state worker compensation programs one year after enactment. Rejected 108–268: No. Sept. 19, 1977.

521. HR 4544. Black Lung Benefits. Erlenborn (R Ill.) amendment, to the Thompson (D N.J.) substitute amendment for the committee bill, to delete provisions in the substitute bill reducing the payments for workers' compensation that could be offset against black lung benefits. Rejected 106–268: No. Sept. 19, 1977.

522. HR 4544. Black Lung Benefits. Erlenborn (R Ill.) amendment, to the Thompson (D N.J.) substitute amendment for the committee bill, to delete provisions prohibiting the federal government from re-reading X-rays submitted by black lung claimants. Rejected 136–242: No. Sept. 19, 1977.

523. HR 4544. Black Lung Benefits. Passage of the bill to liberalize the black lung benefits program and shift more of the costs from the federal government to the coal industry. Passed 283–100: Yes. Sept. 19, 1977.

524. HR 8655. Temporary Debt Limit Increase. Adoption of the resolution (H Res 764) providing for House floor consideration of the bill to raise the temporary debt limit to $775-billion through Sept. 30, 1978. Passed 284–96: Yes. Sept. 19, 1977.

525. HR 8655. Temporary Debt Limit Increase. Passage of the bill to raise the temporary debt limit to $775-billion through Sept. 30, 1978. Rejected 180–201: announced Yes. Sept. 19, 1977.

526. Procedural Motion. Rousselot (R Calif.) motion to approve the House *Journal* of Monday, Sept. 19, 1977. Motion agreed to 383–17. Yes. Sept. 20, 1977.

527. H Res 687. District Office Space. Adoption of the resolution to increase the rental allowance for district office space for House members from 1,500 square feet to 2,500 square feet, effective Jan. 3, 1978. Adopted 215–193: Yes. Sept. 20, 1977.

528. HR 6796. ERDA Authorization, Civilian Research and Development. Brown (D Calif.) substitute amendment, to the Dodd (D Conn.) amendment to authorize $33-million, instead of the $150-million in the bill, for construction of the Clinch River Breeder Reactor Project. Rejected 162–246: No. Sept. 20, 1977.

529. HR 6796. ERDA Authorization, Civilian Research and Development. Dodd (D Conn.) amendment to authorize $75-million, instead of the $150-million in the bill, for construction of the Clinch River Breeder Reactor Project. Rejected 129–277: No. Sept. 20, 1977.

530. HR 3. Medicare-Medicaid Fraud. Adoption of the rule (H Res 743) providing for House floor consideration of the bill to control fraud and abuse in the Medicare-Medicaid programs by strengthening penalties and requiring suspension of practitioners convicted of criminal offenses related to the programs. Adopted 374–6: Yes. Sept. 21, 1977.

531. HR 8368. Nuclear Non-Proliferation. Adoption of the rule (H Res 767) providing for House floor consideration of the bill to strengthen controls on the export of nuclear fuels and technology. Adopted 388–0: Yes. Sept. 21, 1977.

532. HR 7073. Pesticide Regulation. Adoption of the rule (H Res 620) providing for House floor consideration of the bill to extend the 1972 Federal Insecticide, Fungicide and Rodenticide Act through fiscal 1978 and to authorize $95,936,000 for fiscal 1977–78. Adopted 383–10: Yes. Sept. 21, 1977.

533. HR 6796. ERDA Authorization, Civilian Research and Development. Teague (D Texas) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to authorize appropriations for the Energy Research and Development Administration. Motion agreed to 390–1: Yes. Sept. 21, 1977.

534. HR 6796. ERDA Authorization, Civilian Research and Development. Coughlin (R Pa.) amendment to place limitations on the percentage of the federal contribution for paying cost overruns that increased the total cost of the Clinch River liquid metal fast breeder reactor project by more than $2-billion and to require private utilities participating in the breeder demonstration plant construction project to bear a portion of further overruns beyond existing cost projections, with the utilities' share reaching 50 per cent for costs of more than $2.5-billion. Rejected 196–206: No. Sept. 21, 1977.

535. HR 6796. ERDA Authorization, Civilian Research and Development. Tsongas (D Mass.) amendment to authorize $28-million for federal purchase of solar photovoltaic systems and to initiate studies on increasing their use to help meet the nation's energy needs. Adopted 227–179: No. Sept. 21, 1977.

536. Procedural Motion. Michel (R Ill.) motion to approve the House *Journal* of Wednesday, Sept. 21, 1977. Motion agreed to 283–6: Announced yes. Sept. 22, 1977.

537. Procedural Motion. Ashbrook (R Ohio) motion to approve the House *Journal* of Thursday, Sept. 22, 1977. Motion agreed to 332–14: Yes. Sept. 23, 1977.

538. HR 6796. ERDA Authorization, Civilian Research and Development. Passage of the bill to authorize $6.6-billion in federal civilian energy research and development programs for fiscal 1978. Passed 317–47: Yes. Sept. 23, 1977.

539. HR 3. Medicare-Medicaid Fraud. Passage of the bill to control fraud and abuse in the Medicare and Medicaid programs by establishing stricter penalties, strengthening oversight by local medical review organizations, requiring greater disclosure of information from medical institutions and making other administrative changes. Passed 362–5: Yes. Sept. 23, 1977.

540. HR 5383. Mandatory Retirement Age. Passage of the bill to raise to 70, from 65, the upper age limit for protection of non-Federal workers from age-based discriminatory practices, including mandatory retirement, and to eliminate the upper limit for most civilian federal employees. Passed 359–4: Yes. Sept. 23, 1977.

541. HR 6536. D.C. Retirement Reform Act. Passage of the bill to overhaul the retirement fund programs for District of Columbia public employees, to establish separate retirement programs for police, firemen, teachers and judges, to establish a retirement board to manage the funds and to provide for federal payments into the funds to help finance retirement benefits enacted and administered by Congress before home rule took effect on Jan. 2, 1975. Passed 348–21: Yes. Sept. 26, 1977.

542. S 1060. George Washington University Charter. Passage of the bill to consolidate the amended charter for George Washington University into a new document. Passed 363–4: Yes. Sept. 26, 1977.

543. S 1322. D.C. Public Works. Passage of the bill to revise the basis for estimating the annual federal payment to the District of Columbia for water and sanitary sewer services in an effort to speed the federal payment. Passed 375–1: Yes. Sept. 26, 1977.

544. HR 6530. D.C. Self-Government and Reorganization. Bauman (R Md.) amendment to prohibit use of loan authority for the District of Columbia to be used for site acquisition or construction of a city civic

center without prior legislative authorization by Congress. Rejected 187–196: No. Sept. 26, 1977.

545. HR 6530. D.C. Borrowing Authority. Passage of the bill to provide the District of Columbia temporary authority to borrow from the U.S. Treasury to help finance capital works and related projects. Passed 266–119: Yes. Sept. 26, 1977.

546. HR 7747. D.C. Code-Pretrial Detention. Coleman (R Mo.) amendment to amend the District of Columbia code to provide for the pretrial detention of individuals arrested for armed robbery as well as murder and forcible rape. Adopted 346–43: Yes. Sept. 26, 1977.

547. HR 6693. Child Abuse Prevention. Brademas (D Ind.) motion to suspend the rules and pass the bill to extend the Child Abuse Prevention and Treatment Act for five years, strengthen the protective and treatment services available to abused children and to their families and authorize $142.5-million to carry out the programs. Motion agreed to 375–12: Yes. Sept. 26, 1977.

548. H Con Res 277. Saturday Mail. Wilson, C. H. (D Calif.) motion to suspend the rules and adopt the resolution providing that the U.S. Postal Service was not to reduce the frequency of mail delivery below that in effect June 1, 1977. Motion agreed to 377–9: Yes. Sept. 26, 1977.

549. HR 6224. Indian Claims. Cohen (R Maine) demand for a seconding motion on the Roncalio (D Wyo.) motion to suspend the rules and pass the bill to direct the U.S. Court of Claims to review an 1877 congressional action that took land from the Great Sioux Reservation. Cohen request agreed to 376–19: Yes. Sept. 27, 1977.

550. HR 7555. Labor-HEW Appropriations, Fiscal 1978. Stokes (D Ohio) motion to suspend the rules and pass the resolution (H Res 780) to instruct House conferees to agree to a Senate-passed amendment barring the use of federal funds for abortion except where the mother's life was endangered or where medically necessary, or in cases of rape or incest. Rejected 164–252: Yes. Sept. 27, 1977.

551. HR 7769. Indochina Refugees. Eilberg (D Pa.) motion to suspend the rules and pass the bill to admit for permanent residence certain refugees from Vietnam, Laos and Cambodia. Motion agreed to 390–22: Yes. Sept. 27, 1977.

552. HR 9278. Staff Allowances for Former Presidents. Udall (D Ariz.) motion to suspend the rules and pass the bill to increase the authorization for funds for staff of former Presidents. Motion rejected 211–203: Yes. Sept. 27, 1977.

553. HR 2664. Indian Claims. Roncalio (D Wyo.) motion to suspend the rules and pass the bill to direct the U.S. Court of Claims to review the 1974 decision of the Indian Claims Commission that the United States illegally confiscated in 1877 from the Sioux Indian 7.4 million acres of land in the Black Hills. Motion rejected 173–239: No. Sept. 27, 1977.

554. S 393. Montana Wilderness Study. Roncalio (D Wyo.) motion to suspend the rules and pass the bill to direct the Secretary of Agriculture to study nine areas totaling 973,000 acres within national forests in Montana to determine their suitability for potential addition to the National Wilderness Preservation System. Motion rejected 256–155: No. Sept. 27, 1977.

555. S 213. GAO Audits. Rosenthal (D N.Y.) motion to suspend the rules and pass the bill to authorize the General Accounting Office (GAO) to conduct independent audits of the Internal Revenue Service and the Bureau of Alcohol, Tobacco and Firearms of the Treasury Department. Motion agreed to 402–5: Yes. Sept. 27, 1977.

556. H Res 70. House Select Committee on Population. Adoption of the resolution to establish a select committee of the House to make a study during the 95th Congress of the causes and effects of changes in world population and of U.S. options on global population policies. Adopted 258–147: No. Sept. 28, 1977.

557. H Res 760. House Select Committee on Assassinations. Adoption of the resolution (H Res 760) authorizing the committee to subpoena testimony and to grant immunity from prosecution to witnesses testifying in the committee's investigations into the assassinations of President John F. Kennedy and Martin Luther King Jr. Adopted 290–112: Yes. Sept. 28, 1977.

558. HR 9290. Temporary Debt Limit Increase. Adoption of the rule (H Res 781) providing for House floor consideration of the bill to raise the temporary debt limit to $773-billion through Sept. 30, 1978. Passed 312–96: Yes. Sept. 28, 1977.

559. HR 9290. Temporary Debt Limit Increase. Passage of the bill to raise the temporary debt limit to $733-billion through Sept. 30, 1978. Passed 213–202: Yes. Sept. 28, 1977.

560. HR 8638. Nuclear Non-Proliferation. Passage of the bill to strengthen controls on the export of nuclear fuels and technology. Passed 411–0: Yes. Sept. 28, 1977.

561. HR 6566. ERDA Authorization—Military Programs. Charles Wilson (D Calif.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill. Motion agreed to 361–7: Announced yes. Sept. 23, 1977.

562. HR 6566. ERDA Authorization—Military Programs. Weiss (D N.Y.) amendment to prohibit the use of appropriated funds for development or production of enhanced radiation weapons—"neutron bombs." Rejected 109–297: No. Sept. 29, 1977.

563. HR 6566. ERDA Authorization—Military Programs. Passage of the bill to authorize $2,674,650,000 for military-related activities of the Energy Research and Development Administration for fiscal 1978. Passed 330–78: Yes. Sept. 29, 1977.

564. HR 9019. Fiscal 1977 Rescission. Passage of the bill to rescind $96.1-million in budget authority, contained in a message of President Carter of July 19, 1977, as follows: $21.1-million in foreign military credit sales and $75-million in the General Services Administration (GSA) federal building fund. Passed 403–1: Yes. Sept. 29, 1977.

565. HR 7010. Victims of Crime. Mann (D S.C.) motion that the House resolve itself into the Committee of the Whole for consideration of the bill to authorize federal grants to states to help support programs of aid to victims of crime. Adopted 377–17: Yes. Sept. 29, 1977.

566. HR 7010. Victims of Crime. Railsback (R Ill.) substitute, for the committee bill, to 1) make the legislation applicable only to persons 62 years of age or older; 2) require states to have offender restitution programs in order to get federal funds; and 3) make compensation available for stolen or damaged "items of necessity" rather than only for personal injuries as provided in the committee bill. Rejected 133–253: Yes. Sept. 29, 1977.

567. Procedural Motion. Ashbrook (R Ohio) motion to approve the House *Journal* of Thursday, Sept. 29, 1977. Motion agreed to 317–11: Yes. Sept. 30, 1977.

568. HR 7010. Victims of Crime. Wiggins (R Calif.) amendment to lower the federal contribution to state compensation programs for victims of crime to 25 per cent, from 50 per cent, of the awards paid by the state. Adopted 216–144: Yes. Sept. 30, 1977.

569. HR 7010. Victims of Crime. Butler (R Va.) amendment to require that states participating in the program established under the bill require anyone paying a person charged with a crime for an interview, article or account relating to his crime to pay the proceeds of such interview or article into escrow to be held for the benefit of the criminal's victim upon the individual's conviction. Adopted 245–113: Yes. Sept. 30, 1977.

570. HR 7010. Victims of Crime. Passage of the bill to establish a federal program to reimburse up to 25 per cent of the awards paid by states to victims of violent crime for their medical expenses and losses of pay due to absence from work arising from the crime. Passed 192–173: Yes. Sept. 30, 1977.

571. HR 9354. Staff Allowances for Former Presidents. Passage of the bill to increase the authorization for funds for staff of former Presidents in the 30-month period immediately following expiration of Transition Act funds to $150,000 per year from the existing level of $96,000 per year. Passed 262–95: Yes. Oct. 3, 1977.

572. HR 6951. Wage-Price Council. Levitas (D Ga.) amendment to direct the President to present a plan to Congress that would transfer the functions of the Council on Wage and Price Stability to other federal agencies, in effect abolishing the council. Rejected 178–215: Announced no. Oct. 3, 1977.

573. HR 6951. Wage-Price Council. Passage of the bill to extend the authority of the Council on Wage and Price Stability through Sept. 30, 1979. Adopted 251–145: Yes. Oct. 3, 1977.

574. HR 9290. Temporary Debt Limit Increase. Adoption of the rule (H Res 804) concurring in the Senate amendments to the bill to raise the temporary debt limit to $752-billion through March 1, 1978. Adopted 223–194: Yes. Oct. 4, 1977.

575. HR 8410. Labor Law Revision. Bolling (D Mo.) motion to order the previous question on the rule (H Res 799) providing for House floor consideration of the bill to amend the National Labor Relations Act. Adopted 267–152: Yes. Oct. 4, 1977.

576. HR 8410. Labor Law Revision. Adoption of the rule (H Res 799) providing for House floor consideration of the bill to amend the National Labor Relations Act. Adopted 291–128: Yes. Oct. 4, 1977.

577. HR 6655. Housing and Community Development. Adoption of the conference report on the bill to authorize $12.45-billion for the community development block grant program for fiscal years 1978–80 and more than $2-billion for federally assisted public and rural housing; to continue Federal Housing Administration mortgage programs and the federal flood insurance program; and to encourage financial institutions to invest in their communities. Passed 384–26: announced yes. Oct. 4, 1977.

578. HR 8410. Labor Law Revision. Thompson (D N.J.) motion that the House resolve itself into the Committee of the Whole for the consideration of the bill to amend the National Labor Relations Act. Motion agreed to 384–5: announced yes. Oct. 5, 1977.

579. HR 8410. Labor Law Revision. Erlenborn (R Ill.) amendment to delete from the bill language providing that if management addresses employees on company premises or during working time on issues relating to union representation, unions must be granted equal access to employees at the workplace. Rejected 168–247: announced no. Oct. 5, 1977.

580. HR 8410. Labor Law Revision. Ashbrook (R Ohio) amendment, as amended by the Ford (D Mich.) substitute to make the equal access provisions of the bill applicable to all elections under the act and to provide employers an equivalent opportunity to address employees at the union hall or at related gatherings. Adopted 408–8: Yes. Oct. 5, 1977.

581. HR 8410. Labor Law Revision. Ashbrook (R Ohio) amendment to permit judicial review of National Labor Relations Board rules even in the U.S. Court of Appeals of the judicial circuit in which the petitioner resides or in the District of Co-

lumbia circuit. Adopted 246–174: No. Oct. 5, 1977.

582. HR 8410. Labor Law Revision. Erlenborn (R Ill.) amendment, to the Cornell (D Wis.) substitute to the Quie (R Minn.) amendment to extend election deadlines and give the National Labor Relations Board greater flexibility in determining the timetable. Rejected 185–229: No. Oct. 5, 1977.

583 HR 8410. Labor Law Revision. Quie (R Minn.) amendment, as amended by the Cornell (D Wis.) amendment, to require the National Labor Relations Board to follow a fixed timetable for conducting union elections, with deadlines ranging from 25 days for routine cases to 75 days for complex ones. Adopted 418–0: Yes. Oct. 5, 1977.

584. HR 8410. Labor Law Revision. Erlenborn (R Ill.) amendment to delete provisions requiring automatic denial of government contracts to willful or repeated labor law violators. Rejected 111-301: No. Oct. 5, 1977.

585. HR 8410. Labor Law Revision. Quie (R Ill.) amendment to give the Secretary of Labor discretion over any denial of federal contracts, and to apply such punishment to union violations of labor law as well as to violations by employers. Adopted 394–8: Yes. Oct. 5, 1977.

586. Procedural Motion. Brademas (D Ind.) motion to approve the House *Journal* of Wednesday, Oct. 5, 1977. Motion agreed to 364–16: Yes. Oct. 6, 1977.

587. HR 4297. Marine Protection and Sanctuaries. Adoption of the rule (H Res 798) providing for House floor consideration of the bill to authorize $11.3-million in fiscal 1978 for protection of ocean and coastal resources from contamination and for the marine sanctuaries program. Adopted 388-2: Yes. Oct. 6, 1977.

588. HR 8309. Waterway User Fees. Delaney (D N.Y.) motion to order the previous question on the rule (H Res 776) providing for House floor consideration of the bill to authorize $432-million for a new Locks and Dam 26 on the Mississippi River and to phase in a 6 cents per gallon tax on gasoline bought by inland waterway users. Motion agreed to 241–169: Yes. Oct. 6, 1977.

589. HR 8410. Labor Law Revision. Erlenborn (R Ill.) amendment to delete provisions to permit the National Labor Relations Board to compensate employees for wages lost during periods employers illegally refused to bargain with a union. Rejected 162–250: No. Oct. 6, 1977.

590. HR 8410. Labor Law Revision. Ashbrook (R Ohio) motion to recommit the bill to the House Education and Labor Committee with instructions to amend the National Labor Relations Act to aid union organizing and streamline federal regulatory procedures. Motion rejected 139–279. No. Oct. 6, 1977.

591. HR 8410. Labor Law Revision. Passage of the bill to aid union organizing and bargaining by streamlining regulatory procedures and stiffening penalties against employers who violated labor laws. Passed 257–163. Yes. Oct. 6, 1977.

592. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Cederberg (R Mich.) motion to recommit to House-Senate conferees the conference report on the bill appropriating $6.8 billion for foreign aid programs for fiscal 1978. Motion agreed to 273–126: Yes. Oct. 12, 1977.

593. HR 3744. Minimum Wage. Erlenborn (R Ill.) motion to table and thus kill, the Perkins (D Ky.) motion to send the bill to raise the minimum wage to $2.65 on Jan. 1, 1978, to $2.85 in 1979 and to $3.05 in 1980 to a conference with the Senate. Motion to table rejected 138–266: No. Oct. 12, 1977.

594. H Res 766. Obey Commission House Reforms. Adoption of the rule (H Res 819) providing for House floor consideration of H Res 766, proposing numerous changes in House rules and procedures dealing with employee discrimination in Congress, committee reform, congressional travel and perquisites and House administration. Rejected 160–252. Yes. Oct. 12, 1977.

595. HR 7555. Labor-HEW Appropriations, Fiscal 1978. Flood (D Pa.) motion to recede from the House amendment to a Senate amendment in the conference report on the bill to appropriate $60 billion for the Labor and Health, Education and Welfare Departments for fiscal 1978. Motion agreed to 209–206: Yes. Oct. 12, 1977.

596. HR 7555. Labor-HEW Appropriations, Fiscal 1978. Flood (D Pa.) motion to concur in a Senate-passed amendment relating to abortion with an amendment to bar the use of funds appropriated in the bill for abortion, except where the life of the mother would be endangered, and for certain "medical procedures" used to treat victims of rape or incest. Motion agreed to 263–142: No. Oct. 12, 1977.

597. HR 8390. Fiscal 1978 Supplemental Defense Authorization. Passage of the bill to authorize $560,986,000 in supplemental appropriations for the Defense Department for fiscal 1978. Passed 347–37: Yes. Oct. 12, 1977.

598. HR 3. Medicare-Medicaid Fraud. Adoption of the conference report on the bill to control fraud and abuse in the Medicare and Medicaid programs by establishing stricter penalties, strengthening oversight by local medical review organizations, requiring greater disclosure of information from medical institutions and making other administrative changes. Adopted 402–5: Yes. Oct. 13, 1977.

599. HR 3816. FTC Amendments. Krueger (D Texas) amendment to delete the authorization in the bill for individual or class action consumer suits based on Federal Trade Commission (FTC) rulings and regulations. Adopted 281–125: Yes. Oct. 13, 1977.

600. HR 3816. FTC Amendments. Broyhill (R N.C.) motion to recommit to the House Interstate and Foreign Commerce Committee the bill to streamline certain Federal Trade Commission regulatory procedures, with instructions to amend the bill to authorize congressional review and veto power of FTC rules and regulations. Adopted 272–139: No. Oct. 13, 1977.

601. HR 3816. FTC Amendments. Passage of the bill to streamline certain FTC procedures and to authorize congressional veto of FTC rules and regulations. Adopted 279–131: Yes. Oct. 13, 1977.

602. HR 8309. Waterway User Fees. Passage of the bill to authorize $432-million for a new Locks and Dam 26 on the Mississippi River and to phase in a 6 cents per gallon tax on gasoline bought by inland waterway users. Passed 331–70: Yes. Oct. 13, 1977.

603. HR 7555. Labor-HEW Appropriations, Fiscal 1978. Steers (R Md.) motion to concur in a Senate-passed amendment that prohibited the expenditure of federal funds for abortion except where the life of the mother would be endangered and in cases of rape or incest or when there might be "serious health damage" to either the mother or the fetus. Rejected 163–234: Yes. Oct. 13, 1977.

604. HR 6415. Export-Import Bank. Adoption of the conference report on the bill to extend the bank's programs from June 30, 1978, to Sept. 30, 1978. Adopted 281–62: Yes. Oct. 14, 1977.

605. H Res 688. Executive Office Reorganization. Adoption of the resolution to disapprove the President's Reorganization Plan No. 1 to restructure and streamline the Executive Office of the President. Rejected 20–350: No. Oct. 14, 1977.

606. HR 2176. Audit of Federal Banking Agencies. Passage of the bill to authorize the General Accounting Office to audit certain records of the Federal Reserve Board. Federal Reserve banks, the Federal Deposit Insurance Corp. and the Office of the Comptroller of the Currency. Passed 336–24: Yes. Oct. 14, 1977.

607. HR 4297. Marine Protection and Sanctuaries. Passage of the bill to authorize $11.8-million in fiscal 1978 for marine protection, research and sanctuaries programs, including $4.8-million for the Environmental Protection Agency's regulatory program, $6.5-million for National Oceanic and Atmospheric Administration ocean dumping research and $500,000 for Coastal Zone Management Office marine sanctuaries. Passed 359–1: Yes. Oct. 14, 1977.

608. HR 8515. Saccharin Ban Delay. Rogers (D Fla.) motion to suspend the rules and pass the bill to delay the Food and Drug Administration's proposed ban on the artificial sweetner saccharin for 18 months unless new evidence appeared to prove that it was a substantial risk to public health, to require further studies on use of the product and to authorize signs in retail stores selling saccharin products warning of the health risks associated with the sweetner. Motion agreed to 375–23: Yes. Oct. 17, 1977.

609. HR 8149. Customs Procedures Reform. Vanik (D. Ohio) motion to suspend the rules and pass the bill to modernize the processing and inspection of commercial imports, to simplify customs procedures for noncommercial imports and raise the duty-free limit to $250, from $100, and to require congressional authorization for Customs Service appropriations beginning in fiscal 1980. Motion agreed to 386–11: Yes. Oct. 17, 1977.

610. HR 6715. Tax Act Corrections. Ullman (D Ore.) motion to suspend the rules and pass the bill to make technical and clerical corrections in the 1976 Tax Reform Act. Passed 268–128: Yes. Oct. 17, 1977.

611. HR 9090. Disaster Payments Exemption. Passage of the bill to exempt disaster payments for the 1977 wheat, feed grains and upland cotton crops from the overall $20,000 payment limitation on those crops, and to exempt disaster payments for the 1977 rice crop from the $55,000 payment limitation for that crop. Passed 265–127: Yes. Oct. 17, 1977.

612. S 393. Montana Wilderness Study. Roncalio (D Wyo.) motion to suspend the rules and pass the bill to direct the Secretary of Agriculture to study nine areas totaling 973,000 acres within the national forests in Montana to determine their suitability for potential addition to the National Wilderness Preservation System. Motion agreed to 315-103: Yes. Oct. 18, 1977.

613. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Adoption of the conference report on the bill appropriating $6,772,654,000 for foreign aid programs in fiscal 1978. Adopted 229-195: Yes. Oct. 18, 1977.

614. HR 7797. Foreign Aid Appropriations, Fiscal 1978. Long (D Md.) motion to recede and concur in the Senate amendment to allow the President to waive a ban on direct assistance to Mozambique or Angola if he determined that the aid would further U.S. foreign policy interests and both the Senate and House agreed. Rejected 188-219: Announced yes. Oct. 18, 1977.

615. HR 7797. Foreign Aid Appropriations. Fiscal 1978. Young (R Fla.) motion to recede and concur in the Senate amendment to delete a House provisions that cut $3.5 million in military aid for the Philippines to $18.9-million in fiscal 1978. Rejected 160-254: No. Oct. 18, 1977.

616. HR 1037. Cargo Preference. Adoption of the rule (H Res 774) providing for House floor consideration of the bill to guarantee U.S. flag ships a 9.5 per cent share of the country's oil imports. Adopted 249-167: Yes. Oct. 19, 1977.

617. HR 1037. Cargo Preference. McCloskey (R Calif.) amendment to ensure that transportation rates charged by tankers in the cargo preference program were no more than 50 per cent higher than those charged by other tankers. Adopted 253-167: No. Oct. 19, 1977.

618. HR 1037. Cargo Preference. Passage of the bill to guarantee U.S. flag ships a 9.5

per cent share of the country's oil imports. Rejected 165-257: No. Oct. 19, 1977.

619. HR 9375. Fiscal 1978 Supplemental Appropriations. Flood (D Pa.) amendment to appropriate $9.1-million in fiscal 1978 to support construction of two centers to train students in international affairs at Georgetown University and Tufts University, provided that the Commissioner of Education made available $7.2-million more in new construction loans for the same purpose from the Higher Education Facilities Loan and Insurance Fund. Adopted 215-202: Yes. Oct. 19, 1977.

620. HR 9375. Fiscal 1978 Supplemental Appropriations. Bevill (D Ala.) amendment, part 2, to delete language in the bill that would prohibit fiscal 1978 funds appropriated for the Energy Research and Development Administration's Clinch River nuclear breeder reactor program from being spent unless authorizing legislation was enacted. Adopted 252–165: Yes. Oct. 19, 1977.

621. HR 666. Legal Services Corporation. Wylie (R Ohio) motion to instruct the House conferees to insist upon the House language restricting the use of Legal Services Corporation funds for legal assistance in litigation relating to the desegregation of elementary and secondary schools. Motion agreed to 230–186: No. Oct. 20, 1977.

622. HR 3744. Minimum Wage. Adoption of the conference report on the bill to raise the minimum wage from $2.30 an hour to $2.65 an hour on Jan. 1, 1978, to $2.90 an hour on Jan. 1, 1979, to $3.10 an hour on Jan. 1, 1980, and to $3.35 an hour on Jan. 1, 1981, and make other changes in wage and overtime coverage. Adopted 236–187: Yes. Oct. 20, 1977.

623. S 1811. ERDA Authorization-Civilian Nuclear Energy Applications. Adoption of the second conference report on the bill to authorize $6,161,445,000 for the federal government's civilian programs for the Energy Research and Development Administration for fiscal 1978. Adopted 366–52: Yes. Oct. 20, 1977.

624. HR 9375. Fiscal 1978 Supplemental Appropriations. Smith (D Neb.) amendment to appropriate an additional $625-million for the Small Business Administration disaster loan program. Adopted 318–102: Yes. Oct. 20, 1977.

625. HR 9375. Fiscal 1978 Supplemental Appropriations. Chappell (D Fla.) motion to limit debate on the Chappell amendment. Motion agreed to 212–187: Announced Yes. Oct. 20, 1977.

626. HR 9375. Fiscal 1978 Supplemental Appropriations. Mahon (D Texas) motion that the Committee of the Whole rise. Rejected 190–215: Yes. Oct. 20, 1977.

627. HR 9375. Fiscal 1978 Supplemental Appropriations. Chappell (D Fla.) amendment to add $1.4-billion for five B–1 bombers. Rejected 194–204: No. Oct. 20, 1977.

628. HR 9375. Fiscal 1978 Supplemental Appropriations. Edwards (R Ala.) motion that the Committee of the Whole rise. Motion rejected 169–205: No. Oct. 20, 1977.

629. HR 7442. Utility Pole Attachments. Frey (R Fla.) demand for a second on the Wirth (D Colo.) motion to suspend the rules and pass the bill to amend the Communications Act of 1934 to require the Federal Communications Commission to regulate attachments to telephone and electric utility poles if they were not already being regulated by a state or local authority. Second ordered 389–7: Yes. Oct. 25, 1977.

630. HR 8803. Appalachian Trail. P. Burton (D Calif.) motion to suspend the rules and pass the bill to expand the Interior Department's condemnation authority and authorize $30-million for fiscal years 1978–80 to acquire up to 125 acres per mile along the Appalachian Trail: re-establish local advisory councils; require a comprehensive development plan; and repeal the payment in lieu of taxes provisions for National Park System acquisitions after Jan. 1, 1977, except for the Appalachian Trail. Motion agreed to 409–12: Yes. Oct. 25, 1977.

631. HR 8059. Child Pornography. Conyers (D Mich.) motion to suspend the rules and pass the bill to prohibit the use of minors in producing or promoting pornography for interstate or foreign commerce and to prohibit transportation of minors for prostitution. Motion agreed to 420–0: Yes. Oct. 25, 1977.

632. HR 8358. Law School Depository Libraries. Nedzi (D Mich.) motion to suspend the rules and pass the bill to amend the U.S Code to provide that libraries of all accredited law schools may become depository libraries of government publications. Motion agreed to 397–20: Yes. Oct. 25, 1977.

Ullman (D Ore.) motion to suspend the rules and pass the bill to extend certain provisions of the 1976 Tax Reform Act and to prohibit Internal Revenue Service rulings or regulations regarding certain job commuting expenses and fringe benefits. Passed 411–5: Yes. Oct. 25, 1977.

634. H.R. 7278. Transport Fleet Modernization. Biaggi (D N.Y.) motion to suspend the rules and pass the bill to authorize the Commerce Department to replace obsolete transport ships currently in the national reserve fleet with newer ships. Motion agreed to 412–3: Yes. Oct. 25, 1977.

635. HR 8346. Urban Mass Transit. Howard (D N.J.)) motion to suspend the rules and pass the bill to raise the share of federal operating assistance for commuter rail services in the Northeast to 80 per cent, from 50 per cent, for the last six months of the program, ending in September 1978. Motion agreed to 308–106: No. Oct. 25, 1977.

636. S 1682. Prisoner Exchange. Eilberg (D Pa.) motion to suspend the rules and pass the bill to implement treaties providing for the exchange of prisoners between foreign countries. Motion agreed to 400–15: Yes. Oct. 25, 1977.

637. HR 8059. Child Pornography. Conyers (D Mich.) motion to instruct House conferees on the bill to agree to provisions in the Senate child pornography bill (S 1585) concerning penalties for sale and distribution of materials depicting sexual conduct of minors. Motion agreed to 358–54: Yes. Oct. 25, 1977.

638. HR 9375. Fiscal 1978 Supplemental Appropriations. Passage of the bill to appropriate $7,182,602,000 for programs of various federal departments for fiscal 1978. Passed 313–98: Yes. Oct. 25, 1977.

639. HR 5101. EPA Authorization. Adoption of the conference report on the bill to authorize $253,603,000 for the Environmental Protection Agency's (EPA) research and development programs for fiscal 1978. Adopted 343–19: Yes. Oct. 25, 1977.

640. HR 9346. Social Security Financing. Adoption of the rule (H Res 389) providing for House floor consideration of the bill to raise Social Security payroll taxes, beginning in January 1978, and make various adjustments in benefits. Adopted 265–153: Yes. Oct. 26, 1977.

641. HR 9346. Social Security Financing. Fisher (D Va.) substitute amendment to the Post Office and Civil Service Committee amendment to delete provisions extending Social Security coverage to federal, state and local government workers and employees of non-profit organizations, to increase Social Security tax rate and wage base beginning in 1981, and to require a federal study of universal coverage issues, due Jan. 1, 1980. Adopted 386–38: Yes. Oct. 26, 1977.

642. HR 9346. Social Security Financing. Post Office and Civil Service Committee amendment, as amended by the Fisher (D Va.) amendment. Adopted 380–39: Yes. Oct. 26, 1977.

643. HR 9346. Social Security Financing. Jenkins (D Ga.) amendment to raise Social Security payroll tax rates more quickly, beginning in 1978, to permit more gradual increases in the taxable wage base over the next seven years. Rejected 136–281: No. Oct. 26, 1977.

644. HR 9346. Social Security Financing. Pickle (D Texas) amendment to delete provisions for standby loans to the Social Security system from the Treasury when trust fund reserves dip below certain specified levels. Rejected 196–221: No. Oct. 26, 1977.

645. HR 9346. Social Security Financing. Corman (D Calif.) amendment to eliminate the minimum benefit coverage guaranteed to persons who made small contributions to the Social Security system. Rejected 131–271: No. Oct. 26, 1977.

646. HR 9346. Social Security Financing. Ullman (D Ore.) motion that the House resolve itself into the Committee of the Whole for further consideration of the bill to amend the Social Security Act to raise Social Security payroll taxes and adjust benefit levels. Motion agreed to 405–3: Yes. Oct. 27, 1977.

647. HR 9346. Social Security Financing. Ketchum (R Calif.) amendment to raise the ceiling on the earnings limitation by Social Security recipients over age 65 from $3,000 a year to $4,000 in 1978, $4,500 in 1979, $5,000 in $1980, $5,500 in 1981, and to lift the limit entirely in 1982. Adopted 268–149: No. Oct. 27, 1977.

648. HR 9346. Social Security Financing. Conable (R N.Y.) motion to recommit the bill to the House Ways and Means Committee with instructions to add provisions mandating Social Security coverage for federal employees; diverting funds from the hospital insurance trust fund to Social Security; replacing hospital trust fund revenues with income tax receipts; and eliminating proposals that raised payroll taxes above levels already scheduled under existing law and allowed the Social Security trust funds to borrow from the Treasury. Motion rejected 57–363: No. Oct. 27, 1977.

649. HR 9346. Social Security Financing. Passage of the bill to raise Social Security payroll taxes, above scheduled levels, by increasing the taxable wage base for employers and employees starting in 1978 and increasing employer and employee tax rates starting in 1981, and to make various adjustments in benefit schedules. Passed 275–146: Yes. Oct. 27, 1977.

650. S 717. Mine Safety. Adoption of the conference report on the bill to strengthen mine health and safety standards and enforcement procedures by applying the same set of regulatory processes to both coal and noncoal mines and transferring administrative authority from the Interior Department to the Labor Department. Adopted 376–35: Yes. Oct. 27, 1977.

651. HR 1139. Child Nutrition Programs. Adoption of the conference report on the bill to eliminate abuses in the summer food program for children, extend the program through fiscal 1980 and make other changes in the school lunch and child nutrition programs, establish a nutrition education and information program, and require the Agriculture Secretary to approve "junk" foods from vending machines during the period the school lunch and school breakfast programs were operating. Adopted 386–17: Yes. Oct. 27, 1977.

652. H Res. 866. Broadcast of House Proceedings. Adoption of the resolution to authorize the Speaker to provide live broadcast coverage of House proceedings to members, to record proceedings and, following completion of a study on media access alternatives, to make broadcasts available to the news media. Adopted 342–44: Yes. Oct. 27, 1977.

653. HR 8200. Bankruptcy Law Revision. Adoption of the rule (H Res 826) providing

for House floor consideration of the bill to establish a uniform law of bankruptcy, to establish a new bankruptcy court system and to create a U.S. trustee system to handle administrative functions in bankruptcy cases. Adopted 358–11: Yes. Oct. 27, 1977.

654. HR 8200. Bankruptcy Law Revision. Edwards (D Calif.) motion that the House resolve itself into the Committee of the Whole to consider the bill to establish a uniform modern bankruptcy law; to provide consumers with more adequate relief under the bankruptcy laws; and to create a separate federal bankruptcy court system. Motion agreed to 329–2: Yes. Oct. 28, 1977.

655. HR 8200. Bankruptcy Law Revision. Danielson (D Calif.) amendment to retain the existing federal court structure for bankruptcies, to provide for appointment of bankruptcy judges by U.S. appeals courts, and to place the U.S. trustees under the supervision of the Judicial Conference rather than the Justice Department. Adopted 183–158: No. Oct. 28, 1977.

656. HR 8200. Bankruptcy Law Revision. Edwards (D Calif.) motion that the Committee of the Whole rise. Motion agreed to 268–62: Yes. Oct. 28, 1977.

657. HR 6782. Raisin Marketing. Richmond (D N.Y.) motion to suspend the rules and pass the bill to establish a new federal marketing order for promotion of raisins. Motion agreed to 396–7: Yes. Oct. 31, 1977.

658. HR 9710. Interest Rate Ceilings. St Germain (D R.I.) motion to suspend the rules and pass the bill to extend through Dec. 15, 1978, the authority of federal regulatory agencies to set differential ceilings on interest rates paid by financial institutions on savings accounts and to change certain operations of the Federal Reserve Board. Motion agreed to 395–3: Yes. Oct. 31, 1977.

659. S J Res 611. Federal Reserve Bank. Mitchell (D Md.) motion to suspend the rules and adopt the resolution to extend through April 30, 1978, the authority of the Federal Reserve Board to buy and sell certain obligations. Motion agreed to 388–14: Yes. Oct. 31, 1977.

660. H Res 871. Select Committee on Ethics. Delaney (D N.Y.) motion to suspend the rules and pass the resolution to extend the life of the Select Committee on Ethics until the completion of its official business during the second session of the 95th Congress. Motion agreed to 385–22: Yes. Oct. 31, 1977.

661. H Res 868. Urging Korean Government Cooperation. Zablocki (D Wis.) motion to suspend the rules and adopt the resolution expressing the sense of the House that the government of the Republic of Korea should extend full and unlimited cooperation with the investigation being conducted by the House Committee on Standards of Official Conduct into illicit South Korean lobbying activities and House members' involvement. Motion agreed to 407–0: Yes. Oct. 31, 1977.

662. H Con Res 388. South Africa Repression. Diggs (D Mich.) motion to suspend the rules and adopt the resolution denouncing the government of South Africa for repressive acts against its people. Motion agreed to 347–54: Yes. Oct. 31, 1977.

663. S 1019. Maritime Authorization. McCloskey (R Calif.) motion to recommit the conference report with instructions to restore an anti-rebating amendment adopted by the House and to make the amendment effective immediately upon enactment. Motion rejected 166–231: No. Oct. 31, 1977.

664. HR 7073. Pesticide Regulation. Passage of the bill to amend the Federal Insecticide, Fungicide and Rodenticide Act to allow conditional registration of new pesticides, establish a new formula for control of registration test data, separate classification from re-registration, permit "generic registration," and strengthen state agencies to make their own registrations. Passed 368–21: Yes. Oct. 31, 1977.

665. HR 9282. Congressional Pay Raise. Ordering of a second on the Solarz (D N.Y.) motion to suspend the rules and pass the bill to postpone future congressional pay raises until the beginning of the Congress following the Congress in which they were approved, and to prohibit appropriation bill riders that would deny funds for pay increases. Second not ordered 167–233: No. Nov. 1, 1977.

666. HR 3384. Objection to Union Membership. Thompson (D N.J.) motion to suspend the rules and pass the bill to exempt from having to join or contribute to labor unions members of a religious sect that had conscientious objections to supporting labor unions and instead require that they pay an equal amount of union dues to a nonreligious charitable fund. Motion agreed to 400–7: Yes. Nov. 1, 1977.

667. S 1306. SBA Disaster Loans. Smith (D Iowa) motion to suspend the rules and pass the bill to increase the interest rate to 5 per cent, from 3 per cent, on Small Business Administration natural disaster loans to small business that suffered damages during the period from Jan. 1, 1978, to Oct. 1, 1978. Motion rejected 234–170: Yes. Nov. 1, 1977.

668. H Res 315. House Beauty Shop Employees. Davis (D S.C.) motion to suspend the rules and adopt the resolution to transfer jurisdiction over the House Beauty Shop to the House Administration Committee, and to classify beauty shop employees as House employees, thereby conferring on them salaries and fringe benefits. Motion agreed to 273–131: Yes. Nov. 1, 1977.

669. H Res 784. Commission on Hunger and Malnutrition. Zablocki (D Wis.) motion to suspend the rules and adopt the resolution urging the President to establish a Commission on Domestic and International Hunger and Malnutrition to report in one year on the causes of hunger and malnutrition, identify the federal programs established to deal with the problems and develop recommendations for new policies and legislation on the problem. Motion agreed to 364–38: Yes. Nov. 1, 1977.

670. HR 9544. D.C. Revenue Bonds. Passage of the bill to amend the District of Columbia Self-Government Act to allow the proceeds of revenue bonds to be disbursed from the D.C. treasury, without prior congressional approval, to private colleges and universities in the District of Columbia (the issuance of the bonds had been approved by Congress and the D.C. Council). Passed 403–0: Yes. Nov. 2, 1977.

671. S 1339. ERDA Authorization-Military Applications. Adoption of the conference report on the bill to authorize $2,607,100,000 for Energy Research and Development Administration (ERDA) military programs for fiscal 1977 and 1978. Adopted 336–69: Yes. Nov. 2, 1977.

672. HR 9179. Overseas Private Investment Corporation. Crane (R Ill.) amendment to prohibit the Overseas Private Investment Corporation from making any loans to or guaranteeing or insuring any borrowing of the National Finance Corporation of Panama unless such loans or guarantees were first approved by Congress. Rejected 188–215: No. Nov. 2, 1977.

673. HR 9179. Overseas Private Investment Corporation. Long (D Md.) amendment to require the Overseas Private Investment Corporation to provide at least 50 per cent of all insurance, reinsurance, guarantees or other financing to small businesses, as defined by the Small Business Administration. Adopted 285–111: Yes. Nov. 3, 1977.

674. HR 7555. Labor-HEW Appropriations. Fiscal 1978. Adoption of the rule (H Res 893) providing for House floor consideration of the conference report and the amendment reported in disagreement on a bill to appropriate fiscal 1978 funds for the Labor and Health Education and Welfare Departments. Adopted 361–9: Yes. Nov. 3, 1977.

675. HR 7555. Labor-HEW Appropriations, Fiscal 1978. Mahon (D Texas) motion to concur in a Senate amendment relating to abortion that prohibited the use of federal funds to pay for abortions except in cases of danger to the life of the mother, rape, incest, or when childbirth would cause a woman "severe and long-lasting physical health damage." Motion rejected 172–193: Yes. Nov. 3, 1977.

676. HJ Res 643. Fiscal 1978 Continuing Resolution. Adoption of the rule (H Res 892) providing for House floor consideration of the joint resolution to provide financing authority for the Departments of Labor, Health, Education and Welfare, the District of Columbia and various related agencies until the regular fiscal 1978 appropriations for these departments were enacted, or until Nov. 30, whichever came first. Adopted 344–5: Yes. Nov. 3, 1977.

677. Procedural Motion. Brademas (D Ind.) motion to approve the House Journal for Thursday, Nov. 3, 1977. Motion agreed to 284–14: Yes. Nov. 4, 1977.

678. HR 7. Career Education. Adoption of the conference report on the bill to authorize $325-million in fiscal years 1979–83 in grants to the states for career education programs in elementary and secondary schools. Adopted 372–20: Yes. Nov. 29, 1977.

679. H Res 827. Reorganization Plan No. 2. Brooks (D Texas) motion that the House resolve itself into the Committee of the Whole for floor consideration of the resolution to disapprove the President's Reorganization Plan No. 2 to combine the United States Information Agency and the Bureau of Education and Cultural Affairs of the State Department into a single agency. Motion agreed to 387–2: Yes. Nov. 29, 1977.

680. H Res 827. Reorganization Plan No. 2. Adoption of the resolution to disapprove the President's Reorganization Plan No. 2 combining the United States Information Agency (USIA) and the State Department's Bureau of Educational and Cultural Affairs into a new organization, the International Communication Agency. Rejected 34–357: No. Nov. 29, 1977.

681. HR 7555. Labor-HEW Appropriations, Fiscal 1978. Mahon (D Texas) motion to concur in a Senate-passed amendment to bar the use of federal funds for abortion except where pregnancy would cause danger to the life of the mother or "severe and long-lasting physical health damage" and to permit funds for "medical procedures" in cases of reported rape or incest. Rejected 183–205: Yes. Nov. 29, 1977.

682. HR 9375. Supplemental Appropriations. Fiscal 1978. Gore (D Tenn.) motion to order the previous question on the Conte (R Mass.) motion to recommit the conference report on the bill with instructions to increase National Railroad Passenger Corporation (Amtrak) funds to $11.5-million from $8-million. Motion rejected 125–270: No. Nov. 30, 1977.

683. HR 9375. Supplemental Appropriations. Fiscal 1978. Gore (D Tenn.) amendment, to the Conte (R Mass.) motion to recommit to increase Amtrak funds to $18-million from $11.5-million as proposed in the recommittal motion. Adopted 256–141: Yes. Nov. 30, 1977.

684 HR 9375. Supplemental Appropriations, Fiscal 1978. Conte (R Mass.) motion, as amended by Gore (D Tenn.) amendment, to recommit the conference report with instructions to increase Amtrak funds to $18-million. Motion agreed to 258–138: Yes. Nov. 30, 1977.

685. HR 9346. Social Security Financing. Waggonner (D La.) motion to order the previous question on the Archer (R Texas) motion to instruct the House conferees on the bill Motion agreed to 214–181: Yes. Nov. 30, 1977.

686. HR 9346. Social Security Financing. Archer (R Texas) motion to instruct the House conferees on the bill to insist on a House provision that would phase out by 1982 the limitation on outside earnings by Social Security recipients aged 65–72. Motion rejected 183–209: No. Nov. 30, 1977.

687. H Res 915 Korean-American Relations Investigation. Adoption of the resolution to appropriate from House contingent funds $100,000 for foreign travel expenses for members and staff of the International Relations Subcommittee on International Organizations for the period Jan. 1–March 31, 1978, in carrying out the investigation of charges of alleged bribery of U.S. government officials and members of Congress by South Korean agents. Adopted 366–2: Yes. Dec. 1, 1977.

688. H Con Res. 432. Health Planning. Adoption of the concurrent resolution expressing the sense of Congress that Health, Education and Welfare Department national health planning guidelines should be flexible enough to allow less stringent guidelines and performance standards for small rural hospitals to deliver quality health care for rural residents. Adopted 357–0: Yes. Dec. 6 , 1977.

689. H J Res 622. Fiscal 1978 Continuing Resolution. Adoption of the rule (H Res 917) providing for House floor consideration of the joint resolution to provide financing authority for the departments of Labor and Health, Education and Welfare, the District of Columbia and various related agencies until the regular fiscal 1978 appropriations bills for these departments were enacted, or until Sept. 30, 1978, whichever came first. Adopted 331–21: Yes. Dec. 6, 1977.

690. H J Res 662. Fiscal 1978 Continuing Resolution. Michel (R Ill.) amendment to the Mahon (D Texas) amendment, to prohibit the use of federal funds for abortions except where pregnancy endangered the life of the mother or caused "severe and long lasting physical health damage to the mother" and to permit funds for medical procedures in cases of forced rape or incest that had been promptly reported to police or a public health agency. Rejected 170–200: Yes. Dec. 6, 1977.

691. HR 9375. Fiscal 1978 Supplemental Appropriations. Addabbo (D N.Y.) motion that the House recede and concur with the Senate amendment to add $200 million for the Community Services Administration program providing emergency payments for the heating bills of low-income families in case of severe winter weather. Motion agreed to 182–181: No. Dec. 6, 1977.

692. HR 9375. Fiscal 1978 Supplemental Appropriations. Mahon (D Texas) motion to recede and concur with the Senate amendment to rescind $462 million appropriated in fiscal 1977 for the Defense Department for production of three B–1 bombers. Rejected 166–191: Yes. Dec. 6, 1977.

693. HR 9418. Foreign Medical Students. Adoption of the conference report on the bill to amend the Health Manpower Act of 1976 (PL 94–484) to require that U.S. medical schools increase their third-year class enrollment by 5 per cent in 1978–79 to make places for U.S. citizens attending foreign medical schools; expand public health traineeships; change loan requirements for health professions students; and require a study of whether medical schools deny admission or otherwise discriminate against individuals because of their views on abortion or sterilization. Adopted 344–0: Yes. Dec. 7, 1977.

694. HR 6666. Legal Services Corporation. Adoption of the conference report on the bill to authorize $205 million in fiscal 1978 and such sums as may be necessary for fiscal 1979–80 to the Legal Services Corporation to provide legal services for the poor. Adopted 236–110: Yes. Dec. 7, 1977.

695. H J Res 662. Fiscal 1978 Continuing Resolution. Adoption of the rule (H Res 928) providing for House floor consideration of the joint resolution to provide financing authority for the Departments of Labor and Health, Education and Welfare, the District of Columbia and various related agencies until the regular fiscal 1978 appropriations for these departments were enacted, or until Sept. 30, 1978, whichever came first. Adopted 251–86: Yes. Dec. 7, 1977.

696. H J Res 662. Fiscal 1978 Continuing Resolution. Mahon (D Texas) motion to concur in a Senate amendment that would prohibit the use of federal funds for abortions except where pregnancy endangered the life of the mother or caused "severe and long lasting physical health damage" to the mother and to permit funds for "medical procedures" in cases of rape or incest that were promptly reported to police or to a public health agency. Rejected 171–178: Yes. Dec. 7, 1977.

697. S 1340. Energy Research Authorization. Adoption of the rule (H Res 916) providing for House floor consideration of the bill to authorize $6,081,400,000 for energy research programs in fiscal 1978 (the bill omitted provisions of an earlier bill (S 1811) vetoed by President Carter authorizing $80 million for the Clinch River breeder reactor). Adopted 329–18: Yes. Dec. 7, 1977.

698. HR 3722. Securities and Exchange Commission Authorization. Adoption of the conference report on the bill to authorize $63,750,000 for the Securities and Exchange Commission for fiscal year 1978. Adopted (thus completing congressional action) 348–2: Yes. Dec. 7, 1977.

699. S 305. Unlawful Corporate Payments. Adoption of the conference report on the bill to prohibit U.S. companies from bribing foreign officials for the purpose of winning business contracts, to require companies under the jurisdiction of the Securities and Exchange Commission (SEC) to maintain accurate financial records, and to authorize the SEC to require disclosure of the identities of any persons who held more than 5 per cent of a corporation's stock. Adopted (thus completing congressional action) 349–0: Yes. Dec. 7, 1977.

700. H J Res 662. Fiscal 1978 Continuing Resolution. Adoption of the rule (H Res 928) providing for House floor consideration of the joint resolution to provide financing authority for the Departments of Labor and Health, Education and Welfare, the District of Columbia and various related agencies until the regular fiscal 1978 appropriations for these departments were enacted, or until Sept. 30, 1978, whichever came first. Adopted 240–109: Yes. Dec. 7, 1977.

701. H J Res 662. Fiscal 1978 Continuing Resolution. Michel (R Ill.) motion to concur in a Senate amendment relating to abortion with an amendment to prohibit the use of federal funds for abortion except where pregnancy would endanger the life of the mother or two doctors certified that the woman would suffer "severe and long lasting physical health damage" and to permit funds for "medical procedures" in cases of rape or incest that had been promptly reported to police or to a public health agency. Adopted 181–167: Yes. Dec. 7, 1977.

702. Procedural Motion. Russo (D Ill.) motion to approve the House *Journal* of Wednesday, Dec. 14, 1977. Motion agreed to 284–14: Yes. Dec. 15, 1977.

703. HR 3199. Water Pollution Control Act. Adoption of the rule (H Res 935) providing for House floor consideration of and waiving points of order against consideration of the conference report on the Clean Water Act of 1977. Adopted 326–6: Yes. Dec. 15, 1977.

704. HR 3199. Water Pollution Control Act. Adoption of conference report on the bill to amend the 1972 Federal Water Pollution Control Act by revising cleanup deadlines, retaining federal jurisdiction over wetlands and to authorize $24.5-billion through fiscal 1982 for municipal construction grants. Adopted 346–2: Yes. Dec. 15, 1977.

705. H.R. 9346. Social Security Financing. Adoption of the rule (H Res 937) providing for House floor consideration of the conference report on the bill to raise Social Security payroll taxes and adjust certain benefit levels and waiving all points of order against the conference report. Adopted 178–175: Yes. Dec. 15, 1977.

706. HR 9346. Social Security Financing. Adoption of the conference report on the bill to raise Social Security payroll taxes, above existing scheduled levels, by increasing tax rates and the taxable wage base for both employees and employers beginning in 1979, to correct inflation adjustment procedures and make other changes in benefit schedules, and to authorize additional funding and new options for state welfare programs. Adopted 189–163: Yes. Dec. 15, 1977.

IMPORTANCE OF ALASKA NATIONAL INTEREST LANDS CONSERVATION ACT TO WILDLIFE CONSERVATION IN THE OTHER STATES

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, the Subcommittee on General Oversight and Alaska Lands has completed consideration of title III of our revised version of H.R. 39, the Alaska National Interest Lands Conservation Act, sponsored by Mr. UDALL and many other Members. That title establishes a number of new units of the National Wildlife Refuge System and also expands a number of the existing Alaskan units of the refuge system.

While these proposed wildlife refuges have not drawn the same degree of attention as the proposals for new national parks and other conservation system units, they are very important to the maintenance of wildlife values not only in Alaska but in much of the rest of the country. This was highlighted recently by Secretary of the Interior Cecil Andrus, when he told the International Waterfowl Symposium in New Orleans recently that "the greatest act of cooperation and good will the United States could take this year would be for Congress to enact the Alaskan land provisions" of the legislation which will soon be before the House.

Secretary Andrus also pointed out that the areas set aside in the proposed Alaskan refuges are the main breeding grounds for the 13 million waterfowl that migrate every year to the lower 48 States and other parts of the world.

So that all our colleagues may have the benefit of a fuller account of Secretary Andrus' remarks, a recent news release summarizing his remarks follows:

ANDRUS STRESSES IMPORTANCE OF ALASKAN WILDLIFE TO LOWER 48 STATES AND OTHER NATIONS

America's sportsmen have a vital stake in decisions being made this year classifying the Federal lands in Alaska, Secretary of the Interior Cecil D. Andrus said today.

"If we have the vision and courage to pro-

tect the vital ecosystems of Alaska, we will be maintaining a life-giving reservoir to support a rich array of wildlife for decades and centuries to come," Andrus told the Third International Waterfowl Symposium in New Orleans. "We will enhance the likelihood that our children and their children will have the opportunity to experience the joy associated with ducks and other waterfowl which migrate southward each fall."

The Secretary was referring to the estimated 13 million waterfowl which migrate from Alaska annually.

Andrus said the Administration's proposal to place almost 92 million acres in national parks, wildlife refuges, wild and scenic rivers, and national forests is the minimum essential to conserve the scenic and wildlife resources of Alaska.

"Our proposal is not an inflated estimate," Andrus emphasized. "Our proposal for Alaska is a bottom-line request."

Congress must make a decision on the classification of the Federal lands by the end of this year if it is to meet the deadline set in the Alaska Native Claims Settlement Act.

Andrus termed the Department's proposal for 92 million acres "probably the best researched recommendations for protected areas" ever sent to Congress by an Interior Secretary. He said proposals allow ample opportunity for needed mineral and energy development in Alaska.

Addressing the international aspects of the symposium, Andrus said:

"The greatest act of international cooperation and goodwill the United States could take this year would be for the Congress to enact the Alaskan land provisions as proposed by the Administration. Waterfowl and other wildlife in Alaska migrate to every continent and virtually every corner of the world."

The Secretary also emphasized the need for preservation of wetlands and other wildlife habitat in the lower 48 states.

Andrus said that provisions to compensate for loss of wildlife habitat must become a part of the plannnig process for all Federal projects.

"It is my strong feeling that provisions for mitigation should be included in authorizing legislation, and that the mitigation should be accomplished simultaneously with construction of a project," Andrus said.

CARTER CAPITULATION TO THE UNITED NATIONS POINTS TO NEED FOR BRICKER AMENDMENT

(Mr. ASHBROOK asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ASHBROOK. Mr. Speaker, we have witnessed 1 year of an administration which seems bent on turning a major part of U.S. sovereignty over to the United Nations. Increased emphasis on funneling taxpayers' money to the U.N. for questionable loans and aid, including aid to Communist countries like Vietnam were accomplished last December.

The President has signed two U.N. covenants which are at best mischievous, at worst disastrous and urged the Senate to ratify them.

We need the Bricker amendment, defeated in 1954 by a one-vote margin in the U.S. Senate. I have introduced it in each session since the 87th Congress. House Joint Resolution 32 is simple in language, easy to understand. Here is the complete text of House Joint Resolution 32:

H.J. RES. 32

Joint Resolution proposing an amendment to the Constitution of the United States relative to force and effect of treaties

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as a part of the Constitution only if ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. A provision of a treaty which denies or abridges any right enumerated in this Constitution shall not be of any force or effect.

"SEC. 2. No treaty shall authorize or permit any foreign power or any international organization to supervise, control, or adjudicate rights of citizens of the United States within the United States enumerated in this Constitution or any other matter essentially within the domestic jurisdiction of the United States.

"SEC. 3. A treaty shall become effective as internal law in the United States only through the enactment of appropriate legislation by the Congress.

"SEC. 4. All executive or other agreements, between the President or any international organization, foreign power, or official thereof shall be made only in the manner and to the extent to be prescribed by law. Such agreements shall be subject to the limitations imposed on treaties, or the making of treaties, by this article.

"SEC. 5. The Congress shall have power to enforce this article by appropriate legislation.

"SEC. 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission.".

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. RISENHOOVER (at the request of Mr. WRIGHT), for February 1 and 2, on account of attendance at a funeral.

Mr. HIGHTOWER (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CAPUTO) and to revise and extend their remarks and include extraneous matter:)

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2719. An act to authorize the Secretary of the Interior to contract with the Middle Rio Grande Conservancy District of New Mexico for the payment of operation and maintenance charges on certain Pueblo Indian lands;

H.R. 5798. An act to amend the Interstate Commerce Act to authorize appropriations for the Office of Rail Public Counsel for fiscal year 1978;

H.R. 10532. An act to amend Public Law 95–18, providing for emergency drought relief measures; and

H.J. Res. 386. Joint resolution to provide for the striking of a national medal to commemorate the bicentennial of an outstanding historic event or personality during 1777.

BILLS PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on January 31, 1978, present to the President, for his approval, bills of the House of the following title:

H.R. 5054. To repeal section 3306 of title 5, United States Code, to eliminate the requirements in the departmental service in the District of Columbia; and

H.R. 5322. To impose an excise tax on the sale of coal by the producer, to establish a black lung disability trust fund, and for other purposes.

ADJOURNMENT

Mr. SHARP. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 36 minutes p.m.), the House adjourned until tomorrow, Thursday, February 2, 1978, at 11 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3129. A letter from the Secretary of the Air Force, transmitting a report on Air Force military construction contracts awarded without formal advertisement during the transition quarter and fiscal year 1977, pursuant to section 604 of Public Law 94–431; to the Committee on Armed Services.

3130. A letter from the Assistant Secretary of the Army (Research, Development and Acquisition), transmitting a plan for the incorporation of protection against chemical and radiological agents for armored vehicles and crews, pursuant to section 205 of Public Law 95–79; to the Committee on Armed Services.

3131. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting the annual report for fiscal year 1977 on design and construction supervision, inspection, and overhead fees charged by the construction agents for military construction projects of the military Departments and Defense Agencies, pursuant to section 604 of Public Law 95–82; to the Committee on Armed Services.

3132. A letter from the Chairman of the Board of Governors, Federal Reserve System, transmitting the Board's second annual report on the Equal Credit Opportunity Act, pursuant to section 707 of the act; to the Committee on Banking, Finance and Urban Affairs.

3133. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction involving nuclear facilities with Taiwan Power Co., Republic of China, pursuant to section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended (88 Stat. 2335; 91 Stat. 1210); to the Committee on Banking, Finance and Urban Affairs.

3134. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–134, "To protect certain property rights and interests created as a result of the closing of streets, minor streets, roads, highways, and alleys in the District of Columbia pursuant to resolutions previously adopted by the Council of the District of Columbia," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

3135. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–135, "To amend the Solid Waste Regulations of the District of Columbia, and for other purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

3136. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–136, "To require the District of Columbia Council approval of all revisions of the District's Water Quality. Standards, and for other purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

3137. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–137, "To establish certain requirements for the licensure of Occupational Therapists or Occupational Therapy Assistants, and for other purposes," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

3138. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 2–138, "To license ambulatory surgical treatment centers," pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

3139. A letter from the Secretary of the Treasury, transmitting the seventh quarterly report on antirecession fiscal assistance to State and local governments, pursuant to section 213 of the Public Works Employment Act of 1976, as amended; to the Committee on Government Operations.

3140. A letter from the Chairman, Advisory Commission on Intergovernmental Relations, transmitting the nineteenth annual report of the Commission, pursuant to section 5 of Public Law 86–380; to the Committee on Government Operations.

3141. A letter from the Assistant Secretary of the Interior, transmitting a report on activities carried out by the Geological Survey during calendar year 1977 in areas outside the national domain, pursuant to section 2 of Public Law 87–626, as amended (88 Stat. 1971); to the Committee on Interior and Insular Affairs.

3142. A letter from the Acting Administrator, Agency for International Development, Department of State, transmitting proposed criteria for development assistance policy, pursuant to section 102(d)(1) of the Foreign Assistance Act of 1961, as amended (91 Stat. 533); to the Committee on International Relations.

3143. A letter from the Secretary of the Treasury, transmitting the fourth annual report on the external debt of developing countries and on debt relief provided by the United States, pursuant to section 634(g) of the Foreign Assistance Act of 1961, as amended (87 Stat. 724); to the Committee on International Relations.

3144. A letter from the president, U.S. Railway Association, transmitting the Association's first quarterly report, pursuant to section 202(e)(2) of the Regional Rail Reorganization Act of 1973, as amended (91 Stat. 1423); to the Committee on Interstate and Foreign Commerce.

3145. A letter from the vice president for Government affairs, National Railroad Passenger Corporation, transmitting the financial report of the Corporation for the month of October 1977, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

3146. A letter from the Principal Deputy Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), transmitting reports covering calendar year 1977 on civilian positions in the Department of Defense allocated or placed in grades GS–16, 17, and 18, and on positions in research and development requiring the services of specially qualified scientific or professional personnel, pursuant to 5 U.S.C. 5114 and 5 U.S.C. 3104(c), respectively; to the Committee on Post Office and Civil Service.

3147. A letter from the Director, Federal Bureau of Investigation, Department of Justice, transmitting the Bureau's annual report for calendar year 1977 on positions in grades GS–16, 17, and 18, pursuant to 5 U.S.C. 5114; to the Committee on Post Office and Civil Service.

3148. A letter from the Chairman, U.S. Civil Service Commission, transmitting a report on actions taken on positions approved under 5 U.S.C. 5108(a) during calendar year 1977, pursuant to 5 U.S.C. 5114; to the Committee on Post Office and Civil Service.

3149. A letter from the Secretary of Transportation; transmitting a draft of proposed legislation to amend the Highway Safety Act of 1966 to authorize appropriations, and for other purposes; to the Committee on Public Works and Transportation.

3150. A letter from the Administrator of General Services, transmitting a prospectus proposing alterations at the James Forrestal Building, Washington, D.C., pursuant to section 7(a) of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

3151. A letter from the Administrator of Veterans' Affairs, transmitting a report on his study of the dependency and indemnity compensation program, pursuant to section 204 of Public Law 94–433; to the Committee on Veterans' Affairs.

3152. A letter from the Mayor of the District of Columbia, transmitting his response to the Comptroller General's report (GGD–76–73) entitled "Excess Classroom Space—A Case for Better Planning," pursuant to section 736(b)(3) of Public Law 93–198; jointly, to the Committees on the District of Columbia, and Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DODD: Committee on Rules. House Resolution 990. Resolution providing for the consideration of H.R. 9214. A bill to amend the Bretton Woods Agreements Act to authorize the United States to participate in the Supplementary Financing Facility of the International Monetary Fund (Rept. No. 95–862). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BURKE of Massachusetts:

H.R. 10668. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the old-age, survivors, and disability insurance program and the medicare program, with appropriate reductions in social security taxes to reflect such participation, and with a substantial increase in the amount of an individual's annual earnings which may be counted for benefit and tax purposes; to the Committee on Ways and Means.

By Mr. COCHRAN of Mississippi (for himself and Mr. KETCHUM):

H.R. 10669. A bill to amend title 28 of the United States Code to provide for the appointment of a special prosecutor in appropriate cases, and for other purposes; to the Committee on the Judiciary.

By Mr. DIGGS (by request):

H.R. 10670. A bill to provide explicit authority for the arrest of material witnesses; to the Committee on the District of Columbia.

By Mr. DIGGS (for himself, Mr. FAUNTROY, and Mr. MCKINNEY):

H.R. 10671. A bill to amend the District of Columbia Self-Governmental Reorganization Act to clarify the circumstances under which the Chairman of the Council of the District of Columbia may engage in outside employment, to provide a procedure for removal from office of a member of the Council of the District of Columbia who fails to maintain the qualifications for that office, to modify the requirements with respect to candidacy for certain public offices, and for other purposes; to the Committee on the District of Columbia.

By Mr. DODD:

H.R. 10672. A bill to amend the Soldiers' and Sailors' Civil Relief Act of 1940 to place certain limitations on the exemption of a member of the Armed Forces from the personal property taxes of the jurisdiction in which the member is stationed; to the Committee on Veterans' Affairs.

By Mr. FINDLEY:

H.R. 10673. A bill to add mileage to the Interstate System for a route from Chicago, Ill., to Kansas City, Mo.; to the Committee on Public Works and Transportation.

By Mr. HILLIS (for himself, Mr. GUYER, Mr. MANN, Mr. DUNCAN of Tennessee, Mr. HYDE, Mr. REGULA, Mr. WALKER, Mr. MCDONALD, Mr. DEVINE, Mr. ICHORD, Mr. KINDNESS, Mr. MILFORD, Mr. JOHN T. MYERS, Mr. FREY, Mr. DERWINSKI, Mr. EVANS of Georgia, Mr. ERTEL, Mr. DAVIS, Mr. DAN DANIEL, Mr. LEDERER, Mr. MURPHY of Pennsylvania, Mr. BADHAM, Mr. EILBERG, Mr. GOODLING, and Mr. KETCHUM):

H.R. 10674. A bill to amend the Internal Revenue Code of 1954 to allow taxpayers to treat certain federally required nonproductive expenditures as not chargeable to capital account and as currently deductible; to the Committee on Ways and Means.

By Mr. LAFALCE (for himself, Mr. AKAKA, Mr. ASHLEY, Mr. CARR, Mr. ERTEL, Mr. GUYER, Mr. HUGHES, Mr. ICHORD, Mr. KINDNESS, Mr. LE FANTE, Mrs. LLOYD of Tennessee, Mr. LLOYD of California, Mr. LOTT, Mr. LUNDINE, Mr. NOWAK, Mr. PATTERSON of California, Mr. SARASIN, Mrs. SPELLMAN, Mr. TRAXLER, Mr. TSONGAS, and Mr. VENTO):

H.R. 10675. A bill to amend the Internal Revenue Code of 1954 to provide that trusts established for the payment of product liability claims and related expenses shall be exempt from income tax, that a deduction shall be allowed for contributions to such trusts, and for other purposes; to the Committee on Ways and Means.

By Mr. LAFALCE (for himself, Mr. BALDUS, Mr. BEDELL, Mr. LE FANTE, and Mr. NOWAK):

H.R. 10676. A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of small business investment companies electing to be taxed as regulated investment companies; to the Committee on Ways and Means.

By Mr. LAFALCE (for himself, Mr. LE FANTE, Mr. MAGUIRE, Mr. MURPHY of Pennsylvania, Mr. NOWAK, Mr. PATTERSON of California, Mr. PATTISON of New York, Mr. RICHMOND, Mr. ST GERMAIN, Mrs. SPELLMAN, Mr. TRAXLER, and Mr. WHITEHURST):

H.R. 10677. A bill to encourage investment in small business concerns, and for other purposes; jointly, to the Committees on Education and Labor, Interstate and Foreign Commerce, Small Business, and Ways and Means.

By Mr. LATTA:

H.R. 10678. A bill to prevent the reduction of pension benefits for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, as the result of adjustment on social security annuities; to the Committee on Veterans' Affairs.

By Mr. LUJAN:

H.R. 10679. A bill to modify the boundary of the Cibola National Forest, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MICHAEL O. MYERS (for himself, Mr. HAWKINS, Mr. LEDERER, Mr. NIX, and Mr. PERKINS):

H.R. 10680. A bill to provide a special program of financial assistance to Opportunities Industrialization Centers in order to provide new motivational and skills training opportunities for welfare recipients, and new incentives for business and industry to coordinate their employment plans and job creation efforts with Opportunities Industrialization Centers and national community-based organizations which have demonstrated effectiveness in developing cooperative relationships with the private sector; to the Committee on Education and Labor.

By Mr. ROSENTHAL (for himself and Mr. MOFFETT):

H.R. 10681. A bill to permit the advertising of drug prices and to require retailers of prescription drugs to post the prices of certain commonly prescribed drugs; to the Committee on Interstate and Foreign Commerce.

By Mr. ROSENTHAL (for himself and Mr. MOFFETT):

H.R. 10682. A bill to amend the Federal Food, Drug, and Cosmetic Act so as to require that in the labeling and advertising of drugs sold by prescription the "established name" of such drug must appear each time their proprietary name is used, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mrs. SCHROEDER:

H.R. 10683. A bill to amend title 10, United States Code, to authorize the Secretary of Defense to provide transportation to the Girl Scouts of the United States of America in connection with International World Friendship Events or Troops on Foreign Soil meetings, and for other purposes; to the Committee on Armed Services.

By Mr. SHIPLEY:

H.R. 10684. A bill to establish and translate into practical reality the right of all adult Americans able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to combine full employment, production, and purchasing power goals with proper attention to balanced growth and national priorities; to mandate such national economic policies and programs as are necessary to achieve full employment, production, and purchasing power; to restrain inflation; and to provide explicit machinery for the development and implementation of such economic policies and programs; to the Committee on Education and Labor.

By Mrs. SPELLMAN (for herself and Mr. HANNAFORD):

H.R. 10685. A bill to assist cities and States by amending section 5136 of the Revised Statutes, as amended, with respect to the authority of national banks to underwrite and deal in securities issued by State and local governments, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. TEAGUE (by request):

H.R. 10686. A bill to authorize appropriations for activities of the National Science Foundation, and for other purposes; to the Committee on Science and technology.

By Mr. VENTO:

H.R. 10687. A bill to provide Federal assistance for the control of Dutch elm disease; to the Committee on Agriculture.

By Mr. WEISS:

H.R. 10688. A bill to provide that ionization smoke detectors containing any radioactive isotope shall be considered banned hazardous substances subject to the prohibitions of the Federal Hazardous Substances Act; to the Committee on Interstate and Foreign Commerce.

By Mr. YATRON:

H.R. 10689. A bill to amend title 28 of the United States Code to provide for the merit selection of U.S. attorneys;

By Mr. SMITH of Iowa:

H.R. 10690. A bill to repeal the 1976 Official Standards for Grades of Carcass Beef; to the Committee on Agriculture.

By Mr. ZABLOCKI (for himself, Mr. FASCELL, Mr. FRASER, Mr. HAMILTON, Mr. HARRINGTON, Mr. FINDLEY, and Mr. WINN):

H.R. 10691. A bill to promote the foreign policy, security, and general welfare of the United States by assisting peoples of the world in their efforts toward economic development by establishing the International Development Cooperation Administration, and for other purposes; to the Committee on International Relations.

By Mr. ANDERSON of Illinois:

H.R. 10692. A bill to amend the Internal Revenue Code of 1954 to provide for a 2-year amortization of property which is used in connection with a plan or other property in operation before January 1, 1978, and which is required with respect to such plant or other property pursuant to the Occupational Safety and Health Act of 1970; to the Committee on Ways and Means.

By Mr. BONIOR:

H.R. 10693. A bill to provide financial aid to local fire departments in the purchase of advanced firefighting equipment; to the Committee on Science and Technology.

H.R. 10694. A bill to provide financial aid for local fire departments in the purchase of firefighting suits and self-containing breath-

ing apparatus; to the Committee on Science and Technology.

By Mr. DON H. CLAUSEN (for himself, Mr. PHILLIP BURTON, Mr. HOWARD, and Mr. SHUSTER):

H.R. 10695. A bill to amend title 23 of the United States Code to provide assistance to the Northern Mariana Islands for the construction and improvement of certain highways, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. FASCELL (for himself and Mr. BUCHANAN):

H.R. 10696. A bill to authorize additional appropriations for the Department of State for fiscal year 1978; to the Committee on International Relations.

H.R. 10697. A bill to authorize appropriations for the Department of State for fiscal years 1979, 1980 and for other purposes; to the Committee on International Relations.

By Mr. GILMAN:

H.R. 10698. A bill to facilitate the enforcement by the Coast Guard of laws relating to the importation of heroin, cocaine, marihuana, and other controlled substances, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. JEFFORDS (for himself and Mr. RYAN):

H.R. 10699. A bill to authorize the Secretary of State to implement solar energy and other renewable energy projects in certain buildings owned by the United States in foreign countries; to the Committee on International Relations.

By Mr. LEVITAS (for himself, Mr. MATHIS, Mr. MOTTL, Mr. WHITEHURST, Mr. DERWINSKI, Mr. ANDREWS of North Dakota, Mr. COCHRAN of Mississippi, Mr. GUYER, Mr. SANTINI, Mr. KETCHUM, Mr. FLYNT, Mr. BURGENER, Mrs. MEYNER, Mr. BEDELL, Mrs. FENWICK, Mr. HUGHES, Mrs. LLOYD of Tennessee, Mr. TRAXLER, Mr. FRENZEL, Mr. ASHLEY, Mr. CARR, Mr. CORCORAN of Illinois, Mr. RUSSO, Mrs. SPELLMAN, and Mr. KEMP):

H.R. 10700. A bill to amend the Administrative Procedure Act to require the performance and publication of economic impact analyses in the Federal Register for all proposed and final rules which are subject to the provisions of that act; to the Committee on the Judiciary.

By Mr. MAZZOLI (for himself, Mr. BROWN of Michigan, Mr. YOUNG of Missouri, Mr. ADDABBO, Mr. EILBERG, Mr. DOWNEY, Mr. MCDADE, Mr. WOLFF, Mr. KRUEGER, Mr. WALKER, Mr. BRODHEAD, Mr. ERTEL, Mr. NEDZI, Mr. WHITEHURST, Mr. NOLAN, Mr. GEPHARDT, Mr. BLANCHARD, and Mr. LUKEN):

H.R. 10701. A bill to provide for financial assistance to improve the capabilities of units of local government to deal with career criminals, and for other purposes; to the Committee on the Judiciary.

By Mr. MONTGOMERY (for himself, Mr. MOTTL, Mr. BEARD of Rhode Island, Mr. CORNELL, Mr. WOLFF, Mr. HARSHA, Mr. WALKER, Mr. DRINAN, Mr. TRAXLER, Mr. MATHIS, Mr. BLOUIN, Mr. AKAKA, Mr. REGULA, Mr. KINDNESS, Mr. JONES of North Carolina, Mr. WHALEN, Mr. WATKINS, Mr. HANLEY, Mr. HYDE, Mrs. LLOYD of Tennessee, Mr. ST GERMAIN, Mr. CORRADA, Mr. NICHOLS, Mr. WHITEHURST, and Mr. NATCHER):

H.R. 10702. A bill to amend title 38, United States Code, to improve the pension program for veterans and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. MONTGOMERY (for himself, Mr. FORD of Tennessee, Mr. DAVIS, Mr. RUNNELS, Mr. KAZEN, Mr. WEAVER, Mr. FREY, Mrs. SPELLMAN, Mr. CARR, Mr. PATTEN, Mr. KILDEE, Mr. NEDZI, Mr. BRODHEAD, Mr. JOHN L. BURTON, Mr. GUDGER, Mr. MURPHY of Pennsylvania, Mr. BOWEN, Mr. SANTINI, Mr. MOAKLEY, Mr. WINN, Mr. LEGGETT, Mr. WON PAT, Mr. TAYLOR, Mr. YOUNG of Florida, and Mr. VANDER JAGT):

H.R. 10703. A bill to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. ROGERS (for himself and Mr. CARTER) (by request):

H.R. 10704. A bill to extend and improve title V of the Social Security Act; to the Committee on Interstate and Foreign Commerce.

By Mr. WHITEHURST:

H.R. 10705. A bill to assist former spouses of Federal employees in obtaining court-ordered payments; to the Committee on Ways and Means.

By Mr. CHARLES WILSON of Texas:

H.R. 10706. A bill to amend title 28 of the United States Code to establish a Lufkin Division in the eastern district of Texas, and for other purposes; to the Committee on the Judiciary.

By Mr. BAUCUS (for himself, Mr. AKAKA, Mr. ANDERSON of California, Mr. ANDREWS of North Dakota, Mr. BEVILL, Mr. EVANS of Colorado, Mr. FRENZEL, Mr. GLICKMAN, Mr. LAFALCE, Mr. MCCORMACK, Mr. MARLENEE, Mr. MARRIOTT, Mr. PATTISON of New York, Mr. QUIE, Mr. RONCALIO, and Mr. SISK):

H.J. Res. 709. Joint resolution to express the sense of the Senate and House jointly with regard to establishment of a national water resources management policy; to the Committee on Interior and Insular Affairs.

By Mr. HARRIS:

H.J. Res. 710. Joint resolution to provide for the designation of the week of February 12 to 18, 1978, as National Vocational Education Week; to the Committee on Post Office and Civil Service.

By Mr. SHARP:

H.J. Res. 711. Joint resolution designating the week beginning July 30, 1978, as National Latin Week; to the Committee on Post Office and Civil Service.

By Mr. FAUNTROY (for himself, Mr. JONES of Oklahoma, Mr. DELLUMS, Mr. MCKINNEY, and Mr. WHALEN):

H. Con. Res. 464. Concurrent resolution approving an amendment to the District of Columbia charter relating to initiative and referendum; to the Committee on the District of Columbia.

By Mr. HANSEN (for himself, Mr. MURPHY of New York, Mr. HOLLENBECK, Mr. MURPHY of Pennsylvania, Mr. ERTEL, Mr. SHIPLEY, Mr. AKAKA, Mr. STAGGERS, Mr. PRICE, and Mr. LE FANTE):

H. Con. Res. 465. Concurrent resolution expressing the sense of the Congress with regard to the disposition by the United States of any right to, title to, or interest in the property of Canal Zone agencies and any real property located in the Canal Zone; to the Committee on Merchant Marine and Fisheries.

By Mr. MILFORD:

H. Con. Res. 466. Concurrent resolution directing the Congress and executive agencies to determine how they may aid in achieving national goals in outer space; to the Committee on Science and Technology.

By Mr. ERTEL (for himself, Mr. SKELTON, Mr. DICKS, Mr. GLICKMAN, Ms. OAKAR, Mr. GEPHARDT, Mr. VOLKMER, Mr. WATKINS, Mr. IRELAND, Mr. WEISS, Mr. CORRADA, Mr. KOSTMAYER, Mr. RAHALL, Mr. BENJAMIN, Mr. CORNWELL, Mr. KILDEE, Mr. FLIPPO, Mr. WALKER, Mr. GUDGER, Mr. MATTOX, Mr. MARKEY, Mr. WALGREN, Mr. LUKEN, Mr. TUCKER, and Mr. VENTO):

H. Res. 991. Resolution insisting that the Republic of Korea cooperate in the investigation being conducted by the Committee on Standards of Official Conduct; to the Committee on International Relations.

By Mr. ERTEL (for himself, Mr. KREBS, Mr. WYLIE, Mr. LEACH, Mr. HALL, Mr. BLOUIN, Mr. BURGENER, Mrs. LLOYD of Tennessee, Mr. BALDUS, Mr. PEASE, Mr. LE FANTE, Mr. EILBERG, Mr. MCHUGH, Mr. STEERS, Mr. STOCKMAN, Mr. ROE, Mr. PANETTA, Mr. MITCHELL of Maryland, Mr. CORNELL, Mr. BONIOR, Mr. D'AMOURS, Mr. AMMERMAN, Mr. YOUNG of Missouri, Mr. MOLLOHAN, and Mr. SIMON):

H. Res. 992. Resolution insisting that the Republic of Korea cooperate in the investigation being conducted by the Committee on Standards of Official Conduct; to the Committee on International Relations.

By Mr. ERTEL (for himself, Mr. ROSE, Mr. STARK, Mr. LLOYD of California, Mr. SEIBERLING, Ms. CHISHOLM, Mr. NOWAK, Mr. OTTINGER, Mr. SHARP, Mr. FITHIAN, Mr. WHITLEY, Mr. OBERSTAR, Mr. LUNDINE, Mr. MOFFETT, Mr. CHARLES WILSON of Texas, Mr. CAVANAUGH, Mr. EDWARDS of California, Mr. DELLUMS, Mr. HUGHES, Mr. HAMILTON, Mr. APPLEGATE, Mr. FLOOD, Mr. HANNAFORD, Mr. COHEN, and Mr. PRESSLER):

H. Res. 993. Resolution insisting that the Republic of Korea cooperate in the investigation being conducted by the Committee on Standards of Official Conduct; to the Committee on International Relations.

Mr. ERTEL (for himself, Mr. BEDELL, Mr. UDALL, Mr. DAVIS, Mr. MAZZOLI, Mr. YOUNG of Florida, Mr. FUQUA, Ms. HOLTZMAN, Mr. LEHMAN, Mr. JACOBS, Mr. GIBBONS, Mr. PATTERSON, of Califorina, Mr. MILFORD, Mr. MCKINNEY, Mr. LAGOMARSINO, Mr. NEAL, Mr. STANGELAND, Mr. CARR, Mr. CONYERS, Mr. MURPHY of Pennsylvania, Mr. SANTINI, Mr. EDGAR, Mr. MCFALL, and Mr. LEVITAS):

H. Res. 994. Resolution insisting that the Republic of Korea cooperate in the investigation being conducted by the Committee on Standards of Official Conduct; to the Committee on International Relations.

By Mr. ERTEL (for himself, Mr. BUTLER, Mr. SAWYER, Mr. MAGUIRE, Mr. BAUCUS, and Mr. WIRTH):

H. Res. 995. Resolution insisting that the Republic of Korea cooperate in the investigation being conducted by the Committee on Standards of Official Conduct; to the Committee on International Relations.

By Mr. FRASER (for himself and Mr. DERWINSKI):

H. Res. 996. Resolution to provide funds for the expenses of the investigation and study authorized by a resolution adopted on February 3, 1977, by the Committee on International Relations; to the Committee on House Administration.

By Mr. SMITH of Iowa:

H. Res. 997. Resolution to provide funds for the further expenses of the investigations and studies of the Committee on Small Business; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII,

290. The SPEAKER presented a memorial of the Legislature of the State of Minnesota, relative to family farms; to the Committee on Agriculture.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CHAPPELL:

H.R. 10707. A bill for the relief of Barbara Laws Smith; to the Committee on the Judiciary.

By Mr. DAVIS:

H.R. 10708. A bill for the relief of Donald N. Yates, Jr., Carolyn B. Yates, Guy K. Yates, Sean H. Yates, and Michelle L. Yates; to the Committee on the Judiciary.

By Mr. LAGOMARSINO:

H.R. 10709. A bill for the relief of LeRoy Woodrow Potter; to the Committee on the Judiciary.

By Mr. BOB WILSON:

H.R. 10710. A bill for the relief of Mrs. Adeline O. Smith; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

389. By the SPEAKER: Petition of John W. Campbell, Sharon Hill, Pa., relative to redress of grievances; to the Committee on the Judiciary.

390. Also, petition of Arnold S. Roberts, Shawnee Mission, Kans., relative to redress of grievances; to the Committee on the Judiciary.

391. Also, petition of Arpad Hegedus, Budapest, Hungary, presenting the first complete copy of his musical score entitled "American Trilogy"; to the Committee on Post Office and Civil Service.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1614

Offered by Mr. DINGELL:

Strike out "Paragraph (c)" in subsection (a) of section 201 and insert "Paragraphs (b) and (c)".

After the word "follows" in the end of section 201(a) insert the following:

"(b) The term 'Secretary' means the Secretary of the Interior, except that with respect to functions under this Act transferred to, or vested in, the Secretary of Energy or the Federal Energy Regulatory Commission by or pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 et seq.), the term 'Secretary' means the Secretary of Energy, or the Federal Energy Regulatory Commission, as the case may be.".

In section 8(a)(4)(B) of the Outer Continental Shelf Lands Act as amended by section 205(a) of the Breaux amendment, strike all after the word "paragraph" through the period and insert the following: "shall be by rule, after an opportunity for a hearing, in accordance with section 501 of the Department of Energy Organization Act (42 U.S.C. 7191). Any modification of any such bidding system shall be by rule in accordance with such section 501.".

In section 5 of the Outer Continental Shelf Lands Act as amended by section 204 of the Breaux amendment, strike all after "SEC. 5" through the period at the end of the fourth sentence and insert the following: "ADMINISTRATION OF LEASING OF THE OUTER CONTINENTAL SHELF.—The Secretary shall administer the provisions of this Act relating to the leasing of the outer Continental Shelf, and shall prescribe such rules and regulations as may be necessary to carry out such provisions. The Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservation of the natural resources of the outer Continental Shelf, and the protection of correlative rights therein, and, notwithstanding any other provisions herein, such rules and regulations shall apply to all operations conducted under a lease issued or maintained under the provisions of this Act.".

At the end of section 508 of the Breaux Amendment, add the following: "Nothing in this Act or any amendment made by this Act to the Outer Continental Shelf Lands Act (43 U.S.C. 1331, et seq.) or any other Act shall be construed to affect or modify the provisions of the Department of Energy Organization Act (42 U.S.C. 7101, et seq.) which provide for the transferring and vesting of functions to and in the Secretary of Energy or any component of the Department of Energy.".

Page 270, strike out line 18 and all that follows down through the period on line 4 on page 271 and insert in lieu thereof the following:

Sec. 503. (a) The purpose of this section is to encourage expanded participation by local distribution companies in acquisition of leases and development of natural gas resources on the Outer Continental Shelf by facilitating the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company.

(b) The Federal Energy Regulatory Commission shall, after opportunity for presentation of written and oral views, promptly promulgate and publish in the Federal Register a statement of Commission policy which carries out the purpose of this section and sets forth the standards under which the Commission will consider applications for certificates of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, for the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company. Such statement of policy shall specify the criteria, limitations, or requirements the Commission will apply in determining:

(1) whether the application of any local distribution company qualifies for consideration under the statement of policy; and

(2) whether the public convenience and necessity will be served by the issuance of the requested certificate of transportation. Such statement of policy shall also set forth the terms or limitations on which the Commission may condition, pursuant to section 7 of the Natural Gas Act, the issuance of a certificate of transportation under such statement of policy.

(c) For purposes of this section:

(1) the term "local distribution company" means any person:

(A) engaged in the distribution of natural gas at retail; and

(B) regulated, or operated as a public utility, by a State or local government or agency thereof.

(2) The term "interstate commerce" shall have the same meaning as such term has under section 2(7) of the Natural Gas Act.

(3) The term "Commission" means the Federal Energy Regulatory Commission.

Strike out all of section 503 and insert in lieu thereof the following:

SEC. 503. (a) The purpose of this section is to encourage expanded participation by local distribution companies in acquisition of leases and development of natural gas resources on the Outer Continental Shelf by facilitating the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company.

(b) The Federal Energy Regulatory Commission shall, after opportunity for presentation of written and oral views, promptly promulgate and publish in the Federal Register a statement of Commission policy which carries out the purpose of this section and sets forth the standards under which the Commission will consider applications for certificates of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, for the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company. Such statement of policy shall specify the criteria, limitations, or requirements the Commission will apply in determining:

(1) whether the application of any local distribution company qualifies for consideration under the statement of policy; and

(2) whether the public convenience and necessity will be served by the issuance of the requested certificate of transportation. Such statement of policy shall also set forth the terms or limitations on which the Commission may condition, pursuant to section 7 of the Natural Gas Act, the issuance of a certificate of transportation under such statement of policy.

(c) For purposes of this section:

(1) the term "local distribution company" means any person:

(A) engaged in the distribution of natural gas at retail; and

(B) regulated, or operated as a public utility, by a State or local government or agency thereof.

(2) The term "interstate commerce" shall have the same meaning as such term has under section 2(7) of the Natural Gas Act.

(3) The term "Commission" means the Federal Energy Regulatory Commission.

Strike out "Paragraph (c)" in subsection (a) of section 201 and insert "Paragraphs (b) and (c)".

In section 5 of the Outer Continental Shelf Lands Act as amended by section 204 of the Breaux Amendment, strike all after "SEC. 5" through the period at the end of the fourth sentence and insert the following: "ADMINISTRATION OF LEASING OF THE OUTER CONTINENTAL SHELF.—The Secretary shall administer the provisions of this Act relating to the leasing of the outer Continental Shelf, and shall prescribe such rules and regulations as may be necessary to carry out such provisions. The Secretary may at any time prescribe and amend such rules and regulations as he determines to be necessary and proper in order to provide for the prevention of waste and conservaton of the natural resources of the outer Continental Shelf, and the protection of correlative rights therein, and, notwithstanding any other provisions herein, such rules and regulations shall apply to all operations conducted under a lease issued or maintained under the provisions of this Act.".

At the end of section 508 of the Breaux Amendment, add the following: "Nothing in this Act or any amendment made by this Act to the Outer Continental Shelf Lands Act (43 U.S.C. 1331, et seq.) or any other Act

shall be construed to affect or modify the provisions of the Department of Energy Organization Act (42 U.S.C. 7101, et seq.) which provide for the transferring and vesting of functions to and in the Secretary of Energy or any component of the Department of Energy.".

Strike out all of section 503 and insert in lieu thereof the following:

SEC. 503. (a) The purpose of this section is to encourage expanded participation by local distribution companies in acquisition of leases and development of natural gas resources on the Outer Continental Shelf by facilitating the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company.

(b) The Federal Energy Regulatory Commission shall, after opportunity for presentation of written and oral views, promptly promulgate and publish in the Federal Register a statement of Commission policy which carries out the purpose of this section and sets forth the standards under which the Commission will consider applications for certificates of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, for the transportation in interstate commerce of natural gas, which is produced from a lease located on the Outer Continental Shelf and owned by a local distribution company, from such lease to the service area of such local distribution company. Such statement of policy shall specify the criteria, limitations, or requirements the Commission will apply in determining:

(1) whether the application of any local distribution company qualifies for consideration under the statement of policy; and

(2) whether the public convenience and necessity will be served by the issuance of the requested certificate of transportation.

Such statement of policy shall also set forth the terms or limitations on which the Commission may condition, pursuant to section 7 of the Natural Gas Act, the issuance of a certificate of transportation under such statement of policy.

(c) For purposes of this section:

(1) the term "local distribution company" means any person:

(A) engaged in the distribution of natural gas at retail; and

(B) regulated, or operated as a public utility, by a State or local government or agency thereof.

(2) the term "interstate commerce" shall have the same meaning as such term has under section 2(7) of the Natural Gas Act.

(3) the term "Commission" means the Federal Energy Regulatory Commission.

By Mr. FISH:

Strike all of Section 506, beginning on page 273, line 9, through page 277, line 10.

By Mr. HUGHES:

On page 173, after line 2, insert the following new section:

DISPOSITION OF REVENUES

SEC. 206. Section 9 of the Outer Continental Shelf Lands Act (43 U.S.C. 1338) is amended to read as follows:

"SEC. 9. DISPOSITION OF REVENUES.—(a) For the period beginning June 5, 1950, and ending September 30, 1978, all rentals, royalties, revenues, or other sums paid to the Secretary or the Secretary of the Navy pursuant to, or in connection with, any lease for any area of the Outer Continental Shelf shall be deposited in the Treasury of the United States and credited to miscellaneous receipts.

"(b) Beginning on October 1, 1978, and for each fiscal year thereafter, all rentals, royalties, revenues, or other sums paid to the Secretary or the Secretary of the Navy pursuant to, or in connection with any lease for any area of the Outer Continental Shelf shall be deposited in the Treasury of the United States and credited to miscellaneous receipts (other than any amount credited to the Land and Water Conservation Fund pursuant to section 2(c)(2) of the Land and Water Conservation Fund Act of 1965); and of the amounts so deposited, in each fiscal year, 20 per centum, up to a maximum of $200,000,000, shall be credited to the Coastal Energy Impact Fund established by section 308(h) of the Coastal Zone Management Act of 1972, as amended."

Redesignate sections 206 through 208 as 207 through 209 respectively.

On page 268, immediately after line 23, insert the following new subsection:

(e) Subsection (h) of section 308 of the Coastal Zone Management Act of 1972 is amended to read as follows:

"(h)(1) There is established in the Treasury of the United States the Coastal Energy Impact Fund. The Fund shall consist of—

"(A) amounts credited to the Fund under section 9 of the Outer Continental Shelf Lands Act;

"(B) any sums appropriated to the Fund;

"(C) payments of principal and interest received under any loan made under subsection (d)(1);

"(D) any fees received in connection with any guarantee made under subsection (d)(2); and

"(E) any recoveries and receipts under security, subrogation, and other rights and authorities described in subsection (f).

"(2) Amounts in the Fund received under clause (A) of paragraph (1) of this subsection shall be available to the Secretary for the purpose of carrying out subsection (b) of this section. All payments made by the Secretary to carry out the provisions of subsection (b) shall be paid from the Fund, only to the extent provided for in appropriations Acts. Sums in the Fund which are not appropriated for purposes of subsection (b) shall be returned to the Treasury.

"(4) Amounts in the Fund received under clauses (B) through (D) of paragraph (1) of this subsection shall be available to the Secretary without fiscal year limitation as a revolving fund for the purposes of carrying out subsections (c) and (d). All payments made by the Secretary to carry out the provisions of subsections (c), (d), and (f) (including reimbursements to other Government accounts) shall be paid from the Fund, only to the extent provided for in appropriations Acts. Sums in the Fund which are not currently needed for the purposes of subsections (c), (d), and (f) shall be kept on deposit or invested in obligations of, or guaranteed by, the United States."

On page 269, strike lines 1 through 9 and insert in lieu thereof the following: "Zone Management Act of 1972 is amended by striking "eight fiscal years occurring during the period beginning October 1, 1976, and ending September 30, 1984" and inserting in lieu thereof "fiscal years ending September 30, 1977 and September 30, 1978, respectively"."

On page 265, strike lines 4 through 13 and insert in lieu thereof the following:

(2) by striking on "(A), (B), (C), and (D)" and inserting lieu theroef "(A), (B), and (C)";

(3) in subparagraph (A), by striking out "one-third" and inserting in lieu thereof "one-half";

(4) in subparagraph (B), by striking out "one-sixth" and inserting in lieu thereof "one-quarter";

(5) in subparagraph (C), by striking out "one-sixth" and inserting in lieu thereof "one-quarter";

(6) by striking out subparagraph (D).

On page 265, strike line 24 through line 7 on page 266, and insert in lieu thereof the following:

"(B)(i) If, in any fiscal year, any coastal state will not receive a grant under subparagraph (A), (B), or (C) of paragraph (2), the Secretary shall make a grant to each coastal state in an amount equal to 2 per centum of the total amount available for making grants to all states under such paragraph (2) in such fiscal year if any other coastal state in the same region is receiving a grant under such subparagraphs in such fiscal year: *Provided*, That no coastal state shall receive such grant unless the Secretary determines that it is an affected state.

"(ii) For purposes of this subparagraph, the term "affected state" means any State—

"(I) the laws of which are declared, pursuant to section 4(a)(2) of the Outer Continental Shelf Lands Act, to be the law of the United States for the portion of the outer Continental Shelf on which any program, plan, lease sale, or other activity is proposed, conducted, or approved pursuant to the provisions of such Act;

"(II) which is or is proposed to be directly connected by transportation facilities to any artificial island, installation, or other device referred to in section 4(a)(1) of the Outer Continental Shelf Lands Act;

"(III) which is receiving, or in accordance with a proposed activity will receive, oil for processing, refining, or transshipment which was extracted from the outer Continental Shelf and transported directly to such State by means of vessels or by a combination of means including vessels;

"(IV) which is designated by the Secretary as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in the social, governmental, or economic infrastructure, resulting from the exploration, development, and production of oil and gas anywhere on the outer Continental Shelf; or

"(V) in which the Secretary finds that because of outer Continental Shelf activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine or coastal environment in the event of any oilspill, blowout, or release of oil or gas from vessels, pipelines, or other transshipment facilities. "(iii) For purposes of this subparagraph—".

On page 274, strike line 21 through line 25 on page 276, and insert in lieu thereof the following:

(d) The investigation conducted pursuant to this section shall include, among other items—

(1) (A) a determination of the maximum attainable rate of production (MAR) of crude oil and natural gas from significant fields on the Outer Continental Shelf; and

(B) an analysis of whether the actual production has been less than the MAR and, if so, the reasons for the differences.

(C) For purposes of this subsection, the term "maximum attainable rate of production" or "MAR" means the maximum rate of production of crude oil and natural gas which may be produced under actual operating conditions without loss of ultimate recovery of crude oil and natural gas.

(2) an estimate of the total discovered crude oil and natural gas reserves by fields (including proved and indicated reserves) and undiscovered crude oil and natural gas resources (including hypothetical and speculative resources) of the Outer Continental Shelf;

(3) the relationship of any and all such information to the requirements of conservation, industry, commerce, and the national defense;

(4) an independent evaluation of trade association procedures for estimating Outer Continental Shelf reserves, ultimate recovery, and productive capacity for years in which trade associations made such estimates. In order to provide maximum opportunity for

evaluation and continuity, the Secretary shall obtain all the available data and other records, including a description of the methodology and estimating procedures, which the trade associations used in compiling their data with respect to the reserves.

(e) The Secretary shall, not later than one year after the date of enactment of this section, submit an initial report to Congress. The initial report shall include cost estimates for the separate components of the continuing investigation and a time schedule for meeting all of its specifications. The schedule shall provide for producing all the information required in subsections (d)(1)(A), (d)(2), and (d)(3) of this section on the day following the first complete calendar year after enactment, and every two years thereafter. The Secretary shall make separate reports on the data acquired pursuant to subsection (d)(4) of this section as follows:

(1) a report within six months after the date of enactment of this section, on the acquisition and details of trade association data and information;

(2) within twelve months after submission of the report required by subsection (e)(1) above, an evaluation of the trade association materials; and

(3) within twelve months after submission of the report required by clause 2 of this subsection, the relationship between trade association data and the new data collected under this section.

By Mr. TREEN:

On page 205, line 14, after the word "enactment" and before the word "with" insert the following: "in a frontier area".

Page 211, line 9, strike all after "1972", down through and including line 10, and insert in lieu thereof a period.

On page 215, strike the period on line 23 and insert in lieu thereof the following: ", except that this subsection shall not apply to any lease with respect to which a development plan has been submitted, in accordance with regulations issued by the Secretary under section 5 of this Act, before the effective date of the regulations issued by the Secretary under this section."

On page 265, line 22, strike "available" and insert in lieu thereof "authorized".

On page 269, on line 11, strike "1977" and insert "1978".

H.R. 2664

By Mr. COHEN:

Strike all of the language beginning on page 1, line 7 through to "accordingly." on page 2, line 5, and insert the following in lieu thereof: "Notwithstanding any other provision of law, and without regard to the defense of res judicata or collateral estoppel, the Court of Claims shall review on the merits the determination of the Indian Claims Commission (Docket No. 74-B) entered February 15, 1974. In conducting such review, the Court shall receive and consider any additional evidence, including oral testimony, that either party may wish to provide on the issue of a fifth amendment taking, and shall determine that issue de novo."

H.R. 8336

By Mr. McDONALD:

Page 3, line 3, insert after the word "exchange." the following new sentence: "No such lands, waters or interests therein may be acquired without the consent of the owner thereof."

Page 9, after line 21, insert the following new subsection:

(d) No amount authorized to be appropriated under this Act may be expended until such time as the Secretary determines that the State in which the recreation area is located has established adequate procedures to permit persons owning, or lawfully using, property adjacent to the recreation area to obtain compensation from the State or local government for any injury or damage to such person or property in any case in which such injury or damage is caused directly or indirectly by individuals while using the recreation area or entering or departing from the recreation area. Such procedures shall not be deemed adequate unless they include an opportunity for such persons to bring an action and obtain relief in State or local courts against the State or local governments respecting such injury or damage in any case in which administrative relief is inadequate to provide compensation for such injury or damage.

H.R. 9214

By Mr. CAVANAUGH:

The Bretton Woods Agreements Act (22 U.S.C. 286-286k-2), as amended, is further amended by adding at the end thereof the following new section:

SEC. 29. The Secretary of the Treasury shall instruct the United States Executive Director to the International Monetary Fund to oppose and vote against the use of Fund resources by:

(1) a member country which has renegotiated for terms more favorable to itself, a majority of the value of its outstanding loans with the Fund, official export credit institutions, and any multilateral or regional development banks and has not agreed to comparable treatment of a majority of the value of its outstanding loans with private creditors; and

(2) a member country which does not agree to refrain from seeking or accepting the renegotiation, for terms more favorable to itself, of a majority of the value of its outstanding loans with the Fund, official export credit institutions, and any multilateral or regional development banks unless it seeks or accepts comparable treatment of a majority of the value of its outstanding loans from private creditors.

The Secretary of the Treasury shall determine in writing, taking all relevant factors into consideration, whether comparable treatment has been agreed to. These written determinations shall be provided to the appropriate committees of Congress.

By Mr. STEERS:

Page 3, add new section (d) after line 14: The Bretton Woods Agreement Act (22 U.S.C. 286-286k-2), as amended, is further amended by adding at the end thereof the following new subsection:

"(d)(1) The Secretary of the Treasury shall instruct the United States Executive Director on the Executive Board of the International Monetary Fund to initiate a wide consultation with the Managing Director of the Fund and other member country Executive Directors with regard to encouraging the IMF staff to formulate stabilization programs which, to the maximum feasible extent, foster a broader base of productive activities which are designed to meet basic human needs, and upon which participating countries regularly depend for imports.

"(2) In accordance with the unique character of the International Monetary Fund, the U.S. Executive Director shall take all possible steps to the end that all Fund transactions, including economic programs developed in connection with the utilization of Fund resources, do not contribute to the violation of basic human rights, such as torture, cruel or inhumane treatment of degrading punishment, prolonged detention without charge, or other flagrant denials of life, liberty and the security of person; or contribute to the deprivation of basic human needs.

"(3) In order to gain a better understanding of the social, political and economic impact of the Fund's stabilization programs on borrowing countries, especially as it relates to the poor majority within those countries, the Executive Director representing the United States to the Fund shall prepare and submit, not later than 180 days after the close of each calendar year, a report to the Congress. Such report shall evaluate, with respect to countries to which loans are made by the facility during such year, the effects of the policies of those countries which result from the standby agreement on the ability of the poor in such country to obtain:

(a) an adequate supply of food with sufficient nutritional value to avoid the debilitating effects of malnutrition;

(b) shelter and clothing;

(c) public services, including health care, education, clean water, energy resources, and transportation;

(d) productive employment that provides a reasonable and adequate wage."

EXTENSIONS OF REMARKS

BEHIND THE SALT DELAY

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. LAGOMARSINO. Mr. Speaker, the issue of arms control and disarmament has become a critical element in America's foreign and military policy. However, I am very concerned that the current SALT negotiations may not be in this country's best interests.

I would like to bring to the attention of my colleagues an editorial by Messrs. Evans and Novak which outlines some of the problems SALT II faces.

The editorial follows:

BEHIND THE SALT DELAY

(By Rowland Evans and Robert Novak)

The historic Senate debate on arms control is being inexorably delayed, perhaps into next year beyond the 1978 elections, thanks to developments in Washington and Geneva tied to a single word: verification.

In Washington, prospects for Senate ratification of a new SALT (strategic arms limitation talks) agreement are going down instead of up because of serious doubts about Soviet compliance. In Geneva, U.S. efforts at verification are partly responsible for unexpected delay in negotiating an agreement.

Central to this problem is the Soviet Backfire bomber. The Senate insists on verification that the bomber will not be an intercontinental weapon, the difficulty of which has stymied the U.S.-Soviet talks. The U.S. effort to bar modernization of strategic weapons, another unresolved point, also reveals the limits of verification.

But questions larger than verification are raised. Does the willingness of U.S. negotiators to accept the Backfire as a non-strategic weapon betray over-eagerness for agreement? Is the U.S. attempt to bar modernization an effort to compensate for the vulnerability of U.S. minuteman strategic missiles?

Indeed, expert critics of the nearly completed SALT II agreement feel it gives the Kremlin a dangerous strategic advantage even if all limits on the Soviets could be verified. But it is verification, more understandable to the layman, that causes unease among uncommitted senators—particularly John Glenn (D-Ohio).

Having supported chief SALT negotiator Paul Warnke in his closely contested confirmation fight, Glenn was counted on by

the White House as a vote for ratification. But after attending the Geneva negotiations as a Senate observed, the former astronaut came away worried about verification. Unless restrictions on the Soviet Union are made more verifiable than they are today, Glenn will vote no on SALT II.

Consequently, senior administration officials are in no hurry for a SALT ratification debate and would prefer waiting until after the 1978 elections. This lack of haste is one reason why the old Carter administration forecast that a SALT treaty would be initiated this month is now inoperable.

Moreover, the Backfire bomber issue remains a serious stumbling block. The Backfire clearly has the range to reach North America on a one-way flight. The Russians insist it is not a strategic weapon, will not count it in SALT's numerical limitation on strategic weapons, and will not even mention it in the Salt II agreement. Instead, they offer a letter from President Leonid Brezhnev promising not to use the Backfire as an intercontinental weapon.

In a recent interview over RKO general television, Warnke told us any Backfire agreement "will have to be something which is legally binding and which is verifiable." What the U.S. has in mind is co-signing Brezhnev's letter to make it "legally binding." But even putting it into the agreement itself would not guarantee against the Russians turning the Backfire overnight into a strategic weapon. In short, it is not verifiable.

Simultaneously, Soviet negotiators use the non-verifiable argument in resisting U.S. demands to prohibit modernization of intercontinental missiles. This demand is intended, by preventing Soviet modernization, to bolster the largely discredited argument by the arms-control community that SALT II would contain the Soviet threat to minuteman silos.

But Soviet negotiators are adamant. One recent official cable back from Geneva describes this position by Soviet negotiator Shchukin: "Freezing any improvements to existing ballistic missiles (for example, guidance) was impossible and unverifiable. Any military man who wanted to introduce improvements to his system could do so, could not be stopped, and it was absolutely unverifiable." The Russians are saying: We couldn't stop our military if we wanted to.

If missile improvements are unverifiable, why should the Russians complain? The suspicion is that Moscow plans such extensive modernization of missiles that some of it would surely be observed. Thus, the real concern raised by SALT II is not just lack of verification but the Soviet Union's implacable improvement of strategic systems while the U.S. scraps the B–1 bomber, slows development of the MX mobile missile, and agrees to limit cruise missile development.

In reply Paul Warnke is known to feel there must be some measure of confidence in Russian good faith. But if such confidence is all that is necessary, the entire tedious procedure of SALT negotiations would seem superfluous. The fact is that Glenn and many other fence-sitting senators lack Warnke's measure of confidence in the Russians, and that is the basic reason why the administration is by no means ready for a SALT debate in the Senate.

WILLIAM T. MURPHY

HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. MURPHY of Illinois. Mr. Speaker, I would like to pay tribute at this time to former Congressman William T. Murphy, who died January 29 in Chicago at the age of 78. Bill Murphy was my distinguished predecessor who represented Chicago's South Side from 1959 to 1971.

A self-taught expert on China, Bill Murphy made his mark in 1969 when he presided over congressional hearings that opened the door to diplomatic relations with the People's Republic of China. Bill served as chairman of the House Subcommittee on Asian and Pacific Affairs, and was also a member of the Subcommitee on Africa.

Prior to his election to Congress in 1958, Bill Murphy was alderman of Chicago's 17th Ward for 24 years. He was a member of the Chicago Planning Commission from 1947 to 1959, and was a delegate to the Democratic National Conventions in 1944, 1948, 1952, and 1956. In addition to being a lawyer, Bill was a licensed professional engineer and a registered land surveyor.

Mr. Speaker, I know that my colleagues join me in offering their condolences to Bill Murphy's family—his sister, daughter, two sons, and five grandchildren. The passing of Bill Murphy means that Chicago has lost one of its most distinguished and loyal public servants.

ETHICS IN SPACE

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. BOB WILSON. Mr. Speaker, Prof. Kenneth Nuss of San Diego's National University recently presented a most timely paper, "Ethics in Space." to the Conference of Science and Ethics in Denver, Colo. Professor Nuss postulates that future travel in outer space is a foregone conclusion and that we should begin planning now for that future use.

We are using outer space to some extent right now—satellites, space laboratories, and the like—and the potentialities of space are limited only by our imaginations.

Professor Nuss raises some thoughtful points, and, most especially in view of the recent crash landing of a Russian satellite in Canada, I commend it to the attention of my colleagues:

ETHICS IN SPACE

(By Prof. Kenneth Nuss, National University, San Diego, Calif.)

INTRODUCTION

(Philosophy is not my common domain. I am a man of science, of engineering, and of business. Men of these professions are known for practical thinking. They do not ponder so much as to where they are going, but rather how to get there. They do not worry so much about the morality of what is done, as they do about how to serve the desires of society. But this in itself is a search for philosophy from my point of view. It is, in effect, philosophy by majority or public ethics. And it is from this point of view that I discuss "Ethics in Space".)

Any discussion of ethics in space is premised on the belief that it is alright for man to venture into space in the first place. With the understanding that there still are many people who question the extension of our environment into the spaces beyond our atmosphere, I feel a need to address that question first.

Men of philosophy and religion may provide insights to the morality of what we do and what is done. But in the end, their wisdom often has limited impact on what is done. In other words, there is a difference between what should be done, and what really happens. No matter what the decisions of a philosopher are, the broad goals and needs of society and mankind as a whole are served, and it is these needs and goals that dictate the course of events that frame our future.

For instance, the mere dislike for war has not prevented it in the past and will not in the future. So long as masses of people have different ideas as to what the future should be like and are willing to sacrifice some resources for what they consider higher needs, there will be wars.

The point is this: When faced with the alternatives of the future, and upon weighing these alternatives according to what is economically, socially, and technically feasible, the inevitable is bound to occur. Some religions as the AMISH, still view the automobile as a vehicle that God never intended for us to use. But because it was generally socially and economically desirable, and technically feasible, it is here today. And most of us use it. Some, for their religious reasons, do not, but the majority of us do.

Similarly, electricity and the use of it was not universally applauded upon its discovery. But because it fills a social need, and is economically and technically feasible, we have it today. The people want it—they get it.

The airplane, as another example, overcame ridicule and disclaimers because in the end, it satisfied another need and desire, of society.

It is like being constantly presented with a new technical, if not geographic, frontier. And as each frontier is absorbed, a new frontier emerges. The frontiers occur because society has an interest in them. If we did not have an interest in them, the challenge would be ignored, and in reality not exist.

Outer space is our new frontier. To many, the military included, it is socially and economically desirable, and it is technically feasible. It represents the challenge to continue expanding. Therefore it is bound to occur. Outer space is not our last frontier—neither is it our first. It is just another big step for mankind. Another frontier.

Outer space is also a very visible frontier and it indirectly affects everyone. Thus, unlike the automobile and electricity which one could ignore if he or she wanted to, outer space evokes an interest because, like the airplane, we are subject to overflight (either as a country or an individual), an event over which we have no control, and with a resultant loss of privacy. Therefore, for the above reasons, we can fully expect to see continuing ventures into space.

This, then, brings us to the first of several ethical questions that must be asked: Who has the right to space? Like airspace, are the geographic boundaries of nations projected upward to protect that nation's interests? Current aviation regulations recognize the rights of nations to "own and control" the airspace above their territory, similar to one's right to own the water and minerals beneath the private property that one owns. Theoretically, these private airspace projections could project into outer space, to infinity.

Thus, the U.S. or U.S.S.R. could claim the right to destroy any satellites that entered its projected airspace as a violation of national privacy. Such action would, by the laws of astrodynamics, severely restrict the types of orbits that may be flown. If several nations claimed this right to airspace, the effect would be to make it virtually im-

possible to orbit a satellite in any direction because the orbit's ground trace changes as the earth rotates. The unchangeable orbits would eventually invade the "airspace". The rotation of the earth around the sun and the orbital motion of heavenly bodies provide another argument against the projected airspace idea. As an example, suppose one's country were within 21° of the equator. We should then have the sun directly above us, i.e., in our projected airspace, during certain seasons of the year, and could theoretically according to the previous argument, "claim" it. But our claim would be valid only during those periods of the day when the sun was directly overhead. Later in the day, someone else could claim the sun. So in astronautics the property within one's projected airspace changes with time, is near impossible to define, and is an unrealistic argument.

The alternative to projected airspace is that orbital space belongs to everyone. Thus, no nation may claim the sun to be its own during certain times of the day, during certain seasons of the year. No nation may claim its airspace is violated when a satellite from another country overflies it. Each nation would be able to orbit the earth in a manner however it chooses to do so to fulfill its needs. This alternative also presents several problems, however. In agreeing that outer space belongs to everyone, we inherently agree that nations may be overflown for reconnaissance purposes, or to interfere with electronic communications, etc. In addition, if it belongs to everybody, then Mexico, Ethiopia, Vietnam and others have some authority in controlling what occurs in space, just as much as the U.S. and U.S.S.R. do, and should properly be consulted for all space activity. What happens when half-a-century from now, each of thirty or forty capable nations exercises its right to outer space and begins doing its own thing by orbiting vehicles? What happens when large chunks of orbiting material re-enter the atmosphere and crash into another country, destroying life and property? The likelihood of this happening is not probable, but it is possible. The complexities of this space ownership issue rapidly overwhelm any simple solution. Once again, whatever is socially and economically desirable, and technically feasible for the world's varied societies, is bound to occur.

As a practical solution, I propose that projected airspace ends with the atmosphere, the limit being defined as that altitude above which aero-dynamic vehicles cannot sustain flight. Beyond that, it belongs mutually to all participants, but not necessarily to all nations. Perhaps that is not the way it should be, but the way we can realistically expect it to be.

The reasons are related to the second ethical question: Whose laws and rules govern space, if any? We say that outer space belongs to everybody, but why should the two major participants (the U.S. and U.S.S.R.) be restricted in their activity by the desires of third-party nations? And besides, do the third-party nations have any means to enforce their rules in space? It quickly evolves to the fact that as long as they have the power, the U.S. and U.S.S.R. can do as they please. Any territorial or other conflicts in space will have to be resolved between the interested parties. Other parties might have a great interest in the solution, but unless they have some means of enforcing their will, their interest is of little consequence. Thus it appears that the rules of space must be resolved by the interested participants, and that non-participants would realistically have little control.

Eventually, consortium agreements may be necessary to prevent common conflicts and to resolve differences. The U.S. and U.S.S.R. already have existing, limited agreements. Some of us foresee a future requirement for a governing-body, similar to the United Nations, for all nations that participate in outer-space activities. Unfortunately, it can also be foreseen that conflicts in space are inevitable and that we may only attempt to prevent such conflicts, similar to the use of the United Nations in trying to resolve differences among nations before heated issues turn to war. Such a body in reality is probably several decades away. But preliminary efforts should be considered now. Like most issues, this one will probably be resolved in a way that is most expedient for the participants involved, and once again, morality of the solutions may be considered only to the extent of how it effects the decision-makers.

Another important question: Should we colonize space? Should we allow humans to inhabit space-colonies? Once we start it, there is probably no going back. And to some, including my own father, God put us here on earth and that's where we belong. But are we, for eternity, going to live by self-imposed immobility? A short five-hundred years ago, the ethics and sanity of the Spaniards were questioned when Christopher Columbus set to sail "around" the world. Had he not made his attempt, Europe might have for years rested with the thought that nothing was "out there". But surely someone else at a later date would have concluded that earth included more than a flat surface of Europe, Asia, and Africa, and would have made the same discovery. It is inconceivable that we should forever ignore the colonization of space. There shall come a time when it may be socially and economically desirable to do so, and technically feasible. At that time, colonization of space will occur! And just as we Americans feel just as ethical as our European counterparts, the space colonists will feel just as ethical, I am certain, in their belief that they belong there, in space.

Related questions include: What economic priorities should colonization plans receive? Is it ethical to "freeze" bodies to be able to transport them great distances through space? Should colonization of space, like colonization of the Americas, be limited to those who can afford to do so, for distant penal colonies, or who are forced to go because of their beliefs? Should we try to set up new and perfect societies—Utopias—or should we let them evolve, however they happen to?

Most of these type questions may be answered by time. But just as these questions may be answered with time, other unknown queries may arise from answers. What is important is this: as philosophers, and as men of science and commerce and culture, we should proceed with understanding and ethical intentions so that a world precedent may be established. We must provide an ethical launch pad from which to proceed. It could be a great failure of our generation if we proceed without reflection on the significance of these first steps into the great unknown, and allowed outer space to become an arena for the unscrupulous. Therefore we must reflect upon our moral values to determine for the benefit of mankind, what should happen. Common moral values and common decency demand the following:

(a) That one nation, or one agency, should not be allowed to conquer outer space in order to control events on earth. Just as modern military men theorize that he who controls the air (meaning with airpower), controls what happens on the battlefield below, it could be theorized that if any one nation or military organization were allowed to control earth's orbital space, that organization could effectively dominate what happens beneath them on the ground. We must prepare for, and prevent if possible, this eventuality. The use of space for military reasons must be discouraged.

(b) That exploration into space should not be at the expense of deprived peoples. Any ventures into space should be justifiable in that all mankind will eventually benefit. I believe that NASA has been very responsible in this regard, by (1) searching for scientific truths that will help us understand our own planet, (2) providing communication benefits to the citizens of free nations in the form of TV and telephone communications relay satellites, (3) providing infrared and other maps of earth to the benefit of farmers, fishermen, environmentalists, cartographers, geologists and others. The side effects of aerospace employment and new technology should not be overlooked. Ventures to the moon and other planets also help us in the understanding of ourselves and our planet.

(c) That we must be very careful not to contaminate other planets with diseases and other oganisms, thereby providing the possibility of rendering them undesirable or useless for ages to come. A parallel example that we are familiar with is the rabbit in Australia. With no natural enemies there, it has been a nuisance ever since. Any visit to another heavenly body must be carefully controlled in this regard, to prevent the demise of another heavenly body.

(d) That decent ethical standards must prevail in space as well as anywhere else. Piracy, destruction of property, maiming and other unscrupulous acts should not be tolerated. As we inhabit space, it would be appropriate to form laws that all participants can respect and adhere to. A governing body similar to the United Nations, as described previously, could suffice for this purpose.

(e) That if we should find other civilizations in space, we must take care not to disrupt their ways of life by injecting our own, and we should not exploit them if they are weaker, to satiate our need for energy, food, minerals, etc. Interestingly, if they are stronger and/or more advanced than we, we may be subject to their prevailing wisdom and needs. Hopefuly they would not exploit us given this circumstance. The subject of other civilizations in space brings up a whole new realm of possibilities that is beyond the scope of this paper.

Failure to adhere to these moral goals could bring catastrophic results. It is in the best interests of humanity that we proceed with responsibility and reflection.

Hopefully man's exploits into outer space will have an effect of bringing the various nations and peoples of earth closer together, and will produce an overall beneficial effect. We need to re-evaluate our goals and our actions on a continuing basis, and if the effect of our actions is detrimental rather than beneficial, we must stop. We must continually and forever ask ourselves, "Is it right?". For the present, I believe that it is.

MAN OF THE YEAR

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. WAXMAN. Mr. Speaker, the most generous gift that can be bestowed upon one's fellows is that of one's self; time and energy and thought tirelessly devoted to community needs. Nat Jolton exemplifies this gift of self, and he is to be honored as "Man of the Year" for his devotion by the Guardians of the Jewish Home for the Aged, Ida Mayer Cummings Auxiliary at its 49th annual Charity Ball on February 26, 1978.

A popular well-loved man, Nat Jolton has been an articulate and successful spokesman for the Home. As a past president he headed 2,500 business and professional men in the Home's Guardians, and has held, in addition, many other key offices including the vice presidency Currently he serves as chairman of the public relations and auxiliary liaison committee.

Nat's lively wife, Ruth, has been on the advisory board of the Cummings Auxiliary, of which she is a life member, and a second generation of Jcltons is now serving the aged through their sons, Buddy and Jerry.

Nat Jolton was raised on the East Side of New York right after the turn of the century, began pursuit of a legal career at Fordham University and finished his law studies at Tifton College in Georgia, where he passed the bar in 1922. But before he could become a practicing attorney, family circumstances took him to Colorado where, with his late brother, Jerry, he operated a chain of general merchandise stores in a number of small towns. When Nat arrived in Los Angeles during World War II, he was not quite 40 and decided to go back into business. He also committed himself to community service. His years of devotion to the Guardians still left room for other activities; he helped organize the Brentwood Country Club, became active with Temple Israel of Hollywood and served as a key man of the United Jewish Welfare Fund as well as supporting many other causes of concern to his community. Nat is a strong believer in the dignity of man, and truly can be termed a "Tzaddik," the Hebrew appellation given to a person who is upright and honorable. His erudition and wit, his humanitarian instincts, his love for his fellow man, his never-ceasing efforts to help others, all combine to prove his fitness to be honored. I ask the Members to join me in extending congratulations and good wishes on this occasion of Nat Jolton's receipt of the Man of the Year Award.

HOUSTONIAN'S VIEWS ON CRS TAX RATE STUDY

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. ARCHER. Mr. Speaker, a constituent, James E. Bobo, has shared his letter with me concerning his views on a Congressional Research Service study on "Tax Provisions and Effective Tax Rates in the Oil and Gas Industry." I am sure this letter will be of interest to my colleagues:

Since I am knowledgeable in Federal income tax, I have read with great interest the Congressional Research Service (CRS) study entitled "Tax Provisions and Effective Tax Rates in the Oil and Gas Industry," which was released for Sunday papers October 9, 1977. Undoubtedly, Jane Gravelle is a theorist rather than a tax practitioner. I wish to point out some glaring misstatements and unfounded assumptions noted in a cursory review of the release.

The CRS study is directed toward independent producers, yet the comments encompass the oil and gas industry. One of the deductions entering into the effective tax rate is percentage depletion. Percentage depletion has been substantially repealed for major oil and gas producers, and substantially curtailed for large independent producers. It is interesting to note that percentage depletion has not been repealed for mining and/or hard mineral companies. One of the unfounded assumptions is noted in footnote on page CRS–10; wherein it is stated, "It is unlikely that major oil and gas firms pay any minimum tax." I know that at least one of the very largest major petroleum companies paid substantial minimum tax until the repeal of percentage depletion.

One of the misstatements occurs in the example on page CRS–13 regarding Investor B. If Investor B invests $100,000 and then sells his asset (producing well) for $100,000, he has merely recouped his investment. How could he have a taxable gain or loss? The footnote on page CRS–14 indicates special capital gain tax rates apply if a gain is incurred. This is not correct because Sections 1245 and 1254 recapture provisions of the Internal Revenue Code obviate capital gain treatment.

Of major concern is the position taken with respect to the expensing of dry hole costs. An amount paid for an oil or gas drilling operation which results in a dry hole is usually an investment which qualifies as a transaction entered into for profit and can be deducted as an abandonment loss under Section 165 of the Internal Revenue Code in the year of abandonment. It is intimated in the CRS study that dry hole costs should be capitalized as necessary acquisition costs of producing properties. The first question I would ask is, what relationship does a dry hole in one location have to a producing well several hundred miles away? Or stating it in a closer relationship, if you have a producing well on a 1,000 acre tract and subsequently drill a dry hole, the dry hole would have no bearing on the acquisition of the producing well. For an analogy outside of the oil and gas industry, if a fast food or grocery chain constructed a restaurant or store on one location that proved unsuccessful, should such costs be capitalized to other restaurants or stores that were successful? Neither the dry hole nor the restaurant or store will generate any income and are losses in the current year. The same analogy can be applied to abandonment of research projects in companies in highly technical industries such as Eastman Kodak or General Electric. Another example I think of is the abandonment of ship contracts by Todd Shipyards due to cancellation of contracts. Do these types of abandonment losses contribute to successful ventures?

It should be mentioned that the Energy Policy and Conservation Act of 1975 contained a mandate to the Securities and Exchange Commission concerning accounting changes. One of the changes requires the use of successful-efforts accounting, i.e., the expensing of geological and geophysical and dry hole costs as incurred. Also the Financial Accounting Standards Board issued an exposure draft favoring successful-efforts accounting.

The CRS study would lead one to believe the investment tax credit is applicable only to oil and gas producers, when in fact it is applicable to all business with qualified investment.

The effective tax rate computation of the CRS study is clearly erroneous. It does not take into consideration the capital recovery of investment, actual taxes paid, actual income, etc. In other words, the effective tax rates developed in the CRS study are based on theory rather than actuality. Therefore, it is submitted the theoretical conclusions reached in the CRS study should not be used in future Tax Reform Acts.

Respectfully,

JAMES E. BOBO.

SOLAR ENERGY FUNDING MUST BE INCREASED

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. MOAKLEY. Mr. Speaker, when President Carter was preparing his budget for energy, there was much optimism, because for the first time we had one single agency, the Department of Energy, coordinating our energy priorities.

In his energy message to Congress last April, the President expressed his determination to embark this country on a rigorous program toward developing alternative energy sources, decreasing our dependence on foreign imports. But after reviewing the first energy budget proposals, I am forced to question the extent of the President's commitment.

I must ask why breeder reactor research and technology development, even with the President canceling the Clinch River project, received more in budget authority in fiscal year 1979 ($367 million) than all the solar projects research combined ($309 million)? In budget outlays for fiscal year 1979, the administration proposes granting the breeder reactor $164 million more than solar research.

Another significant question arises when one reviews the solar energy demonstration budget proposals. If it is the administration's aim to stimulate the demonstration and early introduction of economically competitive solar energy systems, why has the budget been cut 23 percent (from $87 to $64 million)?

Under this proposal, budet outlays for solar heating and cooling demonstration programs will decrease $9 million, the Federal buildings program will decrease $4.3 million, and the solar commercialization program will lose $1 million.

I find the administration's funding inadequate and I am hopeful that the Congress, through its budgetary authority, will increase the solar budget.

If we are to develop reliable alternative energy sources to meet our long-term needs, the Federal Government must lead the way in developing the vast potential the Sun offers to us.

GRAIN RESERVES

HON. MATTHEW F. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. McHUGH. Mr. Speaker, the editorial page of the New York Times this

morning carries an important statement on an issue that we have heard a good deal about in the last several weeks, and which we are likely to hear more about during the next several months. This editorial deals with the issue of grain reserves, and I am including it in the RECORD at this point for the benefit of my colleagues:

A FARM PROGRAM FOR ALL SEASONS

Federal agricultural policy has traditionally served only farmers, raising their incomes at the expense of other taxpayers and consumers. The Secretary of Agriculture, Bob Bergland, argues, correctly, that a policy designed to even out year-to-year fluctuations in commodity prices would serve the long-term interests of both farmers and consumers, and help to protect the world against famine. If this new approach is to work, however, the Carter Administration should soon breathe life into the centerpiece of its program, the domestic grain reserve.

Raw commodity prices are extremely unstable. A poor grain harvest in any major producing country can push world prices through the roof; a big crop just a year or two later (planted in response to these high prices) can bring them crashing back down. No one really gains from such fluctuations. Consumers suffer more in the lean years than they benefit in the fat. In underdeveloped countries, poor people can be priced out of the market and left to depend on international charity. In wealthy countries, high food prices leave a legacy of stubborn inflation. Farmers, too, lose out in the cycle; they mortgage their land and equipment when prices are up and then find their debts unmanageable when prices fall.

That is why the grain reserve program, authorized by Congress last year, makes such good sense. Under the program the Government lends farmers the cash they need to pay current bills, so that they can withhold a part of their crop from sale in surplus years. In return, the farmers must agree to keep the grain in storage for at least three years, or until market prices reach at least 125 to 140 percent (depending on the grain) of the Government's regular price-support level. With less grain on the market in bountiful years, prices would not collapse as they did in 1976–77. Then, when world consumption catches up with output, as it invariably does, sales from the reserve would be used to avoid starvation abroad and inflation at home.

The concept is good, but farmers do not seem to be buying it. Congress called for a reserve of 300 to 700 million bushels of wheat by next October (in a world that consumes about 14 billion bushels annually). Yet only 75 million bushels are now in the reserve. The Agriculture Department predicts that the target minimum will not be met this year unless the reserve rules are changed.

The farmers' reluctance to commit their grain to the program is due mostly to the fact that immediate sales are still more attractive than long-term storage. Washington provides only 20 cents a year per bushel to offset storage costs of between 25 and 30 cents. Moreover, farmers are charged 6 percent interest on the money they borrow. Just to cover interest payments, therefore, their grain will have to sell in three years for at least 18 percent more.

Secretary Bergland proposes to eliminate all interest charges and to raise the storage subsidy to reflect average farm costs. That might mean a small increase in the multi-billion-dollar budget of farm subsidy—an increase that the President seeks to avoid. But in this case, surely, the additional outlay is warranted. An adequate storage program would help farmers who are hurting now and consumers who are sure to be hurt later.

AMERICA'S PROPER ROLE IN RHODESIA SETTLEMENT

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. JONES of Oklahoma. Mr. Speaker, throughout my career in public service, I have strongly supported the civil rights movement in its efforts to end discrimination both at home and abroad. In particular, I have opposed the racially discriminatory policies of the white minority government in Rhodesia.

Nevertheless, I recently read an editorial that appeared in the Washington Star of January 31, 1978, that greatly disturbed me. The gist of the article lends support to those who would accuse the United States and Great Britain of meddling in the internal affairs of Rhodesia. If our country is undertaking a policy of siding with outside pressure groups rather that allowing the Rhodesians to peacefully work out their differences, I sincerely believe we are on the wrong track.

While I am not privy to inside information on this matter, I do think the Star's editorial is noteworthy. It should cause all readers to pause and question the role that America should play in settlement of the Rhodesian question. At this time, I would like to insert the full text of the editorial:

SPOILER'S ROLE IN RHODESIA

If the American people understood the spoiler's role which their government is playing in the current Rhodesian negotiations, how long would they tolerate it? Not long, we suspect. They would insist that Ambassador Andrew Young be summoned from the spoilers' conclave at Malta this week, where another attempt is being made to revive the faltering Anglo-American peace plan. And they would probably insist that the U.S. at long last wish godspeed to those who now seem on the verge of negotiating an internal peace in Rhodesia.

This, we say, is what would probably happen if the complexities of the issue were understood. Unfortunately, they are not. It is not widely understood that after years of international clamor, Prime Minister Ian Smith has conceded the principles of universal suffrage and majority rule. It is not widely understood that, in response to this, three moderate black leaders—who are thought by informed observers to represent a considerable majority of Rhodesian blacks—have negotiated with Mr. Smith a new constitution providing for assured "minority" representation (i.e., largely white) in parliament; a bill of rights; an independent judiciary; and other institutional arrangements that seem fair and workable. It is not widely understood that this "internal" breakthrough, proceeding from Mr. Smith's concession of universal suffrage, is on the verge of consummation if it is not derailed by the foot-dragging of U.S., British and UN officials, who seem to think the black negotiators should hold out for tougher terms.

Finally, it is not widely understood that the U.S. is closely identified with the unyielding terrorist-guerrilla "front" led by Joshua Nkomo and Robert Mugabe, which is armed by the communists and supported by the five neighboring "front-line" African states.

The peace terms of these "external" forces are extreme. Although Mr. Nkomo has made occasional noises of moderation, Mr. Mugabe recently threatened to "bash" all the "reactionary" participants in the internal negotiations: a threat that may happily prove idle if peace comes to Rhodesia and his guerrilla troops began to melt away.

Meanwhile, the Nkomo-Mugabe faction insists that Rhodesia's future must be settled between Great Britain (whose crown colony Rhodesia was before declaring its independence unilaterally in 1965) and their "Patriotic Front," whose "patriotic" activities consist largely of the ruthless murder of women, children and the elderly, mostly black. They insist that Ian Smith be deposed, and that they, the intruders and disturbers of the peace, be handed immediate control of the army and the police. In short, they demand capitulation by the Rhodesian moderates; and they indicate no willingness to compromise.

What is perverse about the U.S. position is that the closer Ian Smith and the black moderates come to an agreement, the more cozily we seem to collaborate with the U.S.-British-UN cabal to undermine it. The Economist's Salisbury correspondent reported, on January 21: "There are signs that the (Patriotic Front) is speeding up the war and deliberately picking on black civilian targets in an effort to prevent a peaceful changeover to majority rule. From Salisbury, it appears as if the British foreign secretary, Dr. Owen, and the British commissioner-designate, Lord Carver, are actively discouraging an internal settlement."

In harsher language, the U.S. risks playing accomplice to further bloodshed by pursuing a Rhodesian settlement agreeable to radical outsiders and guerrillas. This is the actual, but we cannot imagine the calculated risk of U.S. policy. Why, then, do we take so sour a view of the heartening chances of internal peacemaking?

The reasons must necessarily be a matter of speculation. In Washington, we suppose, it may be thought more important to appease the demands of Rhodesia's "front-line" neighbors than to bring internal peace to the country. The effect of that policy, intended or not, is to sacrifice the moderate majority in Rhodesia, black and white, to considerations of African real-politik.

This is discreditable enough. It becomes unconscionable if one considers how close Mr. Smith and the black moderates are to a peace settlement and a new constitution. As noted by Morley Safer on the CBS program "60 Minutes" Sunday evening, Rhodesia is one of the few functioning biracial societies in Africa. It is not a police state. Its segregationist policies are disappearing. The army and police are predominantly black, and, so organized, can hardly be accounted dependable instruments of white tyranny.

In bitter truth, the Anglo-American policy on Rhodesia seems to be influenced not only by dubious strategic calculations, but also by an uncharacteristically petty-minded British resentment that Rhodesia has made a success of unauthorized independence. Against all odds and predictions, Rhodesia has become a country in being. It needs only the support of the outside world to make reasonable democratic terms with the black majority.

That the U.S. might not only neglect but actually undercut this success is an offense to sense and conscience. Let us call a halt to this foolish policy—now.

WAGE AND PRICE COUNCIL OPPOSES DOT LIGHT-DUTY TRUCK AND VAN FUEL ECONOMY MILEAGE STANDARDS

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. DINGELL. Mr. Speaker, the Council on Wage and Price Stability announced Tuesday its opposition to the proposed 1980 and 1981 fuel economy mileage standards for light duty trucks and vans with a gross vehicle weight of from zero to 8,500 pounds. The standards were proposed last December by the Department of Transportation and the National Highway Traffic Safety Administration. The Council's concern and its urge for a change in the DOT standards, which other Members of Congress and I share, center on numerous harmful effects that the standards as proposed would have on the economy and consumers and point out the distinct probability of truck manufacturing plant closings and subsequent lost jobs across the Nation.

The DOT held hearings on the proposed standards in mid-January and is reviewing the testimony and its data prior to issuing final standards March 1, 1978, as required by law. The testimony from industry and labor, private and public parties, as presented to DOT, was overwhelmingly in opposition to the rulemaking proposal, including the statement I issued which appeared in the RECORD January 19 and page E26.

Mr. Speaker, I also alert our colleagues that Representative DALE KILDEE and I are circulating a letter for cosignature which we shortly will be sending to Secretary Brock Adams at DOT urging modification of the proposed truck standards to a reasonable and attainable level. Members who need further information and who may be interested in signing the correspondence are urged to contact either of our offices.

The statement of opposition issued from the Executive Office of the President by the Council on Wage and Price Stability on January 31, a brief portion of which I am inserting in the RECORD at this point, calls for either a 1- or 2-year delay in the implementation of the proposed rulemaking by DOT or urges that "NHTSA adopt less stringent fuel economy standards for 1980 and 1981 * * *."

COUNCIL QUESTIONS NHTSA'S STANDARDS FOR SMALL TRUCKS

The Council on Wage and Price Stability today urged the National Highway Traffic Safety Administration to delay implementation of a proposed 1980 fuel economy standard for light duty trucks and vans. NHTSA has proposed that manufacturers of two wheel drive light trucks be required to increase fuel economy from 1979 to 1980 vehicles by about 21 percent with another 7 percent in 1981. Four wheel drive vehicles must improve fuel economy by 15 percent in 1980 and another 9 percent in 1981.

NHTSA estimates that the necessary changes are technologically feasible for 1980 and 1981 model year vehicles and will cost about $155 per truck. The Council stressed, however, that NHTSA's estimate of technological feasibility and costs of compliance are strongly contested by the industry. Moreover, NHTSA itself acknowledges that a significant portion of the industry cannot meet the standard. The automakers who are unable to comply are expected by NHTSA to produce a full line of trucks and pay a fine.

The industry, however, claims that it would be illegal for them to do so and anticipates that production of heavier trucks will be severely limited so as to bring the fleet average into compliance with the standard. Therefore the Council doubts whether the standard can be implemented without threatening significant price increases and potential shortages of suitable trucks for many users. The possibility of plant closures and layoffs also accompanies the NHTSA proposal.

The Council's recommendation that NHTSA either delay implementation of the standard for a year or two or that NHTSA adopt less stringent fuel economy standards for 1980 and 1981 was based on its conviction that a resolution of the engineering dispute over feasibility and practicability is essential to a successful program of truck fuel savings. The Council cautioned that without such a resolution the standard was very likely to be delayed in the courts anyway because of the Congressional mandate to develop fuel economy standards that are both technologically feasible and economically practicable.

The Council noted that, in view of the load carrying demands that determine the purchase of most trucks, care should be exercised so that fuel economy standards do not require too much reduction in performance capability. If in fact the class of trucks covered by the regulation are rendered less suitable to the tasks they now perform because of performance reduction to meet the standards, the goal of fuel saving will be contravened. Users may continue to use older less fuel efficient trucks; they may purchase larger trucks which are exempt from the standards, or they may make an increased number of trips with smaller load.

I additionally point out that the Council's Chairman is W. Michael Blumenthal, Secretary of the Treasury, and that the Council's members include from the administration:

Secretary of State, Cyrus R. Vance.

Secretary of Commerce, Juanita M. Kreps.

Secretary of Labor, F. Ray Marshall.

Secretary of Housing and Urban Development, Patricia Roberts Harris.

Acting Director, Office of Management and Budget, James T. McIntyre.

Assistant to the President for Domestic Affairs and Policy, Stuart E. Eizenstat.

Chairman, Council of Economic Adviser, Charle L. Schultze.

The Council's adviser members are:

Attorney General, Griffin B. Bell.

Secretary of Health, Education, and Welfare, Joseph A. Califano, Jr.

Secretary of the Interior, Cecil D. Andrus.

Special Representative for Trade Negotiations, Robert S. Strauss.

Besides statements of opposition to the proposed truck standards from myself, the Council, and other Members of Congress who testified, the Department of Commerce earlier issued its criticisms of the DOT proposal. Representative KILDEE is inserting the Commerce comments in today's RECORD along with his testimony to DOT to which I direct the attention of our colleagues.

Additionally, the five truck manufacturers testified against the standards and called for changes. They said unless the standards are changed, several existing lines of trucks and engine families will be dropped from production resulting in the layoff of workers which will be unavoidable. They warned that there was insufficient leadtime available before the 1980 model year to meet such severe increases in the fuel mileage standards. Strong opposition came from both the UAW and NAACP who were largely concerned with the unemployment consequences of DOT's proposal. Truck dealers and truck component part suppliers testified in opposition along with aluminum, tire, and engine lubricant manufacturers, in addition to other suppliers. Truck and van user groups, ranging from on- and off-road commercial enterprises to four-wheel drive associations and the recreational vehicle users, oppose the standards.

Mr. Speaker, it appears that there is almost unanimous agreement within labor and industry, the administration, the user/consumer groups, and among many Members of Congress and other concerned organizations that the DOT proposed rule should be changed.

MR. GARY J. HOUSER OF BOARDMAN, OHIO, RECEIVES RED CROSS CERTIFICATE OF MERIT

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. CARNEY. Mr. Speaker, I would like to bring to the attention of my colleagues in the U.S. House of Representatives a noteworthy act of mercy undertaken by one of my constituents, Mr. Gary J. Houser, 168 Rockdale Avenue, Boardman, Ohio.

Mr. Houser has been named to receive the Red Cross Certificate of Merit and accompanying pin. This is the highest award given by the American National Red Cross to a person who saves or sustains a life by using skills and knowledge learned in a volunteer training program offered by the Red Cross in first aid, small craft, or water safety.

The certificate bears the original signatures of the President of the United States, honorary chairman, and Frank Stanton, chairman of the American National Red Cross. Presentation of the award will be arranged by the Mahoning Chapter of the American National Red Cross, Youngstown, Ohio.

On September 23, 1977, Mr. Houser, trained in Red Cross first aid, was driving his car on a city street when he witnessed a traffic accident that occurred when a young girl ran into the street and was struck by an oncoming vehicle. Stopping to render assistance, he observed that the victim, who suffered extensive injuries, had stopped breathing and had no pulse. Quickly he began mouth-to-

mouth resuscitation and other life-supportive first-aid measures. Soon the victim began to breathe on her own, and her pulse returned. Without a doubt, the use of first aid by Mr. Houser saved the victim's life.

I commend Mr. Gary J. Houser on this meritorious action which exemplifies the highest ideals of the American Red Cross and the concern of one human being for another who is in distress.

BILLS TO AID DEAF INDIVIDUALS

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. RICHMOND. Mr. Speaker, possibly the most overlooked handicapped people are the deaf. Because they are not visually any different than a normal hearing person we tend to ignore the obvious problems that deaf Americans face each day.

What could be more frustrating than being involved in a court case and not understanding the procedings? Deaf people have been subjected to court trials where not only was there no interpreter, but also there was no one able to communicate with them effectively. In this age of enlightened attitudes toward basic human liberties, this is not only an inequity but a blatant miscarriage of justice.

The Bilingual Hearing and Speech Impaired Interpreters Act, which I introduced on December 6, 1977, will, if passed and signed into law, correct this most unfortunate oversight in the judicial system. The bill, H.R. 10228, states that a qualified interpreter must be present whenever a person involved in a Federal trial does not speak or understand the English language. The court will set standard fees for interpreting and reimburse the interpreter for his/her services. The Administrative Office of the Courts estimates that utilizing this system would cost only $2 million annually; a very small price to pay to insure equal justice for all under our laws.

Most people who own dogs have them as household pets, blind people have come to depend on dogs for extending their mobility. Deaf people too have a need for highly trained "hearing dogs" to alert them to common noises. A baby's cry, a knock at the door, a teakettle's whistle, the sound of an alarm clock and thousands of other sounds go unnoticed to the deaf. But a trained hearing dog can identify these sounds and inform his master that he is needed elsewhere.

The training of these dogs is highly specialized and much needed. The cost of training the dogs is no more than training a "seeing eye" dog but the demand is much greater as the deaf population in America outnumbers the blind population by more than 30 to 1. Those few deaf people who now have a "hearing dog" testify to the fact that the dog quickly has become indispensable in functioning in the hearing world. The owner of one of these dogs wrote the following after the dog was killed by a car.

He was a friend and companion as well as a service dog. . . . Randy (the dog) was a tremendous emotional value to me. Being responsible for Randy made me more responsible for myself. In so short a time he became like another "sense" to replace the amount of hearing I lack. I know this is hard for some people to understand. By constantly observing Randy's behavior he became part of me. Now that he's gone I feel mentally crippled in my awareness of the environment.

The "hearing dog" program is particularly significant to those concerned with the destruction of animal life resulting from pet overpopulation and the abandonment of unwanted dogs. Because the standard for hearing dog service does not require particular breeds or sizes, as with seeing-eye dogs, dogs used in the program could come from local animal shelters.

Because there are 13.3 million hard of hearing people and 1.8 million deaf people living in the United States today, the need for "hearing dogs" is evident throughout the country. For this reason I introduced H.R. 10442 which will establish funding for 10 regional training centers to train "hearing dogs." At present there is only one program capable of professional training, and due to the limited staff can only train about 50 dogs a year.

Congress has been all but totally inaccessible to deaf constituencies because the use of a telephone is limited to using an interpreter or a teletypewriter-communicator (TTY).

Thanks to the efforts of my colleagues PAUL FINDLEY and FRANK THOMPSON every Member of the House of Representatives should be able to purchase or rent a TTY for his/her office in the very near future.

Because most deaf people are not high wage earners it is uncommon for them to make long-distance phone calls. For this reason I have introduced H.R. 10444, a bill to establish a toll-free telephone communications system expressly for the use of TTYs.

The passage of this bill will help make Congress available to millions of Americans who have previously been unable to communicate instantaneously with their elected officials in Washington.

The three bills mentioned here are a strong beginning to solving some of the injustices our society has overlooked. I hope my colleagues in Congress will join me in recognizing the pressing needs of our deaf population and seek equitable legislative resolutions in the very near future.

MONTHLY LIST OF GAO REPORTS

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. BROOKS. Mr. Speaker, the monthly list of GAO reports includes summaries of reports which were prepared by the staff of the General Accounting Office. The November 1977 list includes:

MONTHLY LIST OF GAO REPORTS

NATIONAL DEFENSE

The Air Force Audit Agency Can Be Made More Effective. FGMSD–78–4, November 11.

The Naval Audit Service Should Be Strengthened. FGMSD–78–5, November 11.

Loss Of Accounting Integrity In Air Force Procurement Appropriations. FGMSD–77–81, November 1.

Trestle Electromagnetic Pulse Simulator Program Should Be Reevaluated. PSAD–77–159, November 4.

Department Of Defense Consideration Of West Germany's Leopard As The Army's New Main Battle Tank. PSAD–78–1, November 28.

The Five Service Academies: A Followup Report. FPCD–77–78, November 25.

Centralized Department Of Defense Management Of Cargo Shipped In Containers Would Save Millions And Improve Service. LCD–77–227, November 8.

Air Force Maintenance Depots—The Need For More Responsiveness To Mobilization As Well As Peacetime Efficiency. LCD–78–403, November 23.

Planned Realinement Of Two Army Commands In St. Louis, Missouri. LCD–77–358, October 27.

The Navy's Multimission Carrier Airwing—Can The Mission Be Accomplished With Fewer Resources? LCD–77–451, November 16.

Withdrawal Of U.S. Forces From Thailand: Ways To Improve Future Withdrawal Operations. LCD–77–446, November 1.

Temporary Duty Travel In The Management And Operation Of Department Of Defense Programs. FPCD–77–84, October 28.

Department Of Defense Value Engineering Program Needs Top Management Support. PSAD–78–5, November 16.

U.S. Chemical Warfare Defense: Readiness And Costs. PSAD–77–105, November 18.

Letter reports

Army is taking effective action to increase the proficiency of its tank crews in Europe. FPCD–78–3, November 1.

More effort needed to prevent duplication in Department of Defense training technology programs. FPCD–78–7, November 8.

Cost of contract with E-Systems, Inc. for maintenance and modification of three C–135 aircraft was overstated by as much as $1.4 million because contracting personnel did not adequately evaluate E-Systems' proposal. PSAD–78–9, November 10.

Lack of independent operational testing and evaluation of the Army's amphibian vehicle, the LACV–30. LCD–78–205, November 11.

The Navy should reconsider its decision to contract out for research and development on training devices and military services should realize the full benefits of self-paced training. FPCD–78–4, November 21.

Target cost overstated on contract with Boeing Company for the Airborne Warning and Control System (AWACS). PSAD–78–42, November 25.

Why the Air Force did not permit a woman with multiple sclerosis to accompany her husband to his new duty station. HRD–78–5, October 7.

Assessment of the Defense Department's system for evaluating the performance of household goods carriers. LCD–78–203, October 31.

INTERNATIONAL AFFAIRS

The Challenge Of Meeting Shelter Needs In Less Developed Countries. ID–77–39, November 4.

GENERAL SCIENCE, SPACE, AND TECHNOLOGY

National Aeronautics And Space Administration Should Provide The Congress With

More Information On The Pioneer Venus Project. PSAD–77–65, November 7.

NATURAL RESOURCES, ENVIRONMENT, AND ENERGY

U.S. Oil Companies' Involvement In The International Energy Program. HRD–77–154, October 21.

Uranium Enrichment Policies And Operations: Status And Future Needs. EMD–77–64, November 18.

Transportation Charges For Imported Crude Oil—An Assessment Of Company Practices And Government Regulation. EMD–76–105, October 27.

Private Profitmaking Firms' Reports On Research And Development Contracts With The Environmental Protection Agency Can Be Evaluated Better. PSAD–77–161, October 31.

Letter reports

How the Department of Transportation and the Environmental Protection Agency are carrying out the Noise Control Act of 1972. CED–78–5, November 4.

Reasons for long delays in settling cases involving alleged noncompliance with Federal Energy Agency petroleum pricing regulations. EMD–77–71, November 7.

Additional GAO views on the Solar Energy Research Institute. EMD–78–20, November 25.

Circumstances surrounding the grant awarded by the San Francisco office of the Energy Research and Development Administration to increase the awareness of the National and local energy situation in California. EMD–78–14, October 28.

Role of the Environmental Protection Agency in the problem of exposures to nonionizing radiation from high-voltage electrical power lines; radio, TV, and satellite communications; microwave equipment; and from visible, infrared, and ultraviolet light. CED–77–95, July 6.

COMMERCE AND TRANSPORTATION

The Office Of Minority Business Enterprise Could Do More To Start And Maintain Minority Businesses. CED–77–136, November 10.

Changes Needed In Procedures For Setting Freight-Car Rental Rates. CED–77–138, November 11.

HEALTH

Food Additive, Acrylonitrile, Banned In Beverage Containers. HRD–78–9, November 2.

Sharing Cardiac Catheterization Services: A Way To Improve Patient Care And Reduce Costs. HRD–78–14, November 17.

Letter report

Current information on kidney disease treatment programs covered by Medicare. HRD–78–17, November 3.

INCOME SECURITY

Social Security Administration's Procedures For Allocating Administrative Costs To The Supplemental Security Income Program. HRD–78–12, November 17.

An Evaluation Of The Use Of The Transfer Income Model—Trim—To Analyze Welfare Programs. PAD–78–14, November 25.

VETERANS BENEFITS AND SERVICES

Examining Of Financial Statements Of Disabled American Veterans National Headquarters, And Life Membership Fund For Year Ended December 31, 1976, And The Service Foundation For The 16-Month Period Ending December 31, 1976. FOD–77–16, November 16.

Letter report

Veterans Administration hospitals could have obtained elevator maintenance services at lower costs through competitive bidding. PSAD–78–41, November 22.

LAW ENFORCEMENT AND JUSTICE

FBI Domestic Intelligence Operations: An Uncertain Future. GGD–78–10, November 9.

Methadone Deaths In New York City. GGD–77–25, March 14.

Letter report

The President should have proposed a deferral—not a rescission—of $2.668 million of Law Enforcement Assistance Administration funds, pending congressional action on a legislative request to transfer the funds to other Justice Department programs. OGC–78–3, October 28.

GENERAL GOVERNMENT

Cost-Of-Living Adjustments For New Federal Retirees: More Rational And Less Costly Processes Are Needed. FPCD–78–2, November 17.

Government Consultants: Standard Definition and Uniform Data Needed. FPCD–78–5, November 29.

The Government Employees Training Act Of 1958: A Progress Report. FPCD–77–66, November 17.

Finding Out How Programs Are Working: Suggestions For Congressional Oversight. PAD–78–3, November 22.

Government Specifications For Commercial Products—Necessary Or a Wasted Effort? PSAD–77–171, November 3.

Tax Treatment Of Employees And Self-Employed Persons By The Internal Revenue Service: Problems And Solutions. GGD–77–88, November 21.

New Methods Needed For Checking Payments Made By Computers. FGMSD–76–82, November 7.

Review Of The Government Printing Office's Internal Audit Program. LCD–77–444, November 23.

Examination Of Financial Statements, Government Printing Office, Fiscal Year 1976. FOD–77–5, November 25.

Letter reports

Better internal controls needed over management of funds by the Food and Drug Administration. FGMSD–77–76, November 8.

Difficulties of a minority-owned small business in obtaining Government contracts in the fields of construction management, construction consulting, and value engineering. PSAD–78–13, November 21.

Review of allegations about employment, travel, and procurement activities at the Denver Regional Litigation Center of the Equal Employment Opportunity Commission. FGMSD–77–64, October 14.

Information on Wisconsin's Aid to Families with Dependent Children Program. HRD–77–125, August 3.

REVENUE SHARING AND GENERAL PURPOSE FISCAL ASSISTANCE

Analysis Of Operating Expenses In New York City's Fiscal Year 1978 Capital Budget. GGD–78–13, November 15.

Antirecession Assistance—An Evaluation. PAD–78–30, November 29.

Letter report

Funding planning targets established for Lackawanna County and Scranton, Pennsylvania, by the Economic Development Administration under the local public works program. CED–77–139, October 25.

The Monthly List of GAO Reports and/or copies of the full texts are available from the U.S. General Accounting Office, Distribution Section, Room 4522, 441 G Street NW., Washington, D.C. 20548. Phone (202) 275–6241.

A PRESIDENT OUT OF HIS ELEMENT—WITH FARMERS

HON. KEITH G. SEBELIUS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. SEBELIUS. Mr. Speaker, I have met with literally thousands of farmers since the Congress recessed in November. One of the questions raised by farmers and others with whom I have met is whether President Carter is out of touch with farmers? Other questions raised include: Is he aware of their plight? Is he equal to the job of governing this Nation as farmers would like to see it governed—with primary emphasis on production and marketing of agricultural products, rather than an agricultural policy and policymakers dominated by consumerism, conservationists, and environmentalists?

I commend to your attention a statement made by Mr. WAMPLER of Virginia in a hearing before the House Committee on Agriculture today relating to "the current agricultural situation." This statement highlights several of the problems facing farmers and ranchers which President Carter appears to be ignoring. The statement also recognizes the shift in agricultural policies (and budgets) under the Carter administration from a farmer to consumer orientation:

MR. WAMPLER'S OPENING STATEMENT

Mr. Chairman, thank you for giving me a few moments to address the Secretary on a general basis before the Secretary makes his statement and the questioning and answering period begins.

Mr. Secretary, we are always delighted to welcome you back home. I think I can speak for the committee when I say you are with old friends and colleagues in the true sense of those words.

As old friends and colleagues, I'd like for you to know that this committee is concerned about a number of events and circumstances that have occurred during the first year of the Carter administration. Knowing you as a former colleague, we know these problems are not to your liking either.

Generally speaking, these problems are: The drop in realized net farm income, the sharp increase in production expenses, the tightening of U.S. agricultural exports, the accelerated growth of farm and ranch indebtedness, and the growing concern over the long-range capacity of U.S. agriculture to provide the American public with abundant supplies at fair prices.

Day before yesterday, I joined with our distinguished chairman in a letter to the director of the Congressional Research Service, Library of Congress to request that CRS provide us with a technical analysis of the American agricultural movements tentative proposals for correcting these very serious problems. We would like to know how AAM's program would be administered, what impact it would have on the general economy and on various income groups, what impact their proposals would have on import and export policy, and how it might affect management decisions by individual farmers and ranchers.

Our chairman has also announced we will be seeking the advice of various other farm organizations and groups. Today and in future meetings we would like to have your views and the views of your department on these most critical problems.

Now, for more specific and practical reasons, the minority members of this committee are concerned about the following: An obvious shift in your department's traditional mission, a evidenced by President Carter's budget, from that oriented towards the production and marketing of agricultural products and assistance for the farmer and those industries concerned with agriculture to a department more concerned with consumerism, conversationists, and environmentalists; an over-balance and an increase in the income transfer programs as

opposed to support for agricultural programs; a continuation of the dominance by the State Department over farm export policies; the Carter Administration's sugar policy; the grain sales policy; the failure of the department to support worthwhile energy programs, such as gasahol and solar; an overzealousness towards banning protective food additives without properly considering the impacts on farm income and the availability of meat and poultry products; executive branch curbs on agricultural science and education against congressional mandate to expand these fields of endeavor; cuts in the forestry programs; a failure to express the agricultural communities need for adequate pest management in the councils of government; a reduction in proper support for soil and water conservation programs; and finally, our concerns for strongly rumored plans to reorganize the Department of Agriculture and the impacts such undertakings would have on agricultural production and distribution, the farm family and rural communities.

Mr. Secretary, my colleagues will have specific questions on these subjects during the question and answer period.

OSHA COMPLIANCE

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. ANDERSON of Illinois. Mr. Speaker, there is a growing awareness that Government regulation imposes a cost on individuals and businesses that far exceeds the simple administrative cost of regulation. A study by the Center for the Study of American Business, for example, estimated that the total cost of compliance with Federal regulation in 1976 was in excess of $65 billion. An obvious specific example of the high cost of compliance is pollution control. Congress recognized this in 1969 and responded by providing in the tax code a 5-year amortization election for pollution control equipment.

A less obvious, but equally important, subject for relief is the cost of complying with the rules and regulations of the Occupational Safety and Health Administration. I am introducing today, therefore, a bill allowing a 24-month amortization of any property which is used in connection with a plant (in operation prior to January 1, 1978) and which is required pursuant to the Occupational Safety and Health Act of 1970—provided such property does not significantly increase the output or capacity of the plant.

In the more than 7 years since the passage of the OSHA Act, many questions have been raised about the aggregate cost of complying with OSHA regulations, but at present there are no hard estimates available on such costs from either OSHA or private sources.

The fifth annual McGraw-Hill Economic Survey, however, reported in May of last year that businesses planned to invest $2.88 billion—in general—for employee safety and health in 1977, 21 percent above the estimated expenditures for 1976 of $2.38 billion. The survey also projected an increase to $3.7 billion for safety and health expenditures by 1980.

OSHA is considering the application of a number of new standards that would necessitate a multifold increase in these projected health and safety expenditures. A 1976 OSHA-authorized study by Bolt, Beranek & Newman, Inc., estimated that ambient noise control regulations alone could impose if adopted, capital costs of $18.5 billion and several billion more in annual operating costs. Industry estimates are even higher. The forging industry reports that even partial compliance with OSHA noise standards could cost that industry alone $2,97 billion—$67,000 per worker. The steel industry estimates that engineering the maximum workplace noise to an 85-decibel level would cost $1.2 million for each steelworker affected. But, both the forging and steel industries estimate that personal hearing protectors and monitoring could provide superior protection for less than $42 per employee.

OSHA has not yet reached a final decision on noise abatement standards. In view of the immense cost (not to mention possible production curtailments), it is unlikely that OSHA will require strict ambient noise standards on those industries where personal hearing protectors can provide satisfactory protection for the employees.

OSHA's regulatory authority, however, extends into other areas where compliance costs, although not as prohibitive as those I have cited, are nevertheless a substantial burden on the industry. Regulations on lead, benzene, acrylonitrile and other substances, for instance, threaten to impose on certain industries required capital outlays that far exceed the estimated 2 percent of capital investment normally spent on employee safety and health.

Affected industries frequently face the prospect of closing down marginal plants and laying off valuable employees. As a matter of public policy, the Government should provide appropriate tax relief to financially ease, and even speed, the transition to compliance with new Government standards that mandate in a short span of time major expenditures for capital alterations of a nonproductive nature.

In part, Congress recognized this need in 1969 and again in 1976 by providing a 5-year amortization of pollution facilities that permits companies to "writeoff" the cost of the equipment over 5 years instead of its useful life.

The logic of an accelerated writeoff for pollution equipment applies with equal, if not greater, force to safety and health measures. OSHA regulations have a potentially sharper debilitating effect on the profitability of small businesses than pollution controls—such industries as forging, cast metals, and certain chemical manufacturers are good examples. A shorter amortization period is thus required if these industries are to avoid shutdowns that would displace thousands of skilled workers. Providing a 24-month amortization election should hasten compliance with existing OSHA standards, as well as giving much needed tax relief to OSHA-impacted industries.

The Congressional Research Service estimates that the present value of a 24-month amortization for OSHA equipment would be less than $265 million—a figure derived by using the latest McGraw-Hill estimates on employee safety and health expenditures, the average useful life of industrial equipment (11.1 years), and a discount rate of 10 percent. The probable tax loss would tend to be somewhat less than $265 million, as the McGraw-Hill estimate is for total employee health and safety expenditures rather then merely OSHA-mandated equipment.

This legislation is, of course, no substitute for a more commonsense approach to health and safety standards on the part of OSHA. Assuring a safe working environment for employees is a concern that all Americans share, but that concern must be tempered with the knowledge that some "safety improvements" do not enhance worker safety in any measurable manner. A 2-year amortization provision, however, is a constructive way of relieving businesses that are severely and adversely affected by Government regulation. I hope that my colleagues will agree and that the 95th Congress will approve this much-called for relief to businesses that seek to provide safe jobs for our workers.

MR. CHARLES ERABU MIKAMI RECEIVES "ORDER OF SACRED TREASURE, FIFTH CLASS"

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. MINETA. Mr. Speaker, I would like to bring to the attention of our colleagues, a man I have known for many years and for whom I have a tremendous amount of respect and admiration—Mr. Charles Erabu Mikami.

On Sunday, February 5, 1978, Mr. Mikami will be honored at a testimonial dinner sponsored jointly by the Morgan Hill Nisei Service Group, Santa Clara County Hiroshima Nikkei Jinkai, San Jose Wesley United Methodist Church, Sowan Senryu Ginsha, and Nichi Bei Times.

Mr. Mikami, who has lived in the Santa Clara Valley for the last 32 years, recently was awarded the "Order of Sacred Treasure, Fifth Class," from the Japanese Government. He received the award for his contribution in promoting United States-Japan relations through art and poetry.

Mr. Mikami has willingly given his time to demonstrate Japanese painting for clubs and church groups as well as to high school and college students. Over the past 30 years, he has displayed his talent for 115 various organizations. In addition to his paintings, Mr. Mikami has enjoyed writing senryum, the world's shortest poem. He is the current head of the San Franicsco Bay area organization of Senryu Writers.

Mr. Speaker, I ask that the Members of the House join with me in congratulating Mr. Mikami on his work and for receiving this honor.

THE WONDERFUL WORLD OF FEDERAL REGULATION

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. O'BRIEN. Mr. Speaker, I have addressed my colleagues in this body on many past occasions with regard to the growth and complexity of the Federal regulatory process.

Today I would like to call to my colleagues' attention a report which I have received from the editors of a new publication, appropriately called "The Regulators," which will be reporting on the activities of 22 major Federal regulatory agencies.

Among the statistics these editors have brought to my attention is the fact that the Federal regulatory bureaucracy has grown 438 percent since 1951. Whereas in 1951, there were 23,507 permanent Government positions assigned to regulatory bodies, there are now 126,465 such positions in the current fiscal year.

Many of these regulatory agencies have been created since the early 1970's. The Environmental Protection Agency has grown the most among the newer agencies, having increased in personnel strength each year since 1970, when it began with 3,860 personnel positions. In 1977 EPA had 10,150 positions. Of the other newer agencies, the Occupational Safety and Health Administration has increased from 1,558 positions in 1972 to 2,717 in 1977. The Consumer Product Safety Commission has nearly doubled from 586 jobs in 1973 to 914 in 1977. The older agencies have grown, too. The Interstate Commerce Commission, oldest of the agencies, has 1,060 permanent positions in 1951 and 2,205 in 1977. The Securities and Exchange Commission has grown in the same period from 1,060 jobs to 2,123.

These statistics alone point to the exponential growth of the Federal regulatory process. In some ways this growth, while serving a valid public purpose, is analagous to what has happened in the 65 years we have had a Federal income tax. In other words, the rise of the Federal regulator has brought forth a mountain of regulations and a concomitant need to have some third party explain them all to the taxpaying public.

Interestingly enough, the editors of "The Regulators" who plan to decipher and interpret the actions of 22 Federal agencies have undertaken to create what they call a redtape index, which will track in graph form Federal regulatory rules in terms of personnel, budget, regulations, and caseload.

I note that recently, the Council on Wage and Price Stability issued a report saying that a single industry—steel—is subject to 5,000 separate Federal regulations from 29 agencies, administering 57 programs. Again, this is reflective of the amount of regulation which now plays such a tremendous role in the day-to-day operations of business.

Mr. Speaker, the growth of such a body of regulations inevitably means that someone has to interpret these rules to the affected public in a clear and understandable way. While I applaud the efforts of several agencies to reduce the amount of "gobblygook" contained in their pronouncements, I am confident that it will take competent outside observers to put many of these rules into the kind of English most of us can understand.

The editor of "The Regulators," Louis Kohlmeier, won a Pulitzer prize in 1965 for a series of articles he wrote for the Wall Street Journal. Kohlmeier has also written, in book form, a study of the Federal regulatory process, also called "The Regulators."

I wish him well in this newest undertaking to explain the intricacies of the Federal bureaucracy in clear language.

DOCUMENTING A DUPE

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. DORNAN. Mr. Speaker, a wealthy group of 120 VIPs gathered not long ago to heap still more hyperbolic tributes at the feet of a self-appointed martyr and reborn celebrity. The occasion was presentation of the 1977 Dorothy Shaver Rose Award by Lord & Taylor chairman Joe Brooks to erstwhile Stalin apologist Lillian Hellman—for "unwavering crusade for personal dignity." Miss Hellman's celebrity stems primarily from her past efforts to blacklist anti-Stalinist entertainers and authors, and the accounting she gave of that activity. The questionable sense of personal dignity reflected in Miss Hellman's past and present activities was considered with care and skill by Patrick J. Buchanan in his November 22 column "Honoring An Enemy." I hope that you and our colleagues will study this brief history of an anti-anti-Communist heroine, and "the insatiable appetite of some American businessmen for acceptance in trendy circles:"

HONORING AN ENEMY

(By Patrick J. Buchanan)

WASHINGTON.—The bash at Lord & Taylor's New York store Wednesday two weeks ago was chic enough to merit a full page of copy and pictures in Women's Wear Daily.

Felicia and Lenny Bernstein were there—the latter immortalized in the prose of Tom Wolfe for his little Black Panther party of the decade past.

Norman Mailer arrived too, fresh from his TKO over Gore Vidal. Patricia Neal and Bill Blass, Marietta Tree and Claudette Colbert were on hand, among the "120 high-powered invitees" whom Lord & Taylor chairman Joe Brooks asked to come pay homage—to Miss Lillian Hellman.

Maureen Stapleton raved about the vegetable terrine; John Hersey gave a champagne toast. But the centerpiece of the evening was Brooks' tribute to Lillian Hellman for her "unwavering crusade for personal dignity," as he bestowed upon her the 1977 Dorothy Shaver Rose Award from L&T.

That party, that tribute, that audience, tells us something about Brooks, about the insatiable appetite of some American businessmen for acceptance in trendy circles, about the absence of historical memory and the general empty headedness of our cultural elite.

Some months back, it will be recalled, Miss Hellman wrote the most self-serving memoir of our time. In it, she portrayed herself as the heroine of the 50s, and her hourlong and insignificant appearance before a House committee as the finest hour of the decade.

Ever since, she has been proclaimed as the martyred heroine of the McCarthy era, radiant alongside the "scoundrels" who went public to renounce their faith in Stalin's rule.

Ms. Hellman's book, however, "Scoundrel Time," had the misfortune to fall into the hands of Dr. Sidney Hook, the philosopher whose memory remains as sharp as his files are large. In 10 pages of the Febuary issue of Encounter, Hook describes the career and character of the woman upon whom our cultural aristocracy cannot cease to fawn.

The Lillian Hellman of Hook's prose has the heart and mind of a censor and blacklister. During the 30s nd 40s, writes Hook, "Miss Hellman and her Communist associates were running rampant in Hollywood and elsewhere and trying to bar 'Trotskyite-Fascists'—as all anti-Stalinists were then called—from getting work or getting published."

During the same era, Miss Hellman was rooming with Dashiell Hammett, "a committed apologist for Stalin's terror," who was milking for all it was worth the free society and system he was working diligently to undermine.

Miss Hellman herself "played an important role in both the official and unofficial front activities of the Communist Party," and while she "may or may not have been a member of the Communist Party . . . until Stalin died she was not only a convinced Communist but a Stalinist, and for all her posturing about not really knowing what 'dictatorship' means she may still be a Communist." So charges Dr. Hook.

Not until 20 years after Khrushchev had denounced the crimes of the arch-terrorist did Miss Hellman concede that she may have been slow in recognizing the "sins" of J. V. Stalin.

On and on and on Hook proceeds, documenting facts and dates and doings of Lillian Hellman which show her to be something worse than a dupe of the most murderous tyrant in history. To such as this, Lord & Taylor pays tribute for her "unwavering crusade for personal dignity."

RICHARD G. "DICK" McDANIEL—NEWSPAPERMAN

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. LAGOMARSINO. Mr. Speaker, I would like to take note of an event, small in the scheme of things, but for the newspaper world, of some magnitude.

On Tuesday, January 17, 1978, Richard G. "Dick" McDaniel died. Mr. McDaniel was the owner, publisher, editor, printer, and if need be the delivery boy of the Avila Beach Courier in the tiny seaport town of Avila Beach, Calif. Listed in "Who's Who in Commerce and Industry," he was civic minded, politically aware,

and proud of his independence. Dick McDaniel typified the American free enterprise system. Printers ink ran in his veins; he came from a newspaper family; it was his life; he died a newspaperman.

I am saddened at his untimely passing. He was a friend of mine.

Because of Dick McDaniel's contributions to the field of journalism, I ask the Members of the House to join with me and his many friends, in extending condolences to his wife, Rita, and his son, James.

MONTHLY LIST OF GAO REPORTS

HON. JACK BROOKS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. BROOKS. Mr. Speaker, the monthly list of GAO reports includes summaries of reports which were prepared by the staff of the General Accounting Office. The December 1977 list includes:

MONTHLY LIST OF GAO REPORTS

NATIONAL DEFENSE

The Army's Proposed Close Combat Armored Vehicle Team. PSAD-78-11, December 12.

Development and Use of Military Services' Staffing Standards: More Direction, Emphasis, and Consistency Needed. FPCD-77-72, October 18.

Container-Oriented Logistics System—Will It Be Ready When Needed by the Department of Defense? LCD-77-234, December 21.

Better Management of Defense Communications Would Reduce Costs. LCD-77-106, December 14.

Improvements Needed in the Administration of the Army's Million-Mile Warranty on Trucks in Europe. PSAD-78-45, December 8.

Improving Logistical Support at Kwajalein Missile Range. LCD-77-437, November 7.

The Military Services Are Constructing Unneeded Family Housing. CED-78-8, December 29.

Department of Defense Pay Practices For German Nationals Should Be Changed. FPCD-77-86, December 2.

Letter reports

No support for allegation of improper pay rates for military exchange employees at Fort Dix and McGuire Air Force Bases, but there is a high error rate in conversions to new pay schedules. FPCD-78-8, December 5.

The Department of Housing and Urban Development should not require the Defense Department to pay mortgage insurance premiums on military rental family housing projects. CED-78-14, December 12.

How the military services are improving readiness reporting. LCD-77-442, December 21.

How to improve the Bureau of Naval Personnel's Advanced Information System. LCD-78-103, November 21.

Comments on reply from the Adjutant General, Arizona National Guard, to GAO report on Reserve and National Guard reorganizations. LCD-78-405, November 28.

How enlisted personnel feel about military grievance procedures. FPCD-78-1, October 7.

INTERNATIONAL AFFAIRS

Credit Programs For Small Farmers In Latin America Can Be Improved. ID-77-1, December 9.

Consular Services Abroad Can Be Improved; Process Of Evaluating Need For Posts Questioned. ID-77-52, December 29.

GENERAL SCIENCE, SPACE, AND TECHNOLOGY

Need For Additional Internal Audit Coverage In The National Aeronautics And Space Administration. FGMSD-78-12, December 27.

Maritime Administration's Satellite Communications Program: Is It Still Needed? LCD-77-107, October 27.

Letter report

Inadequate information submitted by contractor to support price of modification of contract for TIROS satellite spacecraft busses. PSAD-78-49, December 9.

NATURAL RESOURCES, ENVIRONMENT, AND ENERGY

Improvements Needed In The Corps Of Engineers' Regulatory Program For Protecting The Nation's Waters. CED-78-17, December 23.

National Water Quality Goals Cannot Be Attained Without More Attention To Pollution From Diffused Or "Nonpoint" Sources. CED-78-6, December 20.

Potential Effects Of A National Mandatory Deposit On Beverage Containers. PAD-78-19, December 7.

Additional Precious Metals Can Be Recovered. LCD-77-228, December 28.

Activities Of The Office Of Energy Information And Analysis, Federal Energy Administration. December 5.

The New National Liquefied Natural Gas Import Policy Requires Further Improvements. EMD-78-19, December 12.

The State Of Competition In The Coal Industry. EMD-78-22, December 30.

Evaluation Of The Plan To Conserve Energy In Federal Buildings Through Retrofit Programs. EMD-78-2, December 22.

Rationale For Power Rates Charged By The Central Valley Project To Pacific Gas And Electric Company. EMD-78-18, November 21.

Alaska Power Administration—Financial Management And Program Operations. EMD-78-1, December 20.

Palmetto Bend Dam And Reservoir: Need For Improved Analysis Of Alternatives And Cost Data. PSAD-78-43, December 16.

Letter reports

Interim report: how Federal agencies recycle waste paper. LCD-78-104, December 2.

Need for additional facilities for the National Center for Toxocological Research and the National Institute of Environmental Health Sciences. HRD-78-29, December 19.

AGRICULTURE

A Better Way For The Department Of Agriculture To Inspect Meat And Poultry Processing Plants. CED-78-11, December 9.

The Federal Crop Insurance Program Can Be Made More Effective. FOD-77-7, December 13.

COMMERCE AND TRANSPORTATION

Effectiveness Of Vehicle Safety Inspections Neither Proven Or Unproven. CED-78-18, December 20.

Highway Construction Zone Safety—Not Yet Achieved. CED-78-10, December 23.

Opportunities For Large Savings By Altering Some Inland Waterway Operations. CED-78-12, December 12.

Improvements Are Needed In Managing Aircraft Used By Federal Civilian Agencies. LCD-77-430, December 22.

United States Travel Service Contractual Relationship With Discover America Travel Organizations, Inc. ID-78-3, November 16.

Combined Truck/Rail Transportation Service: Action Needed To Enhance Effectiveness. CED-78-3, December 2.

Letter report

Need to improve coordination of trade adjustment assistance programs for workers, firms, and communities. ID-78-5, December 6.

EDUCATION, TRAINING, EMPLOYMENT, AND SOCIAL SERVICES

Reevaluation Needed Of Educational Assistance For Institutionalized Neglected Or Delinquent Children. HRD-78-11, December 19.

Letter report

The Veterans Administration has made overpayments of $9.9 million to schools participating in the Predischarge Education Program. HRD-78-20. December 8.

HEALTH

Cancer And Coal Tar Hair Dyes: An Unregulated Hazard To Consumers. HRD-78-22, December 6.

Services For Patients Involved In National Institutes Of Health-Supported Research: How Should They Be Classified And Who Should Pay For Them? HRD-78-21, December 22.

Information On The Appeals Process For Disputed Claims Under The Federal Employees Health Benefits Program. HRD-78-16, November 22.

Comparison Of The Health Care Financing Administration's Medicare Bureau Claims Processing Costs For 1973 and Fiscal Year 1975. HRD-77-139, December 22.

INCOME SECURITY

Privacy Issues And Supplemental Security Income Benefits. HRD-77-110, November 15.

LAW ENFORCEMENT AND JUSTICE

Illegal Entry At United States-Mexico Border—Multiagency Efforts Have Not Been Effective In Stemming The Flow Of Drugs And People. GGD-78-17, December 2.

Overview Of Activities Funded By The Law Enforcement Assistance Administration. GGD-78-21, November 29.

GENERAL GOVERNMENT

The Consumer Product Safety Commission Needs To Issue Safety Standards Faster. HRD-78-3, December 12.

Methods Of Setting Pay For Nonappropriated Fund Employees Should Be Improved. FPCD-77-51, December 14.

Proposals To Resolve Long-Standing Problems In Investigations Of Federal Employees. FPCD-77-64, December 16.

Audit Of Carter-Ford Presidential Transition Expenditures. GGD-78-36, December 23.

Supervision Of Banks By The Federal Deposit Insurance Corporation Can Be More Efficient. FOD-77-8, December 22.

Repetitive IRS Audits Of Taxpayers Are Justified. GGD-77-74, November 18.

Inequities In The Federal Withholding Tax System. PAD-78-5, December 2.

The John F. Kennedy Center For The Performing Arts Is Financially Troubled. GGD-78-15, December 20.

Vehicle Warranties: Greater Efficiency For Government By Using Commercial Practices. PSAD-78-53, December 15.

Summary Of Open GAO Recommendations For Legislative Action As Of Sept. 30, 1977. OCR-78-1003, December 5.

Cooperative Actions Result In More Economical Computer Acquisition And Improved Security At The New Orleans Computer Center. LCD-77-118, December 23.

Audit Of The Office Of The Attending Physician Revolving Fund—Fiscal Year 1977. GGD-78-31, December 29.

Federal Information Sources And Systems. PAD-77-71, November 8.

Letter reports

Effort to reduce the number of holidays observed by Federal employees stationed overseas should be strengthened. ID-78-7, December 12.

Comments on Hewlett-Packard's contentions about GAO report, "Federal Supply Service Not Buying Goods at Lowest Possible Price." PSAD-78-50, December 20.

Changes in mail processing in eastern Connecticut should not affect quality of service. GGD-78-34, December 22.

Smithsonian Institution's National Gallery of Art has adequate controls over use of its Federal and private funds. GGD-78-26, December 22.

How to improve Drug Enforcement Administration procedures and controls over revenue and expenditure transactions. FGMSD-77-74, December 27.

Potential problem areas in procedures and controls for revenue and expenditure transactions at the Department of Housing and Urban Development. FGMSD-77-75, December 28.

Postal Service's plans to consolidate the Berkeley and Oakland, California, post offices. GGD-78-18, November 28.

Postal Service's procedures in acquiring land for and building a new postal facility in Garden City, New York. GGD-77-89, October 18.

Alledged improprieties in the use of funds by the Chairman, Board of Directors, Federal Deposit Insurance Corporation. FOD-77-14, November 29.

GAO comments on impoundments of $908.6 million on FY 1978 budget authority proposed by the President. OGC-78-5, November 30.

Veterans Administration and Defense Department procedures for buying medical x-ray film. HRD-78-15, November 1.

REVENUE SHARING AND GENERAL PURPOSE FISCAL ASSISTANCE

Changing Patterns Of Federal Aid To State And Local Governments 1969-75. PAD-78-15, December 20.

Letter reports

Review of allegations about $5 million grant to Detroit under the local public works program for construction of a sports arena. CED-78-25, December 29.

Can the number of illegal aliens in New York City be estimated? PAD-77-64, June 3.

Increases in New York City's budget above amounts anticipated in the 3-year financial plan. GGD-77-61, June 13.

The Monthly List of GAO Reports and/or copies of the full texts are available from the U.S. General Accounting Office, Distribution Section, Room 4522, 441 G Street, NW., Washington, D.C. 20548. Phone (202) 275-6241.

GOVERNMENT BUREAUCRACY

HON. BOB GAMMAGE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. GAMMAGE. Mr. Speaker, much has been written in recent months about big Government and the ballooning Federal bureaucracy, and I am sure we all agree that the Federal budget can and must be pared. However, I would like to share with my colleagues an excellent editorial which appeared in the January 23 edition of the Houston Post, which puts the present size of the Government bureaucracy in its proper perspective:

ON THE OTHER HAND

Every candidate running for president in the last election campaigned against the federal government he hoped to head. Any luncheon club speaker can draw applause by coming out against big government and the ballooning federal bureaucracy. But we need to keep an eye on the facts as they are. In 1977 the federal government had 2.8 million civilian employees—200,000 fewer than it had in 1967.

The Departments of Agriculture, Interior, State and Defense are smaller than they were from five to 15 years ago. Defense employs 60 percent of the federal force; next comes the Postal Service with 750,000 employees. Some 80 percent of our federal bureaucracy is either at work in defense of the nation or delivering mail. That leaves only about 20 percent to do all the other tasks—from air control to minting money, serving parks or patrolling borders.

While 3.1 percent of all American workers are federal employees, 12.6 percent work for city, county or state governments. Almost half of these are teachers or working in support of education. Nearly 20 percent are policemen or firemen. This means that a majority—almost 70 percent—of all our non-federal government employees are either teaching children, protecting us from fires or trying to protect us from crime. All told—not a very big balloon for a nation that has grown from 179 million to 226 million since 1960.

CONGRESSMEN BEVILL SPEAKS OUT ON NUCLEAR POWER

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. TEAGUE. Mr. Speaker, the Tuesday, January 31 edition of Energy Daily ran an article entitled "Representative Bevill Chides Carter" and quotes portions of a letter which our colleague directed to the President concerning nuclear power based on his visits with those people involved on an international basis. It is interesting to me to note the reactions of those people visited by Mr. BEVILL only a few short months following the visit of my Committee on Science and Technology with the same people with respect to the policy which the President had adopted.

Under leave to extend my remarks, I wish to include the article:

REPRESENTATIVE BEVILL CHIDES CARTER

Rep. Tom Bevill (D-Ala.) chairman of the subcommittee on public works of the House Appropriations Committee, has joined the ranks of those who believe that the U.S. has taken the wrong turn with nuclear power. In a low-key but emphatic letter to President Carter, Bevill says: "I have been looking more deeply into nuclear energy issues nationally and internationally.

"Recently, I had an opportunity to visit with the Director General of the International Atomic Energy Agency, the Executive Director of the International Energy Agency, and energy officials in the Republic of Spain. I also visited the French fast breeder reactor demonstration project (Phenix) and the nuclear waste vitrification facilities at Marcoule. Members of my subcommittee staff visited similar nuclear facilities in the United Kingdom."

Bevill says that he found great concern on his tour that the U.S. has abandoned its position as the world leader in peaceful nuclear technology by its decision to defer reprocessing indefinitely and to delay development of the fast breeder reactor.

In his letter to Carter, dated January 25, he states: "It seems that most nations of the world have had great confidence in the breadth and depth of the U.S. nuclear programs. They believed that our intense concern for nuclear safety and critical licensing processes could be depended upon to provide safe nuclear energy options for those nations that do not have our energy reserves, nor capital resources to invest in nuclear development.

"Now, there is uncertainty as to our policy and intentions, and suspicion that our International Fuel Cycle Evaluation initiative masks an arbitrary decision by the Administration to limit development and use of nuclear power for energy purposes."

Bevill is one of the more quietly influential members of Congress, controlling through his subcommittee large portions of the Department of Energy budget, the Bureau of Reclamation budget, the Corps of Engineers budget and the Nuclear Regulatory Commission budget. He has been a member of Congress since 1966.

The Energy Daily has learned that in addition to his letter to the President, Bevill was sufficiently impressed with the clamor he encountered over U.S. nuclear policy abroad that is seeking a meeting with the President.

Bevill's letter continues: "All of our contacts supported U.S. objectives of preventing further nuclear weapons proliferation and assuring adequate nuclear safeguards. But we found no responsible official at the technical level who believes we should defer reprocessing of light water reactor fuels or delay development of the uranium-plutonium cycle liquid metal fast breeder reactor because of proliferation or safeguards concerns. All seemed to think that with appropriate national and international agreements, present programs can be adequately safeguarded, and that the world needs for energy dictate aggressive development of nuclear energy capabilities, particularly a viable breeder reactor."

He said that he found "almost universal surprise and amazement at U.S. proposals to reexamine technologies previously rejected in favor of the LMFBR option since this seems unwarranted on any technological grounds."

Spain for example, Bevill tells the President, has decided to order four nuclear plants "from a non-U.S. supplier and to buy nuclear fuel from Russia. They have contracted with Britain and France for reprocessing." Such decisions, Bevill says, aggravate our unfavorable trade balances and further weaken U.S. leadership in nuclear matters.

The Bevill letter hammers at the different situation which exists in energy-hungry countries abroad. It says: "IEA world energy projections indicate that other nations need to turn to a more permanent source of energy, such as fast breeder reactors, well before the turn of the century. Russia, France and Britain each have already developed and operated 250 MWe fast reactor prototypes comparable to our Clinch River project and have shown great progress in liquid metal technology. They are moving aggressively to reprocess present fuels and have demonstrated technology to reprocess fast reactor fuels. Their waste management programs seem comprehensive and adequately designed to deal with problems of nuclear wastes. These countries are already at work on commercial size breeder reactors."

Bevill goes on to examine the Administration's current budget request and deplores the cutting of nuclear programs there. And he tells the President: "I know of the pressures being exerted by those who oppose the peaceful use of nuclear power in this country and who would like to stop our development programs. But it is obvious that others are proceeding without us and, in fact, may now be several years ahead of us.

"It appears that the choice is whether we decide to maintain a posture of leadership to assure safe use of nuclear energy in the world, and to secure our future energy options, or whether we abandon our leadership role to others and take added risk with respect to energy supplies through a hiatus in our nuclear development and demonstration programs. I think this latter course is dangerous to the Nation and strongly urge your personal reconsideration and redirection of the Administration's present planning."—Llewellyn King.

PROTECTING SMALL BUSINESS FROM EXCESSIVE GOVERNMENT REGULATION

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. GILMAN. Mr. Speaker, our Nation's small businesses face an array of serious problems portending hard times ahead for some and a threat to the very existence of others.

Recent surveys by the National Federation of Independent Business revealed that "Government regulation and redtape is the single most important problem of more than 1 in 10 small firms." Of impediments to small business, all firms cited only inflation and taxes more frequently than Government regulation.

On February 1, 1978, the Subcommittee on Special Small Business Problems held hearings on H.R. 7739, the Small Business Impact Statement Act; a measure introduced by my distinguished colleague from Virginia (M. CALDWELL BUTLER). This bill would require Federal regulators to thoroughly assess the impact proposed regulations would have upon small businesses.

As one of the bill's cosponsors, I testified in support of H.R. 7739, urging the subcommittee to favorably report the measure.

So that my colleagues might share my views concerning the need for protecting this Nation's small businesses from onerous Government regulation, I am including the text of my testimony at this point in the RECORD.

STATEMENT OF REPRESENTATIVE BENJAMIN A. GILMAN

Mr. Chairman, and distinguished members of the Subcommittee on Special Small Business Problems, I am pleased to have this opportunity to testify in support of H.R. 7739, the "Small Business Impact Statement of 1977," which was introduced by the gentleman from Virginia, M. Caldwell Butler, and of which I am a cosponsor.

H.R. 7739 is an extremely well-reasoned remedy to the torrent of often incongruous and shortsighted federal regulations threatening the very existence of American small business. Characteristically out of step with the paper-thin profit margins and the economic hostilities to which small businessmen are subjected, federal regulators annually conceive of a disjointed array of rules and regulations whose intent and purpose are alarmingly divorced from conceptions of actual consequences which will be suffered by small businesses as a result of their compliance with these regulations. The Small Business Impact Statement Act of 1977 goes far in correcting this starkly unreasonable and inequitable situation in which American small business now finds itself.

Noting that the "disproportionate impact" of Federal agency rules is not "fully recognized or considered," thus "unduly and unnecessarily injuring small businesses," H.R. 7739 would require federal agencies, during the course of formulating federal regulations:

(1) to make a thorough assessment of the costs that proposed regulations impose on small businesses;

(2) to consult with and obtain the comments of the Office of Advocacy of the Small Business Administration regarding the proposed regulation's effect upon small business; and

(3) to submit the impact statement and these comments to the Chairman of the House and Senate Small Business Committees in advance of the promulgation of each regulation.

Mr. Chairman, the Small Business Administration recently reported that those firms most adversely affected by the increasing array of government regulations are those small firms employing between 50 and 250 employees. A recent Joint Economic Committee report illuminated the specter of American small business becoming "an endangered species," ascribing this fact partially to the ever-escalating number of burdensome government regulations.

The January 1977 Report of the SBA Task Force on Venture and Equity Capital for Small Business concluded that regulation has severely cut small business incentives to take growth risks and further asserts that "the small business today is in grave danger of smothering under the weight—and cost—of repetitive paperwork," spawned by compliance with government regulation.

Also in January 1977, the Domestic Council Review Group on Regulatory Reform grimly reported that "Seldom do we know the real effects of existing or proposed regulations." Yet, in September of 1977 figures released by the Commission on Federal Paperwork pointed out that the paperwork costs of small businesses incurred in complying with the reporting requirements of the Internal Revenue Service, the Department of Labor, the Small Business Administration, the Census Bureau and other government agencies was but a shade under $15 billion per year. This particular statistic, coupled with the fact that small business firms constitute approximately 97 percent of this nation's business concerns, clearly attests to the high price that government regulations exact from our nation's business community.

Citing the consistent findings of the National Federation of Independent Business's (NFIB) Quarterly Economic Report for Small Business, Federation counsel James D. McKevitt, stated that "government regulation and red tape is the single most important problem of more than one in ten small firms." Of impediments to small business, all firms cite only inflation and taxes more frequently than government regulation.

The Small Business Impact Statement Act does not eschew government regulation for which experience and potential genuine business problems clearly point the need. It does, however, reflect the exigent need to stop the flow of regulations which have not been thoroughly assessed as to the degree and nature of their adverse impact upon the small business community. It is hardly unreasonable for the small businessman to request—in light of past shock waves felt by federal rule promulagation—a responsible estimate of a regulations impact. Such an estimate, as outlined by H.R. 7739, would include information on the average cost incurred by a small business, the types of small businesses affected, and the regulation's effect upon a small business' competitiveness in both the small business sector and other sectors of the economy.

The impact statement would in essence be an analysis of these elements and how they relate to each other. The legislation's provisions for studied review of impact statements by the Office of Advocacy of the Small Business Administration and the Small Business Committees of both the House and Senate would greatly enhance the prospect for the promulgation of regulations more attuned to the particular needs of small businesses.

A recent issue of Time magazine vividly stated that Federal rules and regulations "seem to float out from Washington as casually as children blow soap bubbles, and all too often contain about as much substance." Indeed, I have long been concerned with the Rube Goldberg like nature of the regulation making process and the unquestionable necessity to strike out for reform.

Recently, I introduced legislation underscoring the need to assure that Federal regulations are: (1) written clearly so as to be readily understandable by those persons subject to or affected by these regulations; and (2) are otherwise designed to meet efficiently the goals of the legislative programs to which they relate. My measure calls upon the President to submit annually a report to Congress on progress made towards achieving these goals so that legislative remedies could be directed towards persistent impediments to efficient regulation making.

I believe H.R. 7739, as introduced by my distinguished colleague, the Gentleman from Virginia, Mr. Butler, to be an important step towards rescuing a large and important element of this nation's business sector from the specter of an oppressive and economically deadly proliferation of unsound federal regulations.

Our nation's small businesses have a long and distinguished heritage of significant contribution to our free enterprise system. Passage of H.R. 7739 will greatly assist small businesses in continuing this heritage by reducing the onerous burden of excessive and ill-conceived Federal regulations they now shoulder.

Market place perils and economic vicissitudes are adversities that the hard working, enterprising small businessman is prepared to accept. His lot, however, should not be compounded by excessive and ultimately destructive government regulation.

Accordingly, I urge my colleagues on this subcommittee to act favorably on H.R. 7739, the Small Business Impact Statement Act.

I thank the subcommittee for this opportunity to appear before you on this measure.

INTRODUCES AMENDMENT TO SOCIAL SECURITY ACT

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. WHITEHURST. Mr. Speaker, Public Law 93–647, which went into effect on January 1. 1975, contained a provision which made it possible for the pay of a civilan employee or military member to be diverted for child support or alimony payments. This was a major step forward, and will benefit a large number of divorced or separated spouses and their children. However, in States which have community property laws, an inequity has continued to exist, since only alimony and child support are specifically mentioned in the law.

For this reason, I am today introducing a brief amendment to section 459 of the Social Security Act (42 U.S.C. 659) which changes the wording to include all "legal obligations to provide child support or make alimony or any other court-ordered payments or settlements." This should make it possible for Federal agencies to make payments based on divorce or separation decrees in all States.

TUITION AND TAX CREDITS

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. FRENZEL. Mr. Speaker, I invite my colleagues' attention to a very thoughtful analysis of the Packwood-Moynihan tuition tax credit bill—a subject that has quickly become one of the major issues of the 95th Congress.

The Packwood-Moynihan bill was the primary subject of hearings that were recently completed by the Senate Finance Subcommittee on Taxation. House hearings will be held on February 14, 15, and 16 before the full Ways and Means Committee.

As the House sponsor of the Packwood-Moynihan bill, I believe that tax credits are the most effective way to provide taxpayers with financial relief from the skyrocketing costs of eduction, because they do not add to the heavy burden of bureaucratic redtape. More importantly, tax credits will help to provide the educational consumer with freedom of choice. Educational choice has been a popular and successful tradition in America, but inflation has robbed the middle-income American of any real choice.

The lead editorial from the Washington Star on January 24, 1978, offers a commonsense review of many of the issues surrounding tuition tax credits:

TUITION AND TAX CREDITS

Sen. Daniel Patrick Moynihan believes that tuition tax credits are "an idea whose time has finally come," and so do his influential co-sponsors in the Senate.

If so—if, as the senator also submits, "the people of this nation want it"—the message isn't getting through to those who think they know what the people need.

There were hearings last week on the Moynihan-Packwood tuition credit bill in the Finance subcommittee on taxation. The hostile reactions to the bill reflect the same administration attitude that greeted Sen. William Roth's similar proposal of a few weeks ago. It seems to us a case of fatigued imagination.

The tax-credit offset of tuition, said several administration spokesmen, would wickedly benefit "the rich" (for which read, middle-income taxpayers). One Treasury official also charged that the bill "would make it easier and cheaper for a student to attend a private school if his family wished to avoid an integrated public school."

These objections merit a passing glance. Indeed, tax credits would be available to all families, regardless of income, who send children (or a spouse) to a college or university (public or private), a vocational school, a secondary or elementary private school. The credit would equal half the tuition, up to a ceiling of $500 per student.

Yet it isn't a "rich man's bill"; it is a taxpayer's bill. "Most of the benefit," according to Senator Moynihan, "will go to families earning well under $20,000 a year, and by making the credit refundable the proposed legislation will also provide a real financial boost to low income families with limited tax liability."

This evidently false designation of a tax expenditure in aid of education as a bonanza for the wealthy is typical. It is supposed to be an argument stopper, because it has somehow become official dogma in this administration that the only value worth seeking through tax policy is the redistribution of income from middle-class taxpayers to those designated "poor" under the escalating federal definition of that term. Redistribution is a proper concern of tax policy, but not the only one. Others worth consideration are (a) the preservation of a working system of private education, both as a check on the quality of public education and as a self-justifying value in a pluralistic society; and (b) a meaningful choice, for all parents, between public and private education.

The suggestion that parents might "avoid an integrated public school" hardly rises to the dignity of argument. Most parents, if we are not mistaken, are looking for orderly, disciplined, effective education. To what degree it is integrated is a secondary concern—not, of course, a trivial concern. But the Supreme Court recently declared, in the Northern Virginia case of last term, that no tax benefits shall be available to racially segregated private education. That issue is closed.

The principal concern—at least where secondary and primary education are concerned—is whether a tuition credit program of the sort Senators Moynihan and Packwood propose can meet the stern tests of religious pluralism now insisted upon by the Supreme Court. As matters stand, that is at least doubtful.

It is, however, Senator Moynihan's view—a view we share—that in the recent era the Court has imposed needlessly restrictive constitutional limits on state aid (and by implication, federal aid) to private "religious" education. In a commencement address last May at Lemoyne College, New York, the senator said of this line of jurisprudence that "the kindest thing to say is that (the decisions) are unpersuasive (and) the unkindest thing to say is that the Court has been given the thankless task of providing constitutional legitimacy for the religious bigotry of the 19th Century."

And what are the grounds for that suggestion? As recently as 1876, after more than half a century's experience with public support of private religious education in New York (and other states), its foes recommended a constitutional amendment to forbid it. The implication is that nothing in the establishment clause of the First Amendment renders such aid clearly unconstitutional.

As is well known, moreover, the Court's rigid line against "excessive government entanglement with religion" has been repeatedly strained, if not breached, by state programs of tuition assistance to private higher education, some of it to institutions far from secular in sponsorship and educational philosophy.

In any event, we share Senator Moynihan's basic feeling—that the "constitutional" case against tax benefits for parents of parochial school students is an unattractive vestige of archaic prejudice. Practically speaking, it is difficult to show that any federal aid "advances" religion per se; recent studies cited by the senator suggest that the "religious" effects of parochial education (measured by church communicants or candidates for the priesthood) are practically nil. But even if they were substantial, may we not distinguish between such desirable effects and "an establishment of religion"?

Putting aside the First Amendment problems, the main fact with which public policy must reckon today is this: A swollen system of public education threatens to swallow up the financially-starved private educational sector, to the eventual benefit of neither. For various reasons, private education is pricing itself out of middle-class reach. The Moynihan-Packwood plan would not necessarily work to the benefit of either sector, private or public, it would offer taxpayers an enhanced choice and would probably help restore a healthy balance.

FORWARD TOGETHER, SCOUTING, U.S. BOY SCOUTS OF AMERICA, 1978

HON. WILLIAM H. NATCHER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. NATCHER. Mr. Speaker, during the entire month of February, the Boy Scouts of America will be reflecting on past accomplishments and anticipating and planning future goals and projects. The month of February is celebrated by the Boy Scouts as National Scouting Month. February is the anniversary month of the Boy Scouts, an organization incorporated in 1910, with the President of the United States as honorary president, and dedicated to the development of good citizenship; an organization which we proudly salute.

The purpose of the Boy Scouts of America is to provide through community organizations an effective program for boys designed to build desirable qualities of character, citizenship, and personal fitness.

Young people of our great country are today, as in the past, faced with the task of preparing themselves to meet an uncertain future, one which holds many grave responsibilities and duties; many opportunities, rights and privileges, both those granted by law and those gained through individual initiative. Perhaps, Mr. Speaker, never before in history of our democratic process have the meeting of these responsibilities, and the utilization and exercise of these opportunities and rights been so necessary to the perpetuation of the doctrines and beliefs upon which this country is founded. The Boy Scouts of America is an organization in the finest American tradition.

Scouting teaches the values of both responsibility and opportunity. The Boy Scouts of America are knowledgeable about and take pride in their American heritage and understand America's role in the world; they have a keen respect for basic rights of all people and are prepared to fulfill the varied responsibilities of participating in and giving leadership to American society and to the forums of the world.

Mr. Speaker, the principles underlying the Boy Scouts' activities and practices are framed to develop character, intelligence, skill, handicraft, physical, mental and moral health, self-care and reliance, and the practice of service for others. The efficient individual becomes an asset to his community, yours and mine, and to our Nation. The teamwork, the self-discipline is just as important as the sense of adventure that grows out of the Scouting experience and are the very things we need today to build a better America.

The 1977 Boy Scout Jamboree was held in Moraine State Park, Pa., during the

first 2 weeks of August. More than 24,000 Scouts attended their jamboree guided by the theme of "Forward together, Scouting, U.S.A." This was indeed a learning experience. All of our Nation's Scouts who attended this jamboree were bound together by certain ideals—ideals that were strengthened and given new meaning.

Today when some people are casting about for new values, new answers, and new outlooks on life, the key to many of our problems lies in the basic values of the Scout law—in trust, in loyalty, courtesy, thrift, bravery, and reverence.

I am proud and grateful that the Scout groups, from Cubs to Explorers, are dynamic resources in the Second Congressional District of Kentucky, which I have the honor to represent. It is indicative of the fine caliber of men who lead the Boy Scout troops voluntarily devoting ceaseless hours of preparation and activity with their boys. They strengthen our communities by developing young men who know the value of good citizenship and practice it. The strength of our Nation lies in the character of its people and the work being done by the Boy Scouts of America makes it a participant of inestimable value to our future.

LIVE MORE FOR LESS

HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. BENNETT. Mr. Speaker, the following editorial from the Florida Times-Union points out that it is much cheaper to live in Jacksonville, Fla., than elsewhere when comparison is made with 14 other U.S. cities studied by a recent survey. This is probably one reason why Jacksonville has had very substantial growth in recent years:

LIVE MORE FOR LESS

There's good news for Jacksonville from an outfit known as Runzheimer Affiliated Services, of Rochester, Wis., corporate cost-of-living consultants.

This firm recently made a survey of 15 U.S. cities (including the suburban areas) studying the costs of housing, taxation and transportation (which account for 60 to 75 percent of most family budgets) as applicable to the family budget of a $39,000 a year executive.

The study, Runzheimer told the Wall Street Journal, is "the most detailed scrutiny ever given comparative regional family living standards" in this upper middle income bracket. The results show a wide spread in the basic cost of living in the 15 cities studied.

The most expensive was Westport, Conn.

And the lowest—Jacksonville

The difference was considerable: $28,799 in Westport for the same items which would cost $18,242 in Jacksonville.

San Francisco at $27,014 was next highest and Atlanta ($19,373) was closest to Jacksonville. In general, the more expensive were in the northern portion of the nation and the less expensive were in the South (Charlotte, New Orleans and Dallas join, in descending order. Atlanta and Jacksonville).

An analysis of the figures shows, further, that the greatest variation was in the cost of housing, the least in transportation (operating two family cars). The tax comparison was modified somewhat by the fact that federal income and Social Security taxes (the same anywhere) were included.

In housing the difference was dramatic. In every case the figures are for a seven room home (three bedrooms and two baths) with central heat and air, a fireplace and two car garage. A mortgage loan (for 80 percent of the value) was assumed at prevailing local interest rate, with local property taxes, utilities and maintenance included.

In Jacksonville this shelter total came to $6,446 a year, in sharp contrast to $13,698 in Westport, Conn.—more than twice as much. In fact, this one item alone made up some 70 percent of the difference in the cost of living in the two cities.

Incidentally, while the Runzheimer study is based purely on current (actually late 1977) costs, with no historic comparison, the findings can be contrasted to a federal study made five years ago on families in the upper income bracket (average income $38,500—virtually the same as the current study).

While the federal study gave only a national annual housing cost average—$4,682—this figure is so far below the current range (Jacksonville's figure is roughly half again as much and Westport's is twice Jacksonville's) that the recent increase in housing costs is dramatized.

Such figures, obviously, show the economic lure of the South in general—and Jacksonville in particular—for executives and managers.

Not to mention Florida's obvious other lure—climate.

Of course, the number of families in this income bracket in the United States, let alone Jacksonville, is relatively small.

The next question is whether this cost differential filters down to the economic plateau on which most people live. If so, Jacksonville has another selling point in its struggle to bring in employers for its large number of underemployed, as well as its unemployed.

IT IS CHEAPER HERE—THAN IN CONNECTICUT, ANYWAY

A $39,000 executive in Jacksonville can live $10,000 cheaper than his counterpart in Westport, Conn., according to a recent study by Runzheimer Affiliated Services of Rochester, Wis.

The study, reported in the Wall Street Journal last week, listed Jacksonville as the least expensive of 15 suburbs and small cities. It was based on the cost of housing taxation and transportation, which the Journal said make up 60 to 75 percent of family budgets.

The five least expensive places on the list were all in the South: Charlotte, New Orleans, Dallas, Atlanta and Jacksonville.

The five most expensive were Westport, San Francisco, Rye, N.Y., Minneapolis and Portland, Oreg.

The study showed the cost for an executive living in Jacksonville at $6,446 for housing, $8,980 for taxes and $2,858 for transportation, a total of $18,284.

These compared with Westport's figures of $13,698 for housing, $11,748 for taxes and $3,353 for transportation, a total of $28,799.

The comparisons were based on the ownership of a seven-room house with central heat and air conditioning and a two-car garage, and two cars.

Gerald Bartels, executive vice president for the chamber, said he will probably use The Wall Street Journal article in future advertising and promotion.

"That's the best kind of advertising you can get," Bartels said of the news story. "This complements our national advertising program which has promoted the fact that taxes are lower here."

ACTION NEEDED TO PROMOTE HUMANE TREATMENT OF ANIMALS

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. RICHMOND. Mr. Speaker, millions of animals continue to be subjected to terrible and needless suffering and abuse in the United States each year. To promote more humane treatment of animals, we must keep pace with modern developments in this area, such as laboratory experimental and testing techniques, factory-type production of hundreds of millions of head of livestock and poultry, and the explosion of the pet population involving millions of abandoned and starving animals.

Last year, Congressman Koch introduced H.R. 446 and its companion bills, H.R. 3169, and H.R. 3170, designed to establish a Commission on the Humane Treatment of Animals. Since Mr. Koch left Congress, and because the bills have considerable support and have already been considered by a House subcommittee, I am concerned that this vital legislation not be forgotten during this session. Consequently, last week I reintroduced Mr. Koch's bill, complete with the original list of 56 cosponsors, as H.R. 10522, H.R. 10523, and H.R. 10524.

Testimony conducted during 94th Congress hearings on an identical bill before the Subcommittee on Livestock and Grains of the House Agriculture Committee, clearly demonstrated that laws to date concerning animal welfare are grossly inadequate. In light of the millions of dollars spent on the senseless destruction of strays and abandoned pets, and the glaring but invisible conditions in which poultry and livestock are raised in this country, it is time to recognize the strong need for protection for helpless animals.

Briefly, the bill will establish a Commission on the Humane Treatment of Animals to study farming practices and laboratory research experimentation, potential substitutes for animals in laboratory experiments, domestic pet growth rates, especially in urban areas, and the impact on public health and the effectiveness of existing laws. From this study, the Commission will be able to recommend alternatives and potential areas which need corrective measures.

Following, is a section-by-section analysis of the bill, detailing how the Commission will be appointed and how it will operate. I hope my colleagues will take a few moments to study the bill, as it could be a meaningful step in the consideration and adoption of other bills, which pertain to the treatment of animals and animal welfare:

SECTION-BY-SECTION ANALYSIS OF THE BILL TO CREATE A COMMISSION ON THE HUMANE TREATMENT OF ANIMALS

Section 1. Preamble.

Section 2. Establishes a Commission on the Humane Treatment of Animals.

Section 3. Directs the Commission to study:

1. farming practices and laboratory research experimentation (including biomedical and military research).

2. potential substitutes for animals in laboratory experiments.

3. domestic pet growth rates especially in urban areas and the impact of this growth on public health.

4. effectiveness of existing laws, evaluating and recommending alternatives to current inhumane practices. The Commission will study treatment of animals in connection with the exercise of any religion.

Section 4. The Commission shall be comprised of 11 members, with terms lasting the life of the Commission and vacancies filled by those making the original appointments.

The President Pro Tem of the Senate and Speaker shall each select one representative from (a) animal welfare or humane societies, and one representative from (b) medical schools, zoologists, or wildlife biologists.

The President shall appoint an individual with demonstrated administrative or judicial abilities in addition to three representatives from each (a) and (b).

Members shall each receive level V of the Executive pay schedule in addition to travel expenses for each day they are engaged in Commission duties.

Members who are full-time officers or employees of the United States shall receive no additional pay on account of their service on the Commission.

Six members constitute a quorum though a lesser number may hold hearings, and members shall elect a Chairman and Vice Chairman from among themselves. The Commission shall meet at the call of the chairman or six of the members.

Section 5. The Commission shall appoint a compensated director, and additional personnel may be appointed and paid by the Commission as it deems necessary.

Upon request of the Commission, the head of any Federal agency is authorized to detail any of his/her personnel to assist the Commission.

Section 6. The head of any department or agency shall furnish such information as the Commission deems necessary to carry out its duties.

The Commission may use the mails, and issue subpoenas.

Section 7. Within two years after the last member is appointed, the Commission will transmit a final report to the President and to Congress. The report will contain a detailed statement of findings and conclusions, together with its recommendations.

Section 8. Sixty days after submitting the report, the Commission will cease to exist.

SRI LANKA'S INDEPENDENCE

HON. THOMAS S. FOLEY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. FOLEY. Mr. Speaker, February 4 marks the anniversary of Sri Lanka's independence and is an appropriate time for us to give recognition to the role and achievements of this Nation.

I have had the pleasurable experience of visiting Sri Lanka and have been deeply impressed with the people of Sri Lanka as they build and maintain a society committed to advancing the quality of life at all levels. In this regard, Sri Lanka contends with many of the economic problems facing nations that have been working so diligently for the past several decades to truly secure the independence that was won with such great difficulty. As we all know, it is a leading spokesman in this area and has earned widespread respect and recognition for this leadership by international organizations.

I commend the people of Sri Lanka for their dedication, and I know that I speak for many Americans in expressing both my congratulations on this important occasion and my every good wish for future success in making real the ideals that have motivated their history as a nation.

PROPOSED MILEAGE STANDARDS FOR LIGHT TRUCKS ARE UNREASONABLE

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. KILDEE. Mr. Speaker, I would like to bring to the attention of my colleagues the proposed rule dealing with mileage standards for light trucks which was issued recently by the National Highway Traffic Safety Administration.

Since the Congress gave a clear direction of the factors to be considered in setting the standards when it passed the Energy Policy and Conservation Act of 1975, we should all be interested in how well our directions have been followed. I am personally convinced that NHTSA gave insufficient attention to these instructions.

The abbreviated version of the Department of Commerce's comments on the proposed rule and my own testimony before NHTSA follow:

U.S. DEPARTMENT OF COMMERCE,
Washington, D.C. Nov. 21, 1977.

Dr. RICHARD L. STROMBOTNE,
Program Director, Office of Automotive Fuel Economy, U.S. Department of Transportation, Washington, D.C.

DEAR DR. STROMBOTNE: We have reviewed the notice of proposed rulemaking for 1980-81 nonpassenger automobile fuel economy standards, and we do not consider the proposed standards to be feasible within the time frame allowed. The proposed 1980 standard for two wheel drive trucks requires a fuel economy improvement of at least 25 percent over the level for 1979 models. Such an improvement does not appear feasible within the nominal 18 months lead time provided. Actually the effective lead time is far less because emissions certification testing starts twelve months or more prior to the beginning of the model year. It is our opinion the only method by which manufacturers can comply with the proposed standards is by withdrawing a large portion of their product lines from the market. The magnitude of reduction in product offerings that would be required to meet the proposed standards would risk major employment and production losses. A more detailed statement of our position is contained in the enclosure.

The enclosure deals only with the feasibility and economic issues of the proposed fuel economy standards. However, safety implications should not be overlooked. The compromises in load-carrying capacity associated with the proposal entail the risk that independent manufacturers of camper bodies or other special body types—or the end user himself—may install equipment that substantially exceeds the load-carrying capacity of the vehicle.

If you desire further information regarding any of the issues raised in the attachment, please don't hestitate to call upon us.

Sincerely,

R. V. COLEMAN,
Bureau of Domestic Commerce.
A. M. MAHER,
Office of Energy Programs.

STATEMENT OF CONGRESSMAN DALE E. KILDEE

NONPASSENGER AUTOMOBILE FUEL ECONOMY STANDARDS FOR MODEL YEARS 1980–1981—DOCKET NO. FE–77–05; NOTICE 1

Because I represent the district which would be most affected by the proposed mileage standards for light trucks, I initiated an examination of those standards and their possible impact.

In the way of background, the 7th District assembled 443,000 light trucks in model year 1977. In addition, engines and other components for these vehicles are produced within the district. Obivously, any miscalculation in setting the standards could have significant economic implications.

In setting the standards, the Department of Transportation was to consider the technological feasibility, economic practicability, the effect of other federal standards, and the need of the nation to conserve energy. In examining the proposed standards, I also attempted to take each of these factors into account.

Despite this similarity of approach, I am convinced that the standards are unrealistic. For the sake of convenience, I will deal primarily with the standards proposed for domestically produced two wheel drive light trucks, although similar problems are posed by the standards for four wheel drive vehicles. They mandate an improvement in fleet mileage from 17.2 m.p.g in model year 1979 to 19.2 m.p.g. in model year 1980. This 2 m.p.g. increase matches the largest mandated increase for any one year for passenger automobiles. In addition, the 19.2 m.p.g. figure is actually higher than the 1979 standard for passenger automobiles. The means by which the passenger car standards were met is readily visible to us all. We can all see the downsizing which has been a major factor in the weight reductions which account for 50% of the improvement. Obviously trucks would not have the same cargo capacity if they were downsized in the same fashion.

The measure necessary to attain the 2 m.p.g. increase for 1980 are complicated by the fact that 1979 standards apply only to vehicles up to 6,000 pounds gross vehicle weight while the fleet average for 1980 incorporates a new class of vehicles, those trucks from 6,000 to 8,500 pounds gross vehicle weight. The standards, therefore, would not only mandate a substantial improvement in efficiency but require that a class of vehicles which consume more fuel be included in the determination of fleet standards. The Department of Commerce estimates that the proposed standards would require a mileage increase of more than 25 percent within the one model year from 1979 to 1980. The automakers place the figure closer to 30 or 35 percent. It represents an actual increase of between 4 and 5 miles per gallon.

In examining the first of the criteria which was to be considered in setting the standards, that of technological feasibility, I questioned each of the major manufacturers about each of the technical changes which was suggested by DOT. I am convinced that none of the manufacturers is physically capable of meeting the proposed standards by the 1980 model year.

A number of the suggestions would require major engineering changes. Those who have written the rule are apparently not

aware of the lead time required in making engineering changes. I might point out that the design and production plans for 1980 are already completed. The effective lead time for the 1980 model year is in actuality only a maximum of six to eight months because production models for the 1980 model year must be ready for emissions testing in September of this year. That would preclude the major engineering changes proposed by DOT. The third of the criteria which DOT was supposed to have considered was the effect of other federal motor vehicle standards on fuel economy. It appears that the impact of these standards on engineering lead time was overlooked.

The problem in terms of the resources of the manufacturers is further complicated by the fact that the technology is heavily front loaded. Even to reach the standards by the 1982 model year, which is the first year that totally new engines or trucks could be on line, manufacturer resources would be severely strained. DOT has, however, assumed that all of the available technology, and even some technology which is still in the experimental stage, can be on line by the 1980 and 1981 model years.

If the technical changes cannot be made by the 1980 model year, the automakers have little choice but to severely curtail production of certain models and to produce only limited numbers of trucks powered with small engines if they hope to meet the proposed standards.

One of the things which was to be considered in setting the standards was the economic practicability. It is in this area that I feel that DOT's analysis is weakest. There was a clear congressional direction in the report accompanying the Energy Policy and Conservation Act of 1975 which stated that the Department should consider "the possible implications for the national economy". Despite this admonition, DOT concentrated almost exclusively on the question of whether sufficient internal capital exists within the automobile industry to finance the changes in technology required.

I might point out that even this calculation of $266 million for the entire industry seems to be grossly underestimated. The Department of Commerce commented: "NHTSA's estimate of capital requirements is substantialy understated. . . ." In conversations with representatives of the companies, each pointed out that the estimate for the total industry will be exceeded by a factor of three or four by his/her company alone.

That miscalculation is relatively minor, however, when a very serious omission is considered. The Department almost totally ignored the market impact of the proposed standards. There are no actuarial projections in terms of sales. The rulemaking support paper contained exactly eight sentences dealing with this subject.

These sentences contain no data and can be summarized in the statement: "We do not know for sure, but we *think* that it will have no major impact." With literally hundreds of thousands of jobs affected by the sale of domestically produced light trucks, I certainly consider the cursory examination of this factor to be inadequate.

In point of fact, the assumption made by DOT without supporting evidence would seem to be inaccurate. In its comments on the proposed regulations, the Department of Commerce stated: "It is our opinion the only method by which manufacturers can comply with the proposed standards is by withdrawing a large portion of their product lines from the market. The magnitude of reduction in product offerings that would be required to meet the proposed standards would risk major employment and production losses."

The figures presented by the automobile industry are chilling to say the least. In order to meet the proposed standards, major product lines would have to be discontinued. You have already heard testimony that up to 95 percent of Chrysler's domestic production would have to be eliminated. You have heard that Ford would have to reduce production by 360,000 vehicles. Such reductions could not help but have a major impact on employment and the national economy.

Even if the light trucks could be produced two additional factors will affect sales, the reduction in performance capacity and the additional cost.

The standards leave no option but to produce trucks with reduced acceleration and restricted load capacities. It is my feeling that the reduced performance capacity will have an impact on sales.

Let me illustrate with an individual example. If I am a farmer with a less fuel efficient 1976 or 1977 truck which still operates fairly well but am considering buying a 1980 truck, what will happen? I go into my truck dealer and discover what the performance capabilities of the new trucks will not meet my needs. What will my decision be? I will most likely decide to keep the older model which is less efficient in fuel consumption for a few more years. Now multiply that individual decision a few thousand times. What will be the ultimate impact on fuel consumption and employment?

The reduced performance capacity will be paired with a market increase in cost. This increase may be far higher than DOT's estimate of $141. First, the auto manufacturer may be passing on the civil penalties which have been incurred. If the automakers fall the full 2–3 miles per gallon below the standards which they currently estimate, the civil penalties will be between $100 and $150. The actual figures for some of the technical changes could be closer to $400–500. If a price increase of that magnitude were to occur, it would undoubtedly have an impact on sales.

DOT has argued that because of the fuel savings which would accrue over the life of the vehicle, there would be no inhibition on sales. I would like to point out that the Administration has made a directly opposite assumption in its proposal for a crude oil equalization tax. They point out that despite the fact that the tax would eventually be rebated to the consumer, the increased cost would have a deterrent effect on the original purchase. I feel that the same analogy would be true in the case of sales of light trucks.

After the oil embargo, my district encountered severe economic problems. I still remember the headline in *The Flint Journal* which said: "Area Jobless Rate *Drops* to 15 Percent". (It had been 19.6 percent in the previous reporting period). Due to the downturn in truck production there were 2925 people directly laid off in my district. Many others were affected too, though. Retail sales plummeted. General Motors estimates that for every reduction in truck sales of 100,000 units 13,700 jobs are lost in direct truck manufacturing and another 20,500 jobs are lost in supplier industries. I have seen no accurate estimate of the indirect loss of jobs in small businesses because of the increase in unemployment.

The one criterion that DOT did deal with in a reasonable manner was the need of the nation to conserve energy. They pointed out that if the proposed standards were enacted, 60,000 barrels of oil a day would be saved or considerably less than 1 percent of our domestic consumption. They based that figure on the assumption that the fleet economy standards would remain where they will be for model year 1979. I would like to point out that even if the standards remained the same and the trucks in the 6,000–8,500 pound GVWR class were added that the 60,000 barrel figure could be reduced substantially.

I feel, however, that even if the figure should be greater than 60,000 barrels that we should take cognizance of other economic and social impacts. I recognize the need to conserve energy and to increase mileage, but I do not think we achieve our purpose if we precipitate an economic crisis.

One thing that I have noted since being here in Washington is that we deal with very large numbers. Because of their very magnitude, those numbers insulate us from the realities that they represent. The size of the numbers enables us to overlook the impact that our decisions have on individual lives.

We are often able to relate to the personal tragedy of one individual or one family if they should be so fortunate as to receive media coverage, but we do not have the capacity of multiplying that tragedy by thousands.

If nothing else, I would hope that I shall be able to convince you to consider the very real human consequences of your action. I would be willing to accompany you to Flint, Michigan, so that you can actually talk to some people in an unemployment line, to people who were laid off only a couple of years ago, and to people whose businesses were hurt because so many people were unemployed.

The Congress mandated that economic implications be considered when the standards are issued. The Department of Commerce has estimated that the proposed standards could have a severe deleterious effect. The Department of Transportation has estimated that the economic impact will be minimal. Given the serious disagreement between the two executive departments, I would hope that you would seriously reassess the proposed standards.

If your proposed standards should go into effect, I would hope for the sakes of thousands of people that your assessment of the impact of the proposed standards is correct, and mine is wrong.

TRIBUTE TO PRESIDENT EISENHOWER

HON. WILLIAM F. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 25, 1978

Mr. WALSH. Mr. Speaker, "Leader," that single word, better than any other, describes Dwight David Eisenhower, Commander of Allied Forces in World War II, President of Columbia University, and for two terms President of the United States of America.

I am proud to join with my colleagues as we mark the 25th anniversary of his inauguration as our President, and prouder still that the memory of this great American has been perpetuated in the college that bears his name in Seneca Falls, part of the 33d Congressional District of New York.

Dwight David Eisenhower became an outstanding military figure, a distinguished educator, and a popular President because of his belief in himself, in the people of his country and in the principles on which this Nation was formed and on which it thrives.

Few Americans have given us so much. And generations to follow will join those of us praising Dwight David Eisenhower today in recognition of his greatness.

SEABORNE DRUG INTERDICTING JURISDICTION FOR THE U.S. COAST GUARD

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. GILMAN. Mr. Speaker, under the leadership of the distinguished gentleman from New York (Mr. WOLFF), the Select Committee on Narcotics Abuse and Control, of which I am a member, recently held hearings at the U.S. Mission to the United Nations in New York in international narcotics control, the compliance and regulatory aspects of drug abuse, and the status of the Nation's efforts to interdict narcotics at the border with Mexico.

With regard to the U.S. Coast Guard's efforts to interdict illicit drugs on the high seas, its authority is broadly governed by title 14, section 2, of the United States Code, authorizing the Coast Guard to "enforce or assist in the enforcement of all applicable Federal laws on and under the high seas and waters subject to the jurisdiction of the United States." Section 89 of that same title permits the Coast Guard to make "inquiries, inspections, searches, seizures, and arrests upon the high seas and waters over which the United States has jurisdiction for the prevention, detection, and suppression of violations" of Federal laws. However, this broad authority (and certain drug-related statutes) does not prohibit a U.S. citizen from possessing heroin, cocaine, marihuana, and other federally controlled drugs while on board a U.S. or foreign vessel on the high seas.

During the select committee's hearings in New York on international narcotics control, Rear Adm. Norman C. Venzke, Chief of the Office of Operations and director of the enforcement of laws and treaties program of the U.S. Coast Guard, stated:

> The general revision of drug laws which produced the Comprehensive Drug Abuse and Control Act of 1970 omitted the provision making the possession of quantities of drugs by United States vessels on the high seas a Federal crime. Consequently, Coast Guard drug law enforcement action against U.S. vessels at sea beyond the 12-mile customs zone now requires the proof of conspiracy to import before law enforcement action can properly be undertaken.

Mr. Speaker, in an effort to help remove this law enforcement loophole from the Coast Guard's seaborne drug interdicting operations, I am today introducing legislation that would prohibit any person on board a U.S. vessel on the high seas and any U.S. citizen on board a foreign vessel on the high seas from possessing with the intent to distribute or dispense heroin, cocaine, marihuana, or any other federally controlled substance unless such substance is officially part of the cargo or part of the supplies of the vessel. This measure would also prohibit an individual from intentionally possessing a federally controlled drug unless such drug was legally obtained from a physician or pursuant to a valid prescription.

Violation of this measure would subject the convicted violator to an imprisonment of not more than 15 years and a fine of not more than $25,000, or both. A subsequent conviction would subject the violator to imprisonment of not more than 30 years, a fine of not more than $50,000, or both—penalties that are stipulated by the Comprehensive Drug Abuse Prevention and Control Act of 1970.

One major drug smuggling technique used by organized crime and independent narcotics traffickers is the "mother ship" technique popularized during the 1920's and the early 1930's by prohibition rum runners, whereby the "mother ship" remains outside the U.S. customs inspection waters and unloads the contraband cargo to a small, inconspicuous vessel that then mingles among the tens of thousands recreational boats in U.S. waters. The smaller "narcotics running" craft eventually unloads its illicit cargo onto the countless isolated coves scattered throughout this Nation's coastline. From there, these deadly drugs are scattered by organized crime's intricate operational networks to virtually every city, town, and school district in this country, injecting our citizens with its horrendous misery and destruction.

In the interest of assisting the Coast Guard in plugging its drug law enforcement loophole, I am inserting the complete text of my measure at this point in the RECORD and welcome the support of all my colleagues on this legislation that would help disrupt organized crime's efforts to pollute this Nation's shores with illicit drugs.

A bill to facilitate the enforcement by the Coast Guard of laws relating to the importation of heroin, cocaine, marihuana, and other controlled substances, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds and declares that—

(1) the Coast Guard has the authority to enforce the laws of the United States on the high seas and waters over which the United States has jurisdiction; and

(2) the ability of the Coast Guard to enforce the laws of the United States with respect to the importation of controlled substances into the United States would be greatly enhanced by a prohibition against the possession of these substances on the high seas by United States citizens and on vessels of the United States.

SEC. 2. (a) It shall be unlawful for any person on board a vessel of the United States on the high seas, and for any citizen of the United States on board a foreign vessel on the high seas, knowingly or intentionally to possess with intent to distribute or dispense, heroin, cocaine, marihuana, or any other controlled substance, unless such substance is part of the cargo entered in the manifest or part of the official supplies of the vessel.

(b) Any person who violates subsection (a) of this section with respect to any controlled substance shall be sentenced in the same manner as a person would be sentenced for possession with intent to distribute or dispense such substance under subsections (b) and (c) of section 401 of the Comprehensive Drug Abuse Prevention and Control Act of 1970.

SEC. 3. (a) It shall be unlawful for any person on board a vessel of the United States on the high seas, and for any citizen of the United States on board a foreign vessel on the high seas, knowingly or intentionally to possess heroin, cocaine, marihuana, or any other controlled substance, unless such substance was obtained directly, or pursuant to a valid prescription or order, from a practitioner, while acting in the course of his professional practice, or except as otherwise authorized by title II or title III of the Comprehensive Drug Abuse Prevention and Control Act of 1970.

(b) Any person who violates subsection (a) of this section with respect to any controlled substance shall be sentenced in the same manner as a person would be sentenced for possession of such substance under section 404 of the Comprehensive Drug Abuse Prevention and Control Act of 1970.

SEC. 4. As used in this Act—

(1) The term "high seas" means all waters beyond the territorial seas of the United States and beyond any foreign nation's territorial sea, to the extent that such sea is recognized by the United States.

(2) The term "vessel of the United States" means any vessel documented under the laws of the United States or registered under the laws of any State.

(3) The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and any other Commonwealth, territory, or possession of the United States.

(4) The term "vessel" includes every description of watercraft used or capable of being used as a means of transportation on the water.

(5) The term "foreign vessel" includes (A) vessels flying the flag of a nation other than the United States, (B) vessels without nationality, and (C) vessels which may be assimilated to vessels without nationality by sailing under two or more flags, using them according to convenience.

(6) The term "controlled substance" has the same meaning as such term has in section 102(6) of the Comprehensive Drug Abuse Prevention and Control Act of 1970.

NATIONAL SECURITY BY UNILATERAL RESTRAINT

Hon. John E. "Jack" Cunningham

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. CUNNINGHAM. Mr. Speaker, the January 16, 1978, issue of Soviet Aerospace presents a very incisive analysis of this administration's National Security Policy, one which should be given careful consideration by every Member.

The material follows:

NATIONAL SECURITY BY UNILATERAL RESTRAINT

STRATEGIC THREAT BEING DEEMPHASIZED

An analysis

Several months ago, during the confirmation hearings for Paul Warnke, President Carter's choice as chief U.S. SALT negotiator and director of the U.S. Arms Control and Disarmament Agency, those opposed to that appointment warned that Warnke was an advocate of unilateral restraint, if not disarmament, and his policies, if followed out, could seriously threaten the future security of the United States.

In the months since the Warnke opposition was overriden in the Senate by a less than healthy margin, the Carter Administra-

tion has steadfastly demonstrated its adherence to the philosophy of unilateral restraint, practicing it to the unmistakable level of selective disarmament and fulfilling the prophecy of those who have opposed it and warned of its threat to the nation's security.

The Administration, during its first year in office, has demonstrated to the Soviet Union that it is willing to concede, not once, but several times on major crucial issues. The Soviets have watched the Carter leadership completely reverse itself in its determination to limit the continued momentum and very ominous threat of the Soviet military machine to this nation's leadership and the rest of the world.

Moscow has stood resolute and let the United States give away, bargain away or seriously delay vital segments of its presently only durable bargaining chip—the technological advantage.

The American executive leadership has also determined that retaining that technological leadership may at times be too expensive or a threat to the strategic "stability" between it and the Soveit Union.

The Soviet Union worried about the B–1 bomber. To counter it and its predecessors, the Soviets have poured untold billions of rubles into an air defense system of unprecedented proportions. At the very least, Moscow might have been willing to have bargained some of its awesome strategic power for a limitation on the B–1.

Instead, the Carter Administration gave it away. Warnke, naively, commented later that now, maybe, the Soviets would reciprocate and stop one of its new weapons, just as President Brezhnev had been promising for several years.

The Soviets have reciprocated by intensifying their opposition to any restrictions on their strategic missile edge, and specifically demanding and getting their demand that the Backfire bomber be left out of the strategic arsenal with no limitations on its rate of production.

In defense of its posture in the SALT negotiations, the Administration argues that its efforts will put a limit on the Soviet Union's arsenal—the Soviet first-strike weapons, the MIRV warheads and the continued growth of that threat.

SALT II WILL NOT LIMIT SOVIET EDGE

The SALT II agreement that the Administration would approve would do none of that. Built into that agreement is a Soviet capability to broaden its threat to the United States and the world.

Once the United States was content to limit the total number of Soviet ICBMs, and, in SALT I, it was first believed that the Soviets would be restrained in expanding the first-strike capability of their ICBMs by limiting the number of the SS–9 Scarp ICBMs.

Since the signing of that treaty, the Soviets have replaced the SS–9 with the SS–18. The Administration, in SALT II, believes it is at least continuing the first-strike limitation imposed by SALT I by finally conceding to the Soviet demands that 308 of those missiles be allowed.

Beyond the fact that the SS–18 is many times beyond the threat that had been posed by the SS–9 (with 30% more throw weight and eight times more warheads), the Soviet Union violated the SALT I agreement with the development and deployment of the SS–19 ICBM as a replacement of the lightweight SS–11. The SS–19 is even more threatening than the SS–9 to the survivability of the U.S. land-based missile force.

The SALT II agreement would effectively increase the threat to the U.S. Minuteman ICBMs, from the 308 weapons under SALT I, to the 800 or more MIRVed SS–18 and SS–19s allowed under the new agreement.

BALANCING SURVIVAL WITH COSTS

Defense Secretary Harold Brown recently said there is nothing that can be done to prevent the U.S. Minuteman force from being vulnerable to a Soviet first-strike capability in the early-to-mid-1980's. He added that the survivability of the Minuteman force "is not exactly the same as the survival of the United States."

The Administration is conceding that the Soviet Union cannot now be stopped in its drive to develop and deploy a first-strike counterforce capability with its ICBM forces, and that the best thing to do is to accept the inevitability in the SALT II agreement and go on for a SALT III, eight years from now, that perhaps can correct the situation.

Shortly after Secretary Brown took office, one of his first actions was to remove from a full-scale development status the one system that so far shows the only promise of shortening the amount of time that the U.S. land-based missile forces will be exposed to vulnerability, the MX mobile ICBM.

Brown, the researcher, the scientist, and the methodical and meticulous engineer, wanted the basing mode to progress more in parallel with the missile technology before he approved its development as a weapon. The decision exposed the Minuteman forces to the SS–18's and SS–19's for an additional year.

Last month, Brown felt he was ready to ask President Carter, also a meticulous engineer, for the full-scale development of the MX, although Brown confessed he still was not fully satisfied with the basing mode. His position was challenged by a 37-year-old meticulous budget cutter with an argument that swayed Carter to hold off still longer on the attainment of the weapon. It has since been argued that later in the year, if the uncertainties have been answered, the Administration can ask Congress for a supplemental and move out with the MX.

All of this has cost the MX program still another year—another year of exposure for the Minuteman ICBM force, another year with the U.S. Triad reduced to a Duad. We remember that Brown said that the survivability of the Minuteman force "is not exactly the same as the survival of the United States."

We cannot fully agree. One of the major arguments against the MX within the Administration, from the National Security Council to the Office of Management and Budget, is that the go-ahead for the MX, with its counter-counterforce capabilities, would be destabilizing to the strategic balance—i.e., it is all right for the Soviet Union to have that capability, or threat to the United States, but not for the United States to possess it against the Soviet Union.

Therefore, a policy that would argue that the survivability of the Minuteman force is not as important as not doing something to make the Soviet Union more edgy because its actions are being counteracted, is, indeed, exactly the same as a threat to the survival of the United States.

It is a policy that would stingily let the preoccupation with debates over how much we should pay to insure the security of the United States depress the national defense budget down to a level where economists say it will have a difficult time overcoming inflation. Further, Congress can be expected to make additional reductions. This, at a time when the Soviet defense budget far outstrips that of the United States and continues to show a high, marked increase each year.

BROWN VERSUS POLITICAL REALITIES

Brown, the mathematician, sees and understands these diverging lines in defense spending and privately expresses concern for the eventual outcome of the trend of those curves.

But, also the shy but forceful administrator of the nation's defense establishment respects the role the President plays in the final decision, willing to concede his position to the President's wishes. Brown says one must know how to deal with political realities.

Never has the United States needed the strongest defense executive. They refer to Brown as the "nimble juggler," a "shy," "stingy big spender," that "avoids doomsday rhetoric." No one says he is not strong. And, no one is suggesting that he fall on his sword, as James Schlesinger did when trying to convince President Ford to undertake a greater effort to close the gap between the Soviet and U.S. defense efforts.

Undoubtedly the strongest defense advocate in the Carter Administration, Brown has also demonstrated in the past that he is a strong arms control advocate as well. This, perhaps, provides a more calming and relatively objective approach to his arguments for more aggressive national security actions, but it apparently is not effective enough to overcome the saturation of unilateral restraint philosophy that permeates the Administration's national security hierarchy.

It is this view which is the foundation of the studies, such as the Presidential Review Memorandum 10, which forms the basis of a new defense strategy that will be a part of the first Carter Administration defense budget. It is a budget that demonstrates dramatically the principle of unilateral restraint and the deemphasis of the strategic threat and the concern for United States strategic inferiority in the 1980's. The policy makes withdrawals from the strategic arsenal in order to finance the long neglected inferiority of U.S.-NATO conventional forces.

It takes a position which may surely and inevitably allow the Soviet Union to achieve the strategic superiority it is seeking.

It raises the issue of whether the United States will continue to be willing to pay the price that the Soviet military machine, both strategic and conventional, is demanding.

PHILADELPHIA CELEBRATES CATHOLIC SCHOOLS WEEK

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. EILBERG. Mr. Speaker, this week the Archdiocese of Philadelphia marks Catholic Schools Week, a proud celebration of the many outstanding achievements of the Catholic school system in our city.

Throughout the week, Archdiocesan high schools and parish elementary schools will hold open houses, providing visitors with an opportunity to see this fine school system at work.

For many years, Mr. Speaker, Philadelphia has been known as the home of the Catholic school system. Archdiocesan officials consistently have exhibited leadership among their colleagues on the national level in demonstrating the strength and vitality of Catholic schools.

As the observance of Catholic Schools Week unfolds, officials can point with pride to the fact that more than 174,000 students attend 30 high schools and 266 parish elementary schools—making this system second to only Philadelphia's public school district as the largest school system in the Commonwealth of Pennsylvania.

This system operates, it should be pointed out, at a savings to the State's taxpayers of more than $300 million a year.

I offer for the RECORD the following January 25, 1978 Northeast Times account of Catholic Schools Week. I commend this report to the attention of my colleagues, because it describes the impressive accomplishments of the Archdiocese school system, and the many services it makes available to meet the wide needs of its students:

CATHOLIC SCHOOLS WEEK OBSERVANCE BEGINS SUNDAY

Did you know that with the exception of the Public School District of Philadelphia, the Archdiocese of Philadelphia educates more children than any other school district in the state? More than 174,000 students attend 30 Archdiocesan high schools and 266 parish elementary schools, at a savings of over $300 million annually for Pennsylvania taxpayers.

Or how about the fact that for the past six years these students, who are educated at approximately one-third the cost of public education, scored significantly above the national average on standardized tests in English, mathematics and reading?

And that more than half of the Archdiocesan high school students who graduated last June enrolled in college, receiving over $7.5 million in scholarships and grants?

The list of achievements by students in the Archdiocese of Philadelphia keeps on growing and that's just the point—in Catholic schools, "Everyone Grows."

"Catholic Schools Week" begins Sunday, Jan. 29. During the following seven days, Archdiocesan high schools and parish elementary schools in your area will hold open house and will provide visitors with information on what the children are learning throughout the year.

And the children are learning, not just the basics for which parochial schools are noted, but a variety of supplementary subjects such as how to use calculators, or plan for marriage or take part in a career awareness program.

For students with special needs, the Archdiocese of Philadelphia has one of the most forward looking educational programs in the country. In 1967, the Archdiocese opened an elementary school specifically designed for very intelligent inner-city youngsters, children who often drop out of school despite their mental abilities. Now in its tenth year, Our Lady of Mercy Interparochial School reports that while all of its graduates completed high school and over 80% went on to college, a study has shown that more than 30% of children with similar backgrounds and abilities who enrolled in other schools failed even to finish high school.

To help Hispanic children with linguistic handicaps, the Archdiocese started a bilingual Carino Center in 1972. Students attend school there for at least a year to learn correct English usage while studying their other subjects in Spanish, thereby making it much easier for them to keep up with all their school work while learning English.

For blind, deaf and mentally handicapped children, the Archdiocese of Philadelphia also operates schools using the most sophisticated equipment and highly qualified special education teachers. St. Lucy's School for the Blind, the Archbishop Ryan Institute for the Deaf, and St. Katherine's and Our Lady of Confidence Day Schools are open to Catholic and non-Catholic students alike, tuition free. Financial assistance is supplied through the Catholic Charities Appeal.

"Catholic Schools: Everyone Grows" is the motto for "Catholic Schools Week," 1978. Visit a nearby parish elementary or Archdiocesan high school this coming week and witness this growth in action.

CHAPPIE JAMES: THE EPITOME OF THE AMERICAN DREAM

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. KEMP. Mr. Speaker, it is appropriate that we in the Congress pay honor to an outstanding hero, military leader and, in every sense of the term, a rare and truly great American.

I refer to Gen. Daniel "Chappie" James, Jr., who retired from active military duty last week after 34 years of service to his beloved country.

To the American public, Chappie is widely known as the first black man to earn four stars in the Air Force and to achieve that full general status in the U.S. Military and Establishment. Beyond this signal and much deserved achievement, he is an inspiration in our time and to future generations. And I am extremely proud to call him a friend.

In terms of material riches, he grew up poor on an unpaved, unlit street in Pensacola, Fla., where, as a boy, he glimpsed the blue and white Navy aircraft wheeling in the sky and he dreamed of the future when he might be at the controls of a plane soaring through the clouds.

In terms of family environment and love and guidance from his mother and father, he was immensely rich.

When his mother perceived that Chappie and her other children were not receiving quality education at the segregated "colored" school, she started her own school for them, then other neighborhood children. Like Chappie, his mother, Lillie, was an outstanding and courageous leader.

Chappie's father, who worked in the local gas plant, was a task master, instilling a discipline that Chappie, himself, would find invaluable in dealing with his troops in both war and peace.

To this day, Gen. Chappie James echoes to young black people his mother's admonition, to "be prepared with your bags of knowledge, your patriotism and your honor."

"When somebody opens the door of opportunity," he challenges, "you charge in."

And the most important lesson, Chappie learned from his mother, was to live life by the 11th commandment: "thou shalt not quit."

Chappie never did quit. Not in the face of racism when he was a young Army Air Corps shavetail. Not in the face of flak or Migs in Korea where he flew 101 combat missions in a fighter-bomber squadron. Not as he worked to keep pilots and crews at operational readiness between conflicts. Nor during his combat tour in Vietnam when he flew 78 combat missions.

During that conflict, it was Chappie James who led a flight in which seven Communist Mig 21's were destroyed, the highest total kill of any mission during the Vietnam war.

His military decorations and awards include the Department of Defense Distinguished Service Medal (the highest noncombat award which can be presented to a member of the Armed Forces), the Air Force Distinguished Service Medal with 1 oak leaf cluster, Legion of Merit with 1 oak leaf cluster, Distinguished Flying Cross with 2 oak leaf clusters, Meritorious Service Medal, Air Medal with 13 oak leaf clusters, Distinguished Unit Citation Emblem with 1 oak leaf cluster, Presidential Unit Citation Emblem with 3 oak leaf clusters, Air Force Outstanding Unit Award Ribbon with 3 oak leaf clusters, and the Republic of Korea Presidential Unit Citation Ribbon.

Some of General James' many civilian honors include the Phoenix Urban League Man of the Year Award, 1970; Builders of a Greater Arizona Award, 1969; distinguished service achievement award from Kappa Alpha Psi Fraternity, 1970; American Legion National Commander's Public Relations Award, 1971, and the Veterans of Foreign Wars Commander in Chief's Gold Medal Award and Citation, 1971. He has been awarded honorary doctor of laws degrees from the University of West Florida, 1971; the University of Akron, 1973; Virginia State College, 1974; and Delaware State College, 1975; and was named Honorary National Commander, Arnold Air Society, 1971.

In successive years, 1967 and 1968, he was awarded the prestigious George Washington Freedom Foundation Medal. And it was in 1970 that Chappie was honored with the Arnold Air Society Eugene M. Zuckert Award for outstanding contributions to Air Force professionalism. In part, that citation read "the fighter pilot with a magnificent record, public speaker and eloquent spokesman for the American dream we so rarely achieve."

Mr. Speaker, Gen. Chappie James is not just an eloquent spokesman of the American dream. He epitomizes it. He is a beacon for emulation now and for generations yet to come.

Upon the occasion of his retirement, we thank him for his devotion and numerous contributions to our country, for his steadfast courage and his heroic deeds.

Chappie, we wish you and your dear family Godspeed.

TRIBUTE TO FATHER FELIX

HON. RAYMOND F. LEDERER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. LEDERER. Mr. Speaker, I would like to pause in the business of the House to share with my colleagues the outstanding work of an ex-magician turned reverend, Father Felix. This man has brought to his new calling a little bit of that magic from his old profession. Father Felix is believed to be able to

move mountains by many of his neighbors in the city of Philadelphia.

Father Felix returned to his native Philadelphia after years of work among the poor in California and Mexico. Prior to this work, Father Felix served as president of the Bucks County Association for Retarded Citizens, unselfishly serving the persons who depended on this organization for care and encouragement.

His church at 2055 E. Dauphin Street in Philadelphia is more of a community center for neighbors in the Kensington area than it is a church. Inside Father Felix has ping-pong tables, arts and craft materials and other things to keep the children of the neighborhood busy. Father Felix has also made available to the needy of the neighborhood a clothing and furniture exchange in his church.

However, these activities represent only a small portion of the father's commitment to the people of the city of Philadelphia and the people of Pennsylvania.

Susan Clardy, 12 years of age, is a neighbor of Father Felix. She is a victim of retinitis pigmentosa, a hereditary disease which is destined to eat away the retina of her eyes until she is completely blind. Father Felix learned from Susan that she would like to meet the President and see Washington before she went completely blind. The good father energetically went about making this dream a reality. He arranged for George Pins to donate his Presidential train to Susie's family and friends for the trip. A special tour of the White House was also arranged through Father Felix's hard work, although Susan did not see the President. Through the father's tireless efforts, Susan Clardy was given a day she can cherish in what will be a sightless life.

Father Felix's compassion does not stop at the county line. When he learned of the tragic flooding that took place in Johnstown he organized a drive in the Lower Kensington area of Philadelphia for clothing, food, cleaning, and paper supplies for the victims of the flood. He made three trips to the flood ravaged area to help the victims clean up, regroup, and start a new beginning.

Father Felix cares about people. He has always found the time to help his neighbors or indeed anyone in need. Because of this, many citizens of the world are better for it.

A WORD PORTRAIT OF THE FRATERNAL ORDER OF EAGLES

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I would hope that every Member in the House would join with me in saluting the Fraternal Order of Eagles on its 80th birthday, celebrated on Monday, February 6, 1978.

This milestone represents eight decades of Eagle fellowship, fraternal spirit, and good works dedicated to the communities in which the more than 825,000 Eagles live.

The civic activities of the Eagles are built around their credo, "To make human life more desirable by lessening its ills and promoting peace, prosperity, gladness, and hope," annunciated by their first President, John Cort, in 1898.

The Eagles number among their more celebrated brothers President Jimmy Carter and Vice President WALTER MONDALE and former Presidents John F. Kennedy, Harry Truman and Franklin Delano Roosevelt, J. Edgar Hoover, Earl Warren, Father Flanagan of Boys Town, and my late, beloved friend and mentor, David L. Lawrence, former mayor of Pittsburgh and Governor of Pennsylvania, were Eagles.

One of the hardest working Eagles is a close and good friend of mine, Maurice Splain, Jr., of Pittsburgh, Eagle membership director.

In commemoration of the Eagle's 80th anniversary, I would like to include in the RECORD at this time a word portrait of the Eagles, prepared by Maury's son, Dan Splain.

In doing so, let me reiterate my best wishes to all Eagles and affirm my continued support for their good works.

A WORD PORTRAIT OF THE FRATERNAL ORDER OF EAGLES

(By Dan Splain)

Nine days before the explosion of the battleship Maine in Havana Harbor touched off the Spanish-American War, six lonely vaudeville troupers strolled to Moran's Shipyard on the tideflats of Seattle to form the Order of Good Things on February 6, 1898. The purpose of the organization, as its first President, John Cort later related was "to make human life more desirable by lessening its ills and promote peace, prosperity, gladness, and hope."

In February, 1978, in a new wonder age of atoms, missiles and moon walks, the far flung Organization that sprouted from the Seattle seedling—the Fraternal Order of Eagles—celebrates today the 80th anniversary of its founding, changelessly devoted to the same ideals proclaimed by its founders. Today, the Order embraces over 1700 Aeries in the Continental United States, Alaska, Hawaii, the Philippines, the Dominion of Canada, the Republic of Mexico, and England.

Possibly not in their fondest predictions did the pioneers of the Fraternity envision such tremendous growth. But the universal hunger for friendship and brotherhood struck a responsive chord as the theatrical men played in other cities throughout the nation. New Aeries were formed rapidly in the Pacific Northwest. Cort was elected the first Grand Worthy President of the Order.

The Order was, and remains to this day, the Fraternity of the Common Man. From mill, mine, and factory mainly, from the professions, and from public life, from America's melting pot, the Eagles derived their strength, a typical cross-section of the Nation. Several years ago, Collier's Magazine, in preparing an article about the Eagles sent their writer to the local Aerie in Cedar Rapids, Iowa. He asked a spokesman to define the Eagles. He struck this response: "You want to know who the Eagles are—I'll tell you. We're the crowd everybody gets lost in."

However, not all Eagles are "lost in the crowd." Six Presidents of the United States have been Eagles: Theodore Roosevelt, Warren G. Harding, Franklin Delano Roosevelt, Harry Truman, John F. Kennedy, and the incumbent President Jimmy Carter and Vice President Walter Mondale. Former Chief Justice of the Supreme Court, Earl Warren is a brother Eagle. Monsignor Flanagan of Boys Town was a Past President of the Omaha Aerie of the Eagles. So was Father Elwood Cassedy, founder of Home on the Range for Boys; as is his successor, Father William Fahnlander. Former Governor Lawrence of Pennsylvania helped found the Pennsylvania State Aerie in 1912, along with Congressman John Morin, who himself served the Order as Grand Worthy President. World War II and Korean air ace, Francis Gabreski (Col. Ret. USAF) is a life member of Oil City Aerie No. 283. J. Edgar Hoover, the late FBI Chief, was a brother, too. The list is infinite. Eagles are people, famous and obscure, mighty and humble, great and small.

Among those who have stood out from the crowd are the career Eagles themselves. There was Con Mann, the hearty Dutchman from Milwaukee, who piloted the Fraternity to a position of national prominence in the early part of this century. Then there was Frank Hering, silver haired orator from Notre Dame University, who made the first known plea for the observance of Mother's Day, and later served the Eagle Magazine as its editor for many years. Among contemporary leaders are Wisconsin Supreme Court Justice Robert W. Hansen, who served the Order twice as its International President; Anthony Angelo, present International President, who travels the crossroads of the Nation garnering support for Eagle Programs, and Maurice Splain, Jr., Grand Aerie Membership Department leader who cares for the membership growth of the Fighting Fraternity.

In the three decades from 1910 to 1940, the burgeoning Order acquired a new title, "the Fighting Fraternity." In those years, the Eagles were in the vanguard of social legislative progress, moving courageously, fighting for changes to insure a more secure life for the people of America. In 1911, in Missouri, led by an Eagle Jurist, Edward Everett Porterfield, the Order sponsored the first Mothers' Pension Act. A year later, in Wisconsin, Eagles rallied 'round a young Eagle and labor lawyer, Daniel Webster Hoan, later Mayor of Milwaukee, to enact the first Women's Compensation Act. A few years later, the Eagles began to demand elimination of a national scourge—the poorhouse. The Rubicon was crossed in 1923 when the Montana legislature passed the first Old Age Pension Law of the nation, sponsored by prominent Eagle legislator, Lester Loble, who later became the Order's Grand Worthy President. The Order successfully campaigned for similar laws in the majority of the states. On the national front, the Eagles launched an historic campaign for a national Social Security Act, and spent more than a million dollars for printed materials to publicize and popularize the measure. In signing the Act, President Roosevelt invited an Eagle delegation to the White House and presented them with one of three pens used to sign the Act into law. In so doing, Roosevelt stated, "The pen I am presenting to the Order, one used to sign the Social Security Act, is a symbol of my approval of the Fraternity's vision and courage."

High in the achievements of the Order is the national Mother's Day observance. Back in 1904, in February, Frank Hering, a Notre Dame professor and football coach, gave the first public plea for a Mother's Day observance at an Indianapolis Aerie meeting. Inspired by Hering's address, Eagle Aeries began sponsoring Mother's Day programs annually long before Congress set aside the second Sunday in May as a day reserved for the yearly tribute.

The Eagle story reserves a prominent chapter for the youth of America. With youth programs, junior sports, teen-age dances, youth centers sponsored by hundreds of Aeries, the building of the citizens of tomor-

row is an ever paramount project of the Order. The crowning effort in this field came in April, 1941, when the Fraternity dedicated the Eagle Dormitory at Father Flanagan's Boys Town in Nebraska.

Then World War II arrived, the Eagles conceived their famed Memorial Foundation, a trust fund created by donations of Aeries and their Auxiliaries, to provide physical welfare services and college education for the children of the Eagle war dead. This foundation was later expanded to include survivors of Korean and Vietnam War dead, and Eagle police and firemen killed in the line of duty.

While significant national campaigns have always characterized Eagle activity, the "grass roots" strength lies in the local Aeries and Auxiliaries. Their civic and benevolent contributions have been generous and frequent. Blood banks to save lives, an iron lung purchased for a young polio victim, Aerie quarters provide for a teen-age center, a Christmas Party for the under-privileged kids in the community, funds for a city youth playground, donations to the Red Cross, the Community Chest, and other community services and programs is but a part of the magnificent benevolence of the Fraternal Order of Eagles. No accurate accounting of the total spent by local Aeries and Auxiliaries for charitable purposes has ever been kept, but no doubt, over the years, it would run into staggering millions, and in terms of human happiness and betterment, the amount is above the monetary realm and measured only in terms of the human heart.

In the 1950's, the Eagles set their sights on new goals to "make human life more desirable." During that decade, the Eagles raised over one million dollars for the Damon Runyon Cancer Fund, prompting the fund's founder, Walter Winchell, to write in his nationally syndicated column that the Eagles are "the Santa Claus of the Damon Runyon Cancer Fund." The Eagles donation of $25,000 for the entrance to the Chapel of the Four Chaplains at Philadelphia, memorializing the four chaplains of three faiths who gave their lives in World War II aboard the U.S.S. Dorchester, bespeaks the Order's zeal for brotherhood and interfaith unity. Distribution of thousands of scrolls of Ten Commandents to schools and courts, and presentation of the Ten Commandment granite monoliths to many American cities, stresses the Eagles' concern for moral and spiritual values.

Late in 1959, the Organization began construction of a retirement home for senior citizens who are Eagle members. The home, in Bradenton, Florida, today boasts 75 units, a library, a lake well stocked for fishing and a large recreational hall. The Eagle Village, as the retirement facility is called, is self-governed by a Mayor and Council elected by the residents.

In cooperation with CARE, the international relief organization, the Eagles have constructed over 25 Eagles-Care Houses throughout the world.

In the decade just past, the Eagles founded the Max Baer Heart Fund, named after the late Eagle Heavyweight Champ, which has donated over $4,000,000 for heart research in the ten years of its existence. The Eagles have now founded the Eagles Cancer Fund which has raised over $4,000,000 supplementing the amount contributed to the Damon Runyon Cancer Fund. Just ten years ago, the Eagles founded the Jimmy Durante Children's Fund to contribute funds for research into the catastrophic diseases of childhood. Durante, for whom the fund is named, has long been an active supporter of Eagle programs.

Five years ago, the Organization initiated the "Golden Eagle Program", a three pronged attack on the problems of our aging citizens. The goal of the program is to add years to life and life to the years of the world's senior citizens in three ways: 1) by sponsoring and supporting legislation that will permit our aged to live in dignity and self-respect; 2) by establishing within 3200 local Eagle units, Retired Eagles Activities clubs (REAC) to permit older Eagles and their families to participate in programs of their choosing and to offer their aid and counsel to younger Eagles leaders in the management of their club facilities; and 3) the establishment of the Golden Eagle Fund, to raise and distribute funds for gerontological research.

The Eagles are also responsible for legislation protecting the over 40 worker from job discrimination because of his age.

The latest Eagle programs are "Hometown, U.S.A."—a campaign to make our hometown of America just a little better for you and me, and the "Home and Family Program" designed to strengthen the home and family as the basic unit in our society.

The Fraternal Order of Eagles, with virility and vision, is just beginning to flex its muscles with over 3200 Aeries and Auxiliaries continuing the work started by six men on a Seattle waterfront 80 years ago.

PANAMA CANAL TREATIES: "DEAD-END," "NO-WIN" DIPLOMACY

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. DORNAN. Mr. Speaker, in my remarks in the CONGRESSIONAL RECORD of January 19, 1978, page 186, I quoted a statement on the Panama Canal from the November–December 1977 issue of the American Legion's National Security-Foreign Relations Bulletin and the American Legion's National Convention 1977 resolution on that subject.

One of the best summaries of the various aspects involved in the Panama Canal treaty question is a recent paper by Hanson W. Baldwin, noted military analyst and authority on geopolitics, recently distributed by the Institute of American Relations in Washington, D.C.

For reasons I consider valid, Mr. Baldwin criticizes the pending Panama Canal treaties as the product of a "dead-end, no-win diplomacy" and calls for their "outright" rejection.

Mr. Speaker, as the indicated article by Mr. Baldwin should be read by every Member of the Congress and should be available to the Nation as a whole, I quote it as part of my remarks:

THE PANAMA CANAL TREATIES: ARE THEY SALVAGEABLE?

(By Hanson W. Baldwin)

The treaty, as presented to the Senate, is unsalvageable. The later declaration of intent, or the joint interpretation of what this ambiguous document means—as issued by President Carter and General Torrijos—has no legal validity and, in any case, does not eliminate the basic defects that make this treaty a threat to the vital interests of the United States.

These basic defects—the transfer of sovereignty that has always been ours to Panama; the requirement for an interim management period when the United States would be saddled with the costs and the responsibility of operating a world's key strategic and commercial waterway, but without comparable authority; the transfer of billions of dollars of U.S. taxpayers' moneys and property to an unstable, left-wing dictatorship, and a hobbling promise that binds the U.S. to build no other Isthmian Canal—cannot possibly be remedied by amendments.

OUGHT TO BE REJECTED OUTRIGHT

This treaty ought to be rejected outright—most of all because it presents a potential threat to the vital interests and future security of the United States. If ratified it will dangerously impair the capability of the United States to control the vital "back door" to the Southern tier and the Gulf Coast—the Caribbean-Gulf of Mexico area.

The Canal Zone, as a link between two oceans for our one-ocean Navy; as a sea passageway of tremendous importance to the U.S. economic future, and above all, as a dominating strategic position in an area of vital importance to the security of the United States should never be transferred to any foreign, or international, flag. Redundantly, the character of the present Panamanian government—a government riddled by communism and extremist influences and tainted with corruption and absolutism—indeed, the character of any government that may assume power in the volatile country of Panama—precludes any possibility that the interests of the United States would be protected by this treaty.

The treaty, moreover, is couched in the vaguest possible terms—which can mean all things to all men insofar as U.S. interests are concerned, but is specific, and exorbitantly expensive to the U.S. citizen, when the benefits to Panama are mentioned. It is perhaps the most one-sided treaty ever negotiated and, indeed, merits the description of "give-away", or "taxpayer rip-off". Its terms are certain, moreover, to engender friction and difficulties. In place of straight-line executive control is substitued until the year 2000 a system of mixed U.S.-Panamanian committees, with the U.S. required to manage and operate, but with the Panamanians in ultimate authority. Until 2000 the U.S. promises to foreswear playing what should have been our trump card in dealing with Panama—the possibility of constructing another Isthmian Canal. After 2000 when the U.S. leaves, lock, stock and barrel, neither the treaties, nor the later joint interpretation of what they mean can possibly provide either security for the Canal, or in time of crisis, priority for the transit of U.S. warships. Panama has specifically stated that the Carter-Torrijos declaration prohibits "intervention" in Panama, yet without U.S. sovereignty, U.S. bases and a U.S. military presence how can the security of the Canal, or priority for U.S. ships possibly be insured against future hostile elements in Panama or outside it without U.S. intervention?

TORRIJOS DECLARATION

Indeed, the Torrijos declarations and the Torrijos promises should be viewed for what they are—empty words upon the wind. They have no legal force. Torrijos, a dictator, would of course, promise anything to retain his job, and his position is in danger, indeed, if the treaty is rejected. His smooth talk to visiting U.S. Senators represents more of the Panamanian propaganda—which, spread by treaty proponents in this country—has helped to bring us to our present dilemma. Torrijos is by no means the only obstacle to this treaty; he is merely the present front-man, the figurehead, the facade, for a government that is riddled, at the top level with avowed or concealed communists, open enemies of the United States and other left-wing radicals. Lasting relationships cannot, in my opinion, be based upon promises by such as these.

The treaties as presented are a diplomatic mish-mash—perhaps the worst product of diplomacy's alleged art of compromise that has ever been produced. I agree entirely with the proponents of the treaty that the American people need far more understanding of the document's terms. With all due respect I doubt very much that most of the members of this Congress have read the entire text,

together with all the scores of pages of annexes and supporting executive orders, I urge those who have not done so to leave no comma unturned, to review every word before voting.

There are many interpretations or provisions in the treaty, or its supporting documents, which are cause for serious concern. Under the terms of these agreements we will be bound, for instance, to turn over to Panama any U.S. national in the Isthmus who traffics in drugs, whether he be soldier or civilian. We bind ourselves to abstain from emplacing any nuclear weapons in "Panamanian soil" (which means the Canal Zone, since the treaty transfers sovereignty to Panama). In view of the recent action by Egyptian authorities in barring the passage through the Suez Canal of a British nuclear-powered submarine, could this provision be interpreted in the Spanish text by Torrijos or some future dictator, to bar the Panama Canal to the transit of U.S. nuclear submarines—which are now perhaps the most important vessels in our fleet? And finally, the provisions for transferring billions of dollars of U.S. property to Panama probably ought to have, in view of many constitutional authorities, the approval of the House as well as the Senate.

By all means publicize this Treaty. It represents an incredible accomplishment of double-talk.

NO-WIN TREATY

I say this—not so much in criticism of the U.S. negotiators—as in criticism of the policy constraints that have bound them, blindly and mistakenly, over the past 15 years. Both parties, and now four Presidential administrations, have followed a course of no-return—a continuation of the "No-Win" policies of Vietnam.

This treaty is a "No-Win" treaty; regardless of whether it is approved or rejected, it spells trouble. This is the real tragedy.

It is, I think, of high importance to recognize this before we examine what consequences may flow from either the ratification or the rejection of this treaty.

We are in a damned-if-we-do and damned-if-we-don't position, and the fact that this is so—after Vietnam and Angola and all the lessons of the recent past—should be, it seems to me, of great and troubling significance to the Congress of the United States. I am not one who believes that the nation's foreign affairs can be run by committees of Congress and I do believe the executive in power must enjoy very considerable freedom of action. The negotiation of treaties is an executive function. But a Congress—and particularly the Senate—must be a partner in the establishment of basic policies, or guidelines. And the people must support those polices, or we are in trouble.

LITTLE CONGRESSIONAL CONSULTATION

In the case of this treaty there has been, until recently, too little consultation with Congressional leaders, and a course of action has been persistently and stubbornly followed—i.e. surrender of U.S. sovereignty over the Canal—which has been vigorously opposed since its inception by a large bloc of Congressional opinion, and—if the polls are to be believed—by a majority of the American people. Even more important and more dangerous the policies followed by four administrations have led us into a diplomatic cul-de-sac. In short, we now face trouble, no matter what we do. This is the bankruptcy of both policy and diplomacy; firmness and a long view of the future could have avoided—years ago—the unpleasant choice of the rock or the hard place. In looking at the past and the fatuous "No-Win" course we have followed since 1964 there is one vital lesson to be learned; basic policies must be formed by team effort; the Congress of the United States, acting in behalf of the people of the United States, is ultimately the arbiter; the President can propose; the Congress must dispose.

WHAT WILL HAPPEN?

Let us look at the future and what is likely to happen next.

If this treaty is rejected, there will be trouble—sooner rather than later; if this treaty is ratified, there will be trouble—later rather than immediately.

Ever since 1964 four administrations have encouraged and indeed incited the rising expectations of the Panamanian people. We have supported the demagogues of the Isthmus, in their blackmail "diplomacy" of violence. We have created the nightmare from which we now shrink.

Panama has always been unstable politically. One of the oldest ploys in its volatile history has been the manipulation of street mobs by the ruling group to demonstrate against Uncle Sam. Since Torrijos came to power the spectre of rioting and of armed attacks against the Zone—indeed of wholesale bloodshed—has been repeatedly invoked (often by Torrijos himself) as a scare tactic in the belief—perhaps valid, hopefully invalid—that the United States is in no mood today to fight for anything. But this incitement to violence can be a two-edged sword, if the anticipations of the Panamanian people—aroused by demagogic machismo rhetoric and by weak-kneed U.S. policies—are not realized. In other words, if you reject this treaty, there will undoubtedly be violence in Panama quickly.

To anticipate the form such violence might take, one must glance at past history, rather than take at face value the threats of "death to the gringo" so freely expressed by the present Panamanian regime. Riots, stone-throwing, window-breaking, flag-burning, and some damage and looting, there have been plenty in Panama, but the only serious and sanguinary disturbances—insofar as the United States has been concerned—were in 1964, when rioting mobs attacked the Canal Zone and twenty-three Panamanians and four U.S. soldiers were killed.

It is significant that these riots were tacitly encouraged by Panamanian leadership, and were led—according to both Ambassador Ellsworth Bunker and Joseph A. Califano, Jr., by Panamanian, Castro Cuban and other breeds of communists. Most important, the Panamanian National Guard, the only paramilitary force in Panama, and—as long as it is unified, the ultimate and dominant political force—initially took no steps to stop the rioters. Indeed, some individual Guardsmen—allegedly acting on their own responsibility—took part in the riots, used their weapons against American troops and engaged in sniping against Zonian targets. As soon as the Guard intervened—which was quite soon after the Panamanian government realized the United States meant business—the riots stopped.

But their consequences go on. The ghosts of the dead of 1964 are invoked today to help force us out of the Canal

DEAD-END DIPLOMACY

It is not only possible, but extremely probable, that if the Senate rejects this treaty, the street mobs will form again—in sizeable numbers, an will be encouraged, indeed, led by the Panamanian Government and National Guard. We can be sure that such a mob will once again be incited by communists, both Panamanian-home-grown and Cuban and Russian provocateurs. Such riots could have serious results in terms of property loss and bloodshed on both sides, and would inevitably result in a very tense atmosphere in Panama and in extremely strained relations. Of course, no accurate preview of what might happen is possible, but it seems clear to me that, at a minimum, the bloody toll of 1964 might again be repeated—the penalty of our dead-end "diplomacy." The resultant deaths indeed might exceed the 27 killed fourteen years ago. In Panama itself the position of Torrijos would certainly be badly shaken, and a kind of street civil war might result, with leftists and moderates vying for power.

Following an initial explosion of violence less predictable consequences might ensue. whether or not a policy of long-term violence would follow would depend, to a great extent, upon the character of the government that might come to power in Panama; that the present government would ultimately be overthrown seems certain. In any case, the possibilities are several. A program of terrorism and sabotage, supported by Castro Cuba and other leftist regimes would require considerable strengthening of U.S. security procedures around the Canal and might turn the Zone, for a time, into an armed camp. Nothing is invulnerable, of course, and modern explosives and weapons make sabotage a more feasible option against the Canal than it was in World War II. Nevertheless, large-scale sabotage of the Canal—of a sufficient seriousness to close, or block it—would be, on the part of Panama, which depends upon it for its principal livelihood—an illogical act, and it would not be an easy one. The vital and vulnerable targets are limited in number and they could be well guarded. More likely and harder to prevent would be sporadic acts of terrorism against U.S. property in and outside the Zone, and against U.S. citizens. This sort of threat could continue indefinitely.

GUERRILLA WARFARE UNLIKELY

However, the least likely contingency, to my mind, would be the development of long-term guerrilla warfare by Panamanians, supported by a mixed bag of Castro Cubans, international terrorists, Libyan extremists and Russian funds and weapons. I do not believe the bulk of the Panamanian or Latin-American peoples would support such an extreme option—particularly since the burden of sustaining a guerrilla war would fall primarily upon a population which, up till now, has enjoyed far higher living standards (chiefly because of direct and indirect benefits from the Canal and U.S. generosity) than its neighbors. Moreover, a guerrilla war, to be sustained, would have to be nurtured and supplied from outside Panama, which would involve a degree of risk by Cuba or Russia, or both, which probably would be unacceptable to Havana and Moscow.

Despite these caveats, the picture of what might occur—what almost certainly would occur, in one form or another, if this treaty is rejected—is a bleak one.

WHAT WOULD RATIFICATION DO?

But let us look at the other side of the coin; what might the results be if the Treaty is ratified as it stands?

If the treaty is ratified, trouble may be delayed, but it will come no less certainly and eventually with even graver results.

Indeed, the treaty terms provide for "built-in trouble".

Until 2000 the United States will have the responsibility for operating and maintaining the Canal, but without the complete authority which such a responsibility necessitates. The present Canal administration will be replaced by a system of committees with Panamanian representatives as the ultimate arbiters. The payments to Panama which this treaty requires will, according to treaty supporters, be paid out of Canal tolls. But Canal tolls, even if increased substantially, cannot possibly provide the revenues specified; the American taxpayers clearly is the ultimate victim.

In the Canal Zone itself, U.S. nationals employed by the Canal administration or the military will be the chief sufferers. Not only will they be displaced by Panamanians and other nationalities, but during the process they will be deprived—according to treaty terms—of the due processes of U.S. law

(which have hitherto governed them) and will be subject to the capricious and often arbitrary actions of the Panamanian police. Many of these U.S. citizens who comprise the technical, maintenance, piloting and administrative hard-core skills of the Canal administration will not wait for displacement. A preliminary poll—possibly exaggerated—indicates that more than half intend to leave their jobs and the Canal Zone as soon as the uncertain rule of the Panamanian police replaces U.S. law and Canal Zone police forces.

ADMINISTRATIVE PROBLEMS

These facts—the monetary arrangements, the provisions for the turn-over of U.S. property in the Zone and the committee system—clearly mean that a well-functioning executive and administrative system will be replaced for the next quarter century by a badly-oiled, political oversight system, with endless possibilities of disagreement and friction. And one can be sure that each disagreement will be magnified in Panama and, once again, the age-old ploy of the street mobs will be invoked. This is all the more likely since a significant percentage—far more than expected (approximately one-third) of the Panamanian people voted *against* the Treaty during the recent plebescite. The radicals and left-wingers always want more and will never be satisfied until every "gringo" has been expelled. And many of the moderates and right-wingers—restive under the Torrijos dictatorship and the Torrijos economic depression—will seek every political opportunity to oust the general.

In other words, I do not expect the historic political instability in Panama to end; on the contrary, the terms of the treaty, with its endless possibilities for friction, may well exacerbate it.

But even more important will be the major—though gradual—shift in the political complexion of the Isthmus that will accompany the Treaty's ratification. I do not, repeat not, anticipate the glowing gains in our relationships with Panama and the rest of Central and Latin America that the treaty proponents promise. Least of all do I believe that the volatile situation in the Caribbean will be stabilized by ratification. The Canal is not only a great—and to the United States vital—waterway, but it is also, and perhaps even more important, a global focal point, and a political and strategic key to control of the Caribbean, which is, in turn, an area of acute importance to the U.S. Ratification of the treaty will not only greatly weaken—perhaps fatally—our capability of controlling the Caribbean, but it will also encourage the growth of ultra-nationalist and/or left-wing governments in the area.

SOVIET OPPORTUNITIES

Until 2000, the American employees will be replaced by other nationals. Many of them will be Panamanian, but not all. The Soviet-Communist proclivity to take advantage of any political opportunity, to move into a vacuum, and above all to expand its influence in important choke points and strategic areas will be a dominant influence in the new Isthmian politics. Already the Castro connection and the Soviet interest are strong: they are certain to become stronger if the U.S. pulls out.

I would anticipate, therefore, until the next century a period of increasing friction and tensions, marked perhaps by sporadic street riots, some terrorism and intermittent acts of violence, a sharp reduction of the U.S. presence (both civilian and military), and a greatly increased Communist, and particularly Russian, "presence".

During this period the U.S. military forces in the Isthmus will be—according to the treaty—much more circumscribed than they are today; a number of military installations will be turned over almost immediately to Panama, and the jungle training and tactical maneuvers possible on soil under the U.S. flag will be circumscribed or eliminated. But the major effect of the military restrictions, it seems to me, will be upon security; it will be harder and harder for the U.S.—the responsible operating authority of the Canal until 2000—to provide security against sabotage and/or terrorism.

After 2000, when the responsibility of the U.S. for operating and maintaining the Canal ends, it seems to me quite clear that these trends will accelerate. Panama itself cannot provide the technological, engineering and financial requirements; least of all can Panama alone modernize or modify in any major way, the present Canal. They must turn elsewhere for aid. The U.S. may well provide some of this aid, but—given the complexion of politics in Central America and the inducements Cuba and Russia may offer—not, by any means all of it.

THE YEAR 2000

In 2000, the entire U.S. presence—military and civilian—must, if the treaty is approved, be removed from the Isthmus, lock, stock and barrel. This means that the responsibility and authority, not only for operating the Canal, but also for providing free access to all nations and for its security will rest with Panama alone. It is idle to issue tortured "interpretations" of the treaty, in attempts to make it appear that the United States will retain the same rights "as if we were sovereign in the Zone" and that the basic strategic interests of the U.S. will be fully protected. This is simply not so, and the issuances—after the fact—of the Carter-Torrijos "interpretative" statement of meaning changes nothing. Plain English, international law and just common sense demonstrate that the treaty language conveys no rights, whatsoever, of either priority for U.S. warship transits in time of crisis, or intervention to protect the Canal against threatened attack of any kind. Indeed, there was an inherent paradox, a contradiction, in the Carter-Torrijos "interpretation"; whereas the statement indicated the U.S. would have the right to provide such security, Torrijos explicitly added that this did not mean intervention in Panama would be permissible.

This is a nice distinction, indeed; it represents more of the jugging, tight-wire act with words which have distinguished our undistinguished Isthmian diplomacy. With no U.S. troops in the Isthmus, with no U.S. power, with no U.S. presence, how does one provide security? And how does one insure U.S. priority of transit, in time of need; and how can these objectives be accomplished without intervention?

One must immediately recognize that—regardless of treaties, regardless of words—any nation in time of crucial need would do what it must to survive. In other words we could and would—treaty or no treaty—intervene in Panama or elsewhere on the Isthmus, if our vital security was threatened. Without legal sanction we would incur the opprobrium of world opinion. And how much more difficult, how much more costly in U.S. blood and treasure such action—at the eleventh hour—would be, with no bases, no troops, no American presence in the Canal Zone. Such intervention would, in a military sense, pose all the problems of establishing a beachhead on hostile, or potentially hostile, soil. And if we should ever be faced with such an operation—and that is not the remote possibility it may appear—the opposition would include much stronger and better trained forces than the Panama National Guard. By the next century, it seems likely, indeed, that the Soviet-Cuban influences and the Soviet-Cuban presence in Panama will have become strong, and that influence will include troops and arms. One need only recall the ubiquitous Soviet-supported Cuban presence in Africa today, and the past intervention of Castro in Latin American nations.

LOGISTICAL TIME FACTOR

Even more important than the cost of reestablishing U.S. protective power on the Isthmus is the time factor. Swift transit for men-of-war, troop ships and supply vessels in a burgeoning emergency is imperative. But priority of transit cannot possibly be insured without U.S. military power sited in the Isthmus. Our ships cannot simply muscle up to the head of the line and expect to be rushed through the Canal. We are, by this treaty, clearly at the mercy of Panama in the 21st century, and with no U.S. security forces to prevent it Panama can easily block the Canal to prevent passage. Egypt has set the example by blocking the Suez Canal and by exercising the right of selective passage. Panama might well follow suit, if the U.S. threatened intervention or the use of force.

Security and neutrality of the Canal and priority of passage in time of crisis for U.S. ships cannot possibly be even reasonably assured under the terms of this treaty.

In short, this is a mischief-making treaty; it will cause—both short and long-term—more friction than it resolves; it will invite the establishment of communist and third-power forces in the Isthmus and will endanger a focal point of world shipping, and, above all, may fatally weaken the possibility of U.S. control over the Caribbean.

TWO DISASTROUS ALTERNATIVES

The Congress of the United States, therefore, is faced, in consideration of this treaty, with two disastrous alternatives: reject it, and there will be trouble; accept it, and there will be trouble. You face a dead-end dilemma, not of your making. Your only choice, as I see it, is to choose the lesser of two evils.

To me, the choice is clear. I do not want to mortgage the American future; I do not want to leave another political and military powder keg—this one in our own "backyard"—to my grandchildren; I do not want to be an architect of potential disaster.

I urge you to reject this treaty, to shoulder the immediate unpleasant consequences of our own generation's past mistakes, and to retain the responsibility and the burden of a world power.

This does not mean a static position and no treaty whatsoever. Out of the rubble of this diplomatic disaster there can ultimately be fashioned a new treaty, which will provide adequate protection for the vital interests—now and tomorrow—of the United States. To my mind any such treaty must provide for two minimal requirements—retention of sovereignty by the United States over the present Canal Zone, including the Canal, and a veto power by the United States in any Trust, international body, or grouping that might be established to operate, maintain, administer and modernize the Canal. All else is negotiable.

But—and this is perhaps the most important caveat of all—the Senate, through its leaders, must participate in the formulation of basic policy guidelines for any negotiations. The Senate must advise as well as consent. Only by such input—too often lacking in the past—can we avoid in the future, the dead-end, no-win diplomacy which the present treaty exemplifies.

THE 25TH ANNIVERSARY OF PRESIDENT EISENHOWER'S INAUGURATION

HON. ELFORD A. CEDERBERG

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, January 25, 1978

Mr. CEDERBERG. Mr. Speaker, it is indeed with the greatest pleasure that I

join my colleagues in commemorating the 25th anniversary of President Eisenhower's inauguration. It marked an important time in our Nation's history and the beginning of a distinguished political career for one of America's greatest war heroes.

Although we were at the time involved in the Korean war, it was quickly brought to an end. Under Eisenhower's leadership, we then moved quickly ahead in our transition to a peacetime economy. Although President Eisenhower had been our greatest general in the war, he was also a man who strived for peace. In spite of the "cold war" confrontation during the fifties, he never gave up hope that a permanent peace could be achieved.

However, he never let this overriding desire for peace comprise the integrity of America's defense. The United States had come out of World War II the strongest nation in the world and President Eisenhower did not allow this position of power to be diminished or eroded.

He had a prophetic understanding of America's role at the time and he realized the importance of his actions to the subsequent history of the world. The fifties were years of rebuilding for much of the rest of the world and we were there to lend a hand. Former enemies became strong allies in the effort to thwart the Communist threat. Under the Eisenhower administration we entered into numerous alliances that were to form the cornerstone of defense for the free world. Moreover, these pacts would lay the foundation for friendships and mutuality of interests that would continue into the present.

President Eisenhower's inauguration, however, was a special time for me also. As a first term Congressman, I was embarking on my political career at the same time. Frankly, I was somewhat awed by the prospect not only of serving in the Congress, but also of working under the administration of President Eisenhower. It was a time of great promise and hope.

Of course, the times were especially happy for the Republicans. President Eisenhower. It was a time of great promsonal appeal had swept Republican majorities into both Houses of Congress. Although the political tides would change in the future, there was a special comradarie that will never be exactly duplicated again. Many of my colleagues who came into the Congress at the same time still remain some of my closest friends.

Even President Eisenhower's campaign had generated strong national interest. The words "I like Ike" had been on everyone's lips. He was a respected man and a revered leader. He had brought America through some of the worst times in the world's history and he was to lead her into some of the most prosperous times that she has ever experienced.

The Eisenhower years were to be years of general contentment. The memories of war and depression were put aside as Americans looked optimistically to the future. President Eisenhower, as a benevolent and trusted leader, provided inspiration and hope to everyone.

Indeed, we have much for which to thank President Eisenhower. And it is only fitting that we once again remind Americans of his achievements and give a special tribute to this great man.

SHCHARANSKY IS 30 AND STILL IN JAIL

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. EILBERG. Mr. Speaker, for the past 9 months one of the leading Jewish activists in the Soviet Union, Anatoly Shcharansky, has been imprisoned on charges of unspecified crimes against the state.

Just recently, he marked his 30th birthday. For me, the fact that he reached this age while in jail has a special meaning. It was less than 3 years ago that I met Anatoly in Moscow when I traveled to the U.S.S.R. as chairman of the House Judiciary Subcommittee on Immigration, Citizenship, and International Law. Anatoly served as a translator for me when I met other activists during that trip, and I remember being tremendously impressed by his courage then in defying Soviet authorities to meet with me.

Since then, I have met his wife, Natalia, who for more than 4 years has campaigned on her husband's behalf since being forced to leave him behind in the Soviet Union.

Mr. Speaker, I offer for the RECORD the following editorial comment from the Philadelphia Inquirer of January 26, 1978 on Mr. Shcharansky's struggle. It echoes the deep concern that I have that President Carter continue to press the Soviet Union to live up to the pledges it has made on human rights. I hope that we can make the Soviet Union understand that we seek all possible cooperation between our two countries, and that the granting of justice to Mr. Shchranansky and other Soviet Jewish activists will go a long way toward facilitating that cooperation:

THE SOVIET DISSIDENTS

Anatoly Shcharansky turned 30 years old recently. It was not, however, a time for celebration. He is in a Soviet prison and has been there for the past nine months.

It is not known why he is being detained since he is charged with unspecified crimes against the state by a secret decree of the Supreme Soviet. What is known, however, is that he is a leader of the Jewish emigration movement and a human rights activist. In the Soviet Union that in itself can be a crime.

How many Soviet dissidents are in Shcharansky's position is unclear. What is clear, however, is that a dissident need not be physically imprisoned to be confined in the Soviet Union.

Vladimir Slepak, a Russian Jew, is a case in point. For the past eight years, he has attempted to emigrate from the Soviet Union, but to no avail. Instead, he is under harassment by the KGB and as recently as two weeks ago reportedly was placed under house arrest.

In one of his last public acts, the late Sen. Hubert Humphrey wrote to Anatoly Dobrynin, the Soviet Ambassador to the United States, to urge the Russians to permit Mr. Slepak and his family to emigrate.

In a subsequent letter to a friend, Sen. Humphrey acknowledged that this can be "a frustrating exercise, as so often these overtures fall on deaf ears. But we do keep trying and once every so often, to my near amazement, a family such as the Slepaks gets out. I hope such is the case this time."

The Carter Administration deserves immense credit for its elevating the concern over human rights to the public stage. It must be wary, however, of becoming reticent as its efforts fall on "deaf ears." As Sen. Humphrey aptly recognized, a measure of a country's greatness is how persistent it is in trying to enhance human rights.

And, as Sen. Humphrey recognized to his "near amazement," those efforts can be successful.

THE PRESIDENTIAL MESSAGES: THE STATE OF THE UNION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for February 1, 1978, into the CONGRESSIONAL RECORD:

THE PRESIDENTIAL MESSAGES: THE STATE OF THE UNION

The most important presidential communications of the year—the State of the Union address, the budget message and the economic message—have arrived on Capitol Hill within the last few days in a blizzard of policy papers. These messages set the national goals for 1978, define the agenda of Congress and set the tone for discussion of the issues.

The State of the Union address had an overtone of conservatism, moderation and conciliation. In a display of modesty unusual for a chief executive, President Carter admitted he had no simple answers and acknowledged that he and Congress had failed the American people by not developing an energy program. He reached out for a partnership with Congress and the people in an effort to solve the problems.

Despite the President's image as a man who would shake up Washington, the State of the Union message was surprising for its lack of dramatics. In it the President launched no thrilling new federal venture or call to action. He backed off or delayed his requests for universal voter registration, comprehensive health insurance and complete reform of the tax code, and he provided only the beginnings of reform of the welfare program. In his fleeting review of the world and its troubles, President Carter described some progress but was more modest than exuberant, more keenly aware of the problems than satisfied with his successes. He claimed that his commitment to human rights had helped to increase freedom across the world. He also applauded the role of the United States in maintaining the momentum of the peace talks in the Middle East, pushed for approval of the Panama Canal treaties spoke carefully of the SALT II negotiations and restated his intention to reduce arms transfers.

The State of the Union address was restrained, but it showed a sensitivity to the burdens that government places on people. The President noted that people are sick and tired of federal paperwork, government red tape, bureaucratic inefficiency and the gobbledygook of federal regulations. He pointed

out that government regulations add to costs and raise prices and he conceded that the scope of regulation has been excessive. A number of remedies were suggested, including civil service reform and abolition of unnecessary federal boards and commissions.

Throughout the speech a central theme was that government cannot solve all of our problems. It cannot, the President said, "eliminate poverty, provide a bountiful economy, reduce inflation, save our cities, cure illiteracy, provide energy, or mandate goodness." While admitting that government programs can sometimes help, he argued that we must turn to the private sector for the bulk of permanent job opportunities. Private business, not the government, must lead the way toward further economic expansion.

It is remarkable to hear an American President talk about limited government. In doing so, President Carter defined his duties and powers in a manner which most of his predecessors would have rejected. Although he recognized the constructive role of federal action in many instances, he may have contributed, perhaps inadvertently, to the rising skepticism about the usefulness of federal programs.

President Carter offered no succinct or memorable summary of his vision for America. He did not reach for rhetorical heights, but instead presented the nation with a balance sheet of its problems and a catalogue of of his prescriptions for them. He said the overall State of the Union was sound and that we live in times when profound national interests are at stake as we deal with a number of persistent problems which have grown steadily worse over the years. Predictably, the President expressed confidence in the future of the country and a feeling that America's best years are still ahead. Although many persons are puzzled by his ideological compass, the speech he gave showed the President to be pragmatic and moderate.

I sensed that the President was trying to redefine his leadership and sharpen the focus of his presidency in the State of the Union address. In my view he stressed the right issues: energy, jobs, inflation, economic growth and the proper role of government. Understandably, these are the issues that spurred criticism of his first year as President, with critics claiming that he demanded passage of too many programs. My feeling is that the speech established a sharp set of priorities. The President did not present to Congress a long "shopping list" of bills to be enacted. Rather, he talked about the really important problems of the day and suggested realistic, achievable solutions.

PROTECTING AMERICANS FROM OVERPAYING THEIR FEDERAL INCOME TAXES

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 1, 1978

Mr. KASTEN. Mr. Speaker, every year thousands of senior citizens needlessly overpay their Federal income taxes.

Many older Americans pay more taxes than are legally due because they are not aware of the special deductions and tax relief measures that can save them precious dollars.

Another reason is that, like millions of Americans, they are overwhelmed by the complexity of the tax law and tax forms.

With the costs of health care, food, utilities, and other necessities constantly on the rise, it is particularly important that senior citizens, many of whom live on fixed incomes, pay no more than is legally due.

The Senate Committee on Aging once again this year has prepared a convenient checklist to help older Americans prepare their tax returns and avoid overpaying their taxes.

The checklist reflects changes in the tax law for 1977. Several provisions—such as the "zero bracket amount" (standard deduction), new tax tables and the general tax credit—will ease the tax burden for many older Americans.

In fact, the checklist can be useful for the vast majority of taxpayers, young and old, in assuring that they claim deductions, credits and exemptions to which they are legitimately entitled. It can help in determining whether it would be more advantageous to itemize deductible expenses or claim the standard deduction.

It can also be useful for taxpayers who discover that they forgot to claim an allowable deduction in a previous year. These individuals can still obtain a refund for their expenditures by filing an amended return—form 1040X—for the year in question. However, this form must be filed within 3 years after the original return was due or filed, or within 2 years from the time the tax was paid, whichever is later.

Mr. Speaker, at this point I include the committee's checklist in the RECORD so that I can make it available to my constituents in Wisconsin.

PROTECTING OLDER AMERICANS AGAINST OVERPAYMENT OF INCOME TAXES

(A Revised Checklist of Itemized Deductions for Use in Taxable Year 1977)

CHECKLIST OF ITEMIZED DEDUCTIONS FOR SCHEDULE A (FORM 1040)

MEDICAL AND DENTAL EXPENSES

Medical and dental expenses (unreimbursed by insurance or otherwise) are deductible to the extent that they exceed 3 percent of a taxpayer's adjusted gross income (line 31, Form 1040).

INSURANCE PREMIUMS

One-half of medical, hospital or health insurance premiums are deductible (up to $150) without regard to the 3 percent limitation for other medical expenses. The remainder of these premiums can be deducted, but is subject to the 3 percent rule.

DRUGS AND MEDICINES

Included in medical expenses (subject to 3 percent rule) but only to extent exceeding 1 percent of adjusted gross income (line 31, Form 1040).

OTHER MEDICAL EXPENSES

Other allowable medical and dental expenses (subject to 3 percent limitation):

Abdominal supports (prescribed by a doctor);
Acupuncture services;
Ambulance hire;
Anesthetist;
Arch supports (prescribed by a doctor);
Artificial limbs and teeth;
Back supports (prescribed by a doctor);
Braces.

Capital expenditures for medical purposes (e.g., elevator for persons with a heart ailment)—deductible to the extent that the cost of the capital expenditure exceeds the increase in value to your home because of the capital expenditure. Taxpayer should have an independent appraisal made to reflect clearly the increase in value.

Cardiographs;
Chiropodist;
Chiropractor;
Christian Science practitioner, authorized;
Convalescent home (for medical treatment only);
Crutches;
Dental services (e.g., cleaning, X-ray, filling teeth);
Dentures;
Dermatologist;
Eyeglasses;
Food or beverages specially prescribed by a physician (for treatment of illness, and in addition to, not as substitute for, regular diet; physician's statement needed);
Gynecologist;
Hearing aids and batteries;
Home health services;
Hospital expenses;
Insulin treatment;
Invalid chair;
Lab tests;
Lipreading lessons (designed to overcome a handicap);
Neurologist;
Nursing services (for medical care, including nurse's board paid by you);
Occupational therapist;
Ophthalmologist;
Optician;
Optometrist;
Oral surgery;
Osteopath, licensed;
Pediatrician;
Physical examinations;
Physical therapist;
Physician;
Podiatrist;
Psychiatrist;
Psychoanalyst;
Psychologist;
Psychotherapy;
Radium therapy;
Sacroiliac belt (prescribed by a doctor);
Seeing-eye dog and maintenance;
Speech therapist;
Splints;
Supplementary medical insurance (Part B) under Medicare;
Surgeon;
Telephone/teletype special communications equipment for the deaf;
Transportation expenses for medical purposes (7¢ per mile plus parking and tolls or actual fares for taxi, buses, etc.)
Vaccines;
Vitamins prescribed by a doctor (but not taken as a food supplement or to preserve general health);
Wheelchairs;
Whirlpool baths for medical purposes;
X-rays.

TAXES

Real estate;
State and local gasoline;
General sales;
State and local income;
Personal property.

If sales tax tables are used in arriving at your deduction, you may add to the amount shown in the tax tables only the sales tax paid on the purchase of five classes of items: automobiles, airplanes, boats, mobile homes, and materials used to build a new home when you are your own contractor.

When using the sales tax tables, add to your adjusted gross income any nontaxable income (e.g., Social Security, Veterans' pensions or compensation payments, Railroad Retirement annuities, workmen's compensation, untaxed portion of long-term capital gains, recovery of pension costs, dividends untaxed under the dividend exclusion, interest on municipal bonds, unemployment compensation and public assistance payments).

CONTRIBUTIONS

In general, contributions may be deducted up to 50 percent of your adjusted gross income (line 31, Form 1040). However, contributions to certain private nonprofit foundations, veterans organizations, or fraternal

societies are limited to 20 percent of adjusted gross income.

Cash contributions to qualified organizations for (1) religious, charitable, scientific, literary or educational purposes, (2) prevention of cruelty to children or animals, or (3) Federal, State or local governmental units (tuition for children attending parochial schools is not deductible). Fair market value of property (e.g., clothing, books, equipment, furniture) for charitable purposes. (For gifts of appreciated property, special rules apply. Contact local IRS office.)

Travel expenses (actual or 7 cents per mile plus parking and tolls) for charitable purposes (may not deduct insurance or depreciation in either case).

Cost and upkeep of uniforms used in charitable activities e.g., scoutmaster).

Purchase of goods or tickets from charitable organiztaions (excess of amount paid over the fair market value of the goods or services).

Out-of-pocket expenses (e.g., postage, stationery, phone calls) while rendering services for charitable organizations.

Care of unrelated student in taxpayer's home under a written agreement with a qualifying organization (deduction is limited to $50 per month).

INTEREST

Home mortgage.

Auto loan.

Installment purchases (television, washer, dryer, etc.).

Bank credit card—can deduct the finance charge as interest if no part is for service charges, loan fees, credit investigation fees, or similar charges.

Points—deductible as interest by buyer where financing agreement provides that they are to be paid for use of lender's money. Not deductible if points represent charges for services rendered by the lending institution (e.g., VA loan points are service charges and are not deductible as interest). Not deductible is paid by seller (are treated as selling expenses and represent a reduction of amount realized).

Penalty for prepayment of a mortgage—deductible as interest.

Revolving charge accounts—may deduct the "finance charge" if the charges are based on your unpaid balance and computed monthly.

Other charge accounts for installment purchases—may deduct the lesser of (1) 6 percent of the average monthly balance (average monthly balance equals the total of the unpaid balances for all 12 months, divided by 12) or (2) the portion of the total fee or service charge allocable to the year.

CASUALTY OR THEFT LOSSES

Casualty (e.g., tornado, floor, storm, fire, or auto accident provided not caused by a willful act or willful negligence) or theft losses to nonbusiness property—the amount of your casualty loss deduction is generally the lesser of (1) the decrease in fair market value of the property as a result of the casualty, or (2) your adjusted basis in the property. This amount must be further reduced by any insurance or other recovery, and, in the case of property held for personal use, by the $100 limitation. You may use Form 4684 for computing your personal casualty loss.

MISCELLANEOUS

Appraisal fees for casualty loss or to determine the fair market value of charitable contributions.

Union dues.

Cost of preparation of income tax return.

Cost of tools for employee (depreciated over the useful life of the tools).

Dues for Chamber of Commerce (if as a business expense).

Rental cost of a safe-deposit box for income-producing property.

Fees paid to investment counselors.

Subscriptions to business publications.

Telephone and postage in connection with investments.

Uniforms required for employment and not generally wearable off the job.

Maintenance of uniforms required for employment.

Special safety apparel (e.g., steel toe safety shoes or helmets worn by construction workers; special masks worn by welders).

Business entertainment expenses.

Business gift expenses not exceeding $25 per recipient.

Employment agency fees under certain circumstances.

Cost of a periodic physical examination if required by employer.

Cost of installation and maintenance of a telephone required by the taxpayer's employment (deduction based on business use).

Cost of bond if required for employment.

Expenses of an office in your home if employment requires it.

Payments made by a teacher to a substitute.

Educational expenses required by your employer to maintain your position or for maintaining or sharpening your skills for your employment.

Political Campaign Contributions.—Taxpayers may not claim either a deduction (line 31, Schedule A, Form 1040) or a credit (line 38, Form 1040), for campaign contributions to an individual who is a candidate for nomination or election to any Federal, State, or local office in any primary, general or special election. The deduction or credit is also applicable for any (1) committee supporting a candidate for Federal, State, or local elective public office, (2) national committee of a national political party, (3) State committee of a national political party, or (4) local committee of a national political party. The maximum deduction is $100 ($200 for couples filing jointly). The amount of the tax credit is one-half of the political contribution, with a $25 ceiling ($50 for couples filing jointly).

PRESIDENTIAL ELECTION CAMPAIGN FUND

Additionally, taxpayers may voluntarily earmark $1 of their taxes ($2 on joint returns) for the Presidential Election Campaign Fund.

ADDITIONAL INFORMATION

For any questions concerning any of these items, contact your local IRS office. You may also obtain helpful publications and additional forms by contacting your local IRS office.

OTHER TAX RELIEF MEASURES

Filing status:	*Required to file a tax return if gross income is at least—*
Single (under age 65)	$2,950
Single (age 65 or older)	3,700
Qualifying widow(er) under 65 with dependent child	3,950
Qualifying widow(er) 65 or under with dependent child	4,700
Married couple (both spouses under 65) filing jointly	4,700
Married couple (1 spouse 65 or older) filing jointly	5,450
Married couple (both spouses 65 or older) filing jointly	6,200
Married filing separately	750

Additional Personal Exemption for Age.—Besides the regular $750 exemption allowed a taxpayer, a husband and wife who are 65 or older on the last day of the taxable year are each entitled to an additional exemption of $750 because of age. You are considered 65 on the day before your 65th birthday. Thus, if your 65th birthday is on January 1, 1978, you will be entitled to the additional $750 personal exemption because of age for your 1977 Federal income tax return.

"Zero Bracket Amount" (Standard Deduction).—The former standard deduction has been replaced by a flat amount the law calls "zero bracket amount." This amount depends on your filing status. It is no longer a separate deduction as such; instead, the equivalent amount is built into the new simplified tax tables and tax rate schedules. Since this amount is built into the tax tables and tax rate schedules, taxpayers who itemize deductions will need to make an adjustment. However, itemizers will not experience any change in their tax liability and the tax computation will be simplified for many itemizers.

New Tax Tables.—New simplified tax tables have been developed to make it easier for you to find your tax if your income is under certain levels. Now, even if you itemize deductions, you may be able to use the tax tables to find your tax easier. In addition, you no longer need to deduct $750 for each exemption or figure your general tax credit, because these amounts are also built into the tax table for you.

General Tax Credit.—The general tax credit has been revised to take into consideration the exemptions for age and blindness. Married taxpayers filing separate returns will now be limited to a credit based on $35 per exemption.

Multiple Support Agreements.—In general, a person may be claimed as a dependent of another taxpayer, provided five tests are met: (1) Support, (2) gross income, (3) member of household or relationship, (4) citizenship, and (5) separate return. But in some cases, two or more individuals provide support for an individual, and no one has contributed more than half the person's support. However, it still may be possible for one of the individuals to be entitled to a $750 dependency deduction if the following requirements are met for multiple support:

1. Two or more persons—any one of whom could claim the person as a dependent if it were not for the support test—together contribute more than half of the dependent's support.

2. Any one of those who individually contribute more than 10% of the mutual dependent's support, *but only one of them,* may claim the dependency deduction.

3. Each of the others must file a written statement that he will not claim the dependency deduction for that year. The statement must be filed with the income tax return of the person who claims the dependency deduction. Form 2120 (Multiple Support Declaration) may be used for this purpose.

Sale of Personal Residence by Elderly Taxpayers.—A taxpayer may elect to exclude from gross income part or, under certain circumstances, all of the gain from the sale of his personal residence, provided:

1. He was 65 or older before the date of the sale, and

2. He owned and occupied the property as his personal residence for a period totaling at least 5 years within the 8-year period ending on the date of the sale.

Taxpayers meeting these two requirements may elect to exclude the entire gain from gross income if the adjusted sales price of their residence is $35,000 or less. (This election can only be made once during a taxpayer's lifetime.) If the adjusted sales price exceeds $35,000, an election may be made to exclude part of the gain based on a ratio of $35,000 over the adjusted sales price of the residence. Form 2119 (Sale or Exchage of Personal Residence) is helpful in determining what gain, if any, may be excluded by an elderly taxpayer when he sells his home.

Additionally, a taxpayer may elect to defer reporting the gain on the sale of his personal residence if within 18 months before or 18 months after the sale he buys and oc-
